Mariner IV science subsystem design and integration of seven scientific instruments and three ancillaries into spacecraft 04 p0519 A66-13578

Data handling and telemetry requirements for manned scientific traverse, discussing MOL instrumentation and data parameters 04 p0478 A66-13591

Complex and hand-held instrumental devices for celestial navigation, noting Apollo scanner and sextant assembly 04 p0521 A66-14024

System and mission requirements of Lunar Mobile Laboratory, noting design and operation characteristics 09 p1364 A66-20160

Instrumentation and design of scientific payload carried by Mariner

IV 09 p1464 A66-20181

Astronomical research possibilities, using manned Earth orbital spacecraft 10 p1608 A66-21531

Gravity gradient sensor application to manned orbital spacecraft, noting instrumentation for various functions 10 p1535 A66-21533

Design of Malfunction Detection System used on board orbiting laboratory type vehicles to monitor and evaluate critical signals 10 p1538 A66-22043

Spacecraft tape recorders, noting necessary characteristics for applicability 11 p1706 A66-22956

Liquid hydrogen tank level in space measured by applying known impulse and determining resulting acceleration of container 11 p1706 A66-22957

Post-Apollo experiments for space 11 p1775 A66-23075

Telemetry and data processing systems and sensor equipment of Mariner IV including TV camera, magnetometer, ion chamber, plasma probe, etc 11 p1778 A66-23115

Spacecraft transponder with reentrant mode TWT amplifier 12 p1836 A66-24158

Space instrumentation for Martian exploration, discussing biological, geophysical, meteorological and engineering equipment, payload mass ratio, etc 13 p2078 A66-25515

NASA Lunar Orbiter program to place unmanned spacecraft into orbit around Moon 13 p2078 A66-25604

Instrumentation and experiments performed by Mariner IV 14 p2394 A66-28356

Aerospace technology, spacecraft and spacecraft systems, launching, control, recovery, etc - Space Congress, Cocoa Beach, Florida, March 1966 14 p2388 A66-28401

Long term solar simulation test, noting spacecraft performance, equipment design, instrumentation, etc 16 p2678 A66-30469

Manned spaceflight analytical instrumentation uses design tradeoff of reduction in size with loss of versatility 17 p2867 A66-32677

Guidance and control systems of Mariner planetary spacecraft, noting requirements, flight performance, systems configuration, etc 18 p3242 A66-33852

Thermal noise in internal measuring instruments affecting limitations on spacecraft open-loop inertial autonomous control system precision 18 p3132 A66-33872

Terminal guidance system instrumentation for Surveyor project lunar soft-landing spacecraft 18 p3132 A66-33881

RT Data Automation System automatically controls and synchronizes data-gathering sequence of cruise instruments of Mariner IV spacecraft 19 p3307 A66-35668

Instrumentation of bending moments on large space boosters, discussing ground wind restrictions, telemetry system used, data transmission link, etc 19 p3356 A66-35678

Integration of spacecraft tracking, telemetry and command systems using frequency multiplex subcarriers and angle modulated RF signal 19 p3300 A66-35681

Refractory metals use in spacecraft strain-measurement instrumentation 19 p3371 A66-36159

Refractory materials in thermionic converters for spacecraft use, noting manufacturing problems and performance characteristics 19 p3371 A66-36162

Acquisition phase of attitude control function of space vehicle, using noisy measurements on one state 20 p3658 A66-36867

Interface between aerospace systems with man, spacecraft and supporting ground stations 20 p3662 A66-37185

Data acquisition and analysis for quantitative and qualitative assessment of complex space vehicle hardware 20 p3523 A66-37975

Vehicle structures combining as antenna functions, using spaces between bolts of flange joints as slot antennas 20 p3533 A66-38260

Mariner IV temperature control subsystem hardware, examining thermal shields, thermally actuated louver system and

flexible multilayer shields [ASME PAPER 66-MD-64] 21 p3818 A66-38899

Computational limitations of onboard orbiting computers such as fixed point arithmetic, limited word length and solution techniques 21 p3766 A66-38847

Packaging technique for producing rendezvous radar and transponder notes structural design, reliability, cooling, outgassing, humidity, etc 21 p3715 A66-39000

Reduced-scale models for predicting image degradation due to nonuniform temperature and resulting deformations of structural optical elements in large spaceborne telescopes 22 p3889 A66-40203

On board computer simultaneously processing spaceborne data including support, energy management, human performance control, etc 22 p3871 A66-40703

Associative memory organizational approaches for onboard data processing spacecraft 22 p3871 A66-40703

Automated biological laboratory with initial missions to Mars, noting functions operation and necessary instrumentation 24 p4167 A66-42603

Scientific objectives and instrumentation for solar probes, emphasizing flare investigation 24 p4277 A66-42603

Navigation, guidance and control system instrumentation for Apollo manned lunar landing mission [AGARDOGRAPH 105] 24 p4236 A66-43123

Inertial measurement unit and pulse torquing of Apollo spacecraft, noting components and operation [AGARDOGRAPH 105] 24 p4215 A66-43123

SPACECRAFT LANDING

Spacecraft landing systems, examining laboratory and full-size studies with steerable parachutes 04 p0584 A66-13592

Emission and absorption of radiant energy in model Martian atmosphere composed of 15 percent carbon dioxide and 85 percent nitrogen by volume 05 p0768 A66-15770

Rotor recovery system for spacecraft landing 08 p1303 A66-18822

Northrop Cloverleaf steerable parachute combined with horizontal thrust rocket engine in descent system for manned Mars landing vehicles [AIAA PAPER 65-385] 16 p2810 A66-30900

Vertical landing on atmosphereless body under constant thrust in high order approximate solution 17 p3017 A66-33242

Surveyor vernier propulsion system discussing design of thrust chamber propellant tank assemblies, functions of VPS, etc [AIAA PAPER 66-593] 20 p3629 A66-37633

Theoretical and experimental data on Apollo command module during water impact 20 p3664 A66-38116

Land landing system for Apollo spacecraft with roll control, steerable parachutes and landing rocket 22 p3987 A66-40611

Curvature distribution vs slopes distribution as indicator of surface roughness for spacecraft landings 24 p4279 A66-42788

SPACECRAFT MANEUVER

Computation capability onboard manned spacecraft of out-of-plane maneuvers achieving specified ground track 02 p0256 A66-11855

Lateral maneuver capability of high lift drag ratio used to extend period of daylight landings from orbit 03 p0390 A66-12777

Use of lifting upper stage to achieve large offsets during ascent to orbit [AIAA PAPER 66-60] 06 p0960 A66-17100

Analytic determination of basic parameter of time, consumption and acceleration for spacecraft maneuvers 12 p1948 A66-23911

Reentry flight corridor depth reduction as result of inadequate flight data at hyperbolic speeds, noting overshoot limit and inverted attitude [AIAA PAPER 65-19] 12 p1952 A66-24699

Test program for Gemini Attitude Control and Maneuver Electronics /ACME/ system establishment and execution 16 p2676 A66-30433

Analytic solution in terms of modified Bessel functions of synergetic turn in exponential atmosphere, using spacecraft engines only for drag cancellation and orbit

sming
 AA PAPER 66-487] 16 p2811 A66-31493
 erplanetary manned spacecraft
 euevers including perihelion brake, off-
 helion acceleration and retromaneuvers
 heliocentric planet-approach maneuvers
 AA PAPER 65-695] 19 p3462 A66-35902
 e of lifting upper stage to achieve large
 ets during ascent to orbit
 AA PAPER 66-60] 23 p4132 A66-41114
 itical Data Recorder /CDR/, small
 nomous instrumentation package to be
 ied aboard space vehicle and furnish
 on series of
 uevers 24 p4212 A66-42684
SPACECRAFT MECHANISM LUBRICATION
 ibrant selection for lunar missions and
 ned spacecraft based on compatibility
 n oxygen-rich environment, propellant,
 ic coatings and sliding friction behavior
 vacuum
 LE PAPER 66AM 7A2] 16 p2712 A66-30415
 ibration for spacecraft application
 er space conditions of vacuum,
 erture and
 ation 18 p3117 A66-34650
SPACECRAFT MODEL
 alf-scale thermal model of Mariner IV
 ecraft tested in simulated solar
 ironment
 AA PAPER 66-23] 06 p0960 A66-17084
 uilibrium temperature measurements of
 rmal scale model used for spacecraft
 ing in cold wall vacuum
 umber 14 p2270 A66-27886
 ermal-vacuum performance testing of
 ed models as technique for reducing
 evelopment costs of
 ecraft 22 p3888 A66-40211
 eady state and transient thermal
 eavior of truncated cone predicted from
 ervation on half-and quarter-scale
 rmal models 22 p3888 A66-40212
 alf-scale thermal model of Mariner IV
 ecraft for solar simulation and high
 eum testing in JPL 10-ft space
 ulator 22 p3888 A66-40213
 ale model for solar radiation simulation
 tting of micrometeoroid detection
 ellite 22 p3889 A66-40214
SPACECRAFT MOTION
 atellite orbital paths determined by
 rticular solution of general basic
 uations 01 p0137 A66-10447
 imulation method for confirming
 mputations of space vehicle motions
 ntinuing after firing around gravity center
 evehicle 02 p0215 A66-11673
 roperties of linearized system of
 uations of perturbed motion and
 plication to motion of center of mass of
 ace vehicle 06 p0957 A66-17169
 pacecraft motion in rarefied plasma in
 osphere and space, considering plasma
 ability and effects of magnetic and
 etric fields 09 p1464 A66-21015
 wo generalized matrix forms of linear
 imates for spaceship motion derived,
 sed on maximum probability
 ution 11 p1774 A66-23037
 ook on artificial satellite motion relative
 center of mass and effects on
 easurements, observation and system
 rformance 14 p2379 A66-27200
 orbit design problems and spacecraft
 tion about center of
 ass 15 p2596 A66-29159
SPACECRAFT ORBIT
 Optimum three-impulse rotation of plane
 icular orbit 16 p2806 A66-31627
 accuracy requirements for two-way
 acecraft Earth-Moon orbit trajectory are
 eater for minimum initial velocity and in
 ar proximity, considering solar gravity
 rturbation effect 19 p3460 A66-35721
SPACECRAFT ORBITAL ASSEMBLY
 ace station design trends, noting
 nctional requirements, payload capability,
 istics and launch 13 p2193 A66-25759
SPACECRAFT ORBITAL RENDEZVOUS
 Optimal rendezvous maneuver calculated
 tween propelled spacecraft and
 propelled target moving in elliptical orbit
 rbitrary eccentricity 11 p1768 A66-22457
 rendezvous-maneuver of thrusted space
 hicle with unthrusted target flying in

elliptical orbit, examining computation of
 rendezvous acceleration for orbital
 transfer 20 p3662 A66-37390
SPACECRAFT PERFORMANCE
 Logbook account of Gemini VI and VII
 missions 11 p1777 A66-22252
 Digital computer automatic checkout
 equipment for Saturn
 spacecraft 13 p2057 A66-25260
 Laboratory tests on complete systems for
 reliability of Earth satellites, noting effect
 of time and thermal level on problem
 detection, comparison of space problems
 with simulated space problems,
 etc 16 p2677 A66-30449
 Intensity display system similar to radar
 output, showing real time intensity and
 pattern variations created by solar lamp
 modules in testing of spacecraft systems in
 simulation facilities 16 p2680 A66-30497
 Gemini extravehicular spacecraft
 maintenance experiments under simulated
 conditions 19 p3364 A66-35965
 Apollo Spacecraft Test Data Evaluation
 System, noting functions, operation and
 performance 20 p3662 A66-37247
 Pioneer VI spacecraft design, noting
 performance and instrument
 payload 20 p3664 A66-38064
 Single-axis meter design and development
 for measuring feeble torques on massive
 bodies, discussing calibration, testing
 results, evaluation of static dipole moments
 and spacecraft spin-rate control
 moments 21 p3722 A66-38880
 Antenna systems for deep space
 communication emphasizing ground station,
 balancing of ground antenna aperture with
 spacecraft performance, arrays,
 etc 24 p4171 A66-42244
 Low energy proton measurements in
 magnetosphere using Mariner IV
 spacecraft 24 p4263 A66-42602
SPACECRAFT POSITION INDICATOR
 Positional coordinates of spacecraft
 determined by algorithm, using distance
 from three predetermined points as found
 by rangefinders 15 p2447 A66-28505
 Position and flight-path control techniques
 for satellites and space
 probes 18 p3246 A66-34677
 Spaceflight radio navigation, detailing
 position finding methods, active and passive
 radar control and interferometer
 control 18 p3133 A66-35241
SPACECRAFT POWER SUPPLY
 Brayton cycle nuclear space power systems
 and heat transfer 01 p0016 A66-10913
 Optimum power conditioning system and
 electronic circuitry for maximum efficiency
 and reliability, lowest weight and other
 performance factors in space-vehicle
 design 02 p0179 A66-11280
 Satellite solar array systems utilizing
 adhydrode Ni-Cd and Ag-Cd cells and HF
 silicon power transistors 02 p0180 A66-11281
 Reliability and design factors for space
 power conditioning equipment examining
 peak power, component part specifications,
 integrated circuits and failure
 analysis 02 p0180 A66-11283
 Hydrogen fuel cells for space use noting
 Bacon cells, membrane cells and Gemini and
 Apollo fuel cells 03 p0323 A66-12482
 Solar sail attitude stabilizer integration
 with thermionic power generation to obtain
 weight, simplicity and reliability
 advantages 03 p0431 A66-12762
 Heat dissipation values for spacecraft
 silver oxide-zinc primary and nickel oxide-
 cadmium secondary batteries determined
 with calorimeter 03 p0323 A66-12772
 Nickel-cadmium battery development for
 use in D-I satellite undertaken by French
 CNES /National Center of Space
 Research/ 03 p0323 A66-13025
 Communications satellite technology
 problems discussing synchronization of orbit,
 attitude stabilization, lifetime and power
 supply 04 p0475 A66-13499
 Electrochemical current generator
 principles based on oxyhydrogen fuel cell
 for space travel, stressing regeneration by
 using solar radiation in
 photochemistry 04 p0459 A66-13545
 Nuclear power systems for spaceflight
 considering isotope batteries, energy source

reactors and nuclear
 drives 04 p0544 A66-13547
 Thermionic converters used in combination
 with core reactor for auxiliary propulsion of
 spacecraft 04 p0573 A66-13548
 Design and test procedures for batteries
 and voltage regulator of power subsystem
 for Ranger TV system 04 p0459 A66-13582
 Pyrotechnics for efficient preheating of
 space power systems by simple lightweight
 chemical blends that produce heat
 pyrotechnically 04 p0460 A66-13926
 Man-powerplant reliability interface,
 emphasizing manned vs automatic sensing
 and control 05 p0627 A66-15013
 Rankine cycle technology programs noting
 use of stainless steel bimetallic systems,
 boiler and condensor problems, turbine
 operation, etc 05 p0612 A66-15169
 System for nuclear auxiliary power,
 covering spaceflight test of SNAP-10A,
 system testing, performance evaluation,
 etc 06 p0907 A66-15926
 Electric power supply for medium-sized
 satellite, considering onboard solar cell
 system, cadmium-nickel batteries, regulators
 and converters 07 p0991 A66-17821
 Auxiliary power devices using solar,
 chemical and nuclear
 sources 07 p0992 A66-18305
 Fuel cell development, detailing Gemini,
 Apollo and asbestos
 systems 07 p0995 A66-18324
 Solar energy conversion into electrical
 energy by photovoltaic cells for satellite
 power source 08 p1267 A66-18615
 Nickel-cadmium, silver-cadmium and silver-
 zinc alkaline batteries for secondary
 spacecraft power supplies
 [AIAA PAPER 64-455] 08 p1168 A66-18813
 Power plants and direct energy conversion
 in space vehicles 08 p1168 A66-19018
 Load-voltage battery
 charger power-
 optimizing regulator for maintaining
 continuous maximum power loading on solar
 cells under various
 environments 08 p1169 A66-19495
 Space vehicle automatic electric power
 system test mockup 08 p1169 A66-19503
 Fuse evaluation for spacecraft power
 system 08 p1196 A66-19504
 Spacecraft design problems with solar
 power supply systems, noting solar cell
 characteristics in space
 environment 08 p1173 A66-19663
 Solar cell orbital performance
 measurement, discussing apparatus, V-I
 characteristics, spectral response and
 calibration 08 p1174 A66-19664
 Solar energy for power requirement aboard
 satellites and spacecraft, noting thermal
 conversion efficiency by various methods for
 capturing solar radiation 08 p1174 A66-19753
 Electric power plant survey for space
 application, noting Rankine and Brayton
 cycles 10 p1485 A66-21464
 Hydrogen-oxygen fuel cell for spacecraft
 power system 10 p1485 A66-21465
 Power conditioning system for ion engine
 used in Sert-I flight test
 [AIAA PAPER 64-681] 12 p1937 A66-24691
 Design, efficiency and reliability of electric
 power system related to mission and orbit
 of communications satellites
 [AIAA PAPER 66-299] 12 p1804 A66-24766
 Three-day battery capable of operation at
 temperature of 425 degrees C for use on
 lunar and planetary
 probes 13 p1999 A66-25691
 Space power systems engineering -
 Conference Philadelphia, September
 1964 13 p2002 A66-26604
 Nuclear power supply adapted as electrical
 power source for manned space stations
 [AIAA PAPER 64-713] 13 p2068 A66-26607
 Multi-kw solar cell power system meeting
 requirements of orbiting space station
 [AIAA PAPER 64-717] 13 p2004 A66-26612
 Weight advantages of solar-thermionic
 systems as compared to photovoltaic system
 [AIAA PAPER 64-718] 13 p2004 A66-26613
 Mission and vehicle requirements of space
 station logistics spacecraft influencing
 selection and integration of power
 generation system
 [AIAA PAPER 64-720] 13 p2004 A66-26615

Power source comparison for manned space stations including solar cell, thermionic, Mercury-Rankine and Brayton systems
 [AIAA PAPER 64-721] 13 p2004 A66-26616
 Fuel cells compared with other power systems for space application
 [AIAA PAPER 64-723] 13 p2005 A66-26618
 Recuperative Brayton cycle for nuclear-electric spacecraft power supplies
 [AIAA PAPER 64-757] 13 p2005 A66-26620
 Meteoroid hazard to space power plant, reevaluating particle mass, flux, density and impact
 [AIAA PAPER 64-759] 13 p2194 A66-26622
 Medium power reactor experiment /MPRE/ feasibility study to obtain mechanically simple high performance power plant
 [AIAA PAPER 64-763] 13 p2126 A66-26623
 SNAP-10a electric space power system, operational, handling and reliability requirements
 13 p2126 A66-26627
 Weight, size and volume characteristics of Mercury Rankine solar power supply for spacecraft
 [AIAA PAPER 64-724] 13 p2005 A66-26633
 Solar dynamic space power energy conversion system using Rankine cycle and organic fluid
 [AIAA PAPER 64-725] 13 p2005 A66-26634
 Brayton-cycle space power system, describing solar collector, heat receiver/storage unit, recuperator, radiator and gas bearings
 [AIAA PAPER 64-726] 13 p2006 A66-26635
 Solar concentrator fabrication for space power conversion systems, emphasizing stretch-formed aluminum method
 [AIAA PAPER 64-731] 13 p2006 A66-26637
 Solar power conversion unit consisting of thermoelectric generator, thermal storage container and waste heat radiator
 [AIAA PAPER 64-728] 13 p2006 A66-26638
 Solar energy concentrators for attaining operating temperatures for space power system conversion devices
 [AIAA PAPER 64-730] 13 p2006 A66-26640
 Solar thermionic power conversion, discussing converters, flux and temperature controls, energy storage generators, support structures, etc
 [AIAA PAPER 64-734] 13 p2006 A66-26641
 Compact lightweight space power source capable of providing more than 1500 watts of power
 [AIAA PAPER 64-739] 13 p2006 A66-26643
 Solar cells for space travel, emphasizing fabrication into modules
 [AIAA PAPER 64-738] 13 p2007 A66-26644
 Fuel cell reliability maximized and weight minimized for space mission power requirement
 [AIAA PAPER 64-746] 13 p2007 A66-26647
 Fuel cell power plant for Apollo command and service module from engineering viewpoint
 [AIAA PAPER 64-748] 13 p2007 A66-26649
 Auxiliary electrode in sealed cell to protect cell against destructive pressure rise during charging
 [AIAA PAPER 64-752] 13 p2008 A66-26653
 Model 876-C accessory power unit /APU/ for advanced continuous duty power supply for X-20 Dyna Soar space vehicle
 [AIAA PAPER 64-753] 13 p2008 A66-26654
 Intermittent propellant flow gas turbine for spacecraft power supply
 [AIAA PAPER 64-754] 13 p2008 A66-26655
 Hypergolic fueled reciprocating space power unit for electric power generation
 [AIAA PAPER 64-755] 13 p2008 A66-26656
 3-kw internal combustion engine using hydrogen and oxygen, discussing design and testing for use as space power generator
 [AIAA PAPER 64-756] 13 p2008 A66-26657
 Pulse width modulated switching voltage regulator for spacecraft power supplies
 [AIAA PAPER 64-742] 13 p2044 A66-26658
 Performance efficiency and weight considerations for liquid MHD power conversion
 [AIAA PAPER 64-760] 13 p2008 A66-26660
 Closed Brayton cycle for onboard generation of space vehicle electric power from solar, isotope and nuclear reactor energy source
 [ASME PAPER 66-GT/CLC-10] 14 p2224 A66-26983

Syncom II electrical power system, discussing design, air mass one to air mass zero extrapolation and spacial performance
 [AIAA PAPER 64-456] 14 p2226 A66-27889
 Spacecraft electric power system, discussing reliability, maintainability, control network, etc
 14 p2262 A66-28419
 Brayton cycle, Rankine cycle and thermoelectric systems considered as radioisotope secondary power systems for MOL
 [ASME PAPER 65-AV-18] 16 p2636 A66-30856
 Silicon photovoltaic cells fabrication and operating radiation-environment requirements
 16 p2636 A66-30999
 Design of isotopic heat sources for space missions, noting atmospheric contamination when source burns on reentry, source and shield weights, sealing of alpha emitters, etc
 16 p2745 A66-31710
 Suitability of Saturn IB/Centaur and Atlas/Centaur launched solar-electric propulsion vehicles for performing 0.1-AU solar probe mission
 [AIAA PAPER 66-496] 17 p2991 A66-32773
 Rankine cycle technology programs noting use of stainless steel bimetallic systems, boiler and condenser problems, turbine operation, etc
 [AIAA PAPER 65-465] 19 p3280 A66-35619
 Criteria for use of Rankine MHD systems in space
 19 p3280 A66-35802
 Spacecraft power source, discussing energy conversion, processes, solar cells, radio isotopes, thermionic power converters, turbogenerators, etc
 19 p3282 A66-36797
 Digital computer optimization program, determining minimum weight fuel cell primary power system for MOLAB
 20 p3496 A66-37156
 Electrical power control and conditioning subsystem for Manned Orbital Research Laboratory /MORL/, noting Brayton cycle, system optimization, alternator and frequency converter
 20 p3497 A66-37157
 Dynamic conversion of solar and chemical energy, discussing power conditioning, Brayton-cycle system with inert gas and spacecraft batteries
 22 p3851 A66-40128
 Unmanned lunar roving vehicle power requirements, comparing radioisotope thermoelectric generator and solar cell/battery systems
 23 p4017 A66-41104
 Solar cell as most reliable energy conversion device for near-Earth missions, noting semiconductor material and thermal stress
 23 p4017 A66-41167
 Solar hybrid systems /photovoltaic-thermoelectric and photovoltaic-thermionic/ analyzed, determining potential for missions close to Sun
 23 p4019 A66-41746
 Nuclear reactor-thermoelectric power converter for unmanned satellite application
 23 p4020 A66-41749
 Closed Brayton cycle power system for space vehicles, discussing closed loop and major components
 23 p4020 A66-41750
 SNAP Mercury Rankine space power conversion program and testing of Combined Rotating Unit-V /CRU-V/
 23 p4020 A66-41751
 Manned mission design analysis, examining spacecraft electrical power requirements, weight correlation and cost estimation
 23 p4021 A66-41753
 Solar concentrator technology, discussing design requirements of space power conversion devices and manufacturing methods
 23 p4021 A66-41757
 Isotope and solar thermoelectric generator, solar cell and battery electric power sources for unmanned scientific exploration of solar system
 24 p4162 A66-42681

SPACECRAFT PROPULSION
SA ROCKET ENGINE
 Spaceflight application of cryogenic techniques including cooling magnets, noise reduction in parametric amplifiers and quantum-electronic, superconductive and IR sensing devices
 01 p0130 A66-10789
 Space travel projects noting ion propulsion, electromagnetic drive and tests of flight simulation
 03 p0415 A66-12483
 Electric and photon propulsion systems in German-American research
 06 p0942 A66-15931
 Nuclear reactors for space and near-Earth propulsion
 07 p1111 A66-18304

Electrostatic ion propulsion and electromagnetic engine experiments
 Germany for application to space travel
 noting nuclear energy power source
 08 p1281 A66-18618
 SERT capsule tested two ion engines of space
 08 p1281 A66-18718
 Electric propulsion for space travel, discussing propellant consumption economics, mass energy, specific impulse acceleration, etc
 09 p1433 A66-19818
 ELDO launch vehicle third stage configuration, propulsion system, guidance and control system and ground installation and equipment
 09 p1464 A66-20418
 Durability test of mercury electrostatic bombardment ion thrusters, measuring lifetime, output, power efficiency, etc
 [AIAA PAPER 66-231] 11 p1760 A66-22218
 Cesium-vapor ion electrostatic drives for long-term space flight
 11 p1761 A66-23118
 Electrical propulsion of space vehicle using solar energy, electrostatic driving field plasma accelerator, etc
 [ONERA TP 328] 12 p1937 A66-24918
 Zero-gravity mercury feed system for mercury-electron bombardment spacecraft engines
 [AIAA PAPER 66-250] 13 p2172 A66-25118
 Integration of life support system and propulsion system for manned interplanetary space missions
 13 p2012 A66-25218
 Electric propulsion for space missions with regard to vehicle weight and mission cost using manned Mars flight as example
 [AIAA PAPER 64-715] 13 p2173 A66-26618
 Electron cyclotron resonance plasma thruster for spacecraft electric propulsion systems
 14 p2374 A66-27518
 Design concepts, operating constraints and performance of radioisotope propulsion systems for space probes
 14 p2330 A66-27818
 Hard superconductors as generators of strong magnetic fields to accelerate plasma in energy converters and plasma propulsion systems of spacecraft
 17 p2981 A66-32818
 Electromagnetic induction electrodeless plasma accelerator for thrust generation applicable to space vehicle propulsion
 [AIAA PAPER 66-567] 18 p3164 A66-34421
 Interstellar vehicle propelled by terrestrial laser beam
 19 p3449 A66-35481
 Pneumatic vernier engines in aircraft and spacecraft, discussing weight, gas expansion and gas temperature
 20 p3627 A66-36918
 Economic space transportation system using air breathing booster or VTVL recoverable rocket system
 21 p3821 A66-39241
 Trajectory characteristics for unmanned interplanetary missions, propulsion requirements for Earth departure and effect capture at target planets
 24 p2777 A66-42681

SPACECRAFT RADIATOR
 Proton and alpha particle effects on thermal properties of spacecraft and solar concentrator coatings of anodic-coated aluminum, zinc oxide/ potassium silicate, etc
 [AIAA PAPER 65-649] 01 p0090 A66-10231
 Heat rejection from space radiator or power system used as energy source when integrated with life support system
 02 p0186 A66-11841
 Contact effectiveness of space radiator for specific case of rectangular fin of constant thickness heated uniformly along one edge and perfectly insulated along opposite edge
 03 p0444 A66-12771
 Hypervelocity impacts into space radiator materials, discussing material evaluation for waste heat shield
 05 p0701 A66-14931
 Integration of differential equations governing thermal performance of spacecraft radiator
 [ASME PAPER 65-WA/HT-45] 05 p0792 A66-15661
 Validity of Kirchhoff law for apparent local spectral emittance and absorptance and total flux calculations for spacecraft cavities
 [AIAA PAPER 65-135] 08 p1316 A66-18771
 Cooling systems for use in space, discussing specific radiator area and specific power
 12 p1979 A66-24871
 Material and geometry aspects of meteoroid armor protection for spacecraft radiator tubes, discussing bumper-fire concept
 14 p2407 A66-28021
 Numerical methods applied to class c

ing fluid thermal problems in space
 eators for life support and auxiliary
 aer systems
 [AIAA PAPER 66-431] 18 p3097 A66-33644

SPACECRAFT RECOVERY
 erodynamic spacecraft deceleration
 eams examined by hydraulic analogy,
 ing Mach number effects on flow
 urbances 04 p0507 A66-13533

erospace Rescue and Recovery Service
 RS/ 14 p2395 A66-28455

rescuing men and equipment in space by
 ined rescue craft, unmanned craft,
 onal ejection capsules,
 20 p3665 A66-38254

oad prediction method necessitated by
 imum weight and volume requirements
 spacecraft recovery system, considering
 uniform opening of parachutes in
 ater 22 p3849 A66-40596

allistic reentry vehicle recovery via low
 ded water impact or air snatch after
 icle has flown unperturbed trajectory
 wn to altitude of maximum dynamic
 ssure 22 p3986 A66-40597

SPACECRAFT REENTRY
 ontrolled ballistic, steady lift and variable
 reentry of winged
 spacecraft 04 p0584 A66-13526

arachute operation at high Mach numbers
 dynamic pressures for reentry vehicle
 eceleration
 [AIAA PAPER 66-24] 07 p0989 A66-17888

reentry orbits for manned spacecraft using
 ydynamic lift and drag forces for
 ntry 10 p1606 A66-21264

RF technique for surveillance and tracking
 reentry capsule, in departure from
 nned reentry corridors 12 p1819 A66-24608

thermal protection system for Apollo
 amand module 14 p2393 A66-28004

atch modulation maneuver for spacecraft
 ntry
 [AIAA PAPER 65-317] 19 p3468 A66-35604

technological aspects of reentry of space
 icle fragments, considering survival
 ctors as melting point of material,
 elding structure, smoothness,
 19 p3468 A66-35635

entry Monitor System /EMS/ for
 maneuverable spacecraft, interpreting
 lay relationship to entry trajectory
 ntrol
 [AIAA PAPER 65-495] 20 p3592 A66-38160

SPACECRAFT RELIABILITY
 vailability concept in attitude control
 stem for manned Mars
 pedition 01 p0018 A66-10084

issile and spacecraft countdown and
 eting prespecified launch window
 obabilities by Markov chain
 echniques 01 p0140 A66-10087

practice reliability used in systems testing
 final check on Titan
 01 p0140 A66-10100

ajor phases in total testing program to
 idate booster in man-rated launch
 icle 01 p0141 A66-10107

ethodology for numerically defining
 ernational magnitude of space rescue
 uirements 01 p0143 A66-10792

interplanetary flight reliability problem
 ated by availability concept in terms of
 nction, duty cycle and subsequent
 liability 02 p0235 A66-11619

eliability in space vehicles - Seminar, Los
 Angeles, April 1965 05 p0770 A66-15823

eliability K-factors for space system
 lectronics 05 p0650 A66-15825

ission requirements and system reliability
 Relay communications
 07 p1001 A66-17440

ellite
 robability distribution of number of
 stem failures and generating function for
 mpound probability distribution of
 uired launches 09 p1463 A66-19911

eliability engineering concepts for
 nned spacecraft development and test
 ogram to achieve operational readiness
 th minimum flight
 12 p1884 A66-23742

ailure mode effect, block redundancy,
 onctional redundancy and cooperative
 litchannel design for system reliability in
 riner spacecraft 13 p2191 A66-25284

unar landing spacecraft analysis and
 reveyor reliability data
 13 p2192 A66-25506

Ariel II /UK-2/ international satellite
 environmental test
 program 14 p2394 A66-28426

Centaur project with assessment of
 reliability of explosive one-shot
 devices 14 p2394 A66-28444

Reliability, maintainability, and spacecrew
 safety in hypothetical manned Mars
 mission 17 p2930 A66-33174

Solid core nuclear engine clustering and
 effect of system tradeoffs on vehicle
 performance 18 p3133 A66-33810

Reliability requirements for spacecraft
 guidance and control systems, emphasizing
 redundancy in existing
 systems 20 p3596 A66-37177

Digital computer programmed optimization
 model of Earth-orbiting space station
 missions including reliability, maintainability
 and cost considerations 20 p3663 A66-37902

FR-1 satellite component reliability
 program 22 p3876 A66-40159

Space environment simulator for analysis
 of spacecraft material reliability during
 long-duration space
 mission 22 p3890 A66-40225

Reliability analysis
 techniques for
 spacecraft subsystems 23 p4047 A66-41607

Apollo spacecraft parts screening program,
 showing dependence on reliability for
 mission success 24 p4216 A66-42090

SPACECRAFT RENDEZVOUS
 Gemini spacecraft rendezvous radar device
 noting angle measurements, astronaut
 display, command link and design
 problems 01 p0105 A66-10869

Two-dimensional dynamic analysis of probe
 and drogue docking concept noting design,
 operation and
 performance 16 p2809 A66-30896

Gemini VI rendezvous procedure and
 results, showing success dependence on
 presentation to flight crew of sufficient
 information developed on
 board 17 p3016 A66-32687

Selection of comet intercept missions
 based on predictability of future returns,
 obtainability of spectroscopic data from
 Earth during intercept and launch energy
 limitations 17 p3011 A66-33388

Rendezvous between spacecraft and target
 flying in elliptic orbit of arbitrary
 eccentricity solved, using new approach
 [AIAA PAPER 66-537] 18 p3227 A66-33666

Image related scanning systems for visual
 simulation display for space rendezvous and
 docking
 [AIAA PAPER 65-263] 18 p3093 A66-33788

Spacecraft guidance during distant
 approach stage of rendezvous with orbital
 station and information on rotation of
 sighting line 18 p3245 A66-33885

Cassegrain monopulse tracking antenna for
 LEM and Command Module rendezvous
 guidance 21 p3714 A66-39524

SPACECRAFT SENSOR
 UV spectrum sensor system developed for
 satellite use 04 p0518 A66-13551

Fluid-sphere nutation
 sensor for
 determining stability of rotating
 satellite 08 p1224 A66-19490

Terrestrial test sites and aircraft flights
 used in preparing for remote sensing from
 Earth orbital spacecraft 10 p1532 A66-21525

Analysis of AVCS and HRIR pictures from
 Nimbus I satellite 11 p1729 A66-22326

Sensor requirements for midcourse
 guidance phase of spacecraft on lunar
 trajectories, with attention to optical
 measurements and statistical combining for
 trajectory estimates
 [AIAA PAPER 64-234] 12 p1910 A66-24692

Operational geographic correlation
 /gridding/ of Nimbus meteorological data
 [AIAA PAPER 66-438] 18 p3128 A66-33645

Sensors for Earth satellite orientation to
 solve general problem of space vehicle
 orientation 18 p3245 A66-33888

Space vehicle orientation with respect to
 rotating system of
 coordinates 19 p3467 A66-35279

Control signal generator and output
 characteristics of angular position and
 velocity sensors used in single-axis Sun-
 oriented system of Vostok
 spacecraft 19 p3394 A66-35280

Ultrareliable six redundant sensor attitude
 reference system for Manned Orbiting

Laboratory with limited sparing
 capability 21 p3767 A66-38892

Advanced imaging techniques for Metro
 camera for space
 applications 23 p4070 A66-41670

Frog retina layered model, stereoscopic
 system and decision/control system in
 connection with robot data reduction in
 Voyager missions 24 p4168 A66-43081

SPACECRAFT SHIELDING
 SA HEAT SHIELD
 SA RADIATION SHIELDING

Optical damage of spacecraft thermal
 control coatings in simulated space radiation
 environment of geomagnetically trapped
 particles
 [AIAA PAPER 65-646] 01 p0089 A66-10227

Spacecraft thermal control surface damage
 by solar wind bombardment in hydrogen and
 helium plasmas, with measurements of solar
 spectral reflectance and thermal emittance
 [AIAA PAPER 65-647] 01 p0089 A66-10228

Gemini ablative heat shield, noting
 nonmetallic honeycomb reinforcement of
 insulative char 02 p0294 A66-11639

Radiation shielding
 requirements for
 protection of crews of manned
 satellites 03 p0431 A66-12750

Hypervelocity impact data applied to
 synthesis of meteoroid barriers in spacecraft
 design 10 p1612 A66-21954

Space radiation shielding for space vehicles
 using electric and magnetic
 fields 11 p1778 A66-23166

Sources and effects of electrical charge
 accumulation and dissipation on
 spacecraft 11 p1778 A66-23485

Space vehicle shielding with two
 concentric toroidal superconducting coils
 providing magnetic field for deflection of
 charged particles 13 p2190 A66-25262

Electronic analog magnetic shield simulator
 /Magsim/ for producing radiation-protective
 region around space
 vehicles 16 p2681 A66-30610

Material properties and thermal inputs on
 heat shields for Mars entry, noting
 importance of insulation vs ablation due to
 uncertainties in radiant heating
 inputs 16 p2809 A66-30895

Lightweight inflatable shadow shields for
 cryogenic space vehicles and performance in
 conjunction with
 superinsulation 16 p2810 A66-30899

Number transmission coefficients for
 isotropically incident electrons determined
 for spacecraft shield design
 [AIAA PAPER 66-511] 16 p2811 A66-31497

Space radiation monitoring systems for
 categorizing particle types and
 intensities 17 p2924 A66-32164

Space vehicle hazard due to focusing of
 meteor streams by Earth in antiradiant
 direction 19 p3455 A66-35294

Lightweight insulations for space vehicle
 cryogenic storage tanks based on design
 principles of multilayer radiation
 shields 19 p3473 A66-35598

Refractory metal honeycomb structure
 fabrication for heat shield panels, using D-36
 columbium alloys 19 p3371 A66-36161

Self-sealing shield for protection of
 micrometeorite penetration in propellant
 tank 20 p3659 A66-37077

Radiation dose measurements and
 predictions for space vehicle, noting human
 response 20 p3665 A66-38352

Charged-particle shielding technology for
 spacecraft noting particle interaction with
 matter, penetration calculation and amassed
 data 20 p3665 A66-38353

Space shielding calculation techniques for
 proton penetration of slabs, thick-target
 bremsstrahlung and electron
 penetration 20 p3665 A66-38355

Multilayer insulating material thermal-
 mechanical environmental tests for use as
 heat shields in cryogenic storage tanks
 [AICE PREPRINT 22F] 22 p3997 A66-39889

Critical high temperature structural
 problems in missiles and manned lifting
 reentry vehicles, considering meteoroid
 impact and pressure vessel flaw
 growth 22 p3989 A66-40119

Simulated solar absorptance of spacecraft
 thermal control coatings determined
 calorimetrically in vacuum at room and
 cryogenic temperatures 22 p3889 A66-40217

Gemini ablative heat shield, noting nonmetallic honeycomb reinforcement of insulative char 24 p4283 A66-42773

SPACECRAFT STABILITY

Gravity gradient stabilization systems for orientation of spacecraft and for damping of associated librations 01 p0143 A66-10798

Optimum stabilization of tumbling satellite, using Hamilton-Jacobi method 04 p0585 A66-13676

Satellite control and stabilization 05 p0770 A66-15192

Passive magnetic stabilization of satellites, noting use limitations, satellite geometry, spin effects, etc 09 p1464 A66-20553

Rotating satellite stability assuming inertia axis is oriented toward Sun, noting dependency on jets of cold gas and nozzle calibration 09 p1401 A66-20659

Parametric requirements for eliminating coupling between bending, sloshing and control in large liquid-propelled elastic space vehicles 10 p1612 A66-21941

Launch vehicle, spacecraft, command and data station and data utilization for meteorological satellite systems, satellite stabilization and orbit types 11 p1777 A66-22306

Design of control deflections and structural loads of space vehicle for flight stability through atmospheric disturbances [AIAA PAPER 66-350] 12 p1954 A66-24487

Requirements for gravity gradient stabilization of medium and synchronous altitude communication satellite systems using zero gain antennas, noting stabilization accuracy, stationkeeping effects, etc [AIAA PAPER 66-303] 12 p1955 A66-24770

Synchronous orbit stationkeeping techniques, examining thrust control requirements of spin-stabilized spacecraft [AIAA PAPER 66-304] 12 p1955 A66-24771

Stabilite system, three-axis attitude control system utilizing single reaction wheel [AIAA PAPER 66-307] 12 p1955 A66-24774

Orbit precession effect on gyroscopic stabilization of satellite in geomagnetic field 14 p2391 A66-27473

Sloshing motion control of liquid-vapor interface in spacecraft fuel tanks, using dielectrophoresis 16 p2684 A66-30466

Torque-free precession of spin stabilized spacecraft, showing thrust misalignment as cause for final burnout impulse 16 p2810 A66-30903

Stability of spacecraft motion in Earth-Moon system near equatorial libration point 16 p2810 A66-31252

Optimal gain settings for atmospheric turbulence in 407 Jimsphere wind profiles [AIAA PAPER 66-484] 17 p2902 A66-32770

Spacecraft longitudinal and lateral stability along reentry trajectory during deceleration period determined, using equations of motion 17 p2846 A66-32897

Structural stability criteria of manned rotating space stations derived from elastic model experiments [AIAA PAPER 65-406] 18 p3240 A66-33822

Optimum stabilization problem for axisymmetric satellite, considering fuel consumption 19 p3467 A66-35277

Control moment gyroscope for angular momentum transfer with minimum power consumption, noting design and application for free body motion stabilization 19 p3360 A66-35962

AOSO stabilization and control system for solar experiments, noting closed loop stability and gain 21 p3819 A66-38854

Satellite gravitational stabilization system in orbital coordinate system, considering atmospheric resistance and damping natural oscillations 23 p4134 A66-41979

Periodic oscillations of satellite in plane of elliptic orbit investigated to provide passive orbital stabilization of satellite 23 p4134 A66-41980

Normal modes of libration and response to perturbing torques of satellite with attitude stabilized in all libration angles by wire arrangement 24 p4283 A66-42769

Inertia product terms effect on satellite gravitational torques 24 p4283 A66-42781

Horizon sensing problems for application in spacecraft stabilization techniques, including sensors using Earth brightness, conical

scanners and interference caused by cloud, haze and other atmospheric phenomena 24 p4235 A66-42895

SPACECRAFT STERILIZATION

Accidental biological contamination of planets during space exploration, noting different physical and chemical sterilization methods 02 p0184 A66-11609

Text on prevention of contamination of other celestial bodies by terrestrial organisms via space vehicles 08 p1177 A66-19238

Capsule sterilization, basic concepts, techniques and engineering problems 09 p1336 A66-20249

Sterilization requirements for Voyager spacecraft to ensure that no terrestrial organism contaminates Martian surface 11 p1648 A66-23171

Space probe sterilization problems, noting methods employed, development requirements, monitoring of contamination, etc 13 p2012 A66-25266

NASA sterility requirements of hardware intended to land or enter atmosphere of planet, noting design considerations, reliability, test programs, etc 13 p2012 A66-25267

System engineering techniques applied to analysis of spacecraft sterilization objectives and available technology 13 p2012 A66-25268

Sterilization requirements of spacecraft electronic systems and relation to equipment reliability 13 p2013 A66-25269

Facility for sterilization of space flight vehicles permitting sterile access to flight hardware for assembly, checkout and repair 13 p2057 A66-25270

Behavior of pyrotechnic devices and explosives studied when heated to 145 degrees C for 36 hours /three separate times/ for development of dry-heat sterilizable equipment for space vehicles 13 p2014 A66-25288

Spacecraft sterilization problem using gnotobiotic techniques and isolators, noting peracetic acid role and hot wire techniques for insertions 13 p2014 A66-25289

Number of viable aerobes and anaerobes accumulating on stainless steel surface in clean room during one year under various conditions, for spacecraft sterilization purposes 13 p2015 A66-25797

Space probe sterilization procedures, considering heat and radiation 14 p2230 A66-27844

Sterilization problem connected with Voyager life probe to Mars 15 p2442 A66-28653

Sterilization of planetary probes to free them of terrestrial microorganisms 15 p2443 A66-28684

Biological and engineering problems in spacecraft sterilization, noting heat treatment 15 p2445 A66-29996

Spacecraft sterilization techniques 16 p2642 A66-30492

Environmental testing associated with sterilization of planetary capsule, discussing time vs temperature cycles and flight acceptance 16 p2642 A66-30493

Aerospace sterility control officer and group to verify and certify spacecraft sterility 16 p2642 A66-30494

Microbial contamination control of space vehicles, noting dry heat sterilization requirements 16 p2642 A66-30496

Microbial contaminants evaluation for sterility in interiors of spacecraft, noting culturing technique 19 p3287 A66-35575

Sterilization procedures for planetary spacecraft probes ensuring clean component manufacture and hardware assembly 19 p3288 A66-35577

Mars spacecraft sterilization objectives and requirements carried out by heat-soaking, gas and other methods 19 p3288 A66-35578

Thermal sterilization environment as significant design condition for planetary lander entry-shield bond-structure combination 20 p3509 A66-38162

Parts sterilization at Jet Propulsion Laboratory 24 p4180 A66-42290

Automated biological laboratory with initial missions to Mars, noting functions operation and necessary instrumentation 24 p4167 A66-42671

Spacecraft sterilization, discussing

hardware development, reduction of biological loading, protection and inter- and surface decontamination of lander 24 p4167 A66-42671

Behavior of pyrotechnic devices and explosives studied when heated to degrees C for 36 hours /three separate times/ for development of dry heat sterilizable equipment for space vehicles 24 p4260 A66-42672

SPACECRAFT STRUCTURE

Dynamic responses of panel shells and complete equipment packages to acoustic inputs to improve fabrication techniques, flight structures 01 p0149 A66-10798

Transition from aluminum to exotic materials /Ti, Mb/ in aerospace structure, examining materials behavior and fabrication processes [SAE PAPER 650790] 01 p0088 A66-10798

Space environment effects on optimum multiwall structural design 02 p0298 A66-11000

Hypervelocity particle penetration manned space station structure, discussing hole formation and repair 10 p1612 A66-21941

Meteoroid environment, meteoroid impact hazard on spacecraft structure at meteoroid shields 13 p2193 A66-25288

Structural dynamics of Gemini program, discussing environmental prediction, component testing, docking system, stability etc 14 p2393 A66-28653

Tension string structure of high strength filaments for ultralightweight planetary entry vehicle 14 p2407 A66-28653

Response of aerospace structures to flight dynamic loads in HF range 16 p2813 A66-30466

Environment simulation for space vehicle explosive separation system testing, noting equipment, performance, etc 16 p2679 A66-30466

Book on engineering approaches to design of spacecraft structures including analytical techniques, materials, fabrication, launch enroute, etc 18 p3258 A66-34773

Vehicle structures combining as antenna functions, using spaces between bolts flange joints as slot antennas 20 p3533 A66-38222

Critical high temperature structural problems in missiles and manned lift/reentry vehicles, considering meteoroid impact and pressure vessel flaw growth 22 p3989 A66-40100

Spacecraft joint design for fabric-type flexible structures with nonflexible structural components 22 p3928 A66-40200

Optimum seal and sealants for joints and connections in spacecraft 22 p3927 A66-40200

SPACECRAFT TELEVISION

SA DIGITAL SPACECRAFT TELEVISION

Mariner IV TV system for photographing Mars surface during flyby 01 p0073 A66-11000

Ranger television system designed to transmit close-up pictures of lunar surface to Earth 02 p0189 A66-11300

History, background and purpose of Ranger missions to Moon, including spacecraft television subsystem, testing and calibration 07 p1139 A66-18300

Television camera system circuit design mission requirements and optical response for Apollo mission to Moon 08 p1222 A66-18700

Functional electronic block used in breadboard molecular circuits of prototype lunar TV camera for Apollo Lunar Excursion Module /LEM/ 08 p1196 A66-19500

Digital data compression technique applicable in spacecraft television system emphasizing bandwidth reduction techniques 16 p2653 A66-30800

Capabilities of Lunar Television Image Converter system used for digital processing of Ranger and Mariner pictures 18 p3113 A66-34400

Space photography developments and achievements, discussing electrical and photochemical techniques 18 p3114 A66-34800

Miniaturized TV system capable operation in launch and flight environment of space vehicles 20 p3557 A66-37200

Performance capabilities of Surveyor spacecraft lunar landing TV system operating in mode that reduces RF power requirements for lunar

lysis
onically spiraling ascent or descent
jectory of spacecraft in application of jet
noting characteristic mission
ameters 09 p1457 A66-20557
pproximative analysis of spacecraft
- trajectories in circular extra-atmospheric
anaorbital flight 09 p1457 A66-20574
Optimum planetary approach of vehicle
when direction of correcting pulses applied
to trajectory plane is determined from
maximum efficiency condition of
pulse 11 p1774 A66-23034
Trajectory characteristics of high-thrust
Mars missions and effect on other aspects
of mission planning 13 p2179 A66-25239
Navigation for spin stabilized deep space
interplanetary spacecraft such as Pioneer
VI, for missions to Venus, Mars and
Jupiter 14 p2329 A66-28456
Spatial trajectories of rocket under
constant thrust in planetary
field 15 p2605 A66-28504
L/D ratio for gliding recovery of first
stage of launch vehicle, using stage
separation conditions as
parameters 16 p2807 A66-30348
Three-body problem of cislunar space
flight, noting effect of solar gravitational
field on spacecraft
trajectory 16 p2804 A66-31332
Jupiter swingby missions to outer planets
[AIAA PAPER 66-536] 16 p2805 A66-31502
Linearized four-body problem, which is
perturbation of restricted three-body
problem, solved for boundedness of
solutions 17 p3006 A66-33015
AIMP-D spacecraft mission analysis,
determining launch conditions and trajectory
shaping for attaining lunar orbit, noting
errors, flight path angle, etc
[AIAA PAPER 66-535] 18 p3226 A66-33665
Spacecraft orbital parameter estimation
using automated measuring
gear 18 p3131 A66-33869
Spacecraft trajectories prediction under
discrete control 18 p3228 A66-33886
Iterative determination of space flight
trajectory and velocity represented as sum
of Kepler motions about celestial
bodies 18 p3234 A66-34635
Space mission trajectory optimization by
iterative minimizing of residual vector, using
linear correction
[AIAA PAPER 65-697] 19 p3462 A66-35903
Impulsive approximation, basis for
trajectory analyses for space missions in
which finite-thrust powered phases of finite
duration are replaced by instantaneous
changes of velocity
[AIAA PAPER 66-12] 21 p3811 A66-38698
Kalman filter divergence control, noting
analytical and empirical modification
methods 21 p3766 A66-38883
Algorithm construction for processing of
telemetry data in determination of space
vehicle trajectories, applying dynamic
filtering method 22 p3980 A66-40463
Unmanned spacecraft trajectories,
discussing flight mechanics of solar system
exploration 22 p3983 A66-40700
Spatial distribution and motion of known
asteroids analyzed in order to avoid or
maximize encounters in planning space
flight
[AIAA PAPER 66-149] 23 p4127 A66-41118
Monte Carlo simulation for adaptive policy
for multiple impulse correction of trajectory
of spacecraft 24 p4278 A66-42688
Spacecraft system concepts for mission to
Saturn 24 p4282 A66-42692
Computer program for parametric analysis
and trajectory simulation for axisymmetric
planetary entry vehicles 24 p4283 A66-42792
Jupiter swingby missions to outer planets
[AIAA PAPER 66-536] 24 p4279 A66-42797
- SPACECREW**
Ionizing radiation dosimetry for space
pilots on short-and long-term space
flights 01 p0021 A66-10803
Astronaut selection and crew preparation
procedures for Gemini and Apollo
programs 08 p1176 A66-18578
Training and selection procedures used at
USAF Aerospace Research Pilot
School 08 p1176 A66-18579
Model for social system for extended-
duration spaceship crews subject to
isolation, confinement and/or
stress 13 p2013 A66-25279
Environmental parameters affecting
spacecrew comfort during weightlessness
and optimization of comfort
14 p2231 A66-28412
- Space flight problems in maintaining
personal hygiene 15 p2435 A66-29456
Spacecraft-cabin microatmosphere
composition, theoretically analyzing
applicability of helium-oxygen
mixtures 15 p2444 A66-29459
Gemini experiments program, examining
crew integration, mission planning and
prelaunch operations 15 p2606 A66-30064
Stress in spacecraft crew members
measured using parotid fluid, noting
relationship between biochemical variables
under stress and nonstress
conditions 17 p2866 A66-32196
- SPACING**
SA SEPARATION
Haar theorem for synthesis of
nonuniformly spaced linear discrete antenna
arrays 17 p2886 A66-32389
- SPALDING FUNCTION**
Laminar flame speeds predicted by
Spalding formulation in stoichiometric
mixtures with nonnormal
diffusion 03 p0443 A66-12490
Skin friction coefficient predictions in
turbulent compressible flow, using design
nomograph based on Spalding-Chi
method 18 p3100 A66-34603
- SPALLING**
SA NUCLEAR REACTION
Mass spectrometric measurement of
distribution of spallation produced
chromium nuclides between alloys in iron
meteorite 17 p3007 A66-33282
- SPAN**
S WING SPAN
- SPARK**
SA DISCHARGE
Spark shadow projections in air for giant
pulse synchronization from two lasers, using
rotating prism to modulate quality
factors 18 p3144 A66-34036
Magnetic dipole moment in spark produced
by focusing laser
radiation 24 p4226 A66-43055
- SPARK CHAMBER**
Spark spectrometer for measurement of
high energy cosmic ray shower
particles 01 p0067 A66-10454
Spark chamber with air filter for cosmic
ray detection 06 p0880 A66-16598
Cosmic ray spark counter operating in
conjunction with ionization calorimeter and
photoemulsions 06 p0880 A66-16599
Particle localization in spark chamber and
ion drift in Wilson cloud chamber, noting
experimental result of simultaneous
observation of identical
particles 09 p1379 A66-20233
Spark chamber with vidicon readout for
balloon-and satellite-borne high energy
gamma ray astronomy analysis, noting
Cerenkov counter 12 p1877 A66-23685
Flyable space radiation detector based on
spark chamber technology for measuring
unidirectional proton spectra in six energy
intervals 12 p1877 A66-23686
Digitized spark chamber for balloon and
satellite gamma ray astronomy, noting
detector array, high voltage system and data
acquisition and handling
systems 12 p1877 A66-23687
Gamma ray spark chamber with
photographic recording for manned
satellites, determining energy
spectrum 12 p1877 A66-23688
Well shielded ceramic capillary spark
source, thermocouple radiation detector and
silicon p-n junction diode
testing 14 p2293 A66-27329
Spark emulsion chamber for balloon-borne
cosmic radiation
measurements 15 p2503 A66-29569
EAS core fine structure observations using
spark chamber compared with response of
plastic scintillation
counter 18 p3207 A66-35108
Airborne scintillation counter-spark
chamber observations of particle energy
flow and incident zenith angle distribution
of air showers 18 p3211 A66-35131
Balloon experiment using spark chambers
and ionization spectrometer to measure flux,
composition, time variation and properties
of individual interactions of cosmic rays
above 100 gev 18 p3115 A66-35153
Inelastic neutron cross section for
interaction with Pb and C nuclei near 100

- gev 18 p3216 A66-35165
Tskhra-Tskaro installation for study of high-energy cosmic particle interaction with matter 18 p3218 A66-35182
Meson properties analyzed underground by spark calorimeter operated by telescope of Geiger counters 18 p3220 A66-35194
Balloon-borne spark chamber observations of cosmic gamma rays from 30 to 500 mev 23 p4124 A66-42066
Cosmic-ray electron flux above 4.7 BV measured, using lead-plate spark chamber, determining upper limit to primary flux 24 p4265 A66-42717
Multiplate wide gap spark chambers and application to cosmic ray physics 24 p4213 A66-42942
Spark chamber system designed to detect gamma rays in cosmic radiation on high altitude balloon flights 24 p4215 A66-43212
- SPARK DISCHARGE**
Steady state regime of channel expansion and shock wave motion for underwater spark discharges 04 p0557 A66-14424
Propulsive duct combustion chamber with application of feedback and spark discharge for VTOL and aircraft propulsion 05 p0744 A66-14997
Transition from coronal streamer discharge to spark discharge in long air gaps, noting leader role in streamer formation 06 p0919 A66-16876
Physics of spark discharges igniting gaseous mixtures, noting increase in thermal power of discharge by gas preionization resulting from energy redistribution 06 p0919 A66-16877
Plasma emission properties of vacuum spark when producing high current H and D ion beams 06 p0919 A66-16884
Evolution of spark channels initiated in oxygen at 411, 680 and 950 torr by current pulses of approximately 30 amperes with durations of 30 and 40 nanoseconds 06 p0920 A66-17028
Capacitor spark discharge theory, assuming channel resistance depends only on channel expansion during quasi-stationary plasma conductivity 08 p1264 A66-19184
Spark discharge in air induced by focusing laser radiation, determining temperature of plasma produced near focus 09 p1386 A66-19959
Spectral line shift in low-power spark-discharge argon plasma, noting line broadening and incomplete ionization 10 p1572 A66-22024
Text on high speed optical pulse technology, lasers and measuring techniques, emphasizing capacitor discharge application 10 p1538 A66-22063
Thermodynamic process within combustion chamber of propulsive duct, examining potential with reference to feedback and spark discharge 11 p1761 A66-23251
Electron density in laser-induced spark in air determined, measuring simultaneously fundamental laser wavelength and second harmonic 15 p2512 A66-28685
Spectral line shift in low-power spark-discharge argon plasma, noting line broadening and incomplete ionization 16 p2760 A66-30843
Critical electric field for charged droplets atomizing, noting spark discharge and ion concentration in clouds 16 p2742 A66-31109
Physical properties of lightning return stroke analyzed by several time-integrated and time-resolved spectroscopy techniques 20 p3555 A66-38384
Spark discharge generated blast wave application to shock on shock simulation, free-stream sound speed determination and hypervelocity flow measurements [AIAA PAPER 66-763] 22 p3894 A66-40645
- SPARK EROSION MACHINING**
Selection, design and utilization of electrical discharge machine 08 p1229 A66-18688
Manufacturing techniques for turbojets, considering metals difficult to machine and components of shapes difficult to form 23 p4074 A66-41656
- SPARK GAP**
SA DIELECTRICS
Lasers as triggering mechanism for spark gaps, noting delay time between pulse arrival and current flow 03 p0379 A66-13247

SPARK IGNITION

- Spark igniter that successfully operates at 50 to 120 psig chamber pressure and 2300 to 3000 degrees K without observable thermal shock or electrode erosion 08 p1281 A66-18838
Schlieren photographs of spark ignition in turbulent gas mixture flows and analysis of ignition delay and burning velocity 15 p2616 A66-29069
Simulation of rocket engine starting transients via shock tube combustion drivers, discussing diaphragm rupture effect on combustion, acceleration and burst pressure [AIAA PAPER 66-761] 22 p3972 A66-40644
Dirac delta function representation of spark ignition, considering heat transfer from reaction zone to fresh gas and flame propagation 23 p4148 A66-41413
- SPARK PHOTOGRAPHY**
Shape and dimension of spark arising during focusing of laser emission 15 p2516 A66-29210
Multispark camera to obtain schlieren record of blast waves originating from finite source 15 p2478 A66-29248
Behavior of projectiles in hyperballistic tunnel analyzed by photographs of their shock waves, using array of spark gaps flashes correlated with cameras 16 p2673 A66-30313
Motion picture projection of multiple spark camera film records 16 p2702 A66-30427
Shape and dimension of spark arising during focusing of laser emission 17 p2936 A66-33059
- SPARK PLUG**
Combustion deposit fouling and other difficulties in spark plug operation in commercial aircraft [AIAA PAPER 64-779] 13 p2038 A66-25597
- SPATIAL DEPENDENCY**
Plasma stabilization by HF electromagnetic fields, noting mode spectrum spacing along sample axis and dependence on field strength 24 p4242 A66-42517
- SPATIAL DISTRIBUTION**
Spatial distribution of electrical field obtained by focusing radiation of ruby laser 01 p0080 A66-10250
Use of Brillouin scattering for optical beam modification, spatial distribution of acoustic energy and coherent sound of great intensity 03 p0376 A66-12421
Spatial distribution of HF electric field in resonant discharge determined, using electron beam probing technique 03 p0404 A66-12985
Spatial distribution of electron density along given path inferred from oblique incidence soundings taken at terminal of path 04 p0515 A66-13679
Spatial distribution of hollow-cone shaped emission of modes which are totally reflected in neodymium-glass lasers 04 p0532 A66-14291
Specific angular sensitivity functions for investigating spatial distribution of asymmetrical cosmic ray variation 09 p1438 A66-20217
Spatial distribution of protons and electrons captured by terrestrial magnetic field, as measured by Cosmos satellites 09 p1443 A66-21011
Velocity, acceleration and static force analyses of spatial linkages, using matrix algebra [ASME PAPER 65-APMW-13] 10 p1539 A66-21487
Spatial density distribution of cold plasma probed by electromagnetic field 10 p1570 A66-22005
Ionization structure of polar auroras from spatial distribution of radar-reflecting zones, taking into account magnetic field variations 12 p1871 A66-24293
Charged particles in nonadiabatic magnetic traps, noting behavior in mirror machine with spatially modulated central field, using model with square wave modulation 13 p2145 A66-25727
Spatial distribution of electrical field obtained by focusing radiation of ruby laser 13 p2092 A66-25967
Spatial selective fading as random process, discussing spatial coherence, wave number dispersion profile, time delay profile, etc, in

- ionospheric propagation 14 p2234 A66-2626
Spatial distribution of four cloud fields studied by photometry of aerial photographs, determining statistical parameters 14 p2325 A66-2726
Channel flow of inviscid fluid with ten conductivity considered when flow leaves transverse magnetic field, noting spatial distribution and ohmic power loss application in MHD generators 14 p2346 A66-2826
Formula derivation for stellar motion analysis of stellar spatial distribution using Kapteyn scheme and Schalen-Lind method 15 p2593 A66-2826
Modulated molecular beam techniques used to measure spatial distribution of rare gas reflected or scattered from metallic surface 16 p2753 A66-3030
Spatial distribution of high energy atoms scattered by various surfaces 16 p2753 A66-3030
Production rates of muons in extensive showers determined from spatial and energy distributions 16 p2795 A66-3126
Three-dimensional Monte Carlo simulation of nuclear cascade of extensive air showers examining nuclear particle spatial energy distribution 18 p3206 A66-35194
Spatial distribution of acoustoelectric field in photoconductive CdS measurement under conditions of current saturation, determining carrier drift mobility 19 p3435 A66-35194
Spatial density distribution of cold plasma probed by electromagnetic field 19 p3407 A66-3610
Spatial density distribution in cold electron plasma determined by measuring phase difference between incident and reflected electromagnetic waves 19 p3408 A66-3610
Linear model for macroscopically uniform elastic medium, deriving expression for Green tensor in weakly and highly dispersive isotropic media 19 p3476 A66-3610
Electron velocity distribution function in nonequilibrium plasma having spatial distribution governed by electron-electron and inelastic collisions 20 p3606 A66-3610
Mass spectrometer used for analysis of spatial distribution of molecular beams, with data on angular distribution of magnetic atom beam 20 p3559 A66-3755
Optimal detection of signals by spatially distributed receiving system against random noise background, using space-time signal selection method 20 p3517 A66-3777
Spatial distribution and time decay intensities of geomagnetically trapped electrons from high altitude nuclear burst 20 p3643 A66-3833
Observed regularities of contrast characteristics of human visual system photopic luminance region examined by psychophysics of response/stimulus peak-to-peak measurements of spatial sine wave patterns 21 p3700 A66-3911
Spatial distribution of auroral radio signal reflection centers based on radar observations 22 p3915 A66-4077
Spatial distributions of carrier concentration and internal field in cadmium selenide for various voltages, measuring conductivity and Hall coefficient 23 p4112 A66-4122
Spatial distribution of hot electron coherently scattering in thin Au film 23 p4115 A66-4200
Millimeter wave resonant interferometer capable of measuring spatial distribution of electrons in low density transient plasma column subject to perturbation 24 p4209 A66-4211
Spatial distribution of four cloud fields studied by photometry of aerial photographs, determining statistical parameters 24 p4233 A66-4233
Microwave emission from stationary plasma column measured taking into account spatial distribution of plasma density, using spectrometer 24 p4242 A66-4233
Neutron spatial asymmetry measured from reaction of cosmic ray muons on nuclei with different spins 24 p4271 A66-4299
Spatial distribution of sporadic E layer over Arctic ice cap, noting negative dependence between illumination of ionosphere and frequency of layer 24 p4204 A66-4311

AL FILTERING

IMAGE VELOCITY SENSOR
 Semiconductor application to coherent
 al transducers and spatial
 05 p0647 A66-14822
 er deflection and scanning by means of
 lmode cavities with dynamic spatial
 05 p0693 A66-14829
 er light redistribution in illuminating
 al signal processing systems noting
 ization, spatial modes and aspheric
 ents
 05 p0693 A66-14830
 man eye, capabilities as optical
 rument, particularly spatial filtering
 ts, visual acuity, eye movement and
 receptors
 14 p2228 A66-27650
 ise-rejecting, spatial filters in signal
 ern recognition
 14 p2242 A66-28150
 otographic recording of spatially
 ulated coherent light
 15 p2501 A66-28974
 mplex spatial filter produced by
 rting Fourier hologram into Fraunhofer
 e of coherent image-forming
 em
 17 p2925 A66-32616
 roved processing of moire data by use
 umerical and optical filters to eliminate
 e in moire patterns
 18 p3134 A66-33716
 versible light-modulated electrolytic cell
 use as real-time spatial
 18 p3077 A66-33995
 echnique for zero or 180-degree phase
 eration for spatial filters using
 otographic printing and polarized
 20 p3556 A66-36936
 roving image velocity measuring technique
 parallel-slit spatial filter is treated as
 inuous optical correlation
 20 p3558 A66-37288
 atial phase modulation of wavefronts
 id in spatial filtering and holography,
 mining means of preventing or reducing
 e and distortion
 22 p3920 A66-40888

ENTIAL ORIENTATION
 athematical model for otolithic organs
 d to analyze human spatial
 entation
 01 p0018 A66-10785
 ree-stage hardening in tantalum single
 stals deformed in tension over limited
 e of orientations, temperatures and
 ain rates
 02 p0246 A66-12194
 ereocamera for determining spatial
 entation of cosmic particle tracks in large
 usion chamber
 03 p0368 A66-12503
 ychophysiological effects of low friction
 man, particularly rotation on visual
 ction time, heart rate and spatial
 entation
 06 p0868 A66-16240
 ychophysical orientation mechanisms of
 n under weightlessness simulation,
 vity conditions encountered on Earth, in
 ital flight and during free floating in
 ce
 06 p0814 A66-17177
 ult-in surface charge on thermally
 dized silicon as function of exposed
 stal face orientation
 09 p1411 A66-19929
 erceiving undetectable rotation in
 icircular canals by employing self-
 uced Coriolls stimulation, determining
 chophysical functions for direction or
 ation discrimination at different yaw
 ocities
 09 p1337 A66-20531
 ontact potential difference measurements
 een aged polycrystalline tungsten foil
 polished single crystal disk and work
 ction calculation for /110/ oriented
 face
 10 p1582 A66-21888
 isorientation in flight, discussing
 titubular apparatus, perception and illusion
 l effect on pilot
 10 p1494 A66-22138
 atial disorientation experiences of Army
 icopter pilots, noting accident and
 ident statistics, methods of correction,
 11 p1648 A66-22578
 igh-temperature deformation of magnesia
 gle crystals with /110/ tensile axis,
 oring slip on systems with oblique
 ctors, related to observations on /001/
 stals
 12 p1898 A66-23564
 omputational photogrammetry, deriving
 ation between image and object space,
 ng collinearity conditions and orientation
 trix
 16 p2703 A66-30513
 atial cross-correlation analyses between
 al velocity and continuum brightness
 ituations of solar disk center
 ctograms
 17 p2996 A66-31919
 otographic determination of azimuth

orientation with respect to north celestial
 pole
 19 p3358 A66-35827
 Book on human spatial orientation and
 effect on behavior
 20 p3508 A66-37011
 MOS work function difference effect on
 surface charge density and orientation
 calculations for Si-silicon dioxide
 interfaces
 22 p3962 A66-40050

SPATIAL PERCEPTION
 Specification of stimulus conditions for
 visual space perception in terms of
 monocular and binocular
 cues
 04 p0462 A66-13795
 Evaluation of nonstereoscopic pairs of
 photographs obtained from vertical base by
 moving camera, determining spatial
 coordinates of points on
 photographs
 16 p2703 A66-30512

SPECIAL SMALL ROCKET PROJECT
 Japanese Aeronautical Research Institute
 Solid Rocket and Special Small Rocket
 projects, examining propellant design for
 performance
 requirements
 23 p4132 A66-41418
 Japanese special small rocket design
 characterized by extreme slenderness and
 use of aluminum as principle structural
 material
 23 p4132 A66-41419
 Aeroelastic characteristics of Japanese
 special small rocket, examining body
 divergence speed and flutter speed of tail
 fins under flight
 conditions
 23 p4138 A66-41420
 Temperature and heat resistant properties
 of fiberglass-reinforced plastic nose cone in
 supersonic flight
 23 p4132 A66-41421
 Nozzle for special small rocket motor,
 noting weight, construction material and
 performance
 23 p4121 A66-41422
 Strength test results on special small
 rocket covering bending, stiffness and
 internal pressure strength of various
 components
 23 p4133 A66-41423
 Aluminum alloy tube for combustion
 chamber of Japanese SSR, noting mechanical
 properties, temperature
 effects,
 23 p4081 A66-41424
 Structural design of Japanese SSR,
 emphasizing motor and nozzle
 characteristics
 23 p4133 A66-41425
 Heat insulation coating for Japanese SSR
 /special small rocket/ and materials testing
 by torch-burner method
 23 p4148 A66-41426
 Weight-saving structural improvement
 possibilities in Japanese SSR /special small
 rocket/
 23 p4133 A66-41427
 Static firing tests of HT-110 engines with
 high slenderness ratio using slow burning
 polyurethane propellant
 23 p4121 A66-41428
 Measurement and analysis of oscillatory
 combustion during static firing tests of HT-
 110 engines by means of pressure indicators
 and recorded signal
 playback
 23 p4121 A66-41429
 Pressure record of HF combustion
 oscillations observed in solid propellant
 rocket motor developed under special small
 rocket /SSR/ program
 23 p4121 A66-41430
 Heat insulation coating on cylinder wall of
 solid propellant rocket motor using epoxy
 resin, polysulfide plastic, metal oxides,
 etc
 23 p4148 A66-41431
 Static firing tests on special small rockets
 /SSR/ with different igniter cases and
 combustion instabilities
 23 p4119 A66-41436
 Flight performances of special small
 rockets with no cross wind conditions,
 noting drag
 coefficient
 23 p4133 A66-41441
 Cross wind effect on special small rocket
 during powered flight, calculating flight
 path angle at burnout for launching angle
 determination
 23 p4133 A66-41442
 Flight path dispersion of special small
 rocket /SSR/ due to thrust misalignment,
 stabilizing effects of spin during powered
 flight by canting control vane in
 nozzle
 23 p4133 A66-41443

SPECIES DIFFUSION
 Secondary flows influence on concentration
 distribution of heavy species in vortex
 comprised primarily of lightweight gas
 [AIAA PAPER 65-582]
 12 p1860 A66-23573
 Species diffusion in frozen hypersonic
 boundary layer with Falkner-Skan velocity
 profiles, where surface is linear, given as
 Mellin transform, constructing series and
 asymptotic expansion of surface

concentration
 13 p2060 A66-25158

SPECIFIC HEAT
 SA FORMATION HEAT
 SA SOLUTION HEAT
 SA VAPORIZATION HEAT
 Screening field and specific heat of
 superconductivity of sintered niobium
 stannide at temperatures above 4.2 degrees
 K
 01 p0117 A66-10245
 Specific heat of gadolinium near Curie
 point, discussing measuring procedure and
 line drawing of calorimetric
 setup
 01 p0118 A66-10252
 Isobaric specific heat of equilibrium
 dissociating nitrogen tetraoxide in wide
 temperature range at moderate
 pressure
 01 p0166 A66-10996
 Ginzburg-Landau parameters for type II
 superconductors of short electron mean free
 path
 03 p0411 A66-13141
 Equilibrium combustion products of
 generalized hydrocarbons with oxygenated
 air, with charts on enthalpy, entropy,
 molecular weight, specific heat ratio, etc
 [ASME PAPER 65-WA/ENER-2]
 05 p0789 A66-15627
 Diluted nickel alloys, describing
 calorimetric determination of specific heat
 at low temperatures
 06 p0897 A66-16939
 Specific heat, thermal expansion and
 conductivity and electrical conductivity of
 nearly perfect crystalline
 materials
 07 p1109 A66-18497
 Specific heat of iron, cobalt and nickel in
 high temperature range measured, using
 quasi-adiabatic operating
 calorimeter
 08 p1240 A66-19255
 Transition to superfluid state in He 3,
 measuring behavior of specific heat with
 three-stage adiabatic demagnetization
 apparatus
 09 p1391 A66-20010
 Temperature range of transition from
 superconducting to normal state in very
 pure lead determined from variation of
 specific heat and magnetic
 susceptibility
 09 p1419 A66-20044
 Nuclear spin relaxation in superconducting
 gallium measured by nuclear quadrupole
 resonance in zero magnetic field, using
 pulsed nuclear induction
 spectrometer
 09 p1420 A66-20047
 Specific heat evidence for gapless
 superconductivity, examining experimental
 results on lanthanum doped with magnetic
 impurity gadolinium
 09 p1420 A66-20053
 Distribution of specific thermal flux on
 body surface heated by plasma
 jet
 09 p1407 A66-20139
 Laminar fully-developed flow of water
 between parallel flat plates examined, using
 motion equation with experimental values
 for viscosity, conductivity, specific heat and
 density
 09 p1470 A66-20179
 Extension of electron gas model to
 transition metals /titanium, zirconium,
 hafnium/, considering atom interaction up to
 fourth neighbor
 10 p1546 A66-21664
 Annealing of deformed sodium, noting
 activation energy distribution annealing
 kinetics, etc
 12 p1897 A66-24923
 Specific heat of liquids with constant
 volume determined, using pycnometer cell,
 obtaining formula for specific heat in terms
 of measurable thermal
 parameters
 13 p2077 A66-25354
 Behavior of thin superconducting film in
 stationary magnetic field, deriving spectrum
 which is used to determine film specific
 heat
 14 p2360 A66-27196
 Streamline flow of ideal stable gas with
 constant ratio of specific heats around
 conical body with arbitrary taper,
 determining flow velocity
 components
 14 p2220 A66-27679
 Thermal diffusivity and specific heat of
 molybdenum at high temperatures measured,
 using variable heating in induction
 furnace
 15 p2523 A66-29226
 Semiautomatic potentiometer measurement
 of nitrogen specific heat at small intervals,
 noting applicability of logarithmic law for
 other temperature ranges
 16 p2829 A66-31168
 Textbook on specific heats at low
 temperatures, including electronic, magnetic
 and lattice contributions of solids, gases and
 liquids, calorimetry, refrigeration, internal
 energy, etc
 16 p2748 A66-31313
 Effect of degree of expansion of ionized

gas in nozzle on specific power of MHD generator 16 p2637 A66-31377

Nose bluntness and angle of attack effects on hypersonic flow, noting shock wave deflection decrease of minimum possible shock angle, varying specific heat ratio, convective heating, boundary layer transition, etc [AIAA PAPER 66-414] 18 p3046 A66-33639

Thermodynamics including first and second laws, differential and state variables, heat capacity and specific heat 18 p3260 A66-34119

Specific heat and thermal conductivity of metals at cryogenic temperatures 19 p3381 A66-35849

Distribution of specific thermal flux on body surface heated by plasma jet 21 p3793 A66-39411

Calculating specific heat and conductivity of ablating specimens exposed to radiant heat fluxes 22 p3998 A66-40032

Low temperature thermodynamic properties of vanadium, discussing specific heats and transition temperatures in superconducting and normal states 23 p4080 A66-41371

Specific heat measurements and cryogenic thermodynamic properties of single crystal V in mixed state under 12 different magnetic fields 23 p4080 A66-41372

Unification of various small-epsilon theories of real gas flows based on assumption of specific-heat ratio near unity 23 p4151 A66-42050

Energy dependence of effective interaction in superconductivity, calculating critical field and specific heat 24 p4259 A66-43018

Behavior of thin superconducting film in stationary magnetic field, deriving spectrum which is used to determine film specific heat 24 p4259 A66-43094

SPECIFIC IMPULSE

Air conditions, flight altitude and fuel composition effects on ramjet engine, specific impulse and efficiency 01 p0130 A66-10925

Specific impulse of solid and liquid propellants to increase performance 09 p1433 A66-20801

Optimization of high energy turbopump unit engine for Eldo-B carrier rocket, employing system specific impulse 10 p1591 A66-21396

Lift-drag ratio, specific impulse, aspect ratio and weight of payload and power plant considered for STOL aircraft 10 p1483 A66-21398

Liquid cooled high specific impulse arc jet engine has measured engine thrust not completely aerodynamic in nature [AIAA PAPER 64-669] 14 p2374 A66-27470

Prediction of rocket engine flight performance with less than 2 percent error in specific impulse data measured at sea level 23 p4120 A66-41111

Increase of specific impulse of solid propellants by introducing endothermic groups into binder 23 p4117 A66-41230

Specific impulse limitations of advanced nuclear rocket engines due to hydrogen transpiration coolant flows in exhaust nozzle 24 p4261 A66-42777

SPECTRAL ABSORPTION

S ABSORPTION SPECTRUM

SPECTRAL ANALYSIS

Pressure spectrum of turbulent flow assuming flow is generated by random intermittent function 01 p0059 A66-10759

Existing and new methods of spectral analysis of solar flares 02 p0280 A66-11299

Optimum conditions for improving sensitivity of spectral analysis and plotting calibration curves for determining impurity elements in silicon carbide 02 p0188 A66-11995

Spectral analysis of drift oscillations expanding crosswise in external magnetic field of inhomogeneous plasma, based on perturbation theory 03 p0396 A66-12380

Prediction error of time series from finite past 03 p0387 A66-12619

Spectral and total radiation studies of bodies traveling at hypersonic speed in simulated Martian and Venusian atmospheres [AIAA PAPER 65-116] 03 p0315 A66-12783

Statistical behavior of reacting mixture in incompressible isotropic turbulence when

reaction rate is quadratic function of local concentration of reactant, using Kraichnan direct interaction hypothesis [AIAA PAPER 65-812] 03 p0358 A66-13180

Absorption coefficient for lines with combined Doppler and Lorentz broadening calculated, using Runge-Kutta method, continued fraction expansion and Hermite-Gauss quadrature 03 p0393 A66-13267

Energy conversion from available potential to kinetic broken into spectral components permitting analysis in vicinity of extratropical cyclone 04 p0541 A66-13665

Spectrum analyzer in constructing two-dimensional self-adjusting system demonstrated by frequency characteristics of connected channels and integral evaluation 04 p0502 A66-13702

Determination of spectral curves, using electrical frequency 04 p0520 A66-13761

Alloy junction formation, discussing spectral characteristics of electroluminescence from forward-biased 4H SiC p-p alloy junctions as function of formation temperature 04 p0497 A66-13982

Optical and UV instruments and calibration methods for spectral intensities and line broadening in plasma diagnostics 04 p0522 A66-14194

Spectral dynamics of laminar convection, discussing transformation of Benard convection problem into spectral domain 04 p0599 A66-14472

Roentgen characteristic temperature of germanium and silicon calculated from elastic oscillation spectra 05 p0730 A66-14647

Spectral density analog and digital analyses used for random vibration testing program for on-line equalization and off-line response [ISA PREPRINT 1.5-4-65] 05 p0683 A66-15500

Spectral analysis methods for determining rocket engine dynamic specifications [ISA PREPRINT 1.5-1-65] 05 p0683 A66-15501

Frequency and resonance characteristics of two- and three-circuit band filters used in parallel spectral analysis 06 p0848 A66-16135

Measurements of pulsation spectra of vertical component of wind velocity, using acoustic anemometer mounted on aircraft 06 p0906 A66-16552

Photo-induced recombination radiation from single crystals of PbSe and PbTe as function of carrier concentration and temperature 07 p1094 A66-17312

Abundance of titanium for solar photosphere model derived from ion lines 07 p1135 A66-17641

Coherent amplification coefficients of neon lines in helium-neon mixture 08 p1234 A66-19310

Time resolved photoluminescence spectra of two green broad emission bands in CdS as function of temperature, attributing new structure to transverse optical phonons 08 p1276 A66-19368

Magnetic field level in solar corona determined from generation mechanism of type II radio bursts 08 p1297 A66-19454

Threshold parameters and spectral composition of radiation of neodymium-glass laser in dispersion 08 p1234 A66-19669

Variations in optical spectrum of quasi-stellar radio source 3C 09 p1456 A66-20417

Spectral composition of oscillations produced by keying oscillator 09 p1357 A66-20786

Absorption spectra of alkaline, alkaline-earth and rare-gas groups 10 p1557 A66-21095

Threshold parameters and spectral composition of radiation of neodymium-glass laser in dispersion 10 p1543 A66-21836

Control system of supersonic combustion, using spectral intensity ratio, monitoring combustion chamber in two wavelength regions 10 p1622 A66-21948

Miniature proportional counters with low background level for determining ultrasmall quantities of Ar 37 and H 3 10 p1610 A66-22017

AM and FM of transferred electron microwave generators, noting voltage dependence 10 p1515 A66-22094

Hot-wire turbulence spectral analyzer for measuring power spectrum of wind tunnel

fluctuation flow 11 p1703 A66-22

Atmospheric high resolution transmission in carbon dioxide bands between 12 and microns evaluated, using mixed Doppler-Lorentz broadening and new method slant-path calculations 11 p1736 A66-22

Lamb shift in lithium isotope measured determining lifetime from photon emission and employing analog formula of Bethe and Salpeter 11 p1739 A66-22

Ionization charge stage for spectral line determined by sending particle beam through field which separates components of different net charge 11 p1739 A66-22

Spectral sensitivity and temperature characteristics of light generated pairs photoelectric converters 11 p1640 A66-230

Lunar influence in terrestrial meteor rate investigated for unusual periodicities spectral analysis of meteor rate data 11 p1775 A66-231

Monograph on solar corona physics covering ground based, satellite and sounding rocket observation, spectral emission and absorption lines, ionization mechanism, RF and UV radiation etc 12 p1949 A66-240

Vibrational analysis, discussing spectral analyzers, correlation and autocorrelation analysis and hybrid and digital computer applications 12 p1970 A66-247

K emission band of graphite examined using grazing incidence spectrometer at Gaussian window function 12 p1931 A66-248

Spectral equations of homogeneous MF turbulence in strong uniform magnetic field in presence of Hall effect 12 p1924 A66-248

Response to multiple random excitation system with multiple degrees of freedom connecting spectral density matrix generalized coordinates with corresponding generalized forces 12 p1972 A66-2500

Width of spontaneous emission region degenerate gallium arsenide p-n junction noting spectral shifts, emission, interference, etc 13 p2159 A66-2500

Free jet of arc heated low-density supersonic argon plasma examined, measuring radiative mechanisms, electron temperatures, thrust, jet structure, etc [AIAA PAPER 66-163] 13 p2159 A66-2516

High-resolution interference spectrometer to observe water vapor absorption in 500 to 1500 gc region 13 p2020 A66-2520

Spectral analysis of drift oscillation expanding crosswise in external magnetic field of inhomogeneous plasma, based on perturbation theory 13 p2139 A66-2538

Radar observation of Mars using optical spectral analysis of echoes 13 p2181 A66-2553

Photoconductivity and optical transmission of cadmium-indium-telluride, noting temperature dependence 13 p2165 A66-2568

Coherent memory filter for real time spectral analysis of Doppler radar echoes in single circuit coherent integrator 13 p2039 A66-2578

Normal emittance, reflectance and transmittance spectra of roughened rock and mineral surfaces from 8 to 25 microwavelengths 13 p2017 A66-2587

Roentgen characteristic temperature of germanium and silicon calculated from elastic oscillation spectra 13 p2167 A66-2592

Shannon model for capacity of time continuous and time-discrete Gaussian channel with inputs perturbed by independent noise random variable 13 p2024 A66-2593

Organic solvents and water classes according to increase in oscillator strength of absorption bands of praseodymium, samarium, neodymium and erbium ions 13 p2168 A66-2594

Velocity and lifetime of microwave thermal phonons in liquids and solids determined by spectrum of light scattering from laser illuminated sample 13 p2133 A66-2616

Laser action in gallium antimonide diode examining emitted light spectrum by injected current, temperature effect radiative efficiency, etc 13 p2100 A66-2618

Spectral characteristics of gallium arsenide junction luminescence, noting radiative recombination mechanism, energy spread of impurity states and line shape temperature dependence 13 p2168 A66-2618

chemical composition and origin of
 avites, noting densities, refractive
 es, oxide content, rubidium-strontium
 etc 13 p2187 A66-26234
 terms of excited chromium
 configurations examined, using level
 sing and double resonance spectroscopy,
 ag core polarization 13 p2135 A66-26267
 tieling and data reduction techniques for
 tuning spectrum signatures of low gain
 airborne antennas 13 p2044 A66-26747
 nsmission spectra, electroluminescence-
 intensity variations with applied frequency
 voltage and physical properties of ZnS
 films 14 p2361 A66-27315
 ok on modulation as applied to
 formation transmission, discussing
 mathematical background, linear modulation
 ems, FM, PM, etc 14 p2239 A66-27718
 Spectral analysis of organic flames, noting
 intensity variation of different radicals
 air-fuel composition and influence of
 ents 14 p2413 A66-27722
 ganic flame temperatures and burning
 ecities at various fuel-air ratios
 eured, noting band intensity, effect of
 ents, etc 14 p2413 A66-27723
 essure spectrum of turbulent flow
 ming flow is generated by random
 rmitment function 14 p2277 A66-27858
 re-channel microwave radiometer
 urements of Venus near 1-cm
 elength 14 p2386 A66-28125
 easurements of pulsation spectra of
 cal component of wind velocity, using
 stic anemometer mounted on
 raft 14 p2327 A66-28224
 inar surface roughness in Mare Cognitum
 yzed spectrally and compared with two
 restrial areas 14 p2387 A66-28336
 Spectrum analyzer in constructing two-
 ensional self-adjusting system
 onstrated by frequency characteristics
 connected channels and integral
 uation 15 p2469 A66-28543
 are initiated filament oscillations, noting
 tographic measurement of oscillation
 uencies 15 p2573 A66-28646
 lar eclipse coronal isotopes, noting
 etrum in region of maximum visual
 itivity, ellipticity figures, Ludendorff
 efficient, luminosity gradients,
 15 p2593 A66-28867
 illurium concentration in doped GaAs
 elated by electron probe microanalysis
 h variations in cathodoluminescence
 iency 15 p2564 A66-28878
 imulated Raman effect in acetone and
 one-carbon disulfide mixtures, noting
 ilarity of Stokes radiation pattern to
 an effect 15 p2513 A66-28881
 ear air turbulence detection with optical
 ar, using spectral analysis of
 kscattered Doppler-shifted light particle
 mation mapping via correlates of rough
 ing conditions 15 p2450 A66-28920
 icrowave absorption by water vapor and
 ctures with other gases between 100 and
 gc/s, noting increase in absorption
 uted to molecular collision-induced
 rization 15 p2450 A66-29004
 omentum spectra of cosmic ray muons
 asured at large zenith angles with
 roved Ashton-Wolfendale spectograph,
 mparing observed and predicted
 nsities 15 p2588 A66-29580
 uency stability and spectral purity of
 unction laser output improved by
 hronization with gas laser
 m 15 p2518 A66-29717
 lectron temperature correlation with
 itation in temperature in argon plasma
 ublished, using spectral analysis and
 gmuir probe 15 p2555 A66-29762
 esium ionization cross section
 urement from threshold to 50 ev,
 ing apparatus used and results
 ained 15 p2548 A66-29814
 currence of collisions between ionized
 eutral particles based on analysis of
 etrum diffused by E
 on 15 p2491 A66-30021
 onon spectrum of lead indium alloys
 ing distinctness of impurity band as
 rred from electron tunneling
 urements 16 p2768 A66-30130
 smic ray storms analyzed for changes in
 ictive integral rigidity spectrum of

nucleon component, noting time dependency
 of spectrum exponent 16 p2793 A66-30229
 Mechanical shutter with time resolution of
 0.1 msec designed for spectroscopic
 observation of decaying
 plasmas 16 p2701 A66-30275
 Spectrum analysis of critical frequency of
 F-2 layer 16 p2692 A66-30330
 Polarization characteristics of type IV solar
 radio bursts noting position, direction and
 frequency range 16 p2793 A66-30653
 Interband optical absorption in germanium
 in crossed electric and magnetic fields,
 noting band perturbation theory, differential
 spectra, Stark broadening, experimental
 techniques, etc 16 p2776 A66-30736
 Electromagnetic spectrum of upper
 atmosphere examined, using microwave
 techniques, noting molecular rotation of
 gases with permanent electric or magnetic
 dipole moments 16 p2698 A66-31044
 Electrical conductivity of metals,
 explaining electron scattering amplitude
 changes, phonon spectrum distortion and
 temperature effects caused by impurity
 concentration in
 conductor 16 p2780 A66-31180
 Spectroscopy of plasmajets and electric
 arcs, noting spectral intensity, line width,
 etc 16 p2707 A66-31188
 Spectroscopic criteria and parameters for
 optimal stellar atmosphere obtaining sunspot
 model via rating system 16 p2803 A66-31260
 Spectral analysis of HF oscillations with
 phase-modulated fluctuations as functions of
 phase dispersion and spectral form of
 modulating fluctuations 17 p2898 A66-31854
 Flux density of nonthermal radio sources
 at 8000 mc noting measurement correction,
 correlation between curvature index spectral
 index and component
 separation 17 p2995 A66-31911
 Flare observations in H-alpha line, line and
 continuous spectra of flares, and optical
 characteristics of proton
 flares 17 p2993 A66-32364
 Frequency variation of ionospherically
 propagated radio waves by spectrum analysis
 of received signal 17 p2874 A66-32384
 Electron spin resonance in silicon oxide
 grown on Si, noting spectral line
 interpretation of Si-SiO sub 2
 boundary 17 p2978 A66-32406
 Helium plasma in confining magnetic field,
 noting spectral efficiency in optical region,
 electron temperature and density, electron
 ion recombination, etc 17 p2965 A66-32409
 Velocity distribution in laminar plasma jet
 determined from energy equation and
 spectroscopic measurement of temperature
 distribution 17 p2967 A66-32459
 Electron temperature determination in
 argon plasma as function of distance
 measured to axis of inductive
 windings 17 p2974 A66-33255
 Spectral and spatial distribution of origin
 of injection luminescence from epitaxial
 gallium arsenide transistors, noting
 correlation between energy peak and
 radiation recombination 17 p2986 A66-33295
 Spectral method more efficient than grid-
 point method for integrating typical
 barotropic filtered-equation numerical
 weather prediction
 models 17 p2949 A66-33337
 Exchange pairs spectrum analysis based on
 observation of nonlinear splitting of EPR
 signals of pairs of exchange-coupled
 chromium ions in
 corundum 18 p3154 A66-33943
 Stark broadening of singly ionized argon
 lines in helium-argon plasma behind
 reflected shock wave in electromagnetic T
 tube with backstrap 18 p3138 A66-34233
 Dispersion of ion waves in mercury vapor
 discharges, carrying out spectral analysis of
 acoustic and plasma
 oscillations 18 p3146 A66-34234
 Plasma ion and electron temperature
 measurement via forward scattering
 spectrum of deuterium
 plasma 18 p3146 A66-34235
 Magnetic field level in solar corona
 determined from generation mechanism of
 type II radio bursts 18 p3232 A66-34483
 Spectral composition including X-ray and
 gamma ray astronomy, electrons in primary
 cosmic radiation, protons and helium nuclei,

isotopic composition and heavy
 nuclei 18 p3194 A66-34855
 Fraunhofer spectrum of singly ionized
 yttrium extended in IR solar
 spectrum 18 p3236 A66-34892
 Trace impurity determination in
 semiconductors by spectral analysis, using
 plasma generator 19 p3442 A66-35944
 Miniature proportional counters with low
 background level for determining ultrasmall
 quantities of Ar 37 and H
 3 19 p3453 A66-36103
 Spectral analyses of residual gases using
 mass spectrometer, noting vacuum
 equipment and effects of backing and cold-
 trapping 19 p3361 A66-36615
 Spectral analysis of human EEG generators
 in posterior cerebral
 regions 20 p3506 A66-37604
 Unified approach to synthesis of
 orthonormal exponential functions with
 elements whose asymptotic order may be
 chosen arbitrarily and poles that may be
 real, complex or both 20 p3522 A66-37665
 Hyperfine spectrum of xenon in 3.5 mm
 maser transition noting experimental setup,
 gain profiles for various input power levels
 and structural properties 21 p3746 A66-38763
 Varying excitation intensity effects on
 edge emissions from pure and doped CdS
 powder samples, noting electron-hole
 recombination
 mechanisms 21 p3802 A66-39202
 Spectral analysis of interacting
 electromagnetic, plasma and spin waves in
 antiferromagnetic semiconductors and metals
 with easy-axis and plane type
 anisotropy 21 p3804 A66-39311
 Infrasonic frequency spectrum
 transformation using magnetic signal
 recording and reproduction
 device 21 p3713 A66-39322
 Spectral composition of oscillations
 produced by keying
 oscillator 22 p3874 A66-39845
 Jahn-Teller shift reorientation in Ni
 impurity centers of diamond and rise of C-N
 pair EPR spectrum with
 temperature 22 p3964 A66-40307
 Spectral analysis of laser discharge in pure
 and impure He, obtaining spectra of spark
 at various pressures, determining electron
 concentration at various
 stages 22 p3934 A66-40946
 Brillouin scattering spectra of crystalline
 quartz, fused quartz and Pyrex glass, noting
 acoustic modes in crystalline
 spectrum 23 p4114 A66-41628
 Single crystal wurtzite CdS luminescence
 as function of exciting intensity, noting
 shift of overlapping band structure of
 green-edge emission indicative of electron-
 hole recombination 24 p4219 A66-42250
 Edser-Butler band amplitude dependence
 on modulating effect of interference
 grating 24 p4212 A66-42819
 Spectral density measurement for
 atmospheric turbulence by method based on
 inversion of Rice
 formulas 24 p4195 A66-42855

SPECTRAL BAND

Variations of equivalent line widths of first
 overtone of carbon monoxide band at
 transition from photosphere to facula,
 estimating temperature
 difference 01 p0131 A66-10278
 Frequency manipulated signal spectrum for
 case of modulating function with arbitrary
 off-duty factor 04 p0482 A66-13912
 Absolute band and oscillator strengths and
 absolute Einstein A coefficients for C-2
 Swan system 04 p0549 A66-14313
 Impurity-photoconductivity spectra of
 silicon single crystals containing lithium and
 arsenic impurities 09 p1413 A66-19999
 X-ray produced auroral light emission in
 air and excitation of second positive and
 first negative bands in
 nitrogen 11 p1765 A66-23152
 Relative intensity measurements of 50
 major bands of Lyman-Birge-Hopfield /LBH/
 system of nitrogen 12 p1869 A66-23919
 Quantum mechanics calculation of
 transmission functions of rotational band of
 water vapor for 8 spectral regions at 20 to
 50 micron wavelengths 14 p2326 A66-27538
 Photoabsorption power due to sodium
 interband, using orthogonalized plane wave

evaluation of matrix elements in oscillator strengths 14 p2365 A66-27753
 Radiation flux measurements from supernova remnants and radio galaxies 17 p2999 A66-32234
 Triatomic carbon spectrum transition bands based on available photographic and densitometric data 17 p3013 A66-33401
 Electric quadrupole transition in fourth positive system of CO observed in bands of electric dipole allowed transition 19 p3404 A66-36800
 Frequency manipulated signal spectrum for case of modulating function with arbitrary off-duty factor 20 p3518 A66-37870
 Random Elsasser band model to compute atmospheric transmission of Earth and Mars for 2-micron carbon dioxide bands 20 p3655 A66-38024
 Radiation intensity dependence for various spectral bands of diffused gallium arsenide p-n junctions on current density 21 p3798 A66-38921
 Quantum mechanics calculation of transmission functions of rotational band of water vapor for eight spectral regions at 20 to 50 micron wavelengths 24 p4234 A66-42324

SPECTRAL EMISSION
 National Bureau of Standards photoelectric and thermoelectric instrumentation for use in measurement of spectral irradiances of solar simulator 02 p0226 A66-11223
 Resonance lines of coronal ions of silicon appearing in two widely separated spectral regions 02 p0286 A66-11358
 Spectral determination of impurities in silicon carbide based on evaporation in argon atmosphere from cavity cut into graphite electrode 02 p0188 A66-11996
 Spectral line energy emitted by homogeneous argon plasma 03 p0399 A66-12715
 Spectral differences measurement in group delay times of pulses useful for observation and location of storm foci 03 p0335 A66-12894
 IR radiation of refractory solids with radiation properties of flame-sprayed ceramic coatings, determining normal spectral emittance, integrated normal total emittance and IR intensity curves at 1300 K 03 p0386 A66-13100
 Spectral emissivity calculations for parallel bands of carbon dioxide at 4.3 microns between 150-600 degrees K, comparing experimental measurements with theoretical calculations 03 p0393 A66-13104
 Earth-to-space communications using millimeter-wave region of spectrum, noting atmospheric attenuation, propagation losses, etc 04 p0479 A66-13607
 Data concerning planetary scale of intensity variations of 5577 angstrom emission in night airglow 04 p0515 A66-13848
 Approximate evaluation of spectral function for stimulated recombination radiation in semiconductors proposed in integral form by Lasher and Stern 05 p0732 A66-14664
 Spectral measurements of 18 discrete radiation sources below 40 mc range, using interference radio telescope 05 p0748 A66-14878
 Shift of emission spectrum in pulsed GaAs laser, noting waveform characteristics 05 p0696 A66-14974
 Optical properties of semiconductors by measuring spectral emittance of transparent and opaque solids and measurements on materials used in IR optics [AIAA PAPER 65-654] 05 p0678 A66-15164
 Terrestrial electrical currents discussing Soviet studies on short-period fluctuations of terrestrial electromagnetic field in Arctic and Antarctic region 05 p0674 A66-15225
 Spectral radiometer to measure radiant power emitted by reentry event 07 p1030 A66-17296
 Spectra of lunar occultations of emission source 3C 273 08 p1297 A66-19449
 Optical conversion efficiencies computed from spectral distribution measurements of pulsed and continuous xenon arc discharges 08 p1259 A66-19703
 Radial inhomogeneity, temperature dependence and ion and atom concentration of growing luminous cloud from arc discharge 08 p1266 A66-19771

Spectral line energy emitted by homogeneous argon plasma 09 p1406 A66-19946
 Frequency and polarization structure of Jupiter decametric emission on 10-msec scale 09 p1450 A66-20104
 Laboratory method for determining spectral emittance of partially transparent materials in IR 09 p1380 A66-20362
 High temperature black body as spectral radiance standard for high intensity arc 09 p1471 A66-20504
 Resonance lines of coronal ions of silicon appearing in two widely separated spectral regions 10 p1602 A66-21092
 Spectral normal emittances of molybdenum, tantalum and tungsten single crystals [AIAA PAPER 65-134] 10 p1581 A66-21796
 Spectral emissivity measurements of carbon dioxide at high temperatures 11 p1738 A66-22870
 Stray radiation error reduction in spectral emittance measurements for diffusely reflecting materials 11 p1737 A66-23410
 Correlation between plasma and ion density fluctuations as detected by magnetic probe, spectral emission techniques and Langmuir probe 13 p2142 A66-25703
 Extension of three-field mixing theory to include effects of convective nonlinearities on excitation in plasma, using correlation function of spectral densities for interpretation of thermally enhanced light-by-light scattering 13 p2132 A66-26151
 LF spectrum measurements of radio source 3C84, including plot of flux density vs frequency 14 p2384 A66-27846
 Impurity photovoltaic effect in cadmium sulfide, noting radiative enhancement of spectral response upon illumination with green light 15 p2561 A66-28709
 Spectral composition of laser light within framework of theory of nonlinear optical effects 15 p2542 A66-29356
 Spectral distribution of recombination radiation caused by electroluminescence /EML/ in indium antimonide 15 p2568 A66-29726
 Spectra of lunar occultations of emission source 3C 273 18 p3232 A66-34478
 High temperature light source with substantially continuous spectral emission for UV absorption spectroscopy approximating black body in visible and near UV region 19 p3353 A66-35314
 Laboratory method for determining spectral emittance of partially transparent materials in IR 19 p3353 A66-35320
 Spectral composition of laser light within framework of theory of nonlinear optical effects 20 p3602 A66-37360
 Pinch effect in InSb degenerate plasma, discussing electric conductivity and recombination emission spectra 20 p3615 A66-37371
 Spectral characteristics of gases heated by shock waves, noting absorption capacity distribution as function of wavelength 21 p3726 A66-39078
 Spectral response curves of superconducting point contacts, noting existence of frequency dependent Josephson current amplitudes peaking in vicinity of energy gap 21 p3803 A66-39262
 Photographic data on iron meteor 36221 noting trajectory, velocity, light curve, orbit and spectral emission intensities 22 p3977 A66-39860
 Angular, spectral and geographical distributions of outgoing fluxes of thermal radiation and Earth albedo measured, using Cosmos satellite 22 p3913 A66-40471
 Temperature profiles across argon plasma arc calculated from measured radiation intensities at arc currents from 1 to 400 amp 23 p4104 A66-41495

SPECTRAL ENERGY DISTRIBUTION
 Spectral energy distribution modified by finite Mach number effects and structural response to boundary layer turbulence and susceptibility to changes in mean flow Mach number 01 p0005 A66-10129
 Autocorrelation and spectral density of energy of stationary electromagnetic wave expressed as function of same parameters of its component trains of waves 01 p0106 A66-10645

Spectral distribution of UV radiation ozone band reflected from Earth, assuming Rayleigh scattering 01 p0133 A66-107
 Computer method using spectrometer for rapidly measuring spectral distribution solar simulator and determining effects thermal balance evaluation of spacecraft 02 p0212 A66-112
 Argon vortex stabilized arc as radiative source for improved solar simulator discussing spectral energy distribution 02 p0214 A66-112
 Impurity concentration on semiconductor surface observing photoconductivity silicon in IR region of spectrum 04 p0569 A66-143
 Homeopolar semiconductors, discussing radiation recombination parameters impurity centers with phonon participation 05 p0731 A66-146
 Artificial aurora, describing time delay between intensity variations of high altitude nuclear explosion generated spectra lines 05 p0667 A66-147
 Atmospheric radiation calculations emphasizing carbon dioxide and nitro oxide absorption spectrum, spectral energy distribution, quasi-statistical band model, etc 05 p0748 A66-149
 Exciton absorption lines and long wave intrinsic edges of single-crystal CdSe and CdS at low temperatures 06 p0924 A66-165
 Argon plasma temperatures measured spectral method in internal and external plasmatrons, using copper impurity line 06 p0918 A66-168
 Thin elastic shell transient vibrational deriving solution for response to time dependent surface loads 07 p1143 A66-174
 Cosmic ray threshold rigidities determined by trajectory calculations, noting disagreements between hemispheric data 07 p1128 A66-180
 Light source having absolute spectral energy distribution for standardizing stracker calibration 08 p1252 A66-195
 Russian monograph on thermal radiation from metals, ceramics, partly transparent bodies, films, etc 08 p1256 A66-195
 Oscillation spectral density of SE oscillators measured, using frequency phase self-tuning system to eliminate L component of phase fluctuations 09 p1352 A66-203
 Spectral distribution of light scattered by density fluctuations in dense monatomic one-component fluid 09 p1404 A66-209
 Spectral distribution of direct sunlight Earth surface at sea level, as function of mass and concentration of aerosol, ozone and water vapor 09 p1375 A66-209
 Electric conductivity and spectral distribution of impurity photoconductivity n- and p-silicon bombarded by fast neutrons noting role of annealing 12 p1929 A66-244
 Homeopolar semiconductors, discussing radiation recombination parameters impurity centers with phonon participation 13 p1267 A66-259
 Spectral energy distribution and Doppler broadening of Rayleigh light scattered from hydrogen and argon gas at low densities using Fabry-Perot interferometer 13 p2133 A66-261
 Light shift, light modulation and phase pulling in optically pumped rubidium maser 13 p2101 A66-262
 High energy cosmic ray collisional production spectrum and pion energy angle distributions in CMS and laboratory frames from Landau-Milekhin hydrodynamic model of very high energy nucleon 13 p2176 A66-267
 Spectral distribution of UV radiation ozone band reflected from Earth, assuming Rayleigh scattering 14 p2285 A66-278
 Impurity concentration on semiconductor surface, observing photoconductivity silicon in IR region of spectrum 14 p2368 A66-282
 Radiometer absorption caused by sol protons and alpha particles in monoenergetic intensities and in spectral distributions 15 p2574 A66-288
 Spectral distribution changes occurring diffuse skylight at zenith in visual region during total solar eclipse, using photoelectric

 Tilting interference filter photometer to
 investigate morphology of hydrogen emission
 and relation to visible
 aurora 18 p3109 A66-35087

Theoretical model of isolated Lorentz line of IR absorption by gases applied to atmospheric optics and spectroscopy problems 19 p3400 A66-36043

Population temperatures within argon-calcium plasma generated by reflected aerodynamic shock determined by spectral line-reversal method 19 p3409 A66-36332

Macroscopic velocity field in solar atmosphere and physical nature of motion, analyzing radiative transfer in spectral lines 19 p3465 A66-36604

Temperature dependence of UV radiation absorption coefficient in quartz undergoing phase transition for several spectral lines 19 p3447 A66-36722

Fourier transform used in correction of instrument contour error when observing solar spectral line profile 20 p3647 A66-37042

Solar prominence in color photography, using filtering system for H and D lines 20 p3648 A66-37284

Detectability of coronal IR lines due to Mg, Al and Si ions with practicable IR spectrometers and photoconductive detectors, considering atmospheric attenuation 20 p3649 A66-37333

Plasma diagnostics from self-reversible profiles of spectral lines emitted by inhomogeneous layers 20 p3607 A66-37349

Production of He I and He II spectral lines excited by helium ions from van de Graaff accelerator 20 p3604 A66-37628

Spectral line profiles corrected for influence of apparatus 21 p3736 A66-38636

Bending effect of spectral lines in plasma created by rotating HF dipole in quasi-steady magnetic field 22 p3953 A66-39761

Temperature measurement in shock tubes and transition probabilities of argon spectrum lines from emission intensities 22 p3956 A66-40406

Solar radiation passage through Earth atmosphere in triplet lines O I, considering molecular hydrogen absorption and brightness distribution of radiation 22 p3973 A66-40472

Upper and lower limits to expected alpha and beta hydrogen and helium line emissions due to protons and alpha particles penetrating auroral atmosphere 22 p3913 A66-40554

Paschen series laser lines in atomic and molecular hydrogen 22 p3933 A66-40892

Ionized calcium luminescence in large chromospheric flare, noting K line broadening due to nonthermal turbulent motions 23 p4126 A66-41078

Excitation of H-alpha lines in solar chromosphere from internal and external sources, noting theoretical and empiric results 23 p4127 A66-41080

Molecular spectroscopy, measuring absorption coefficient at center of carbon dioxide band, determining vibration-rotation transition moment 23 p4076 A66-41179

Optical hydrogen-line profiles in Orion nebula compared to radio profile obtained from antenna response and weighting factors of brightness temperature 23 p4131 A66-41820

Transitions of first two band systems of iodine excited in argon suitable for laser action 23 p4079 A66-42085

Criticism of identification of bismuth lines with lines of solar spectrum based on analysis of new tracings of solar spectrum by Kachalov 24 p4278 A66-42709

Spectrum of three-times ionized nitrogen analyzed in wavelength region 300-8000 angstroms, using theta pinch discharge, connecting singlets and triplets 24 p4240 A66-43104

SPECTRAL LINE WIDTH

Multichannel Fabry-Perot interferometer noting design, application, construction, calibration and measurements on plasma 02 p0232 A66-12201

Width of decay quanta in gas lasers depends on energies and lifetimes of atomic levels involved in stimulated transitions and nonlinear response of atoms 03 p0376 A66-12303

Absorption contour for fundamental vibration-rotation band of nitrogen oxide compared with pressure broadened spectra 04 p0473 A66-13651

Doppler effect discussing relativistic form,

transmission in dispersive media, broadening of spectral lines, black body radiation, rocket and satellite tracking, navigation and application 04 p0546 A66-14383

Molecules intrinsic volume role in theory of shock broadening of spectral lines 06 p0909 A66-16629

Interferometer for measurement of ratio of small changes in wavelength of spectral line to linewidth, as basis for measuring plasma electron temperature 06 p0883 A66-16943

Doppler broadened Cv spectral line from theta pinch and microscopic plasma velocities by reducing axial motion effect 07 p1086 A66-17654

Absorption laws for spectral-line broadening due to propagation of intense monochromatic radiation through dielectric medium 09 p1343 A66-20337

Intrinsic noise effect on synchronization of self-excited oscillators, determining phase diffusion coefficient, frequency fluctuation spectra and spectral line length 09 p1344 A66-20345

Quasi-statistical pressure broadening of diffuse helium lines 10 p1606 A66-21243

Broadening of IR absorption lines by HF local oscillations attributed to either modulation effects or decay processes 10 p1588 A66-22162

Amplitudes and linewidth of discrete spectrum of natural frequencies of thin magnetic films, noting motion equations, dispersion ratio and resonance peaks 11 p1752 A66-22799

Wide angle Michelson interferometer for measuring Doppler temperature from width of 5577 angstrom atomic oxygen line in nightglow and aurora 13 p2128 A66-25799

He-Ne laser homodyne spectrometer observation of broadening of spectral profile of light scattered from carbon dioxide near critical temperature and density due to density fluctuations 13 p2133 A66-26168

Optical linewidth study of energy transfer between impurity ions and homogeneous broadening and lineshape changes in optical transitions 13 p2098 A66-26176

Giant-pulse laser-induced atmospheric electric breakdown causing optical frequency discharge 13 p2134 A66-26194

Far-IR laser molecular spectroscopy including IR laser oscillators, photon noise, detectors and nuclear optics 13 p2100 A66-26195

Optical-and IR-maser spectroscopy of inhomogeneously broadened resonances, using gas lasers 13 p2100 A66-26196

Nonlinear quantum mechanical analysis of laser steady motion, stability under deviations and noise effect on line width and intensity fluctuations 13 p2103 A66-26213

Bose-Einstein distribution function for quantum photons from amplified spontaneous emission 14 p2307 A66-27195

Stark broadening effect on solar atmospheric abundance determinations, with results for sodium abundance 14 p2383 A66-27709

OH emission and narrow spectral features made with circularly polarized field horn on 140-ft radio telescope in November 1965 14 p2384 A66-27901

Temperature dependence of line width and anisotropy field in Mn substituted ZnY 15 p2565 A66-29028

Spectral equivalent linewidths of four solar faculae and adjacent undisturbed photosphere sections 15 p2596 A66-29140

Line width and shifts in molecular spectra of gases, giving general formulas for pressure broadening, phase shift of rotation, amplitude modulation of radiation and rotationally inelastic collisions 16 p2750 A66-30118

Fundamental vibration spectrum of HD in liquid argon, noting rotation-translation coupling, quantized translational energy levels and perturbation treatment of interaction 16 p2645 A66-30120

Collision broadened linewidth and saturation parameters for 6328 angstrom transition of Ne in He-Ne laser 16 p2718 A66-31084

Spectroscopic data from argon and nitrogen supersonic plasma jets, noting line width, intensity, temperature, etc 16 p2763 A66-31189

Two-dimensional correlation time relative to spectral bandwidth and corresponding one-dimensional quantities of Lampard 16 p2671 A66-313

Minimum spectral line width, threshold current density, radiation-peak displacement and possible recombination mechanism in GaSb laser diode p-n junctions in coherent radiation 16 p2721 A66-317

Collisional Stark broadening in I discharges, noting large ion and electron broadening contribution 17 p2960 A66-318

Doppler shift, velocity and line width measurements for mass motion in plasmas 17 p2925 A66-321

Frequency shift relative to spectral width for single pulses of triggered laser determined by measuring variations in emitted wavelength as function of time 17 p2934 A66-326

Electron scattering interpretation of ionization, emission and absorption in spectra of quasi-stellar object 17 p3004 A66-329

Grid computations of model atmosphere for A-type stars, considering effects of Balmer-line blanketing 18 p3227 A66-337

Spectroscopic measurements of cold plasma charged particle concentrations, specific spectral broadening due to Stark effect, forbidden-line intensities affected by internal electric fields and autoionization line intensities 18 p3143 A66-340

Broadening of IR absorption lines by HF local oscillations attributed to either modulation effects or decay processes 19 p3441 A66-357

Magnesium 3 line profiles observed in solar disk and chromosphere used to determine empirical source function variations and chromospheric profiles 19 p3465 A66-366

Equivalent widths of spectral lines in solar spectrum used to determine strontium abundance 19 p3465 A66-366

Hydrogen line profile in Paschen series solar spectrum, taking into account Stark effect and line broadening 20 p3648 A66-370

Nonstationary flicker-type frequency fluctuations effect on form and width of spectral line 20 p3513 A66-371

Splitting of EPR lines of trivalent Cr in zinc tungstate by external electric field, noting angular dependence and corresponding spin Hamiltonians 20 p3615 A66-373

FORTAN program for calculation of approximate total half-intensity line width of several spectral lines for atoms in common analytical flames 20 p3605 A66-377

Interband microwave scattering of holes in cyclotron resonance in Ge 21 p3797 A66-387

Spectral hole burning and cross relaxation effects on steady state gain saturation of laser amplifier with inhomogeneously broadened linewidth 22 p3931 A66-400

Discrepancies in electron-impact broadening of isolated ion lines due to neglect of collision-induced transition between upper and lower levels of line and Coulomb interactions with perturbed ions 22 p3951 A66-4041

Hydrogen, He and ionized Ca lines in chromospheric spicules, noting large-scale motion in spicule interior indicated by line width expansion and peculiarities in shape of line contours 22 p3975 A66-409

Multiple-pass laser interferometer used to confirm electron density inferred from Stark broadening of hydrogen beta line 23 p4101 A66-412

Line strengths variation in spectra of H 124224 and HD 19832 analyzed, establishing anticorrelation of He I variations with variations in temperature 23 p4130 A66-418

Spectral width of peak type and monopulse type radiation of solid-body laser in nonstationary regime 24 p4130 A66-421

Bose-Einstein distribution function for quantum photons from amplified spontaneous emission 24 p4226 A66-430

SPECTRAL NOISE

Colored noise under conditions where noise sources produce white Gaussian noise and physical system is modelled by linear finite-dimensional dynamical

- near spectral reflectivity distribution determined by comparison of lunar spectra solar spectrum and spectra of early classes
- 12 p1945 A66-23506
- sensor calibrations using NBS standard of spectral irradiance, as used for Mariner IV popus sensor
- 13 p2080 A66-25986
- spectral reflectance of water frost and carbon dioxide
- 15 p2501 A66-28977
- particle size and heat treatment effects on reflectance and reflectance of thermal control surface pigment coatings under UV radiation
- [A PAPER 65-136] 15 p2616 A66-29288
- thin-orbit splitting and electroreflectance in semiconductors noting measurement techniques and results
- 16 p2767 A66-30128
- image contrast enhancing by matching spectral reflectance or emittance characteristics
- 17 p2925 A66-32610
- integrating sphere reflectometer for ensuring absolute hemispherical spectral reflectance of surfaces
- [A PAPER 64-255] 18 p3113 A66-34588
- near spectral reflectivity distribution determined by comparison of lunar spectra solar spectrum and spectra of early classes
- 20 p3646 A66-37019
- spectral-transmittance aerosol component atmospheric haze, taking account of refractive index and
- 21 p3759 A66-38910
- dispersivity
- aerosol component of spectral transmittance of artificial fog, comparing simulated and experimental values for absolute attenuation
- 21 p3759 A66-38916
- directional reflectance characteristics of high sintered metal and wire screen face systems
- [A PAPER 66-19] 23 p4150 A66-41893
- RESOLUTION**
- photographic information of photographic plate and diffusing object
- 05 p0678 A66-15105
- optical absorption of metal films in region transformation to dielectric, discussing emittance and conduction band separation mechanism
- 06 p0924 A66-16518
- optical absorption of metal films in region transformation to dielectric, discussing emittance and conduction band separation mechanism
- 09 p1431 A66-20899
- estimation of incidence angles for which resolution limit of real Fabry-Perot etalon approaches value of ideal
- 10 p1537 A66-22030
- high resolution ESR spectra of acyclic midione radical anions and single aryl substituent cations
- 15 p2447 A66-29817
- evaluation of energy resolution of Li-drifted Ge detectors and preamplifiers using FETs in nuclear spectrometry
- 16 p2660 A66-30625
- Estimation of incidence angles for which resolution limit of real Fabry-Perot etalon approaches value of ideal
- 16 p2706 A66-30850
- Near IR two-beam interferometer built for astronomical observations by Fourier transform spectroscopy, noting resolution of spectra of Venus and Mars
- 20 p3556 A66-36939
- Radio astronomy antenna theory, discussing antenna resolution, brightness distribution of celestial bodies, interferometer patterns, actual antennas, etc
- 20 p3530 A66-37721
- Moving source scanning spectrometer for ballistic range radiometry noting spectral resolution, operation and performance characteristics
- 24 p4208 A66-42180
- Planetary atmosphere resolution spectrum noting carbon dioxide lines, radiation transfer, composition, temperatures, pressures, etc
- 24 p4277 A66-42667
- SPECTRAL THEORY**
- Certain properties of estimators of spectrum of Gaussian steady state process
- 01 p0094 A66-10729
- Spectral theory applied to elliptical boundary value problem with eigenvalue parameters
- 02 p0251 A66-12229
- Spectral dependence of photovoltaic effect CdS-CdSe heterojunction
- 09 p1427 A66-20482
- Linear system dynamics, discussing time function vector space, spectral coefficients, orthonormal and transfer functions, parameter variation, Fourier approximation, etc
- 11 p1679 A66-23269
- Spectral analysis of bounded functions and method for constructing them either continuous or noncontinuous
- 11 p1724 A66-23403
- Monograph on direct methods of qualitative spectral analysis of singular differential operators
- 14 p2319 A66-26873
- Uniqueness of operator spectral function of self-adjoint boundary value problem involving second-order differential equation with operator coefficients
- 14 p2320 A66-27158
- General boundary conditions for second-order ordinary differential operators
- 16 p2733 A66-30630
- Temperature dependence of lifetime of electrons and holes in GaAs, noting trapping effect of recombination centers and capture levels
- 16 p2787 A66-31771
- Multiplicative and spectral properties of nonnegative space matrices
- 21 p3756 A66-38740
- Computer simulation experiments design for industrial systems, considering variance techniques, multiple ranking procedures, sequential sampling and spectral analysis
- 22 p3870 A66-40132
- Improper random process where impulse occurrence times constitutes stationary point process, noting autocorrelation function and spectral density
- 22 p3885 A66-40870
- Spectral representation for potentially perturbed wave equation
- 23 p4041 A66-41876
- Power spectrum analysis of short-time transient response of one degree of freedom system to random excitation, evaluating error generated, using Laplace method
- 24 p4286 A66-42164
- Certain properties of estimators of spectrum of Gaussian steady state process
- 24 p4232 A66-42747
- SPECTROGRAM**
- Frequency-time spectrograms supporting discovery of two whistlers in VLF radio noise data from Injun III satellite
- 17 p2919 A66-32930
- SPECTROGRAPH**
- SA ULTRAVIOLET SPECTROGRAPH**
- Slit spectrograph theory of Bowen for use with medium size astronomical telescopes
- 02 p0229 A66-11701
- Fringe field double focusing magnetic spectrograph, noting resolution, solid angle, energy range, astigmatic lens, etc
- 13 p2083 A66-26551
- Durham horizontal spectrograph measurements of charge ratio of cosmic ray muons at sea level
- 15 p2588 A66-29574
- Momentum measurements of muons using solid iron magnet spectrograph
- 15 p2546 A66-29578
- Double-slit spectrograph attachments for determining electron temperature from changes in linewidth and relative intensity of two He lines
- 16 p2709 A66-31614
- Time-resolved spectra of single titanium or aluminum particles burning in laminar gas flow recorded by optically fast slitless spectrograph
- [WSC1 66-5] 18 p3264 A66-34427
- Differential momentum spectrum and charge ratio of muons in EAS measured, using solid iron magnet spectrograph
- 18 p3212 A66-35137
- Spectral line profiles corrected for influence of apparatus
- 21 p3736 A66-38636
- Image orthicon slit spectrograph for study of aurora and night glow
- 22 p3921 A66-40898
- Theta pinch discharge as spectroscopic light source in highly ionized gas spectroscopy
- 24 p4241 A66-42393
- SPECTROGRAPHY**
- SA X-RAY SPECTROGRAPHY**
- S-180-S spectral camera characteristics of spectral sensitivity, distortion and slit width effect
- 02 p0226 A66-11346
- Spectral and temporal characteristics of D sub N film for use in patrol spectrograph
- 02 p0227 A66-11347
- Achromatic coronagraph for spectrography of solar corona
- 07 p1030 A66-17246
- Photographic spectra of ablating plastics in thermodynamic environments related to species and temperatures in boundary layers [AIAA PAPER 66-132]
- 08 p1318 A66-19071
- Proton whistler observations from Injun III VLF data, including spectrograms, time-latitude-altitude graphs and theory
- 08 p1217 A66-19392
- Fractional concentration of hydrogen ions in ionosphere from VLF proton whistler measurement
- 08 p1218 A66-19393
- High-resolution spectra of decametric radio bursts from Jupiter
- 09 p1457 A66-20470
- High resolution vacuum spectrograph region between 1000 and 2000 angstroms
- 14 p2292 A66-27324
- SPECTROHELIOGRAPH**
- Optical solar flare characteristics and observation by spectroheliograph
- 03 p0421 A66-12843
- High resolution solar spectrograph at 3580 meter altitude Jungfrauoch International Scientific Station in Switzerland
- 03 p0425 A66-12866
- New solar telescope and spectrograph installed at Kwasan Observatory, Kyoto, Japan
- 06 p0879 A66-16331
- Mean solar time from seven years data obtained by two muon telescopes at Hobart, Tasmania
- 09 p1443 A66-20796
- Thermal origin of X-ray radiation of quiet Sun possible, suggesting quasi-stable component produced in undisturbed corona and slowly varying component in active corona
- 10 p1598 A66-21087
- Wide band solar radiospectrograph employing untuned parametric upconverter
- 11 p1704 A66-22552
- Gyro-stabilized heliostat for airborne astronomy noting design principles, achieved stability, servoloop and mechanical system
- 16 p2705 A66-30824
- Gyro-stabilized airborne solar eclipse spectrograph, noting wavelength range, dispersion accuracy, guidance mechanism, etc
- 16 p2705 A66-30825
- Final character figures of calcium bright flocculi for IGY
- 18 p3235 A66-34735
- Global solar radiation distribution in three spectral regions at Genoa measured by thermopiles with various filters
- 21 p3731 A66-38628
- Design of simplified noneclipse coronagraph, describing optical system and basic performance characteristics of instrument
- 22 p3921 A66-40958
- Solar radio research utilizing two dynamic spectrographs to obtain amplitude polarization of radio bursts with high time resolution, noting frequency splitting
- 23 p4131 A66-41864

SA ULTRAVIOLET SPECTROMETER

Calibration of spectral apparatus for visible region of spectrum with measurements of spectral fluxes of total and scattered radiation, atmospheric spectral transparency, etc 01 p0133 A66-10755

Rocket-mounted spectrometer with solid state detectors for measuring internal energy spectra of auroral electrons and protons in 40-104 kev range 03 p0369 A66-12650

Double-focusing miniaturized beta-spectrometer for measuring low energy electrons within small band spread associated with auroral phenomena 03 p0369 A66-12651

Electrostatic spectrometers discussing deflection type, retarding-potential type and magnetic analyzers, advantages, uses, flux measurement techniques via energy selectors, etc 03 p0369 A66-12652

Text on high energy beam optics including trajectory optics in quadrupole systems and deflecting magnets, spectrometry, envelope optics and particle beams 06 p0911 A66-16306

Energy spectrometer based on back-scattered proton technique for medium-velocity neutrons 07 p1031 A66-17306

Nottingham mu-meson spectrometer with air gap magnet replaced by magnetized iron block 07 p1036 A66-18234

Four-channel silicon detector and scintillation counter for measuring proton spectrum of Earth radiation 08 p1223 A66-19042

Spectrometer monitoring soft solar X-ray radiation in 1 to 400 angstrom wavelength range 08 p1225 A66-19516

Vela satellite system electronic detection instrumentation and block diagrams 09 p1379 A66-19910

Microwave optics diffraction theory, reflectors, lenses, interferometers, spectrometers, beam waveguides and millimeters wave components 09 p1402 A66-20511

Resolution and noise in Fourier transform spectrometer, considering mechanical limitations and diffraction effects 11 p1705 A66-22869

Spectrometer for measuring electron flux and energy at Gemini orbital altitudes 12 p1876 A66-23682

Flyable space radiation detector based on spark chamber technology for measuring unidirectional proton spectra in six energy intervals 12 p1877 A66-23686

Triaxial electron spectrometer, mounted on OGO-E spacecraft, measures flux and energy distributions of electrons, noting electron multiplier 12 p1877 A66-23689

Electron and proton spectrometer detector mounted on OGO-E, measurements cover seven differential energy channels 12 p1877 A66-23690

Pulse excitation of volume of gas to coherently radiating state applied to beam maser spectrometer 12 p1879 A66-23731

Modification of Cary Model 14 for spectral irradiance measurements 13 p2080 A66-25987

Plane grating monochromator illuminated by convergent light for scanning spectrometers on astronomical telescopes 13 p2080 A66-25988

Instrument for checking optical properties of uniform field magnetic spectrometers 13 p2083 A66-26550

Alignment of angular positions of spherical mirror and grating of Fastie-Ebert spectrometer, using bright collimated monochromatic beam of He-Ne laser 13 p2084 A66-26564

Digitization system based on photoelectron counting for scanning spectrometer 13 p2084 A66-26750

Analog simulation of peak smearing in spectrometers in terms of convolution transforms 13 p2084 A66-26751

Nonfocusing grazing incidence monochromator which utilizes planar gratings and collimating slit systems 14 p2293 A66-27326

Calibration of spectral apparatus for visible region of spectrum with measurements of spectral fluxes of total and scattered radiation, atmospheric spectral transparency, etc 14 p2285 A66-27854

Spectral distribution changes occurring in

diffuse skylight at zenith in visual region during total solar eclipse, using photoelectric spectrometer 15 p2484 A66-28830

Electric resonance molecular beam spectrometer for operation in millimeter-submillimeter wavelength region 15 p2501 A66-29005

Balloon-carried automatic telescope-spectrometer observation of Venus upper atmosphere and determination of water vapor content 16 p2797 A66-30352

Microwave absorption spectrometer for measuring absolute concentrations of free radicals at any point in conventional gas flow reaction system [AIAA PAPER 66-677] 18 p3112 A66-34245

Gerdien type chamber for measurements of ion mobility spectrum in terrestrial mesosphere and Mars atmosphere 18 p3114 A66-34712

Grille spectrometer, noting greater signal to noise ratio than that of scanning Fabry-Perot spectrometer for airglow observations 19 p3353 A66-35378

K-band superheterodyne electron spin resonance spectrometer with MO noise elimination by modified Gordon bridge with reflection cavity 20 p3559 A66-37538

Moisture contamination and associated water band absorption spectra recorded by balloon-borne spectrometer 20 p3554 A66-38206

External lock NMR spectrometer conversion to field lock-frequency lock type by polarity inversion of error signal 21 p3740 A66-39390

Digital TV spectrometer for measuring optical radiation from reentry vehicles, using IR vidicon and magnetic recording for data processing 23 p4069 A66-41665

SPECTROMETRIC TRACKING

Radar observations of Mars, discussing surface reflecting properties 06 p0954 A66-16731

Moving source scanning spectrometer for ballistic range radiometry noting spectral resolution, operation and performance characteristics 24 p4208 A66-42180

Projectile-borne and gaseous impurity effects on spectroscopic turbulence and velocity measurements at reentry simulating range 24 p4190 A66-42184

SPECTROMETRY

SA MASS SPECTROMETRY

SA NEUTRON SPECTROMETRY

SA X-RAY SPECTROMETRY

Ground-based absolute measurements of energy in solar spectrum using relative aureole criterion of atmospheric scattering 03 p0422 A66-12912

Ratio of ionospheric electron to ion temperature determined independently of spectral measurements, using electron density data obtained with topside sounder 04 p0517 A66-14374

Book on Fourier transform spectrometry detailing interferometers and programming procedures 06 p0908 A66-16225

Spectroradiometric pyrometry of shock heated gases by IR emission and absorption measurements 09 p1382 A66-20508

Low-pressure mercury vapor lamp for interferometric and spectrometric work, noting electrodes, main discharge tube, electrical circuit, etc 10 p1538 A66-22059

Ground-based absolute measurements of energy in solar spectrum using relative aureole criterion of atmospheric scattering 14 p2376 A66-27261

Spectrometric analysis of aerial photograph, using computers 15 p2504 A66-30010

Continuous source for atomic fluorescence flame spectrometry using 150-watt xenon arc, total consumption atomizer-burner and low resolution monochromator 17 p2870 A66-32551

Shock tube techniques used in measurement of temperature and absolute line intensities for neutral atoms of iron, lead and tin 18 p3109 A66-33695

Balloon experiment for measurement of secondary gamma spectrum in 100-2000 mev range, using lead scintillator sandwich spectrometer 18 p3171 A66-34708

Landau-Symon theory extension, semiconductor telescopes in primary cosmic

particle charge and energy spectrometry and capabilities of Si as cosmic particle detector 18 p3114 A66-34708

Spectrometric oil analysis for assessing failure probability of turbojet-engine wetted parts 19 p3355 A66-35378

X-band spectrometric observation of E of trivalent gadolinium in reduced barium titanate 21 p3797 A66-38206

Spectrum of spatial frequencies of object analyzed through Michelson method 21 p3738 A66-39390

SPECTROPHOTOMETER

SA INFRARED SPECTROPHOTOMETER

Automatic control theory application null-balance processing of spectral data generated by vidicon television camera 11 p1706 A66-22869

Astronomical UV spectrophotometer second U.S. Orbiting Solar Observatory 14 p2293 A66-27326

Airborne spectrozonal telephotometer used in calculation of photographic brightness coefficient of Earth surface 22 p3919 A66-40184

SPECTROPHOTOMETRY

SA STELLAR SPECTROPHOTOMETRY

SA ULTRAVIOLET SPECTROPHOTOMETRY

Three quarter-wave compensating method for measuring phase difference in visible spectral region 01 p0066 A66-10755

Multiple passband monochromatic filter used in telescopes for spectrophotometry red shifts of distant galaxies 02 p0227 A66-11306

Spectral curves of integral Martian radiation in visual region compared with curves for central continents and curves of spectral reflectivity of red-colored terrestrial rocks 05 p0765 A66-15406

Solar thermonuclear process, radiative phenomena, structural measurements, observations and properties 05 p0767 A66-15406

Optical thickness measurement of transparent films on silicon, using spectrophotometric interference technique 07 p1036 A66-18234

Spectrophotometric study of Venus in 3 to 660 millimicron wavelength range 08 p1294 A66-19306

Spectral reflecting power curve of Martian disk center compared with terrestrial equivalent 08 p1295 A66-19306

Relative spectral response of vidicons Nimbus satellite system 09 p1403 A66-20511

Spectrophotometric studies of doubly ringed planetary NGC 3242 show strong component of nonthermal RF radiation 11 p1771 A66-22706

Three-color photometric study of atmospheric extinction by dust particles from lunar eclipse photoelectric measurements of Mare Crisium region 13 p2185 A66-25988

Spectrophotometric measurements of ring nebula NGC 7662 in Andromeda 14 p2386 A66-28106

IR spectral reflectance of water frost on solid carbon dioxide 15 p2501 A66-28906

Cosmos-65 spectrophotometric measurements of atmosphere-reflected U radiation spectra 15 p2485 A66-29005

Temperature and radii of nova photospheres 16 p2800 A66-30606

Atmospheric ozone absorption coefficient measurement, determining errors in extraterrestrial constant of Dobson spectrophotometer 17 p2923 A66-33306

Resolution spectra and photometric profiles of comet heads in monochromatic light and physical state and chemical composition of comets 17 p3011 A66-33306

High resolution spectrophotometric system for measuring atmospheric transmission spectra 18 p3130 A66-34606

Rotating prism design for continuous image compensation cameras, application to U and IR regions of spectrum 19 p3354 A66-35378

Spectrophotometry of four bright prominences with respect to kinetic temperature, Doppler half-widths and population levels 23 p4126 A66-41006

SPECTROSCOPE

Two-laser cavity in tandem to resolve components with homogeneously broadened

- Doppler/ line 19 p3376 A66-36720
 SPECTROSCOPIC TELESCOPE
 andau-Symon theory extension,
 conductor telescopes in primary cosmic
 particle charge and energy spectrometry,
 capabilities of SI as cosmic particle
 detector 18 p3114 A66-34844
 Spectral receiver of Nancy radiotelescope
 correlation type, for extragalactic
 observations on 21-cm neutral hydrogen
 and 19 p3319 A66-36259
 SPECTROSCOPY
 AURORAL SPECTROSCOPY
 COLORIMETRY
 ELECTRON MICROSCOPY

 INFRARED SPECTROSCOPY
 MAGNETIC SPECTROSCOPY
 MASS SPECTROSCOPY
 MOLECULAR SPECTROSCOPY
 NUCLEAR SPECTROSCOPY
 OPTICAL EMISSION SPECTROSCOPY
 RADIO SPECTROSCOPY
 RAMAN SPECTROSCOPY
 ULTRAVIOLET SPECTROSCOPY
 VACUUM SPECTROSCOPY
 X-RAY SPECTROSCOPY
 Spectral measurement of solar simulator
 sources using polarization interferometer
 spectrometer 02 p0226 A66-11219
 Level-crossing spectroscopy with electric
 field, Stark shift of 3P term of lithium
 subject to electric and magnetic
 field 03 p0395 A66-13133
 Plasma electron density measurements,
 interferometric and spectroscopic techniques
 compared with Stark H-beta line and
 absolute continuum intensity
 method 03 p0405 A66-13136
 Ultrapurification discussing definition,
 purification techniques, analytical techniques
 (e.g. emission and mass spectroscopy/ and
 role in biochemistry, metals and
 materials 04 p0474 A66-13867
 Spectral intensities in theoretical plasma
 models, noting astrophysical spectra and
 cosmic data 04 p0553 A66-14192
 Book on data for plasma in local
 thermodynamic equilibrium, containing
 tables on numerical values of reduced Saha-
 ggert equations, partition functions,
 etc 04 p0557 A66-14457
 Interaction between charged particle
 beams and plasma in linear stage and
 saturation stage, using spectroscopic
 method 05 p0722 A66-14896
 Rates and activation parameters
 determined from nuclear magnetic
 resonance spectra for degenerate
 isomerizations of disubstituted benzofuran
 oxides 05 p0629 A66-15155
 Electron paramagnetic resonance spectrum
 of carbon dioxide when absorbed on UV
 irradiated magnesium
 oxide 05 p0630 A66-15766
 Sensitized photolytic decomposition of
 ethanol and diethyl ether glasses analyzed at
 low temperature, using electron
 paramagnetic resonance /EPR/
 spectroscopy 06 p0820 A66-16124
 Electron temperature spectroscopy for
 atmospheric argon plasmas, sodium vapor
 heated at high temperatures, noting
 relationship with current
 density 06 p0915 A66-16178
 Book on foundation of analytical flame
 spectroscopy technique, emphasizing
 excitation sources and radiation
 processes 06 p0822 A66-16521
 Redshift of quasi-stellar radio source 3C
 79 08 p1288 A66-18784
 Plasma diagnostics by spectroscopic
 techniques, measuring polarity dependences
 of temperature and charged particle
 concentration for flows with shock wave and
 periodic structure 08 p1285 A66-19470
 Spectral method of determining bandwidth
 requirement for FM signals based on
 amount of tolerable distortion at
 discriminator output 10 p1504 A66-21653
 Excitation temperature measurement of
 arc-heated argon plasma jet by spectroscopic
 method at supersonic nozzle
 outlet 12 p1920 A66-23854
 Electron temperature determination from
 intensity ratio of singlet and triplet lines of
 neutral helium used in plasma diagnostics,
 noting complications from metastable levels
 and coupling of singlet and triplet
 systems 12 p1924 A66-24592
 Polar rotation of Sun, discussing
 meridional drift, photospheric currents,
 zonal currents and polar
 retardation 13 p2187 A66-26136
 Excitation radiation transfer from trivalent
 chromium to neodymium examined via
 fluorescence spectroscopy, noting energy
 transfer parameters and effect on laser
 output 13 p2098 A66-26175
 Monograph on lasers including gas lasers,
 ruby lasers, giant-pulse techniques,
 oscillation modes, etc 14 p2305 A66-26961
 Spectroscopic analysis of helium plasma
 shock waves, produced by annular discharge
 type conical coil shock
 tube 14 p2341 A66-27310
 Photographic and spectroscopic optics -
 Conference, Tokyo and Kyoto, September
 1964 14 p2291 A66-27316
 Laminar jets in nitrogen from DC plasma
 torch analyzed, using schlieren and
 spectroscopic techniques, noting jet form
 dependency on Reynolds
 number 14 p2344 A66-27849
 Contaminating effect of water vapor in
 optical path of spectrometer on
 measurements of stratospheric water vapor
 absorption 15 p2530 A66-28601
 Measurement of single line in P branch of
 carbon dioxide vibro-rotational absorption
 band using tuned optical maser
 spectroscopy, noting presence of shifted
 frequencies 15 p2512 A66-28691
 Fourier transform spectroscopy, history
 and current status 15 p2498 A66-28838
 Submillimeter spectroscopy using Froome
 plasma metal junction harmonic
 generator 15 p2501 A66-29007
 Spectroscopic studies of plasma pulse
 discharge on hard electrodes in vacuum
 determining excitation temperatures for
 various portions of jet 15 p2550 A66-29213
 Spectroscopic analysis of isotope shift
 between tetraborane /10/ and pentaborane
 /11/ 15 p2446 A66-29236
 Transitions and excited states in
 anthracene, using two-photon
 spectroscopy 16 p2717 A66-30203
 Optical coherence functions and properties
 from statistical viewpoint for application to
 spectroscopy and stellar
 interferometry 17 p2957 A66-31987
 Spectroscopy of highly ionized atoms in
 problems which arose from solar spectrum
 study 17 p3006 A66-33074
 Spectroscopic measurements of cold plasma
 charged particle concentrations, specifically
 spectral broadening due to Stark effect,
 forbidden-line intensities affected by
 internal electric fields and autoionization
 line intensities 18 p3143 A66-34032
 Fine and hyperfine structure of term in 3p
 level of lithium studied by level-crossing
 spectroscopy technique, determining fine
 structure separation 19 p3443 A66-35989
 Near IR two-beam interferometer built for
 astronomical observations by Fourier
 transform spectroscopy, noting resolution of
 spectra of Venus and
 Mars 20 p3556 A66-36939
 Gamma-spectroscopy determination of
 special reaction products of cosmic radiation
 in meteorites 20 p3656 A66-38060
 Physical properties of lightning return
 stroke analyzed by several time-integrated
 and time-resolved spectroscopy
 techniques 20 p3555 A66-38384
 Spectroscopic and microwave analysis
 plasma emission spectrum, density, electron
 concentration and layer velocity in
 electrodeless induction
 discharge 21 p3790 A66-39069
 Continuous in vivo recording of partial
 pressure of arterial carbon dioxide and
 oxygen by mass
 spectrography 21 p3701 A66-39494
 High resolution spectroscopic study of
 comets, examining mechanism involved in
 excitation of cometary
 spectra 21 p3816 A66-39533
 EPR spectroscopic analysis of liquid
 oxygen difluoride, noting photolytic
 dissociation into paramagnetic
 species 23 p4097 A66-41237
 Spectroscopic measurements of electron
 densities and temperatures in argon-
 hydrogen plasma jet 23 p4068 A66-41290
 Processes for producing electromagnetic
 radiation including applications of
 spectroscopic methods, noting relation to
 plasma physics 24 p4238 A66-43117

 SA VIBRATIONAL SPECTRUM
 SA VISIBLE SPECTRUM
 Faint lines in 1918 solar spectrogram
 attributed to water vapor in Earth
 atmosphere 11 p1773 A66-22785
 Differential spectra of charge components
 of primary cosmic ray heavy nuclei at
 different solar modulation levels and effects
 of interstellar
 propagation 18 p3191 A66-34839
 Balloon-borne scintillation counter
 measurements of isotopic composition,
 energy/nucleon and rigidity spectra of
 primary cosmic helium
 nuclei 18 p3193 A66-34848
 Barometric effect and density spectrum of
 photon-initiated EAS
 muons 18 p3208 A66-35115
 Cloud chamber EAS density spectrum
 measurements at 2285 m 18 p3210 A66-35124
 Broken symmetry densities within current
 algebra arising in magnetic moment ratio,
 renormalization constants and unitary
 symmetry correction
 investigations 20 p3606 A66-38293
 SPECULAR REFLECTION
 Radiative heat exchange between
 conducting plates with specular reflection
 discussing internal conduction, surface
 radiation and application to radiating fins
 [ASME PAPER 65-HT-28] 05 p0784 A66-14747
 Off-specular peaks in directional
 distribution of reflected thermal radiation as
 function of angle of incidence, surface
 roughness and wavelength
 [ASME PAPER 65-WA/HT-19] 05 p0790 A66-15645
 Electrical conductivity of thin metallic
 films with two surfaces having different
 probabilities of specular
 scattering 10 p1579 A66-21681
 Radiative heat exchange between
 conducting plates with specular reflection,
 discussing internal conduction, surface
 radiation and application to radiating fins
 [ASME PAPER 65-HT-28] 11 p1784 A66-22183
 Radiative exchange in enclosures,
 reflectance of whose surfaces can be
 approximated by sum of diffuse and
 specular component
 [ASME PAPER 65-HT-7] 11 p1784 A66-22184
 Specular reflection theory and scanning
 using thin mirror with oblique
 rays 14 p2295 A66-27656
 Effective resistivity of metal-plate
 conductor with single ellipsoidal Fermi
 surface and specularly reflecting boundaries
 is independent of
 thickness 14 p2364 A66-27706
 Off-specular peaks in directional
 distribution of reflected thermal radiation as
 function of angle of incidence, surface
 roughness and wavelength
 [ASME PAPER 65-WA/HT-19]

- Thermal emittance and reflectance of diffuse-bottomed, specular-walled groove in solar radiant-flux environment 16 p2828 A66-30989
 [AIAA PAPER 66-459] 16 p2811 A66-31491
 Probability distribution of phase difference between two spaced antennas excited by random fan of rays plus specular component 17 p2874 A66-32385
 Simple polarization calibrator based upon polarization of specularly reflected light, examining theory, design and performance 19 p3354 A66-35381
 Radiant heat transfer between concentric spheres and coaxial cylinders, assuming isothermal inner surface to be diffuse emitter and outer surface to reflect specularly 22 p3998 A66-40030
 Critical fields of thin superconducting films determined by specular reflection of electrons from surfaces 24 p4256 A66-42531
- SPEECH**
 Speech communications effects and temporary threshold shift reduction characteristics of British-made earplugs under quiet and high intensity impulsive noise backgrounds 24 p4168 A66-42857
- SPEECH DISCRIMINATION**
 Voice communication channels expansion, using mans binaural listening capability 02 p0187 A66-11828
 Distinctive features and errors in short term memory for English vowels 03 p0328 A66-12816
 Classifying capacity of learning matrix used in cybernetics, discussing principle and application to weather forecasting and speech recognition 04 p0489 A66-13509
 Automatic recognition of spoken digit programs, using low bandwidth measures related to articulatory rather than to acoustic properties of speech 05 p0629 A66-15735
 Word-intelligibility tests in presence of recorded noise from jet and propeller aircraft 09 p1338 A66-20957
 Speech audiometry in observing hearing loss with aid of live voice 13 p2015 A66-26700
 Automatic speech analyzer capable of detecting frequencies of three primary voice formants 14 p2296 A66-27864
 Formant frequency parameter of speech spectrum pattern by cancel method 16 p2653 A66-30800
- SPEED**
 S AIR SPEED
 S CRITICAL SPEED
 S GROUND SPEED
 S HYPERSONIC SPEED
 S LANDING SPEED
 S LIGHT, SPEED OF
 S PERCEPTUAL SPEED
 S ROTOR SPEED
 S SUBSONIC SPEED
 S SUPERSONIC SPEED
 S TIME MEASUREMENT
 S TRANSONIC SPEED
 S ULTRASONIC SPEED
 S VELOCITY
- SPEED REGULATION**
 Optimum speed control of automatic system, noting nonlinear mechanical characteristics of slave motor and speed dependence of load 06 p0863 A66-16531
 Isochronous and droop type governors controlling aircraft engines 08 p1282 A66-19765
 Money-saving technique to speed up potentiometer in control systems 14 p2267 A66-27804
 Frequency control accuracy measured for hydromechanical constant speed drive with precise speed trim 20 p3499 A66-37174
- SPEEDOMETER**
 Stall indicator modification, describing design in combination with speed indicator LUN-1106 06 p0883 A66-16971
 Evaluation of AD560 Doppler by Qantas, discussing ground-speed run-down problem, radome design, along-track error and low-altitude accuracy over land and sea 07 p1078 A66-17811
- SPHERE**
 SA CELESTIAL SPHERE
 SA OGIVE
 SA ROTATING SPHERE

- Slow motion of sphere in compressible, viscous and heat conducting fluid analyzed, using Navier-Stokes equations 01 p0006 A66-10424
 Circle and sphere theorems for biharmonic equation and application to displacement field of stressed plate under pure bending, noting singularities 01 p0093 A66-10427
 Laminar boundary layer of nitrogen flow over helium cooled sphere with porous wall 01 p0162 A66-10463
 Sphere drag measurements at low Reynolds number 02 p0219 A66-11956
 Drag of sphere moving along axis of rotating viscous fluid 02 p0219 A66-11957
 Lincoln sphere for radar calibration, noting measurements before and after launching 03 p0430 A66-12449
 Small radial vibrations of homogeneous isotropic prestressed sphere 04 p0591 A66-14207
 Extension, for heterogeneous sphere, of previous work which gave expressions for mean strain and rupture as functions of hydrostatic and nonhydrostatic components of free energy 08 p1212 A66-18638
 Interaction of ideally conducting sphere of variable diameter and constant uniform magnetic field 08 p1186 A66-19760
 Early studies of plane wave scattering by sphere 10 p1497 A66-21587
 Scattering of electromagnetic wave by metallic sphere loaded with circumferential slot in presence of electric field 10 p1499 A66-21611
 Pure torsion of infinite solid containing two rigid spherical inclusions 12 p1962 A66-23995
 Laminar hypersonic flow past sphere based on constant-density approximation, solving Navier-Stokes equations and comparing with values of shock Reynolds number 12 p1800 A66-24943
 Three-dimensional photoelasticity calculation of stresses in spheres with concentric spherical cavities under diametral compression 14 p2401 A66-27769
 Stresses due to two equal and opposite couples applied at ends of diameter on surface of elastic sphere having concentric spherical inclusion 14 p2409 A66-28460
 Plane electromagnetic scattering by unidirectionally conducting sphere 15 p2448 A66-28573
 MHD drag of dielectric oscillating sphere in incompressible conducting fluid with uniform magnetic field aligned along axis of oscillation 15 p2553 A66-29689
 Low Reynolds number flow past sphere for cases involving density and temperature variations, noting compressibility, transport properties and viscous dissipation 15 p2425 A66-29740
 HF backscattering by plane electromagnetic wave incident on imperfectly conducting sphere covered with concentric layers of different materials, noting refractive index value 16 p2647 A66-30224
 Steady motion of viscous incompressible fluid between concentric spheres, injecting and ejecting fluid through inlet and outlet holes, describing boundary conditions by series expansion 16 p2687 A66-31294
 Maximization of second-degree polynomial on unit sphere 19 p3392 A66-36787
 General relativistic field equations of compressible fluid sphere with variable polytropic index 20 p3545 A66-37465
 Plane linearly polarized electromagnetic wave diffraction on several spheres forming linear system, showing solution of boundary value problems 20 p3803 A66-37754
 Heat transfer between copper sphere and air flow at normal and reduced pressure for various Reynolds numbers 21 p3835 A66-38904
 Existence of angular boundary values of harmonic function in sphere 21 p3757 A66-38909
 Bistatic radar method for determination of permeability and permittivity of material for smooth spherical target 22 p3863 A66-39941
 Radiant heat transfer between concentric spheres and coaxial cylinders, assuming isothermal inner surface to be diffuse emitter and outer surface to reflect specularly 22 p3998 A66-40030

- Radiative heat exchange between body an enclosure when temperature and emissivity are not uniform on surface, using series solution 22 p3998 A66-4014
 Falling of sphere along axis of vertical tube filled with viscous liquid, examining effect of cylindrical walls by linearize Navier-Stokes equations, using successive approximations 23 p4055 A66-4144
 Vertical impact of spherical solid half submerged in fluid of finite depth examining effect of bottom on occurring phenomena 23 p4056 A66-4172
 Equilibrium temperature and heat transfer of sphere in supersonic flow of rarefied air 23 p4010 A66-4173
 Equilibrium of elastic sphere with pressing rigid punches 23 p4145 A66-4198
- SPHERICAL CAP**
 Axisymmetric imperfections effect on elastic buckling of spherical caps under uniform pressure 10 p1617 A66-2178
 Collapse of spherical caps under external pressure, with data for polyvinylchloride and aluminum alloy caps 12 p1972 A66-2497
 Dynamic snap-through buckling of shallow spherical caps of elastic material 14 p2406 A66-2799
 Computer solution using Bubnov-Galerkin method to determine concentrated force effect on shallow spherical dome 17 p3026 A66-32601
- SPHERICAL HARMONICS**
 Tables and maps of geomagnetic coordinates corrected by higher order spherical harmonic terms 01 p0062 A66-10888
 Satellite geodesy noting gravitational and geometric use, current national program, orbit perturbations, etc 02 p0225 A66-12236
 Modified double-interval spherical harmonic method to solve Milne equation of transfer for spherically symmetric planetary nebular shell 03 p0428 A66-13111
 Stress concentration due to two rigid spherical inclusions in three-dimensional theory of elasticity, noting spherical dipolar harmonics [ASME PAPER 65-APMW-21] 04 p0592 A66-14222
 Generalized almost periodic sequences generated by ultraspherical polynomials and validity of Parseval theorem 06 p0902 A66-16536
 Spherical harmonic analysis of diurnal surface pressure oscillation 08 p1246 A66-18800
 Spherical harmonic analysis of main part of Earth magnetic field from standpoint of probability theory 08 p1214 A66-19037
 Coefficients of expansion into spherical harmonics of Moon surface as presented by selenodetic control system of USAF 08 p1217 A66-19264
 Tabulation of spherical harmonic coefficients of geomagnetic field data for trapped-particle evaluation 08 p1219 A66-19419
 Temperature distribution in fluid spherical layer enveloping gravitating sphere 08 p1320 A66-19485
 Creep motion and hydromagnetics of ellipsoid moving in cross field 09 p1408 A66-20580
 Spiking behavior of multimode ruby laser in spherical resonator, interpreting near-field patterns, frequency spectrum, etc 10 p1542 A66-21311
 Gravitational and satellite data determination of spherical-function series coefficients for expansion of Earth gravitational potential 12 p1867 A66-23516
 Stress concentration due to two rigid spherical inclusions in three-dimensional theory of elasticity, noting spherical dipolar harmonics [ASME PAPER 65-APMW-21] 12 p1961 A66-23975
 Propagation stability of spherical flame in gas dynamic configuration of Landau and Markstein, showing that flame is stable relative to first spherical harmonics 14 p2410 A66-26779
 Nonhomogeneous solid sphere radiative cooling asymptotic representation based on heat conduction theory by Laplace transforms 14 p2414 A66-28144
 Mathematical model for geomagnetic field for 1965 given by internal and external

- erical harmonic
 - Efficients 16 p2695 A66-30718
 - eneralized almost periodic sequences
 - erated by ultraspherical polynomials and
 - ity of Parseval 16 p2736 A66-30974
 - orem 16 p2736 A66-30974
 - elestial mechanics covering two-body
 - blem, planetary and asteroid theory,
 - erplanetary trajectories, lunar probe,
 - erical harmonics, etc 17 p2997 A66-32019
 - armonics of absolute lunar elevations,
 - ussing stability criteria and spherical
 - monic analysis of geometric figure of
 - on 17 p3006 A66-33019
 - pectral method more efficient than grid-

- Relation between angle of attack envelopes and correlation parameter for spinning bodies entering atmosphere at large inclinations 03 p0432 A66-12811
- Aircraft erect and inverted spinning characteristics, discussing Hawker-Siddeley Hunter T.Mk. 7 spin properties and application of controls for recovery 07 p0987 A66-17489
- Final spin states of planets and satellites, deriving criteria for synchronous rotation 11 p1769 A66-22528

- Stochastic processes in microscale relativistic fluid mechanics, discussing Dirac fluid, Klein-Gordon equation, diffusion, quantum potential, spin fluids, etc 12 p1914 A66-24093
- Unitarity conditions for photon echo detectors of coherent radiation 13 p2128 A66-26219
- Spin-free transition density matrices, using permutation group 15 p2547 A66-29620
- Effect of spin on internal ballistics of solid propellant motor [AIAA PAPER 66-523] 16 p2791 A66-31485
- Single-axis meter design and development for measuring feeble torques on massive bodies, discussing calibration, testing results, evaluation of static dipole moments and spacecraft spin-rate control moments 21 p3722 A66-38880
- Ferromagnetic spin correlations from strong Coulomb interactions between valence electrons resulting in enhanced singlet-state repulsion 21 p3803 A66-39263
- Analysis of perfect frictionless suspension of rotating body with two degrees of freedom mounted on rotating shaft of spin axis deflection [AIAA PAPER 65-435] 23 p4066 A66-41100

SPIN-LATTICE RELAXATION

- Ultrasonic maser amplification by stimulated phonon-photon double quantum emission in magnesium oxide 01 p0080 A66-10247
- Operator for electron interaction with optical phonons, noting spin-lattice relaxation and additional magnetophonic oscillations of kinetic coefficients for semiconductors 01 p0124 A66-10767
- Nuclear spin-lattice relaxation times of V 51 and Nb 93 and nuclear magnetic resonance line profiles V 51 in Type II superconductors 02 p0276 A66-12026
- Phonon interaction with iron group ions characterized by coupling constant, discussing double quantum detection of phonon, propagation in dispersive medium and phonon maser 03 p0376 A66-12420
- Concentration and temperature dependence of spin-lattice relaxation time in ruby at helium temperatures 07 p1044 A66-18257
- Proton magnetic resonance studies of linewidth, second moment and spin-lattice relaxation time of solid triethylenediamine /TEDA/ 08 p1177 A66-18934
- Nuclear spin relaxation in superconducting gallium measured by nuclear quadrupole resonance in zero magnetic field, using pulsed nuclear induction spectrometer 09 p1420 A66-20047
- Electronic thermal conductivity, longitudinal sound wave decay and nuclear-spin temperature in superconductors with paramagnetic impurities 09 p1421 A66-20054
- Concentration and temperature dependence of spin-lattice relaxation time in ruby at helium temperatures 09 p1387 A66-20901
- Operator for electron interaction with optical phonons, noting spin-lattice relaxation and additional magnetophonic oscillations of kinetic coefficients for semiconductors 11 p1748 A66-22278
- Interrelation between relaxation center in tungsten and molybdenum and high temperature internal friction background of spectrum 11 p1719 A66-23386
- Spin-lattice relaxation of conduction electrons in semiconductors of n-InSb type with scattering at acoustical and optical phonons 14 p2358 A66-27083
- Spin-rotation interaction and relaxation time of fluorine nuclei in benzotrifluoride calculated, using time-dependent perturbation theory 16 p2645 A66-30110
- Inverted susceptibility, inversion ratio, line widths and spin-lattice relaxation times for maser operation point in chromium-doped cobalt potassium cyanate 16 p2718 A66-30934
- Angular dependence of spin-lattice relaxation times in ruby evaluated, using second order perturbation wave function and field coupling representation 16 p2781 A66-31220
- Spin-lattice interaction in ruby measured by electron spin resonance in uniaxially stressed crystals 17 p2981 A66-32718
- High resistivity silicon single crystals, discussing carrier lifetime, photoconductivity

- and recombination levels 17 p2987 A66-33311
- Spin-lattice relaxation rate of donor electrons in phosphorus and boron-doped silicon with various degrees of compensation 18 p3156 A66-34477
- Nuclear polarization by hot carrier flow in homogeneous semiconductor, taking into account effect of strong electric field on spin lattice relaxation time 19 p3437 A66-35477
- Direct, Orbach and Raman paramagnetic relaxation measurements for trivalent cerium ion present as dilute impurity in lanthanum magnesium hydride 19 p3443 A66-36001
- Spin-lattice relaxation of conduction electrons in semiconductors of n-InSb type with scattering at acoustical and optical phonons 22 p3967 A66-40831

SPIN-ORBIT INTERACTION

- Spin-orbit coupling and electron-affinity determinations from radiative capture of electrons by oxygen atoms 04 p0547 A66-13647
- Semiconductor excitation-level splitting for shallow impurity state due to spin orbital shifts 04 p0565 A66-14268
- Fine structure exhibited by near IR absorption and emission spectra of copper ions in ZnS and CdS crystals recorded at low temperatures 05 p0742 A66-15877
- Alternant molecular orbital /AMO/ method compared to nonpaired spatial orbiting /NPSO/ method 06 p0910 A66-16161
- Approximate natural orbitals for four electron wavefunctions for Be and LiF obtained by diagonalization of appropriate first order reduced density matrices 06 p0910 A66-16161
- Internal resonance in semiconductors known as spin-magnetophonon 06 p0928 A66-16780
- Vector pairing in small dimensional superconductors vanishes when pair dimensions are larger than sample or electron mean free path 06 p0930 A66-17054
- Superconductors with ferromagnetically aligned impurities, assuming electron mean free path due to spin-orbit interaction is small compared to coherence distance 07 p1108 A66-18431
- Magnetization using Hartree-Fock approximation in terms of boson distribution for uniformly interacting spins system 07 p1084 A66-18441
- Model for spin-orbit interaction in nontransition metals and semiconductors including liquid metals and alloys 07 p1109 A66-18515
- Spin-orbital interaction with lattice cannot produce Knight shift of great magnitude in superconductor 08 p1269 A66-18981
- Anomalies in low temperature properties of noble metal alloys such as thermoelectric power and nonmonotonic behavior of resistivity with temperature 08 p1274 A66-19362
- Theory of spin-magnetophonon resonance in semiconductor 09 p1425 A66-20190
- Solar system origins and planet evolution as subcondensations in differentially rotating medium, discussing orbit and spin angular momentum 12 p1946 A66-23653
- Dirac equation for spin-half particles in curved space-time formulated by using Cartan calculus, applied to treatment of neutrinos in homogeneous nonisotropic universes and plane wave geometries 12 p1905 A66-24563
- Spontaneous and coherent emission from lead sulfide, telluride and selenide diode lasers in oriented magnetic field, determining band edge parameters from spin-split zero order Landau level transitions 13 p2100 A66-26185
- Coexistence of superconductivity and ferromagnetism in alloy containing paramagnetic impurities explained by spin-orbit interaction of conduction electrons 13 p2169 A66-26566
- Static properties and interactions of neutrinos noting mass, spin, helicity, charge, lepton number, etc 15 p2546 A66-29582
- Spin-orbit splitting and electroreflectance in semiconductors noting measurement techniques and results 16 p2767 A66-30128
- Fulde-Ferrell effect in type II superconductors 17 p2975 A66-31887

- erately long-range relativistic
molecular forces, obtaining interaction
17 p2960 A66-32401
- anomagnetic effect in ferromagnetic
is, developing theory of planar Hall
et in terms of spin-orbit interaction of
rons 18 p3158 A66-34682
- arization difference in elastic scattering
oton from Ar 40 and Ca 40 due to spin-
force difference 18 p3140 A66-35037
- ernal resonance in semiconductors
n as
magnetophonon 19 p3434 A66-35377
- axation of optically pumped Rb atoms
paraffin-coated walls, using Franzen
ence, analyzing physical meaning of
al signal 19 p3374 A66-35992
- ence band spin-orbit splitting in highly
nerate semiconductors determined from
ing of peak laser diode emission in
magnetic fields 19 p3374 A66-36036
- ergy levels and interband oscillator
ngths of antimony calculated in Brillouin
by pseudopotential method, predicting
rization effects and spin-orbit
tings 19 p3446 A66-36392
- itting of EPR lines of trivalent Cr ion
inc tungstate by external electric field,
ng angular dependence and
responding spin
iltonians 20 p3615 A66-37370
- envalues and eigenfunctions of spin
iltonian and matrix elements of spin
ator of ruby 20 p3578 A66-37584
- ull spin paramagnetism and spin-orbit
tering in magnetization of
erconducting Ti-Mo 21 p3796 A66-38551
- uli paramagnetism effect on magnetic
erties of high field superconductors,
ng spin-orbit
tering 21 p3797 A66-38557
- ergy spectrum of semiconductor
pounds with chalcopyrite structure
yzed, using perturbation theory, noting
nges resulting from crystalline and spin-
tial interactions 21 p3799 A66-38923
- omalous behavior of superconducting
sition temperature for certain magnetic
ering of paramagnetic
urities 21 p3803 A66-39264
- agnetic resonance in He 3 ground states
nined through interaction with
astable atoms in gas discharge, observing
sfer of transverse magnetization by
ision 22 p3931 A66-39809
- in-orbit coupling in solar system,
mining resonant spin rates for one-and
-body planet/ satellite systems with
entric orbits 24 p4272 A66-42203
- agnetic breakdown on usual effective
iltonian theory for Bloch electrons in
netic field, using simple two-dimensional
angular model 24 p4249 A66-42223
- REDUCTION
DESPINNING
RESONANCE
ELECTRON SPIN RESONANCE
crowave acoustic waves generated by
magnetic resonance and spin-wave
nance modes in magnetic
03 p0331 A66-12409
- ectrical, IR property measurements and
ealing experiments on electron-irradiated
gen doped germanium 04 p0562 A66-13747
- nor concentration in semiconductor at
ch hyperfine structure of spin absorption
s vanishes 04 p0564 A66-14250
- article spin orientation by resonance
ation in space 05 p0748 A66-14876
- onance carrier scattering and spin-
netophonon interaction effect on
iconductor magnetic
eptibility 09 p1427 A66-20200
- able resonant spins for planet in
entric orbit, particularly Mercury
tion, analyzing motion equation for
ular position of long axis relative to
tial line fixed in
12 p1952 A66-24968
- rturbation theory analysis of stimulated
non-photon double-quantum emission in
tlevel spin systems 13 p2099 A66-26178
- SPIN COUPLING
change interaction of localized spins
conduction electrons leading to indirect
-spin interactions in
iconductor 01 p0125 A66-10782
- Location and nature of singularity of Ising
square lattice susceptibility, using Pade
approximation based on Clapp spin-spin
correlation function 02 p0263 A66-11887
- Exchange interaction of localized spins
with conduction electrons leading to indirect
spin-spin interactions in
semiconductor 11 p1749 A66-22295
- Zero-field splitting in ground state of ruby,
considering effect of spin-spin interaction,
using L gamma
representation 11 p1750 A66-22491
- Compensation and decompensation in
ferromagnetic alloys viewed as electric
interaction of spins 12 p1930 A66-24684
- Nuclear magnetic resonance of phosphorus
compounds, discussing signs of spin-spin
couplings in dimethylphosphine and
methylphosphine 18 p3153 A66-33931
- Fluorine wide line nuclear magnetic
resonance spectrum to determine sign of
spin-spin coupling constant for anisotropy of
chemical shift 18 p3063 A66-33916
- BCS model extended to intermediate and
strong-coupling superconductors effective
interaction strength as function of absolute-
zero energy gap, phonon-frequency cut-off
and Fermi surface density of
states 23 p4113 A66-41376
- Approximate ground state wave functions
used in calculation of interaction energies
by second-order perturbation
theory 23 p4033 A66-42081
- Static spin susceptibility of
superconductors with p-pairing and
collective excitations, noting mercury and
tin 24 p4257 A66-42539
- Spin-spin interaction energy for large
separations of two ground state hydrogen
atoms 24 p4239 A66-43040
- SPIN STABILIZATION
Spin-stabilization system for attitude and
orbit control of synchronous Syncom and
Early Bird satellites 01 p0145 A66-11133
- Attitude stability of spinning satellite in
elliptical orbit using Floquet theory
[ASME PAPER 65-APMW-27] 04 p0586 A66-14227
- Motion of spinning satellite during
deployment of n asymmetrical appendages,
noting Pioneer spacecraft
[AIAA PAPER 66-100] 07 p1140 A66-18456
- Syncom synchronous communications
satellite design and development, discussing
orbit control and
reliability 08 p1301 A66-18564
- Fluid-sphere nutation sensor for
determining stability of rotating
satellite 08 p1224 A66-19490
- Scanning celestial attitude determination
system /SCADS/ for three-axis satellite
attitude information for Earth and spin
stabilized satellites and
probes 08 p1252 A66-19500
- Attitude control system, using magnetic
interaction with geomagnetic field to check
spin rate and spin axis orientation of spin-
stabilized Explorer A 08 p1304 A66-19512
- Ballistic performance change in spinning
rocket motors attributed to internal gas
dynamics and combustion effects, noting
grain geometry influence 10 p1590 A66-21945
- Bounds for decay times of pendulum
damper vibrating in plane containing spin
axis of space vehicle 12 p1954 A66-24693
- [AIAA PAPER 64-658] 12 p1954 A66-24693
- Satellite providing optimum
communications to military users, noting
gyroscopic stabilization of antennas, major
characteristics, etc 12 p1955 A66-24740
- [AIAA PAPER 66-267] 12 p1955 A66-24740
- Synchronous orbit stationkeeping
techniques, examining thrust control
requirements of spin-stabilized spacecraft
[AIAA PAPER 66-304] 12 p1955 A66-24771
- Stability of commensurate spin angular
velocity for Venus, assuming solar tidal
torque action and suggesting Venus rotation
period is commensurate with synodic
period 12 p1953 A66-24969
- Orbit precession effect on gyroscopic
stabilization of satellite in geomagnetic
field 14 p2391 A66-27473
- Motion equations and simulation of spin-
stabilized interplanetary spacecraft closed-
loop pitch control system, using low-thrust
gas jet torquers with rate gyro
sensors 14 p2392 A66-27881
- Navigation for spin stabilized deep space
interplanetary spacecraft such as Pioneer
VI, for missions to Venus, Mars and
Jupiter 14 p2329 A66-28456
- Torque-free precession of spin stabilized
spacecraft, showing thrust misalignment as
cause for final burnout
impulse 16 p2810 A66-30903
- Viscous ring damper for removing wobble
motion of spin-stabilized satellite analyzed
by studying energy
dissipation 16 p2820 A66-31276
- Attitude stability of spinning satellite in
elliptical orbit, using Floquet theory
[ASME PAPER 65-APMW-27] 18 p3239 A66-33590
- Syncom communications satellite reaction
control system for spin axis precession and
orbit correction, noting design and
operation 18 p3242 A66-33854
- Satellite spin rate and spin axis orientation
control by magnetic torquing
system 18 p3243 A66-33859
- Tiros satellite attitude control, using spin
stabilization by geomagnetic
torques 18 p3243 A66-33860
- Magnetic torquing of spinning satellites,
deriving equations for motion of
symmetrical rigid body about center of mass
in homogeneous magnetic
field 19 p3471 A66-36692
- Passive wobble damping system with
pendulum damper designed for manned
rotating space station 20 p3664 A66-38159
- Attitude stability of satellite composed of
two elastically connected rigid bodies with
energy dissipation treated by Routhian array
method 21 p3818 A66-38694
- Gravity torque effects on spinning
satellite 21 p3818 A66-38714
- Magnetic attitude control of rigid spinning
satellite in circular Earth orbit by producing
control torques 21 p3763 A66-38846
- Guidance equations for positioning spin
stabilized communications satellite in
circular orbit, noting velocity adjustments,
using Monte Carlo
simulation 21 p3764 A66-38864
- Stabilization and control system of Tiros-
wheel satellite, using current-carrying coil
interaction with geomagnetic
field 21 p3821 A66-38878
- Damping by hemispheric torquing to
actively control spin axis in rotor while
remaining unchanged with respect to case
fixed reference 21 p3737 A66-38896
- Coupling between spin-stabilized rocket
motion and propellant sloshing tested in
zero gravity environment
[AICE PREPRINT 17C] 22 p3897 A66-39887
- Linear dynamic analysis of angular motion
of spinning axisymmetrical rocket or
spacecraft, emphasizing rigid body with
thrust malalignment and another motion
caused by deflection of control surfaces or
jets 22 p3988 A66-40618
- Electronically despun antenna and
electronically controlled phase shifters to
increase transmitter output power for spin-
stabilized communication
satellites 23 p4036 A66-41142
- Primary factors affecting passive stability
of spinning cable-connected satellite
including perturbations due to gravity
gradient, out and in reeling,
etc 24 p4283 A66-42767
- Motion of spinning satellite during
deployment of n asymmetrical appendages,
noting Pioneer spacecraft
[AIAA PAPER 66-100] 24 p4283 A66-42768
- SPIN TEST
Ejection seat spin rate tests to determine
temporary incapacitation
possibilities 11 p1647 A66-22576
- SPIN WAVE
Parametric excitation of first order
magnon/phonon instabilities in ferrimagnet
or antiferromagnet by photon or phonon
parallel-pump 01 p0120 A66-10519
- Spin wave instabilities in ferrite using
parallel pumping and spin wave absorption
near Curie temperature 01 p0121 A66-10539
- Spin wave excitation of magnetoacoustic
oscillation modes and beating of these
modes in yttrium-iron garnet
/YIG/ 01 p0126 A66-10965
- Spin wave generation in nonuniform

magnetic fields with application to magnetic delay lines 03 p0332 A66-12417

Unified model of ferromagnetism, analyzing spin-wave motion of electrons in transition metals, using atomic and energy-band features 04 p0559 A66-13450

Magnetoelastic interaction in thin permalloy films at X-band noting phonon excitation by spin waves, spin wave excitation by phonons and re-excitation of spin waves by phonons 04 p0561 A66-13726

Theoretical transit time of magnetostatic spin waves propagated at microwave frequencies in normally magnetized disk 04 p0561 A66-13735

Attenuation and velocity of shear acoustic waves propagating parallel to magnetic field for spin density wave metal 06 p0922 A66-16074

Electric field and wave impedance in spin wave propagation in ferrimagnetic materials 06 p0847 A66-16101

Pure spin and spin-acoustic delay modes of single crystal YIG 06 p0847 A66-16104

Coherent increase of spin wave semiconductors by electric current, if electron drift velocity exceeds spin wave phase velocity 07 p1105 A66-18368

Conduction electron interaction with spin wave in ferromagnetic superconductor, noting decay and damping 09 p1430 A66-20867

Ferromagnetic resonance in thin magnetic permalloy films, examining laws governing spin-wave spectrum for parallel orientation of magnetic field 11 p1755 A66-22822

Spin wave sideband in absorption spectrum at low temperatures for transition of manganese ion in antiferromagnetic manganese fluoride 11 p1740 A66-22970

Green function random phase decoupling scheme investigation of magnetic impurities effect on thermal properties of cubic spin-1/2 Helsenberg 11 p1758 A66-23394

Fine-grain structure effect on microwave power absorption thresholds of ferrimagnetic garnets and spinels 14 p2350 A66-26880

Spin wave excitations and surface impedance in microwave transmission through thin permalloy films 14 p2350 A66-26885

Plasma-spin wave interaction in ferromagnetic semiconductors and metals with easy-plane and easy-axis magnetic anisotropy 14 p2360 A66-27188

Electronic density of states of superconducting ferromagnetic alloys determined by static electron-impurity exchange interaction 16 p2768 A66-30148

Magnetostatic spin wave propagation at microwave frequencies in magnetized rod 17 p2980 A66-32648

Associated nonuniform electron-nucleus oscillations in ferromagnetic substances studied to determine feasibility of maser, using magnetic-reversal nuclear magnetic resonance 20 p3577 A66-37477

International Union for Vacuum Science, Technique and Applications - International Congress, Stuttgart, June-July 1965 20 p3621 A66-38083

Spin wave excitation by ferromagnetic resonance, measuring coercive field as function of temperature by Kerr effect method and determining magnetic properties of thin films 20 p3621 A66-38085

Kjeldaa absorption edge in cryogenic potassium for shear magnetoacoustic wave propagation in spherical metallic Fermi surface with spin density wave ground state 21 p3800 A66-38991

Spectral analysis of interacting electromagnetic, plasma and spin waves in antiferromagnetic semiconductors and metals with easy-axis and plane type anisotropy 21 p3804 A66-39311

Simultaneous existence /triple resonance/ of spin, helical and acoustic waves in ferromagnetic conductor in strong magnetic field 22 p3964 A66-40310

Parametric phenomena in ferromagnetics, noting parametric excitation of quasi-particles and stationary state of excited waves 24 p4256 A66-42522

Plasma-spin wave interaction in ferromagnetic semiconductors and metals

with easy plane and easy axis magnetic anisotropy 24 p4259 A66-43086

SPINAL CORD

Conduction velocity of single units, verified components of spinocervical tract and over-all conduction velocity determined in dorsal column of cat 06 p0810 A66-15941

Impulses originating in dendrite region in most dorsal part of dorsal horn, noting correlation between membrane potential and cell firing rate 12 p1805 A66-23567

Repeated vertical/head-tail vibration effect on functional state of spinal reflex arc of guinea pigs 23 p4026 A66-41338

SPINE

Causes of compression fractures of spine during large number of USAF ejections 03 p0327 A66-12361

SPINEL

Single crystal silicon on spinel, achieving epitaxy on magnesia aluminate by Spilane pyrolysis and silicon chloride reduction in hydrogen atmosphere 13 p2158 A66-25053

Fine-grain structure effect on microwave power absorption thresholds of ferrimagnetic garnets and spinels 14 p2350 A66-26880

Preparation and mechanical properties of spinel, discussing microstructure, transverse and compressive strength and Youngs modulus 16 p2730 A66-30251

Hamiltonian describing EPR spectrum of trivalent chromium ion in ordered lithium-aluminum spinel and rhombic distortion causing deviation of axes in octahedron electric field 16 p2787 A66-31763

SPINNING RECOVERY

Aircraft spinning problems, noting mass distribution and tail design factors for satisfactory spin recovery characteristics 11 p1637 A66-23077

SPIRAL ANTENNA

Electrically small antennas that distribute tuning and matching components over entire antenna volume to achieve lowest coupling loss 06 p0850 A66-16428

Wideband annular-zone directional antenna, with individual radiators arranged in log-periodic concentrated groups on ring fed by conical line 08 p1190 A66-18682

Electromagnetic excitation by vertical magnetic dipole located above spiral anisotropic plane 17 p2897 A66-33518

SPIRAL GALAXY

Comparison of optical and radio observations of spiral structure of galaxies 03 p0423 A66-12454

Large-scale aspects of gaseous components of our Galaxy, noting dynamics of gaseous systems with magnetic fields, virial theory, angular momentum, spiral structure of galactic disk, etc 11 p1767 A66-22263

Gravitational theory for dynamical basis of quasi-stationary spiral structure of stars 14 p2381 A66-27500

Galactic model for studying hydromagnetic stability of spiral arm in which field lines are helices around axis 18 p3237 A66-35043

Galactic magnetic fields, considering magnetic flux, frequency of fields in radio galaxy, disk, interstellar gas dynamics and spiral structure 20 p3645 A66-36958

Spiral patterns of disk-like galaxies explained in terms of density waves that are collective modes of stellar system analogous to plasma waves 24 p4273 A66-42266

SPLEEN

S BLOOD

SPINE FUNCTION

Matrix scheme using two-way spline curves for interpolating low aspect ratio lifting surface mode deflections for use in aeroelastic calculations 05 p0774 A66-15058

Multidimensional spline theory generalized from one-dimensional spline theory and preserving minimum curvature, best approximation and convergence properties 11 p1723 A66-23182

Spline theory methods of interpolating linear functional containing Peano kernel 21 p3757 A66-39257

SPLIT FLAP

Gust alleviation systems for transport aircraft using linkage, noninteracting and split control 18 p3052 A66-34493

SPOILER

S Q-SPOILING

SPOILER-SLOT AILERON

Transonic wind tunnel investigation optimum roll effectiveness of large swing transport aircraft with conventional and spoiler ailerons [AIAA PAPER 65-789] 03 p0352 A66-12

SPONTANEOUS EMISSION

1.60 micron stimulated and spontaneous emissions from epitaxial single crystals quasi-binary III-V compound semiconductor diodes of injection lasers at 77 degrees K 22 p3930 A66-39

Spontaneous emission in inversely populated medium examined for uniformly ruby rod laser with uniform pump distribution 23 p4078 A66-41

SPONTANEOUS IGNITION TEMPERATURE

Spontaneous combustion and pyrolytic properties of some powder materials at high temperature 02 p0305 A66-12

Spontaneous ignition of zirconium and titanium powders and alloys, noting oxygen diffusion into oxide film and film dissolution 07 p1049 A66-17

Spontaneous ignition of mixtures aluminum trimethyl and oxygen showing ignition boundary as function of partial pressures of reactants 08 p1321 A66-19

Spontaneous ignition of inflammable fluid by hot surfaces, particularly high aircraft skin temperatures 15 p2618 A66-29

Spontaneous ignition of zirconium and titanium powders and alloys, noting oxygen diffusion into oxide film and film dissolution 21 p3752 A66-39

Spontaneous ignition of inflammable fluid by hot surfaces, discussing static hot plate and wind tunnel rigs 23 p4083 A66-41

Autoignition of nitromethane vapor diluted with Ar at high temperature determining monomolecular decomposition constant 24 p4295 A66-431

SPORADIC E LAYER

Auroral zone absorption, reporting periodic variation of sporadic E layer in Antarctica considering magnetospheric time-of-flight spectrometer effect 01 p0061 A66-104

Sporadic E layer characteristics compared to regular ionospheric layers and formalized at various latitudes 01 p0063 A66-110

Correlation of hydrogen emission at oxygen line in diffusive auroras at sporadic E layer 01 p0064 A66-111

Discrepancies in data concerning auroral type sporadic ionization in E region obtained by various high latitude stations 02 p0225 A66-121

Ultralong-range propagation of meter radio waves, noting equipment details and television signal reception 02 p0192 A66-121

Relation between irregular variations magnetic field intensity with sporadic region containing current system responsible for quiet solar diurnal variation 02 p0225 A66-121

Behavior patterns exhibited by polar ionospheric phenomena indicated by statistical analysis of IGY data 03 p0364 A66-126

Sporadic E layer characteristics according to data on ionospheric propagation ultrashort wavelengths 04 p0514 A66-134

Sporadic E layer characteristics over Soviet and diurnal and seasonal variations maximum and reflection frequencies 04 p0514 A66-134

Frequency dependence of cosmic noise levels during anomalous type II absorption noting shielding sporadic E layer 04 p0574 A66-138

Sporadic E layer appearance relation meteor ionized stream 04 p0577 A66-138

Correction to paper on rocket studies sporadic-E ionization and ionospheric winds 05 p0671 A66-149

Evaluation of sounding rockets for meteorology for 30 to 200-km altitude range noting role in X and gamma ray detection sporadic E layer, etc 07 p1140 A66-176

Sporadic E layer at middle and low latitudes and relation to solar quiet day variations in ionosphere 08 p1213 A66-190

Relation of sporadic E layer to ionospheric F region 08 p1221 A66-197

Sporadic E signal strength calculation useful for estimating interference in UHF or HF communications 09 p1344 A66-203

Re of coupling phenomena in

 Sporadic E ionization, considering sheets
 d winds 14 p2282 A66-26854
 Extraterrestrial dust as possible cause of
 ckground ionization and stratification in
 oradic E layer 14 p2282 A66-26855
 Discrepancies in data concerning aurora
 pe sporadic ionization in E region

obtained by various high latitude
 stations 14 p2287 A66-28092
 Ultralong-range propagation of meter radio
 waves, noting equipment and television
 signal reception 14 p2241 A66-28093
 Relation between irregular variations in
 magnetic field intensity with sporadic E
 region containing current system responsible
 for quiet solar diurnal
 variation 14 p2287 A66-28096
 Diurnal and seasonal variations of sporadic
 layer in auroral zone 15 p2487 A66-29098
 Formation mechanism of ionospheric
 narrow sporadic E layers by high energy
 electron fluxes captured by geomagnetic
 field 15 p2488 A66-29110
 Wind shear theory of formation of
 temperate zone blanketing sporadic E layers,
 noting motion equation for ions in
 ionospheric E region 15 p2490 A66-29948
 High incidence and erraticism of sporadic
 E occurrence in temperate zones where
 horizontal component of geomagnetic field is
 greatest, attributed to horizontal wind
 shear 15 p2490 A66-29949
 Backscatter returns from ionospheric
 sporadic E on sea and
 land 17 p2923 A66-33357
 Phase fluctuations of ground-backscattered
 signals recorded, noting phase stability of
 sporadic E-layer-supported and F-2-layer-
 supported ground
 backscatter 18 p3071 A66-34534
 Ionospheric radio wave absorption, noting
 inverse correlation between solar activity
 with stability of reflections from sporadic E
 layer 19 p3344 A66-35263
 Solar activity dependence of sporadic E
 layer, noting cyclic variation in
 characteristics from 1957 to
 1964 19 p3344 A66-35264
 Formation of sporadic E layer in middle
 latitudes due to transport phenomenon and
 local production
 phenomenon 19 p3346 A66-35589
 Long-term variation in equatorial sporadic
 E and electrojet caused by sunspot
 cycle 20 p3549 A66-37291
 Two-year variation in troposphere,
 ionosphere and stratosphere regions, noting
 sporadic E layer in Far
 East 20 p3552 A66-37571
 Relation of sporadic E layer to ionospheric
 F region 21 p3733 A66-38788
 Sporadic E layers formation by wind
 shears, noting role of neutral wind temporal
 variations and rapid transition from day to
 night in layers with vertical
 gradients 22 p3907 A66-39961
 Coupling phenomena in recombination
 processes of complex ionosphere composed
 of positive ions under vertical field of
 ionization drift applied to wind shear theory
 of sporadic E layers 22 p3907 A66-39962
 Coexistence of different types of sporadic
 E layers corresponding to specularly
 reflected and diffusely scattered fields
 demonstrated, using radio
 link 22 p3864 A66-39963
 Relation between diurnal, seasonal and
 cyclic variations of stratifications in E layer
 and fine structure of sporadic E layer and
 E-2 layer 22 p3914 A66-40761
 Diurnal variations in sporadic E layer
 parameters during solar cycle based on
 Moscow observations 22 p3915 A66-40781
 Role of positive ion composition in wind
 shear theory of sporadic E layers, examining
 cases for meteoritic, No and oxygen
 ions 23 p4063 A66-41644
 Sporadic E layer formation at night, noting
 ionization sources and
 intensity 23 p4064 A66-41645
 16-megacycle backscatter echoes from
 sporadic E region recorded near Brisbane,
 Australia, examining dimensions of
 horizontally moving
 irregularities 23 p4064 A66-41685
 Morning minimum of probability of
 existence of sporadic E layer and connection
 with time of sunrise 23 p4065 A66-41831
 Emergence and diurnal and seasonal
 fluctuations of sporadic E
 layer 24 p4201 A66-42759
 Spatial distribution of sporadic E layer
 over Arctic ice cap, noting negative
 dependence between illumination of
 ionosphere and frequency of

layer 24 p4204 A66-43152
 Sporadic E layer reflection used to
 determine instrument constant in measuring
 radio wave absorption in
 ionosphere 24 p4205 A66-43156
SPORADIC METEOR
 Staude-Hoffmeister integral for abundance
 of sporadic meteoric
 bodies 03 p0427 A66-12921
 Staude-Hoffmeister integral for abundance
 of sporadic meteoric
 bodies 14 p2380 A66-27270
SPORE
 Inhibition of zoospores of unicellular
 chlorococcacean alga by soil bacillus through
 ammonium ion 17 p2860 A66-32833
 Seed water content influence on oxygen
 effect as detected in gamma irradiated
 barley seeds and prolonged post-storage
 period in terms of biological effect and
 paramagnetic resonance
 signal 22 p3855 A66-40378
SPOT WELDING
SA ARC WELDING
 Localized bonding or spot welding of
 aluminum plates by high velocity impact
 with microparticles 02 p0242 A66-11562
 Piezoelectric probe permits ultrasonic
 testing of spot welds automatically and
 simultaneously with
 welding 02 p0235 A66-11687
 Plates spot welded by hypervelocity impact
 of microparticle 07 p1037 A66-17468
 Skin-heating temperature required to
 eliminate buckling of airframe occurring
 during spot electrical contact
 welding 09 p1384 A66-20764
 Aircraft structure weight reduction, using
 redux bending and spot welding instead of
 bolts and rivets 12 p1963 A66-24036
 Cryogenic resistance spot welding of
 refractory metals and conventional
 aerospace materials
 [ASTME PAPER AD66-111] 14 p2299 A66-26950
 Spot welding conditions for nickel alloy
 sheet material including nimonic PK33 and
 Rolls Royce alloy C263 in 16 and 22 SWG
 thicknesses 18 p3116 A66-33914
 Temperature distribution in rectangular
 flat plate during heat application and
 cooling periods in spot welding
 procedure 18 p3260 A66-34066
 Residual stress control in welded structure
 noting stress reduction by preheat,
 prestressing by fusion welding and spotweld
 impact treatment 22 p3924 A66-40262
 Spot and seam welding processes effect on
 behavior of aluminum
 alloy 22 p3928 A66-40880
SPRAY
S DROP
S FUEL SPRAY
S PROPELLANT SPRAY
SPRAY NOZZLE
 Compressed-gas dispersion effect on gas
 turbine engine operation, deriving spraying
 law, jet stream, penetration depth,
 etc 21 p3808 A66-38934
SPRAYED PROTECTIVE COATING
 Epitaxial growing of iron, nickel and cobalt
 single crystal films on sodium chloride
 crystals by spraying at 200 degrees
 C 11 p1753 A66-22805
 Magnetic properties and structure of
 ferromagnetic films obtained on single-
 crystal sodium chloride substrates heated to
 various temperatures during spray
 coating 19 p3438 A66-35497
SPRAYING
SA FLAME SPRAYING
SA PLASMA ARC METAL SPRAYING
 Pulsed spray arc welding compared with
 continuous spray
 processes 14 p2301 A66-27342
 Metal spraying processes including gas
 flame and plasma torch 24 p4217 A66-42533
SPRAYING APPARATUS
 Spray ejector operating in pulse rather
 than steady state regime, noting capability
 and formation of de Laval
 nozzle 19 p3450 A66-36603
 Plasma arc spraying equipment, techniques,
 materials and applications 22 p3922 A66-39700
SPREAD-F
 Gradual variation observed in time of
 occurrence of spread-F peak with
 geomagnetic latitude 11 p1702 A66-23370

Occurrence percentage of spread F in world-wide maps drawn from ionosonde data during years of high and low sunspot numbers 16 p2696 A66-30818

Spread F and ionospheric F region irregularities relation to magnetic field alignment, discussing radio star scintillations 17 p2923 A66-33433

Correlation of peak occurrence of HF radar echoes and high-latitude spread-F measurements near time of local sunset 18 p3107 A66-34525

Occurrence frequency patterns of topside spread-F on Alouette satellite ionograms, discussing radio propagation, magnetic irregularities, electron density-induced refraction, etc 20 p3554 A66-38196

SPRING

Coil spring alloys for temperatures above 400 degrees F noting design stresses, heat treatments and relaxation 01 p0079 A66-10959

Elastic wave propagation in helical springs of small helix angle, including effect of coupling between extension and rotation for large helix angle 08 p1311 A66-19293

Creep analysis of close-coiled helical springs 10 p1613 A66-21319

High temperature creep measurement in helical spring 11 p1781 A66-22692

Stresses and displacements in manometer springs with variable wall thickness 14 p2396 A66-27360

Hydrogen embrittlement reduction in springs by careful processing 19 p3362 A66-35326

SPUR

S SPACE POWER UNIT REACTOR /SPUR/

SPUTNIK III SATELLITE

Variation of total ionospheric electron content up to 1000 km between sunspot maximum and minimum measured by Faraday fading of Sputnik III signals 02 p0279 A66-11262

Atmospheric density calculations from observing Sputnik III satellite, examining solar activity effect 03 p0361 A66-12624

Sputnik III data application to plotting of total magnetic field intensity chart above U.S.S.R., using spherical harmonic analysis 19 p3345 A66-35290

SPUTTERING

RF sputtering for deposition of wide variety of thin films, discussing basic theory and apparatus 06 p0924 A66-16431

Neutron activation and cesium-aluminum sputtering in oxygenated gas atmosphere [AIAA PAPER 66-77] 06 p0913 A66-17103

Cathode sputtering theory, explaining sputtering dependence on ion angle of incidence, with application in electromagnetic isotope separators, etc 08 p1257 A66-18695

Sputtering yields of aluminum, copper and titanium measured as function of cesium ion energies for use as electrodes on cesium ion engines [AIAA PAPER 66-203] 10 p1575 A66-21445

Changes with time in coercive force of iron films and permalloy films prepared by sputtering material in magnetic field 11 p1753 A66-22802

Changes in domain structure of cobalt films as function of substrate temperature during sputtering and transformation from poly-to single-crystal structure 11 p1753 A66-22803

Low energy independent-discharge three-element sputtering system and use in thin film fabrication 12 p1847 A66-24955

RF sputtering of insulators, noting effects of auxiliary magnetic field, electrode size, oxygen concentration, substrate temperature and target material on thin dielectric film formation 13 p2157 A66-25039

Sputtering yields of copper single crystals as function of normally incident argon-ion energy 13 p2158 A66-25050

Dependence of electric properties of sublimated zinc telluride films on specimen thickness, substrate preheating temperature and sign of current carriers 13 p2160 A66-25098

Bias-sputtering of nickel-iron thin films for memory elements 14 p2354 A66-26909

Damaged depth in germanium thin films induced by bombardment with low energy argon ions measured, using differences in

sputtering yield for given energy 15 p2561 A66-28705

Nature of forces causing adhesion of coatings produced by plasma jet sputtering techniques 15 p2505 A66-28752

Radioactive tracer technique to measure yield and angular distribution of copper sputtered from monocrystalline target subject to cesium ion bombardment [AIAA PAPER 65-379] 15 p2566 A66-29290

Magnetic and structural properties of monoferrite films prepared by cathode sputtering, noting electron diffraction and micrograph patterns of films, crystal structure, etc 16 p2774 A66-30690

Device for controlling thickness of thin films prepared by sputtering in vacuum 16 p2708 A66-31362

Thin silicon film deposition on amorphous fused quartz substrates by cathodic sputtering in argon atmosphere, noting resistivity data 16 p2782 A66-31421

Sputtering of aluminum thin films prepared by bell-jar vacuum systems /getter sputtering and standard diode/ for electronic application 16 p2783 A66-31423

Molybdenum films prepared by sputtering onto oxidized silicon substrates, analyzing resistivity, lattice parameter, orientation and grain size as function of substrate temperature and bias 16 p2783 A66-31424

Sputtering yields of various semiconducting single crystals under argon ion bombardment 19 p3436 A66-35420

Temperature dependence of sputtering yields of germanium under low energy ion bombardment, observing atom ejection patterns above annealing temperatures 19 p3436 A66-35422

Neutron activation investigation of cesium ion sputtering of Al in rarefied oxygen atmosphere 22 p3950 A66-40082

Atom ejection patterns for sputtering of semiconductor single crystals 22 p3963 A66-40090

Sputtering voltage and current effects on resistivity of films sputtered from pure tantalum appear to be traceable to pressure and growth rate 24 p4251 A66-42297

SPUTTERING GAUGE

Effect of voltage and film thickness on sputtered tantalum film resistivity when used as microcircuits 09 p1411 A66-19941

 Block diagonalization theorem for linear
 ordinary differential equation systems and
 applications 21 p3755 A66-38597
 Stability derivatives of sharp cones
 performing pitching oscillations in viscous
 hypersonic flow 21 p3693 A66-38723
 Stability criteria for solid propellant
 burning for case of linear variation in
 propellant thermal conductivity, noting
 parameters and shift in instability
 modes 22 p3969 A66-40353

STABILITY TEST

SA FLIGHT STABILITY TEST
 SA WIND TUNNEL STABILITY TEST
 Slab motions affecting test mounts for
 gyroscopes and accelerometers investigated
 at underground and surface test
 locations 01 p0051 A66-10029
 Test pad stability measurement using two
 accelerometers and recording
 autocollimator 01 p0065 A66-10031
 Accelerometers and gyroscopes tested
 underground, discussing ground motion
 attenuation with depth investigated in Deep-
 Hole program 01 p0051 A66-10038
 Stability theorems concerning
 unconditionality of bases, considering Riesz
 theorem and Banach and Gilbert
 spaces 01 p0093 A66-10402
 Liapunov function determining sufficient
 conditions for stability of autonomous
 functional differential equations with finite
 time lag 02 p0249 A66-11900
 Stability of systems of n first-order real
 differential equations defined over finite
 time interval 03 p0389 A66-13262
 Relative stability of linear feedback
 systems noting Hurwitz, Nyquist and
 Mikhailov stability
 criteria 05 p0707 A66-14623
 Heavy confinement cap test characterizing
 exothermic decomposition of liquid and
 solid materials subjected to heat, pressure
 and mechanical shock, determining
 monopropellant energy releases
 [CI PAPER WSCI-65-35] 05 p0744 A66-15152
 Tuned transistor amplifiers, deriving
 stability conditions from port immittance
 expression 06 p0854 A66-16681
 Frequency domain stability criteria,
 discussing generation and validity of
 stability criteria 06 p0864 A66-16736
 Extension of Popov stability analysis to
 multilinear discrete or continuous
 systems 07 p1013 A66-17424
 Popov-related stability results for feedback
 systems proved via bounded solutions for
 functional equations 07 p1015 A66-17756
 Stability of bodies with holonomically
 constrained moving parts, using method of
 Liapunov to demonstrate dependence of

motion stability on potential function of
 generalized coordinates
 [AIAA PAPER 66-101] 07 p1082 A66-18457
 Liapunov stability criterion for panel
 flutter in supersonic flow derived from
 second method of
 Liapunov 08 p1310 A66-19160
 Stability analysis of multiple controls,
 matrix analysis, symmetry and general
 oscillation equation 08 p1246 A66-19832
 Operations in vector analysis applied to
 velocity field of image point in phase plane,
 establishing stability criterion for singular
 points 09 p1361 A66-20436
 Floquet form of solution to system of
 linear differential equations with periodic
 parameters 09 p1363 A66-20798
 Two-terminal current-controlled negative
 resistance devices examined, using
 equivalent circuit, noting stability criterion,
 frequency response, etc 10 p1513 A66-21860
 Unilateral estimates under conditions of
 asymptotic stability of solutions to
 differential equations with unbounded
 operators 10 p1552 A66-21985
 Stability definitions for generalized control
 systems 11 p1681 A66-23450
 Airfoil equilibrium stability under elastic
 force and uniform wind
 action 13 p2062 A66-25402
 Theory of differential equations with
 deviating argument, noting stability and
 periodic solutions 15 p2528 A66-29169
 Stability of synchronous one-frequency
 regime for system of nonlinear unidentical
 objects with one degree of freedom under
 action of mutual
 couplings 16 p2748 A66-31503
 Simultaneous differential equations of
 perturbed motion and variational
 determination of sufficient conditions for
 stability of systems with
 memory 16 p2738 A66-31586
 Formulation and proof of theorem and
 lemma defining conditions of absolute
 stability for specified new class of control
 systems 17 p2901 A66-32252
 Variation of mean square error of linear
 system with time, applying parameter
 perturbation process to random or
 deterministic input 17 p2901 A66-32289
 Sufficient conditions for statistical stability
 of motion in nonlinear
 systems 17 p2901 A66-32570
 Test pad stability measurement using two
 accelerometers and recording
 autocollimator 18 p3110 A66-33815
 Unilateral estimates under conditions of
 asymptotic stability of solutions to
 differential equations with unbounded
 operators 19 p3390 A66-36190
 Stability of liquid Newtonian jets ejected
 from circular capillary tubing into stagnant
 air, noting influencing factors such as nozzle
 turbulence, velocity profile development and
 ambient medium
 properties 20 p3545 A66-37509
 Stability of bodies with holonomically
 constrained moving parts, using method of
 Liapunov to demonstrate dependence of
 motion stability on potential function of
 generalized coordinates
 [AIAA PAPER 66-101] 21 p3827 A66-38695
 Simultaneous differential equations of
 perturbed motion and variational
 determination of sufficient conditions for
 stability of systems with
 memory 22 p3940 A66-40448
 Stability of periodic solution of nonlinear
 systems with coefficients dependent on
 amplitude and frequency 24 p4188 A66-42478
 Equations of motion of continuous single
 loop adaptive control system with scan
 modulated parameters, noting stability
 analysis method 24 p4188 A66-42479
 STABILIZATION
 SA GYRO-STABILIZED
 SA MISSILE STABILIZATION
 SA SIGNAL STABILIZATION
 SA SPIN STABILIZATION
 Optimum stabilization of tumbling satellite,
 using Hamilton-Jacobi
 method 04 p0585 A66-13676
 Satellite control and
 stabilization 05 p0770 A66-15192
 Gyroscopic stabilization of relative
 equilibrium of satellite 15 p2605 A66-28489
 Gravitational stabilization systems

achieving passive satellite orientation, using gravitational field 15 p2606 A66-29158

gradient 15 p2606 A66-29158

Optimum stabilization of axisymmetric satellite by system of n reactive jets 22 p3986 A66-40464

Horizon sensing problems for application in spacecraft stabilization techniques, including sensors using Earth brightness, conical scanners and interference caused by cloud, haze and other atmospheric phenomena 24 p4235 A66-42895

STABILIZED PLATFORM

Stability of 3-axis stabilizing platform as function of distribution of gyro units 04 p0518 A66-13568

Tests of airborne, gimbal and stabilized mounts of LaCoste-Romberg and Askani-Graf gravity meters conducted in 1962 04 p0524 A66-14452

Two-gyro platforms are less stable than single-gyro platforms 06 p0879 A66-16344

OAQ program designed to perform experiments from stabilized platforms 08 p1301 A66-18565

Two-gyro platforms are less stable than single-gyro platforms 11 p1704 A66-22341

Operation and structural components of inertial navigation system, noting accelerometers, gyroscopic platform stabilizers, error effect, etc 13 p2123 A66-25138

Optimum stability of body with fixed point, using stabilizing gyros 13 p2127 A66-25627

Gyro drifts in Cardan suspension with mobile base, determining angle of rotation 17 p2926 A66-32798

Ground tilt isolation platform construction and performance noting design features, performance characteristics and efficiency 21 p3722 A66-38872

Vibration measurement results on air supported isolation platforms, noting effects of heavy vehicle passing sound pressure 21 p3722 A66-38874

Stability analysis of inertial guidance platform control system with saturation and Coulomb friction nonlinearities, using Liapunov method 23 p4089 A66-41319

STABILIZER

SA CURRENT STABILIZER

SA FIN

Dynamic programming design of invariant multiloop feedback autostabilizers and matrix-Riccati equation 14 p2268 A66-28184

Stabilizers for nitrate esters compared on basis of reactivities toward nitrogen tetroxide 19 p3449 A66-36285

Optimal redistribution of lifting surface between wing and stabilizer-elevator unit ensuring minimum reduction of lift-drag ratio 23 p4011 A66-41796

Silicon integrated circuits in rocket telemetry transmitter phase-lock frequency stabilization unit 24 p4180 A66-42262

STABLE OSCILLATION

Relative stability of self-excited nonlinear oscillations subject to small amplitude perturbation 06 p0864 A66-16737

Admissible bounds of ambient temperature and supply voltage fluctuations from stable operation conditions of ferrite transistor elements 07 p1005 A66-17406

Superregenerator used in construction of trigger devices 08 p1199 A66-19768

Liapunov first method and applicability to asymptotic stability of stationary points of nonlinear differential systems 11 p1721 A66-22641

Sufficient conditions for boundedness of solutions of nonlinear differential equations and oscillatory and asymptotically stable solutions 12 p1904 A66-24193

Stability and existence of small periodic solutions of ordinary differential equations 15 p2526 A66-28735

Stable microwave oscillations in single crystal Ge alloy p-n junction diodes 15 p2567 A66-29402

Frequency stability and spectral purity of p-n junction laser output improved by synchronization with gas laser beam 15 p2518 A66-29717

Free vibrations and stability of rectangular orthotropic plates reinforced by network of ribs 18 p3252 A66-33705

Stable oscillations in vacuum tube

oscillators analyzed by approximate method 19 p3315 A66-35565

Sensitivity analysis for relative stability of self-excited oscillations and transient response of nonlinear control systems 19 p3328 A66-36019

Mach number and body geometry effects on stability characteristics of oscillation in supersonic regime of bodies of revolution 22 p3844 A66-40373

Stability and existence of small periodic solutions of ordinary differential equations 22 p3939 A66-40443

STACKING FAULT

Increase in extinction distance with temperature in silicon determined via high temperature electron microscopy 02 p0272 A66-11709

X-ray diffraction from cerium deformed at room temperature to form extrinsic stacking fault 02 p0272 A66-11710

Light reflection by planes perpendicular to c axis in zinc sulfide crystals containing stacking faults 04 p0567 A66-14337

Stacking faults and Burger vector dislocations in twin crystals of beryllium observed by electron microscopy 08 p1235 A66-18651

Stacking-fault defects in epitaxial silicon layers grown on chemically polished substrates 10 p1578 A66-21576

Annealing twins and twin-boundary intersections in niobium, noting invalidity of cause-and-effect relationship between twins and crack formation in bcc structures 11 p1717 A66-22998

Growth and structure of evaporated silicon layers, noting defects due to stacking disorders 12 p1928 A66-23938

Vapor growth of Ge on Ge, GaAs and Si substrates, noting preparation methods, characteristics, etc 16 p2786 A66-31686

Stacking faults in titanium carbide shown by electron microscopy bounded by partial dislocations 17 p2976 A66-32263

Structural defects in epitaxial films noting nucleation mechanism, stacking faults, growth defects, etc 17 p2985 A66-33157

Austenite-martensite interface dislocations in stainless steel shown as probable pinned Shockley partials 18 p3123 A66-33927

Propagation of stacking faults in fcc metals, noting effect of frictional force in cutting through attractive tree and subsequent dipole formation 18 p3258 A66-34631

Dispersion degree of coherent scattering regions, microdeformation and packing defects probability in fcc metals determined, using approximation method 19 p3438 A66-35496

Displacement vector at antiphase boundaries in rutile determined by contrast experiments in electron microscope 24 p4252 A66-42354

STACKING FAULT ENERGY

Creep and fracture of series of nickel-cobalt alloys due to variation in stacking fault energy, noting incidence of annealing twins 02 p0245 A66-11947

Diffusivity, elastic modulus and stacking fault energy effect on high temperature creep behavior of alpha brasses 11 p1717 A66-22996

STAGE

S SECOND STAGE

S SINGLE-STAGE ROCKET

S THIRD STAGE

STAGE SEPARATION

Europa I rocket stage-separation conditions simulated by Modane wind tunnel facilities 02 p0210 A66-11211

Multistage rocket acceleration by explosive separation of individual stages, solving optimization problems connected with problem 11 p1777 A66-22456

Helical compression springs used for stage separation of nonspinning spacecraft 14 p2391 A66-27868

Environment simulation for space vehicle explosive separation system testing, noting equipment, performance, etc 16 p2679 A66-30470

Explosive separation systems for spacecraft compared with spring mechanism 20 p3665 A66-38264

Single explosive train for simpler safer shroud separation from

spacecraft 20 p3665 A66-38

Electronic devices for ignition of fir mechanisms designed for carrier rocket stage separation 21 p3822 A66-39

STAGNATION FLOW

Pressure and temperature distributed measurements in test chamber of hypersonic blow-down wind tunnel located at University of Tokyo 01 p0053 A66-10

Pohlhausen method application to stagnation point flow, noting failure for c of stretch wall caused by exclusion of M boundary layer compatibility condition 03 p0356 A66-12

Axisymmetric stagnation point flow power law fluids for which rheological stress equation connecting stress and strain rate components includes consistency and fluid behavior of fluid 03 p0358 A66-13

Plasma wind tunnel at National Aerospace Laboratory in Japan 03 p0353 A66-13

Stagnation enthalpy plasma due to propagation of electromagnetic shock wave 03 p0406 A66-13

Shielding of surface from parallel thermal radiation beams by distributed injection fluid containing absorbing particles in boundary layer flow over surface near stagnation point [ASME PAPER 65-WA/HT-21] 05 p0789 A66-15

Displacement thickness of boundary layer with blowing for arbitrary shaped body, noting stagnation flow 05 p0666 A66-15

Asymptotic solutions for viscous flow in transparent radiating gas in stagnation region, using method of matched inner and outer expansions [AIAA PAPER 66-105] 06 p0871 A66-16

Two-dimensional stagnation point flow in elastico-viscous liquid 12 p1862 A66-23

Extension to MHD hypersonic stagnation flow theory of Bush, including viscous terms and solving boundary value problem from both ends at once 15 p2424 A66-29

Electrical power dependence of idealized sectioned Faraday MHD generator nonequilibrium plasma flow Mach number 16 p2637 A66-31

Temperature and pressure distribution in fluid flow through porous matrix, noting chemical reaction, heat transfer, boundary layer flow, etc [AIAA PAPER 66-423] 17 p2910 A66-327

Shielding of surface from parallel thermal radiation beams by distributed injection fluid containing absorbing particles in boundary layer flow over surface near stagnation point [ASME PAPER 65-WA/HT-21] 22 p3997 A66-400

Surface catalytic and Reynolds number effects on nonequilibrium hypersonic stagnation flow of air or diatomic gas on highly cooled blunt body 22 p3847 A66-409

Asymptotic solutions for viscous flow in transparent radiating gas in stagnation region, using method of matched inner and outer expansions [AIAA PAPER 66-105] 23 p4057 A66-418

Velocity discontinuity surface instability and fluid compressibility effect on stationary flows 23 p4059 A66-420

Diffusion thermo effect on temperature field in combined heat and mass transport processes, noting experiments with stagnation flow, turbulent boundary layers, etc 24 p4293 A66-422

STAGNATION POINT

Compressibility effect on velocity distribution and gradient at stagnation point in plane subsonic jet incident at arbitrary angle on infinite plate 01 p0007 A66-104

Laminar boundary-layer heat transfer at shear stress predictions from similarity solutions, emphasizing large free-stream velocity gradients and highly cooled wall [ASME PAPER 65-HT-62] 05 p0786 A66-147

Stagnation point heat transfer for binary air diffusion model including dissociation and ionization 05 p0665 A66-157

MHD stagnation-point flow, discussing incompressible viscous conducting fluid boundary layer behavior 06 p0916 A66-163

Heat transfer rate to stagnation point catalytic surface placed in slow flow dissociated oxygen from glow discharge tube and atom-molecule diffusion

- acient 06 p0822 A66-16632
 at transfer between body and gas flow
 stagnation point 07 p1019 A66-17396

 wind 23 p4123 A66-41508
 Approximation of self-similar plane and
 axisymmetric problems for high temperature
 laminar boundary layer, based on equations
 for boundary layer of finite thickness for
 high temperature gas 23 p4149 A66-41783
 Inviscid flow near stagnation point of blunt
 body in hypersonic stream, using thin shock
 layer theory with very small density
 ratio 23 p4013 A66-42013
 Onboard miniaturized telemetry system for
 stagnation point temperature measurements
 on free-flight models in ballistic
 ranges 24 p4209 A66-42189
 Counterflow diffusion flame in forward
 stagnation region of porous cylinder with
 uniformly ejecting fuel gas in analysis by
 flame sheet model and boundary layer
 approximation 24 p4294 A66-42542
 Arc image stagnation-flow reactor for
 measuring gas-solid reaction rates between
 2000 and 3000 degrees K 24 p4216 A66-43214
STAGNATION PRESSURE
 Flow coefficient through nozzle with
 circular cross section and elliptical
 cylindrical profile supplied from container
 with static pressure equal to stagnation
 pressure 03 p0314 A66-12695
 Stagnation pressure measurement in high
 temperature high-current plasmas, using
 small uncooled Pitot tube
 [AIAA PAPER 66-179] 10 p1561 A66-21429
 Supersonic molecular beam apparatus,
 noting maximum intensity for variation of
 inlet stagnation pressure and nozzle-skimmer
 distance 16 p2746 A66-30385
 Interaction of first and second shocks of
 blast-bow wave in double-driver shock tube,
 examining stagnation point pressure
 prediction methods
 [AIAA PAPER 66-409] 17 p2840 A66-32748
 Carbon dioxide supersaturation and
 condensation in supersonic nozzles in terms
 of stagnation pressures, temperatures, and
 expansion rates 17 p3039 A66-33476
 Atmospheric density measurements for
 altitudes up to 74 km from X-15 flights
 using stagnation pressure method
 [AIAA PAPER 66-441] 18 p3104 A66-33646
 Heat transfer caused by combustion of
 triethylaluminum on flat plate in Mach 3
 flow, noting significance of lag at stagnation
 pressure 18 p3260 A66-33817
 Stagnation pressure measurement in high
 temperature high current plasmas, using
 small uncooled Pitot tube
 [AIAA PAPER 66-179] 22 p3956 A66-40372
 High Mach and Reynolds number
 hypersonic facility, noting available
 stagnation pressure, running time and air
 storage system
 [AIAA PAPER 66-758] 22 p3894 A66-40640
 Stagnation pressure, temperature and static
 pressure measurement in shock driven
 facilities, using equipment with piezoelectric
 crystal and fast response
 thermocouple 24 p4207 A66-42175
STAGNATION REGION
 Correction factors derived for avoiding
 formation of stagnation cores near hub of
 axial compressors 01 p0008 A66-11094
 Thermal energy transfer in base portion of
 stagnant region obtained from plane and
 axisymmetric flow
 equations 04 p0454 A66-13570
 Stagnation layer of rigid plate resulting
 from cool energetic plasma stream
 interaction 10 p1567 A66-21820
 Langmuir probe to measure stagnation
 region shock layer ionization distribution
 under nonequilibrium hypersonic flow
 conditions
 [AIAA PAPER 66-187] 13 p2138 A66-25168
 Foreign planetary atmospheric effect on
 hypersonic laminar stagnation region heat
 transfer and skin friction studied for
 various dissociating gases 13 p1993 A66-26729
 Stagnation region of solid body of
 revolution in low density hypersonic flow
 with low Reynolds
 number 16 p2629 A66-31033
 Stagnation region for body of revolution in
 analyzing temperature, velocity and atom
 hypersonic flow with low Reynolds number,
 concentration under aerodynamic
 heating 16 p2686 A66-31037
 Diffusion flame for stagnation mixing layer
 created by jet fuel injected into oxidant
 stream at stagnation region of blunt
 body 17 p3033 A66-32447
 Stability of liquid Newtonian jets ejected
 from circular capillary tubing into stagnant
 air, noting influencing factors such as nozzle
 turbulence, velocity profile development and
 ambient medium
 properties 20 p3545 A66-37509
 Jet impact on plane surface at oblique
 angle, noting transformation from jet to thin
 sheet and role of stagnation
 pressure 20 p3546 A66-37805
 Inviscid flow model for stagnation region
 behind strong shock, examining inviscid
 energy for radiating gas including self-
 absorption effects 23 p4150 A66-41906
 Separation point of laminar boundary layer
 before dihedral, determining conservation
 of momentum and mass 23 p4013 A66-42010
 Velocity gradient on blunt axisymmetric
 bodies in stagnation region if pressure
 distribution is known, using isentropic flow
 equations 24 p4158 A66-42798
STAGNATION TEMPERATURE
 Rarefied hypersonic flow at high Mach
 numbers and stagnation temperatures
 encountered by ballistic missiles and
 satellites, noting air plasma with magnetic
 field
 [AIAA PAPER 65-754] 03 p0354 A66-12588
 Stagnation temperature measurement in
 laminar wakes behind wedge and cone in
 hypersonic shock tunnel, noting effect of
 Reynolds number variation
 [AIAA PAPER 65-53] 03 p0315 A66-12790
 Stagnation temperature control of high-
 pressure supersonic wind tunnel, using
 regenerative heat exchangers with porous
 packing 09 p1471 A66-20802
 Velocity, momentum and stagnation heating
 measurements at exit of free jet plasma
 accelerator 11 p1684 A66-22833
 Heating rates in gas mixtures of planetary
 atmospheres predicted by equation using
 transport properties of gases at lower
 temperatures 14 p2411 A66-27432
 Hypersonic wind tunnel, noting hot gas
 generation by piston drive in gun barrel,
 stagnation temperatures and other operating
 parameters 17 p2904 A66-32895
 Limitation of maximum stagnation
 temperature in gun tunnel due to inefficient
 heating during piston acceleration phase and
 heat losses to barrel walls
 [ICAS PAPER 66-23] 22 p3896 A66-40669
STAINING
 Stain film of chemical species formed by
 gas phase reaction on
 silicon 05 p0736 A66-14978
 Staining properties of trivalent lanthanum
 cation on cell membranes 06 p0812 A66-16565
STAINLESS STEEL
 Stress-aging, differences from strain-aging
 and effect on tensile properties of various
 stainless steels 01 p0085 A66-10409
 Precipitation in 17-7 PH stainless steels
 analyzed, measuring saturation
 magnetization, Youngs modulus and hardness
 as functions of aging time for material in

condition T 01 p0086 A66-10412
Corrosion rate of BT-1 titanium and 9Kh18N12M2T stainless steel in manganese-ammonium sulfate solutions 01 p0089 A66-10990
Tensile testing study of hardening mechanisms when niobium carbide precipitation occurs during deformation of 18Cr/12Ni/Nb austenitic stainless steel at 650 degrees C 02 p0246 A66-12195
Heat conductivity measurement of solids at 200 to 1000 degrees C from radial thermal flux, specifically Armco iron and stainless steel 03 p0443 A66-12513
Techniques of joining aluminum to stainless steel for space vehicle application [SAE PAPER 650754] 05 p0701 A66-15002
Accelerated cooling of ferritic-martensitic steel and ferritic steel after sintering, combined with additional heat treatment, increases strength and corrosion resistance 06 p0896 A66-16690
Long high-porosity sintered tubes produced from nonspherical stainless-steel powders 06 p0896 A66-16691
Porous cermets of iron, bronze and stainless steel efficiently arrest flame of burning gas mixtures 06 p0897 A66-16694
Relationships between purity, structure and mechanical properties of 18/8 stainless steels prepared in laboratory by fusion and casting under vacuum 07 p1048 A66-17454
Temperature change effect on cumulative fatigue damage on 24S-T3 aluminum alloy and type 301 stainless steel 08 p1242 A66-19720
Alloying elements effect on anodic corrosion and passivation of stainless steels 09 p1390 A66-20837
Martensite transformation in stainless steel after reversion with quenching 11 p1719 A66-23400
Time-temperature total hemispherical emittance study of gold-plated 304 stainless steel in temperature range of 1000-1800 degrees F 12 p1895 A66-24376
Hydrogen ion intrusion into stainless steel surface measured with apparatus in which hydrogen and helium condensation pumps provide ultrahigh vacuum 13 p2108 A66-25754
Number of viable aerobes and anaerobes accumulating on stainless steel surface in clean room during one year under various conditions, for spacecraft sterilization purposes 13 p2015 A66-25797
ASTM-ASME Joint Committee report on high temperature properties of stainless steels such as stress-temperature, yield and rupture curves, etc 14 p2313 A66-27229
Notched and unnotched bending fatigue strength of machined work hardened AISI type 305 stainless steel affected by cold worked surface layer with high compressive residual stresses 15 p2521 A66-29073
Effect of temperature, pressure and initial wall treatment on thermal resistance at stainless steel-liquid metal interface 17 p3036 A66-32845
Compactibility of iron, stainless steel and titanium powder of various dispersity and bulk density 17 p2940 A66-32847
Stress level for crack initiation and propagation and delayed failures in stainless steel used for bolts 17 p2941 A66-33442
Surface finishing effect on stress corrosion resistance of austenitic stainless steels 17 p2942 A66-33445
Vaporization and creep rupture behavior of type 316 stainless steel 18 p3123 A66-33755
Austenite-martensite interface dislocations in stainless steel shown as probable pinned Shockley partials 18 p3123 A66-33927
Accelerated cavitation damage in liquid sodium and mercury of stainless steels and superalloys under consideration for use in liquid metal power conversion systems 19 p3380 A66-35804
Tensile, creep and stress-strain behavior of high nitrogen content stainless steel quenched alloy at cryogenic temperatures 20 p3583 A66-37093
Stainless steel and aluminum alloy fracture behavior under static load and low temperatures, noting crack propagation, stress and crack-length relation, etc 21 p3830 A66-39195
High temperature embrittlement of stainless steel irradiated in fast fluxes of

Dounreay fast reactor at coolant temperatures of 250-350 degrees C 22 p3934 A66-40006
Pitting of stainless steel, coated and uncoated, occurring when exposed to nitrogen tetroxide during propulsion system testing in space simulation chamber 22 p3890 A66-40221
Nuclear magnetic resonance techniques applied to nitrogen tetroxide for determining proton content, noting gas chromatograph with two stainless steel columns packed with porous glass 23 p4032 A66-41240
Fatigue behavior of aluminum reinforced with stainless steel wires, considering effects of fiber volume fraction and interfacial bond 23 p4081 A66-41661
Time dependent stress distribution in elastoplastic cyclic deformation, emphasizing cycle hardened stainless steels 23 p4144 A66-41971
Structural steel design specifications, discussing anisotropy, stress-strain in tension and compression, cold working effects, etc 24 p4289 A66-42285
STALL
S ROTATING STALL
S WING STALL
STALLING
Stall indicator modification, describing design in combination with speed indicator LUN-1106 06 p0883 A66-16971
Deep-stall characteristics of T-tailed aircraft configurations and recovery procedures, noting parameters of pitch-up, angle of attack, etc [AIAA PAPER 66-13] 07 p0989 A66-18446
Stick pushers in new medium range jet transports, noting aerodynamics of aircraft stall 11 p1637 A66-23072
Low speed handling with special reference to super stall, emphasizing rate of change of angle of attack and flight trials of BAC 111 and VC10 aircraft 19 p3280 A66-36748
STAND
S TEST STAND
STANDARD
S FREQUENCY STANDARD
STANDARD ATMOSPHERE
Earth atmosphere layers described according to thermal structure 09 p1371 A66-20269
Model atmosphere structural parameters and improvement proposals for 1964 COSPAR International Reference Atmosphere 09 p1375 A66-20989
Atmospheric properties important to aviation and aerospace medicine including composition, weather conditions, radiation, temperature effect at various heights, etc 10 p1553 A66-22105
U.S. Standard Atmosphere supplements, 1966 [AIAA PAPER 66-342] 12 p1906 A66-24484
Satellite and rocket measurement of upper atmosphere characteristics, deriving standard atmosphere CIRA 1965 21 p3735 A66-39615
STANDARD DEVIATION
Observed and predicted standard deviations compared for cross-wind deposits 04 p0541 A66-13670
Mean wind vector shear and shear interval and standard deviation, examining correlation 11 p1730 A66-23097
Best straight line calculated by least squares method 16 p2736 A66-31007
STANDARDIZATION
SA CALIBRATION
International coordination and standardization of HF quantity measurements, considering economic, psychologic and accuracy benefits 07 p1002 A66-18224
Standards, quality and reliability of Soviet production 12 p1884 A66-23741
Standardization of machining criteria for aerospace materials, compiling data about tool design, planning, manufacturing, costs, etc, on simple form [ASTME PREPRINT MM66-714] 12 p1887 A66-24418
STANDING WAVE
Standing wave read-only memory based on Lippmann color photography for information storage 05 p0636 A66-14819
Resonant excitation by external forces,

propagation and reflection of ion acoustically standing waves between electrodes mercury vapor discharge 10 p1568 A66-2
Standing waves in laser resonators verified by placing thin metallic films between external mirrors of pulsed neodymium laser 11 p1713 A66-2
Existence of collisionless MHD bow shock wave attached to magnetosphere 11 p1699 A66-2
Alfvén wave generation in spherical system, determining velocity of MHD wave in longitudinal magnetic field by creating standing wave resonance 12 p1924 A66-2
Intensity modulation of light using acoustically standing waves in megacycle range requiring no high voltages 13 p2091 A66-2
Measurement of three-terminal immittance at VHF and UHF frequencies 13 p2026 A66-2
Scattering of electron beam by standing waves of photons inside laser cavity corresponds to stimulated Compton effect 13 p2096 A66-2
Spatial variations in electron temperature produced in steady state plasma electromagnetic standing wave 13 p2155 A66-2
Energy spacing of geometrical resonant structure in very thick indium films, no interference between electron-like states which propagate with different velocities 16 p2769 A66-3
Semiclassical theory of quantum generators, examining laser system response to effect of monochromatic standing wave based on kinetic equation for density matrix 16 p2718 A66-3
Standing ion acoustic waves in mercury vapor discharges 17 p2973 A66-3
Nonaxisymmetric mode of standing wave excited in RF discharge by small around tube 19 p3404 A66-3
Microwave interference measurement of shock velocity in shock tube, noting standing wave pattern 21 p3736 A66-3
Standing ion acoustic waves between cathode and electrically floating auxiliary metal electrode, noting discharges mercury vapor between plane oxide-coated cathode and nickel anode 22 p3954 A66-3
STANDING WAVE RATIO
Microwave coaxial termination as temperature noise-reference source, noting variation of VSWR with voltage frequency 18 p3077 A66-3
Power level of varactor diodes, noting problems of standing wave ratio measurement and application of reciprocity and mixing principle 24 p4185 A66-4
STAR
SA A STAR
SA B STAR
SA BINARY STAR
SA CASSIOPEIA A
SA CEPHEID
SA GALAXY
SA GIANT STAR
SA MAIN SEQUENCE STAR
SA NEUTRON STAR
SA OMICRON CETI STAR
SA QUASI-STELLAR RADIO SOURCE /QSO/
SA RADIO STAR SIGNAL
SA STELLAR MASS
SA TAU STAR
SA VARIABLE STAR
SA WHITE DWARF STAR
Computer calculation of apparent positions of stars and Sun by reduction of stellar coordinates 10 p1604 A66-2
Energy distribution of secondary particles emitted in proton stars for TeV energy range proton interactions 15 p2583 A66-2
Astronaut observation in Gemini
Mercury space flights that stars cannot be seen in daytime, noting first-magnitude stars and background illumination 22 p3982 A66-4
STAR CLUSTER
Gas clouds in dense star clusters compared with quasar properties, analyzing possible energy sources like supernova explosions stellar collisions and star gas interaction 01 p0137 A66-10
STAR FIELD
Accurate and permanent data obtained

- north referencing, using
 topography 01 p0065 A66-10030
 infiltration hypothesis giving physical
 characteristics of quasars, determining
 energy output by star
 action 01 p0138 A66-11034
 satellite guidance system using star-field
 sensing sensor with gyration masses
 controlled by centrifugal and gravitational
 force interaction 02 p0256 A66-11984
 star pattern recognition system for
 spacecraft attitude control
 AA PAPER 64-652] 03 p0390 A66-12755
 aided visual detection of target satellite
 rendezvous purposes, discussing
 density and angular velocity in star
 field 08 p1176 A66-18815
 relationship between stellar coordinates
 and measured plate coordinates in satellite
 plotting diagrams 11 p1771 A66-22653
 information content of photoelectric star
 images determined by background radiation,
 local aberrations and photon noise,
 solving equations for rms
 error 16 p2654 A66-31441
- STAR FISH PROJECT**
- time and altitude dependence of 55-mev
 stopped protons in South Atlantic region
 detected by nuclear emulsions onboard
 satellites 05 p0747 A66-14784
 Cosmos V satellite measurement of July 9,
 1962 high altitude nuclear detonation used
 to determine fission debris over Johnston
 Island 08 p1219 A66-19414
 unscanned large area uniform electron
 images for space /Starfish/ radiation
 environmental studies, using magnetic
 drupole pair and beam
 limitation 16 p2676 A66-30443
 worldwide geomagnetic disturbances
 generated by Starfish high altitude nuclear
 detonation, July 9, 1962 17 p2918 A66-32527
 Star Fish radiation belt discrepancy
 between theoretical and experimental values
 may be due to explosion in belt of naturally
 stopped protons 18 p3170 A66-34530
 bomb debris motion following Star Fish
 test, noting formation of MHD shock wave,
 production of stationary plasma through X-
 ray ionization and collision in neutral
 atmosphere 20 p3644 A66-38345
- STAR TRACKER**
- automatic star trackers for long range
 aircraft navigation, discussing
 instrumentation methods and use of pulse
 modulation for sensor
 design 02 p0257 A66-12029
 Mariner IV maneuver and attitude control
 using Sun and star Canopus for reference
 time 06 p0959 A66-16317
 JN/AVN 1 Astro Navigation Set, remote
 controlled automatic photoelectric
 constant 07 p1073 A66-17766
 automatic Astro Tracker as part of long-
 range aircraft navigation complex heading
 reference system 07 p1075 A66-17786
 high resolution solid state precision star
 tracking system using magnetoresistance
 multiplier and image dissector
 phototube 08 p1250 A66-19349
 foresighted star tracker using image
 dissector tube as photodetector and
 incorporating continuous strip electron
 multiplier 08 p1252 A66-19499
 scanning celestial attitude determination
 system /SCADS/ for three-axis satellite
 attitude information for Earth and spin
 stabilized satellites and
 globes 08 p1252 A66-19500
 light source having absolute spectral
 energy distribution for
 tracker calibration 08 p1252 A66-19501
 Vidicon applicability as radiation sensor in
 star tracking systems 13 p2024 A66-25981
 foresighted scanning star tracker for
 precise attitude sensing and control of
 landing rocket 14 p2329 A66-28452
 AT detection by photometric star
 tracking system from moving
 spacecraft 15 p2500 A66-28931
 two-star implementation by stellar inertial
 guidance system 18 p3133 A66-34047
 integrated navigation system /INS/ using
 stellar inertial subsystem with optimum data
 processing 21 p3767 A66-38891
- STAR TRACKING**
- recognition procedure identifying given
 star constellation despite erroneous
 scanning, for application in celestial
 navigation 01 p0102 A66-10619
 Azimuth and latitude determination
 without time recording based on observation
 of stars at same horizontal
 elevation 02 p0255 A66-11694
 Azimuth and latitude determination
 without time recording based on observation
 of stars at same horizontal
 elevation 02 p0255 A66-11702
 Astronomical Guidance System for Air
 Navigation which detects altitude and
 azimuth errors resulting from precomputed
 and preadjusted
 deviations 02 p0259 A66-12052
 Two automatic astronomical navigation and
 tracking systems compared for accuracy and
 performance in civil
 aircraft 07 p1070 A66-17722
 Automatic star trackers for long range
 navigation, discussing associated
 instrumentation methods 07 p1078 A66-17808
 Planckian black body approximation used
 to simulate and assign star magnitudes for
 nonhuman photodetector, considering
 relationship between star brightness and
 stellar spectra 07 p1003 A66-18332
 Electro-optical celestial guidance system
 with miniaturized computer and scanning
 sensor 12 p1909 A66-24104
 Optical techniques for satellite tracking
 and star identification, describing ASTRO II
 theodolite with photoelectric data
 recording 12 p1883 A66-24933
 Recognition procedure identifying given
 star constellation despite erroneous
 scanning, for application in celestial
 navigation 13 p2123 A66-25179
 Automatic star trackers for long-range
 navigation, discussing associated
 instrumentation methods 13 p2125 A66-25867
 Star tracking tests to achieve accurate
 stellar sensor positioning prior to missile
 launching, considering calibration of critical
 hardware 18 p3132 A66-34045
 Large aperture millimeter wave antenna
 for high resolution tracking measurements
 and real-time data
 reduction 18 p3084 A66-34303
 Photogrammetric network for large-area
 phototriangulation using star-tracking
 airborne cameras, discussing theoretical and
 technical aspects 20 p3551 A66-37472
 Telescope field of view requirements for
 human recognition of navigation
 stars 22 p3946 A66-40860
- STARFIGHTER AIRCRAFT**
- S F-104 AIRCRAFT**
- STARKE EFFECT**
- Stark broadening of Balmer lines in
 hydrogen plasma produced by alternating
 axial magnetic field induced by coil
 surrounding discharge
 tube 03 p0400 A66-12934
 Temperature of hydrogen plasma jet at
 atmospheric pressure by measuring electric
 field on profile of Stark broadened
 line 03 p0403 A66-12973
 Level-crossing spectroscopy with electric
 field, Stark shift of 3P term of lithium
 subject to electric and magnetic
 field 03 p0395 A66-13133
 Stark profiles of singly ionized nitrogen
 lines from T-tube plasma, measuring shifts
 and half-widths of N-ion lines, plasma
 temperature and electron
 densities 03 p0405 A66-13137
 Line broadening from Stark effect and
 Doppler effect for plasma
 diagnostics 04 p0553 A66-14193
 Electron density measurements in transient
 plasma using resolution repeater rapid-scan
 spectrograph 05 p0677 A66-14914
 Electron density and pressure in solar
 atmosphere from growth curve with Stark
 effect of Fraunhofer
 lines 05 p0765 A66-15420
 Lower bounds to energy eigenvalues for
 rigid rotator in electric field /Stark
 effect/ 06 p0911 A66-16168
 Neutron and proton bombardment effects
 on excimer spectrum of cuprous
 oxide 06 p0937 A66-17139
 Product of oscillator strength, Stark width
 and ground state density measured in T
 tube plasmas, using neutral helium
 resonance line 11 p1747 A66-23391
 Broadening of Fraunhofer hydrogen lines
- in solar spectrum, noting Stark
 effect 14 p2380 A66-27274
 Stark broadening effect on solar
 atmospheric abundance determinations, with
 results for sodium
 abundance 14 p2383 A66-27709
 Quadratic Stark effect constants in
 oxygen 14 p2338 A66-28345
 Interband optical absorption in germanium
 in crossed electric and magnetic fields,
 noting band perturbation theory, differential
 spectra, Stark broadening, experimental
 techniques, etc 16 p2776 A66-30736
 Collisional Stark broadening in RF
 discharges, noting large ion and electron
 broadening contribution 17 p2960 A66-31921
 Spectroscopic measurements of cold plasma
 charged particle concentrations, specifically
 spectral broadening due to Stark effect,
 forbidden-line intensities affected by
 internal electric fields and autoionization
 line intensities 18 p3143 A66-34032
 Stark broadening of singly ionized argon
 lines in helium-argon plasma behind
 reflected shock wave in electromagnetic T
 tube with backstrap 18 p3138 A66-34233
 Stark components of excited states of
 trivalent neodymium ion in yttrium
 aluminum garnet and yttrium gallium garnet
 host lattices 18 p3157 A66-34513
 Energy level and crystal-field splitting of
 neodymium ion in yttrium
 oxide 18 p3157 A66-34514
 Atomic-beam technique for studying Stark
 effect in optical D-line transition in cesium
 and rubidium 19 p3402 A66-35993
 Hydrogen line profile in Paschen series of
 solar spectrum, taking into account Stark
 effect and line
 broadening 20 p3648 A66-37045
 Electron paramagnetic resonance and
 optical spectra of trivalent erbium in type
 II crystals of calcium fluoride disclose
 existence of cubic, tetragonal and trigonal
 sites 22 p3961 A66-39916
 Multiple-pass laser interferometer used to
 confirm electron density inferred from
 Stark broadening of hydrogen beta
 line 23 p4101 A66-41260
 Stark splitting effect on fine structure
 level probabilities for hydrogen lines, taking
 account of spontaneous transition
 probabilities and Lamb
 shift 23 p4098 A66-41362
- STARLIFTER AIRCRAFT**
- S C-141 AIRCRAFT**
- STARTER**
- S ENGINE STARTER**
- S IGNITION SYSTEM**
- STARTING**
- Installation of small turbojet engines on
 sailplanes for towing elimination in starting
 procedure 07 p1110 A66-18056
 Unsteady flow during starting process in
 hypersonic nozzle, discussing initial pressure
 effect and behavior of secondary shock
 wave 15 p2425 A66-29684
- STARVATION**
- Short-term starvation effect on gastric
 mucosa of weanling vs post-weaned
 rats 16 p2638 A66-30636
- STATE**
- S ELECTRON STATE**
S EXCITED STATE
S GROUND STATE
S SOLID STATE
S STEADY STATE
S TRIPLET STATE
- STATE EQUATION**
- SA HUGONOT EQUATION OF STATE**
 Heat conductivity of metals and application
 of van der Waal equation of
 state 03 p0381 A66-12515
 Axisymmetric stagnation point flow for
 power law fluids for which rheological state
 equation connecting stress and strain rate
 components includes consistency and flow
 behavior of fluid 03 p0358 A66-13091
 State equation for carbon dioxide
 describing gaseous and liquid phases and
 left and right boundary curves at
 temperatures and
 pressures 04 p0572 A66-13660
 Book on state variables for control theory
 noting transfer functions, time domain,
 nonlinear system stability using Liapunov
 method, optimization, etc 04 p0504 A66-13836
 Second and third virial coefficient for

exponential repulsive potential by accurate numerical integration and by asymptotic formula 07 p1083 A66-17934

Equation of state of matter at supernuclear density 08 p1258 A66-18783

State variable selection for equilibrium equations of nonlinear RLC network from potential function analysis 09 p1360 A66-19913

Thermodynamic property calculations from equations of state and ideal gas properties, using entropy as illustrative example 10 p1619 A66-21077

Equation of state and derived shock initiation criticality conditions for nitromethane and liquid TNT 12 p1934 A66-24588

Strong plane shock produced in Al by hypervelocity impact and late stage equivalence examined, using analytical and graphical solution of method of characteristics and realistic state equation 13 p2194 A66-25061

State equation for rubber elasticity taking into account effect of intermolecular obstruction on configurational entropy 13 p2116 A66-26445

Equation of state in closed form obtained for gas composed of molecules with Lennard-Jones potential, noting compressibility factor and radial distribution function 13 p2018 A66-26446

State equation and equilibrium correlations for hydrogen type plasma 13 p2157 A66-26756

State equation analysis from tensile or compression test data and influence of strain, strain rate and temperature on strain-hardening curve for metals such as Al, Cu, Pb, etc 14 p2397 A66-27393

Extrapolation of experimental thermal data to high pressure region, examining Tait and Biron state equations 14 p2415 A66-28326

State variable selection for nonlinear network differential equations, uniqueness and existence theorems 15 p2471 A66-29324

Theory of unsteady one-dimensional motion of ideal incompressible fluid, discussing equation of state 16 p2688 A66-31300

Digital computer method for formulating state space equations for active RLC networks 17 p2900 A66-32055

Physicochemical quantitative analysis of cometary nucleus-coma buildup relationship, discussing gas liberation, entropy and enthalpy variation, change of state and gross energy balance 17 p3010 A66-33374

Isotherms and isobars for polymer liquids using corresponding states principle to establish function describing dependence of internal pressure on volume or temperature 18 p3124 A66-33692

Fluid dynamics equations of state, motion, continuity and energy stress-strain relationship and shearing stress deformations 18 p3098 A66-34120

State diagram structure of Ti-Cu system examined, using metallographic, thermographic, X-ray and microhardness analyses 20 p3584 A66-37419

Third moment equation derived from Boltzmann-Vlasov equation for wave propagation in plasmas with very strong magnetic field used instead of state equation 20 p3521 A66-38363

Neutron star structure analysis using composite state equation 22 p3976 A66-39804

Thermodynamic similarity of nitrogen, oxygen and air by comparing critical parameter pressure, volume and temperature in dimensionless form 22 p4000 A66-40821

Monograph on kinetic theory of plasmas, deriving state equation, Maxwell equation for plasma-magnetic field interaction and boundary layer heat transfer expressions 23 p4102 A66-41400

Shock wave transport effects on hypersonic leading edge flow past sharp plate, discussing Rankine-Hugoniot relations 23 p4058 A66-41910

Thermodynamics of real air expansion using state equation applied to large temperature range, including contribution of vibrational energy 24 p4293 A66-42155

Adiabatic equation of state for homogeneous compressible anisotropic plasma wave equation invalid for inhomogeneous case 24 p4243 A66-42639

STATE VECTOR

Optimally controlling stochastic systems for measuring and observing state vectors, noting Markov properties 04 p0506 A66-14200

Composite state vector method for linear time-varying system 05 p0655 A66-14619

Optimal cooperative state rendezvous and Pontryagin maximum principle for two independently controlled systems having common goal 11 p1765 A66-22223

Forced sliding regimes in automatic control systems 11 p1675 A66-22640

Modified phase-plane delta method for nonlinear system phase portrait 11 p1679 A66-23270

Parameter estimation utilizing state vector model, regression methods, asymptotic methods, etc 11 p1680 A66-23278

Lorentz-invariant Markov process in relativistic phase space 12 p1914 A66-24406

State-space analysis of discretely controlled systems with finite delays 14 p2266 A66-27589

State vector determination for digital optimal control of system characterized by matrix equation 19 p3339 A66-36746

STATIC AERODYNAMIC CHARACTERISTICS

Transient behavior of heated stellar atmosphere, examining unsteady flow caused by sudden application of heat to static adiabatic atmosphere 08 p1286 A66-18541

STATIC ALTERNATOR

Design of brushless alternator systems with output converted by static devices to standard AC frequencies and/or DC power 20 p3498 A66-37167

STATIC DEFORMATION

Static deformation of model of three-constant isotropic elastic material exhibiting phenomenon of couple stresses [ASME PAPER 65-WA/APM-3] 05 p0776 A66-15427

Variation of mean applied pressure with deformation size when prismatic body slowly indents semiinfinite block 08 p1311 A66-19294

Text on deformable solid statics including indeterminate systems, strain, stress, elasticity, continuum energy, plasticity and mathematical appendix 09 p1467 A66-20500

Static deformation of model of three-constant isotropic elastic material exhibiting phenomenon of couple stresses [ASME PAPER 65-WA/APM-3] 10 p1615 A66-21480

Test rig for gas-lubricated journal bearings measuring frictional torque, gas film pressure distribution, static and dynamic eccentricity changes, etc 12 p1859 A66-24929

STATIC ELECTRICITY

SA ATMOSPHERIC ELECTRICITY

SA ELECTROSTATICS

SA LIGHTNING

Automatic radio atmospherics recorder for simultaneous observation of waveform and energy spectrum 23 p4069 A66-41663

STATIC FIRING

Static firing tests of HT-110 engines with high slenderness ratio using slow burning polyurethane propellant 23 p4121 A66-41428

Measurement and analysis of oscillatory combustion during static firing tests of HT-110 engines by means of pressure indicators and recorded signal playback system 23 p4121 A66-41429

Static firing tests on special small rockets /SSR/ with different igniter cases and combustion instabilities 23 p4119 A66-41436

STATIC FRICTION

Effects of stiction and Coulomb friction on steady state response of servosystem studied, using simple friction characteristic 02 p0180 A66-11308

Idle time effect on static friction studied under boundary lubrication conditions, using compression tester and press-fit test specimens [ASLE PAPER 66AM 1C1] 16 p2710 A66-30403

STATIC INVERTER

Push-pull saturated square-hysteresis-loop tunnel diode inverter for achieving high efficiency and power output with good power-to-weight ratio 02 p0195 A66-11361

Thyristors for forced-commutated static converter, noting turn-on and turn-off behavior 13 p2029 A66-25115

Diodes, transistors, rectifiers and inverters

application to control and instrumentation systems, providing phase changing, frequency stabilization, source voltage, etc 14 p2249 A66-27111

Central static inverter used to establish 1250-v, 115/200-v, three-phase 400-cps AC power distribution for Apollo Spacecraft Command and Service Module 20 p3498 A66-37172

Fuel cell power conversion by AC line type static inverter 20 p3498 A66-37172

STATIC LOADING

High strength structural bolts under static loadings of tension and shear 02 p0301 A66-12221

Metal powder behavior during dynamic an static pressing by energy release of high explosives 07 p1038 A66-18168

Prestressing of skin effect on strength and durability of riveted weld tested under static, repeated static and vibrational loads 11 p1782 A66-22855

Rest period effect on fatigue testing of polyester fiberglass and polymethylmethacrylate plastics under static and intermittent tensile loads 12 p1899 A66-24032

Natural oscillation frequency of smooth cylindrical shells representing combustion chambers, diffusors, etc, analyzing effect of static loads 12 p1964 A66-24044

Static-equivalent load approach to designing structures for vibration environment 14 p2406 A66-28000

Starting friction and kinetic friction of PTFE fabric-lined spherical bearings and deflection and permanent set under static loading 17 p2929 A66-31932

Plastic expansion in metals due to alternating torsional and static tensile loading 17 p3029 A66-32800

Space-frame radome design and buckling analysis for wind and deadweight static loads using digital computers 18 p3095 A66-34299

Vibrational creep phenomenon occurring when small dynamic loads are superposed on static loads in thin wall steel tube 21 p3830 A66-38982

Structural diagram for loading of potential element transistors operating in complex logic circuit 23 p4041 A66-41392

STATIC PRESSURE

SA HYDROSTATIC PRESSURE

Self-excited rotor whirl resulting from static pressure and rotor eccentricity, noting remedies [ASME PAPER 64-WA/GTP-4] 02 p0279 A66-11762

Flow coefficient through nozzle with circular cross section and elliptical cylindrical profile supplied from container with static pressure equal to stagnation pressure 03 p0314 A66-12695

Influence of inlet flow profile characteristics on diffuser static pressure efficiency, achieving pressure increase if flow has high decay rate 06 p0801 A66-16002

Hypersonic rarefied gas flow in short ducts, measuring wall static pressure and stream total pressure distributions 11 p1634 A66-22932

Effect of external or internal static pressure on natural frequencies of unstiffened, cross-stiffened and sandwich cylindrical shells 13 p2194 A66-25142

Distribution, as function of azimuth, of static pressure and mass and heat transfer coefficients for case of interaction between detached shock wave on cylinder nose in hypersonic flow and turbulent boundary layer along wall 13 p1991 A66-25464

Response of impact and static pressure probes in rarefied high speed gas flow 16 p2628 A66-30378

Two-phase cold-flow modeling analysis for rocket nozzle, noting deviations from one-dimensional flow for static pressures on nozzle shape [AICE PREPRINT 44F] 22 p3971 A66-39881

Stagnation pressure, temperature and static pressure measurement in shock driven facilities, using equipment with piezoelectric crystal and fast response thermocouple 24 p4207 A66-42172

STATIC STABILITY

Statics and kinematics of rigid bodies in structural mechanics, establishing isostatic support conditions 03 p0436 A66-12733

pe and forced vibrations, static and
amic stability and aeroelasticity of
tropic shells and plates in variable
temperature field 11 p1781 A66-22614
atic and dynamic stability and drag of
t-nosed flare-stabilized bodies at
cities up to 8.2 km per second
AA PAPER 65-44] 12 p1799 A66-24699
iscid equilibrium gas stability
acteristics for pointed and spherically
t bodies in unsteady supersonic flight in
s atmosphere 13 p2191 A66-25275
ree-dimensional statically indeterminate
ne with rigid modes, noting effect of
cing moments for shifting
es 13 p2207 A66-26498
roximation method for evaluating body
ibility effects on slender aircraft static
ility, noting application to sounding
et 13 p1994 A66-26734
ext on longitudinal static stability of low-
ed aircraft including effect on pilot,
nt test, pitch maneuverability,
14 p2222 A66-26792
ynamic system constructed in three-
ensional space with trajectory stable
linary point, showing construction of
ogous example in any space of odd
ensionality 15 p2536 A66-28641
ssile and rocket launching with static
ability, deriving approximate solution for
ations of longitudinal accelerated
tion 19 p3470 A66-36083
atic dimensional stability of nonlinear
tic continua reduced to linear shell
ory 20 p3668 A66-37527
nite amplitude disturbances in baroclinic
osphere, considering interaction with
al current and effect of upward eddy
isport upon time change of mean static
ility 21 p3759 A66-39205
atic stability of rolling motion of aircraft
given aileron angle when inertia cross-
pling is present, with numerical solution
nonlinear equations 22 p3848 A66-40493
MIC TESTING
ill scale ground inflation tests to
luate structural and RF backscatter
acteristics of Echo II prototype spheres
function of their internal
asures 01 p0055 A66-11123
ground and laboratory testing of HFB 320
asa considering static, dynamic, wind
anel and deicing tests 02 p0176 A66-11245
ata acquisition of acoustic, vibration and
at flux during static rocket testing, using
loon rigging
angement 08 p1202 A66-18927
elocity, acceleration and static force
alyses of spatial linkages, using matrix
ebra
SME PAPER 65-APMW-13] 10 p1539 A66-21487
redictability of winds and virtual
emperature profiles for flight and static
t operations, establishing forecast
ification criteria 12 p1908 A66-24503
IAA PAPER 66-378] 12 p1908 A66-24503
atic rocket propulsion testing for various
pellants and test instrumentations
IAA PAPER 65-476] 12 p1858 A66-24688
atic and high strain rate tensile behavior
epoxy, polyester and urethane resins
nforced with 181-S, 184-E and woven
ving glass materials and
lon 13 p2114 A66-26111
Unique free-floating externally ballasted
stem for obtaining static flotation
acteristics 16 p2677 A66-30450
ime shared general-purpose digital
mputer with hybrid linkage to analog
nsoles used for determination of static
d dynamic performance characteristics of
cket engines, jet engines, V/STOL
craft, etc 16 p2658 A66-31249
ircraft structures strength and longevity
ained by applying standards and criteria
design and manufacture including static,
igue and fail-safe tests 20 p3666 A66-37000
electronic hydrogen leak and fire detector
ystems installed on Saturn S-IVB static test
ing stands, discussing installation and
erational problems 20 p3557 A66-37216
igital computer program for V/STOL
craft static propeller characteristics and
imization, based on initial wake
pothesis and trailing vortex sheet
operties 22 p3843 A66-40294

STATIC THRUST

Incompressible fluid static thrust
augmentation devices for aircraft propulsion
for cases of presence and absence of heat
and work exchange
[ASME PAPER 66-GT-116] 14 p2373 A66-27008
Static thrust experiments on single degree-
of-freedom torsional vibration of helicopter
rotor blades due to stall, and amplitude
dependence on blade mean pitch angle and
reduced vibrational
frequency 16 p2634 A66-31321
STATION
S GROUND STATION
S METEOROLOGICAL STATION
S SPACE STATION
S TRACKING STATION
STATIONARY ORBIT
Coverage and overlap of communications
satellites in circular equatorial orbits for
multiple-access
intercommunication 22 p3870 A66-40964
STATISTICAL ANALYSIS
SA REGRESSION ANALYSIS
Statistical development testing discussing
wear rate, factorial design, random balance
design, evolutionary operation and
component search pattern 01 p0077 A66-10116
Statistical determination of error variance
and application to variance analysis of
electrical or mechanical
components 01 p0095 A66-10872
Statistical analysis of dynamic system
response used to design aircraft
undercarriage systems
[AIAA PAPER 65-710] 01 p0013 A66-10947
Electromagnetic wave reflectivity
coefficients from 1957 to 1963 statistically
analyzed 01 p0032 A66-11102
Measurement of one-and two-dimensional
distribution functions of stochastic signals,
examining single channel
analyzers 02 p0230 A66-11811
Book on systems engineering problems and
tools for solution noting energy, materials,
modeling, simulation, computers, control,
statistics, signals, etc 02 p0307 A66-12280
Existence of statistical relationship
between features of different classes of
objects determines amount of information
obtainable by
identification 03 p0338 A66-13039
Fatigue strength of heat-treatable alloyed
steels 03 p0384 A66-13168
Probability method for fatigue strength,
assessing damage from random values, time
variation of stress range and statistical
relationships of addition 04 p0594 A66-14400
Statistical base for intuitive reliance on
validity of conventional component
qualification testing
program 04 p0528 A66-14447
Electron density fluctuations in turbulent
wake, using stochastic analysis and
statistical averaging
[AIAA PAPER 65-818] 05 p0606 A66-15187
Relation between Forbush decreases and
chromospheric flares, obtaining longitudinal
distributions before and after onset, using
statistics 05 p0753 A66-15394
Cumulus modification experiment using
station network, radiosonde and pilot
balloon stations, cameras, radar data,
etc 06 p0905 A66-16268
Statistical study of training and job
performance measures of Air Traffic Control
Specialists representing Enroute, Terminal
and Flight Service
Station 06 p0973 A66-16821
Decomposition of mixed-set distributions
into normal distributions using graphing and
analog computer methods 07 p1003 A66-17381
Graphoanalytical calculating method of
statistical characteristics of step extremal
control systems under steady state operation
in presence of random
noise 07 p1014 A66-17434
Gross track-maintenance errors over North
Atlantic and Northern Canada from survey
of 1717 navigation logs and
charts 07 p1066 A66-17678
Optimum similar solutions of Behrens-
Fisher problem 07 p1060 A66-18506
Statistical approach to derivation of
quadrature formulas 07 p1061 A66-18510
Statistical model of random quasi-sinusoidal
function of constant amplitude represented

by emission of laser or radio
transmitter 08 p1244 A66-18637
Time-normalized Fourier transform of
sampling function of stationary random
process as bounded nonstationary random
function of frequency 08 p1200 A66-18908
Statistical analysis of worldwide magnetic
charts of epoch 1955.0 for main part of
Earth magnetic field 08 p1214 A66-19038
Thermodynamic formalism based on
fundamental relation and Legendre
transformation, with macroscopic and
statistical application 08 p1319 A66-19292
Determining whether aircraft was on fire
before crash by examination of wreckage
fragments 09 p1329 A66-20241
Random deviation statistical analysis of
acoustic and electromagnetic waves by
comparatively large slope
irregularities 09 p1343 A66-20341
Thermonuclear reaction rates in medium
and heavy nuclei determined from statistical
properties 09 p1404 A66-20368
Asymptotic representation of maximum of
normal stationary process over large time
interval 09 p1397 A66-20647
Statistical analysis of light beam
propagation in weakly deformed circular
mirror tube 09 p1347 A66-20776
RAF system of classification of aircraft
accidents by causes for statistical
purposes 10 p1494 A66-22139
Statistical determination of stellar motion
compounded of radial velocity in line of
sight and transverse velocity perpendicular
to it, considering galactic orbits of nearby
stars, velocity ellipsoids,
etc 11 p1766 A66-22256
Stochastic relation between input and
output signals of controlled plant possessing
inertia and delay 11 p1874 A66-22361
Parameter estimation utilizing state vector
model, regression methods, asymptotic
methods, etc 11 p1680 A66-23278
Origin of lunar craters from statistical
analysis of distribution over lunar surface,
reviewing Fielder theory 12 p1949 A66-24033
Statistical analysis of allowable errors in
network synthesis, using moment method,
worst case method and Monte Carlo
method 12 p1833 A66-24076
Multivariate statistical analysis of wind
sounding data, applying high degree of
correlation between two wind parameters
and empirical density function
[AIAA PAPER 66-353] 12 p1907 A66-24489
Simultaneous occurrence and statistical
distribution of clouds over separated cities
in U.S.
[AIAA PAPER 66-361] 12 p1907 A66-24493
Statistical characteristics of output of
nonlinear sampled data control system
evaluated by two
methods 12 p1855 A66-24639
Statistical distribution of first occurrence
and recurrence of crossing of given level in
continuous random process determined,
using approximate forms and exponential
distribution 13 p2116 A66-25141
Monte Carlo model of elementary fracture
process, noting role of energy in
commutation, uneven distribution of energy
vs frequency, etc 13 p2207 A66-26600
Statistical techniques in design review,
with application to
rockets 14 p2371 A66-26809
Statistical analysis of geophysical
data 14 p2283 A66-26932
Statistical optimization of rate-composite
inertial navigation system based on Phillips
theory of servo systems 14 p2328 A66-27364
Statistical failure detection, employing
distribution analysis of parameter changes
which removes artificial constraints imposed
by arbitrary specification
limits 15 p2507 A66-28799
Reliability growth measurement via
exponential smoothing, noting prediction of
successive elements from given time
series 15 p2508 A66-28805
Random balance statistical method of
identifying major causes of performance
variations in jet engine fuel control
units 15 p2572 A66-28863
Relay design by statistical
methods 15 p2460 A66-28995
Statistical analysis of light fields created
by superposition of laser light and chaotic

light 15 p2519 A66-29815
 Statistical characteristics derived for delta pulse-code modulation system, in which coded quantity represents difference between two sampled signal values 15 p2452 A66-29887
 Statistical properties of dispersive waves in upper atmosphere analyzed, using correlation technique 15 p2493 A66-30040
 Three quantum decay of super IS sub zero state positronium determined via measurement of three quantum coincidence events in Al and oxygen with energy sum of 1.02 Mev 16 p2750 A66-30132
 Spectrum of plasma fluctuations in ionized turbulent gas explained by statistical turbulence theory, noting that electron temperature is larger than gas temperature 16 p2757 A66-30173
 Momentum and energy accommodation for hypervelocity gas particles on crystal surface, using Lennard Jones potential and approximating lattice by system of independent forced harmonic oscillators 16 p2752 A66-30388
 Statistical analysis of vertebral fracture in U.S. Navy during 1959-1963 16 p2644 A66-31132
 Partial totals method of estimation for one parameter exponential model, comparing procedure with maximum likelihood, least squares, and weighted least squares estimators 16 p2737 A66-31384
 Frequency of strong ionospheric disturbances, noting effect of high and low solar activity, deviations from monthly median, use of statistical analysis, etc 16 p2699 A66-31387
 Flight Load Survey program, written in Fortran IV, for accurate and rapid sounding of wind-induced loads on aerospace launch vehicle [AIAA PAPER 66-470] 16 p2811 A66-31473
 Velocity dependence of meteor luminous efficiency evaluated, using statistical analysis [AIAA PAPER 66-515] 16 p2805 A66-31482
 Text on random processes in nonlinear control systems, covering statistical analysis, nonlinear transformation with and without feedback, extremal systems, etc 16 p2673 A66-31753
 Optical coherence functions and properties from statistical viewpoint for application to spectroscopy and stellar interferometry 17 p2957 A66-31987
 Asymptotic efficiency for maximum likelihood estimator 17 p2946 A66-32295
 Sufficient conditions for statistical stability of motion in nonlinear systems 17 p2901 A66-32570
 Minimum control system optimization, noting adaptation with respect to minimum mean square error, statistical criterion calculation, etc 17 p2901 A66-32572
 Global harmonic and statistical analysis of gravimetry 17 p2920 A66-33192
 Ceramic structural design, discussing laboratory specimen design, brittle material strength, boundary conditions, statistical parameters, etc 18 p3125 A66-33733
 Level quantization effect in statistical analysis of closed-loop digital automation systems 18 p3089 A66-33736
 Statistical structure of meteorological field, with attention to ergodic properties 18 p3129 A66-34100
 Approximate theory for estimating effect of manufacturing tolerances on deep parabolic reflector performance 18 p3082 A66-34284
 Existence of statistical relationship between features of different classes of objects determines amount of information obtainable by identification 18 p3074 A66-35002
 Analyzer of characteristic function of random phase of quasi-harmonic signal using statistics 20 p3529 A66-37520
 Statistical linearization of nonsingle valued nonlinearities considered as multidimensional inertialess functions of dependent variables 20 p3539 A66-37747
 Dynamic system response to separable nonstationary random excitation, describing statistical properties and application to launch vehicle response calculation 20 p3672 A66-38175

Statistical analysis of diurnal variation in southern boundary of aurora, HF backscatter records and geomagnetic latitude of dayside aurora 20 p3553 A66-38193
 Statistical analysis of storm-time variation and daily disturbance variation in geomagnetic storms 20 p3658 A66-38230
 Statistical method for determining preferential directions shown by lunar surface formations known as lunar grid system 21 p3811 A66-38637
 Data statistical analysis of solar radio bursts over wide frequency range and relation to solar flares 21 p3815 A66-39372
 Replacement of Poisson by Polya distribution in calculating laser intensity threshold necessary to induce ionization breakdown in gases 22 p3929 A66-39715
 Statistical analysis of light beam propagation in weakly deformed circular mirror tube 22 p3947 A66-39835
 Simultaneous nonlinear estimation of parameter vector via iterative procedure for known and unknown covariance matrix 22 p3939 A66-40000
 Variation of geomagnetic activity with phase of Moon tested for statistical significance, noting fluctuations at lunar period 22 p3982 A66-40555
 Randomly sampled random processes, discussing sampling time statistics and stationary point processes 22 p3885 A66-40869
 Specification and assessment of electronic equipment reliability, emphasizing statistical aspects of optimal cost/reliability estimation 22 p3883 A66-40961
 Promotion of aviation safety, discussing adoption of new accident statistics, elimination of catastrophes and STOL design extension to medium and long-range aircraft 23 p4152 A66-41305
 Statistically designed experiments in wind tunnel test programs dealing with exhaust nozzles, discussing data analysis techniques [AIAA PAPER 66-742] 23 p4052 A66-41326
 Reliability estimate methods for equipment using data independent of time to failure factor contrasted with one-or two-sided assigned specification limits 24 p4218 A66-42713
 Thermometry of solar interior via neutrino flux measurement, noting temperature dependence of number of events in detectors 24 p4270 A66-42931
 Stochastic process explaining statistical properties of radar echo patterns 24 p4175 A66-42987
STATISTICAL COMMUNICATION THEORY
 Synthesis of optimum discrete system for continuous information transmission, using statistical theory of estimates 04 p0482 A66-13971
 Statistical accuracy attainable with several types of restoring elements in pulsed transmission of random signals 04 p0482 A66-13972
 Adaptive parametric two-input detectors analyzed and compared to nonparametric detector/polarity coincidence correlator/under assumption of quasi-stationary inputs 06 p0864 A66-16739
 Numerical method used to compute power density representation for classification of complex nonperiodic signals 08 p1185 A66-19562
 Recursive estimation of radar or radio astronomy target parameters, considering functional dependence of covariance function of received signals 10 p1505 A66-21841
 Radar and communication systems unsolved problems, including theoretical foundations and receiver and transmitter design 11 p1653 A66-22631
 Distinguishability of distributions of radio signal envelope, using statistical distance 11 p1655 A66-22716
 Statistical properties of receiver output under interference conditions, obtaining first order output, probability densities, second harmonic and intermodulation interference terms 11 p1658 A66-23483
 Construction of Bayes estimator, using prior estimates of random parameter, with mean square error less than that of maximum-likelihood estimator when a prior distribution of parameter is unknown 12 p1816 A66-24195

Generalized quadratic detection system with n entries, evaluating probability law of output function by derivation of cumulant from second characteristic function 13 p2027 A66-2545
 Test instrumentation for threshold sensitivity and noise bandwidth measurement of narrow band phase-locked receivers, employing statistical techniques 13 p2079 A66-2566
 Flutter, time base error and jitter analyzed in multichannel magnetic recorder, noting measurement techniques 13 p2079 A66-2566
 Shannon model for capacity of time continuous and time-discrete Gaussian channel with inputs perturbed by independent noise random variable 13 p2024 A66-2593
 Signal to noise ratio maximization using Pontryagin maximum principle, solving matched filter problem and designing signal with constrained energy and amplitude requirements 13 p2048 A66-2594
 Statistical properties of input signals an effect on structure of optimal binary system of signal reception 14 p2236 A66-2717
 System availability, noting lower confidence limit and estimation of time-to-failure and time-to-repair from test data 16 p2861 A66-3066
 Statistical theory for optimum direction finding system for space-time signal processing against wide-band fluctuation noise background 17 p2872 A66-3185
 Equivalent linear antenna substitution for antenna with plane aperture in statistical analysis of antennas 17 p2879 A66-3186
 Laser radar ranging system using pseudorandom code modulation, considering application to pulse and digital circuitry statistical communication theory and electronic engineering 18 p3117 A66-3355
 Stationarity, using time averages, of laboratory electronic random noise generators 18 p3076 A66-3383
 Joint maximum likelihood estimator for signal amplitude and noise power density in coherent PCM channel with white Gaussian noise 18 p3070 A66-3425
 Statistical properties of envelope of signal noise mixture with random angular modulation 19 p3296 A66-3530
 Extreme value statistics estimation of low error probabilities in binary communication systems 19 p3301 A66-3568
 Adaptive on-off communication system for binary data transmission over noisy channel of unknown attenuation 19 p3302 A66-3570
 Nonlinear filtering theory based on invariant imbedding for orbit determination and adaptive control problems 19 p3303 A66-3624
 Low error probabilities in binary communication systems estimated by statistics of bivariate extreme-value theory 20 p3514 A66-3721
 Apollo inertial navigation system estimation, using statistical filtering to reduce computation 21 p3767 A66-3888
 Statistical communication theory, examining problem of selecting set of M equipowered finite duration waveforms to minimize error rate for coherent channel perturbed by white Gaussian noise 21 p3704 A66-3914
 Optimum filtering when signals and noises are incoming on different channels, defining filtering by rectangular matrix of filters 21 p3711 A66-3914
 Message estimation of sample function from continuous Gaussian random process establishing and evaluating optimal bounds for procedure 21 p3720 A66-3963
 Probability densities of geometric parameters of polarization ellipse of quasi-monochromatic, partially polarized radio and noise signals in circular and linear-base wave representations 23 p4036 A66-4105
 Synthesis of linear multivariable control systems in statistical dynamics, using method of factorization of spectral matrices 23 p4048 A66-4139
 Distinguishability of distributions of radio signal envelope, using statistical distance 23 p4037 A66-4145
 Binary communications in integral equation in complex variable functions and application of Fourier transform for

and limited signals 23 p4085 A66-41537
 Fixed filter structures optimized according
 criterion of minimizing average mean
 square error for nonstationary and statistical
 description of signals in
 noise 23 p4039 A66-41591
 Basic performance thresholds for 23
 desired and undesired modulation types,
 applying application to interference
 prediction 23 p4040 A66-41598
STATISTICAL CORRELATION
 Gravitational effects not consistent with
 relativity theory, showing statistical
 correlation between solar activity and
 variations in Earth rotational
 velocity 05 p0757 A66-14533
 Spatial statistical correlation functions for
 normalized field of geopotential calculated
 for Europe and Asia 09 p1398 A66-19892
 Wind velocity spectra and correlation
 functions statistically analyzed in ULF range
 for lowest levels of
 atmosphere 16 p2742 A66-30773
 Statistical entropy of nonequilibrium
 plasma, assuming binary correlations remain
 small and neglecting higher order
 correlations, analyzing irreversible evolution
 of simple density 16 p2763 A66-31210
 Statistical correlation theory for extending
 messenger symmetry relationship to
 isolated systems, discussing equilibrium
 and reversibility
 conditions 18 p3117 A66-33554
 Random and systematic errors in satellite
 trajectory computations 18 p3227 A66-33870
 Time-domain and frequency domain
 statistics for random step-wise sampled data
 systems 20 p3535 A66-36847
 Quantitative multivariate statistical analysis
 of average evoked potentials and application
 to visual stimulus intensity and
 duration 20 p3589 A66-37050
 Statistical energy-and power-spectral
 correlation analysis of signals with
 nonintegrable spectra 20 p3512 A66-37149
 Qualitative analytic function-test
 maintainability prediction equations from
 regression analyses on
 hardware 20 p3569 A66-37922
 Statistical correlation analysis of isolated
 geomagnetic bay occurrence and relation to
 solar cycle variation 20 p3658 A66-38231
 Distortions and errors in calculating
 structural and correlation functions from
 experimental results 20 p3594 A66-38377
 Omnidirectional characteristics of
 scattering of acoustic waves from
 statistically rough surfaces, measuring
 scattering cross section as function of
 incidence and observation
 angles 21 p3770 A66-38649
 Statistical correlation of IR cooling
 measurements by Tiros II /Channel 2 and
 Channel 4/ and radiometersonde
 measurements of radiation divergence within
 atmospheric layers 22 p3944 A66-40431
 Statistical correlation-Fourier frequency
 band analysis of coherent memory filter
 applied to pulse compression radar
 systems 23 p4035 A66-41023
STATISTICAL DECISION THEORY
 Statistical decision theory, applying
 Neyman-Pearson test, used to detect and
 discriminate signal 04 p0485 A66-14113
 Statistical methods used in estimation of
 target parameters on basis of signal
 transmitted radar pulse 04 p0485 A66-14114
 Smoothing, filtering and prediction
 problems of filtering theory correspond in
 field of orbit determination to ephemeris
 reconstruction, navigation and orbital
 prediction 05 p0631 A66-14630
 Filtering techniques for estimating
 nonlinear discrete-time processes, including
 Bayesian estimation and weighted least
 squares approach 05 p0656 A66-14631
 Pattern recognition applied to fault
 detection in equipment testing
 procedure 06 p0868 A66-15984
 Optimal adaptive estimation of sampled
 stochastic process described by initially
 unknown parameter
 vector 06 p0865 A66-16740
 Existence of optimal stationary policy in
 Markov decision process in study of
 asymptotic behavior of recurrence relations
 in dynamic programming 09 p1397 A66-20646
 Sufficient statistics in optimum control of

stochastic systems, considering two classes
 of loss functions 10 p1518 A66-21925
 Numerical dynamic predictor for control
 systems disturbed by random noise,
 discussing Fokker-Planck equation, Crank-
 Nicolson difference model,
 etc 11 p1680 A66-23279
 Analysis of means, using decision lines for
 nonrandom variability of set of means,
 noting correlation between analysis of
 means and error variance 15 p2508 A66-28807
 Optimum algorithm derived for making
 binary decisions in decision systems of
 hierarchic structure 15 p2469 A66-29054
 Predicting structural reliability by recent
 developments in statistics, reliability, cost
 effectiveness analysis and decision theory
 [AIAA PAPER 66-503] 16 p2714 A66-30607
 Statistical decision theory determination of
 parameter variations in closed-loop
 automatic adaptive control
 system 16 p2670 A66-30880
 Easily mechanized method of using stored
 samples to approximate set of distributions
 for adaptive pattern
 recognizer 18 p3073 A66-34073
 Learning control system design, discussing
 hill-climbing and pattern recognition
 schemes in framework of statistical decision,
 automata and information
 theory 19 p3333 A66-36662
 Performance criterion for adaptive pattern
 classification system, noting approximation
 to optimum Bayes discriminant
 function 19 p3333 A66-36665
 Adaptive pattern classification system,
 based on typical patterns or training
 samples used by system to determine
 decision procedure that does not require a
 priori knowledge of probability density of
 class pattern vectors 20 p3522 A66-37666
 Continuous sequential decision for
 derivation of minimum search time for
 determining one nonzero mean process in
 presence of finite number of
 hypotheses 21 p3705 A66-39148
 Piecewise linear transformations to
 simplify multiple threshold rules in
 statistical decision theory of pattern
 recognition systems 23 p4040 A66-41595
STATISTICAL FORECASTING PROJECT
 Forecasting methods for air passenger
 traffic between selected city-pairs in U.S.
 air transport network 02 p0178 A66-12218
 Optimal estimation of initial conditions for
 numerical prediction 07 p1055 A66-17366

 ions, obtaining thermodynamic properties,
 potential energy and pair
 distribution 24 p4245 A66-43036
 Statistical mechanics methods applied to
 plasma, deducing kinetic
 equation 24 p4246 A66-43111
STATISTICAL PROBABILITY
 Statistical engineering aspects of probe
 testing for achieving mature designs earlier
 in product life cycle 01 p0077 A66-10115
 Dispersion of estimates of mathematical

expectation and dispersion for connected meteorological time series 01 p0096 A66-10753

Statistical probability problems of optimal control for linear systems 01 p0051 A66-11183

Minimum-variance unbiased one-order-statistic estimator of parameter of one-parameter exponential Weibull population 03 p0388 A66-12901

Numerical reliability of complex structural component against single dominant failure mode, using WSEIAC structural model 05 p0781 A66-15826

Reliability of system, with recovery, consisting of n plus m elements, m elements being in redundant system 08 p1200 A66-19670

Reliability, stability and time-to-failure probability characteristics of system operating at random intervals 08 p1201 A66-19671

Probability distribution of number of system failures and generating function for compound probability distribution of required launches 09 p1463 A66-19911

Variation in number of particles in interconnected components and lifetime estimation for given system 09 p1394 A66-20496

Extinction probability of system at time t as function of probabilistic parameters of system 09 p1394 A66-20497

Asymptotic behavior of probability distributions and density functions of processes with independent increments 09 p1397 A66-20645

Probabilities of detection for fluctuating radar targets 10 p1506 A66-22051

Algorithm for data transmission system automatic adaptive equalization, employing change of settings during transmission in response to variation in transmission channel characteristics 11 p1656 A66-23088

Radio receiver design for precisely given signal and nonsteady Gaussian noise 11 p1658 A66-23221

Statistical probability problems of optimal control of linear systems 12 p1848 A66-24016

Statistical-probability determination of lunar-solar daily and seasonal magnetic variations and geomagnetic effects 12 p1951 A66-24463

Statistical description of signal filtration 13 p2045 A66-25295

Dynamic programming recursive estimation of modal trajectory for nonlinear non-Gaussian noise and comparison with Bayesian estimation and case of Gaussian white noise 13 p2053 A66-26086

Approximating probability characteristics of mismatch for steady mode of operation of astatic servosystem with modulation 13 p2056 A66-26480

Probability-statistics analytic human-operator model in control systems analysis 14 p2263 A66-27108

PERT statistical design of logic systems, discussing expected delays, critical timing paths, timing slack between various inputs and probability of achieving specific output by given time 14 p2264 A66-27232

Dispersion of estimates of mathematical expectation and dispersion for connected meteorological time series 14 p2326 A66-27852

Statistical thermodynamics analysis of interaction limit problem for real system 14 p2414 A66-28277

Checkout procedure for automatic test systems, checkout error probability and relation to tolerance limits 17 p2888 A66-32777

Amplitude analysis and statistical implications of random data analysis applied to evaluation of random signals 18 p3135 A66-34498

Two-step procedure for high energy signal detection against noise background, based on statistical probability 19 p3296 A66-35296

Allotment of probability shares /APS/, statistical approach for guiding safety measures to improve aviation 20 p3494 A66-36998

Reliability statistical confidence levels and relation to mean time between failures /MTBF/ 20 p3682 A66-37182

Multivariate statistical error model representation of single radar tracking

station and analogous model for three stations used to compare measuring accuracies 20 p3514 A66-37219

Reliability of system with recovery consisting of n plus m elements, m elements being in redundant system 20 p3538 A66-37262

Reliability, stability and time-to-failure probability characteristics of system operating at random intervals 20 p3538 A66-37263

Critical Human Performance and Evaluation /CHPAE/ Program 20 p3509 A66-37893

Optimum search for location of maximum M of unimodal function when M is initially uniformly distributed over some interval 21 p3757 A66-39135

Statistical and instrumental fluctuations effect on distribution of first-harmonic amplitude and phase in harmonic analysis of cosmic radiation variation 22 p3975 A66-40776

Least squares estimates and random sampling theory, examining outliers in samples of size three 23 p4086 A66-41930

Photoelectron emission statistics determining probability distribution of photoelectron counts in photomultiplier illuminated by laser below and above threshold of oscillation 24 p4220 A66-42543

Maximum likelihood estimate with exponent m 24 p4271 A66-42944

Statistical performance of energy and heterodyne detection techniques in pulsed-optical radar compared for target detection capability 02 p0240 A66-11456

Statistical characteristics of various uniform phase distribution processes and their envelopes 02 p0193 A66-12269

Aircraft, missile and space systems flight test programs using statistical experimental design techniques 09 p1330 A66-20745

[AIAA PAPER 65-221] Weight empty estimation methods evaluated for transports and bombers ranging in weight from 78 to 488 klb 11 p1783 A66-23002

Mean wind vector shear and shear interval and standard deviation, examining correlation 11 p1730 A66-23097

Statistical characteristics of various uniform phase distribution processes and envelopes 12 p1813 A66-23873

Russian text on mathematical methods in reliability theory 12 p1903 A66-24068

Plane wave propagation statistics in turbulent atmosphere 15 p2448 A66-28582

Statistical test of randomness applied to lunar crater data, noting distribution and density 15 p2598 A66-29264

Bias free statistics of orbital elements of asteroids 20 p3656 A66-38028

Quantum statistical approach to interaction of electromagnetic waves with hot plasma, noting renormalization of Coulomb interaction between charged particles 21 p3776 A66-38545

Physical, mathematical, statistical, synoptic and applicative aspects of medium-and long-range weather prediction 22 p3942 A66-39729

Statistical properties of dynamic response of structure to random load field, examining simple deterministic loadings 22 p3993 A66-40359

STATOR

Size and position effect, baffle effect and wake and pressure interaction effect of upstream stator on ducted axial flow fan noise 10 p1483 A66-21746

STATOR BLADE

Air cooled gas turbine rotor and stator airfoils, presenting problem definition, analysis techniques, material application and cascade and engine testing [ASME PAPER 65-WA/GTP-10] 05 p0691 A66-15725

Adjustable stator blades in axial compressors, noting advantages of system for constant-speed electric or variable-speed turbine drives 14 p2373 A66-27017

STEADY FLOW

Torsional oscillations of plane with large suction effect on magnitude of induced axial steady inflow toward surface of disk 01 p0057 A66-10429

Steady nonviscous flow in field with sources of energy, force and mass investigated under assumption of small perturbations 01 p0057 A66-10430

Numerical solution to steady compressible Navier-Stokes equation, treating steady shock tube flow as asymptotic form of time dependent flow [AIAA PAPER 65-1] 02 p0217 A66-11530

Edge suction effect occurring in steady subsonic flow along one of legs of convex corner directed toward edge 02 p0175 A66-11558

Steady flow possessing extremal kinetic energy compared to equivortex flow for stability analysis 02 p0219 A66-12168

Volterra integral applied to steady supersonic flow past annular wings of various configurations to determine aerodynamic characteristics 04 p0455 A66-14138

Asymptotic solution of disturbance at large distance from source placed in flow of conducting compressible fluid in applied magnetic field 05 p0723 A66-15052

Control mechanisms in nonlinear steady flow forces of hydraulic valves [ASME PAPER 65-WA/AUT-20] 05 p0624 A66-15616

Relationship between local growth mean secondary vorticity and Reynolds stresses and gradients of anisotropic turbulence for steady mean flow [ASME PAPER 65-WA/FE-28] 05 p0665 A66-15712

Steady flow of incompressible viscous fluid through space between rotating coaxial cones with porous walls, calculating effect of injection and suction on radial flow 06 p0870 A66-16182

Velocity potential equation for linearized steady motion of gas mixture with multiple reactions 07 p1023 A66-18116

Steady flow interactions of supersonic airstream and jet blown from hemispherical and flat body noses 07 p0982 A66-18137

Infinitesimal time-dependent perturbation of steady viscoelastic flows with application to Couette viscometer 08 p1208 A66-19229

Simple analytical method for calculating stream functions in three-dimensional steady flow past slender bodies 08 p1166 A66-19827

Shock wave discontinuity of steady one-dimensional viscoelastic flow 09 p1466 A66-20261

Numerical analysis of steady two-dimensional motion of viscous fluid past flat plate at zero incidence to uniform stream, with solutions for Navier-Stokes equations 12 p1866 A66-24949

Heat transfer in steady flow of non-Newtonian fluid characterized by Rivlin-Ericksen constitutive equation inside wavy cylindrical tube, with momentum and energy equations solved by perturbation technique 12 p1866 A66-24960

Steady flow of anisotropic conducting medium in half-space under influence of magnetic field 13 p2142 A66-25632

Equiaffine geometry of double field and application to steady fluid flow theory 14 p2275 A66-27592

Steady flow of conducting dissociating gas in channel of constant cross section in presence of magnetic field 16 p2687 A66-31185

Laminar steady motion transition to turbulent flow in systems described by hydrodynamic equations, including small amplitude steady periodic motion analysis 16 p2689 A66-31512

Book on theory of steady viscometric flows of non-Newtonian fluids, discussing design and interpretation of experiments 17 p2912 A66-32992

Variational principle for steady flows of ideal liquid and sufficient conditions for nonlinear stability under finite perturbations 17 p2913 A66-33168

Channel flow general equations including inviscous uniform flow, steady flow, stagnation state and speed of sound in ideal gas 18 p3098 A66-34121

Transitions of steady flows of conducting gases through two successive oblique MHD shock waves 18 p3147 A66-34726

Plane steady flow of thin viscous fluid film between solid wall and free surface, solving linear and nonlinear 19 p3342 A66-36469

Oblique detonation impacts in pentolite on or treated by methods of plane steady compressible flow, discussing regular and shock Mach reflection and expansion 21 p3727 A66-39172

Vector equations of steady incompressible viscous flow in absence of extraneous forces, discussing Beltrami flow, doubly laminar flow and plane 21 p3728 A66-39435

Vector equations of steady inviscid thermally nonconducting gas flows from geometric theory of triply orthogonal spatial curves 21 p3729 A66-39446

Steady laminar flow of viscous incompressible fluid through two-dimensional channel with fluid sucked or injected with different velocities through uniformly porous parallel walls 21 p3730 A66-39461

Steady state equations for one-dimensional flow of conducting medium through channel of MHD generator in homogeneous magnetic field 22 p3952 A66-39692

Equiaffine geometry of double field and application to steady fluid flow 22 p3900 A66-40441

Slow steady flow of viscous incompressible fluid between two coaxial circular cylinders with axial roughness 23 p4054 A66-41122

Viscoelastic properties of liquids under steady flow determined experimentally in frequency range 5-75 mc/s, using internal reflection of pulse of shear wave at surface of fused quartz bar 23 p4066 A66-41159

Unsteady air flow discharge coefficients compared for sharp-edged orifices with steady flow values 23 p4009 A66-41700

Steady three-dimensional rotational vortex flow of incompressible fluid, considering viscosity effects 23 p4058 A66-41929

Shape and motion of cavities in steady planar supercavitating flows, noting transverse gravity field effect on Helmholtz flow past forebody experiencing drag alone 23 p4062 A66-42059

Slow steady viscous flow through annulus between porous circular cylinders with uniform arbitrary injection and suction velocities, calculating wall porosity effect on velocity and pressure 24 p4193 A66-42156

Distributions 24 p4193 A66-42156

Secondary steady or periodic flow generation from stability loss by laminar flow of viscous incompressible fluid, noting nonuniqueness of solution 24 p4195 A66-42840

Two-dimensional bubble contours in steady state turbulence-free flow of ideal incompressible fluid, obtaining solution for all internal pressures 24 p4232 A66-43064

STEADY STATE

SA EQUILIBRIUM

Certain properties of estimators of spectrum of Gaussian steady state process 01 p0094 A66-10729

Effects of stiction and Coulomb friction on steady state response of servosystem studied, using simple friction characteristic 02 p0180 A66-11308

Steady states of mechanical system using perturbation method, assuming primary and secondary oscillators are tuned to single pulse, each involving Duffing type nonlinearity 04 p0545 A66-14169

Criteria for occurrence of spatially periodic solutions of self-consistent problem in steady state rarefied plasma 04 p0556 A66-14419

Steady state regime of channel expansion and shock wave motion for underwater spark discharges 04 p0557 A66-14424

Ambipolar diffusion in magnetic field showing plasma equations of momentum-transfer yield unambiguous steady state solutions 05 p0669 A66-14943

Generalized equation for steady state motion of electrons in cylindrical

electrostatic system with arbitrary cross section, calculating critical focusing current 11 p1735 A66-22493

Elliptic galaxy formation by expansion from steady state according to Einstein-de Sitter law 11 p1775 A66-23069

Circuit theory reciprocity theorem for dynamic linear systems with gyroscopic coupling for steady state response 12 p1912 A66-23611

Observable properties of normal relativistic world models and steady state world model defined by parameters depending on cosmological constant and present mean density of universe 12 p1946 A66-23652

SCR circuit design operating under transient loads higher than steady state rating, using transient capabilities and heat sink 12 p1848 A66-24088

Electromagnetic induction in conducting sphere rotating in transverse field, extending results for steady state to unsteady rotation, determining magnetic moment 12 p1871 A66-24298

Spatially independent laser rate equation generalized for multimode effects, noting steady state oscillation threshold singularities, spiking parameters, etc 12 p1891 A66-24560

Two-level atom interaction with multimode gas laser cavity, obtaining stationary state and solving unique eigenvalue in special cases 12 p1891 A66-24568

Steady state structure and LF modes of infinitely long finite thickness cylindrical sheet of relativistic electrons in applied external field 12 p1873 A66-24576

Night sky darkness explained as limitation of background radiation by various factors in static, steady state and evolving universes 13 p2075 A66-26602

Steady state regime of electromagnetic oscillation in laser 14 p2306 A66-27065

Cosmological theory testing with gravitational lens effect 14 p2383 A66-27710

Singular characteristics of dynamic systems with steady state motion, noting effect of constantly acting small perturbations 15 p2537 A66-28950

Steady state circuit analysis of basic linear parametric amplifier using successive approximation 17 p2880 A66-32058

Steady state oscillations of molecular beam laser with inhomogeneous sinusoidal field in resonator 17 p2885 A66-32243

Nonuniform motion of high field domains in Gunn effect including steady and nonsteady state properties of formation stage 18 p3077 A66-34076

Transient and steady state responses of linear systems under oscillation and PAM 19 p3303 A66-35834

Field of high temperatures produced by transitional and steady state processes, using electric arcs in nonrarefied gases, obtaining existence and stability criteria for arc 20 p3606 A66-36965

Numerical calculations of parameters of steady state HF high pressure vortical discharge of argon in air 20 p3607 A66-36975

Geometry of steady state annular electrodeless discharge in argon and xenon as function of discharge power, type of gas, gas pressure, etc 20 p3607 A66-36976

Dynamic stability and transonic flow response to arbitrary perturbations of solar and stellar winds in steady state 21 p3810 A66-39556

MHD and velocity space instabilities of plasma in ring vortex confined by cold gas blanket in toroidal magnetic field 22 p3954 A66-39931

Steady state regime of electromagnetic oscillation in laser 22 p3933 A66-40824

Radiation resistance of antennas in magnetoplasma, considering inapplicability of reversible power concept to steady state mode 23 p4047 A66-41634

Evidence against steady state model of universe provided by cosmological origin of quasar red shifts 24 p4273 A66-42418

Certain properties of estimators of spectrum of Gaussian steady state process 24 p4232 A66-42747

STEADY STATE CREEP

Reduction of Rabinov approximate equation describing steady creep in circular cylindrical shells, under axisymmetric

loading, to system of integral equations 04 p0588 A66-13567

Upper bound on displacement rates of steady creep problem 12 p1962 A66-24002

Stress-strain state of plate with circular hole, noting stress concentration, material creep properties and solution by successive approximation 13 p2204 A66-26436

Steady state creep equations derived for anisotropic material under multiaxial stress states, based on perfect plasticity analogies 16 p2820 A66-31275

Variation equation for steady state creep applied to semimomentless cylindrical shell 17 p3030 A66-32935

Initial nonsteady, steady and accelerated alloy creep test data surveyed and compared with phenomenological theory 19 p3473 A66-35757

STEADY STATE FLOW

Steady state irrotational flow of perfect gas in plane and axisymmetric Laval nozzles 01 p0008 A66-11015

Velocity and momentum of high current steady state coaxial plasma noting mass flow, exhaust velocity, thrust, arc voltage and power 02 p0267 A66-11559

Couette flow, unpressurized axial flow in annular gap between two cylinders and flow between two rotating cylinders, taking into account energy dissipation and dependence of viscosity on temperature 04 p0512 A66-14423

Unsteady heat conduction in finite homogeneous region of arbitrary geometry and initial conditions with inhomogeneous boundary conditions 07 p1150 A66-17578

Steady state expansion of gas into vacuum, considering continuum inviscid analysis, collision-free analysis, supersonic flow and hypersonic limits, etc, for spherical and cylindrical symmetry 12 p1860 A66-23607

Hydrodynamics of free steady state jet subject to axial tension, numerical computation of perturbation corrections for Newtonian jets 12 p1797 A66-24031

Steady state motion of Couette plasma flow in electric field, assuming transfer of collective motion is effected by ions and heat transfer by electrons 14 p2339 A66-26774

Boundary problem describing plane jet steady state flow of ideal incompressible fluid, reducing solution to nonlinear integro-differential equations 14 p2272 A66-26775

Flow produced by impulsively started rotating disk 15 p2480 A66-29691

Oscillation spectra of plasma in quasi-steady state characterized by self-consistent distribution of plasma particles and turbulent pulsation 16 p2755 A66-30090

Solar wind origin, examining steady state energy and momentum balance, coronal heating, viscosity effects, velocity distributions and field effects 18 p3168 A66-34343

Steady state heat convection in viscous incompressible fluid sandwiched between two surfaces perpendicular to direction of force of gravity 19 p3342 A66-36471

Behavior of solution of system of equations for unsteady boundary layer of two-dimensional liquid as time approaches infinity 19 p3343 A66-36826

Simplified model of relation between electron concentration and ionization rate in steady-state inert gas discharge column leading to contraction of column 20 p3608 A66-37464

Steady state characteristics and transient behavior of vortex valve, examining effect of wall friction and shearing stresses due to radial velocity gradients 20 p3501 A66-37649

Differential equations for quasi-homogeneous MHD flow of electrically conducting medium at low magnetic Reynolds numbers 20 p3611 A66-38109

Density of steady state gas flow expanding from viscous to molecular flow regime approximately calculated 21 p3723 A66-38507

Bifurcation of nonlinear operator equations to determine steady state axisymmetric homogeneous fluid flows between rotating cylinders 22 p3928 A66-40689

Steady state flow of liquid metal in MGD channel of rectangular section, noting magnetic field effect on resistance factor 23 p4106 A66-41729

Wave resistance of viscous liquid of infinite depth, examining system of normal stresses that flow along surface 23 p4056 A66-41730
 Time of establishment of steady state mixing in plane and axially symmetrical jets determined, using self-similar motions in unsteady state boundary layer and free turbulence 23 p4010 A66-41734
 Stability of one-dimensional magnetoacoustic waves traveling in axial direction in Hall type MHD generator analyzed by steady state flow equations 23 p4024 A66-41884
 Invariant solution classification for equations of two-dimensional steady state motion of gas 24 p4196 A66-42867

STEAM GENERATOR

Steam generating technique for vacuum ejector system of high-altitude-simulating rocket test facility in West Germany 10 p1519 A66-21403

STEAM TURBINE

Losses in steam turbines investigated in wind tunnels, using four-channel flow cycle and wooden model 01 p0053 A66-10215
 Clearance loss in rectilinear cascade, emphasizing flow separation and vortices shed at blade tips 07 p0980 A66-17483

STEARATE

Lead stearate effect on heat of explosion in nitro-cellulose propellant combustion at various pressure levels 20 p3626 A66-38041

STEEL

 SA HIGH STRENGTH STEEL
 SA IRON ALLOY
 SA MARAGING STEEL
 SA MARTENSITIC STEEL
 SA NOTCHED STEEL
 SA STAINLESS STEEL

Strength and heat resistance of alloys, particularly low alloy steels 01 p0084 A66-10286

Mechanical properties of commercial heats of air and vacuum melted steel, deriving data from impact and tensile tests, noting ways of increasing toughness 01 p0086 A66-10413

Irreversible tempering brittleness of spring steel with Mn, Cr, Si and C 01 p0086 A66-10452

Welding technology and metal testing - Conference, Timisoara, Rumania, September 1965, Volume 2 03 p0383 A66-13156

Practical data processing of stress rupture results for steels with elevated operating temperatures, tentative procedure proposed and applied 03 p0384 A66-13161

Fracture propagation in steels discussing macrostructure analysis, differences in intercrystalline and transcrystalline mechanism, plastic surface stresses and strains, etc 03 p0384 A66-13163

Parametric formulas for extrapolating creep and stress-rupture data for high temperature steels 03 p0439 A66-13165

Fatigue strength of heat-treatable alloyed steels 03 p0384 A66-13168

Vacancy concentration favorable for structural polygonization due to effect of cyclic heat treatment in lattice of steel 03 p0385 A66-13174

Investment castings in advanced high strength steels and titanium alloys, noting reliability and quality control [SAE PAPER 650770] 05 p0688 A66-15009

Graphite and carbon steel case hardening by chromium 05 p0702 A66-15111

Surface film effects on fatigue life of steels 05 p0703 A66-15483

Alloy steel fracture resistance, describing creep strain effect on gas turbine engine alloys [ASME PAPER 65-WA/MET-13] 05 p0703 A66-15685

Titanium carbide coating depositions on steel and subsequent annealing redistribution of elements in interface 06 p0895 A66-16227

Small titanium additions effect on strength, impact ductility and structure of low-carbon low-alloy steel 06 p0895 A66-16228

Initiation and propagation of fatigue crack with reference to fish-eye pattern in ball bearing steel 06 p0965 A66-16489

Delayed fracture in high strength steel due to hydrogen penetration 06 p0895 A66-16490

Welding properties of high strength steels, noting electrodes and carbon diffusion 08 p1231 A66-19169

Effect of plastic coatings on fatigue strength of steel and welded steel samples subjected to concentrated stress 08 p1231 A66-19171

Creep properties of EP-376 steel under slowly varying loads 08 p1241 A66-19590

Yield stress dependence on strain rates in annealed steel and aluminum subjected to ball-indentation tests 08 p1315 A66-19803

Brittle fracture characteristics and fine structure parameters in steel 09 p1391 A66-20864

High-chromium ferrite steel Kh25T brittleness at 475 degrees C investigated, using neutron structural analysis 09 p1391 A66-20872

Steel for construction of propellant tank and skin of Diamant rocket 12 p1885 A66-23866

Alloy steel fracture resistance, describing creep strain effect on gas turbine engine alloys [ASME PAPER 65-WA/MET-13] 12 p1896 A66-24535

Saturation conditions and alloying elements effect on depth, phase composition and properties of borided layer 14 p2316 A66-27831

Friction corrosion caused by alternate pivoting of steel ball on plane of light alloy 14 p2302 A66-27934

Mechanical strength and plasticity of work hardened KhN77TiU steel 14 p2304 A66-28208

Kh16N15M2B steel properties and effects of grain size and Nb/C ratio 15 p2519 A66-28536

Neutron irradiation effect on fracture toughness of several structural and pressure vessel steels studied by Charpy V-notch impact test and tensile test 15 p2521 A66-29074

Low endurance fatigue properties of steel plate 15 p2615 A66-29805

Underwater explosive stretch forming of clamped circular mild-steel blanks as affected by clamping ring and reflecting plate 16 p2709 A66-30268

Age hardenable nickel-copper steels with strength achieved by copper phase hardening 16 p2723 A66-30319

18 percent nickel maraging steel properties suitable for welding 16 p2723 A66-30321

Fatigue tests at high stress levels under rotating bending of carbon steel and roll material, analyzing stress-strain behavior in plastic fatigue process 16 p2815 A66-30809

Vibrational and static plastic deformation effect on structure of 40KhNMA steel and VD 17 aluminum alloy 16 p2728 A66-31800

Laser beam effect on hardening of steel 16 p2721 A66-31802

Investment cast 17-4PH incorporated into actuating and supporting mechanism double droop leading edge of wing of F-8E/FN/French Crusader 17 p2929 A66-32693

Deformation characteristics of 0.90 percent carbon steel wire studied for structures and strengthening mechanisms 18 p3122 A66-33754

Thermal conductivity and electrical resistivity measurements on nickel alloyed steels in cast and wrought conditions 18 p3124 A66-34895

Optimum alloying level defined as one beyond which net positive effect is reduced by decline in some product property, noting steels 20 p3585 A66-37697

Papers of F. Nakanishi covering yield point of mild steel, brittle materials, propulsion, plasticity, etc 20 p3683 A66-37826

Steel testing at 580 degrees C during stress relaxation with repeated load increases 21 p3827 A66-38616

Surface layer of heat-treated steel alloy after work hardening 23 p4081 A66-41405

Creep relaxation effect on high strain fatigue in chromium and molybdenum steels 23 p4139 A66-41699

Impact of compact mass of tungsten particles on obstacles of polystyrene and steel, as meteoritic impact 23 p4139 A66-41699

model 24 p4292 A66-42866

STEEL STRUCTURE

Transmission electron microscopy to determine white etching alteration around inclusion in cyclically stressed bearing steel due to cellular grain formation [ASME PAPER 65-WA/CF-1] 05 p0703 A66-15614

Microstructural alterations developing with cycling stressing in rolling contact exemplified by bearing steel parts [ASME PAPER 65-WA/CF-4] 05 p0779 A66-15623

Compressive residual stress effects on surface layers of through-hardened bearing steels produced by prenitriding before hardening [ASME PAPER 65-WA/CF-7] 05 p0690 A66-15625

Alloy steel yield strength, strain rate sensitivity, material parameters and power-law relationship [ASME PAPER 65-WA/MET-8] 05 p0703 A66-15688

Effect of molybdenum, niobium and tungsten on structure and properties of nitrogen containing austenitic chromium-manganese steels 12 p1893 A66-23726

Alloy steel yield strength, strain rate sensitivity, material parameters and power-law relationship [ASME PAPER 65-WA/MET-8] 12 p1896 A66-24536

Treatment of steel with laser beam, obtaining precision holes without affecting microhardness of metal 12 p1888 A66-24898

Niobium addition effect on mechanical properties of steel, noting improvement of tensile strength and cold brittleness threshold decrease 12 p1897 A66-24899

Scattering mechanical properties of ternary alloy creep resistant steel, emphasizing effect of heat treatment on microstructure [ASME PAPER 66-GT-112] 14 p2312 A66-27006

Field cleaning of corrosion resistant steel tubing for LOX and pneumatic service 22 p3922 A66-40040

STEEP GRADIENT AIRCRAFT

S HELICOPTER

S STOL AIRCRAFT

S VTOL AIRCRAFT

STEEPEST ASCENT METHOD

Steepest ascent method for trajectory optimization 06 p0952 A66-15916

Booster rocket ascent trajectory optimization, using steepest ascent method [AIAA PAPER 64-663] 16 p2801 A66-30883

Simplification of steepest-ascent method for determining optimal control program by introducing penalty method to eliminate adjoint variables 18 p3089 A66-33603

Optimal control synthesis for cost functionals involving convex single valued functions of state and control variables, noting steepest ascent method and evaluating gradient 22 p3885 A66-40871

STEEPEST DESCENT METHOD

Three parameter antenna pattern synthesis using nonlinear computer programming technique derived from method of steepest descent 01 p0044 A66-10934

Fuel optimal linear control through minimization of convex function, using convex programming and steepest descent technique 04 p0505 A66-13996

Steepest descent, covering iterative methods for driving support mapping gradient to zero in convex programming 04 p0540 A66-13997

Automatic parameter tracking model for adaptive control system, using steepest descent procedure for adjusting parameters 09 p1362 A66-20611

Optimum system reliability for arbitrary structure, using algorithm of steepest descent applied to problems of convex programming with linear constraints 09 p1358 A66-20911

Analog computer techniques applied to find roots of complex functions, to generate complex functions by Cauchy integral theorem and to scan z plane 10 p1507 A66-21693

General convergence theorem for gradient method of minimizing functions with Lipschitz continuous first partial derivatives, noting role of steepest descent

algorithms 11 p1724 A66-23402
 climbing by steepest descent method rather than proportional
 optimization 12 p1909 A66-24262
 minimizing functionals on normed linear spaces, discussing steepest descent and various problems in control
 primary 13 p2116 A66-25343
 steepest descent with inequality constraints on control
 variables 13 p2047 A66-25353
 stress and deformation in cross section of beam during complex loading, using steepest-descent method 14 p2400 A66-27685
 boundary between applicability ranges of work and steepest descent methods in station integration of Timoshenko theory analysis of plate
 information 15 p2608 A66-28962
 steepest descent method extended to trajectory optimization problem for chaotically disturbed systems with application to Euler equation for white noise problem of reentering
 vehicle 19 p3388 A66-35879
 steepest descent method of solving multiple-arc optimal control problems of orbital transfer 19 p3388 A66-35881
 steepest descent method of trajectory optimization for computing lunar and interplanetary transfer missions, noting terminal constraints 20 p3651 A66-37391

STEERABLE ANTENNA
 steerable radio telescopes noting Mark I radio telescope at Jodrell Bank, England 01 p0139 A66-11156
 electronically steerable antennas for aircraft-to-spacecraft communication for frequencies from 1 to 35 gc, considering optimum antenna gain, bandwidth, and spacecraft stabilization, 04 p0501 A66-14443
 electronically-steerable antenna for ground terminal of satellite communications system 06 p0855 A66-16863
 celestially referenced electronic space tracking system for augmenting accuracy of tracking antenna 10 p1505 A66-21895
 ground-based steerable paraboloid reflector and multiplate type antennas, noting cost per unit area for unit speed of 30 mph and frequency of 60 mc, performance, restrictions, etc [IAA PAPER 66-324] 12 p1844 A66-24794
 electronic self-steering techniques applied to satellite communications systems with high gain antennas, noting transdirective array and self-phasing array [IAA PAPER 66-326] 12 p1824 A66-24796
 long baseline interferometers in form of steerable antenna systems at Jodrell Bank, England 13 p2022 A66-25550
 antenna steering system using special digital computer and precision analog power servo drive 18 p3131 A66-33867
 design and construction of large steerable antennas - IEE Conference, London, June 1966 18 p3079 A66-34262
 mounting problem for land-borne and shipborne antennas for tracking synchronous, asynchronous and other communications satellites 18 p3070 A66-34263
 multiple-element steerable Earth-station antenna for communicating with communications satellite 18 p3080 A66-34264
 large steerable antennas in control systems, emphasizing antennas using paraboloidal reflectors 18 p3081 A66-34267
 structural vibration of large microwave steerable radio telescopes and large paraboloidal reflectors due to wind loading 18 p3255 A66-34268
 digital optimal control of steerable antennas using radiation lobe geometry, dynamic programming and control strategy principles 18 p3081 A66-34269
 accuracy limitations in control and construction of large steerable paraboloidal antennas 18 p3081 A66-34273
 angular measuring system for radio telescopes, noting application of Raksyn variable capacitor block as nonwearing rotating pinion 18 p3113 A66-34274
 aerial mount and satellite orbit effect on steerable antenna control system, noting frequency and tracking data 18 p3071 A66-34279
 steerable parabolic reflector performance

characteristics noting gain, noise pattern, polarization and pointing system performance 18 p3082 A66-34280
 Steerable parabolic reflector /Haystack antenna/ mechanical design, discussing structural properties, test program and operation 18 p3255 A66-34281
 Shadow and diffraction effect of spars on Cassegrain antenna system gain performance 18 p3082 A66-34283
 Stresses and deflections in inhomogeneous sandwich shells calculated via computer programs 18 p3255 A66-34286
 Cost and performance factors of steerable parabolic reflectors, spherical reflectors and multiplate antennas 18 p3268 A66-34288
 Peak drive power requirements, optimum drive size and torque requirements for large aperture steerable tracking antenna 18 p3055 A66-34295
 Laser system for measuring surface contours in large steerable antennas 18 p3119 A66-34296
 Reflector surface measurement technique for parabolic antenna with paraboloidal axis at zenith distances 18 p3083 A66-34298
 Design factors for fully steerable radio telescopes in 400-ft diameter size range for operation at 10 cm wavelength 18 p3083 A66-34300
 Autotracking accuracy of large antenna systems for satellite communication application 18 p3071 A66-34301
 Linear drive pedestal for improved antenna positioning 18 p3055 A66-34304
 Design specifications for fully steerable radio telescope with 80 m parabolic opening 18 p3084 A66-34305
 Design specifications of radome protected fully-steerable parabolic reflector antenna of 25 m diameter 18 p3084 A66-34306
 Optimum number of arrays for hemispherical coverage in electronically steerable antenna 18 p3084 A66-34307
 Target identification by processing outputs from widely spaced elements of large antenna array to form microwave imaging 18 p3071 A66-34308
 Aperture efficiency and surface errors of 210-ft radio telescope at Parkes 18 p3084 A66-34309
 Improved feed synthesis using multimodes for large circular paraboloids at Parkes 18 p3084 A66-34310
 On-line computers in steerable aerial control system for satellite tracking 18 p3073 A66-34314
 Reflector surface and feed-support structure for center-fed paraboloidal aerial system for satellite communication 18 p3085 A66-34315
 Modified Goonhilly No. 1 aerial noise-temperature, gain and figure of merit 18 p3085 A66-34316
 Electric or hydraulic drives for steerable satellite trackers and heightfinder radars 18 p3055 A66-34317
 Synthesis radio telescope at Westerbork, Holland 18 p3085 A66-34320
 Primary feed for center-fed paraboloidal aerial system for satellite-communication Earth station 18 p3086 A66-34323
 High-power feed for satellite tracking radar using four-way static split system with Cassegrain antenna and four symmetrical horns, noting phase shift errors 18 p3086 A66-34324
 Jodrell Bank Mark II radio telescope control system 18 p3096 A66-34327
 Design and construction of large steerable antennas, noting difficulties and economics 18 p3096 A66-34328
 Large steerable antenna and microwave problems in designing 18 p3086 A66-34329
 Design considerations for advanced digital beam steering computer through use of geometric optics 21 p3707 A66-38674
 Diameters and positions of three sources of 18-cm OH emission determined, using 90-ft steerable paraboloids 21 p3814 A66-39269

STEERING
SA ROCKET STEERING MOTOR
 Rapidly convergent iterative unique determination of linear steering function for desired orbit conditions 08 p1289 A66-18826
 Manual steering, hybrid guidance system, in-flight computations and trajectory for automatic descent and landing system for

LEM 21 p3768 A66-38899
STEFAN-BOLTZMANN LAW
 Long wave radiation and total radiation balance at Earth surface in Arctic region, based on Stefan-Boltzmann formula 12 p1869 A66-24202

STELLAR ATMOSPHERE
 Transient behavior of heated stellar atmosphere, examining unsteady flow caused by sudden application of heat to static adiabatic atmosphere 08 p1286 A66-18541
 Abundance of molecules, ions and atoms in late-type dwarf, giant and supergiant atmospheres 08 p1288 A66-18781
 Stability of expanding corona against radial compressional waves 09 p1455 A66-20403
 Neutron star atmosphere models for determining, surface temperature, cooling time and X-ray emission 10 p1599 A66-21103
 Possible atmosphere detection on J-II and J-III satellites revealed by excess brightness on eclipse reappearance 10 p1804 A66-21202
 Spectroscopic criteria and parameters for optimal stellar atmosphere obtaining sunspot model via rating system 16 p2803 A66-31260
 Temperature structure of early type stellar atmospheres noting sources of opacity, electron Rayleigh scattering, etc 16 p2806 A66-31703
 Grid computations of model atmospheres for A-type stars, considering effects of Balmer-line blanketing 18 p3227 A66-33762
 Atmospheric models, comparing Chamberlain evaporative and solar breeze models, Opik and Singer evaporative model and Parker solar wind model 19 p3465 A66-36605
 Brightness curves used to determine geometrical and physical parameters of eclipsing binary systems containing component with extended spherical atmosphere 20 p3647 A66-37031
 Molecular hydrogen structure, considering planetary and stellar atmospheres and interstellar space 21 p3815 A66-39487
 Intrinsic rotation of Orion B stars with weak He lines, discussing color-magnitude diagram 23 p4130 A66-41815

STELLAR DOPPLER SHIFT
 Doppler effect in quasar red-shifts and theoretical expected number of blue-shifts and red-shifts of ejected sources 21 p3814 A66-39212

STELLAR EVOLUTION
SA GALACTIC EVOLUTION
SA HERTZSPRUNG-RUSSELL DIAGRAM
 Gravitation viewed as source of universal energy produced by condensation of Sun from rarefied nebula to dense mass 01 p0135 A66-10296
 Dimensions, form and structure of entire known universe, examining discontinuous emission of energy from stars as they cool 01 p0135 A66-10299
 Properties of dense matter in nuclear statistical equilibrium analyzed at high densities and temperatures in connection with stellar evolution 04 p0549 A66-14372
 Kinematics of collapse and discussion of observable properties of baryons and collapsing stars 05 p0757 A66-14524
 Chemical nature and origin of solid particles formed in primordial solar nebula, examining growth mechanism based on screw dislocations present in preplanetary nebula 05 p0767 A66-15753
 Stellar evolutionary phases from gravitational contraction to exhaustion of nuclear fuel 05 p0768 A66-15762
 Interstellar obscuration of starlight suggests that vast quantities of dust spread thinly throughout galaxy differ in composition 07 p1132 A66-17254
 Advanced stages in evolution of star of five solar masses, examining hydrogen exhaustion, helium burning, carbon flash and mass loss 07 p1134 A66-17632
 Three Sun-mass star evolution from main sequence to helium exhaustion in core, noting chronology of process 08 p1288 A66-18778
 Solar magnetic field may have originated during process of Sun formation from galactic magnetic field which pervaded interstellar gas from which Sun condensed 08 p1292 A66-19261
 Computation of nuclear energy generation rate during stellar evolution depends on

cross sections of causative nuclear events 09 p1448 A66-20092
Laminar circulation and thermal equilibrium in stars generated by nonspherical perturbations 09 p1448 A66-20096
Stellar evolution and evolutionary sequences, use of high speed computer methods and application to age determination of stars 09 p1448 A66-20098
Milky Way composition and light radiation characteristics, outlining definitions, basic relations, star categories, color diagrams, etc 09 p1454 A66-20288
Stellar evolution for star of 30 solar masses during helium ignition, depletion and exhaustion 09 p1455 A66-20406
Origin of binary system by splitting of single star into two components due to rotational instability during contraction of star 09 p1455 A66-20407
Evolution of 5 solar masses star model from main sequence through core helium burning compared to 3 solar masses model, noting Hertzsprung-Russell diagram 11 p1772 A66-22780
Evolution of 9 solar masses stellar model of population I initial composition from main sequence through core helium burning 11 p1773 A66-22781
Evolution of 15 solar masses star from main sequence through helium core burning, comparing with evolution of less massive stars 11 p1773 A66-22782
Stellar evolution and origin of planetary nebulae 11 p1776 A66-23428
Mixed star evolution, mass loss and mass-luminosity-mean molecular weight relation 12 p1946 A66-23651
Nuclear reaction and beta decay rates for silicon 28, considering conditions for nuclear statistical equilibrium in stars 12 p1917 A66-24117
Model sequence calculations of early solar evolution extended for case of varying-G cosmology 12 p1949 A66-24118
Shock wave phenomena associated with ejection of stellar material during star lifetime 13 p2181 A66-25525
Relativistic astrophysics covering evolution of moderate to supermassive stars, radiation and gravitational field and stellar collapse 14 p2385 A66-27948
Galactic evolutionary patterns in neighborhood of solar system, assuming rate of star formation depends on time parametrically 15 p2594 A66-28985
Cosmic neutrino production and stellar evolution, prospects of observational neutrino astronomy as branch of cosmic ray physics 15 p2589 A66-29589
Element creating processes in interior of stars discussing combustion of carbon hydrogen, neon, neutron absorption, etc 16 p2796 A66-30271
Book on methods in computational physics including numerical simulation of Earth atmosphere, computation of propeller design and stellar evolution, etc 16 p2735 A66-30942
Theory of relativity, discussing Einstein theory of gravitation, evolution of stars, equations of motion, etc 16 p2748 A66-31267
Stellar formation rate in young clusters according to simultaneous formation hypothesis and continuous formation hypothesis 18 p3229 A66-34143
Horizontal branch characteristics correlation with observed metal abundance, reexamining stellar survival in helium flash without mixing 18 p3229 A66-34144
Evolutionary paths of several double energy-source models compared with horizontal branch in metal-weak Population II clusters to obtain stellar structure and mass for best fit 18 p3229 A66-34145
Solar evolution from zero-age main sequence studied under assumption of time-dependent G and given by flat-space solution of Brans-Dicke theory 18 p3229 A66-34146
X-ray emission from Scorpio X-1, discussing origin of extar and possible role in stellar evolution 18 p3166 A66-34158
Interior temperature of Sun determined, using high and low threshold solar neutrino detectors 18 p3238 A66-35218
Nuclear processes of stellar evolution resulting in neutrino

emissions 19 p3453 A66-36085
Stellar evolution - International Conference, Goddard Institute for Space Studies, New York, November 1963 19 p3466 A66-36788
Analytic models of stellar evolution, describing homogeneous and inhomogeneous stages, energy conservation and transport radiative and convective transfer mechanisms, etc 19 p3467 A66-36789
Neutrino processes in stellar evolution, discussing pair annihilation, plasma, photoneutrino, URCA, bremsstrahlung, photo-beta, photon-photon and electron-electron bremsstrahlung processes 19 p3454 A66-36790
Gravitational contraction of stars of one solar mass examined, using Henyey method for calculating stellar evolutionary tracks 19 p3467 A66-36791
Stellar evolution of stars between 1 and 3 solar masses, noting nuclear reactions and chemical composition 19 p3467 A66-36792
Stellar evolution for high temperature, predominantly neutrino processes, noting breakdown of homology relation between density and temperature 19 p3467 A66-36795
Astronomical techniques on occurrence and nature of planets outside solar system 20 p3656 A66-38027
Arguments inferring that all population II red giant stars become planetary nebulae 20 p3656 A66-38050
Monte Carlo experiments on cometary origin of meteorites and asteroids in solar system and random orbits of stray bodies 21 p3812 A66-38825
Star formation and gravitational instability in nonrotating medium permeated by strong magnetic field 23 p4125 A66-41012
Thermal instabilities role in star formation, discussing intercloud medium, magnetic pressure and gravitational collapse 23 p4125 A66-41062
Book on natural evolution including origins of universe, stellar and planetary evolution, beginnings of life on Earth and development of intelligence and technical civilizations among galactic communities 24 p4163 A66-42347
Plasma neutrino process of Adams, Ruderman and Woo dependent on direct electron-neutrino interaction and connected with stellar evolution 24 p4279 A66-42835
STELLAR FIELD
Directional accuracy of chords and angles in geocentric equatorial coordinate system in stellar triangulation 12 p1867 A66-23515
Density and velocity distributions of steady state stellar systems in Galaxy, examining relation between spiral structure and gas composition 15 p2594 A66-28984
Book on spherical astronomy including celestial coordinate systems, parallax, diurnal motion, precession and nutation, time measurement, etc 16 p2806 A66-31738
Directional accuracy of chords and angles in geocentric equatorial coordinate system in stellar triangulation 21 p3732 A66-38659
STELLAR INERTIAL GUIDANCE
Automatic Astro Tracker as part of long-range aircraft navigation complex heading reference system 07 p1075 A66-17786
Stellar inertial guidance system composed of integral inertial platform-stellar sensor combination, airborne digital computer and power supply for Polaris missile 18 p3132 A66-34042
Preflight and in-flight testing of stellar sensor subsystem for guidance of ballistic missiles 18 p3111 A66-34046
Two-star implementation by stellar inertial guidance system 18 p3133 A66-34047
Special missile flight test equipment, detailing velocity accumulator, elevation programmer, telemetry system, junction box and illumination measurement 18 p3111 A66-34049
STELLAR LUMINOSITY
Life on small extinct stars and large dark planets 01 p0133 A66-10177
Background radiation density in isotropic homogeneous universe, discussing Olbers paradox 04 p0574 A66-14017
Neutron star cooling tested by photon flux measurements indicative of effective temperature change 05 p0763 A66-15286
Periodic variations in luminosity of quasi-

stellar radio sources related to fluctuation of main parameters of magnetic-bremsstrahlung mechanism 07 p1134 A66-17620
UV color and flux at 2200 and 2600 angstroms measured for A and B stars using rocketborne photometers 10 p1602 A66-21099
Stellar brightness measurements in far UV using rocket-mounted mirror telescopes and ion chambers, indicating stellar brightness lower than predicted by theory 10 p1602 A66-21099
Absolute magnitude of magnetic star HD 1732 11 p1776 A66-23421
Absolute stellar magnitude of meteor determined from duration of meteor radio echoes of unstable type 12 p1945 A66-23512
Time dilatation of luminosity fluctuation of massive stellar object, noting red shift 13 p2184 A66-25622
Observational needs for galactic research discussing stellar luminosity, interstellar absorption, etc 15 p2594 A66-28984
Visible spectrum of radiation release from type I supernova 16 p2796 A66-30161
Red shifts of quasi-stellar objects and relation to radio and optical magnitudes concluding that red shifts have no relation to distance 18 p3235 A66-34711
Stars and galaxies in field of 18 southern radio sources observed in Australia 18 p3237 A66-35084
Absolute stellar magnitude of meteor determined from duration of meteor radio echoes of unstable type 20 p3646 A66-37022
Nonlinear calculation methods for modeling representing W virginis, noting rapid amplitude growth and luminosity-to-mass ratio 20 p3650 A66-37338
Computation method used in pulsation of Lyrae models extended to models of Cepheid variables, noting instability of appropriate period, mass size, luminosity and velocity curves 20 p3650 A66-37338
Light variations of flare and T Tauri stars due to surface electromagnetic activity connected with turbulence in convective zone and rotation, using Hertzsprung-Russell diagram 20 p3652 A66-37610
Location of instability strip and dependence on mass, luminosity and composition of RR Lyrae stars 20 p3652 A66-37612
STELLAR MAGNETIC FIELD
Magnetoturbulent kinetic energy instrumental in removal of general relativistic instability of supermassive stars 01 p0138 A66-10882
Stellar magnetic field attributed to role of field in producing hydrostatic equilibrium when general-relativistic effects are included in equations of MHD 02 p0290 A66-11705
Origin of stellar magnetic fields, examining surface distortions on star due to magnetic field 09 p1448 A66-20095
Data and theories on solar and stellar magnetic fields, including techniques for analyzing extraterrestrial magnetic phenomena 12 p1953 A66-25032
Dynamic dissipation of magnetic field, examining mechanism by which magnetic energy is converted directly into fast particle energy 15 p2576 A66-29132
Equilibrium structure of magnetic fields in stars analyzed, employing perturbation theory for assumed polytropic configuration 17 p3005 A66-33001
Star formation and gravitational instability in nonrotating medium permeated by strong magnetic field 23 p4125 A66-41012
STELLAR MASS
Evolution of 9 solar masses stellar model of population I initial composition from main sequence through core helium burning 11 p1773 A66-22781
Nonlinear calculations of intermediate amplitude to analyze stability of pulsating stars of varying composition, mass, luminosity, etc, using numerical integration of motion equations 14 p2385 A66-28116
Dynamic stability of supermassive stars with nuclear-energy generation, noting rotation and limiting mass for hydrogen burning 14 p2385 A66-28117
Angular momentum distribution in

- planetary systems computed, based on mass of star and period of revolution of planet-like companion 18 p3236 A66-34891
- Nonlinear calculation methods for model representing W virginis, noting rapid amplitude growth and luminosity-to-mass ratio 20 p3650 A66-37338
- Computation method used in pulsation of Lyrae models extended to models of Cepheid variables, noting instability of appropriate period, mass size, luminosity and velocity curves 20 p3650 A66-37339
- Location of instability strip and dependence on mass, luminosity and composition of RR Lyrae stars 20 p3652 A66-37612
- Pulsation properties of stellar models representing RR Lyrae stars obtained, using adiabatic and nonadiabatic linearized pulsation equations 20 p3652 A66-37613
- STELLAR MASS EJECTION**
- Growth and destruction of ice mantles on interstellar graphite grains by sputtering, thermal evaporation and cloud collisions 05 p0765 A66-15845
- Shock wave phenomena associated with ejection of stellar material during star lifetime 13 p2181 A66-25525
- Rapid mass ejection from highly evolved stars as explanation for observation of high abundance of galactic helium gas 15 p2599 A66-29680
- Direction of collapsing star determined by detecting generated neutrino front by time delay method 18 p3223 A66-35217
- STELLAR MOTION**
- Stellar stability in region of pure hydrostatic equilibrium and local instabilities arising from superadiabatic temperature gradients or differential rotation 09 p1448 A66-20097
- Solar motion and velocity dispersions determined together with results on distribution of peculiar motion of stars 11 p1766 A66-22255
- Statistical determination of stellar motion compounded of radial velocity in line of sight and transverse velocity perpendicular to it, considering galactic orbits of nearby stars, velocity ellipsoids, etc 11 p1766 A66-22256
- Data on stars having space velocity greater than 65 km/sec 11 p1767 A66-22261
- Interplanetary midcourse navigation by measuring differential stellar aberration, using Space Velocity Meter /SVM/ 13 p2123 A66-25255
- New solar motion with respect to local group and exterior galaxies 13 p2182 A66-25576
- Formula derivation for stellar motion and analysis of stellar spatial distribution using Kapteyn scheme and Schalen-Lindblad method 15 p2593 A66-28981
- Simulator for star motion in proximity of Sun consisting of sphere upon whose surface stars are uniformly distributed 22 p3977 A66-40001
- STELLAR OCCULTATION**
- Geodetic determinations from photoelectric observations of occultation of stars by satellites 03 p0428 A66-13030
- Diameter and density of Pluto determined by observation of occultations of faint stars 12 p1945 A66-23505
- Irregularity of galactic magnetic field structure in vicinity of Sun indicated by starlight polarization, interstellar cloud motion and Milky Way photography 15 p2595 A66-29130
- Diameter and density of Pluto determined by observation of occultations of faint stars 20 p3646 A66-37018
- Simultaneous observation of two trial distances of stars, stellar occultation, etc, for determining position of space vehicle during mission from Earth to Moon 20 p3597 A66-38014
- Stellar extinction measurements made in Gemini IX flight, determining existence and location of Link layer from airglow study 24 p4280 A66-43026
- STELLAR RADIATION**
- Stellar-diurnal variation of cosmic rays during period 1958 through 1960, on basis of meson-activity data recorder by two crossed counter telescopes 02 p0281 A66-11335
- Gravitational effects of photons or neutrinos radiated from point mass as accurately treated by Newtonian approximation 02 p0283 A66-11867
- Observation of plane interstellar polarization of 22 stars indicates wavelength dependence of position angles and polarization 02 p0292 A66-12188
- Space astronomy, considering UV spectra of Jupiter and Venus, stellar energy distributions, interstellar scattering and X-ray observations 05 p0768 A66-15761
- Gravitational emission from double star systems 06 p0955 A66-16779
- Longitudinal and transverse emissivities of neutrino-pairs from stellar plasma 07 p1131 A66-18237
- Interstellar extinction in UV by measurement of stellar energy distributions between 3000 and 1200 angstroms 08 p1288 A66-18787
- Nonresonant nuclear reaction calculation method for stellar temperature 09 p1456 A66-20413
- Probable relation between OB associations, runaway stars, supernovas and X-ray sources 09 p1443 A66-20469
- Discrepancy between theoretical calculation and measurement of far UV radiation from hot stars 10 p1598 A66-21094
- Nonrotating star with spherical symmetry emitting electromagnetic radiation analyzed, using gravitational field analogy 13 p2072 A66-25417
- Radiative cooling of stellar material and application to solar flares 13 p2174 A66-25617
- Cooling of stellar material by thermal conduction under solar atmospheric conditions in presence and absence of magnetic field 13 p2174 A66-25618
- Positional coincidence of X-ray source Sco X-3 with extended H II emission region which may be remnant of supernova explosion 15 p2591 A66-29681
- Optical observations of brightest X-ray source in Scorpius 17 p2992 A66-31917
- Plane interstellar polarization dependence on wavelength observed in 18 stars with UV and IR filter 18 p3235 A66-34657
- Nuclear reactions in stellar interiors, calculating probabilities of various proton-proton reactions and obtaining solar neutrino fluxes at Earth for point source solar model 18 p3223 A66-35213
- Gravitational emission from double star systems 19 p3456 A66-35376
- Stellar nuclear reactions and evaluation of flux and energy spectrum of solar neutrinos 24 p4270 A66-42929
- STELLAR ROTATION**
- Rotating polytrope structure analyzed, using approximation technique of integrating outwards from center and inward from surface 04 p0578 A66-14018
- Stellar diurnal variation determined during reduced solar activity from crossed-telescope and neutron monitor data 05 p0754 A66-15396
- Angular momenta associated with orbital motion of close binaries is not due to localization of galactic rotation of prestellar media 09 p1456 A66-20408
- Turbulent friction tensor derived for anisotropic molecular velocity distribution, considering application to stellar rotation physics 11 p1737 A66-22363
- Stellar rotation and position of metallic line stars in color magnitude diagram 20 p3649 A66-37328
- Neutron star rotational flattening after formation in supernova implosion 21 p3810 A66-38467
- Close binary systems involving transfer of angular momentum, considering circulatory patterns of gaseous flow and axial rotation of component stars 21 p3815 A66-39483
- Intrinsic rotation of Orion B stars with weak He lines, discussing color-magnitude diagram 23 p4130 A66-41815
- STELLAR SPECTROPHOTOMETRY**
- Five-color photoelectric photometry used to obtain more accurate apparent magnitudes of 1300 naked-eye stars 05 p0768 A66-15771
- Electro-optical attitude and velocity sensors for interplanetary navigation and stellar aberration and Doppler shift measurements 08 p1252 A66-19502
- Stellar brightness measurements in far UV using rocket-mounted mirror telescopes and ion chambers, indicating stellar brightness lower than predicted by theory 10 p1602 A66-21097
- Interstellar polarization measurement for eight stars 13 p2185 A66-25811
- UV rocket spectrometer to measure stellar spectra in 1100 to 4000 angstrom range 14 p2293 A66-27327
- Astronomical satellite application to sky mapping, stellar photometry, interstellar grains and gas study and statistical stellar sampling 15 p2594 A66-28987
- Collected reports on new development of telescopic, photometric, spectrometric, meteorological, interferometric and detection equipment at various solar and stellar observatories 17 p2923 A66-32020
- Ten micron stellar flux measurements of 42 stars with 200 inch Hale telescope and predictions of model atmospheres and line-blanketing theory 17 p3000 A66-32268
- Spectral-energy distributions measurement for southern stars by comparison with northern spectrophotometric-standard stars 18 p3229 A66-34147
- Multicolor photometric work on bright stars by Lunar and Planetary Laboratory 21 p3811 A66-38523
- IR astronomical measurements for computation of bolometric corrections and effective temperatures of stars of various spectral types 21 p3815 A66-39486
- Spectroscopic evidence on helium abundance of stars in galactic halo 21 p3817 A66-39565
- Spectrum of large sunspot moving across solar disk for various positions with respect to central medium 23 p4127 A66-41079
- Tabulation of photoelectric spectrophotometric observations of eclipsing system RX Arietis 24 p4273 A66-42206
- Tabulation of photoelectric spectrophotometric observations of eclipsing system UV Leonis 24 p4273 A66-42207
- STELLAR SPECTRUM**
- Sky survey in two IR spectral ranges, obtaining unbiased census of objects emitting in atmospheric window 04 p0575 A66-13399
- Planckian black body approximation used to simulate and assign star magnitudes for nonhuman photodetector, considering relationship between star brightness and stellar spectra 07 p1003 A66-18332
- Observed line spectra of nine quasi-stellar radio sources representation for single temperature, electron density and ionization level 09 p1456 A66-20416
- Distribution patterns of common stars in galactic plane according to spectral type, noting density gradients, main sequence, Hertzsprung-Russell diagram, etc 11 p1766 A66-22254
- Data on stars having space velocity greater than 65 km/sec 11 p1767 A66-22261
- IR spectral study of water deficiency in S stars and water abundance variation with Mira phase 11 p1771 A66-22771
- Properties of stellar chromospheres 13 p2177 A66-25134
- Vanadium oxide bands in near-IR spectra of three Mira stars 13 p2182 A66-25578
- Lithium/calcium ratio of five F giant and six G giant stars 13 p2183 A66-25611
- Night sky darkness explained as limitation of background radiation by various factors in static, steady state and evolving universes 13 p2075 A66-26602
- Stellar spectroscopy in UV region using f/2 Schmidt camera onboard Aerobee rockets 14 p2385 A66-28114
- Flare stars as sources of cosmic X-rays, spectra contain 4686-angstrom line of doubly ionized helium indicating that atmospheres contain either ionizing radiation or electrons 22 p3972 A66-39707
- Line strengths variation in spectra of HD 124224 and HD 19832 analyzed, establishing anticorrelation of He I variations with variations in temperature 23 p4130 A66-41808
- Exponential spectrum of Scorpius XR-1 to 50 kev observed by balloon 23 p4124 A66-41819
- UV photography quantitative analysis of stellar spectra from Gemini X spacecraft 24 p4273 A66-42209
- Coordinates, flux densities and spectral

indices of various radio sources believed to be extragalactic 24 p4273 A66-42416

STELLAR STRUCTURE

Nucleosynthesis in stars including light element reactions, helium and carbon burning, neutrino processes, etc 05 p0719 A66-15764

Three Sun-mass star evolution from main sequence to helium exhaustion in core, noting chronology of process 08 p1288 A66-18778

Text on sources of stellar energy, internal structure of stars and evolution of stars 09 p1447 A66-20090

Abundance distribution of nuclear species in universe, examining nuclear reactions in stellar interiors as possible 09 p1447 A66-20091

Historical summary of nova and supernova outbursts, considering resonance theory of novae and possibility that supernovae are due to chain reaction 09 p1448 A66-20093

Classification and analysis of supernova outbursts in terms of dimensionless morphology, phenomenological morphology and absolute morphology 09 p1448 A66-20094

Book on galactic structure including distribution of common stars, solar motion, interstellar hydrogen distribution, galactic radio emission, planetary nebulae, etc 11 p1766 A66-22253

Optical interstellar absorption lines and galactic structure, noting observational data and comparison with 21 cm studies 11 p1767 A66-22258

Stellar dynamics of Galactic system, discussing relations between density and velocity distributions of stars 11 p1767 A66-22262

Gravitational theory for dynamical basis of quasi-stationary spiral structure of stars 14 p2381 A66-27500

Galactic structure observational aspects - NATO International Summer Course, Athens September 1964 15 p2593 A66-28980

Radio astronomy measurement of galactic structure, using thermal and nonthermal radiation and neutral hydrogen line emission 15 p2594 A66-28983

Integrated flux distributions in neutron capture in stars 17 p2997 A66-31924

Upper limit on fractional binding energy of nonrotating magnetoturbulent supermassive star and for mass which can reach radiative equilibrium 18 p3229 A66-34141

Semiconvective zone in very massive stars during hydrogen burning, noting factors leading to instability 18 p3229 A66-34142

Horizontal branch characteristics correlation with observed metal abundance, reexamining stellar survival in helium flash without mixing 18 p3229 A66-34144

Evolutionary paths of several double energy-source models compared with horizontal branch in metal-weak Population II clusters to obtain stellar structure and mass for best fit 18 p3229 A66-34145

Contribution of rotating solar polytropes to perihelion advance of planet Mercury calculated as function of observable solar oblateness 18 p3233 A66-34571

Photometry, polarization, structural peculiarities and density distribution of solar corona 21 p3813 A66-39121

Radio galaxy structure, analyzing polarization characteristic of emission, wavelength dependence of brightness distribution, etc, using pencil-beam antennas, lunar occultations and interferometers 21 p3815 A66-39485

Neutron star structure analysis using composite state equation 22 p3976 A66-39804

Coordinates, flux densities and spectral indices of various radio sources believed to be extragalactic 24 p4273 A66-42416

STELLARATOR

Structure of magnetic field of toroidal stellarator with two-helix field 10 p1570 A66-21995

Perturbation of particle motion in stellarator 14 p2347 A66-28307

Excitation and thermalization of plasma oscillations in stellarator 16 p2758 A66-30292

Semi-automatic data system for Model C stellarator, noting oscilloscope/camera modifications 16 p2706 A66-30829

Nonresonant coupling of, RF power to plasma during ion cyclotron resonance

heating in Model C 17 p2962 A66-31822

Structure of magnetic field of toroidal stellarator with two-helix field 18 p3150 A66-34972

Power balance measurements and particle loss rate of ohmically heated helium and hydrogen discharges in C stellarator 19 p3428 A66-36578

Plasma confinement and loss rate in low-density C stellarator discharges under zero ohmic heating current 19 p3428 A66-36579

Loss rate comparison for alkali plasma produced by contact ionization in stellarator and toroidal device with minimum mean-B properties 19 p3428 A66-36581

Plasma injection and confinement in stellarator magnetic trap with multipolar helical field, noting magnetic surfaces and perturbation effect 19 p3429 A66-36582

Ion cyclotron resonance heating applied to C stellarator plasma formed by ohmic heating, noting Alfvén wave generation by Stix coil 19 p3432 A66-36594

Potential difference and electric polarization field measurement in plasma moving in combined toroidal and helical magnetic field of stellarator type 21 p3789 A66-39062

STEP FUNCTION

Sinusoidal step response of L-band waveguide to step-modulated RF excitation 03 p0332 A66-12432

Temperature dependent thermal conductivity, considering one-dimensional plate problem with linearly varying heat conduction and constant-volumetric specific heat [ASME PAPER 65-WA/HT-29] 05 p0793 A66-15675

Nonsymmetric strain response of simply-supported cylindrical shells to localized impact loads expressed as step, ramp and sawtooth functions and rectangular impulse 12 p1972 A66-25007

Step response of saturating feedback amplifier with single time constant, noting design graph for amplifier gain 16 p2660 A66-30580

Optimization of linear control systems when placing step limitations on control, using functional analysis 16 p2668 A66-30751

Interference levels conducted and radiated from signal wires carrying pulses or step functions 18 p3069 A66-34169

Step function distribution of heat transfer for laminar supersonic boundary layer described as function of decay factor 18 p3261 A66-34363

Device for frequency translations in microwave range employing latching ferrite phase shifter and digital switching driver to obtain multiple step approximation 19 p3314 A66-35520

Efficient and accurate orbit prediction for very long periods of time using analytic perturbation technique in conjunction with multistep methods 19 p3462 A66-35899

[AIAA PAPER 65-692] 19 p3462 A66-35899

Space factor of linear array with isotropic sources determined, using illumination function and convolution theorem 19 p3321 A66-36414

Time-domain and frequency domain statistics for random step-wise sampled data systems 20 p3535 A66-36847

Q modulation of laser theory and application, presenting giant pulse production, phenomenological theory, output response to step function change, electro-optic and mechanical modulators 20 p3576 A66-36971

STEREOCHEMISTRY

Stereospecificity in hydrogen transfer reaction characteristic of 6-keto steroids studied by mass spectrometry 03 p0330 A66-13086

Mass spectrometry in structural and stereochemical problems of 16 Amariyllidaceae alkaloids 03 p0330 A66-13087

Mass spectrometric fragmentation behavior of N-n-propyl and N-n-butyl pyrrolidone and N-alkyl succinimides subsequent to electron impact 11 p1651 A66-23412

Alpha-chloro alkanoyl valine methyl esters analyzed, finding that diastereoisomeric pairs separation by gas-liquid chromatography can assess steric conditions

around amide bond 17 p2871 A66-32933

Polymer molecular structure, discussing concentration of primary and secondary hydroxyl groups, use of NMR to establish stereo and positional isomeric configuration, etc 17 p2871 A66-33009

GLC-mass spectrometric stereoisomer discrimination as means of detecting biological processes 18 p3059 A66-34372

Gas liquid chromatography resolution of racemic hydroxy and beta-mercapto-amine acids involving suitable derivation of functional group 20 p3510 A66-37806

Optical resolution and absolute configuration of trans-beta-phenylglycidic acid 21 p3702 A66-38448

Stereoselective synthesis of optically active amino acids from menthyl esters and alpha-keto acids 23 p4032 A66-41372

STEREOSCOPIC PHOTOGRAPHY

Reseau techniques application to cartographic photography to improve analytical procedures, reduce mensuration errors and aid in automating systematic corrections 02 p0228 A66-11382

Stereocamera for determining spatial orientation of cosmic particle tracks in large diffusion chamber 03 p0368 A66-12503

Stereometograph for photographing relief and contours in compilation of topographical charts from vertical aerial photographs 04 p0519 A66-13663

Spatial resection resolved with respect to axes for various stereometric techniques 04 p0524 A66-14396

Stereo pairs taken at one-and-two-minute intervals in photogrammetry of initiation of cumulus clouds over mountainous terrain 07 p1062 A66-17371

Lunar surface shape and altitude determination via stereophotogrammetric processing of telescopic Moon photographs 07 p1036 A66-18482

Stereoscopic camera system design for use on lunar orbiting vehicle including illumination, lunar albedo, resolution and signal to noise ratio 08 p1222 A66-18734

Large-scale aerial photographs applied to cartography by taking pictures of same area at varying scales 10 p1534 A66-21132

Stereoscopic mapping on revolving base, describing process where size of scale is independent of length of half-base 10 p1534 A66-21282

High-speed stereoscopic photography development, noting application of frequency wobbling method to photography of explosions 10 p1534 A66-21330

Photography providing complete illusion of reality of object represented, noting holographic and interference techniques 10 p1534 A66-21331

Mechanical swivel arm that can be used with several types of reflecting stereoscopes for inspecting aerial photographs 11 p1705 A66-22661

Hologram construction for real three-dimensional scene without visual anomalies, noting technique and results 15 p2499 A66-28979

Geometric analysis of recordings by IR scanners, emphasizing significance of stereo imagery 24 p4210 A66-42289

STEREOSCOPIC VISION

SA DEPTH PERCEPTION

Visual contours in homogeneous space, describing Julesz figure application to problems of stereoscopic vision 06 p0811 A66-16348

Simulated 3-D display techniques, considering application to television, air-traffic control, scene synthesis, radar target data and signal analysis 11 p1707 A66-22960

Schoen hypothesis concerning image arrival time at cortex, depth values, retinal input, stereopsis, etc 17 p2862 A66-33089

Frog retina layered model, stereoscopic system and decision/control system in connection with robot data reduction in Voyager missions 24 p4168 A66-43081

STERILIZATION

SA CHEMICAL STERILIZATION

SA PURIFICATION

SA SPACECRAFT STERILIZATION

Aerospace sterility control officer and group to verify and certify spacecraft sterility 16 p2642 A66-30494

ROID

CHOLESTEROL
CORTICOSTEROID
Isolation and identification of biogenic
granules and pentacyclic triterpanes in
Eocene shale 12 p1805 A66-23539
Correlation of adrenal steroids and alpha

shows excitation threshold low and light
emission highly directional 06 p0893 A66-17026
Oscillation mode control in p-n junction
lasers for current density reduction for
stimulated emission 07 p1041 A66-17329
Stimulated emission in GaSb diodes made
from crystals prepared by Czochralski
method 07 p1096 A66-17336
Stimulated state, stable, lasting and
reproducible, in electroluminescent cells of
sublimated zinc sulfide film obtained upon
passage of increasing DC voltage through
them at 77 degrees K 07 p1099 A66-17914
Absorption and spontaneous and stimulated
emission for homogeneous isotropic
nonferromagnetic Maxwellian media at
rest 07 p1081 A66-18037
Transfer equations applicability to
stimulated radiation 09 p1401 A66-19943
Excitation of neon levels in hollow-cathode
discharge in neon-hydrogen mixture as
result possibly from recombination processes
involving dissociation and triple
collisions 10 p1558 A66-22023
Gas spectroscopy of laser-induced
stimulated Brillouin effect in high pressure
oxygen 11 p1715 A66-23432
Raman laser materials selection,
emphasizing frequency shifts and excitation
power threshold 11 p1721 A66-23477
Hole and electron smearing and p-type
absorption influence on threshold
current 11 p1715 A66-23478
Angular distribution of stimulated Raman
radiation, discussing axial and off-axial
Stokes and surface radiation 13 p2090 A66-25189
mechanism 13 p2090 A66-25189
IR laser radiation with power of 5.7 watts
in vicinity of 10.69 mu in sealed tube
containing pure carbon dioxide excited by
AC or DC current 13 p2131 A66-25410
Angular emission properties of stimulated
Raman radiation from liquids, noting two
classes of radiation 13 p2097 A66-26159
Interaction between stimulated Brillouin
and Raman scattering in carbon sulfide,
using optical resonator and laser
beam 13 p2097 A66-26162
Stimulated Brillouin scattering in
anisotropic media, showing excitation and
propagation of stimulated phonons at radio
frequencies 13 p2097 A66-26163
Multiple stimulated Brillouin emission
exhibited by liquids exposed to pulsed ruby
laser, noting scattering events, Stokes
orders identification and iteration
mechanism 13 p2097 A66-26164
Perturbation theory analysis of stimulated
phonon-photon double-quantum emission in
multilevel spin systems 13 p2099 A66-26178
Stimulated emission from electron beam
excitation of tellurium and pure and n-type
doped indium antimonide in semiconductor
lasers 13 p2099 A66-26179
IR maser action on vibrational transitions
of thermally pumped polyatomic
molecules 13 p2101 A66-26203
Stimulated emission spectroscopy of
hydrogen, nitrogen, oxygen and deuterium
diatomic gases in 0.8 to 8 micron
region 13 p2102 A66-26205
Superradiance in n-type gallium arsenide at
room temperature excited by electron
beam 14 p2306 A66-27028
Laser oscillator study of coherent
stimulated emission of IR transitions in rare

gases 14 p2308 A66-27336
Laser-generation-type luminescence CdS-
CdSe crystals exposed to double photon
excitation from ruby laser 14 p2308 A66-27647
Stimulated radiation from zinc diffusion p-
n junctions in gallium antimonide
crystals 14 p2368 A66-28253
Stimulated Raman effect in acetone and
acetone-carbon disulfide mixtures, noting
similarity of Stokes radiation pattern to
Raman effect 15 p2513 A66-28881
Coupling efficiency evaluation in light
emitting diodes 15 p2514 A66-29032
Stimulated emission from samarium-doped
calcium fluoride crystal excited by ruby
laser 15 p2516 A66-29358
Length dependent threshold data for
stimulated Raman emission in liquids, noting
correlation between laser beam self-focusing
and onset of Raman emission 16 p2716 A66-30157
Intensities of optically thick lines emitted
by hydrogen-like ions in steady state plasma
for various electron temperatures and
densities 16 p2758 A66-30276
Excitation of neon levels in hollow-cathode
discharge in neon-hydrogen mixture as
result possibly from recombination processes
involving dissociation and triple
collisions 16 p2753 A66-30842
Multiphoton plasma production and
stimulated recombination radiation in lead
telluride, considering electron-hole pair
production rate 17 p2975 A66-31884
Effect of anomalous dispersion on
stimulated emission spectrum of doped
cadmium fluoride crystals 17 p2977 A66-32317
InP spontaneous and simulated emission
spectra, noting separation of lines by
longitudinal optical phonon energy,
threshold current magnitude, etc 17 p2886 A66-32407
Book on laser theory based on kinetic
equations with emphasis on emission from
luminescent center transitions,
semiconductor junctions and Raman
scattering 17 p2934 A66-32558
Stimulated state, stable, lasting and
reproducible, in electroluminescent cells of
sublimated zinc sulfide film obtained upon
passage of increasing DC voltage through
them at 77 degrees K 18 p3155 A66-34174
Semiconductor light emission mechanisms
examined including wavelength emitted,
width of ray emitted and efficiency of
emission 19 p3445 A66-36263
Stimulated emission from samarium-doped
calcium fluoride crystal excited by ruby
laser 20 p3577 A66-37362
Laser emission interferograms obtained
with Fabry-Perot cross-grating
interferometer in submillimeter wavelength
range 20 p3559 A66-37546
Submillimeter laser emission from ICN
noting interferograms 20 p3578 A66-37547
Stimulated emission spectrum in axial-
mode model of plane resonator in stationary
generation regime 20 p3580 A66-38127
Stimulated emission of radiation in
semiconductors, calculating dependence on
temperature and impurity concentration,
using Kane model with Gaussian band tail
for density of states and optical
model 21 p3795 A66-38547
Direction, frequency and polarization of
radio emission from galactic OH determined
by hypothesis of stimulated
emission 21 p3814 A66-39213
Stimulated emission, absorption spectra
and luminescence of neodymium-activated
YAG crystals in pulsed laser 21 p3748 A66-39306
Second harmonic generation in laser
crystals by Gaussian beams of finite
aperture 22 p3929 A66-39657
1.60 micron stimulated and spontaneous
emissions from epitaxial single crystals in
quasi-binary III-V compound semiconductor
diodes of injection lasers at 77 degrees
K 22 p3930 A66-39750
Powerful laser employing induced two-
quanta luminescence 22 p3930 A66-39771
Spectral and time-dependent characteristics
of stimulated radiation from ruby pulse
laser, using Fabry-Perot etalon in fine-
structure observation 22 p3931 A66-39823
Stimulated emission of polymethine dyes

upon pumping with Q-switched laser, noting wavelength parameters and oscillation 24 p4219 A66-42247

Molecular oscillation difference frequency generation in IR spectrum by beating together laser and laser-stimulated Raman emission 24 p4221 A66-42544

Transverse gain and spontaneous and stimulated emission at 8466 angstroms in GaAs structures 24 p4222 A66-42561

Stimulated emission prevailing over absorption in high harmonics band of electron moving in magnetic field 24 p4226 A66-43054

STIMULATION

S PHOTIC STIMULATION

S SENSORY STIMULATION

STIMULUS

S AUDITORY STIMULUS

S CALORIC STIMULUS

S ELECTRIC STIMULUS

S VISUAL STIMULUS

STOERMER METHOD

Temporary capture of charged particles in static magnetic bottle, based on resonant perturbations and Stoermer neck 16 p2760 A66-30588

STOICHIOMETRY

Stoichiometric thin films of AlSb prepared by coevaporation of elements onto glass substrates held at 550 degrees C 02 p0270 A66-11436

Methane-rich premixed flames of perchloric acid analysis noting burning velocities, temperatures and burnt gas composition required for stoichiometric mixtures 02 p0304 A66-12018

Stoichiometry of reaction of cyanine dye with diverse polyionic macromolecules 06 p0821 A66-16157

Fuel drop ignition, discussing parametric extension of quasi-flame surface theory to higher reaction orders and arbitrary stoichiometric ratios [AIAA PAPER 66-70] 06 p0970 A66-16415

Deviations from stoichiometry in indium telluride, finding that no impurity conduction occurs in this semiconductor 07 p1099 A66-17916

Superconducting transition temperature of stoichiometric lanthanum sulfide 07 p1108 A66-18437

Tungsten diboride preparation and structure 08 p1235 A66-18636

Affinity and stoichiometry of binding of 1-anilino-8-naphthalene sulfonate /ANS/ to apomyoglobin and apohemoglobin 08 p1177 A66-18701

Coordination of substituted pyridine N-oxides with oxovanadium /IV/ cations, noting stoichiometric variations with changes 09 p1339 A66-20878

Crystallization of certain aluminosilicate and glosilicate glasses of stoichiometric composition, discussing anionic network 12 p1900 A66-24861

Rates and stoichiometry of reaction of aluminum hydride in tetrahydrofuran at zero degrees with selected organic compounds containing representative functional groups 13 p2018 A66-26500

Deviations from stoichiometry in indium telluride, finding that no impurity conduction occurs in this semiconductor 18 p3155 A66-34182

Temperature of fluorine-hydrogen flame from /3, 0/ band of FH vibration-rotation experimentally determined to be in agreement with theoretical figure of 3994 degrees K for stoichiometric mixture 24 p4295 A66-42992

STOKES-BELTRAMI EQUATION

SA VELOCITY POTENTIAL

Axially symmetric potentials represented as mean values in integral operators given for Stokes-Beltrami equations 01 p0058 A66-10505

STOKES LAW

Base flow and near wake problem at very low Reynolds numbers, using general solution of Stokes equation of motion for two-dimensional and axisymmetric flows 04 p0456 A66-14469

Base flow and near wake problem at very low Reynolds numbers, discussing influence of inertia terms by using Oseen approximation 04 p0456 A66-14470

Small particle detection capability of low-

gain helium-neon gas laser enhanced by use of Stokes settling law and layered sedimentation technique 05 p0692 A66-14583

Combustion process of isothermal quasi-stationary porous particle for Stokes streamline regime 08 p1321 A66-19773

Equations obtained from Hamiltonian for coupling, first Stokes line, first anti-Stokes line and coherent field for Raman laser 11 p1711 A66-22490

First-order boundary proximity effect on Stokes resistance of body, using integral equation approach 11 p1693 A66-23008

Two-dimensional Stokes flows for functions time-periodic with common frequency, noting analogy to oscillations of long cylinder in viscous fluid 12 p1867 A66-24963

Effect of fluctuating laser pump on stimulated Raman scattering, noting growth of coupled Stokes-anti-Stokes waves in presence of two-mode pump 13 p2096 A66-26158

Stokes problem solution for intensity of regularized gravity field around Earth and at surface in form of rapidly converging series 15 p2527 A66-28965

Beam trapping in cadmium sulfide noting threshold, trapping length, refractive index change and Stokes radiation 16 p2716 A66-30158

Numerical calculations for Stokes flow about deformed spheroids 17 p2905 A66-31931

Solution of Stokes equation for growing and dying vortices 17 p2907 A66-32413

Asymmetric shear flow of viscous fluid past flat plate, justifying constant pressure assumption and examining flow patterns at lower surface in plate proximity 20 p3547 A66-37978

STOKES PARAMETER

Polarization of light from glass laser doped with two percent positive trivalent neodymium measured with time resolution of less than microsecond 03 p0378 A66-13006

Stimulated Raman and Brillouin scattering for Stokes radiation parallel to laser beam in rectangular waveguide 05 p0694 A66-14901

Inverse stimulated Raman spectra during Stokes absorption in terms of stimulated emission of optical phonons 05 p0697 A66-15108

Coherency matrix expression of phenomenological Stokes four-vector describing intensity and polarization of electromagnetic wave 10 p1504 A66-21651

Stimulated Raman effect in acetone and acetone-carbon disulfide mixtures, noting similarity of Stokes radiation pattern to Raman effect 15 p2513 A66-28881

Stokes parameters measurement as function of frequency for anomalous polarized OH emission originating near thermal radio source W3 22 p3978 A66-40015

Photoelectric skylight perimeter for Stokes parameter measurements in plane polarized light 23 p4066 A66-41029

STOL AIRCRAFT

SA SUNRISE S-1600 AIRCRAFT

Handling stability and control research in development of STOL utility transport aircraft [AIAA PAPER 65-713] 01 p0013 A66-10950

Stability and control characteristics of STOL aircraft in low speed landing approach portion of flight regime [AIAA PAPER 65-715] 01 p0013 A66-10952

Breguet 941 STOL aircraft advantages over conventional commercial jet aircraft to solve requirements imposed on airport facilities 02 p0177 A66-11749

New STOL flying boat with deflected slipstream, boundary layer control and spray suppressor in flight test of 75 percent flying model [AIAA PAPER 65-755] 03 p0321 A66-13056

Improving STOL aircraft performance, examining Japanese experiments on modified SAAB Safir single-engined monoplane, experimental flying boat and lightweight turbojet engines [AIAA PAPER 65-771] 04 p0457 A66-13635

Organization of short-distance interurban transportation system based on STOL aircraft of Breguet type 05 p0611 A66-15194

STOL operations in city center, discussing metropolitan transportation problems 09 p1327 A66-20244

STOL for high speed aircraft, discussing

aerodynamic parameters, lift coefficient increase methods, etc 09 p1327 A66-20244

Lift-drag ratio, specific impulse, aspect ratio and weight of payload and power plant considered for STOL aircraft 10 p1483 A66-21515

STOL aircraft characteristics compared with VTOL aircraft and helicopter, noting airport layout 10 p1519 A66-21444

Breguet 941 STOL aircraft design a performance, noting maximum lift coefficient and single-shaft power plant 10 p1483 A66-21717

Handling stability and control research development of STOL utility transport aircraft [AIAA PAPER 65-713] 12 p1801 A66-24015

Lateral stability and control of STOL airplane at low speed 13 p1995 A66-26315

High-lift jet-pump boundary layer control system for STOL short haul S-16 transport 16 p2633 A66-31212

Spiral instability in STOL aircraft prevented by larger wing dihedral setting noting permissible dihedral levels at tests 16 p2634 A66-31313

Stability and control characteristics of STOL aircraft in low speed landing approach portion of flight regime [AIAA PAPER 65-715] 16 p2635 A66-31515

Military STOL and conventional aircraft behavior on rudimentary airstrips 18 p3051 A66-33618

Short takeoff and landing for high speed aircraft, discussing aerodynamic parameters of lift coefficient of flap system, lift-drag ratio and thrust deflection 18 p3052 A66-33918

STOL and VTOL aircraft classification 20 p3495 A66-37515

New STOL flying boat with deflected slipstream, boundary layer control and spray suppressor in flight test of 75 percent flying model [AIAA PAPER 65-755] 23 p4015 A66-40915

Engine thrust requirement comparison for vertical and short takeoff aircraft with same flight mission 23 p4088 A66-41118

STOL flying possibilities and limitation, considering aircraft generating high lift by using fixed wing and airfoil features 23 p4016 A66-41717

Power plant development trends and effects on short and vertical takeoff aircraft design, noting improvement in thrust-weight ratio 24 p4262 A66-43052

Dornier twin engine high wing STOL monoplane design and performance, noting useful space, landing gear, control system fuselage, cargo, etc 24 p4160 A66-43072

STONY METEORITE

SA ACHONDRITE

SA CHONDRITE

Carbonaceous chondrite in stony meteorites, noting presence of organized elements and microfossils 02 p0289 A66-11602

Cl 36 in stony meteorites produced by spallation reactions and neutron capture 04 p0579 A66-14313

Isotopic ratios and location of light primordial rare gases in stony meteorites and correlation with diffusion coefficients 04 p0580 A66-14480

Solar wind as source of primordial inert gases in stony meteorites 04 p0580 A66-14480

Rare gas content of stony meteorite measured by dissolving diverse mineral fractions in solvents on step-by-step basis 04 p0580 A66-14490

Cosmic ray variations studied by effects of Zaisan chondrite 05 p0752 A66-15382

Tritium diffusion constants of stony meteorites and dependence on tritium production mechanism 09 p1456 A66-20422

Lunar and asteroidal meteorites 14 p2382 A66-27602

Iron and stony meteorite evolution, cosmic radiation ages and space erosion model 14 p2390 A66-28402

Isotopic abundance and content used to trace history of 20 iron and stony meteorites 16 p2803 A66-31222

Rare gases and age distributions in stony meteorites 16 p2804 A66-31355

Chemical analysis of stony meteorites with sharp boundaries between light and dark structure, noting differences found in achondrites and

STRAIN FATIGUE

[ASME PAPER 65-WA/MET-5]
05 p0703 A66-15690

Plastic strain fatigue in air and vacuum, discussing strain-life relation for ductile materials and cold reweldment of fractures in vacuum [ASME PAPER 65-MET-5] 06 p0895 A66-16203

Plane strain fracture toughness of high strength aluminum alloys measuring techniques and relevant metallurgical factors [ASME PAPER 64-WA/MET-11] 06 p0895 A66-16209

Cumulative damage and fatigue applicability to solid propellant-liner bonds failure, noting useful life and stress-time relationship [AIAA PAPER 65-191] 12 p1937 A66-24705

Cyclic strain fatigue tests and fatigue failure curve for age-hardened nickel based alloy K-Monel [ASME PAPER 66-MET-9] 14 p2312 A66-26977

Graphical solution to Garofalo equations describing first-and second-stage creep data 18 p3252 A66-33731

Algorithm used in circuit design, evaluating equivalent strain at critical point of airframe structure, verifying it during fatigue tests 20 p3665 A66-36880

STRAIN FIELD

Plane-strain problems for which classical theory predicts singular stress concentrations in elastic solid 03 p0438 A66-13093

Effect of initial strains on flange reinforced cantilever beam, using triangular elements with linearly varying strains 06 p0961 A66-16004

Strain dependence of impurity conductivity measured in compensated p-type germanium, using uniaxial compression 06 p0922 A66-16171

Strain field calculation from linearized elasticity theory for vacancies and divacancies in diamond structure valence crystals 06 p0938 A66-17147

Stress-strain relation for strain trajectory in form of double-link discontinuous lines 08 p1313 A66-19439

Finite plane strains in solid body problem, postulating arbitrary deformation law and arbitrary hydrostatic stresses dependence on volume change, solved by nonlinear equation 13 p2205 A66-26450

LF internal friction of beryllium, noting strain amplitude dependency variation with temperature and purity, obtaining activation energies 16 p2724 A66-31265

Elastic strain distribution in structure of quasi-isotropic polycrystalline titanium 16 p2728 A66-31787

Elastic stress field due to spherical inclusion or cavity in infinite exterior region, deriving potential energy dependent on strains, noting skin effects and stress concentration factor 19 p3474 A66-36427

Photoelastic measurement of elastic strain fields in semiconductors 20 p3668 A66-37497

Residual stresses and strains for cases with/ without secondary plastic deformations during unloading under nonuniform heating 22 p3990 A66-40144

STRAIN GAUGE

Pressure transducers using miniature semiconductor strain gauges, examining design, temperature effects, diaphragm strain and application 01 p0068 A66-10492

Four test methods for determining temperature sensitivity of bonded resistance strain gauges at high temperatures 01 p0070 A66-10886

High temperature characteristics of commercial conventional resistance wire strain gauges tested in experimental stress analysis 02 p0226 A66-11303

Thermal expansion coefficient of materials determined by tensometric method based on measurement of temperature dependence of resistance of strain gauge sensing elements 02 p0231 A66-11998

Strain gauge sensing element readiness for use dependent upon quality of base characterized by value of insulation resistance 02 p0231 A66-12000

Effect of measuring current and preheating on strains in resin measured with electric-resistance strain gauges 03 p0433 A66-12316

Electro-optical scanning system for multiaxial strain

measurements 05 p0682 A66-15302

Onset of yield in pressure vessels determined by pressure-testing device that prepares plot of pressure vs volume of liquid pumped into vessel [ASME PAPER 65-WA/PET-1] 05 p0779 A66-15641

Thin film strain gauge transducers noting temperature performance, power dissipation, metallic or ceramic construction and application to nuclear radiation testing, airborne equipment, etc 06 p0882 A66-16898

Foil strain gauges in controlling machine or process as function of stress, load and fluid pressure 07 p1034 A66-17847

Indicator design for semiconductor strain gauges, discussing basic circuitry, calibration and stability 08 p1226 A66-19599

Strain measurements in cryogenic container, noting preparation of specimen surface, installation of gauges, etc 09 p1466 A66-20185

NERVA reactor instrumentation noting core temperature thermocouples, neutron detectors, vibration and pressure transducers, strain gauges, etc 12 p1912 A66-23703

Dynamic strains and transient deformations on opaque body surfaces measured, using bonded birefringent strip 12 p1961 A66-23988

Photographic method for measuring surface strain in solid propellant grains [AIAA PAPER 65-170] 12 p1970 A66-24712

Strain gauge load measuring transducer operating in bending mode and based on elastic properties of epoxide glass fabric laminate 12 p1884 A66-24985

Bonded-wire, foil and semiconductor strain gauges, noting design, operation, application, gauge materials, temperature effect, etc 13 p2081 A66-26100

Resistance strain gauge measuring propagating dynamic strains, noting independence of waveform, effect of gauge length, time and amplitude errors, etc 13 p2198 A66-26225

High temperature strain gauge design 17 p2926 A66-32985

Variable stress measurement using wire type resistance strain gauges in measuring bridge circuit 18 p3112 A66-34232

Refractory metals use in spacecraft strain-measurement instrumentation 19 p3371 A66-36159

Strain gauge strip chart error determination, elimination and effects on accuracy of electric calibration 19 p3360 A66-36307

Response characteristics of strain gauges as affected by ultrahigh-vacuum environments 20 p3558 A66-37442

Experimental stress analysis - Conference, West Berlin, March 1966 20 p3667 A66-37496

Embedded foil strain gauges for three-dimensional stress measurements 20 p3668 A66-37499

Semiconductor transducer strain gauge for structural deformation measurement by conversion to resistance variation 20 p3559 A66-37500

Stress measurements on high-speed rotating machine, using strain gauge bridge 20 p3668 A66-37503

In-flight stress measurements on coaxial counterrotating helicopter blades, using semiconductor strain gauge with HF telemetric data 20 p3668 A66-37504

Strain gauge technology in U.S.A. emphasizing organization, education and performance 20 p3559 A66-37506

P-silicon semiconductor strain gauge for mechanical stress analysis and electrical measurement of mechanical values 21 p3737 A66-38826

Elastoresistance effects in evaporated bismuth films, deposited on glass and epoxy resin substrates, used as strain gauges and transducers 22 p3962 A66-40046

Method for compensating resistance of strain gauges for thermal expansion 22 p3918 A66-40155

Transient response characteristics of bonded strain gauges obtained by measuring elastic step wave produced in steel bar 22 p3919 A66-40436

Miniature sensor for compensating static as well as transient temperature developed,

using high gauge factor and high thermal coefficients of semiconductor strain gauge [AIAA PAPER 66-749] 22 p3919 A66-40606

Slip ring-strain gauge connections for transmitting supply current to rotating transducers and transmitting back signal voltage, noting noise reduction problem 23 p4017 A66-41101

Elastic microstrain of polycrystalline titanium measuring device, discussing measurement error 24 p4227 A66-42201

Simple device which applies uniform pressure to exterior of cylindrical specimen while curing strain gauge installations 24 p4213 A66-42201

Strain gauge signal recording accuracy of stereophonic tape 24 p4214 A66-43001

Mechanical electrical transducers for aerospace instrumentation and control, noting strain gauge, inductive and potentiometric types 24 p4215 A66-43001

STRAIN GAUGE ACCELEROMETER

Various types of acceleration-sensitive transducers such as piezoelectric crystal, potentiometer, strain gauge, variable reluctance and servo force-balance accelerometer 04 p0520 A66-13901

Diaphragm type strain gauge accelerometer design 08 p1227 A66-19701

High velocity shock machines and ancillary equipment including elastic cord machine, air guns, rocket-propelled devices, accelerometers, strain gauges, etc 16 p2682 A66-31101

STRAIN GAUGE BALANCE

Six-component balance equipped with semiconductor strain gauges and inert compensated for hotshot wind tunnels 24 p4206 A66-42101

STRAIN HARDENING

Hollow spherical media under uniform radial loading solved by practical iterative method over elastic-plastic strain-hardening range 03 p0435 A66-12601

Dynamic flexural buckling of rods with axial plastic compression wave, noting strain-hardening law [ASME PAPER 65-APMW-32] 04 p0593 A66-14201

Effect of gamma phase aging and phase cold hardening on austenitic strength of Fe-Ni-Ti steels, noting martensitic point and segregation 05 p0699 A66-14601

Elasto-plastic matrix displacement analysis of arbitrary three-dimensional continuum under strain hardening 06 p0963 A66-16401

Model of elastoplastic body undergoing strain hardening, examining microstresses via internal viscosity 07 p1143 A66-17601

Linear isotropic strain-hardening applied to load-deformation characteristics of cylindrical shells under internal pressure, obtaining Tresca yield criterion and stress profiles 07 p1147 A66-18301

Finite deformations of rotating disk of variable thickness, consisting of elastoplastic strain-hardening material, determined from stress-strain diagram 12 p1964 A66-24001

Plastic band propagation near circular hole for biaxial tension of plate consisting of strain hardening material 12 p1967 A66-24111

Critical analysis of Hirsch linear strain hardening theory, discussing decrease of dislocation cluster radius 12 p1898 A66-24921

Evaluation of model of strain hardening in fatigue with crack propagation occurring by plastic flow away from crack tip during tensile part of cycle 12 p1898 A66-24971

Stability of plastic shell under tension 14 p2396 A66-27381

State equation analysis from tensile compression test data and influence of strain, strain rate and temperature on strain-hardening curve for metals such as Al, Cu, Pb, etc 14 p2397 A66-27391

Second-order effects in dissipative solid and their accumulation in causing rapid acceleration of tensile metal creeps 16 p2814 A66-30521

Strain hardening of high temperature titanium multiphase solid solution by deformation and subsequent rapid cooling 17 p2940 A66-33221

Dynamic flexural buckling of rods with axial plastic compression wave, noting strain-hardening law [ASME PAPER 65-APMW-32]

Constitutive equations for behavior of
elastic/viscoplastic materials at finite
strain, assuming isotropic material and
nonthermal processes 18 p3256 A66-34394
Creep analysis at variable temperatures,
noting creep rate and strain, transformed
time hypothesis, temperature gradient
effect, etc 21 p3826 A66-38615
Transmission electron microscopy on
polycrystalline Al, determining hardening
and tensile yield stress variations as
function of quenching temperature 21 p3753 A66-39586
Strength factor expressed as empirical
penetration equation for impact target,
combining effects of resistance to
penetration and strain hardening 23 p4140 A66-41918
Constitutive equations of plastic and
elastoviscoplastic flow theory for
nonstationary yield conditions and strain
hardening 23 p4146 A66-41991
Elastic and plastic behavior of ideal
materials with mechanical and thermal
properties of ductile structural
metals 24 p4288 A66-42275
High cycle fatigue strength of titanium, Cu
and Al alloys correlated with constants of
logarithmic true stress-true strain
curve 24 p4229 A66-43080
STRAIN RATE
Strain rate measurements from uniaxial
tension tests predicting metal sheet
performance during pressing, considering
crystal deformation 01 p0086 A66-10411
Dynamic indentation of metals with conical
projectiles and dynamic tip flattening of
projectiles, noting inertia and strain rate
effect 02 p0243 A66-11691
Plastic deformation of metals under wide
range in strain rate 02 p0245 A66-11852
Generalization of Kolter theorem applied
to study of adaptability of nonuniformly
loaded elastoplastic bodies to variable
loads 04 p0594 A66-14427
Alloy steel yield strength, strain rate
sensitivity, material parameters and power-
law relationship [ASME PAPER 65-WA/MET-8]
05 p0703 A66-15688
Effect of varying strain rate on physical
properties of bone and muscle tissue,
measuring load and time displacement with
constant-velocity compression test machine
[ASME PAPER 65-WA/HUF-9]
05 p0626 A66-15699
Extension, for heterogeneous sphere, of
previous work which gave expressions for
mean strain and rupture as functions of
hydrostatic and nonhydrostatic components
of free energy 08 p1212 A66-18638
Structural analytic basis for high rate
sensitivity and superplasticity in metals,
noting strain rate dependence of viscous flow
stress 08 p1236 A66-18760
Yield stress dependence on strain rates in
annealed steel and aluminum subjected to
ball-indentation tests 08 p1315 A66-19803
Strain rate effects on stress wave
propagation in metals, emphasizing one-
dimensional relationship 10 p1617 A66-21566
Flow theory hardening function and
inversion of relation between strain rate
and stress rate 11 p1784 A66-23329
Stress and strain in theory of
plasticity 11 p1718 A66-23330
Circumferential creep strain of cylinders
subjected to internal pressure 12 p1959 A66-23797
Strain rate and temperature changes in
solution hardened niobium alloy,
emphasizing behavioral difference between
pure niobium and alloy, noting flow
stress 12 p1894 A66-23941
Instantaneous strength, rigidity and strain
characteristics of reinforced plastics surface-
heated on one side 12 p1899 A66-24041
Alloy steel yield strength, strain rate
sensitivity, material parameters and power-
law relationship [ASME PAPER 65-WA/MET-8]
12 p1896 A66-24536
High speed stress-strain testing of
polymers - International Symposium, Boston,
March 1965 13 p2114 A66-26105
Johnston-Gilman concept of yielding and
plastic flow and strain rate effect on

dynamic dislocation 13 p2197 A66-26106
High speed tensile testing of materials
under destructive loads at high strain
rates 13 p2197 A66-26107
Closed loop hydraulic high-speed universal
testing machine and simulation of high
strain rate conditions 13 p2197 A66-26108
Stress relaxation, stress-strain curve and
time-temperature-strain rate equivalence for
thermoplastic and viscoelastic
polymers 13 p2114 A66-26109
Static and high strain rate tensile behavior
of epoxy, polyester and urethane resins
reinforced with 181-S, 184-E and woven
roving glass materials and
nylon 13 p2114 A66-26111
Resin-impregnated material response to
compression testing at intermediate strain
rates 13 p2114 A66-26112
Strain rate and pressure effects on tensile
behavior of viscoelastic composite solid
propellant 13 p2171 A66-26116
Uniaxial tensile test data on stress-strain
properties of polymers and elastomers as
function of strain rate and
temperature 13 p2115 A66-26118
Fracture and mechanical failure of
polymeric solids at high strain
rates 13 p2198 A66-26120
State equation analysis from tensile or
compression test data and influence of
strain, strain rate and temperature on
strain-hardening curve for metals such as
Al, Cu, Pb, etc 14 p2397 A66-27393
High purity aluminum strain rate effects
with cold working 14 p2316 A66-27782
Theory of transversely isotropic fluids for
fluid having rigid
microstructure 15 p2480 A66-29692
Dynamic plastic bending of cantilever and
variation in strength of mild steel with
strain rate, considering shear force at
hinge 16 p2815 A66-30808
Mechanical behavior of polycrystalline iron
and single crystal molybdenum in
compression over various strain rate ranges,
noting temperature role 16 p2724 A66-31264
Temperature and strain rate effects on
yield and flow stresses of alpha titanium
determined, using continuous and
differential testing 18 p3122 A66-33748
Time dependence of dislocation density in
single crystal MgO undergoing plastic
deformation at elevated
temperatures 19 p3387 A66-35421
Design and testing of crack-notched
specimens for determination of resistance of
materials to unstable opening-mode crack
extension under plane strain
conditions 19 p3473 A66-35805
Serrated yielding by metals during tension
tests at temperatures near absolute
zero 19 p3380 A66-35846
Cryogenic design of aluminum, titanium
and steel alloys subjected to uniaxial, 1-to-1
biaxial and 2-to-1 biaxial stress
states 20 p3583 A66-37094
Measuring stress-strain relations at high
strain rates techniques, noting creep or
tensile tests role 20 p3667 A66-37441
Magnetomotive forming noting strain rate
effect on material deformation, applications
to aerospace technology and
magnetohydraulic vs electrohydraulic
forming [ASME PAPER 66-MD-19]
21 p3742 A66-38480
Nonlinear programming problem of yield
point load of perfectly plastic structure,
using limit analysis theorems, with
application to curved
beam 23 p4146 A66-41992
Compressive strain rate testing of Al, Ti,
pyrolytic graphite, lucite and micarta, noting
techniques and results 24 p4227 A66-42138
Microscopic strain rate equation
interpreting macroscopic creep, stress-strain
and impact test results 24 p4288 A66-42274
Axisymmetric bending problem of idealized
elastic rigidly-plastic two-layer circular
plates, deriving exact mathematically strict
solutions and uniqueness
conditions 24 p4290 A66-42443
STRAIN SOFTENING
Total nonelastic strain recovery of copper
single crystals after small prestrains,
discussing parameters 04 p0535 A66-13400

STRATIFICATION

SA ATMOSPHERIC STRATIFICATION
Turbulent heat transfer effect on gas
stratification in field of Archimedes
forces 12 p1979 A66-24429
Stratification with bottom heating analysis,
using approximate integral
approach 19 p3477 A66-35631
STRATIFIED FLOW
Difference in properties of constituents of
stratified multicomponent ideal gas and
effect on nozzle flow
[AIAA PAPER 64-266] 03 p0315 A66-12747
Steady secondary flow in stratified fluid in
rotating frame, noting secondary vorticity
[ASME PAPER 65-WA/FE-14]
05 p0664 A66-15613
Short-range forecasting of stratified
cloudiness, noting linear dependence
between variations in dew point and air
temperature near Earth surface for
aperiodic processes 16 p2742 A66-30791
Nonstationary models of cumuli and
thermals in stratified
atmosphere 18 p3130 A66-34606
Alfven wave propagation in incompressible
fluid stratified by inhomogeneous fluid
density or magnetic field
strength 21 p3791 A66-39170
STRATIFIED LAYER
Monin-Obukhov similarity theory for
turbulent structure of thermally stratified
surface layer of
atmosphere 11 p1725 A66-22266
Internal wave ripples from fluid impacts
on base of stably stratified fluid region,
calculating particular case of single ripple in
viscous fluid 11 p1693 A66-23009
Internal gravity waves in stratified liquid
for two-dimensional case, noting relation
between oscillation frequency and
wavelength 13 p2062 A66-25177
Magnetotonic couplings and electromagnetic
wave propagation in horizontally stratified
layer of gyrotropic
medium 14 p2283 A66-27125
Green function applied to obtain
alternative representations of source excite
vector and scalar electromagnetic
fields 18 p3071 A66-34564
Transverse propagation of waveguide
modes in conducting cylindrically stratified
magnetoplasma analogous to VLF radio
waves propagating in
Earth-ionosphere 18 p3071 A66-34565
Cavity natural resonant frequencies in
cylindrically stratified magnetoplasma
examined by exact harmonic series
solution 18 p3072 A66-34566
Relation between diurnal, seasonal and
cyclic variations of stratifications in E layer
and fine structure of sporadic E layer and
E-2 layer 22 p3914 A66-40761
Chapman-Ferraro hollows for system of
parallel line currents enveloped by stratified
corpuscular flux 22 p3975 A66-40806
Fluid stratification in floated gyroscope,
estimating drift rate as function of time,
geometry and flotation
mixture 23 p4066 A66-41102
Electromagnetic wave scattering by
stratified medium, noting Mathieu and
Floquet type wave
representation 24 p4171 A66-42292
Coupled electromagnetic and
electroacoustic wave equations for
propagation in stratified compressible
magnetoplasmas 24 p4171 A66-42379
STRATIGRAPHY
Lunar topographical asphericity, lunar
coordinates, absolute and relative, harmonic
analytical interpolation, formations,
stratigraphy and optical
librations 07 p1139 A66-18265
STRATOSCOPE II TELESCOPE
Signal-generating astronomical sensors,
describing Stratoscope II balloon-borne
telescope 08 p1222 A66-18732
IR spectroscopic observations with balloon-
borne telescope, Stratoscope
II 10 p1603 A66-21108
IR reflection spectrum of Jupiter from
second flight of Stratoscope II, discussing
deep absorption features 13 p2184 A66-25619
Camera tubes for recording Stratoscope II
telescope, noting photometric
fidelity 15 p2500 A66-28969

STRATOSPHERE

Phases of lower stratospheric circulation and temperature
 variation 02 p0221 A66-11571
 Stratospheric dynamics north of 40 degrees N with reference to kinetic energy variation, wave disturbances and shallow layer 02 p0253 A66-11572
 Stratospheric monthly temperature variation at latitude 15 degrees N between 25 to 55 km in phase angles and amplitude 02 p0223 A66-11959
 Physics of lower thermosphere studied by using conditions applying to oxygen atmosphere and oxygen-nitrogen atmosphere 05 p0671 A66-15018
 IR emission observation used to deduce composition, temperature and energy budget of stratosphere and mesosphere 05 p0672 A66-15024
 Solar cosmic rays determined from radiosonde measurements in stratosphere 08 p1283 A66-19044
 Water vapor influence on latitudinal and seasonal distribution of stratospheric ozone concentration explained via Hampson chemical mechanism 08 p1216 A66-19209
 Secular variation in intensity of cosmic rays in stratosphere and energy spectrum of primary cosmic rays correlated with solar activity 09 p1437 A66-20208
 Forbush decreases in intensity of cosmic rays analyzed from data obtained from stratospheric radiosondes at geomagnetic latitudes 51 and 41 degrees N 09 p1437 A66-20209
 Inaccuracy in rocketsonde data on HF of midwinter easterlies in stratosphere over Cape Kennedy 10 p1531 A66-21281
 Refraction angle of radio waves in troposphere and stratosphere, using refractive index of air 11 p1658 A66-23220
 Local peculiarities of vertical distribution of ozone in equatorial and polar regions for different turbulent dynamic models of stratosphere 12 p1869 A66-24279
 High temperature anomaly in stratosphere over Australia during 1963-64 12 p1871 A66-24464
 Alpha radiation frost point hygrometer obtains stratosphere moisture profiles [AIAA PAPER 66-368] 12 p1872 A66-24496
 Heat transfer equations for rocketborne stratospheric temperature sensor in form of spherical bead thermistor and experimental analysis of physical, thermodynamic and electrical characteristics of rocketsonde [AIAA PAPER 66-385] 12 p1882 A66-24508
 Synoptics of stratosphere and stratospheric warming of winter of 1963 14 p2283 A66-27095
 Breakdown of biennial oscillation of ozone and of lower stratospheric temperature of Southern Hemisphere and relation to sunspot cycle observations 14 p2286 A66-27904
 Stratospheric small-ion density measurement from high-altitude jet aircraft, noting dust effect 14 p2297 A66-28334
 Contaminating effect of water vapor in optical path of spectrometer on measurements of stratospheric water vapor absorption 15 p2530 A66-28601
 Biennial stratospheric tidal oscillation at tropical latitudes 15 p2530 A66-28602
 Half-hourly variability and short-term evolution of strato- and mesospheric winds in autumn and summer 15 p2530 A66-28618
 Meteorological Rocket Network observations of complex circulation system in middle and upper atmosphere 15 p2491 A66-29953
 Moisture contamination effects at altitude by package, balloon and associated train 15 p2492 A66-30032
 Small-scale wind variations in stratosphere and mesosphere studied by high resolution Robin falling-sphere soundings 16 p2740 A66-30510
 Speculative mean monthly Arctic stratospheric temperatures estimated from radiosonde and meteorological rocket wind and temperature data 16 p2696 A66-30928
 High latitude density regime in upper stratosphere inferred from Arctic and Antarctic observations 17 p2922 A66-33343
 Coupling mechanism correlated between quasi-biennial oscillations in polar and

tropical latitudes of stratosphere 18 p3104 A66-33926
 Cosmic radiation intensity fluctuation in stratosphere, noting absence of explanation for anomaly 19 p3451 A66-35261
 Modified RK-1 radiosonde circuit for stratospheric cosmic ray measurements 19 p3352 A66-35274
 Meteorological rocket network observation of gross global circulation patterns of stratosphere and mesosphere for analysis of vertical structure and synoptic processes 19 p3347 A66-35644
 Small-scale fluctuations in vertical distribution of atmospheric ozone analyzed, examining possible transport mechanisms in Southern Hemisphere 20 p3551 A66-37469
 Meteorological rocket measurements of diurnal oscillations of pressure and density in upper stratosphere and lower mesosphere 20 p3551 A66-37515
 Two-year variation in troposphere, ionosphere and stratosphere regions, noting sporadic E layer in Far East 20 p3552 A66-37571
 Substantial pulse type stratospheric temperature fluctuations over Armenia based on diurnal observations 21 p3734 A66-39293
 British stratospheric and mesospheric temperature measurements compared with valves from available atmospheric models 22 p3913 A66-40519
 Diurnal heating of ozonosphere near stratopause level results in diurnal temperature variation of 15 degrees C and development of tidal circulation in stratospheric wind field 22 p3916 A66-40874
 Zonal wind distribution and variation in equatorial stratosphere and lower mesosphere 23 p4065 A66-41841
 RK-1-F radiosonde for stratosphere measurements of X-ray photon energy spectrum, charged particle density and X-ray photon density 24 p4213 A66-42941
STRATOSPHERE RADIATION
 Stratospheric cosmic ray intensity, discussing Soviet measurements above Antarctica 05 p0751 A66-15375
 Stratospheric measurements of electrons and gamma radiation in cosmic rays, using plastic scintillator and lead sheet supplemented Geiger counters 05 p0752 A66-15386
 Cosmic ray 27-day variations using periodograms, with measured data processed continuously from 1957 to 1964 05 p0753 A66-15393
 Secular changes in stratospheric cosmic ray intensity from 1962 to 1964 05 p0754 A66-15397
 Energy and density spectra of X-ray photons in extensive air showers and in stratosphere 07 p1118 A66-17574
 Primary cosmic radiation intensity determined from stratospheric intensity fluctuation at various latitudes 09 p1440 A66-20225
 Radiosonde for stratospheric cosmic ray intensity measurement, noting structure, operation and results 09 p1379 A66-20236
 Sudden increase in radioactive fallout traced to stratospheric origin due to debris age exceeding assumed mean tropospheric residence time of one month 11 p1699 A66-23095
 Cosmic ray intensities in stratosphere over Antarctica and Murmansk, noting differences not due to low energy primary particles or temperature 18 p3196 A66-34869
 Increases of ionizing radiation in stratosphere correlated with recurrent magnetic storms, ionospheric perturbations in auroral zone, etc, possibly due to electrons from outer radiation belt 18 p3197 A66-34874
 Dynamic stability of waves in stratosphere, examining vertical transfer of energy from troposphere to stratosphere weakened at tropopause 21 p3734 A66-39219
 Tidal circulation system induced by stratospheric wind field perturbations via diurnal ozonospheric heating 24 p4203 A66-42985
STREAK PHOTOGRAPHY
 High speed streak camera using electronic control circuits, light amplifier and time

calibrator 02 p0230 A66-1181
 Simple rotating drum streak camera, covering principle, design, construction and application 04 p0520 A66-1394
 Electron avalanches in anode and cathode directed streamers detected by high-gain image intensifier and streak shutter 08 p1263 A66-1907
 Laser application to streak photography, methods of time resolved flow visualization for transient flows 10 p1536 A66-2175
 Five-stage transmission secondary-emission image intensifier tube as high speed shutter for moment and streak photography 12 p1883 A66-2495
 Streak camera resolution as affected by rotating mirror surface distortion 15 p2498 A66-2882
 Writing rate of rotating-mirror streak camera determined, using Q-switched laser technique 16 p2702 A66-3041
 Coherent gas laser light to meet requirements of streak photography for time-resolved flow visualization 17 p2935 A66-3295
 Photographic equipment using image converter tube as electronic shutter with exposure times from 0.5 to 5000 microseconds 23 p4070 A66-4187
STREAM
 S ACOUSTIC STREAMING
 S FREE STREAM
 S GAS STREAM
 S GULF STREAM
 S JET STREAM
 S SLIPSTREAM
 S SOLAR STREAM
STREAM FUNCTION
 SA STOKES-BELTRAMI EQUATION
 Viscous flow eddy behavior near sharp corner, considering outer boundary conditions and stream function 07 p1023 A66-1811
 Simple analytical method for calculating stream functions in three-dimensional steady flow past slender bodies 08 p1166 A66-1982
 Generalized axially symmetric potentials and stream functions, solid harmonics representations and basic identities 10 p1549 A66-21302
 Degree of clustering expected from 500-mb horizontal sounding system, using stream functions and velocity potentials derived from historical tapes of National Meteorological Center 13 p2121 A66-25815
 Stream function coordinates for flow in shock layer around axisymmetric blunt-nosed body in hypersonic stream 14 p2221 A66-28145
 Stream function for plane free sonic gas jet flowing past profile 16 p2630 A66-31290
 Laminar incompressible axisymmetric free jet with swirl, examining perturbation scheme for stream function and asymptotic series 21 p3729 A66-39453
 Differential equations for stream functions of particle trajectories in unsteady three-dimensional flows in cylindrical and spherical coordinate systems 22 p3898 A66-40111
 Volterra equation and Green function to solve MHD problem of unsteady flow of viscous incompressible conducting fluid with time dependency 23 p4106 A66-41837
STREAMLINE BODY
 Airflow interference theory applied to streamlined wings and bodies undergoing simple harmonic oscillations 07 p0981 A66-18102
 Blockage corrections for streamline blunt-based bodies of revolution in closed wind tunnel 14 p2271 A66-28186
 Plant coatings applied to streamlined bodies to reduce hydrodynamic drag by stabilizing laminar boundary layer against transition to turbulence 23 p4059 A66-41943
STREAMLINE FLOW
 Adiabatic heating and temperature recovery factor of tubes carrying liquids of high Prandtl number 01 p0165 A66-10905
 Laminar stability of incompressible and stationary flows with curved streamlines, applying integral method and noting time dependence of flow 03 p0357 A66-13089
 Streamline curvature effect on mixing within boundary layer, deriving magnitude of concentration and pressure 05 p0665 A66-15798

ame stabilization in high-speed subsonic
as, deriving correlation for defining
unction limits, free stream-line velocity
wake breadth 06 p0969 A66-16309
w field in rectangular cavities at low
molds number 07 p1020 A66-17941
essure distribution on star-shaped bodies
wind tunnel at Mach 4 and Reynolds
ber .000006 08 p1165 A66-19480
it-stream chromatographic injection
meters including optimum component
city, column flow, mixing tube cross
ion, etc 10 p1534 A66-21294
merical method for calculating flow,
uding gas reactions and nonequilibrium,
and given axisymmetric detached shock
se 10 p1481 A66-21892
ransition from near free molecular flow
leading edge of flat plate in rarefied
ersonic flow to continuum boundary
ow flow downstream 11 p1633 A66-22925
wo-dimensional potential flow of.
tropic gas with stationary
eamlines 12 p1862 A66-24007
at drag solutions for symmetrical struts
various shapes, thickness ratios and slot
hs in quiescent and uniform streaming
v 12 p1800 A66-25005
eparation streamline for massive blowing
ree stream for model injected into arc
nel flow
[AA PAPER 66-457] 18 p3046 A66-33650
compressible turbulent two-dimensional
jet flow, discussing viscous interactions
n surrounding fluid attachment
eamline, momentum-flux equations,
18 p3099 A66-34125
ener-Hopf technique for exact solution
plane Oseen flow past half-plane and
horizontal for singularity 22 p3901 A66-40452
laminar shock layer structure in which
eamlines retain appropriate momentum,
calculating exhaust plume structure for
cket nozzle 23 p4012 A66-41921
imilar solution of laminar mixing of
ved half-jet and curvature effect of
ndary layer flow along curved
face 23 p4059 A66-42003

STRESS /BIOL/

SA FATIGUE /BIOL/
SA FLIGHT STRESS
SA PATHOLOGICAL EFFECT

Psychological stress susceptibility of naval
and marine pilot trainees, examining
environmental cue manipulation to control
perceptions 03 p0327 A66-12355
Self-reported stress-related symptoms
among air traffic control specialists /ATCS/
and non-ATCS personnel 03 p0324 A66-12358
Human stress reactions to three-day march,
sleep deprivation, food and oxygen
starvation, noting changes in central nervous
system functions 04 p0467 A66-14080
Degree of mental stress correlated with
excretion of catecholamine, free adrenaline
and noradrenaline in

urine 04 p0470 A66-14081
Effect of environmental stress on aircrew
performance including failure, distraction,
fear, discomfort, speed and load and combat
conditions 10 p1494 A66-22136
Adrenocorticotrophin-releasing hormone
appears in peripheral blood of rats under
physiological stress, noting role of pituitary
gland 14 p2228 A66-27811

Anticipatory psychological stress
determiners include perceived probability of
occurrence, proximity and unpleasantness
associated with occurrence of threatening
event 16 p2640 A66-31130
Stress and dietary influence on direct
oxidative pathway of carbohydrate
metabolism in jejunal mucosa of
rats 16 p2641 A66-31383

Competing visual tasks used in
psychological stress testing of special
mission personnel 21 p3701 A66-39425
Vertical sinusoidal vibration as
psychological stress in considering capacity
for handling information 22 p3854 A66-40007

STRESS ANALYSIS

Digital computer automated X-ray
diffraction method to determine residual
stress to improve processing
reliability 01 p0033 A66-10102

Introductory book on photoelasticity in
stress analysis and
application 01 p0151 A66-10183

Computer programming of diagonal tension
analysis of flat panels in
shear 01 p0152 A66-10345

Approximate stress intensity factor for
embedded elliptical crack in plate subjected to
uniaxial tension perpendicular to crack
surface 01 p0152 A66-10377

Strength of adhesive joints showing ratio
of normal and shear stress as important
parameter, using crack propagation
theory 01 p0152 A66-10380

Prediction of stress at resonance with
respect to permissible
limits 01 p0156 A66-10868

Introductory text on plate and shell theory
covering membrane theory, flat circular
plates, symmetrically loaded shells of
revolution and selected
problems 01 p0157 A66-10976

High temperature characteristics of
commercial conventional resistance wire
strain gauges tested in experimental stress
analysis 02 p0226 A66-11303

Photoelastic experiment by birefringent
coating method to determine stress analysis
applicable for any elastic
body 02 p0298 A66-11583

Stress repetitions as design parameter for
pavements, considering traffic load on
roads 02 p0216 A66-12220

Urethane rubber for wide range of
experimental stress analysis
problems 03 p0434 A66-12367

Stress analysis in inelastic range at
elevated temperature covering stress-strain
law, point/ axially symmetric deformations
of thick-walled sphere and cylinder with
numerical values 03 p0436 A66-12718

Toroidal pressure vessels discussing

volume and weight characteristics of
circular elliptic, modified elliptic,
circulinear, equal stress and zero hoop-stress
cross sections 03 p0436 A66-12751

Stress analysis of finite length cylinders by
station function technique coupled with
radial single collocation

[AIAA PAPER 65-179] 03 p0437 A66-12798

Chemical surface hardening effects on
brittle fracture characteristics of machine
component steels under dynamic impact,
covering mathematical relations for strength
improvement 03 p0383 A66-13157

Aircraft structural design errors due to
use of idealized models 04 p0587 A66-13505

Nonlinear viscoelastic incompressible
materials under small finite deformation for
short time ranges, noting kernel functions
for tension tests

[ASME PAPER 65-APMW-31]

04 p0593 A66-14231

Viscoelastic contact problem for linear
materials and quadratic surfaces of bodies
[ASME PAPER 65-APMW-36]

04 p0594 A66-14236

Book on large variations in temperature
and thermal expansion which produce
thermal stresses in materials whose
properties are

time-independent 05 p0771 A66-14519

Finite element structural analysis of
stresses and displacements in axisymmetric
solids of arbitrary geometry
[AIAA PAPER 65-143] 05 p0781 A66-15786

Dimensioning and strength calculations -
Conference, Budapest, October
1965 06 p0963 A66-16472

Lateral buckling of I-beam, examining
stress and strain induced change in
elasticity moduli and

rigidity 06 p0964 A66-16479

Four conditions permitting fatigue limit
obtained by Wohler curve to render
consistent distribution function to mean
value and deviation 06 p0965 A66-16485

Book on stress analysis and elastic body
vibration covering stress and strain, bending
moment, shearing forces, mechanical
vibration, torsion, columns, oscillation,
etc 07 p1142 A66-17236

Constitutive equations for characteristic
effects due to elastic behavior of continuum
body expressed by stress and strain
field 07 p1145 A66-18225

Thermal stress in infinite nonisotropic
elastic slab with heated element on upper
surface and base of slab in contact with
insulating plane 07 p1145 A66-18227

Fatigue stress analysis, using graphical
technique for complex problem of bending
and torsional out-of-phase variable frequency
vibrations 07 p1147 A66-18342

Mechanical constitutive theory and
methods of stress analysis for physically
nonlinear solid propellants

[AIAA PAPER 66-124] 07 p1110 A66-18460

Gas-bearing facilities for determining axial
stress-strain and lateral strain of brittle
materials to high

temperature 08 p1242 A66-19722

Evaluations for multiaxial-stress properties
of ceramic materials including elastic and
plastic strength, stiffness, ductility,
resilience, etc 12 p1958 A66-23631

IR applications to reliability assessment,
stress analysis, testing, etc, of electrically
energized components, thermally or by
power dissipation 12 p1842 A66-24671

Stress analysis of rim-straddling fastenings
for axial compressor and turbine
blades 13 p2171 A66-25081

Extremal values of stress resulting from
fluctuating pressure in hydraulic
cylinder 13 p2196 A66-25757

Book on stress-strain analysis including
photoelastic investigations of bending impact
on cantilever beam 13 p2198 A66-26298

Stresses in concentric and eccentric
compound rings 13 p2207 A66-26499

Stresses and displacements in circular
cylinder of transversely isotropic material
for mixed boundary conditions, obtaining
solution by using partial differential
equation 14 p2397 A66-27388

Stress and deformation in cross section of
beam during complex loading, using
steepest-descent method 14 p2400 A66-27685

Mechanical and optical measurements on

plasticized polyvinyl chloride, photoviscoelastic stress analysis and wave propagation effects 14 p2318 A66-27767

Matrix methods for stress and deformation analysis for structures subject to plasticity and creep 14 p2402 A66-27867

Properties of materials for photoplastic stress analysis 14 p2318 A66-27950

Compatibility conditions for stress-strain and Galerkin-Papkovich representations of field equations for linear asymmetric elasticity theory 14 p2408 A66-28392

Stresses and coupled-stresses generated by dislocation in isotropic media treated in terms of boundary value problem for Cosserat medium 14 p2409 A66-28468

Series in function of complex variable applied to mixed problem of elastic equilibrium of annulus 15 p2607 A66-28697

Differential equations describing elastic shells of revolution under physical nonlinearities, noting positive stresses in buckling zone 15 p2611 A66-29422

Plate under plane stress solved in terms of stiffness properties of finite sized model element 15 p2614 A66-29611

General approach to stress analysis in mechanical engineering 16 p2812 A66-30258

Elastic field in inclusion and surrounding matrix 16 p2818 A66-31105

Asymptotic integration of three-dimensional equations of linear elasticity to analyze small deformations of plate which is initially stressed 16 p2818 A66-31106

Anisotropic nonhomogeneous linear viscoelasticity analogy with thermal stresses in terms of Fourier transform 17 p3020 A66-31998

Deflection and stress coefficients for shallow spherical shells of circular ring planform 17 p3021 A66-32007

Thermoviscoelastic stresses in linear viscoelastic materials subjected to slowly moving temperature fields 17 p3024 A66-32358

Linearized theory of free-vibratory motion of cylindrical sandwich shells under state of initial stress 17 p3025 A66-32455

Dynamic elastic response of inner and outer edges of ring to distributed impact loads 18 p3247 A66-33570

Ablation and viscoelasticity effects on vibratory response of hollow viscoelastic cylinder 18 p3247 A66-33572

Nonlinear viscoelastic incompressible materials under small finite deformation for short time ranges, noting kernel functions for tension tests [ASME PAPER 65-APMW-31] 18 p3248 A66-33577

Stress calculation for infinite strip containing straight semilinear crack when clamped boundaries are displaced normal to crack 18 p3248 A66-33583

Viscoelastic contact problem for linear materials and quadratic surfaces of bodies [ASME PAPER 65-APMW-36] 18 p3249 A66-33589

Stress component expressions derived for axisymmetric elastic shell problem in terms of stress resultants, moments and geometry 18 p3250 A66-33605

Asymptotic static analysis of pressurized torus shells, predicting vibratory frequencies and buckling under external pressure [AIAA PAPER 66-445] 18 p3250 A66-33647

Graphical solution to Garofalo equations describing first-and second-stage creep data 18 p3252 A66-33731

Torsion of slit overlapped thin walled tubes, noting change in slope at point of first instability in torque-twist relationship 18 p3253 A66-33802

Stress analysis of junction of thin elastic shells of revolution, considering axisymmetric wind and sinusoidal load distributions 18 p3253 A66-33804

Lifting aircraft structures subjected to acoustic pressures, noting estimation of panel joint rms stress 20 p3666 A66-37422

Experimental stress analysis - Conference, West Berlin, March 1966 20 p3667 A66-37496

Photoelastic measurement of elastic strain fields in semiconductors 20 p3668 A66-37497

Miniaturized piezoresistive transducer pressure diaphragm for experimental stress analysis 20 p3559 A66-37501

Calibration test for phototheological

method of stress analysis in plastically flowing body under plastic work or creep deformation 20 p3671 A66-38101

Stress analysis of elastic cylindrical shell perforated by rectangular cut-out and governed by Donnell equation 20 p3673 A66-38272

Plastic equilibrium flow equations of thin walled shells 21 p3830 A66-38982

Holography, discussing potential uses, frozen wave fields, holograms at X-ray wavelength and stress analysis 21 p3739 A66-39199

Monograph on stress analysis, stability calculations and oscillation estimates for thin walled shells 21 p3831 A66-39278

Stress analysis of difference equations for bending and shear effects in elastic grids 21 p3832 A66-39536

Iterative linear-elastic analysis of plane pin-jointed frames and space ball-jointed frames, accounting for temperature and geometrical changes 21 p3833 A66-39537

Deflection surface of structural net of any arbitrary shape determined by considering net to be portion of larger net with zero deflections along boundaries 21 p3833 A66-39538

Wiener-Hopf and series solutions to BVP of indentation stresses and displacements in infinite hollow elastic cylinder for axisymmetric punch of finite length and arbitrary profile 22 p3990 A66-40139

Equations for analysis of prestressed cylindrical shells made of fiberglass reinforced plastics with hollow fibers, longitudinally and transversely wound 22 p3990 A66-40143

Stressed state near round opening in orthotropic cylindrical shell solved for various loading and boundary conditions by Bubnov-Galerkin variational method 22 p3990 A66-40145

Plane stressed state of nonlinear plate with opening reinforced by thin elastic rod in case of small deviations from Hooke law 22 p3991 A66-40152

Parachute stress analysis during inflation, evaluating magnitude and distribution of snap stress to prevent canopy failure 22 p3850 A66-40604

Structural integrity studies of gravitational and inertial loading effects on British solid propellant grains 23 p4115 A66-41112

Status of aircraft structural design analysis methods, examining structural elastic behavior on basis of stress analysis 23 p4138 A66-41381

Viscoelastic stress analysis for load bearing components made of plastics and polymers, discussing time and thermal effects, irreversibility, solution techniques and design applications 23 p4145 A66-41974

Wave propagation in thermoplastic media, discussing dynamic behavior, formation of wave fronts, velocity, etc 24 p4284 A66-42139

STRESS AND LOAD

Bending of elastic rectangular plates uniformly transverse loaded along axes of symmetry 01 p0154 A66-10468

Plate theory for case of thin elastic deformable circular plate under rotationally symmetrical stress 02 p0296 A66-11243

Design of cylindrical shells for concentrated loads by approximate method 03 p0441 A66-13290

Measurement of creep rate complex stress time relations for copper under loading conditions at 250 degrees C 06 p0897 A66-16949

Loading frequency effects on fatigue strength of 45 and E1612 steel specimens at room temperature 07 p1147 A66-18385

Stress-volume results between 20 and 140 kbar for germanium shock loaded in one-dimensional strain 07 p1108 A66-18419

Symmetrical loading of infinite plate weakened by three circular holes 08 p1306 A66-18704

Griffith theory of brittle fracture and dependence on stress and load 10 p1614 A66-21339

Stress near small hole in center of shell of revolution subjected to action of symmetrical or inversely symmetrical load 12 p1966 A66-24063

Vibration and stability of beams solved for variable length 12 p1970 A66-24784

Parallelogrammic elements in solution deflection and natural frequency of rhombic cantilever plate 13 p2198 A66-282

Destruction of heat resistant alloys repeated heating and cooling, deriving formulas which are applied to thermocycle loads under conditions of stress state 14 p2310 A66-267

Machine part design by limit loads a Mohr circles, using trial and error dimensional minimization 14 p2397 A66-273

Stresses in composite spheroids of two different isotropic elastic materials under compressive forces acting along common axis of revolution 14 p2397 A66-273

Maximum load of thin walled I-beam producing beam surface buckling calculation and total stresses defined 16 p2815 A66-306

Critical stress, stability loss and load carrying capacity of axially compressed thin walled aluminum alloy rods 16 p2819 A66-311

Stress analysis and load induction of small plastic deformations in machine structural elements 18 p3252 A66-337

Multiply connected orthotropic plate variable thickness, discussing bending stresses, load distribution, temperature distribution and boundary load 18 p3256 A66-344

Nonlinearity of relationship between stress and deformation in solids subjected to simple nonisotropic loads 18 p3258 A66-347

Burst hoop test and new ISAS ring test methods for rapid evaluation of hoop strength of filament-wound fiberglass reinforced plastic cylindrical specimens 19 p3472 A66-353

Serrated yielding by metals during tensile tests at temperatures near absolute zero 19 p3380 A66-358

Cryogenic design of aluminum, titanium and steel alloys subjected to uniaxial, 1-to-biaxial and 2-to-1 biaxial stress states 20 p3583 A66-370

Variable load theorem applied to alternating cyclic loads problem, based on equations of small elastoplastic deformations 21 p3830 A66-389

Die friction effects on plane stress and plane strain in plastic bending of steel and titanium alloy beams 21 p3745 A66-395

Classic plane problem of elasticity theory for circular beam 21 p3833 A66-395

Stress wave propagation analysis using exploding wire and hollow cylinder together with measurement of loading condition at response 22 p3992 A66-402

Membrane of constant strength subjected to load uniformly distributed in horizontal plane, using yield condition of maximum principal normal stress 22 p3996 A66-407

Elastic wave radiation possible in collision of unloading wave with shock wave 23 p4054 A66-413

Stresses in shells under arbitrary concentrated loads calculated numerically 23 p4142 A66-419

Creep testing of tubular copper samples under combined tension and torsion with constant and variable loads 23 p4083 A66-419

STRESS CALCULATION

SA ENERGY METHOD STRESS CALCULATION

SA MATRIX STRESS CALCULATION

Toroidal shell stresses and displacements under internal pressure in transition range found by bending and membrane theories [AIAA PAPER 65-145] 02 p0297 A66-115

Rocket fuel tank testing under uniform interior pressure and stress calculation 03 p0430 A66-124

Transverse shear displacements for orthotropic plate of constant thickness determined by iterative method 03 p0439 A66-131

Maximum stress on flat plate stress corrosion strip with ends rotated degrees, using nonlinear bending theory [ASME PAPER 64-WA/AV-3] 04 p0589 A66-140

Stresses calculated in centrifugal impeller with cover disk by two-dimensional stress analysis and digital computer program [ASME PAPER 65-WA/FE-17] 05 p0780 A66-157

Fully stressed iterative design for multiple

- Stress-strain state of plate with circular
hole, noting stress concentration, material
creep properties and solution by successive
approximation
13 p2204 A66-26436

Stress concentration at rectangular hole with rounded corners in nonlinear elastic plates 13 p2204 A66-26437

Stress concentration near hole in shell 13 p2205 A66-26438

Effect of stress concentrations on load carrying capacity of brittle materials of nonuniform microstructure, considering iron plates with holes 13 p2205 A66-26441

Stress concentration at circular hole in orthotropic cylindrical shell, using coordinates system and Bubnov-Galerkin method 13 p2206 A66-26455

Stress concentration at thermally insulated holes in elastic material created by disturbance of uniform heat flow at holes 13 p2206 A66-26459

Approximate solution for stress-strain concentration in plate with central circular orifice during uniaxial tension by distributed load calculated, using Timoshenko method 13 p2207 A66-26495

Stress redistribution in vicinity of holes in polymeric plate under tensile stress 14 p2396 A66-27180

Martensitic transformation of Ni-Fe alloy from fcc to bcc lattice, noting stress produced by chemical free energy difference between austenite and martensite structure 15 p2520 A66-28649

Stress analysis of cylindrical shell with reinforced and nonreinforced circular, square and rectangular cuts under tensile and torsional loads, using photoelastic coatings 15 p2607 A66-28765

Stress concentration near circular cavity in nonlinearly deformable material 15 p2608 A66-28780

Soviet papers on elasticity theory problems concerning stress concentrations, equilibrium and oscillation 15 p2611 A66-29423

Pure bending of beams with hole 15 p2612 A66-29424

Pure bending of orthotropic plate with curvilinear hole reinforced by rigid ring 15 p2612 A66-29425

Stress concentration of isotropic plate weakened by infinite row of elliptical holes 15 p2612 A66-29426

Tension of isotropic plate with two different curvilinear holes studied by successive approximations 15 p2612 A66-29427

Stress distribution of isotropic plate with infinite row of circular holes with elastic cores or elastic ring reinforcement 15 p2612 A66-29428

Plastic strain effect on fatigue strength of aircraft skin sheets with hole subjected to constant loading, noting stress concentration at hole 16 p2815 A66-30678

Transverse cut-out effect on fatigue strength of rotating shaft under constant bending load, noting fatigue stress concentration factor 16 p2815 A66-30679

Stress distribution around reinforced circular holes spaced equally on infinite sheets 16 p2815 A66-30806

Boundary perturbation solution of stress concentration around curved hole in thin plate under elastic bending 16 p2819 A66-31140

Stress-strain distribution near curvilinear holes in moment theory of elasticity of isotropic medium 16 p2819 A66-31143

Cyclic plastic stresses at notch roots in aluminum alloy sheet specimens under constant-amplitude repeated tension and reversed loading 17 p3023 A66-32074

Stress concentration factor for infinite plate in tension containing doubly symmetrical hole with three intersecting circles forming boundary 17 p3023 A66-32081

Elastic stresses around holes in webs of simply-supported wide-flange beams under uniform load 17 p3024 A66-32396

Stress-strain state of annular plate made of incompressible nonlinear elastic material, noting power function describing relation between maximum tangential stress and displacement 17 p3026 A66-32596

Elastic stability of clamped shallow spherical shells under concentrated load, noting buckling modes [ASME PAPER 65-APMW-28] 18 p3248 A66-33575

Stress concentration in nonlinear creep of long thin cylindrical shell loaded at one

edge by symmetrical radial shear and bending moment 18 p3248 A66-33578

Stress concentration factor at circular and elliptical holes in glass-fiber-reinforced plastic plate subject to elongation at angle to orientation direction 18 p3251 A66-33702

Dynamic photoelasticity measurements of stress concentration, using ruby laser monochromatic light 18 p3256 A66-34557

Hereditary theory based on stress and temperature superposition principle applied to metal creep 19 p3473 A66-35754

Elastic stress field due to spherical inclusion or cavity in infinite exterior region, deriving potential energy dependent on strains, noting skin effects and stress concentration factor 19 p3474 A66-36427

Stress concentration in Cosserat bodies compared with elasticity theory, noting stress reduction and role of deformation energy 19 p3475 A66-36640

Cosserat coupled stress and effects on stress concentration factor in semiinfinite solid medium with varying elastic modulus 20 p3667 A66-37466

Stress concentration factors at notches, fillets and circular holes in plates under uniaxial load obtained from equations for elastic stress distribution 20 p3667 A66-37481

Plane contact problem for ring reinforcing junction of cylindrical and spherical shell, determining forces and displacement in ring 20 p3669 A66-37667

Shock waves and stress from cavity collapse, calculating pressures causing surface damage and jet formation 20 p3547 A66-37812

Nondestructive ultrasonic testing in machine and boiler construction engineering, noting material properties and behavior of parts, flaw detection, etc 21 p3743 A66-38939

Stress concentration in elastically deformable bodies under effect of concentrated forces applied to boundaries, with solution of problem for two stress-concentration zones 21 p3829 A66-38975

Moment stress effect on elastic equilibrium of plate with circular opening 22 p3991 A66-40148

Joint designs for reinforced plastic structures, emphasizing unidirectional mechanical properties 22 p3927 A66-40282

Error correction in Vlasov equations of continuity of deformations in curvilinear coordinates 22 p3948 A66-40374

Corrosion fatigue strength of duralumin in presence of stress concentrators, noting parameters of resistance and alloy properties 22 p3935 A66-40679

Elasticity problems solutions as related to stress distribution at holes in shells and plates 23 p4137 A66-41002

Photoelastic determination of stress concentration factor for flat strips notched on both sides under tension 23 p4140 A66-41852

Photoelastic stress-concentration measurements in variously-reinforced circularly shaped cut-outs under uniaxial tension, three-dimensional effects and validity of neglecting bending stiffness 23 p4141 A66-41949

Stress distribution and displacements in neighborhood of circular hole in cylindrical shell subjected to load such as torsion or axial compression 23 p4142 A66-41959

Stress concentration around curvilinear holes in plate, discussing plane problem of elasticity theory and shell theory 23 p4143 A66-41960

Displacement matrix analysis of three-dimensional anisotropic and inhomogeneous elastically deformable bodies represented as tetrahedral assemblies 23 p4146 A66-41989

Series solution to problem of spherically isotropic elastic medium bounded by concentric spherical surfaces, noting force and stress concentration 24 p4285 A66-42141

Rivet attached stringer effect on stress concentration in thin elastic sheet with crack solved, using computer calculations 24 p4285 A66-42143

Membrane stresses in frustum connecting two cylindrical shells with parallel axes 24 p4289 A66-42287

Stress concentration near circular cut in unbounded plane plate and reinforced by

thin walled infinitely long cylindrical shell under tension applied at infinity 24 p4290 A66-42424

Stress redistribution in vicinity of holes in polymeric plate under tensile stress 24 p4290 A66-42727

STRESS CORROSION

Liquid metal embrittlement noting stress and intergranular corrosion, hydrogen embrittlement and behavior of silver chloride crystal 02 p0243 A66-118

Aircraft materials stress corrosion at high temperature discussing test and results in titanium alloys, precipitation hardening steels and superalloys 03 p0380 A66-123

Stress corrosion cracking in titanium alloy in presence of salt, high temperature at sustained stress 03 p0383 A66-130

[AIAA PAPER 65-764] Effect of corrosive environments on various metals and anticorrosion technique to protect metal surfaces 04 p0534 A66-133

Brittle and plastic behavior of hot-pressed polycrystalline BeO noting stress corrosion fractography and X-ray rocking curves 05 p0701 A66-149

Fracture toughness and stress corrosion resistance of several heats of maraging steel compared with results for low-alloy and high work die steel 06 p0897 A66-168

Stress-corrosion cracking, rate of weight loss and surface condition of 70-30 copper zinc alloy in concentrated aqueous ammonia 07 p1053 A66-185

Transmission electron microscopy structural analysis of dislocations in stress corrosion cracking of 7075 aluminum alloy 08 p1236 A66-187

Stress-corrosion failure in metal alloy discussing surface and elastic energy adsorption, crack propagation, pits and tunneling 08 p1241 A66-196

Device for taking long time corrosion fatigue curves on small cross section specimens at high temperatures at pressures 09 p1388 A66-204

Postbuckling behavior of metal plate strip subjected to opposing axial loads, using nonlinear bending theory [ASME PAPER 65-AV-3] 11 p1780 A66-224

Diffusion of electrolytic hydrogen through membranes of iron crystals as function of stress, temperature and dissolved hydrogen concentration 11 p1718 A66-230

Stress corrosion on E glass fibers exposed to water vapor 11 p1720 A66-231

Stress corrosion cracking test employing precracked bar stressed in bending, noting apparatus and results on martensitic steel and titanium alloy 12 p1958 A66-2364

Shot peening for resistance to stress corrosion cracking of high strength steel and aluminum alloys and to improve fatigue life of landing gears, wing spars, jet engine components and other structural parts 13 p2196 A66-2577

Stress-corrosion susceptibility of high strength steel at various levels of tensile yield strength and fracture toughness [ASME PAPER 66-MET-5] 14 p2300 A66-2697

Explosive deformation effect on stress corrosion and mechanical properties of 7075 aluminum alloy 14 p2317 A66-2801

Electron microscope investigation of dislocation effect on stress corrosion cracking in aluminum alloy 15 p2523 A66-2941

Stress corrosion testing to evaluate materials for specific application 15 p2523 A66-2972

Alloying elements effect on aluminum corrosion over wide pH range in water, alkali and 0.1N solutions of anions 16 p2725 A66-3138

Stress corrosion, delayed failures, fatigue corrosion and relation between these phenomena - Commissariat on Atomic Energy, Metallurgical Colloquium, Cadarache, Rhone, France, June 1964 17 p2941 A66-3344

Stress level for crack initiation and propagation and delayed failures in stainless steel used for bolts 17 p2941 A66-3344

Synergistic action of dynamic stresses and fatigue corrosion in metals 17 p2942 A66-3344

time that various strength margin levels are exceeded under combined random stresses, useful to structural design in aerospace industry 13 p2195 A66-25592

Mean velocity, rms velocity fluctuations and Reynolds shear stress for air flow at high Reynolds number in rectangular channel partially roughened, measuring turbulence intensity 13 p2070 A66-26703

Three-dimensional photoelasticity calculation of stresses in spheres with concentric spherical cavities under diametral compression 14 p2401 A66-27769

Interferometric method for determining stress distributions in semiinfinite plate due to loaded pin 14 p2401 A66-27771

Stresses and rate of movement of metal during rolling of flat products 14 p2303 A66-28199

Dual trigonometric integral equations solved, then applied to determining stress field due to crack 14 p2325 A66-28391

Deformation and state of stress of contiguous cylindrical rotationally symmetrical hubs and shafts of various lengths 14 p2409 A66-28459

Stress of isotropic rectangular plate with elastic collar soldered into it under tensile load 15 p2607 A66-28770

Stress distribution in shallow logarithmic shell of revolution 15 p2609 A66-29240

Linearized theory of coupled stress elasticity and stress distributions around simple edge and screw dislocations 15 p2609 A66-29241

Stress distribution in plate with infinite number of equally spaced square reinforced holes situated along axis of plate 15 p2612 A66-29429

Stress distribution in anisotropic plate with equally spaced elliptic holes reinforced by rigid rings 15 p2612 A66-29430

Stress distribution in thin circular annular disk, rotating with variable angular velocity, having transient shearing stress applied on outer edge 15 p2510 A66-29732

Stress distribution near rigid circular inserts attached to thin spherical shells 16 p2816 A66-30859

Stressed state in shells near curvilinear orifices reinforced with thin elastic rings 16 p2822 A66-31623

Stress distribution in anisotropic plate with form of infinite wedge loaded at vertex by concentrated force 17 p3018 A66-31834

Dynamic characteristics of built-up plates analyzed with modified Reissner principle, obtaining natural frequencies and mode shapes 17 p3022 A66-32011

Photoelastic and stress quenching techniques, showing change in stress distribution with crack propagation 17 p3026 A66-32595

Stability of annular plate with nonuniform stress field and nodal diameters arising with stability loss, obtaining solution for radial force intensity ratio 17 p3026 A66-32597

Metal fatigue under randomly distributed stress noting crack propagation, computer solution of integral recurrence relations, etc 17 p3029 A66-32790

Stress distribution in neighborhood of crack in infinitely long elastic strip 17 p3032 A66-33503

Stress field due to circular sliding contact region carrying hemispherical Hertzian normal pressure and proportional distributed shearing traction 18 p3248 A66-33585

Stress distribution in rotating composite sphere 18 p3249 A66-33598

Plane contact problem for circular ring and elastic or absolutely rigid disk, using method of successive approximations 18 p3252 A66-33710

Reduction of plane thermoelastic problem of anisotropic body to determination of three analytical functions of complex variables, solving temperature stress distribution in anisotropic plate 18 p3258 A66-34702

Stresses in spherical planet during accretion due to finite deformation of matter and subsequent change of distance from center of sphere 19 p3348 A66-36260

Stress distribution of notched half-disk with uniform loading of bottom of notch 19 p3474 A66-36303

Existence of solution for equilibrium

problem of circular symmetrically loaded membrane with stress-free contour proven by Chaplygin method 19 p3476 A66-36838

Steady state stress in flat plate with elliptical hole subjected to linear heat source 20 p3669 A66-37575

Chemical etch pitting techniques, determining dislocations in crystal structure caused by liquid droplet impacts, calculating stress distribution due to collision 20 p3547 A66-37806

Stress distribution at vertex of rapidly propagating crack in celluloid sheet of 3 mm thickness studied by polarization technique 20 p3672 A66-38114

Thermoelasticity of semiinfinite state plane with circular coolant holes 21 p3826 A66-38589

Nonsteady state zero-moment creep in shells of revolution with clamped edges under internal pressure, finding change range in stresses in time 21 p3826 A66-38612

Shell stability in Euler formulation, taking into account actual redistribution of stresses that results from initial deflection and creep, noting buckling of closed cylindrical shell under axial compression 21 p3829 A66-38978

Two-dimensional elastoplastic problem of stress distribution in plane with hole under compressive forces at infinity, assuming exponential yield condition controls plastic state of material 21 p3830 A66-38981

Stress and displacement field of plane heat source moving at constant speed through elastic medium 21 p3837 A66-39447

Stress distribution in elastically nonhomogeneous rotating thin circular disk of varying thickness of anisotropic material 21 p3745 A66-39597

Time-dependent stress distribution in annular hereditary-elastic cylindrically-anisotropic plate 22 p3989 A66-39822

Brittle-fracture propagation tests, obtaining relations among crack propagation speed, dynamic-stress distribution, test temperature and applied stress 22 p3994 A66-40435

Flat elliptical crack in infinite elastic medium under shear stress at infinity 22 p3995 A66-40457

Distribution of differential pressure on parachute canopies during inflation using pressure transducers and high speed photography, calculating stress distribution 22 p3846 A66-40600

Elastic deformations in finite plane strain for which stresses are functions of polar angle as in wedge subjected to constant normal and tangential tractions on faces 22 p3996 A66-40702

Photoelastic analysis of stress and strain distributions of case-bonded propellant grains, calculating internal pressure and dependence on mechanical properties of grain material 23 p4120 A66-41440

Energy, linear and angular momentum conservation principles for elastic body with finite number of defects 23 p4091 A66-41855

Stress distribution analysis on contracted section of cylindrical tensile test pieces based on Stassi plasticity condition 23 p4142 A66-41950

Time dependent stress distribution in elastoplastic cyclic deformation, emphasizing cycle hardened stainless steels 23 p4144 A66-41971

Linear viscoelastic bending analysis of anisotropic plates 23 p4145 A66-41975

Notched plates stress distribution solution under conditions of plane stress in elastoplastic domain of straining 23 p4146 A66-41994

Reinforced semiinfinite under concentrated loads, noting flange stress magnitude and distribution 24 p4285 A66-42144

Three-dimensional stresses near border of discontinuity plane under arbitrary loading, obtaining solution for uniform shear applied to surface of crack 24 p4285 A66-42148

Stress intensity factors for single-edge cracks in rectangular sheets with end rotations, reducing stress distribution to Riemann-Hilbert problem 24 p4286 A66-42161

Fiber geometry effect on shear stress distribution in composite materials 24 p4292 A66-42861

STRESS FUNCTION

SA AIRYS STRESS FUNCTION

Two-dimensional electrostriction to examine principal stress singularities angular corners of plates 01 p0153 A66-104

Thin homogeneous shell stability under arbitrary loading, noting equations of stress and deflection

functions 02 p0297 A66-113

Stress function for linear viscoelastic problems where body shape, boundary condition type or both vary with time 02 p0298 A66-115

Compatibility conditions derived from Castigliano principle by three-dimensional stress function 02 p0299 A66-116

Elastic equilibrium of rectangular prism with given stress-vector components lateral surfaces and displacements faces 03 p0435 A66-126

Stress and deformation state in infinite solid corner of elastic body limited by three planes 03 p0442 A66-132

Linear deformation of elastic solid which potential energy-density is function of strain and first and second gradients 04 p0591 A66-141

Influence of anisotropic stress effect on output voltage and frequency of Colpitts oscillator with mesa NPN transistor 04 p0501 A66-142

Thermal stresses due to axisymmetric heat flow past spherical cavity inside long circular cylinder solved by stress function and thermoelastic displacement potentials 08 p1313 A66-195

Integration of Laplace transformed elastokinetic equations, examining stress function, displacement vector field at boundary and initial value problems 10 p1555 A66-212

Algorithm for computer eigenfunction solution of boundary value problems involving partial differential equations for stress functions of semimomentless cylindrical shells 11 p1782 A66-228

Stress function solution in dynamic linear theory of homogeneous incompressible elastic bodies 12 p1962 A66-239

Elastic bending of anisotropic plates with stresses represented by Legendre polynomial series 12 p1968 A66-243

Finite plane strains in solid body problems postulating arbitrary deformation law and arbitrary hydrostatic stresses dependence on volume change, solved by nonlinear equation 13 p2205 A66-264

Plate deflection in own plane under moments applied to ends using elasticity theory, deriving relation between stress tensor and stress function 13 p2205 A66-264

Problem of rectangular plate clamped around transformed into generalized plane stress problem for rectangle 14 p2409 A66-283

Axisymmetric problem in elasticity theory for infinite body weakened by system of periodically distributed coaxial slots of equal radius 17 p3026 A66-325

Extension of Vlasov bending theory for thin shells to include shells with undamped solutions, obtaining partial differential equations for normal deflection and stress function 19 p3472 A66-354

Gunn oscillations in indium arsenide measuring electrical properties of diode noting current voltage characteristics and function of applied stress 20 p3620 A66-377

Shell theory, discussing relationship between stress function tensors and stress function 20 p3673 A66-382

Stress function and displacement vector for linear, homogeneous, isotropic anisotropic elastic material body occupying bounded simply connected region of space 21 p3772 A66-393

Bending of anisotropic cylindrical bodies with curved axis under transverse force 21 p3833 A66-395

Minimum and variational principles in study of stress locking functions and stress strain law of elastic perfectly locking materials 23 p4146 A66-419

STRESS MEASUREMENT

molybdenum 08 p1237 A66-18764
- Test apparatus for continuous

measurement of stress relaxation in metals which are plastically prestrained in compression 09 p1466 A66-19950

Tempering temperature effect of annealed and workhardened steel on structural stability 09 p1391 A66-20863

Plastic deformation by slip in Mo alloy containing 35 atomic percent Re 10 p1546 A66-21239

Stress relaxation of wound reel of magnetic tape, assuming homogeneous and isotropic material, exhibits instantaneous and delayed elasticity, creep under shear and elastic behavior under hydrostatic stress [ASME PAPER 65-WA/APM-8] 10 p1539 A66-21481

Rest period effect on fatigue testing of polyester fiberglass and polymethylmethacrylate plastics under static and intermittent tensile loads 12 p1899 A66-24039

Heat and mass transfer phenomena analyzed, using thermodynamics of irreversible processes and incorporating certain particular data of kinetic and statistical theories 12 p1980 A66-24910

Stress relaxation, stress-strain curve and time-temperature-strain rate equivalence for thermoplastic and viscoelastic polymers 13 p2114 A66-26109

Stress relaxation dependence on heat deformation regime in Ti alloys VT14, VT3-1 and VTS-1 15 p2519 A66-28537

Temperature and creep aftereffect in high purity crystalline cadmium 15 p2523 A66-29600

Creep and stress relaxation as function of slope of master curve in transition region 16 p2818 A66-31068

Plastic deformation by slip in Mo alloy containing 35 atomic percent Re 19 p3381 A66-35862

First-and second-order constitutive equations of viscoelasticity based on mechanical and invariant theory, discussing relaxation under finite twist of incompressible isotropic bar 19 p3475 A66-36639

Stress relaxation technique applied to plastic deformation prior to yielding or fracture in molybdenum above and below ductile-brittle transition temperature 19 p3387 A66-36724

Stress relaxation of gamma irradiated fluorocarbon elastomers to study radiation induced chain scissions in copolymers 20 p3587 A66-37310

Hardness, toughness, stress relaxation, corrosion resistance, etc., of niobium-aluminum alloy with stable elastic modulus 20 p3583 A66-37366

Long-time relaxation persistence in heat resistant nickel-chromium alloy 20 p3584 A66-37696

Steel testing at 580 degrees C during stress relaxation with repeated load increases 21 p3827 A66-38616

Creep relaxation effect on high strain fatigue in chromium and molybdenum steels 23 p4139 A66-41699

STRESS RUPTURE

Hypervelocity impact force per crater surface area correlated to stress-to-fracture of target, experimenting with aluminum and copper as targets and projectiles 01 p0154 A66-10496

Quantitative analysis of stress level, material characteristics or temperature level at which fracture occurs, using electron microscope 01 p0088 A66-10962

Comparison of materials for thermal stress application based on engine operating conditions and considering metal strength 02 p0245 A66-11797

Jahn-Teller effect in excited 4-T-2 state of trivalent Cr ions in ruby, discussing unilateral elastic strain effect splitting of pure electronic line 597 nm in U band 03 p0410 A66-12941

Practical data processing of stress rupture results for steels with elevated operating temperatures, tentative procedure proposed and applied 03 p0384 A66-13161

Parametric formulas for extrapolating creep and stress-rupture data for high temperature steels 03 p0439 A66-13165

Critical loads causing brittle-rupture equilibrium cracks that develop near

elliptical holes in bodies that remain elastic up to fracture 03 p0441 A66-13298

Effect of varying percentages of constituent elements in alumina dispersion-strengthened copper-nickel alloys, listing creep rupture properties 04 p0534 A66-13378

Creep damage in metal, discussing future creep rupture life, exposure, mechanical properties and heat treatment for removing damage 04 p0537 A66-14466

Effects of prior low temperature deformation on subsequent creep rupture behavior of alloys [ASME PAPER 65-WA/MET-14] 05 p0703 A66-15684

Plastic strain fatigue in air and vacuum, discussing strain-life relation for ductile materials and cold weldment of fractures in vacuum [ASME PAPER 65-MET-5] 06 p0895 A66-16203

Fracturing model of surface-hardened materials with triaxial stress at subsurface interface from loading [ASME PAPER 65-MET-2] 06 p0961 A66-16204

Rupture life prediction for several high temperature alloys under linearly increasing stress in nuclear reactors [ASME PAPER 65-MET-1] 06 p0895 A66-16205

Rapid cooling induced stress leads to separation between tin and germanium, creating pure germanium surface at plane of separation 09 p1427 A66-20366

Cleavage characteristics of copper plate under explosive load determined and interpreted, taking finite failure time into account 10 p1613 A66-21238

Tensile, static notch, stress rupture, creep and salt stress corrosion tests at appropriate temperatures, evaluating effect of solution annealing temperatures of Ti-8Al-1Mo-1V 12 p1892 A66-23625

Breaking stresses in two connected elastic half-spaces determined with aid of Griffith-Sneddon criterion 12 p1968 A66-24349

Stress rupture of double extruded wrought alloy of cast nickel-base superalloys 12 p1895 A66-24373

Inhomogeneous elastic half-spaces examined for circular crack in plane of contact and perpendicular tensile forces, using Griffith fracture theory 13 p2203 A66-26421

ASTM-ASME Joint Committee report on high temperature properties of stainless steels such as stress-temperature, yield and rupture curves, etc 14 p2313 A66-27229

Limit load of flat notched bars subject to tension, discussing rupture force magnitude, plastic strain occurrence, rupture stress and yield limit curves, etc 14 p2398 A66-27394

Extruded tungsten composites containing fibered or reacted additives examined, noting stress rupture life, temperature effect, creep properties, density, hardness, etc 16 p2723 A66-30639

Vaporization and creep rupture behavior of type 316 stainless steel 18 p3123 A66-33755

Cleavage characteristics of copper plate under explosive load determined and interpreted, taking finite failure time into account 19 p3474 A66-35861

Creep-rupture strength and metallurgical properties of refractory Mo at 4000 degrees F 19 p3385 A66-36156

Creep design reliability criteria for creep-rupture and critical creep-strain modes of structural element failure, both singularly and combined or bimodally 20 p3571 A66-37941

Book on strength of turbine disks, analyzing material properties, design and operating conditions 21 p3743 A66-38948

Stress rupture properties of tungsten wire at high temperatures, noting effect of primary recrystallization on microhardness, ductility and grain size 21 p3751 A66-39196

STRESS-STRAIN DIAGRAM

Elastoplastic matrix displacement of three-dimensional continua 01 p0152 A66-10343

Stress-aging, differences from strain-aging and effect on tensile properties of various stainless steels 01 p0085 A66-10409

Impact process beyond limits of Hertz theory 01 p0154 A66-10478

Uniaxial tensile data for elastome including stress-strain curve characteristics 02 p0248 A66-114

Creep and fracture of series of nickel cobalt alloys due to variation in stack fault energy, noting incidence of anneal twins 02 p0245 A66-119

High strength structural bolts under static loadings of tension and shear 02 p0301 A66-122

Tungsten crystal deformation and fracture analyzed as orientation function, noting tensile tests and stress-strain curves 03 p0385 A66-131

Longitudinal elastic-plastic pulse propagation for smooth stress-strain curve concave toward strain axis, applied to low bar loaded at end by short pressure pulse [ASME PAPER 65-WA/APM-29] 05 p0778 A66-154

Stress-strain relationships for tension compression and shear of femoral bone loaded longitudinally and transverse [ASME PAPER 65-WA/HUF-7] 05 p0626 A66-156

Two-dimensional problem of disturbance propagation in elastic plate under concentrated load moving along boundary at constant speed, pressure and stress-strain pattern 08 p1305 A66-185

Stress-strain state of infinite plate with two holes of different diameter solved using integral equation derived for two dimensional problem in elasticity theory of anisotropic medium 08 p1314 A66-195

Large displacement bending of rods of constant deformation cross section, negligible shearing forces and exponential stress-strain relation 08 p1314 A66-195

Thin walled shallow shell equations derived for case of nonlinear stress-strain relation 11 p1779 A66-222

Uniform deformation of bimetallic function of uniform deformation of component metals, analyzing stress-strain diagrams 11 p1780 A66-225

Successive approximation method for elastic-plastic plane stress-strain analysis 11 p1781 A66-226

Glass-resin interaction of filament-wound composites, determining material properties and application to high performance pressure vessels 11 p1783 A66-2312

Bending of cylindrical shell clamped at one end and reinforced by elastic ring at free end, with vertical forces uniformly distributed acting over ring 12 p1964 A66-2404

Finite deformations of rotating disk of variable thickness, consisting of elastoplastic strain-hardening material, determined from stress-strain diagram 12 p1964 A66-2405

Stress-strain diagram of alloy and steel disk materials at high rates of straining and characteristic temperatures 12 p1965 A66-2405

Optimum depth, minimum area design charts for laterally supported structural beams in pure bending, discussing weight parameters, elastic buckling, material characteristics, etc 12 p1968 A66-2420

24-channel recorder for stress-strain state due to thermal effects of operating epoxy resin machine components 13 p2080 A66-2591

Stress relaxation, stress-strain curve and time-temperature-strain rate equivalence for thermoplastic and viscoelastic polymers 13 p2114 A66-2610

Impact properties of six materials compared on two falling-weight tensile impact testers, pendulum tester and high speed universal tensile tester, giving stress-strain curves 13 p2197 A66-2611

Stress-strain state and temperature field near circular hole in thermoelastic plate assuming stresses and strains propagate as waves 13 p2205 A66-2643

Stress-strain relations for laminar anisotropic medium from known mechanical properties of layers for application to fiber reinforced plastics 13 p2205 A66-2645

Fatigue tests at high stress levels under rotating bending of carbon steel and material, analyzing stress-strain behavior in plastic fatigue process 16 p2815 A66-3080

High temperature compressive deformation equipment for ceramic materials noting

ag, alignment and stress-strain
 measurement 16 p2682 A66-30950
 on bending theories of sandwich
 plates including use of Fourier series,
 stress-strain state, trigonometry, deflection
 theory, etc 16 p2818 A66-31100
 monograph on nonlinear bending theory of
 layer plates, covering mathematical
 theory of elasticity stress-strain diagrams,
 skin method, maximum deflection
 theory, etc 16 p2819 A66-31136
 numerical analysis of stress-strain rate of
 thin bellows, using differential
 equations 16 p2820 A66-31145
 mechanical properties of solid propellants,
 determining elastic modulus from tensile
 tests via stress-strain 16 p2790 A66-31193
 and flow stress reduction in high
 strength metals during ultrasonic
 vibration 16 p2821 A66-31462
 longitudinal elastic-plastic pulse
 propagation for smooth stress-strain curves
 have toward strain axis, applied to long
 loaded at end by short pressure pulse
 [ASME PAPER 65-WA/APM-29] 18 p3247 A66-33568
 temperature and strain rate effects on
 and flow stresses of alpha titanium
 examined, using continuous and
 differential testing 18 p3122 A66-33748
 isogenic design of aluminum, titanium
 steel alloys subjected to uniaxial, 1-to-1
 and 2-to-1 biaxial stress 20 p3583 A66-37094
 measuring stress-strain relations at high
 strain rates techniques, noting creep or
 strain tests role 20 p3667 A66-37441
 elastoplastic bending of thin annular plates
 free inner edge, based on Mises yield
 criterion and Hencky stress-strain
 relation 20 p3671 A66-38102
 internal nonlinear material damping effects
 on whirling motion of elastic shaft, noting
 response curves for Mentel-Fu stress-strain
 relation 21 p3745 A66-39434
 residual stress determination in elastic
 orthotropic materials, using
 stress-strain relations and Sachs
 equations 22 p3994 A66-40434
 longitudinal and torsional plastic wave
 propagation in thin walled tube, governed
 by four quasi-linear symmetric hyperbolic
 equations of first order with two distinct wave
 speeds 24 p4288 A66-42277
 critical loading and stability of three-layer
 elastic asymmetric shells beyond elastic
 limit for arbitrary stress-strain
 relation 24 p4290 A66-42442
 high cycle fatigue strength of titanium, Cu
 Al alloys correlated with constants of
 isochoric true stress-true strain
 relation 24 p4229 A66-43080
STRESS-STRAIN DISTRIBUTION
 approximation of strains in plastic plates
 shells on basis of nonassociated flow
 theory 01 p0155 A66-10737
 characteristics of flexible circular plate,
 considering stress and strain in friction zone
 clamped section 01 p0160 A66-11181
 buckling deformation and stress-strain
 distributions in clamped thin cylindrical
 shell subjected to axial load, determining
 effect of boundary 02 p0297 A66-11557
 unstrained stress-strain test of Ni-Cr-Mo
 alloy carried out on plane bending plastic
 fatigue testing machine 02 p0243 A66-11580
 conditions for existence of weak
 discontinuity surfaces for general case of
 stress-strain state of ideal isotropic
 incompressible rigid plastic 02 p0301 A66-12021
 dissipation inequalities and relaxation
 integral law of linear 02 p0301 A66-12152
 elastoplasticity 02 p0301 A66-12152
 ad partition in double-lap butt joints for
 ring type connections including
 corrections for stress-strain relationship and
 shear deformation 02 p0302 A66-12242
 stress analysis in inelastic range at
 elevated temperature covering stress-strain
 point/ axially symmetric deformations
 thick-walled sphere and cylinder with
 thermal values 03 p0436 A66-12718
 asymmetric stagnation point flow for
 power law fluids for which rheological state
 relation connecting stress and strain rate

components includes consistency and flow
 behavior of fluid 03 p0358 A66-13091
 Elastoplastic stressed state of plates with
 holes assuming Illushin theory of
 deformation 04 p0587 A66-13489
 Cyclic plastic strain energy and metal
 fatigue shows hysteresis loop develops
 under cyclic conditions 05 p0772 A66-14549
 Tensile tests and strain rates at various
 temperatures on palladium hydrogen alloys,
 noting plastic deformation and strain
 aging 05 p0701 A66-14966
 Stress-strain behavior of tungsten fiber-
 reinforced copper composites, discussing
 room-temperature tensile and dynamic-
 modulus tests 05 p0702 A66-15324
 Cylindrically symmetric tension field
 covering strain gradient effects on potential
 energy of elastic body
 [ASME PAPER 65-WA/APM-14] 05 p0777 A66-15436
 Elastic-plastic stress and strain distribution
 in solid or hollow shaft containing external
 or internal hyperbolic notches
 [ASME PAPER 65-WA/APM-20] 05 p0689 A66-15442
 Stress and strain analysis of sandwich
 plates, formulating and solving problem of
 bending for transversally isotropic layers
 and light core 06 p0964 A66-16477
 Thermal fatigue of constrained bars made
 of linearly hardened material evaluated,
 using mathematical 06 p0967 A66-16969
 Thermal stress of infinite closed circular
 cylindrical shell acted upon by concentrated
 heat source moving along generatrix of
 cylinder 07 p1142 A66-17265
 Approximate method for examining stress-
 strain state of anisotropic body with
 elliptical holes via reduction to infinite
 algebraic system 08 p1304 A66-18591
 Stress-strain state of spherical shell with
 circular reinforcing rings on hole
 rims 08 p1304 A66-18592
 Stress concentration study using third-
 order approximation operators for tangential
 stress components of cylindrical shell with
 elliptical, triangular and square
 holes 08 p1305 A66-18596
 Limiting equilibrium state of round infinite
 plate with circular arc-shaped cracks subject
 to plane tensile loads 08 p1305 A66-18596
 Stress-strain state of elastic space,
 examining circular crack for axial tensile
 load effects 08 p1305 A66-18597
 Asymptotic formulas derived, describing
 stress-strain state of circular cylindrical
 shell subject to concentrated
 heating 08 p1305 A66-18602
 Stress-strain state of axisymmetrically
 heated orthotropic glass-fiber reinforced
 spherical base with circular
 hole 08 p1306 A66-18603
 Deformation of polycrystalline MgO at
 elevated temperatures, with stress-strain
 curves for five types 08 p1243 A66-18773
 Stress-strain state of conical shells of
 variable thickness loaded along generatrices
 and at peripheral points 08 p1312 A66-19433
 Stress-strain relation for strain trajectory
 in form of double-link discontinuous
 lines 08 p1313 A66-19439
 Stress-strain state of shell having one end
 clamped and other under concentrated
 bending moments and concentrated force
 acting along generatrix solved by integral
 equation 08 p1314 A66-19579
 Strain distribution in tensile deformation
 of aluminum alloy coated with gridded
 Prussian blue coating 08 p1241 A66-19716
 Spherical shell bending examined, using
 quasi-linear stress-strain
 relationship 09 p1465 A66-19857
 Residual stress-strain state of WC-Co alloys
 by changing sample size during
 process 09 p1389 A66-20806
 Complex forces method reduces stress-
 strain determination of orthotropic shells to
 determination of orthotropy
 function 10 p1613 A66-21326
 Stress and strain distributions around
 cracks in sheet materials having various
 work-hardening
 characteristics 10 p1614 A66-21340
 Stress-strain calculations for thin walled
 axisymmetric shells with arbitrarily shaped
 midplane based on second-order

theory 10 p1614 A66-21383
 Mechanical and micromechanical behavior
 of bulk polycrystalline boron, emphasizing
 fracture stress and microstrain behavior
 relation to materials response 10 p1548 A66-21727
 Thermodynamics of irreversible processes
 applied to continuum mechanics, deriving
 classical rheological equations 12 p1976 A66-23546
 Cylindrically symmetric tension field,
 covering strain gradient effects on potential
 energy of elastic body
 [ASME PAPER 65-WA/APM-14] 12 p1960 A66-23974
 Elastic-plastic stress-strain distribution in
 solid or hollow shaft containing external or
 internal hyperbolic notches
 [ASME PAPER 65-WA/APM-20] 12 p1885 A66-23977
 Upper bound on displacement rates of
 steady creep problem 12 p1962 A66-24002
 Stress-strain state of shells of revolution
 of variable thickness and elastic parameters
 under effect of external loads and
 secondary strains obtaining strain,
 equilibrium and elasticity
 equations 12 p1963 A66-24043
 Plastic band propagation near circular hole
 for biaxial tension of plate consisting of
 strain hardening material 12 p1967 A66-24114
 Statistical derivation of linear viscoelastic
 equations, relating stresses to minor
 deformation 12 p1969 A66-24355
 Thermal field effect on stress-strain state
 of infinite elastic plane with circular hole
 examined, using Muskhelishvili
 principle 13 p2204 A66-26435
 Stress-strain state of plate with circular
 hole, noting stress concentration, material
 creep properties and solution by successive
 approximation 13 p2204 A66-26436
 Stress concentration at rectangular hole
 with rounded corners in nonlinear elastic
 plates 13 p2204 A66-26437
 Soviet monograph on structural mechanics,
 describing calculation of strength, rigidity,
 stability and oscillations 13 p2206 A66-26494
 Breaking pressure in pipes determined,
 using plastic deformation theory,
 approximating stress-strain distribution
 curve of material 13 p2207 A66-26496
 Influence of plasticity correction factor in
 minimum weight analysis, using Ramberg-
 Osgood relations to define stress-strain
 curve 14 p2398 A66-27424
 Hooke law extension to include term
 expressing dependence of stress on spatial
 variation of strain, noting rotation of
 polarization plane in sound wave propagation
 in isotropic medium 14 p2334 A66-27478
 Conditions for existence of weak
 discontinuity surfaces for general case of
 stress-strain state of ideal isotropic
 incompressible rigid plastic
 body 14 p2399 A66-27582
 Stresses and strains in anisotropic
 multilayered thick walled circular cylinder
 subjected to radial pressure
 [AIAA PAPER 65-174] 14 p2402 A66-27869
 Elastic stress-strain distribution by
 photoelastic method for case-bonded grains
 of solid propellant rocket, noting effect of
 propellant cavity geometry
 [AIAA PAPER 65-190] 14 p2402 A66-27871
 Constitutive equation describing stress-
 strain behavior of metallic and nonmetallic
 materials for strain rate 14 p2405 A66-27993
 Wave propagation in elastic solids with
 linear stress-strain curve 15 p2607 A66-28651
 Solution of plane problem of physically
 nonlinear bodies by method of finite
 differences 15 p2608 A66-28772
 Viscoelasticity and tensile stress-strain
 distribution in fiber-reinforced
 plastics 15 p2524 A66-29340
 Temperature and creep aftereffect in high
 purity crystalline
 cadmium 15 p2523 A66-29600
 Two-dimensional fibrous media theory,
 noting stress-strain states, bodies with
 microstructures, fibrous representation of
 bar structures, etc 15 p2614 A66-29719
 Plastic deformation waves effect on stress-
 strain state at various process rates of sheet
 metal drawing 15 p2510 A66-29777
 Nonlinear deformation theory of plasticity
 for plane strain which approximates

isotropic hardening of von Mises loading surface by isotropic hardening piecewise linear loading surface 16 p2812 A66-30260

Reissner variational formulation of temperature distribution boundary value problem of axisymmetric thermal stresses in isotropic sandwich shells of revolution [ATAA PAPER 66-528] 16 p2814 A66-30611

Equilibrium equations for closed circular cylindrical rib-reinforced shells under arbitrary loading 16 p2819 A66-31138

Stress-strain distribution near curvilinear holes in moment theory of elasticity of isotropic medium 16 p2819 A66-31143

Linear stress-strain relation for expressing tensile stress for nonlinear large elastic deformations 17 p3018 A66-31879

Metal behavior during hypervelocity cratering, noting momentum and energy equations for impulsive loading, including anisotropic stress and strain rate tensors, etc 17 p3022 A66-32013

Stress-strain state of annular plate made of incompressible nonlinear elastic material, noting power function describing relation between maximum tangential stress and displacement 17 p3026 A66-32596

Nonlinear theoretical derivation of creep equations for three-dimensional processes in polymers, based on Boltzmann-Volterra creep heredity concept using stress-strain summation 17 p2943 A66-32807

Plane and spherical wave propagation in locking-type of materials with viscous-type of stress-strain relationship 17 p3031 A66-33077

Shock wave, plane loading and unloading wave propagation in prismatic rod with variable cross section and curvilinear stress-strain relation 17 p3031 A66-33329

Elastic equilibrium of infinite isotropic homogeneous plate with soldered circular isotropic ring 18 p3251 A66-33703

Vlasov variational analysis of stress-strain state of plates and shallow shells under large deflections 18 p3252 A66-33707

Stress-strain state of plane containing crack in nonuniform field of compression stresses, deriving pressure at contact surface 18 p3252 A66-33714

Fluid dynamics equations of state, motion, continuity and energy stress-strain relationship and shearing stress deformations 18 p3098 A66-34120

Viscoelastic stress-strain equations for treating strong material nonlinearities, comparing experimental and theoretical results for solid propellants 19 p3449 A66-36428

Tensile, creep and stress-strain behavior of high nitrogen content stainless steel quenched alloy at cryogenic temperatures 20 p3583 A66-37093

Elastic and elastoplastic distribution of stresses and strains around 45 degree V notch, with circular base determined by photoelastic and moiré techniques 20 p3667 A66-37483

Stress and strain fields caused by straight-line dislocation located in anisotropic elastic plate 20 p3671 A66-38113

Plastic strain distribution near axisymmetric slit in ideally elastoplastic material described by Dugdale model 20 p3673 A66-38269

Elasticity and thermal stress in infinite orthotropic plate exposed to distributed and concentrated heat source 21 p3830 A66-38985

Plane elastic waves of finite amplitude in Hadamard materials and harmonic materials 21 p3771 A66-39274

Whisker reinforcement of metals and effects on linear elastic stress-strain relations 21 p3752 A66-39367

Effect of stiffening ribs on stressed-strained state of shallow symmetrically loaded conical shells, noting reduction of boundary value problem to integration of differential equations 22 p3991 A66-40150

Longitudinal wave in cylinder of viscoelastic material for case of small frequencies, obtaining propagation equations by using stress-strain relations, compatibility conditions and motion equations 22 p3996 A66-40703

Stress-strain determination in elastoplastic problems with aid of photoelastic epoxy resin coating 23 p4135 A66-40990

Stress-strain distribution of sharp corners effect on surface of elastic body, examining mathematical difficulties in application of Lamé equation and boundary data smoothing 23 p4135 A66-40991

Mathematical model of cyclic stress-strain relationship, determining hysteresis loop, damping role, etc 23 p4140 A66-41896

Elastic shell theory, deriving two-dimensional theory from three-dimensional theory, noting boundary condition contraction, stress-strain relations, etc 23 p4141 A66-41936

Damping mechanisms and phenomenology in materials 23 p4145 A66-41985

Equilibrium of elastic sphere with pressing rigid punches 23 p4145 A66-41987

Minimum and variational principles in study of stress locking functions and stress-strain law of elastic perfectly locking materials 23 p4146 A66-41990

Energy method applied in determining upper bounds on displacements due to static and dynamic loading 24 p4288 A66-42273

Stress-strain temperature equations and energy equation with heat conduction for isotropic nonlinear viscoelastic materials, using irreversible thermodynamics 24 p4289 A66-42280

Structural steel design specifications, discussing anisotropy, stress-strain in tension and compression, cold working effects, etc 24 p4289 A66-42285

Stress-strain analysis of critical load-induced crack formation near elliptic or circular hole 24 p4290 A66-42438

Plasticity postulates for stress-strain state variations during plastic deformation cycle 24 p4290 A66-42439

Successive approximation analysis of large deflections of elastoplastic shell under bending deformation and load carrying capacity 24 p4290 A66-42440

Plasticity of bodies with abrupt surface discontinuities analyzed, based on mathematical theory of rigid-plastic nonhardenable bodies 24 p4291 A66-42736

STRESS-STRAIN-TIME RELATION

Difference between dynamic and equilibrium tension in macromolecular chain expressed as functional of variation of nonlinear strain function, developed in kinetic elasticity theory 02 p0261 A66-11427

Probability method for fatigue strength, assessing damage from random values, time variation of stress range and statistical relationships of addition 04 p0594 A66-14400

Damping studies concerned with stress-strain-time properties of materials and structural system 05 p0772 A66-14547

Measurement of creep rate complex stress time relations for copper under loading conditions at 250 degrees C 06 p0897 A66-16949

Neutral-stability elastic equilibrium problems analyzed by theory of finite deformations, taking geometric and physical nonlinear deformation effects into account 06 p0967 A66-17008

Resonance-type fatigue testing machine for variable stress ranges and frequencies from 100 to 400 cps 07 p1147 A66-18387

Axisymmetric creep in cylindrical shells, noting creep buckling collapse after high temperature compression loading [ATAA PAPER 66-123] 08 p1308 A66-19002

Strain rate effects on stress wave propagation in metals, emphasizing one-dimensional relationship 10 p1617 A66-21566

Boltzmann modulus used to predict stress-strain design parameters of viscoelastic materials, including time as variable 11 p1783 A66-23172

Properties of continuum determined experimentally, noting deformed shapes, displacement, strains, stresses, etc, taking advantage of grid, moiré, photoelasticity and other methods 12 p1957 A66-23628

Creep laws in terms of generalized stress-strain rates formulated, noting secondary deformation, Tresca criterion and associated flow rule 12 p1963 A66-24037

Plane stress problems when yielding occurs locally, analyzing deformation using matrix notation, deriving expressions applicable with stress-strain relations 12 p1972 A66-25008

High speed stress-strain testing of

polymers - International Symposium, Boston March 1965 13 p2114 A66-26

Resin-impregnated material response compression testing at intermediate strain rates 13 p2114 A66-26

AMRA high speed tensile tester analysis dynamic stress-strain behavior in beryllium oxide in flexure and in compression 13 p2115 A66-26

Uniaxial tensile test data on stress-strain properties of polymers and elastomers function of strain rate and temperature 13 p2115 A66-26

Diffusion-induced stress concentration cavity, relating deformation diffusion heat conduction via differential equations 13 p2203 A66-26

Dynamic stresses in infinite elastic space with circular cylindrical cavity 13 p2203 A66-26

Soviet monograph on elastic and plastic deformation mechanism, describing strain state of materials, cyclic, variable, reversed load effects, etc 13 p2206 A66-26

Lateral creep deflection vs time relation in nonuniform thermal environments linear polymer column described combination of Maxwell and Volterra elements 14 p2396 A66-27

Gurtin variational principles characterizing linear elastodynamics initial value problem extended to dynamic viscoelasticity theory 16 p2813 A66-30

Linearized theoretical motion equations in orthotropic cylindrical sandwich shells under initial stress, considering free vibrations 16 p2822 A66-31

Physical and mathematical point of view flow and fracture 17 p3021 A66-32

Correlation between survival time of rat under acceleration stress and cerebral level norepinephrine 17 p2855 A66-32

Linearity of mechanical behavior applicability of yield stress master curve analyzed for various crystalline-type polymers 17 p2943 A66-33

Temperature range of nonlinear rigid elastic and viscoelastic behavior in quasi-isotropic polymeric materials and derivation of stress-strain-time relations by method of small parameters 18 p3251 A66-33

Thermodynamics and one-dimensional shock waves in material with memory 18 p3254 A66-33

Strain-energy exposition of creep deflection theory and Ritz-Rayleigh method prediction of creep deformations of laterally loaded circular plates 18 p3256 A66-34

Mechanical construction materials behavior discussing application of creep and plastic laws 20 p3666 A66-36

Linearity, stress, strain, time at birefringence relations in plastic materials, using Hooke law 20 p3668 A66-37

Yield criterion and stress-strain increment relations dependent on isotropic pressure for nonhardening elastic-plastic compression material 21 p3832 A66-39

Strain-time curve of silver containing aligned tungsten wires at high temperature noting reduction of creep rate matrix 22 p3935 A66-40

Creep analysis of stress-strain-time relation in metal with complex loading 23 p4136 A66-40

Time dependent stress distribution elastoplastic cyclic deformation, emphasizing cycle hardened stainless steels 23 p4144 A66-41

Deformation theory of classical continuum in four-dimensional representation, particularly in time derivatives 23 p4144 A66-41

STRESS TENSOR

SA MINKOWSKI THEORY

Nonlinear elastic-plastic theory and multipolar continuum mechanics 01 p0154 A66-10

Small radial vibrations of homogeneous isotropic prestressed sphere 04 p0591 A66-14

Generalized strength criterion for anisotropic materials with different tensile compression and shear strengths 08 p1307 A66-18

Classical statistical mechanics used to obtain expressions for density, distribution

- ctions and other properties of fluid in
librium in potential 10 p1521 A66-21172
strict complementary energy theorem for

ESS WAVE
intermediate stages of wave-type bending
cess in elastic plate investigated by
tem of approximate
thods 01 p0157 A66-10983
ress wave propagation theory for long
s and stepped shafts under impact
ds 04 p0525 A66-13408
aves in bars of mechanically unstable
terials discussing differential equation of
motion, jump conditions, wave velocity and
application to annealed aluminum
[ASME PAPER 65-WA/APM-22]
05 p0778 A66-15444
Photoelastic measurement of dynamic
stresses and loading of structures,
examining impact stress phenomena, stress
waves, vibrations, stress distribution,
etc 08 p1316 A66-19805
Current pulse measurement of thin
polarized ferroelectric ceramic disks
connected by short circuit under stress
wave 10 p1576 A66-21546
Strain rate effects on stress wave
propagation in metals, emphasizing one-
dimensional relationship 10 p1617 A66-21566
Trapezoidal stress waveforms effect on low
cycle corrosion fatigue strength, clarifying
mechanism of corrosion
fatigue 12 p1959 A66-23849
Ultrasonic stress waves effect on physical
properties of metal, particularly acoustic
softening and hardening, plastic
deformation, photoelasticity, dislocations,
etc 12 p1894 A66-24105
Stress field of thermal shock on surface of
spherical cavity in infinite elastic-plastic
body 14 p2399 A66-27457
Algorithm for analyzing transient stress
waves generated in cylindrical shell by
application of impulsive dynamic
loads 14 p2399 A66-27609
Heat transfer and stress wave evolution
prior to ablation and thermal equilibrium in
exposure of solid and liquid materials to
laser sources 17 p2979 A66-32638
Waves in bars of mechanically unstable
materials, discussing differential equation of
motion, jump conditions, wave velocity and
application to annealed aluminum
[ASME PAPER 65-WA/APM-22]
18 p3247 A66-33571
Deformation of solids by impact of liquids
and relation to rain damage in aircraft
and missiles, to blade erosion in steam turbines
and to cavitation erosion - Meeting, London,
May 1965 20 p3546 A66-37801
Stress wave, deformation and fracture
caused by liquid impact, noting analogy with
solid and explosive impact and loading
fracture formation, propagation,
etc 20 p3588 A66-37803
Elastic-plastic and stress shock wave
propagation in finite-length bar with
monotone decreasing cross-sectional
area 22 p3995 A66-40509
STRESSED-SKIN CONSTRUCTION
Airframe and landing gear of Beagle B.206
S series II low-wing monoplane of all-metal
stressed skin construction 22 p3848 A66-39687
STRETCH FORMING
Solar concentrator fabrication for space
power conversion systems, emphasizing
stretch-formed aluminum method
[AIAA PAPER 64-731] 13 p2006 A66-26637
Hot drape forming of torus and
semitoroidal bulkhead segments from
aluminum alloys [SAE PAPER 660290] 15 p2511 A66-29831
STROMGREN METHOD
Flow behind detached shock wave in front
of Stromgren sphere 05 p0758 A66-14537
STRONTIUM
Rubidium-strontium ages of chondrules and
carbonaceous chondrites 02 p0290 A66-11961
Strontium-rubidium age of iron
meteorite 07 p1132 A66-17234
Rubidium-strontium isotopic study of five
types of glass from Bosumtwi crater in
Ghana and Ivory Coast 14 p2284 A66-27602
tektites 14 p2284 A66-27602
Bjurbole chondrite and several separated
phases analyzed for rubidium-strontium
age 14 p2388 A66-28338
Sounding rocket-released artificial
strontium and barium ion cloud motion in
upper atmosphere, based on equations of
ambipolar diffusion 15 p2491 A66-29950
Equivalent widths of spectral lines in solar
spectrum used to determine strontium
abundance 19 p3465 A66-36612
STRONTIUM COMPOUND
Electrical conductivity of single crystals of
calcium and strontium 10 p1581 A66-21878
oxides
Langmuir and Knudsen techniques used to
determine sublimation and vaporization rates
of strontium chloride 13 p2017 A66-25794
STRONTIUM FLUORIDE
Plastic deformation splitting and evolution
of spectral lines and excited level structure
of europium ion in alkaline-earth fluoride
crystals 03 p0409 A66-12717
Frequency and temperature effects on
dielectric properties of calcium, strontium
and barium fluorides 10 p1577 A66-21561
Optical absorption and reflectivity of single
crystals of strontium fluoride and cadmium
fluoride in far UV 17 p2974 A66-31844
STRONTIUM TITANATE
Temperature autostabilization in barium
and strontium titanate solid solutions during
dielectric heating 06 p0927 A66-16723
Piezoresistive properties of reduced
strontium titanate single crystal at various
temperatures and electron
concentrations 08 p1275 A66-19366
Magnetoresistance of reduced and doped
strontium titanate to investigate band
structure 12 p1927 A66-23722
Longitudinal acoustic wave generation by
electrostrictive mixing of two light beams in
single crystals of strontium titanate, rutile
and z-cut quartz 19 p3400 A66-36073
STRONTIUM 89
Radiostrontium ratios in precipitation from
two extratropical cyclones containing
nuclear debris of different
ages 23 p4124 A66-41844
STRONTIUM 90
Vertical distribution and transport of
radioactive strontium aerosols in rain and
air across trade wind inversion at
Hawaii 23 p4124 A66-41843
Radiostrontium ratios in precipitation from
two extratropical cyclones containing
nuclear debris of different
ages 23 p4124 A66-41844
STROUHAL NUMBER
Wake transition and Strouhal number for
incompressible wake of solid cones, spheres,
disks and teardrops 10 p1524 A66-21807
Cavitation effects on periodic wakes
behind symmetric wedges, noting Strouhal
number variation [ASME PAPER 65-FE-15] 12 p1864 A66-24549
Strouhal number relation to cavitation
erosion effect of circular cylinder models
placed in closed circuit channel, in critical
and supercritical Reynolds number
range 14 p2275 A66-27634
Strouhal and Reynolds numbers relation
from data on vortex streets of circular
cylinder in two-dimensional
flow 16 p2688 A66-31299
Strouhal number effect on sound-excited
laminar-turbulent transition in separated
boundary layers formed by round or plane
nozzle 22 p3899 A66-40382
STRUCTURAL BEAM
SA CANTILEVER BEAM
SA I-BEAM
Dynamic matrices for natural vibrations of
missile considered as beam and as thin
walled shell under given boundary
conditions 04 p0587 A66-13534
Shear center location to get bending
without twisting in open section
beams 04 p0588 A66-13799
Beam deflection in creep bending for
statically determinate and indeterminate
cases [ASME PAPER 64-WA/MET-9] 06 p0961 A66-16208
Effect of torsional and lateral restraints on
elastic critical load of centrally loaded
simply supported beam buckling
laterally 06 p0966 A66-16613
Torsion problem of thin walled continuous
beams with open cross
section 06 p0967 A66-16923
Frequency of free oscillations of beam
when two of four boundary conditions for
elastic clamping at both ends contain
nonlinear terms 10 p1613 A66-21325
Frequencies of free lateral resonant
vibration of conical beams and truncated
wedges for all combinations of simply
supported, clamped and free end
conditions 10 p1616 A66-21491
Stability limit of symmetric thin walled
three-dimensionally loaded rods under
arbitrarily distributed and concentrated
conservative transverse and longitudinal
rods 11 p1779 A66-22230

Fundamental natural frequencies calculated for certain common beam configurations 11 p1784 A66-23175

Optimum depth, minimum area design charts for laterally supported structural beams in pure bending, discussing weight parameters, elastic buckling, material characteristics, etc 12 p1968 A66-24201

Vibration and stability of beams solved for variable length 12 p1970 A66-24784

Motion equation for plastic deformation of simply supported beam under impulsive loading 13 p2198 A66-26113

Direct numerical solution by method of characteristics for hyperbolic partial differential equation of Timoshenko beam under moving force 14 p2398 A66-27423

Motion equations for beam with lateral surface thermally insulated, including effects of shear deformation and rotatory inertia and thermoelastic coupling in heat conduction equation 14 p2399 A66-27661

Stress and deformation in cross section of beam during complex loading, using steepest-descent method 14 p2400 A66-27685

Dynamic instability in large of elastic body with given initial velocity and displacement, noting example of curved beam subjected to impulsive loads 14 p2408 A66-28387

Modes and frequencies of transverse vibrations of composite beams 15 p2610 A66-29339

Structural mounting of large diameter cylindrical missile section in centrifuge for high acceleration environmental testing 16 p2677 A66-30458

Small transverse vibrations of linearly viscoelastic Timoshenko beam of incompressible material, detailing free and forced vibration 17 p3024 A66-32361

Bending oscillations of semiinfinite beam with moving end 17 p3030 A66-32815

Rational approximations for lower natural frequencies of uniform beam with concentrated mass or rotary inertia obtained by expanding eigenvalue equation into power series 18 p3249 A66-33599

Theory of beams on elastic foundation used for approximate analysis of cylindrical shells with sufficient number of axial ribs 18 p3254 A66-33827

Subharmonic vibrations during resonant testing of thin walled beams for coupled torsional and bending vibrations 18 p3256 A66-34559

Response data for uniform beam supported on nonlinear springs and subjected to shock, demonstrating usefulness of shock spectra in design situations 20 p3671 A66-37976

Continuous system replacement by lumped parameter models, considering undamped flexural vibrations of beam systems, particularly free vibrations 21 p3825 A66-38581

Rotary inertia and shear deformation as finite approach of kinetic beam and plate problems 21 p3826 A66-38585

Die friction effects on plane stress and plane strain in plastic bending of steel and titanium alloy beams 21 p3745 A66-39528

Classic plane problem of elasticity theory for circular beam 21 p3833 A66-39596

Book on plane problems in elasticity theory for calculation of deep beams with arbitrary boundary curvilinear coordinates 21 p3834 A66-39616

Finite Fourier sine transform method of obtaining closed-form solution, calculating eigenfrequencies for free vibrations of partially fixed beam carrying concentrated masses 22 p3992 A66-40296

Steady state free and forced vibration response of beams supported on nonlinear springs of Duffing type 23 p4140 A66-41913

Plastic theory of structures for collapse under highly localized loading 24 p4286 A66-42152

STRUCTURAL DESIGN

Manned automatic spaceborne structural assembly systems considering sectionalizing, fasteners and kinematics for antenna reflectors, solar concentrators, reentry bodies, etc [SAE PAPER 650787] 01 p0078 A66-10813

Aeroacoustic excitation of aerospace structures for design purposes, sources being jets of gas turbines and rockets and turbulent boundary layers

[SAE PAPER 650823] 01 p0156 A66-10824

Landing gear design challenges for V/STOL service XC-142A and relative success or failure [SAE PAPER 650843] 01 p0012 A66-10848

Space environment effects on optimum multiwall structural design 02 p0298 A66-11640

Structural design and equipment of three-component mobile field station Izmiran-4 that uses quartz sensitive elements for magnetic variation 02 p0232 A66-12123

Recordings 02 p0232 A66-12123

Structural design of transport aircraft to reduce fatalities, analyzing protective shell to withstand ground impact load and fuel containment [AIAA PAPER 65-773] 03 p0434 A66-12592

Toroidal pressure vessels discussing volume and weight characteristics of circular elliptic, modified elliptic, circuliinear, equal stress and zero hoop-stress cross sections 03 p0436 A66-12751

Ideal energy dissipating mechanisms to synthesize weight or mass index in terms of pertinent design indices, structural efficiency and material efficiency parameters 03 p0436 A66-12753

Thrust-control system on XC-142A tilt-wing aircraft considered in connection with structural design of aircraft hover, transition and acceleration [AIAA PAPER 65-769] 03 p0321 A66-13063

Aircraft structural design errors due to use of idealized models 04 p0587 A66-13505

Material distribution in multilayer structures, discussing strain energy minimization 04 p0587 A66-13562

Book on minimum structure weight and effect on design, with application to planar and three-dimensional structures 05 p0774 A66-15064

Design for structural reliability discussing safety factors, probable variations in applied loads, temperatures, materials, geometry and strength 05 p0775 A66-15074

Telescope components and subassemblies, covering structural element analysis techniques on experimental basis 05 p0680 A66-15208

Astronomical telescope, discussing support mechanism design for constant mirror shape 05 p0680 A66-15209

Fully stressed iterative design for multiply loaded structures and relationship to minimum-weight design [AIAA PAPER 65-76] 05 p0781 A66-15785

Stiffened cylinder buckling behavior under compressive load, noting analysis methods [AIAA PAPER 65-79] 05 p0781 A66-15787

Design analysis related to structures using materials exhibiting inelastic responses, noting deformation analysis for operational loads and instability analysis for structural failure 06 p0963 A66-16473

Optimal design for lightweight structures, considering material properties, shape and interaction forces 06 p0963 A66-16474

Optimum structural design based on Michell fields 06 p0966 A66-16901

Structural design with ceramic materials, using prestraining and prestressing for improved tensile and impact strength and stiffness 07 p1054 A66-18501

Digital computer programming for design of cylindrical vessels 08 p1306 A66-18604

Book on space electronics including satellite for TV observation of zero g effects, water reclamation in spacecrafts, ion engines, spacecraft design, etc 08 p1222 A66-18725

System constraint effects on mechanical design of spacecraft structures 08 p1302 A66-18737

Mechanical design of spacecraft including equipment layout in spin-stabilized satellite and stress analysis 08 p1302 A66-18738

Optimum structural and thermostructural design theory for advanced aerospace vehicles 08 p1306 A66-18805

Structural optimization of axially compressed cylinders stiffened externally with rings and/or stringers, noting effect of wall thickness on structural weight 08 p1306 A66-18806

Empirical expression for maximum stress and method of design for elliptic shell vessel 08 p1313 A66-19548

Stresses and elongation of U-shaped bellows subjected to axial load solved by elastic theories of plates and shells 08 p1314 A66-19548

Concorde SST aircraft prototype design and development 09 p1329 A66-20101

Structural design of Concorde supersonic airliner, noting airframe strength parameters 10 p1483 A66-21701

Survey and updating properties available commercial sintered metals, relating them to engineering design requirements 11 p1716 A66-22501

Design-sciences approach for evaluation and selection of materials such as steel, titanium, beryllium, etc, used in idealized structures for aerospace application 11 p1783 A66-23001

Aircraft structure weight reduction, using stress bending and spot welding instead of bolts and rivets 12 p1963 A66-24201

Basic principles of structural design applied to aircraft, discussing loads and strengths and effect of accidents and costs 12 p1971 A66-24901

Stress transducer used as piezoresistive physical sensing element in structural design of plastics 13 p2077 A66-25301

Determination of number of times per unit time that various strength margin levels are exceeded under combined random stresses, useful to structural design in aerospace industry 13 p2195 A66-25501

Optimization of minimum weight multiweb or multiweb wing box structure subjected to vertical shear and unidirectional bending moment 13 p2195 A66-25501

Structural problems associated with variable-sweep winged aircraft 13 p2199 A66-26301

Design, development and structural testing of DH 125 executive jet aircraft [SAE PAPER 660216] 13 p1996 A66-26301

Machine part design by limit loads and Mohr circles, using trial and error dimensional minimization 14 p2397 A66-27301

Structures and materials - AIAA/ASME Conference, Cocoa Beach, Florida, April 1966 14 p2403 A66-27901

Structural design of components for launch, space and reentry vehicles, noting materials, mirrors and antennas for high speed flight, deceleration and landing systems 14 p2404 A66-27901

Structural design load prediction and data collected verification of methods and magnitude by Minuteman flight testing 14 p2392 A66-28001

Static-equivalent load approach to designing structures for vibration environment 14 p2406 A66-28001

Structure and thermal protection system of start program including load paths, heat shield, materials, etc 14 p2407 A66-28001

Structural and heat shield designs for lifting entry vehicles for orbital mission analyzed for effects of wall thickness and weight on vehicle size and total weight 14 p2393 A66-28001

Tank design, optimization program and testing for effect on storage penalties associated with liquid hydrogen for hypersonic aircraft application 14 p2394 A66-28001

Two-dimensional fibrous media theory noting stress-strain states, bodies with microstructures, fibrous representation of bar structures, etc 15 p2614 A66-29701

Manufacturing engineering contributions to design development in new materials and processes [SAE PAPER 660325] 15 p2511 A66-29801

Structural design of various unmanned space vehicles as function of development and technical problems 16 p2807 A66-30201

Reliability of finite automata determined from analysis of elements capable of misalignment, input errors and structural design 16 p2669 A66-30701

Book on design calculations of elements of aviation construction including elastic parameters for finned fillers, shell torsion shell stability, etc 16 p2816 A66-31001

Optimum design in fabricating rock launcher rail, considering use of beryllium and boron carbide materials for weight reduction 17 p3030 A66-32801

Variable geometry structural design

for aircraft wings and tail
17 p2846 A66-32888
Deterministic structural design criteria for
systems based on relation between
element decisions and achieved
quality level
[AIAA PAPER 66-504] 18 p3250 A66-33659
Program producing optimum structural
configurations when restrictions on
loads and aims of design are given as
data
[AIAA PAPER 66-531] 18 p3250 A66-33663
Integrated approach to structural synthesis
three-dimensional truss with arbitrary
number of nodes, members and topology,
two programs of
18 p3253 A66-33800
Variable parabolic reflector /Haystack
radio mechanical design, discussing
structural properties, test program and
conclusion
18 p3255 A66-34281
Re-frame radome design and buckling
analysis for wind and deadweight static load
digital computers 18 p3095 A66-34299
Design and construction of large steerable
antennas, noting difficulties and
advantages 18 p3096 A66-34328
Work on engineering approaches to design
spacecraft structures including analytical
techniques, materials, fabrication, launching,
etc, etc 18 p3258 A66-34714
Metric optics - Seminar, El Paso, March
19 p3399 A66-35823
Structural design relationship to optical
design with reference to tolerance in range
finding instruments 19 p3358 A66-35826
Activity points method for linear
analysis based on structural interpretation
logarithmic sensitivity functions,
including sensitivity
19 p3327 A66-36015
Structural rules determining sensitivity
functions of nonlinear nonstationary systems
derived from sensitivity structure, using
digital computer 19 p3327 A66-36016
External and internal loads and
moment effects on space vehicle,
initially motor case, noting stresses,
structural design, fatigue behavior, safety,
etc 19 p3474 A66-36313
Guided waveguides structure proposed as
wave antenna, extending previous
free-mode theory 19 p3320 A66-36401
Activity theory for solid-media model
analysis, deriving equations of state and
a system of differential equations
on variational
19 p3401 A66-36832
Algorithm used in circuit design,
relating equivalent strain at critical point
to frame structure, verifying it during
stress tests 20 p3665 A66-36880
Work on strength, stiffness and stability of
which structural elements for structural
analysis, emphasizing practical
stability 20 p3666 A66-37010
Dynamic and thermal criteria in
structural design of aircraft and
spacecraft 20 p3628 A66-37393
Statistical analysis of mechanical properties
of Military Handbook 5 design
examples 20 p3567 A66-37898
Structural design factors to achieve
desired level of reliability and correct
design criteria 20 p3567 A66-37905
Resonance methods applied to structural
analysis selection with known reliability
but confidence 20 p3572 A66-37944
Effect of stringer eccentricity effects on
structural optimization of stiffened axially
stressed cylinders 20 p3672 A66-38166
Single structures combining as antenna
arrays, using spaces between bolts of
the joints as slot
20 p3533 A66-38260
Mechanical design requirements, criteria
and processes of Mariner IV spacecraft
duration
[AIAA PAPER 66-MD-63] 21 p3817 A66-38495
Streak structural problems, noting
problems from ground handling to flight and
strength in relation to upper
21 p3818 A66-38641
Staging technique for producing
reliable radar and transponder noting
structural design, reliability, cooling,

outgassing, humidity, etc 21 p3715 A66-39527
Optimization of two-way space frame with
single column supports for minimum weight
of steel by digital language programming
techniques 21 p3833 A66-39539
Digital computer programming to evaluate
designs until optimality is found in
aerospace structures 22 p3922 A66-40023
Joining of materials for aerospace systems
- National Symposium, Dayton, November
1965 22 p3923 A66-40255
Welded titanium wing leading edge design
and manufacture for increased range and
load carrying capacity 22 p3924 A66-40256
Automated minimum weight structural
design for various load conditions,
integrating matrix displacement analysis and
operations research 22 p3995 A66-40490
Rational and optimal programming of
electronic computers, noting application to
structural mechanical
problems 23 p4137 A66-41005
Surface contour and structural
requirements of reflecting panels of
multiple antenna, examining
manufacturing, installation and cost
advantages 23 p4138 A66-41259
Status of aircraft structural design analysis
methods, examining structural elastic
behavior on basis of stress
analysis 23 p4138 A66-41381
Structural design of Japanese SSR,
emphasizing motor and nozzle
characteristics 23 p4133 A66-41425
Minimum-weight design of sandwich shells
subjected to fixed and moving loads,
determining variable thickness of two thin
face sheets 23 p4144 A66-41967
Michell structure design of lightest
framework to equilibrate system of given
forces 23 p4147 A66-41998
Design synthesis relationship derived for
primary structural weight of membrane type
pressure vessels of anisotropic
materials 24 p4286 A66-42151
Plastic theory of structures for collapse
under highly localized
loading 24 p4286 A66-42152
Structural steel design specifications,
discussing anisotropy, stress-strain in
tension and compression, cold working
effects, etc 24 p4289 A66-42285
Structural design problems of hypersonic
air vehicles with air breathing propulsion,
discussing relation to future hypersonic
commercial air transport
[ICAS PAPER 66-31] 24 p4281 A66-42491
Improved central tube configuration to
optimize design of pressurization multicell
cylindrical shell, comparing structural
efficiency with other
shells 24 p4291 A66-42794

STRUCTURAL DYNAMICS

Space-time correlation function of response
of finite cylindrical shell to purely random
pressure field and to subsonic boundary
layer pressure
fluctuations 01 p0147 A66-10131
Introductory book on photoelasticity in
stress analysis and
application 01 p0151 A66-10183
XB-70 vehicle control system sensing, local
force application, coupling and adaptability
for increasing structural mode damping
ratio, thus avoiding disturbing pilot
accelerations and structural
loads 01 p0103 A66-10672
Stressed state of curved rod of rectangular
cross section subject to bending, shearing,
tension and compression determined from
theory of elasticity 01 p0155 A66-10740
Fatigue theory and related phenomena
affecting design for fatigue in
metals 01 p0156 A66-10865
Soviet papers on problems of dynamics and
stability 01 p0158 A66-11171
Structural dynamics of XC-142A tilt-wing
VTOL aircraft including flutter, vibration,
environmental acoustics, etc
[AIAA PAPER 65-790] 03 p0318 A66-12559
Structural dynamic load and instability
problems in launch vehicles and spacecraft
in lunar exploration emphasizing reliability,
crew safety and mission
success 04 p0585 A66-13549
Frequency response function of lightly
damped single-degree of freedom system
estimated from truncated measurement of

cross-correlation function of white noise
excitation and response 05 p0781 A66-15788
Conditions for presence of constant center
of pressure in geometrically-complex body
immersed in fluid of variable density in
stable equilibrium 07 p1031 A66-17408
Mechanics of catenaries for structures and
machines in space, noting equations for
behavior
[AIAA PAPER 66-99] 07 p1037 A66-17899
Simplified method for verifying previously
calculated bar forces in plane trusses
extended to three-dimensional
structures 10 p1616 A66-21492
Dynamic buckling of imperfectly sensitive
models, specifically cylindrical shells under
axial compression 12 p1957 A66-23590
Lagrange equation approach to linear
aeroelasticity in modern aircraft from
structural and aerodynamic
data 13 p1997 A66-26696
Fibrous continuum media theory,
discussing geometrical properties, stress
state, motion equations, boundary value
problems, etc 14 p2397 A66-27383
Structural dynamics/manned space flight
relation, discussing man-machine dynamics,
Apollo command module LF studies, pilot
control of spacecraft and launch vehicle,
etc 14 p2330 A66-28017
Structural dynamics of Gemini program,
discussing environmental prediction,
component testing, docking system, stability,
etc 14 p2393 A66-28018
Elasticity of structural nonhomogeneous
centro-symmetric isotropic bodies, deriving
constitutive equations and differential
equations of equilibrium 14 p2409 A66-28457
Calculating spatial frames by procedures
derived from displacement
method 14 p2409 A66-28458
Torsion analysis of thin walled profile of
bissymmetrical cross section subjected to
finite twist 15 p2615 A66-29722
Matrix force analysis for calculating
stresses and deflections in partitioned
complex structures 16 p2820 A66-31324
Structural dynamics research on launch
vehicles at Langley Research Center,
examining analytical method limitations and
need for improved mathematical models for
vibrational characteristics 18 p3240 A66-33818
Monograph on thin walled rods under
bending and torsion, discussing calculations
in lightweight structure
design 18 p3254 A66-33966
Low altitude high-speed flight from
standpoint of structural loads, particularly
those resulting from gust
encounters 19 p3278 A66-35505
First-and second-order constitutive
equations of viscoelasticity based on
mechanical and invariant theory, discussing
relaxation under finite twist of
incompressible isotropic
bar 19 p3475 A66-36639
Contact problem for elastic rectangle
solved by reducing problem to solution of
quasi-fully regular infinite set of linear
algebraic equations with bounded free
terms 19 p3476 A66-36837
Single point excitation techniques for
resonance testing of structural inertia,
stiffness and damping
matrices 21 p3824 A66-38567
Unconditional stability of Houbolt method
for determining dynamic response of
structures 21 p3828 A66-38713
Corrosion problems with simulated fuel in
launch vehicle models 21 p3750 A66-38799
Monograph on stress analysis, stability
calculations and oscillation estimates for
thin walled shells 21 p3831 A66-39278
Doubly curved axisymmetric shell
construction for structural analysis of shells
of revolution, using direct stiffness
method 22 p3993 A66-40339
Statistical properties of dynamic response
of structure to random load field, examining
simple deterministic
loadings 22 p3993 A66-40359
Structural integrity studies of gravitational
and inertial loading effects on British solid
propellant grains 23 p4115 A66-41112
Applied mechanics - International
Congress, Munich, August-September
1964 23 p4092 A66-41934
Structural dynamics of axisymmetric

deformation of semiinfinite plastic
cylindrical shell under concentrated ring
impact 23 p4147 A66-41999

STRUCTURAL ENGINEERING

Attachment and joining aspects in space
age structures noting selection of materials
[SAE PAPER 650788] 01 p0156 A66-10842
Load displacement, elastic stability and
dynamic response problems, using discrete-
element stiffness matrix technique
[AIAA PAPER 64-488] 02 p0297 A66-11543
Statics and kinematics of rigid bodies in
structural mechanics, establishing isostatic
support conditions 03 p0436 A66-12733
Vacuum and low temperature X-ray camera
for structural analysis of oxidized
materials 04 p0518 A66-13490
Structural mechanics and critical conditions
of fiber composite materials 05 p0773 A66-14907
Finite element structural analysis of
stresses and displacements in axisymmetric
solids of arbitrary geometry
[AIAA PAPER 65-143] 05 p0781 A66-15786
Dimensioning and strength calculations -
Conference, Budapest, October
1965 06 p0963 A66-16472
Book on stress analysis and elastic body
vibration covering stress and strain, bending
moment, shearing forces, mechanical
vibration, torsion, columns, oscillation,
etc 07 p1142 A66-17236
Glass properties, formation and application
to aerospace systems 07 p1054 A66-18301
Book on matrix methods of structural
analysis including truss, beams, coordinate
transformations, force and displacement
methods, programming, etc 09 p1467 A66-20477
Russian studies of elasticity and
plasticity 12 p1965 A66-24056
Dual- and multiple-beam interferometry by
wave front reconstruction from surfaces of
standard engineering components, applicable
to structural dilatation problems 12 p1884 A66-24967
Society of Plastics Engineers, Conference,
Montreal, March 1966 13 p2111 A66-25301
Numerical integration method for digital
computer analysis of structural
frameworks 13 p2198 A66-26223
Soviet monograph on structural mechanics,
describing calculation of strength, rigidity,
stability and oscillations 13 p2206 A66-26494
Decision theory and dynamic programming
applied to problems concerning cost and
weight minimization in structural
engineering 13 p2207 A66-26699
Matrix methods for stress and deformation
analysis for structures subject to plasticity
and creep 14 p2402 A66-27867
Flexibility matrix of structure obtained by
selective inversion of stiffness matrix
15 p2614 A66-29612
Structural analysis by network theory,
matrix formulation and computer
programs 15 p2614 A66-29613
Deflection of structural members in
Haystack antenna calculated, using framed
structure analysis /FRAN/ program,
obtaining improved grid analogy 15 p2614 A66-29616
Solid Mechanics - Conference, Cleveland,
April 1963 17 p3019 A66-31996
Book on manufacturing of welded and
soldered structures of aircraft including
material selection, plasma and ultrasound
techniques, economics, etc 21 p3744 A66-38951
Electronic computer for topological and
geometrical considerations in space
structures analysis 21 p3708 A66-39534
Computer and model analysis as design
tools in structural engineering 21 p3708 A66-39535
Solid state mechanics - All-Union
Conference, Moscow, January-February
1964 23 p4134 A66-40988
Elasticity theory and passing of three-
dimensional problems to two-dimensional
problems 23 p4136 A66-40995
Structural diagram for loading of potential
element transistors operating in complex
logic circuit 23 p4041 A66-41397
Weight-saving structural improvement
possibilities in Japanese SSR /special small
rocket/ 23 p4133 A66-41427
Numerical integration with aid of matrices

for solving differential equations of
structural mechanics 23 p4139 A66-41786
Fundamental modes of non servo-assisted
aircraft control surface 24 p4159 A66-42344

STRUCTURAL ENGINEERING SYSTEMS

SOLVER /STRESS/

S STRESS COMPUTER PROGRAM

STRUCTURAL FAILURE

Probabilistic method of reliability
prediction of high temperature highly
stressed structural parts in optimization of
engineering design 01 p0145 A66-10081
Radiographic acceptance standards for
setting limits on size and distribution of
porosity in steel weldments
[ASME PAPER 64-WA/MET-3] 06 p0884 A66-16207

Design analysis related to structures using
materials exhibiting inelastic responses,
noting deformation analysis for operational
loads and instability analysis for structural
failure 06 p0963 A66-16473

S/N fatigue life gauge for direct measuring
of cumulative fatigue damage to predict
structural failure 08 p1316 A66-19806
Continuous thermal cycling apparatus for
small electronic component samples 10 p1511 A66-21751

Statistical research on g-loadings and
atmospheric turbulence in field of structural
strength limits for sporting
gliders 12 p1801 A66-23855

Time to viscous failure of tubes subjected
to internal pressure and axial
load 12 p1967 A66-24066

Prediction of fatigue failure of structure
subjected to sinusoidal stress cycles of
different amplitude and mean value
[ASME PAPER 65-MET-3] 12 p1970 A66-24555

Microstructural response and tensile failure
mechanisms in solid
propellant 13 p2171 A66-26117

Survival probability of launch vehicle
rising through random wind field
determined from component
responses 14 p2391 A66-27870

Stress corrosion, delayed failures, fatigue
corrosion and relation between these
phenomena - Commissariat on Atomic
Energy, Metallurgical Colloquium, Cadarache,
Rhône, France, June 1964 17 p2941 A66-33440

Stress level for crack initiation and
propagation and delayed failures in stainless
steel used for bolts 17 p2941 A66-33442

Snapping of shallow simply supported
sinusoidal arch under sinusoid step pressure
load, using motion equations and
infinitesimal stability analysis 18 p3257 A66-34591

Laboratory simulation of thermal shock
failure in tungsten under missile firing
conditions 19 p3385 A66-36154

Aircraft structures strength and longevity
obtained by applying standards and criteria
to design and manufacture including static,
fatigue and fail-safe tests 20 p3666 A66-37000

Numerical analysis of safety level of fail-
safe structure with method applicable to
multiload path structures with discrete
elements 20 p3666 A66-37001

Semiconductor transducer strain gauge for
structural deformation measurement by
conversion to resistance variation 20 p3559 A66-37500

Creep design reliability criteria for creep-
rupture and critical creep-strain modes of
structural element failure, both singularly
and combined or bimodally 20 p3571 A66-37941

Thermal and physical properties of
elastomeric internal insulating materials for
solid propellant rocket engine 23 p4120 A66-41116

STRUCTURAL FATIGUE

Acoustical fatigue in aerospace structures -
USAF Conference, Dayton, Ohio, April
1964 01 p0146 A66-10121

Structural response theory and acoustic
fatigue aspects contributing to estimation of
fatigue life of aerodynamic
structures 01 p0147 A66-10122

Fatigue analysis calculations of systems
with non-Gaussian output, using crest and
extremal statistics of 01 p0147 A66-10127

Statistical aspects of height of rise and fall
in continuous random loading relevant to

fatigue failure 01 p0147 A66-10128

Dynamic responses of panel shells and
complete equipment packages to acoustic
inputs to improve fabrication techniques of
flight structures 01 p0149 A66-10142

Fatigue tests of optimized structural
configurations consisting of sandwich panels
containing core layers 01 p0150 A66-10152

Matrix technique to predict structural
fatigue of acoustically loaded
structures 01 p0150 A66-10152

Dimensionless parameter reliability
analysis, deriving system reliability function
as applied to mechanical creep
[ASME PAPER 65-WA/MET-6] 05 p0780 A66-15688

Contact pressure between two bodies with
two contact sections in theory of
creep 07 p1146 A66-18251

Structural fatigue effect on spacecraft
design 08 p1302 A66-18739

Statistical interpretation of fatigue fracture
phenomena in metals, relating development
of successive damage to external loading
processes 12 p1968 A66-24301

Dimensionless parameter reliability
analysis, deriving system reliability function
as applied to mechanical creep
[ASME PAPER 65-WA/MET-6] 12 p1970 A66-24544

Defining fatigue load environment for
business aircraft
[SAE PAPER 660215] 13 p2199 A66-26339

Fail-safe concept application to rotorcraft
noting fatigue requirements, accident
prevention methods, etc 17 p2843 A66-3272

Low altitude high-speed flight from
standpoint of structural loads, particularly
those resulting from gust
encounters 19 p3278 A66-3550

STRUCTURAL FOUNDATION

Site selection, construction features and
acceleration criteria for inertial test
facility 01 p0052 A66-10044

STRUCTURAL HEATING

X-15 aircraft and future research noting
previous flight data on hypersonic
aerodynamics, structural and aerodynamic
heating, etc [SAE PAPER 650657] 02 p0179 A66-12233

Microthruster engines used in subscale
investigations of adjacent spacecraft surface
heating by control rocket plume
impingement and nozzle wall heating
[AIAA PAPER 65-584] 19 p3449 A66-35559

STRUCTURAL INFLUENCE COEFFICIENT

/SIC/
Elasticity determined for axial fir-tree-type
connections of turbine blade
roots 03 p0440 A66-1320

Normal modes of vibration in aircraft
design, noting mass distribution effect on
calculation accuracy 21 p3823 A66-38568

STRUCTURAL MATERIAL

SA PANEL
Beryllium properties and fabrication
process in space application 01 p0085 A66-10361

Transition from aluminum to exotic
materials /Ti, Mb/ in aerospace structures
examining materials behavior and fabrication
processes [SAE PAPER 650790] 01 p0088 A66-10844

Advances attributable to XB-70 program
including aerodynamic concepts, structural
material, design, systems and equipment
development [SAE PAPER 650798] 01 p0012 A66-10844

Titanium and zirconium technology,
comparing physical and mechanical
properties with structural metals, noting
niobium in nuclear application 02 p0244 A66-11744

Honeycomb design, structures,
developments and advantages, discussing
materials and sandwich construction
[ASME PAPER 65-AV-17] 02 p0236 A66-1179

Behavior of materials under dynamic
loading - ASME Colloquium, Chicago
November 1965 02 p0299 A66-1184

Ginzburg-Landau theory for fluxoid
structure in superconducting film in
presence of perpendicular magnetic
field 03 p0409 A66-1260

Structural composite materials component
development program emphasizing design
and fabrication [AIAA PAPER 65-760] 03 p0386 A66-1305

barrier breakthrough in air vs surface transportation by structural weight reduction, using new material [PAPER 65-763] 03 p0382 A66-13058

studies concerned with stress-time properties of materials and structural system 05 p0772 A66-14547

num design employing merit function and weight for structural/material elements and subsystems applied to space [PAPER 65-0785] 05 p0773 A66-15010

stress distributions in pressure vessel walls due to neighboring spherical and tidal cavity interactions [PAPER 64-WA-MET-10] 06 p0961 A66-16206

materials and fabrication techniques for hardware composite materials [PAPER 64-WA-MET-10] 06 p0899 A66-16286

performance assurance for phenolic resin fabric materials used for ablative components in rocket engine hardware and reentry heat shields 06 p0899 A66-16287

diameter filament-wound structure and testing for deep penetration 06 p0886 A66-16304

properties of composite materials and structures 07 p1053 A66-17846

relationship between fabrication, structure and properties of solid rocket motors 07 p1051 A66-18294

propellant rockets including stop-start and variable-thrust engines, structural characteristics, nozzles, thrust-deflection characteristics, etc 08 p1280 A66-18573

-M 509, new cast cobalt-base alloy for high temperature service, creep strength, aging, microstructure, oxidation resistance, etc 08 p1239 A66-18958

one alumina low temperature low-pressure plastic molding technique for forming of ceramic materials for space structural components 10 p1538 A66-21130

aluminum for critical assemblies in space and chemical processing environments 10 p1547 A66-22038

placement bound theorems for working continua subjected to impulsive loading in inelastic materials 11 p1781 A66-22610

mechanical properties of glass fibers resins in order to determine optimum materials for reinforced glass fiber structures [PAPER TP 322] 11 p1721 A66-23200

skin of Diamant 12 p1885 A66-23866

minimum depth, minimum area design for laterally supported structural members in pure bending, discussing weight factors, elastic buckling, material characteristics, etc 12 p1968 A66-24201

improvement of mechanical properties of structural adhesives and composite materials cryogenic temperatures 12 p1899 A66-24385

temperature structural properties of polybenzimidazole, polyimide and phenolic materials under different loading conditions 13 p2113 A66-25311

materials for liquid propellant rocket systems in terms of environments in which performance is required 13 p2109 A66-25778

arc welding of aerospace structural materials and resultant joint properties 13 p2087 A66-26019

effect of stress concentrations on load bearing capacity of brittle materials of uniform microstructure, considering iron with holes 13 p2205 A66-26441

structural effect on DC magnetic behavior at high temperature 14 p2311 A66-26884

space application of aluminum and its alloys 14 p2313 A66-27012

structural design of components for space, space and reentry vehicles, noting materials, mirrors and antennas for high speed flight, deceleration and landing conditions 14 p2404 A66-27991

constitutive equation describing stress-strain behavior of metallic and nonmetallic materials for strain rate 14 p2405 A66-27993

Time, pressure and temperature effects on adhesion of structural metals in vacuum and space environment 14 p2316 A66-28005

Newer titanium alloys compared with present production alloys from closed die forgings in typical airframe and engine configuration 14 p2317 A66-28011

High temperature polyimide and polybenzimidazole honeycomb material, measuring shear and compressive strengths and moduli 14 p2319 A66-28012

Lightweight packageable structurable materials capable of expansion, erection and rigidization in space 14 p2317 A66-28016

Structure and thermal protection system of start program including load paths, heat shield, materials, etc 14 p2407 A66-28024

Preparation and mechanical properties of spinel, discussing microstructure, transverse and compressive strength and Young's modulus 16 p2730 A66-30251

Ceramic materials selection for principal high temperature components of gas turbines 16 p2790 A66-30256

Tolerance limits for structural components in power-filter circuit design, calculating fluctuations of damping property and phase fluctuations in multiply divided circuits 16 p2663 A66-31031

German HFB tubular aircraft construction techniques and light constructional elements 17 p3023 A66-32301

Thermoviscoelastic stresses in linear viscoelastic materials subjected to slowly moving temperature fields 17 p3024 A66-32358

Glass reinforced plastics for helicopter primary structures 18 p3124 A66-33690

Stress analysis and load induction of small plastic deformations in machine structural elements 18 p3252 A66-33706

Vaporization and creep rupture behavior of type 316 stainless steel 18 p3123 A66-33755

Extravehicle manufacture of large space structures from storable tubular members in form of steel strip heat-treated to concave section 19 p3363 A66-35953

Tensile properties of protectively coated refractory metals for structural components in high temperature oxidizing environments 19 p3385 A66-36151

Mechanical construction materials behavior, discussing application of creep and plasticity laws 20 p3666 A66-36951

Book on strength, stiffness and stability of sandwich structural elements for structural designer, emphasizing practical applicability 20 p3666 A66-37010

Reinforced plastic materials evaluated as potential low temperature structural insulators 20 p3676 A66-37084

Detail parts production out of Flomat, structural material composed of polyester resin and woven glass reinforcement for BAC 111 20 p3562 A66-37424

Thermal sterilization environment as significant design condition for planetary lander entry-shield bond-structure combination 20 p3509 A66-38162

Beryllium properties and application in aerospace noting alloy sheet fabrication, temperature effect, toxicity, impact tests, etc 21 p3752 A66-39239

Deflection surface of structural net of any arbitrary shape determined by considering net to be portion of larger net with zero deflections along boundaries 21 p3833 A66-39538

Adhesively bonded joints withstand severe thermal shock and have excellent bonding with high strength structural alloys in cryogenic liquids 22 p3937 A66-39778

Structural composite materials component development program emphasizing design and fabrication [AIAA PAPER 65-760] 23 p4083 A66-40978

Structural materials for oxidizing environments at high temperature analyzed including nickel, cobalt and chromium alloys 23 p4080 A66-41125

High temperature structural properties of glass fabric-reinforced polybenzimidazole, polyimide and phenolic laminates for aerospace application 23 p4083 A66-41389

Laminated reinforced plastics used in construction of jettisonable fuel tank, aircraft equipment components, radomes, missiles and satellite

parts 23 p4074 A66-41654

Elastodynamic buckling of circular cylindrical shells, unstiffened and longitudinal stringers-stiffened 23 p4147 A66-42000

STRUCTURAL RELIABILITY
SA AIRCRAFT RELIABILITY

Efficiency of fail-safe and safe-life designs as design guideposts for static and fatigue loadings 01 p0076 A66-10065

Structural system design technique for reliability and weight tradeoffs using designer equations and characteristics of materials, geometry and operational loads 01 p0145 A66-10085

Aluminum honeycomb sandwich structures under axial compressive loading in reliability safety margin analysis, using derived statistical strength data 01 p0145 A66-10086

Fatigue life and reliability calculations for fail-safe redundant structure 01 p0146 A66-10119

Variable geometry aircraft structural problems including fail-safe criteria, flutter configurations, dynamic loads, etc [AIAA PAPER 65-774] 03 p0438 A66-13064

Numerical reliability of complex structural component against single dominant failure mode, using WSEIAC structural model 05 p0781 A66-15826

Problems of manned spacecraft design such as weight restriction, structural problems, heat protection, thermal control, vibration, etc 11 p1778 A66-23073

Long duration manned spacecraft material and structural requirements in radiation and meteoroid shielding, thermal control, cabin sealing, etc 11 p1778 A66-23074

Structural efficiency of orthotropic materials for cylindrical shells under axial load, including examination of fibrous composites characteristics [AIAA PAPER 65-73] 12 p1956 A66-23583

Task Committee on Factors of Safety, structural reliability and safety evaluation 15 p2614 A66-29614

Predicting structural reliability by recent developments in statistics, reliability, cost effectiveness analysis and decision theory [AIAA PAPER 66-503] 16 p2714 A66-30607

Structural resonant amplitude reduction for increased fatigue life and component malfunction reduction, noting application of internal damping, and use of viscoelastic materials 16 p2715 A66-31201

FAA safety research on aircraft reliability, discussing power spectral gust design, structural strength, turbine performance and lightning strike effects 20 p3540 A66-36992

Lifting aircraft structures subjected to acoustic pressures, noting estimation of panel joint rms stress 20 p3666 A66-37422

Materials problems concerning structural reliability, modes of failure and load and strength distributions 20 p3567 A66-37897

Structural design factors to achieve desired level of reliability and correct testing criteria 20 p3567 A66-37905

Mechanical signature analysis using sound and vibration signals for product assurance and early fault detection 20 p3571 A66-37939

Bounds on reliability, life distributions and open problems for structures 20 p3574 A66-37964

Reliability engineering education at colleges and universities 20 p3686 A66-37969

Reliability engineering education in U.S. and overseas, giving geographic distribution of activities, trends, magnitude, government support, etc 20 p3686 A66-37970

Reliability education, discussing general questions, problems, levels of education, personnel distribution, etc 20 p3686 A66-37971

Structural efficiency of orthotropic materials for cylindrical shells under axial load, including examination of fibrous composites characteristics [AIAA PAPER 65-73] 23 p4138 A66-41107

Strength test results on special small rocket covering bending, stiffness and internal pressure strength of various components 23 p4133 A66-41423

Elastic shell theory, deriving two-dimensional theory from three-dimensional theory, noting boundary condition contraction, stress-strain relations.

etc 23 p4141 A66-41936
Woven and knitted electron emitters
noting reliability, mechanical stability,
transparency and efficiency 24 p4180 A66-42369
Book on project ERIE covering techniques
for analytic evaluation of space equipment
designs with respect to environments and
missions required in 1975 24 p4217 A66-42572

STRUCTURAL RIGIDITY
Creep buckling, examining two-hinged H-
section long column under distributed axial
load and effect on buckling time, column
deflection and numerical results of
example 03 p0436 A66-12720
Stiffness properties of filament wound
structures derived from idealization based
on structural and geometric properties
[AIAA PAPER 66-144] 06 p0962 A66-16409
Strength of structural composites of
orthotropic materials with arbitrary
thickness and orientation including
lamination and anisotropy effects
[AIAA PAPER 65-75] 10 p1617 A66-21781
Analog simulation of nonlinearly rigid
systems for hard and soft elasticity by
electrodynamic analogy
methods 11 p1779 A66-22236
Probability theory to calculate
technological deviations in dimensions effect
on strength and rigidity of thin walled
structures 11 p1782 A66-22858
Inverse problem of stressed state of elastic
plate reinforced by members of known
rigidity under axisymmetric
load 12 p1967 A66-24107
Sliding friction and compression testing of
rigid polyurethane foams 13 p2112 A66-25303
Soviet monograph on structural mechanics,
describing calculation of strength, rigidity,
stability and oscillations 13 p2206 A66-26494
Breaking pressure in pipes determined,
using plastic deformation theory,
approximating stress-strain distribution
curve of material 13 p2207 A66-26496
Shell structures solved numerically, using
network of partial panels 14 p2404 A66-27990
Stiffness, carry-over factor and fixed-end
moment of axially loaded nonuniform
members under tension or
compression 17 p3024 A66-32397
Basic theory derived for nonsymmetric
elastic three-layer sandwich shells of
variable rigidity 17 p3026 A66-32600
Approximation solution to plane bend
problem in thin rod of variable
rigidity 18 p3254 A66-33933
Structural-model analysis of
photoviscoelasticity and photoviscoelastic
materials as rheological problem of
mechanical and optical creep, relaxation and
related phenomena 18 p3257 A66-34562
Nondestructive testing of adhesive bonded
structures using ultrasonic-resonant
instrument, noting detection of voids and
cohesive strength 19 p3362 A66-35329
Critical buckling load at middle plane of
variable-rigidity plate 21 p3832 A66-39376
Initial buckling under shear stress of long
clamped plate with parallel edges reinforced
by stiffener mesh, noting flexural and
torsional rigidity of
stiffeners 22 p3995 A66-40495

STRUCTURAL STABILITY
SA REINFORCED SHELL
Stability of rod clamped at one end and
situated in parallel fluid flow, considering
head resistance and lateral
forces 01 p0007 A66-10736
Soviet papers on problems of dynamics and
stability 01 p0158 A66-11171
Constitutive law of viscoelastic solid
developed from energy
consideration 02 p0297 A66-11309
Variational theorem that is equivalent to
elastic field equations for incompressible
and nearly incompressible
materials 02 p0297 A66-11541
Dynamic plasticity of metals at high strain
rates in quasi-static impact, indirect dynamic
impact and direct dynamic
experiments 02 p0300 A66-11851
Dissipation inequalities and relaxation
integral law of linear
viscoelasticity 02 p0301 A66-12152
Effect of measuring current and preheating
on strains in resin measured with electric-

resistance strain gauges 03 p0433 A66-12316
Discrete critical points of perfect
structural system and three branching
points in general theory of elastic
stability 03 p0434 A66-12370
Static problem of elasticity for random
loads 03 p0434 A66-12829
Shear instability type accompanying shear
deformation of structures and normal to
compressive load direction
[AIAA PAPER 65-770] 03 p0434 A66-12554
Hollow spherical media under uniform
radial loading solved by practical iterative
method over elastic-plastic strain-hardening
range 03 p0435 A66-12670
Structural analysis and experimental
verification of sandwich panels with thin
plastic-film facings and foam-plastic cores
under compression and bending
loads 03 p0437 A66-12769
Transient analysis of matrix equations of
complex structural system, using finite
difference method 03 p0437 A66-12815
Triangular elements under linearly varying
strain used in matrix displacement method
analysis of stability of membranes of
arbitrary anisotropy 03 p0437 A66-12887
Behavior of centrally compressed rod
beyond proportionality limit, noting system
stability 04 p0590 A66-14162
Deformation calculation of
telescope mounting 05 p0680 A66-15207
Full plastic moments in struts, analyzing
problem of member subjected to combined
axial stress and unequal major-axis bending
moments at ends 07 p1142 A66-17257
Elastic equilibrium of rectangular
parallelepiped when boundary conditions on
surface are given in terms of
displacements 07 p1146 A66-18253
Plastic flow of Bingham material upon
moving plane with free
surface 08 p1309 A66-19010
Transient motion of rotary shaft with
flexural deformability varying with
inflection plane 08 p1231 A66-19235
Dimensional stability and structural
integrity of labyrinth seals, considering
various mechanical design criteria in
application to aircraft gas turbines
[SAE PAPER 660048] 09 p1383 A66-20150
Book on elastic stability of plane rigid-
jointed triangulated and nontriangulated
frames 09 p1467 A66-20476
Phase recrystallization effect on structure
and mechanical properties of cast
monophase titanium
alloys 09 p1389 A66-20614
Tempering temperature effect of annealed
and workhardened steel on structural
stability 09 p1391 A66-20863
Ring on three-dimensional elastic
foundation containing all six degrees of
elastic restraint 10 p1618 A66-21956
Probability theory to calculate
technological deviations in dimensions effect
on strength and rigidity of thin walled
structures 11 p1782 A66-22858
Elastic constants and thermal expansion
coefficients of bodies with inhomogeneous
regular structure 12 p1958 A66-23666
Vibration and stability of beams solved for
variable length 12 p1970 A66-24784
Structure and properties of intermediate
components of iron-oxide-germanium-oxide
system analyzed, using heat
treatment 13 p2162 A66-25355
Stability of rod compressed by follow-up
force created by compressed air
discharge 14 p2396 A66-27179
Stability of two-dimensional panels in
supersonic flow when shock wave is
reflecting regularly from surface, using
static aerodynamic
approximation 14 p2398 A66-27417
Self-sustained fracture of stressed brittle
body with assessment of fragment mean
dimension 14 p2399 A66-27594
Operational calculus in determining
strength and deflection of materials
[PST PAPER NT-147] 14 p2401 A66-27791
Creep buckling of column subjected to
arbitrary temperature distribution along
column, considering aluminum
alloy 14 p2403 A66-27971
Individual structural elements connected
into nondetachable structures, using seizing
phenomena, experimenting with sintered

aluminum powder 14 p2303 A66-2816
elements 14 p2303 A66-2816
Stability of variable-structure contri-
systems, noting two-stage motion in line
system stabilization and image point
impingement on switching
surface 15 p2471 A66-2916
Stiffener eccentricity and end moment
effect on stability of cylindrical panel
axial compression 15 p2610 A66-2921
Form stability of shallow convex sk
panels produced by press
forging 15 p2615 A66-2977
Book on dynamics of elastic structures
free flight 16 p2815 A66-3066
Optimal control problem of variab
structure system, deriving necessary ar
sufficient conditions for existence
trajectories 16 p2669 A66-3077
Thermomechanical instability in viscoelastic
structures subject to prescribed F
alternating loads 16 p2820 A66-3127
Low temperature bend ductility ar
microstructure of welded columbium ba
alloys 16 p2725 A66-3147
Solar environment and aerodynamic dr
effect on deflection of structural booms
space
[AIAA PAPER 66-502] 16 p2821 A66-3147
Critical load determination via trial a
error method and transfer and stiffne
matrices 17 p3023 A66-3233
Finite element method using stabl
coefficient matrices in conjunction wi
stiffness matrices for problem of stability
plates 17 p3024 A66-3233
Inelastic buckling strength of aluminu
columns, plates and beams in compressi
and in shear 17 p3032 A66-3347
Structural stability criteria of mann
rotating space stations derived from elas
model experiments
[AIAA PAPER 65-406] 18 p3240 A66-3389
Thin walled box beams under nonuniform
torsion treated by energy
method 19 p3472 A66-3533
Load level as stability loss condition
bulging of elastoplastic rod in presence
creep 19 p3473 A66-3537
Approximation method for checkin
stability of compression members in rig
joint space truss or stability against out-
plane buckling of compression members
rigid-joint plane truss 19 p3475 A66-3647
Electric analogs construction for stabl
and oscillation of elastic
system 20 p3670 A66-3766
Geometric stiffness matrices calculation f
complex structural stability
analysis 21 p3828 A66-3877
Rotating spacecraft attitude changes due
energy dissipation from angular deformati
treated by modal method 21 p3819 A66-3887
Structural stability of near Earth coron
corpuscular system during solar cycl
based on planetary magnetic characterist
for 1937-1958 21 p3813 A66-3913
Elastic constants and thermal expansi
coefficients of bodies with inhomogeneo
regular structure 22 p3988 A66-3977
Static perturbation technique used
analysis of stability relationship to shape
equilibrium surface for finite-dimension
problems 22 p3992 A66-4027
Instability of long thin circular cylind
under axial compression, bending, torsio
shear and external pressure
[ICAS PAPER 66-32] 22 p3996 A66-4066
Stability of rod compressed by follow-
force created by compressed air
discharge 24 p4290 A66-4227
Self-sustained fracture of stressed brit
body with assessment of fragment me
dimension 24 p4291 A66-4227
Optimum sandwiches with rigid uretha
foam core, noting lateral instability a
wrinkling instability 24 p4291 A66-4227

STRUCTURAL STRAIN
SA INTERFACIAL STRAIN
Bearing reactions and stresses of brid
analyzed by calculating bending
rectangular plate with two supported a
two free parallel sides 01 p0155 A66-10736
Selecting stiffness matrices for pla

 Cystamine hydrochloride, strychnine nitrate and hexobarbital injections effect on mice subjected to vibration, noting vibration effect on swimming 15 p2431 A66-28740
 Effects of radiation protective pharmacological agents /cystamine, serotonin, AET, strychnine, etc/ on animals subjected to centrifugation, for application to astronauts 19 p3283 A66-35292

STURM-LIOUVILLE OPERATOR
 Approximate analytical solutions for distributed parameter networks with parameters as functions of spatial variable, using differential equation that reduces boundary value problem to Sturm-Liouville

system 13 p2120 A66-26068
 Sturm-Liouville eigenvalues calculated by phase function 16 p2738 A66-31715
 Iterative approximation method for solution of proper elements /eigenvalue/ of Sturm-Liouville equation 19 p3392 A66-36783

STURM-LIOUVILLE PROBLEM
 Sturm-Liouville series expansion of Bessel functions and Bessel differential equation eigenvalue function 09 p1394 A66-20578
 Numerical solution of nonlinear integro-differential boundary value problems with parabolic operators and retarded argument 15 p2525 A66-28519
 One-dimensional inverse problem of scattering theory, noting differential equation reduction, determining traveling wave coefficient 20 p3519 A66-37993

STYRENE
SA POLYSTYRENE
 Mechanical double refraction of unsaturated copolymer polyesters of styrene subjected at different temperatures to constant tensile stress [ONERA TP 276] 04 p0538 A66-14242
 Statistical variability of ultimate properties for eight samples of SBR-sulfur gum vulcanizates 05 p0706 A66-15460
 Manufacture of scintillator in form of synthetic sheets differing in area and thickness, polymerizing styrene between metallic or glass sheet 13 p2077 A66-25325
 Scintillators stable at 110 degrees C from styrene/divinyl benzene copolymers and additions of phosphors, establishing optimum thermal conditions for block polymerization and determining luminescence yield 13 p2077 A66-25326
 Brewster coefficient as function of temperature, number of cross-linking modes and styrene content for diethylene-glycol succinofumarates copolymerized with styrene 14 p2319 A66-28273

SUBCOOLING
 Saturated vapor spherical bubble collapse in uniformly subcooled liquids 08 p1320 A66-19559

SUBFLUID
S ANISOTROPIC FLUID

SUBGRAVITY
 Subgravity tower and axis results obtained on man and animals, discussing transition from acceleration to weightlessness and vice versa 11 p1641 A66-22480
 Vestibular function in conditions of subgravity 11 p1641 A66-22481
 Mechanics of contained fluids in subgravity 14 p2275 A66-27558
 Otolith organ activity within Earth standard, one-half standard and zero gravity environments and effect of extralabyrinthine factors effect upon counterrolling 15 p2431 A66-28664

SUBHARMONIC OSCILLATOR
 Soviet papers on problems of dynamics and stability 01 p0158 A66-11171
 Amplitude of subharmonic vibrations of even order and frequency limits of excitation for systems described by Duffing equation 01 p0159 A66-11177
 Damping effect on subharmonic vibrations in nonlinear oscillating system 01 p0159 A66-11178
 Growth index and support function for plurisubharmonic functions in convex tubular radial regions 03 p0388 A66-12926
 Second-order subharmonic oscillations in circuit containing varactor diode and consisting of series-connected R and L and closed abrupt p-n junction 11 p1667 A66-22742
 Necessary conditions for subharmonic and superharmonic synchronization in weakly nonlinear systems that permit energy exchange between response at excitation frequency and close to resonance frequency 21 p3772 A66-39355
 Second-order subharmonic oscillations in circuit containing varactor diode and consisting of series-connected R and L and closed abrupt p-n junction 23 p4045 A66-41480

SUBLATTICE DISTRIBUTION RATIO
 Electric properties of titanium carbide as function of number of vacancies in carbon sublattice 01 p0126 A66-10783
 Concentration dependence of thermodynamical functions of interstitial

solid solutions, calculating energy of formation 08 p1258 A66-18897
 Electric properties of titanium carbide as function of number of vacancies in carbon sublattice 11 p1750 A66-22296
 Hardening temperature effect on saturation magnetization and distribution of cations over sublattices in magnesium-base ferrites 13 p2160 A66-25100

SUBLIMATION
SA ABLATION
 Vapor pressure and heat of sublimation of tungsten determined by Langmuir method 04 p0536 A66-13831
 Regularities in solid substance vaporization from probe surface in plasma arc allowing quantitative control without change in atomic excitation characteristics 08 p1266 A66-19770
 Subliming materials chemistry determining parameters governing selection of subliming solids for microthruster engines [AIAA PAPER 65-595] 11 p1759 A66-22460
 Sublimation rate of iron fluoride and identification of vapor species by Knudsen technique, using mass spectrometer 11 p1651 A66-23413
 Epitaxial deposition of silicon by sublimation process at 750 degrees C, using ultrathin alloy zone crystallization 12 p1846 A66-24912
 Langmuir and Knudsen techniques used to determine sublimation and vaporization rates of strontium chloride 13 p2017 A66-25794
 Microscopic and electron diffractational structural analysis of epitaxial growth of PbTe by sublimation on split surface of NaCl at 150 degrees C in vacuum 13 p2170 A66-26757
 Contaminants, outgassing and sublimation in vacua, noting cleaning procedures to reduce contamination and surface reactions 16 p2635 A66-30452
 Sublimation of rhenium and Langmuir method vapor pressure measurements using vacuum microbalance 17 p2938 A66-31882
 Evolution of gases from cometary nuclei by sublimation or desorption 17 p3009 A66-33372
 OH production by sublimation and gas hydrate occurrence in cometary nuclei 17 p3009 A66-33373
 Sublimation pressure of copper fluoride measured via mass spectrometry, noting dissociation energy 19 p3295 A66-36062
 Sublimation rates of pressed-and-sintered lead telluride and lead stannous telluride thermoelements 19 p3281 A66-36294
 Space release mechanism using subliming material 20 p3664 A66-38252

SUBMARINE
S NUCLEAR SUBMARINE

SUBMARINE PROPULSION
 Deep submarine propulsion and marine systems - AIAA Conference, Forest Park, Illinois, February-March 1966 23 p4054 A66-41205

SUBMERGED BODY
 Flow past wing of arbitrary profile below free surface at high speeds treated by conformal mapping 13 p2067 A66-26535
 Potential flow past plate below free surface at high speed 13 p2067 A66-26537
 Forces on hovering slender body of revolution submerged under waves of moderate wavelength, considering beam seas and head seas 13 p2071 A66-26724
 Heat transfer between fluidized bed and submerged cylinder 18 p3267 A66-35056
 Loads on bodies in wakes resulting from crossflow at submerged body or from wake translation over submerged body, noting dynamic instability 22 p3846 A66-40607
 Approximation method for wall effect in cavitation flow around bodies in water tunnel, examining effect of solid boundary on resistance factor 23 p4056 A66-41727
 Vertical impact of spherical solid half-submerged in fluid of finite depth, examining effect of bottom on occurring phenomena 23 p4056 A66-41728

SUBMERSON
S IMMERSION

SUBMILLIMETER WAVE
 Crystalline semiconducting materials for detection, modulation and generation of optical and submillimeter wave radiation 02 p0272 A66-11697
 Absorption coefficient of water vapor in

relative windows of transparency for millimeter and submillimeter radio waves 09 p1343 A66-20338
Submillimeter and millimeter radar and radar astronomy contribution to solar system communications, and planetary and surface studies 15 p2595 A66-29002
Submillimeter spectroscopy using Froome plasma metal junction harmonic generator 15 p2501 A66-29007
Mark I SMASER design, submillimeter wave gas laser capable of continuous wave or pulse operation 15 p2514 A66-29009
118-micron wavelength water vapor gas laser with 4-inch diameter two-meter focal length mirror resonator 15 p2514 A66-29010
Josephson-type superconducting tunnel junction for generation of microwaves and submillimeter waves 15 p2461 A66-29012
Detection scheme for millimeter and submillimeter waves, utilizing system of quantum energy levels to down-convert HF radiation to microwave 15 p2462 A66-29019
Quasi-optical iterated-dielectric-slab rectangular waveguide filters for millimeter and submillimeter wavelengths 15 p2462 A66-29022
Submillimeter wave mixing of output of klystron and output of klystron in crossed-waveguide harmonic generator 15 p2463 A66-29025
Low-distortion modulation of IR and submillimeter waves, using free-carrier absorption in pair of crossed reverse-biased junction diodes 20 p3528 A66-37452
Laser emission interferograms obtained with Fabry-Perot cross-grating interferometer in submillimeter wavelength range 20 p3559 A66-37546
Receiver with n-type indium antimonide detector for investigating absorption spectra in submillimeter wave range 20 p3561 A66-37999
Submillimeter wavelength electronic devices, examining development of lasers and reflected wave tubes with overlapping effective wave range 20 p3580 A66-38004
Multiple cyclotron resonance absorption lines in degenerate valence bands of Ge semiconductor studied with far IR laser submillimeter spectrometer 24 p4257 A66-42545
Harmonic generation and detection in submillimeter wavelength region, emphasizing crystal point contact diode 24 p4176 A66-43191

SUBORBITAL FLIGHT

Physiological and psychological effects on man during U.S. suborbital and orbital flights from Project Mercury 11 p1642 A66-22483

SUBROUTINE

S COMPUTER METHOD

SUBSONIC AIRCRAFT

High bypass high-pressure ratio cycles in turbofans for increased subsonic transport range [AIAA PAPER 65-795] 03 p0415 A66-12561
Turbofan cycle variables affecting subsonic turbofan-powered transport range predicted by graphic method [AIAA PAPER 65-796] 03 p0415 A66-12562
Subsonic and supersonic aircraft navigational systems requirements, discussing pictorial presentation and effect on command function 07 p1075 A66-17788
Moving map displays for navigation information portrayal, advantages and requirements for subsonic and SST airliners 07 p1076 A66-17796
Deformable wing and control surfaces in nonsteady state subsonic regime, noting two methods for determining certain parameters 14 p2221 A66-28109
Subsonic wing design, classical linearization technique used to describe leading edge boundary 15 p2425 A66-29638
Optimum model route structure for North Atlantic subsonic jet 15 p2535 A66-29713
New high by-pass ratio turbofan engine for C-5A subsonic transport aircraft [SAE PAPER 660323] 15 p2428 A66-29843
High bypass high-pressure ratio cycles in turbofans for increased subsonic transport range

[AIAA PAPER 65-795] 19 p3279 A66-36490
Operational cargo handling requirements to make economically feasible supersonic transport and giant subsonic jet 22 p3848 A66-40021
Turbofan cycle variables affecting subsonic turbofan powered transport range predicted by graphic method [AIAA PAPER 65-796] 23 p4015 A66-40972
New jet transports, discussing subsonic, SST and stretched versions of subsonic transports 23 p4016 A66-41302
Passenger and cargo aircraft development 23 p4152 A66-41647

SUBSONIC FLOW

Conformal mapping to calculate exit flow velocity of compressible frictionless subsonic flow through plane blade cascade 01 p0005 A66-10212
Compressibility effect on velocity distribution and gradient at stagnation point in plane subsonic jet incident at arbitrary angle on infinite plate 01 p0007 A66-10474
Flow field about subsonic jet exhausting into quiescent and low velocity air stream [AIAA PAPER 65-704] 01 p0008 A66-10942
High subsonic flow passing choked flat plate cascade with comparatively small pitch chord ratio 02 p0175 A66-11305
Edge suction effect occurring in steady subsonic flow along one of legs of convex corner directed toward edge 02 p0175 A66-11558
Aeroelastic instabilities of simply supported two-dimensional panels in subsonic flow at Mach numbers up to 0.85 [AIAA PAPER 65-772] 03 p0434 A66-12555
Flow past slender bodies of revolution or low aspect ratio wings with finite span or cross-sectional area 04 p0454 A66-13517
Subsonic flow near trailing edge of low aspect ratio delta wing 04 p0454 A66-13518
Turbulent boundary layer pressure fluctuations in subsonic wind tunnel flow and relation to panel vibration response 04 p0509 A66-13535
Two-dimensional problems of gas dynamics with free boundaries, discussing existence and uniqueness of subsonic potential gas flow 04 p0510 A66-13870
Flame stabilization in high-speed subsonic flows, deriving correlation for defining extinction limits, free stream-line velocity and wake breadth 06 p0969 A66-16309
Gas dynamics equation for wing of zero-thickness with two subsonic leading edges in supersonic flow reduced to wave equation 06 p0803 A66-17006
Measurements of three coefficients for rectangular, trapezoidal, sweptback, triangular and parabolic wings in subsonic and supersonic flow 07 p0979 A66-17480
Existence of subsonic jets issuing from curved symmetric channels in plane 07 p0981 A66-18030
Circulation distribution for swept-back wing of finite span and large aspect ratio in subsonic flow by asymptotic method 07 p0981 A66-18033
Second approximation of compressible subsonic flow over given wing profile reduced to regular Dirichlet problem 07 p0981 A66-18110
Compressible subsonic flow with symmetric Zhukovskii profile calculated by correspondence principle 07 p1023 A66-18112
Wall pressure fluctuations in subsonic and supersonic turbulent boundary layer flows related to mean shear and turbulence interactions 07 p1023 A66-18113
Prandtl lifting line classical theory of high aspect ratio wings as singular perturbation problem yields asymptotic expansions of Navier-Stokes solution 07 p0982 A66-18124
Mixed boundary value problem for velocity potential of unsteady perturbation flow past oscillating thin profile in inviscid compressible gas at subsonic speeds 08 p1205 A66-18674
Three-dimensional flow past ellipsoids of revolution with outgoing shock waves, calculating subsonic and supersonic regions 08 p1162 A66-18873
Book on thin wing and aerodynamic characteristics in subsonic gas flow 09 p1327 A66-19975
Two-dimensional steady potential subsonic flow of compressible fluid past circular

cylinder between two parallel walls 10 p1522 A66-21323
Turbulent boundary layer in subsonic or supersonic flow past pinched-waist bodies of revolution at various Mach numbers and pressure gradients 10 p1480 A66-21387
Flow field near leading edge of heated flat plate in Mach 0.5 airflow 11 p1634 A66-22934
Two-dimensional problems of gas dynamics with free boundaries, discussing existence and uniqueness of subsonic potential gas flow 12 p1863 A66-24026
Aerodynamic forces on system of N thin slightly twisted profiles in subsonic unsteady flow for small angle of attack, examining acoustic resonance for arbitrary small harmonic oscillations 12 p1798 A66-24436
Acoustic power emitted by coaxial subsonic jets in relation to aerodynamic parameter 13 p2063 A66-25432
Integral equation for slender wing oscillating in subsonic flow near solid wall 13 p2067 A66-26538
Mathematical and numerical determinations of aerodynamic forces on harmonically oscillating cylindrical shell under subsonic and supersonic speeds and comparison with slender body theory 14 p2218 A66-27405
Problems of various subsonic gas jets of finite width around dihedral obstacle solved with Chaplygin hodographic method 16 p2627 A66-30207
Subsonic flow around circular cylinders using three alternate hodographic approximations to Chaplygin law 16 p2627 A66-30208
Successive approximation method for compressibility in subsonic flow around elliptical cylinder 16 p2627 A66-30209
Planar subsonic flow around circular cylinder using Kisseleff approximation method for compressible fluid 16 p2627 A66-30210
Velocity distribution of subsonic flow around von Mises profile, noting compressibility corrections 16 p2628 A66-30215
Mixed sub-and supersonic gas flow in plane pressure nozzle free of vortex and neglecting viscosity and heat conduction 16 p2630 A66-31289
High-velocity subsonic flow past wedge in wind tunnel with perforated walls, applying solution to optimum parameter determination of suction system 16 p2630 A66-31291
Laminar, transitional and turbulent flow regions in laminar plasma jets, noting variation of noise level and mixing length with Reynolds number at 400 amp 17 p2968 A66-32460
Critical lengths in subsonic and supersonic gas-particle flow in vertical constant area tube, considering effect of governing variables and inlet conditions of system [ASME PAPER 66-FE-19] 17 p2915 A66-33272
Flow field of highly underexpanded axisymmetric jet impinging on flat convex or concave surface calculated by modified inverse method 18 p3100 A66-34600
Aerodynamic pressure on deformable, oscillating and rigid wing surfaces in subsonic flow 18 p3049 A66-34733
Book on aerodynamics of pure subsonic flow including Earth atmospheric structure, fluid flow laws, boundary layer phenomena, subsonic wind tunnel and Magnus effect 19 p3278 A66-36730
Jet deflection in drifting subsonic gas flow 20 p3491 A66-36919
Linearized calculation of subsonic wings with rounded leading edge 20 p3491 A66-36949
Lateral fluid jet visualization for spanwise launching on wing model with low aspect ratio in subsonic flow 21 p3731 A66-39593
Vapor condensation effects on wind tunnel measurements, noting relation between air-moisture and flow field, shock wave intensity increase and density measurements on circular airfoils 22 p3843 A66-39697
Subsonic jet flow past solids, examining two classes of exact solutions in ideal fluid for plane nonvortical steady state flow 22 p3902 A66-40915
Downwash angles behind rectangular wings

- of small aspect ratio calculated at subsonic velocities according to nonlinear theory 23 p4010 A66-41781
- SUBSONIC FLUTTER**
- Stability of laminar boundary layers and wakes at hypersonic speeds, noting existence conditions for subsonic disturbances and effect of hot wake core 13 p2061 A66-25165
- SUBSONIC SPEED**
- Kernel function procedure for solving oscillatory lifting surface problem at subsonic speeds, using least squares method 08 p1165 A66-19149
- Subsonic business aircraft manufacturing processes and techniques relation to production time and costs [SAE PAPER 660206] 13 p2087 A66-26395
- Prediction of drag due to lift of plane wings at subsonic speeds, based on correlation of wind tunnel measurements in terms of viscosity effect on lift curve slope 16 p2632 A66-31664
- Subsonic-supersonic speed jet turbulent mixing 17 p2840 A66-32489
- Parametric study of subsonic characteristics of low-aspect-ratio delta wings, noting role of airfoil thickness and free vortices above wing surface [AIAA PAPER 66-429] 17 p2841 A66-32754
- Integration technique for determining unsteady aerodynamic forces at subsonic speeds, noting role of kernel of integral equation 20 p3491 A66-36955
- SUBSTRATE**
- Substrate specificity of proteolytic enzyme thermolysin /Thermolase/ isolated from bacterial cultures 09 p1338 A66-20582
- Metal film resistor preparation via vacuum evaporation, discussing structure of device, with emphasis on substrate materials, surfaces and properties 13 p2041 A66-25880
- Effect of electrical charge on surface of glass substrate on nucleation density and initial growth structure of thin films of gold prepared by evaporation under ultrahigh vacuum 15 p2466 A66-29683
- Emf expressions for substrate and gate transconductances of MOS transistor 18 p3077 A66-34074
- Substrate properties effect on processing and reliability of tantalum thin film circuits [ACS PAPER 2-S5-65] 21 p3710 A66-38678
- Four-point probe technique to measure conductivity of epitaxial layers on conducting substrates 23 p4110 A66-41157
- SUBSYSTEM**
- SA PERSONNEL SUBSYSTEM**
- Decomposition technique by which convex control programming problem, having coupled subsystem constraints, can be decomposed into smaller subproblems 13 p2117 A66-25349
- Subsystem interfacing in Titan III space launching system, discussing contractual requirements, interface program timing, interface documentation and coordination, review and approval procedures 20 p3687 A66-38186
- SUBTROPICS**
- Stability of expanded circumpolar vortex, using available record of 700-mb subtropical westerly index values for five-day means from 1943 through 1965 07 p1062 A66-17372
- SUCCINIMIDE**
- Mass spectrometric fragmentation behavior of N-n-propyl and N-n-butyl pyrrolidone and N-alkyl succinimides subsequent to electron impact 11 p1651 A66-23412
- SUCTION**
- Torsional oscillations of plane with large suction effect on magnitude of induced axial steady inflow toward surface of disk 01 p0057 A66-10429
- Drag reduction measurements on porous cylindrical bodies with blunt nose and tail sections, using area suction [AIAA PAPER 65-561] 02 p0175 A66-11564
- Flight experiments to assess stalling behavior and handling problems arising in design, maintenance and operation of suction wing for high lift [AIAA PAPER 65-750] 03 p0319 A66-12586
- Influence of suction or injection in boundary layer flow past vertical flat porous plate in presence of uniform magnetic field 06 p0969 A66-16181
- Effect of initial flow turbulence on

- optimum suction of fluid from boundary layer of porous plate 06 p0872 A66-16468
- Linear stability of laminar boundary layers for asymptotic suction profile, obtaining solution of inviscid equation in terms of hypergeometric function 06 p0874 A66-16998
- Book on two-dimensional laminar boundary layers with and without suction noting velocity profile role, wind tunnel models, transition measurements, etc 08 p1208 A66-19355
- Elastico-viscosity, cross-viscosity and suction variation effects on rheological behavior of fluid moving steadily past porous circular cylinder and between two coaxial right circular cylinders 12 p1865 A66-24808
- Decreasing secondary flows in spatial boundary layer on porous plate by boundary layer control /BLC/ through suction or blowing, using Prandtl partial differential equations 13 p2065 A66-26460
- Velocity measurements in turbulent incompressible boundary layer of porous wall with suction 17 p2913 A66-33167
- Navier-Stokes equations solutions for incompressible fluid representing boundary layer flows with suction along corners or cylindrical bodies 19 p3341 A66-35855
- Velocity field and suction effects on viscoelastic flow past porous circular cylinder 21 p3724 A66-38709
- Boundary layer suction in two-component fluid flow around plate solved by method of partial averaging 23 p4056 A66-41568
- SUD-AVIATION SA 330 HELICOPTER**
- French SA 300 military helicopter design, operating characteristics and performance capabilities 05 p0611 A66-15196
- SA 330 tactical helicopter technical development discussing design, test equipment and methods employed 17 p2846 A66-32743

- Strength of certain lines of titanium oxide measured in sunspot spectra, determining rotational temperature 20 p3650 A66-37341
- Pinhole photometric observation of umbra intensity profiles of large sunspot 21 p3808 A66-38469
- Space-and time-dependent variations of magnetic fields of sunspots and faculae based on daily magnetograms for several sequences of 8 to 10 days 21 p3812 A66-38781
- D-3 helium absorption line on solar disk connected to chromospheric flare origin 22 p3984 A66-40851
- Construction of model for chromospheric magnetic field over sunspot 22 p3985 A66-40951
- Spectrum of large sunspot moving across solar disk for various positions with respect to central medium 23 p4127 A66-41079
- Acceleration of plasma cloud from Sun producing geomagnetic storm, noting magnetic cloud squeezed out from sunspot region 24 p4262 A66-42459
- Variation of sunspot magnetic fields attributed to expansion and compression of two different magnetic flux tubes due to interchange 24 p4263 A66-42469
- Magnetospheric phenomena related to geomagnetic tail noting F region, polar auroras and solar Lyman alpha radiation scattering in night sky 24 p4203 A66-43029

SUNSPOT CYCLE

Variation of total ionospheric electron content up to 1000 km between sunspot maximum and minimum measured by Faraday fading of Sputnik III signals 02 p0279 A66-11262

Further evidence of correlation of atmospheric ozone and relative sunspot number 02 p0222 A66-11823

Correlation between lost time due to propagation on HF radio circuits and annual and sunspot cycles 03 p0337 A66-13324

Variations of flux of solar radio emission in 3 to 450 cm range over 11-year cycle /1953 to 1963/ 05 p0748 A66-14868

Cycle of solar activity interpreted via mechanism of oscillatory instability with period of order of ten years 05 p0748 A66-14869

Correlation between solar corona and Wolf number, examining intensity variation effect on chemical and biological tests 07 p1136 A66-17840

Diurnal intensity time variation of cosmic ray neutrons compared with relative number of sunspots observed 07 p1127 A66-18014

Sunspot cycle theory based on hydromagnetic model, with data on solar poloidal field 07 p1138 A66-18073

Scintillation observations of satellite signals noting latitude, diurnal, seasonal and sunspot cycle variations 08 p1183 A66-19208

Prediction of dates and intensities of cycles 20 and 21 of sunspot maxima, discussing evidence that activity may be controlled by positions of Jupiter and Saturn 09 p1453 A66-20184

Periodogram technique to examine periodicity of solar activity 10 p1606 A66-21263

Seasonal variation of F-region parameters at sunspot minimum, noting effects of ionospheric disturbances 11 p1695 A66-22368

Gradual variation observed in time of occurrence of spread-F peak with geomagnetic latitude 11 p1702 A66-23370

Brightness of oxygen bands in twilight and day airglow, relating variation to sunspot cycle, ozone dissociation and solar eclipse 11 p1702 A66-23490

Solar wind as radial flux of electromagnetic inhomogeneities, galactic ray modulation by solar wind and cosmic ray intensity variation with sunspot cycle 12 p1940 A66-24162

Statistical-probability determination of lunar-solar daily and seasonal magnetic variations and geomagnetic effects 12 p1951 A66-24463

Atmospheric density models for solar radiation cycle variation in upper atmosphere [AIAA PAPER 66-355] 12 p1951 A66-24490

Spectrum analysis of nondiurnal E layer variation at Washington, D.C., show relationship of 27-day variations of sunspot number and E layer critical frequency 12 p1874 A66-24845

Auroral hydrogen emission in night sky, noting variance with sunspot cycle and magnetic activity 13 p2073 A66-26029

Association rate between solar flares and type II bursts 14 p2376 A66-27798

Breakdown of biennial oscillation of ozone and of lower stratospheric temperature of Southern Hemisphere and relation to sunspot cycle observations 14 p2286 A66-27904

Outer solar corona during declining portion of solar activity cycle, noting discrepancy between radio and optical values of electron density 15 p2593 A66-28816

Critical ionization frequencies in F-2 layer in near-polar region observed at Northern Hemisphere high latitude stations 15 p2487 A66-29107

Cyclic curves of F-2 layer critical frequencies based on seasonal phase variations in solar cycle 15 p2488 A66-29108

Solar prominences, proton flares and chromospheric flares in intensity of corona and solar radio emission and sunspots, noting maxima during eleven-year solar activity cycle 15 p2576 A66-29136

Polar cap absorption observational results from ionospheric soundings, proton flares before 1956 and prediction for 1966-68 15 p2591 A66-30019

Semiannual wave in recurrence tendency of geomagnetic activity, noting correlation with sunspot cycle 16 p2696 A66-30722

Spectroscopic criteria and parameters for optimal stellar atmosphere obtaining sunspot model via rating system 16 p2803 A66-31260

Sunspot cycles from 1954 to 1964, considering difference in activity observed in Northern and Southern Hemispheres 16 p2804 A66-31311

Equatorial ionospheric drifts observed at Ibadan, Nigeria, during solar activity minimum, and relation to diurnal variation of sunspot cycle and drift velocity variations in E and F region 16 p2700 A66-31759

Sunspot structure organization, relation to solar magnetic field structure, Joule dissipation, etc 17 p3000 A66-32335

Sunspot cycle intensity prediction, noting terrestrial effects, duration, etc 17 p3007 A66-33086

Probable value of time of rise for sunspot cycle no. 20 not occurring earlier than 1968.5 18 p3228 A66-33925

Solar cycle period determined by Fourier transform as applied to truncated sinusoids 18 p3232 A66-34535

Cosmic radiation, interplanetary magnetic field, solar proton propagation long-term /solar cycle/ modulation of intensity, Forbush effect and daily intensity variation 18 p3175 A66-34741

Cosmic ray changes during past three solar cycles observed by balloons, noting hysteresis loop and Zurich sunspot number 18 p3179 A66-34767

Rigidity response of ionization chambers in high atmosphere and deep space for study of rigidity dependence of solar cycle modulation of primary cosmic ray 18 p3179 A66-34768

Cosmic ray nucleon and meson component intensity changes during 11-year cycle, noting asymmetry in modulating mechanism dissipation 18 p3181 A66-34776

First-order cosmic ray modulation, namely production by Sun, diurnal anisotropy, 11-yr cycle and Forbush decrease effect 18 p3186 A66-34810

Ascent and descent in 80-year cycles of solar activity based on Schöve decadal numbers of auroral frequency 18 p3239 A66-35246

Secular variations of cosmic ray intensity governed by 11-year solar cycle 19 p3451 A66-35252

Low and medium frequency absorption measurements at steep ionospheric incidence for demonstrating diurnal, annual and sunspot cycle changes in lower ionosphere 19 p3351 A66-36360

Long-term variation in equatorial sporadic E and electrojet caused by sunspot cycle 20 p3549 A66-37291

SID-AND terrestrial disturbance-causing enhanced solar particle emissions associated with intense solar flares and plasma streams 20 p3634 A66-38212

Magnetic intensity distribution, polarity and macrostructure of solar and interplanetary magnetic fields 20 p3635 A66-38218

Geomagnetic storms occurrence, three types of calm periods and intermittent periods of atmospheric disturbances 20 p3658 A66-38233

Migration in latitude and longitude of individual sunspot groups of cycle 17 21 p3810 A66-38456

Temporary series representing evolution vs time of natural fluctuating phenomena /geophysical, climatic, biologic/ and relation to sunspot cycle 21 p3733 A66-39133

Solar rotation rate determined from longitudinal motion of sunspots, noting parameters of observation 21 p3816 A66-39555

Midlatitude ionospheric electron content variation with season and solar cycle 22 p3911 A66-39984

Enhanced activity in ionospheric E region at Cape Hallett and Campbell Island for information on diurnal variation and sunspot cycle changes of overhead and auroral activity 22 p3916 A66-40809

Auroral disturbances resulting in multipath distortion in propagation by ionospheric reflection and description of chirp

ionosonde and antenna systems 23 p4036 A66-4114

Solar corona pictures during July 1966 eclipse, analyzing polar rays frequency distribution along Sun limb and deviation from radial direction, all linked to solar activity cycle 23 p4123 A66-4181

Equinoxes, having highest solar corpuscular radiation hitting probability, as observational periods for geomagnetic activity, aurora, etc 24 p4274 A66-4243

Ionospheric electron content at temperature latitudes during declining phase of sunspot cycle determined by observation of Faraday effect 24 p4200 A66-4255

SUPERALLOY

High temperature nickel and cobalt superalloys for turbojet engines [AIAA PAPER 65-741] 03 p0382 A66-1305

Lightweight steel and superalloy casting design, describing avoidance of shrinking ceramic-shell molds, X-ray standards and weld repair [ASME PAPER 65-MD-3] 05 p0688 A66-1513

Light and electron microscopic metallography and X-ray diffraction microanalysis of phase reaction during heat treatment of Ni-base superalloy 08 p1236 A66-1875

MAR-M 509, new cast cobalt-base superalloy for high temperature service noting creep strength, aging, microstructure oxidation resistance, etc 08 p1239 A66-18958

Stress rupture of double extruded wrought alloy of cast nickel-base superalloys 12 p1895 A66-24373

Superalloy coatings for gas turbine components assessed, criticizing lack of objective comparative data, noting pack cementation and spray diffusion processes 13 p2108 A66-25652

Effect of vacuum arc remelting of air-melt electrodes on structure and elevated temperature properties of nickel base gas turbine superalloy [ASME PAPER 66-GT-113] 14 p2313 A66-27007

Heat affected zone cracking in nickel-base superalloys attributed to grain-boundary liquification 14 p2314 A66-27343

Sigma-type phase occurrence in austenitic superalloys, discussing electron/atom density, residual matrix composition, etc 16 p2725 A66-31456

Accelerated cavitation damage in liquid sodium and mercury of stainless steels and superalloys under consideration for use in liquid metal power conversion systems 19 p3380 A66-35804

Cleaning and stabilization method for dispersion strengthened materials produced from mechanically produced blends of metals plus oxide powders 22 p3935 A66-40117

SUPERCAVITATING FLOW

Supercavitating flow past straight cascade of arbitrary hydrofoils 07 p1024 A66-18169

Profile of supercavitating lattice traced for certain parameter values, using perturbation theory of perfectly irrotational incompressible fluid 17 p2914 A66-33253

Lift and drag of supercavitating isolated hydrofoil or hydrofoils in cascade, noting characteristics of flat plate and circular arc foils 18 p3100 A66-34642

Wall effect removal on supercavitating flow, estimating effects due to tunnel ducts and boundary layer blocking 18 p3101 A66-34643

Shape and motion of cavities in steady planar supercavitating flows, noting transverse gravity field effect on Helmholtz flow past forebody experiencing drag alone 23 p4062 A66-42059

SUPERCONDUCTING MAGNET

Superconducting magnet with coils in variable-spacing horizontal-axis split pair configuration for plasma physics studies 01 p0054 A66-10853

Superconducting coil degradation, noting flux jumps causing sudden decrease in series current which causes field disturbances throughout coil 02 p0271 A66-11440

Magnetization curve recording system for hysteretic superconductors 03 p0371 A66-13253

Cryogenically cooled superconducting

- Electromagnet design, construction and testing 06 p0907 A66-15935
- Energy losses at input of superconducting coil in type of magnetic flux pump designed by H. L. Laquer 08 p1268 A66-18676
- Superconducting persistent magnets, cryogenic pumping and other low temperature techniques for measuring gravitational forces on charged particles 09 p1379 A66-20083
- Superconductors applied to magnets, lasers and MHD power generation 09 p1429 A66-20674
- Superconducting magnet for variable bandwidth traveling wave masers, noting amplifier bandwidth increase via gain reduction 10 p1542 A66-21417
- Easily fabricated lightweight superconducting magnet designed for use with traveling wave masers 12 p1837 A66-24312
- Space vehicle shielding with two concentric toroidal superconducting coils providing magnetic field for deflection of charged particles 13 p2190 A66-25262
- Coexistence of superconductivity and ferromagnetism in alloy containing paramagnetic impurities explained by spin-orbit interaction of conduction electrons 13 p2169 A66-26566
- Forbidden regions produced by two spatially separate point dipoles with parallel axes 14 p2361 A66-27412
- High field liquid-neon-cooled superconducting electromagnet for cryogenic solid state research 20 p3601 A66-37106
- Superconducting magnetic bottle consisting of two mirror coils, central field coil and quadrupole field coil 20 p3601 A66-37107
- Superconducting magnets, economics, size, weight and application as devices in cryogenic environment [ASME PAPER 66-MD-22] 21 p3741 A66-38479
- AC losses and magnetic field aberrations associated with use of high-field superconducting wire in adiabatic demagnetization apparatus 21 p3804 A66-39381
- Field conditions for optimal current distribution in superconducting coil 21 p3804 A66-39391
- Internal magnetic flux in superconducting solenoid, discussing winding and stability with respect to current jumps 22 p3964 A66-40195
- Spacecraft turboelectric generation system using superconducting field as stator and rotor as armature to deliver 5000 vdc 23 p4023 A66-41764
- Iterative design procedure for optimum placement of vapor deposited Nb-Sn ribbon superconductors in high field large bore modular magnets 24 p4186 A66-43175
- Nb-Zr strip superconductor for stabilization of critical current anisotropy and coil degradation in magnets 24 p4186 A66-43176
- Magnetic losses in superconductors at radio frequencies analyzed in terms of energy dissipation model at local flux trapping centers 24 p4260 A66-43177
- SUPERCONDUCTIVITY**
- SA ELECTRIC CONDUCTIVITY**
- Release of persistent current energy by local heat injection and propagation through Nb-Zr wires 01 p0116 A66-10238
- Screening field and specific heat of superconductivity of sintered niobium stannide at temperatures above 4.2 degrees K 01 p0117 A66-10245
- Superconductivity, surveying history, important parameters and basic formulas 01 p0123 A66-10648
- Superconducting properties of niobium-gallium alloys at high temperatures, high current densities and high magnetic field intensities 01 p0123 A66-10703
- Variations of transition temperature and long-range order parameter of tantalum-tin compacts studied as functions of sintering time and temperature 02 p0271 A66-11441
- Superconducting critical field curves for tin, indium and mercury below one degree K, with entropy difference linear in temperature for free electron gas 02 p0271 A66-11480
- Mean free path influence on transverse collective excitations in strong coupling superconducting alloys 02 p0271 A66-11481
- Superconducting transition temperatures measured for various tin-gallium compositions in quenched and annealed states 02 p0271 A66-11482
- Superconducting states in impurity-free semiconductors created by laser illumination 02 p0242 A66-12091
- Semiconductor superconductivity dependent on presence of different electron states in crystalline films at surface 02 p0277 A66-12277
- Transition temperature dependence on thickness of superimposed films of iron and tin 03 p0407 A66-12323
- Ginzburg-Landau theory for fluxoid structure in superconducting film in presence of perpendicular magnetic field 03 p0409 A66-12604
- Hole-type superconductivity in semiconductors 04 p0565 A66-14265
- Semiconductor superconductivity dependent on presence of different electron states in crystalline films at surface 05 p0738 A66-15456
- One- and two-dimensional superconductivity, discussing effect of thermodynamic fluctuations on off-diagonal long-range order 05 p0718 A66-15865
- Gorkov Ansatz in superconductivity theory exactly satisfied by system of definite number of fermions 06 p0923 A66-16273
- Semiconductor transition to superconducting state, describing field effect action on carriers 06 p0924 A66-16519
- Nonideal superconducting properties of inhomogeneous tin alloys with data on resistive temperature and field transitions, magnetization curves, etc 07 p1107 A66-18411
- Superconducting transition temperature of stoichiometric lanthanum sulfide 07 p1108 A66-18437
- Macroscopic quantum interference effects through superconducting point contacts, with results for several superconductors 07 p1109 A66-18439
- Angular correlation of photons measured for positrons annihilating in normal and superconducting lead without observing any effect on Fermi surface 07 p1109 A66-18440
- Superconducting transition temperatures of Cd-Hg alloys covering complete composition range, considering effect of ordering 07 p1109 A66-18444
- Superconductivity inhibition by normal polarization, noting mechanism of second order suppressive effect 08 p1255 A66-18631
- Superconductivity of tin diffused niobium wires, comparing obtained transition temperature changes with De Sorbo data 08 p1267 A66-18633
- Superconductivity of gallium metastable phase, noting transition temperature and critical field 08 p1267 A66-18649
- Change in Fermi surface topology, induced in superconductor by external pressure, leads to nonlinear variation of transition temperature with pressure 08 p1269 A66-18978
- Effective boundary conditions for interface between superconducting and normal metals 08 p1269 A66-18980
- Spectrum and eigenstates of Bardeen-Cooper-Schrieffer /BCS/ reduced Hamiltonian in theory of superconductivity 08 p1276 A66-19446
- Superconductivity of thin semiconductor films 08 p1277 A66-19617
- Pressure effect and superconducting transition temperature effect on thallium and mercury-impure thallium 09 p1411 A66-19957
- Change in resistance of tin films upon destruction of superconductivity by current 09 p1411 A66-19958
- Superconducting properties and phase composition of silver-gallium alloys 09 p1411 A66-19960

- Thermal and electrical conductivities of molybdenum-rhenium alloys in superconducting and normal states 10 p1573 A66-21178
- Superconducting continuous film store evaluated, noting switching thresholds and

functional dependence of disturb pulse sequences on film 10 p1509 A66-21416

parameters 10 p1509 A66-21416

Superconductivity of composite of fine niobium wire in copper, measuring critical temperature, transverse magnetic field, current density, etc 10 p1575 A66-21535

Superconducting systems partitioned by thin barriers allow supercurrents to pass through, noting magnetic field penetration into barrier, AC supercurrents, structure in DC, current-voltage characteristics of barrier, etc 11 p1756 A66-22978

Superconducting properties of niobium-gallium alloys at high temperatures, high current densities and high magnetic field intensities 11 p1758 A66-23308

Energy gap of clean superconducting thin films of tin in both parallel and perpendicular magnetic fields, using one-dimensional solution of Ginzburg-Landau equation 11 p1758 A66-23396

Superconductivity variation in tantalum noting dependence of critical current, transition temperature and magnetic field on impurity concentration 12 p1927 A66-23856

Superconducting behavior of various close packed low symmetry intermediate phases in various binary systems, noting relation between transition temperature and composition 12 p1928 A66-23939

Deviations from BCS behavior in temperature dependence of ultrasonic absorption in superconducting tin 13 p2158 A66-25056

Existence of superconductivity along domain boundaries in ferromagnetic materials having domain structure when induced by nonmagnetic s-electrons or when only magnetic electrons are present 13 p2166 A66-25919

Voltage drop in direction of current flow produced in superconducting alloys by current perpendicular to magnetic field explained by assuming Abrikosov filaments move under influence of Lorentz force 13 p2168 A66-26022

Indium-cadmium alloy superconducting transition temperatures for varying compositions, noting electronic structure 13 p2169 A66-26278

Partial-wave dispersion in N/D form used to analyze superconductivity 13 p2136 A66-26331

Superconductivity model with exact solution, determining energy levels, ground state energy, excitation spectrum, density variations, etc 14 p2360 A66-27190

Effect of liquation inhomogeneity on superconducting properties of ternary alloy, noting enhancement of critical current density in wire prepared from this alloy 14 p2314 A66-27367

Zirconium-niobium alloy analyzed by oxide replica technique, noting superconductivity and tunnel effect, determining relation between superconductivity current critical density and sample structural characteristics 14 p2314 A66-27368

Superconductivity and origin of magnetic field at nucleus and ferromagnetism problems analyzed in rare earth metals and alloys 14 p2362 A66-27461

Neutron irradiation effect on superconductive properties of tin and indium foils at low temperatures, noting decrease of critical temperature and field 14 p2364 A66-27641

Frequency sweep method of measuring relaxation times and determining Q value in high Q superconducting cavities 14 p2258 A66-27955

Josephson effect in superconducting bodies 14 p2370 A66-28355

Effect of temperature changes on flux-jumping behavior of niobium stannide superconducting solenoids in superfluid helium 15 p2560 A66-28686

Heat treatment effect on superconducting properties of cold-worked niobium, noting results of magnetization, critical current and resistivity measurements 15 p2564 A66-28760

Surface structure and superconductive properties of electrodeposited tin films 15 p2564 A66-28761

Text on experimental low temperature physics covering experimental techniques, liquid helium, superconductivity and

electronic properties in metals 15 p2566 A66-29320

Superconductivity transition in tungsten 16 p2768 A66-30137

Electronic density of states of superconducting ferromagnetic alloys determined by static electron-impurity exchange interaction 16 p2768 A66-30148

Subharmonic structure in superconductive Pb-Pb tunneling junctions, noting energy gap values and background current temperature dependence 16 p2769 A66-30160

Polarized-neutron scattering by tri-vanadium silicide, identifying electronic susceptibility and modification in passing through superconducting transition 16 p2770 A66-30174

Superconductivity in ceramic mixed titanates 16 p2770 A66-30180

LF resonances in mixed state of pure niobium, noting line shape and damping decrease 16 p2770 A66-30186

RF resistance in mixed state for subcritical currents 16 p2771 A66-30193

Superconductivity of chalcogenide lanthanum telluride, noting temperature variations relationship to stoichiometric composition of samples 16 p2772 A66-30290

Transformation process effect on superconducting behavior of titanium-chromium alloy 16 p2722 A66-30308

Magnetic shielding between superconducting niobium tin plates in transverse magnetic field, noting flux jumps degradation and elimination 16 p2779 A66-31091

Boundary conditions at interface between superconductor-superconductor and superconductor-metal 16 p2780 A66-31177

Cryoelectronic integrated circuits utilizing superconducting storage and switching devices 16 p2865 A66-31417

Superconductivity of nondegenerate semiconductor thin films, dependence on current carrier concentration, impurity level positions and film thickness 16 p2787 A66-31762

Superconductivity, surveying history, important parameters and basic formulas 17 p2976 A66-32063

Thermal neutron irradiation effect on superconducting properties of niobium aluminide and vanadium silicide doped with fissionable impurities 17 p2979 A66-32630

Ultrasonic attenuation in superconductors, extending BCS theory to include electron scattering effects, effect of anisotropy of Fermi surface, etc 17 p2981 A66-32960

Superconductivity of thin semiconductor films 17 p2983 A66-33131

Pressure effect on transition temperature of niobium 18 p3152 A66-33553

Superconductivity destruction by magnetic field in type II superconductors with nonzero demagnetizing factor, especially for case of ellipsoidal body 18 p3154 A66-33942

Cylinder magnetization in axisymmetric magnetic field, noting calculation of critical current in conductor 18 p3155 A66-34160

Microwave absorption in normal conducting films of gold plated onto superconducting tin indicates resistivity and transition temperature of gold consistent with proximity effect 19 p3443 A66-35999

Low effective resistivity of gold film plated onto tin determined by low temperature microwave absorption measurement and explained by free-electron model and superconductivity proximity effect 19 p3443 A66-36000

Critical temperatures and critical magnetic fields determined for superposed normal and superconducting films, noting dependence on metal thickness 19 p3443 A66-36003

Critical temperatures of binary alloy films in which major constituent is superconducting amorphous bismuth 19 p3444 A66-36007

Temperature and magnetic field effect on flux pinning by superconducting Sn precipitates in lead-indium matrix, noting occurrence of magnetic hysteresis 19 p3444 A66-36077

Operational reliability of superconducting storage element of memory matrix operating in symmetric recording regime under noise signal influence 19 p3310 A66-36815

Superconducting point contact diodes for observation of microwave radiation generated by bridge with and without constant voltage steps 20 p3620 A66-3777

Plastic deformation effect on critical temperature and magnetic field of superconducting junctions in titanium under uniform high compression loads 20 p3622 A66-3812

Dependence of step-like structure of voltage ampere characteristics of superconducting Sn-I-Sn tunnel junction as function of temperature, magnetic field and junction dimensions 20 p3622 A66-3812

Diamagnetic impurity effect on temperature of superconducting transition for Fermi surface topology sensitive to impurity additions 20 p3622 A66-3812

Pressure dependent critical temperature and magnetic field of superconducting transitions in metals 20 p3622 A66-3813

Superconducting properties of Nb-Zr alloy discussing resistive transition, ultrasonic attenuation, flux jump magnetic instabilities, etc 21 p3796 A66-3855

Extension of pairing theory of superconductivity to electron-phonon coupling, applying Landau quasi-particle approximation 21 p3796 A66-3855

Effects of nonmagnetic impurities upon anisotropy of superconducting energy gap 21 p3797 A66-3855

Magnetic properties of ferromagnetic zinc zirconium alloy between 120 degrees and 0 degrees K, suggesting possible indication of superconductivity 21 p3801 A66-3900

Microstructural and superconductivity analyses of Nb-Ti-O compound as function of thermomechanical processing treatment plotting critical current density against transverse magnetic field 22 p3960 A66-39780

Superconductivity of Ta-Ti solid solution alloy wires subject to steady magnetic high field 22 p3960 A66-39780

Enhancement of superconductivity and effect of crystallite size on transition temperatures of Al, Ga, Sn, In and Pb films 23 p4111 A66-41262

Electron field operator derivation from dynamical rearrangement formulation applied to neutral superconductivity 23 p4112 A66-41275

Magnetization measurements of Pb-Tl cylinders in axial magnetic field with superconductivity confined to superconducting surface sheath 23 p4113 A66-41370

Specific heat measurements and cryogenic thermodynamic properties of single crystal V in mixed state under 12 different magnetic fields 23 p4080 A66-41372

Superconductivity applications in power engineering, examining properties of superconducting materials such as thin films, wires and ribbons made of ductile and brittle alloys 23 p4114 A66-41741

Superconductor solenoid application to laser devices and development of magnetic plasma traps for research in controlled thermonuclear reactions 23 p4115 A66-41743

New phase in mercury-indium alloy system established by resistance, superconductivity transition temperature and X-ray diffraction measurements 24 p4255 A66-42486

Superconductivity degradation in beta-tungsten structure compounds, niobium selenide and niobium aluminide, noting tin loss and transition temperature for high temperature annealing 24 p4257 A66-42614

Transition temperature for superconductivity in superimposed films of silver and tin in which alloying between two metals is minimized 24 p4259 A66-43068

Superconductivity model with exact solution, determining energy levels, ground state energy, excitation spectrum, density variations, etc 24 p4259 A66-43088

SUPERCONDUCTOR

Magnetic flux jumps in hard Nb₃Sn and NbZr superconductors in pulsed magnetic fields 01 p0118 A66-10253

Volt-ampere characteristics of variable Josephson current interaction with resonance oscillations in superconducting film tunnel structure 01 p0119 A66-10449

Nonmagnetic impurity effect on critical temperature of superconductor with two energy bands overlapping near Fermi energy

- level 01 p0123 A66-10719
- Nuclear spin-lattice relaxation times of V 51 and Nb 93 and nuclear magnetic resonance line profiles V 51 in Type II superconductors 02 p0276 A66-12026
- Sudden heat capacity change near electron-phonon system transition point from superconducting to normal state 02 p0277 A66-12080
- Heat capacity related to quantizing of energy levels of electron excitation of superconductor in intermediate state 02 p0277 A66-12278
- Energy gap and thermoconductivity of normal and superconducting fcc lanthanum 03 p0407 A66-12320
- Anderson model to obtain transition metal impurities effect on superconductors due to resonance scattering 03 p0407 A66-12331
- Ginzburg-Landau parameters for type II superconductors of short electron mean free path 03 p0411 A66-13141
- Motion of vortex lines in superconductors noting dissipation and viscosity, Hall effect and effective mass 03 p0411 A66-13143
- Electrical impurity effect on critical temperature in superconductor 03 p0413 A66-13193
- Kim-Anderson model of flux pinning to compute magnetization of cylindrical hard superconductor, e.g. lead alloy 03 p0413 A66-13277
- Volt-ampere characteristics of variable Josephson current interaction with resonance oscillations in superconducting film tunnel structure 03 p0413 A66-13312
- Critical current in planar and cylindrical superconducting tin films as affected by magnetic field and temperature 04 p0559 A66-13715
- Magnetic and electrical transport properties of superconducting whiskers and platelets of NbC/NbN 04 p0559 A66-13716
- Equivalence of paramagnetic impurities in superconductor and magnetic field parallel to thin superconducting film with short mean free path 04 p0560 A66-13717
- Pressure dependence of superconducting transition of uranium to maximum pressure of 10 kbar, examining transition temperature increase with isotopic mass 04 p0560 A66-13718
- Macroscopic quantum interference in multiply connected superconductors utilizing Josephson tunneling, noting phase coherence and modulation 04 p0560 A66-13719
- Electron-phonon interaction for calculation of critical temperature for ordinary and anomalous superconductors 04 p0568 A66-14347
- Inductance of superconducting solenoid calculated from AC resistance and discharge oscillograms 05 p0737 A66-15336
- Paramagnetic impurity effect on critical temperature of superconductor for two-band model 05 p0738 A66-15346
- Heat capacity related to quantization of energy levels of electron excitation of superconductor in intermediate state 05 p0738 A66-15457
- Theoretical anisotropic energy gap of superconducting lead when photon density of states is principal source of gap anisotropy 05 p0741 A66-15866
- Organic superconductor and dielectric IR waveguide, resonator and antenna models of insects sensory hairs, spines and pit pegs 06 p0847 A66-16103
- Electron energy diffusion in superconducting thin Sn and In films bombarded by alpha particles observed in terms of IR drop 06 p0927 A66-16755
- Harmonic microwave generation by field-emission cathode in superconducting cavity 06 p0854 A66-16757
- Vector pairing in small dimensional superconductors vanishes when pair dimensions are larger than sample or electron mean free path 06 p0930 A66-17054
- Longitudinal and transverse voltages in superconductors, noting Hall effect, resistivity and functional relation to applied magnetic field 06 p0940 A66-17162
- Solubility range of 75 atomic percent vanadium-gallium system to determine phases in equilibrium and ascertain presence or absence of superconductivity 07 p1052 A66-18352
- Superconductors with ferromagnetically aligned impurities, assuming electron mean free path due to spin-orbit interaction is small compared to coherence distance 07 p1108 A66-18431
- Electromagnetic conductivity of superconducting alloys in critical regions in high magnetic fields 07 p1108 A66-18435
- Green function/Gorkov variational procedure calculation of transition temperatures of superposed superconducting films dominated by inhomogeneous electron-electron interactions 07 p1108 A66-18436
- Quantitative electrodynamic experiment on Josephson oxide tunneling junction, verifying time dependence of Josephson equation 07 p1108 A66-18438
- Critical magnetic field curves of superconducting Ru isotopes and dependence of superconducting transition temperature on isotopic mass 07 p1109 A66-18443
- Power characteristics of linear axisymmetric flow of ideal incompressible conducting gas with Hall effect in two-component magnetic field 08 p1168 A66-18863
- Spin-orbital interaction with lattice cannot produce Knight shift of great magnitude in superconductor 08 p1269 A66-18981
- Performance of coils wound with cables consisting of strands of superconductor and copper predicted from minimum propagating current measurements 08 p1194 A66-19295
- Critical magnetic field and temperature in superconducting metal 08 p1278 A66-19637
- Vortex lines in superconductors, noting free energy of pure superconducting metal in presence of currents and fields for slowly varying drift velocities 09 p1415 A66-20007
- Quantized vortices in thin superconductors in perpendicular magnetic field, noting that superconducting sample completely expels flux 09 p1415 A66-20008
- Ultrasonic absorption in superconducting lanthanum explained by two models for loss of energy from low-energy phonon field in London superconductor 09 p1415 A66-20021
- Ultrasonic attenuation in superconductors containing magnetic impurities analyzed, using weak coupling electron gas as model 09 p1416 A66-20022
- Microwave transmission and reflection coefficients of thin films in normal and superconducting states 09 p1416 A66-20023
- Magnetic field dependence of microwave surface impedance of superconducting aluminum 09 p1416 A66-20024
- Effect of static magnetic field on millimeter wave absorption in superconducting aluminum at reduced temperature 09 p1416 A66-20025
- RF losses in lead and niobium investigated for possibility of constructing superconducting linear accelerator 09 p1416 A66-20026
- Magnetic field effect on energy gap of superconductor 09 p1416 A66-20028
- Persistent currents and flux quantization in superconducting rings interrupted by Josephson junction 09 p1417 A66-20031
- Tunneling between thick lead-thallium films and very thin superconducting aluminum films in magnetic field studied, using current-voltage characteristics of alloy 09 p1417 A66-20032
- Tunneling density of states for superconductor in tunneling junction and carrying current at zero temperature 09 p1418 A66-20035
- DC pair-tunneling peaks in two superconductors with thin insulation at finite voltages as affected by temperature variations 09 p1418 A66-20036
- Effective de Broglie wavelength due to drift current in singly connected superconductor 09 p1418 A66-20037
- Quantized flux in small hollow superconducting cylinders cyclically cooled through transition temperature 09 p1418 A66-20038
- Measuring penetration depth and flux quantum in superconductor by rectangular loop consisting of two insulation-separated superconducting plates 09 p1418 A66-20039
- Measurement of magnetic field produced by rotating singly and multiply-connected superconductors, formulating macroscopic electrodynamics of rotating body at low angular velocities 09 p1418 A66-20041
- Temperature dependence of Ginzburg-Landau coefficient in type I superconductors 09 p1420 A66-20048
- Field penetration in superconductors with surface layers, describing LF low field AC susceptibility measurements in swept DC fields 09 p1420 A66-20049
- Efficiency of superconducting thermal switches determined, noting optimal operation parameters 09 p1420 A66-20052
- Electronic thermal conductivity, longitudinal sound wave decay and nuclear-spin temperature in superconductors with paramagnetic impurities 09 p1421 A66-20054
- Oscillatory longitudinal paramagnetic effect in magnetized semireversible type II superconductor 09 p1421 A66-20055
- Magnetothermal effects in type II niobium rod superconductors in parallel and perpendicular magnetic field 09 p1421 A66-20056
- High current-carrying capacity and flux trapping in homogeneous alloy single crystal type II superconductors 09 p1421 A66-20057
- Transition curves of high field superconductor with A-15 structure, such as niobium-tin systems, for various transverse magnetic fields 09 p1422 A66-20066
- Magnetic and resistive superconducting transitions on bulk samples of indium-lead alloys in alpha-phase region, considering results relative to G1ag theory 09 p1423 A66-20067
- Motion of magnetic flux in type II superconductor when applied magnetic field is changed to different value 09 p1423 A66-20069
- Thermodynamic behavior of strong coupling superconductors, with complex energy gap function and renormalization parameter for lead and mercury 09 p1423 A66-20072
- Ultrasound absorption by superconducting indium single crystals, noting nonlinear dependence on sonic field amplitude 09 p1428 A66-20592
- Conduction electron interaction with spin wave in ferromagnetic superconductor, noting decay and damping 09 p1430 A66-20867
- Superconductor current acceleration by application of long-wavelength magnetic field below critical temperature 10 p1573 A66-21176
- Tunnel effect measurements of superimposed aluminum and lead films used to determine effect of normal metal on superconductor 10 p1573 A66-21179
- Free energy functional of superconducting alloys based on Green function decomposition 10 p1573 A66-21241
- Magnetic hysteresis and associated current carrying capacity of type II superconductor on pinning of flux threads by internal defects 10 p1573 A66-21246
- Behavior of current carrying superconducting coil with heat generation in windings, noting voltage-current characteristics 10 p1509 A66-21562
- Singlet and triplet pairs coexistence in anisotropic superconductor 10 p1583 A66-21971
- Switch and load inductances and relation to performance reduction in superconductor energy storage systems 12 p1928 A66-24303
- Absorption of longitudinal ultrasonic waves in superconductors containing impurity atoms, noting entrainment effect role in energy dissipation of waves 12 p1929 A66-24453
- Superconducting film stability under current, noting metastable state near transition point via potential analysis 12 p1930 A66-24787
- Magnetization of synthetic filamentary superconductors, discussing sample preparation, critical field and transition temperature effect on flux jumping and magnetic hysteresis loop 13 p2157 A66-25037
- Ultrasonic observation of magnetization and flux jumping in superconducting niobium-zirconium alloy, analyzing field penetration effect on temperature dependent compressional wave absorption structure 13 p2159 A66-25071
- Superconductors for mixed AC-DC power transmission and thermal dissipation

- effect 13 p2030 A66-25219
- Magnetic flux jumps in hard Nb₃Sn and NbZr superconductors in pulsed magnetic fields 13 p2168 A66-25969
- Spectrum of electron excitations with small energies compared to critical temperature of superconducting transition in absence of magnetic field 13 p2168 A66-25978
- Magnetic field-temperature relations of type II superconductor Nb upon adiabatic magnetization of superconducting state 14 p2350 A66-26877
- Magnetic diffusivity measurement for cylinder of type II Nb-Zr superconductor at 4.2 degrees K, using magneto-resistance probe 14 p2350 A66-26878
- Stability limits and Gibbs free energy for type II superconductor in magnetic field as functional of ordering parameter, using Bardeen-Cooper-Schrieffer theory 14 p2360 A66-27193
- Critical temperature of two-band superconductor model with paramagnetic impurity 14 p2360 A66-27194
- Behavior of thin superconducting film in stationary magnetic field, deriving spectrum which is used to determine film specific heat 14 p2360 A66-27196
- Josephson effect in superconductors with paramagnetic impurities in absence of potential difference between superconductors 14 p2361 A66-27197
- High critical magnetic field, high current superconductors, degradation and practical magnet systems 14 p2364 A66-27649
- Electron-phonon interaction for calculation of critical temperature for ordinary and anomalous superconductors 14 p2368 A66-28243
- Josephson type superconducting tunnel junction for generation of microwaves and submillimeter waves 15 p2461 A66-29012
- Parametric amplification with resonator consisting of superconducting films on mica substrates, noting vortex movement 15 p2463 A66-29030
- Pressure effect on transition point of superconductors from Bardeen-Cooper-Schrieffer theory, perturbation theory and electron scattering near Fermi surface 15 p2568 A66-29714
- Critical current dependence on external perpendicular magnetic field of Nb-Zr wires with deformation and heat treatment 15 p2569 A66-29786
- Inductance of superconducting solenoid calculated from AC resistance and discharge oscillograms 15 p2569 A66-29983
- Paramagnetic impurity effect on critical temperature of superconductor for two-band model 15 p2569 A66-29985
- Geometrical resonance and boundary effects in tunneling from superconducting indium 16 p2767 A66-30126
- Potential difference across type II superconductor in intermediate state attributed to fields produced by quantized flux lines moving through material 16 p2768 A66-30129
- Geometrical resonances in tunneling characteristics of thick films of superconductors 16 p2768 A66-30133
- Magnetic state of gadolinium impurities in superconducting lanthanum 16 p2768 A66-30134
- Nonlinear flux flow in type II superconductor, noting resistance characteristics 16 p2768 A66-30135
- Steady emf induced by flux line motion in superconductors 16 p2768 A66-30136
- Lewis method for obtaining thermodynamic relation between energy gap of superconductor and critical field and temperature slope 16 p2768 A66-30141
- Peltier effect analogy of heat absorption and emission at junction in superconductor between region in flux-flow state and region with no flux flow 16 p2769 A66-30154
- Inherent LF losses of superconducting surface sheath 16 p2769 A66-30167
- Oscillating tunneling characteristics from electron interference in normal metal induced by superconducting contacts between silver and lead 16 p2769 A66-30168
- Electron-spin paramagnetism effect on critical field of thin aluminum superconductor films 16 p2769 A66-30169
- Magnetic coupling effect on flux pinning and flux-flow resistivity in superconducting tin film 16 p2770 A66-30170
- Mechanical forces on superconducting tin film in magnetic field, using torsion pendulum, noting conservative force association with currents in film 16 p2770 A66-30175
- Thermal forces on vortices and entropy transport by vortex flow in type II superconductor from measurements of temperature gradient and potential differences 16 p2770 A66-30189
- Parallel and perpendicular magnetic transitions of superconducting lead films and foils determined from transverse magnetization and AC susceptibility measurements 16 p2770 A66-30190
- Galvanomagnetic and thermomagnetic effects in mixed state of type II superconductor 16 p2771 A66-30197
- Electric contact effect and transition temperature measurement in superconducting Cu-Pb double layer films at low temperatures, using He 3 cryostat 16 p2772 A66-30322
- Field and current-induced transition in superconductor plotted in oscilloscope 16 p2772 A66-30421
- Transition variable as function of superconductor reduced temperature, showing temperature dependency of penetration depth, acoustical attenuation and thermoconductivity 16 p2777 A66-30937
- Switching characteristics of small-geometry thin-film superconductors 16 p2783 A66-31428
- Local equations of electrodynamics for magnetic penetration and stability in London-type superconductors 16 p2784 A66-31564
- Meissner effect in superconducting electron gas in magnetic field 16 p2749 A66-31758
- Fulde-Ferrell effect in type II superconductors 17 p2975 A66-31887
- Attenuation of longitudinal sound in pure crystals of superconducting lead 17 p2978 A66-32506
- Magnetic instabilities in form of reversed field flux annihilation pulses in grossly inhomogeneous superconductor 17 p2980 A66-32842
- Hard superconductors as generators of strong magnetic fields to accelerate plasma in energy converters and plasma propulsion systems of spacecraft 17 p2981 A66-32898
- Low temperature resistivity, magnetic susceptibility and superconductive transition point in La containing rare earth impurities 17 p2982 A66-32972
- High-field superconductors, noting role of defects in pinning, magnetization, critical currents, applications in solenoids, etc 17 p2985 A66-33156
- Critical current enhancement and degradation due to hysteresis in nonideal type II superconductors in axial magnetic fields 18 p3153 A66-33612
- Critical magnetic field and temperature in superconducting metal 18 p3155 A66-34180
- Superconducting bearing operating on conservation of fluxoid in closed loop of superconductor 18 p3116 A66-34243
- Superconducting-to-mixed state phase transformation in type II superconductors in applied magnetic field and accompanying onset of vortex filaments at surfaces 18 p3158 A66-34686
- Order-disorder parameter determined from HF absorption in pure superconducting films 18 p3158 A66-34687
- Acoustic wave energy absorption by superconductors in intermediate state 18 p3158 A66-34692
- Ginzburg-Landau expressions for local tunneling density of states of superconducting alloys and effects of space dependence of order parameter 18 p3159 A66-34709
- Renormalized series for nonuniform energy gap and Green function formalism to derive equation for London-type superconductor 19 p3437 A66-35458
- Electron-phonon interaction current density, thermodynamic Green function and other electromagnetic properties of superconductors, using Froehlich-Hamilton model 19 p3438 A66-35481
- Alternating current losses in type II superconductor, showing dependence on magnitude and direction of local magnetic field and transport current 19 p3439 A66-35728
- Vanadium addition effect on critical current and transition temperature of niobium-zirconium alloy 19 p3386 A66-36449
- Three superconducting niobium stannide liquid level sensors tested in triple point slush or liquid hydrogen for capability of detecting liquid-vapor interface 20 p3557 A66-37076
- Electrically cryopumped system for liquid helium transfer continuously at low flow rates 20 p3542 A66-37105
- Superconductor electromagnetic absorption in energy gap region, examining gap anisotropy, multiple gaps, precursor absorption and magnetic perturbation effect on optical absorption spectrum 20 p3615 A66-37281
- Resistive effects in type II superconductors near upper critical field examined, using Ginzburg-Landau equations 20 p3616 A66-37374
- Enthalpy of impure sample of niobium calculated from simultaneous measurements of magnetization and heat developed during process of magnetizing type II superconductor 20 p3616 A66-37445
- Ginzburg-Landau equations for local superconductors in magnetic field starting from equations of coupled electron-phonon system with treatment restricted to temperatures near critical temperature 20 p3619 A66-37641
- Nonmagnetic impurity effect on critical temperature of superconductor with two energy bands overlapping near Fermi energy level 20 p3619 A66-37657
- Absorption of longitudinal ultrasonic waves in superconductors containing impurity atoms, noting entrainment effect role in energy dissipation of waves 20 p3619 A66-37685
- Quantum paramagnetic traveling wave amplifier using rutile with admixture of chromium and combined with magnet with superconducting coil 20 p3580 A66-37996
- Ultrasound absorption by superconducting indium single crystals, noting nonlinear dependence on sonic field amplitude 20 p3622 A66-38125
- Small oscillation analysis of superconductors in intermediate phase for larger-than-layer width wavelengths 20 p3624 A66-38426
- Longitudinal sound waves attenuation in superconductor with spatially dependent energy gap by Green function method applied to ultrasonic attenuation in type II superconductor 21 p3795 A66-38548
- Critical magnetic field and transition temperature measurements of superconducting indium in porous glass, using LF mutual inductance technique 21 p3796 A66-38549
- Pauli spin paramagnetism and spin-orbit scattering in magnetization of superconducting Ti-Mo alloy 21 p3796 A66-38551
- Flux trapping of RF fields in superconductors from measurements on superconductive resonant circuits in frequency range of 10-1000 mc 21 p3796 A66-38555
- Critical temperature of several bulk dilute solid solutions of transition metals in Al, Zn, In and Sn, examining effect of transition-metal impurities 21 p3796 A66-38556
- Pauli paramagnetism effect on magnetic properties of high field superconductors, noting spin-orbit scattering 21 p3797 A66-38557
- Ultrasonic attenuation coefficient of transverse wave in gapless superconductor, noting effect on critical field and parameter amplitude 21 p3797 A66-38558
- Temperature dependence of mixed-state thermoconductivity of type II superconducting In-Pb alloys in magnetic field 21 p3797 A66-38751
- Small oscillation analysis of superconductors in intermediate phase for larger-than-layer width wavelengths 21 p3800 A66-38959
- Flux flow in type II superconductors,

measuring critical current, longitudinal and transverse voltages for varied orientation of magnetic field 21 p3802 A66-39201
Spectral response curves of superconducting point contacts, noting existence of frequency dependent Josephson current amplitudes peaking in vicinity of energy gap 21 p3803 A66-39262
Anomalous behavior of superconducting transition temperature for certain magnetic ordering of paramagnetic impurities 21 p3803 A66-39264
Kinetic tunneling theory in superconductors, clarifying conditions for onset of Josephson current 21 p3803 A66-39309
Tunnel current dependence on magnetic field for two superconductors with thin electric interface 21 p3804 A66-39314
Performance of three-component superconducting solenoid, noting optimal alloy composition 21 p3804 A66-39318
Singlet and triplet pairs coexistence in anisotropic superconductor 21 p3805 A66-39550
Electronic structures of transition metal alloys analyzed, comparing superconducting critical temperatures with H, N and O acting as electron donors 22 p3960 A66-39779
Electron attenuation of ultrasonic waves of arbitrary polarization and propagation direction for superconductors computed on BCS model, noting role of Fermi surface 22 p3960 A66-39802
Cross section of slow neutron scattering in superconductors and polarization of scattered electrons 22 p3964 A66-40308
Coulomb interaction in two-zone superconductor model, noting variation of critical electron-temperature and effect on superconductivity 22 p3968 A66-40916
Voltage oscillations as function of applied magnetic field in weak contacts between superconductors in resistive region when applying currents above critical value 23 p4111 A66-41251
Energy gap and critical field rules for superconductors, discussing empirical and experimental values 23 p4113 A66-41375
BCS model extended to intermediate and strong-coupling superconductors effective interaction strength as function of absolute-zero energy gap, phonon-frequency cut-off and Fermi surface density of states 23 p4113 A66-41376
Faraday unipolar induction in solid cylinder of nonideal type II superconductor, noting contributions to observed emf 23 p4114 A66-41629
Superconductors application to large turbogenerators for power generation and medium-capacity machines for aviation and other transport 23 p4114 A66-41742
Structure effect on superconducting properties of eutectic alloys solidified under variety of growth conditions, discussing interphase boundary, current density and residual strain 24 p4250 A66-42296
Guiding magnetic fluxes by superconducting screens independently of medium permeability 24 p4237 A66-42339
Macroscopic particle acceleration to meteoritic velocities by trapping and accelerating superconducting solenoid in front of magnetic traveling wave 24 p4237 A66-42401
Transition temperature of superconduction of technetium-rhenium alloys measured by trapped flux remaining in sample after removal of external magnetic field 24 p4254 A66-42428
Superconducting fluxline pinning of globular foils by twin boundaries, resulting in anisotropic critical current 24 p4255 A66-42429
Critical fields of thin superconducting films determined by specular reflection of electrons from surfaces 24 p4256 A66-42531
Static spin susceptibility of superconductors with p-pairing and collective excitations, noting mercury and niobium 24 p4257 A66-42539
Energy dependence of effective interaction in superconductivity, calculating critical field and specific heat 24 p4259 A66-43018
Stability limits and Gibbs free energy for type II superconductor in magnetic field as functional of ordering parameter, using

Bardeen-Cooper-Schrieffer theory 24 p4259 A66-43091
Critical temperature of two-band superconductor model with paramagnetic impurity 24 p4259 A66-43092
Behavior of thin superconducting film in stationary magnetic field, deriving spectrum which is used to determine film specific heat 24 p4259 A66-43094
Josephson effect in superconductors with paramagnetic impurities in absence of potential difference between superconductors 24 p4259 A66-43095
Nb-Zr strip superconductor for stabilization of critical current anisotropy and coil degradation in magnets 24 p4186 A66-43176
Magnetic field rapidly reversed in shorted superconducting coil by subjecting coil to increasing external reverse field 24 p4216 A66-43213
SUPERCOOLING
Surface superconductivity and supercooling in type I superconductors measured by microwave surface resistance at 23 gc as function of temperature and magnetic field strength 09 p1422 A66-20061
Occurrence of supernumerary fogbows at subfreezing temperatures, noting interval of appearance and possible formation mechanism 09 p1400 A66-20733
Crystallization kinetics in supercooled cloud under natural conditions 11 p1725 A66-22196
Vibrational nucleation of zirconium droplets burning in free fall, noting supercooling participation in formation of spearpoints 14 p2414 A66-28175
Oblique condensation discontinuities calculated during flow of supercooled water vapor in supersonic jets 16 p2690 A66-31608
Effect of equilibrium crystal seeds on supercooled polyethylene melt and o-xylene solution of polyethylene of same chemical nature 17 p2944 A66-33466
Freezing of supercooled water drops to determine dependence of heterogeneous nucleation on temperature and on duration of supercooling 19 p3394 A66-36384
Temperature dependence of viscosity due to molecular rotation in non-Arrhenius range of supercooled liquids 22 p3902 A66-40912
Dispersal of supercooled fogs over airports by seeding with dry ice [ICAS PAPER 66-7] 23 p4086 A66-41255
SUPERFLUID FLOW
Superfluid basic theory noting Josephson tunneling, liquid helium kinetic theory, quantized vortex lines, etc 09 p1415 A66-20005
Superfluid hydrodynamics and kinetic theory of superfluids, noting relation of macroscopic concepts of Bardeen-Cooper-Schrieffer theory to microscopic characteristics 09 p1415 A66-20006
Motion and properties of quantized vortex rings in superfluid helium at low temperatures 09 p1415 A66-20009
Vorticity growth when steady heat current is applied to liquid He 2 in narrow tube 09 p1366 A66-20017
Superfluid critical velocity in He 2 isothermal gravitational flow in narrow channels 09 p1366 A66-20018
Critical velocities and supercritical velocity dissipation effects in isothermal flow of liquid He 2 in narrow channels 09 p1366 A66-20019
Josephson type superconducting tunnel junction for generation of microwaves and submillimeter waves 15 p2461 A66-29012
Vibration spectrum of lattice of rectilinear vortices in charged and neutral superfluid systems studied in terms of Landau superfluid hydrodynamics 19 p3400 A66-35997
SUPERFLUIDITY
Helium II film free-convection heat transfer, discussing mathematical analysis for vertical flat plate and horizontal circular cylinder [ASME PAPER 65-WA/HT-10] 05 p0791 A66-15652
Text on theory of superfluidity which applies laws of quantum mechanics to macroscopic physics 07 p1082 A66-18483
Low temperature physics - International Conference, Columbus, Ohio, August-September 1964 09 p1413 A66-20004
Transition to superfluid state in He 3,

measuring behavior of specific heat with three-stage adiabatic demagnetization apparatus 09 p1391 A66-20010
Ginzburg-Pitaevskii two-fluid formulation of superfluidity problem describing behavior of helium 2 in rotating annular cylinder, considering constant angular velocity and angular momentum 13 p2128 A66-26272
Existence possibility of nondamped superthermal conductivity in two-band coupled semiconductors and validity of Landau criterion for superfluidity 21 p3805 A66-39548
Cell model of attractive interactions between helium atoms and effect on solid-superfluid transition in He 4 at absolute zero 23 p4090 A66-41368
SUPERHEATING
Superheating of linear high polymer polyethylene crystals, evaluating time dependence of melting, differential thermal analysis and calorimeter techniques 12 p1899 A66-23937
Mechanism of nucleate boiling from superheated surface studied fluid-dynamically and thermodynamically 22 p4000 A66-40918
SUPERHETERODYNE RECEIVER
Radiometric performance of solid state superheterodyne receiver comparable to that obtained with masers and parametric amplifiers 03 p0339 A66-12437
Laser detection of coherent light and superheterodyne and nonlinear parametric studies in optical spectrum 14 p2309 A66-27821
Radiometric measurements of atmospheric absorption at 600 gc/s by DICKE type superheterodyne receiver, using harmonic mixing 15 p2450 A66-28999
Optical superheterodyne reception of coherent signals scattered by diffuse surface 20 p3516 A66-37456
Coherent CW superheterodyne radar system for studying backscattering from hypersonic velocity projectile wakes 24 p4191 A66-42196
SUPERNOVA
Gas clouds in dense star clusters compared with quasar properties, analyzing possible energy sources like supernova explosions, stellar collisions and star gas interaction 01 p0137 A66-10494
Radio astronomy contributions in solar physics, supernovas, morphology and kinematics of galaxy, etc 01 p0139 A66-11157
Radio astronomy research in solar system, galaxies, supernovas, radio galaxies and cosmology 01 p0139 A66-11159
Cosmic X-ray sources in Scorpius and Crab nebula, examining creation of neutron stars from supernova explosion 03 p0423 A66-13029
C 14 content in tree rings, Tungusk meteor and supernova explosions 05 p0765 A66-15334
Text on sources of stellar energy, internal structure of stars and evolution of stars 09 p1447 A66-20090
Historical summary of nova and supernova outbursts, considering resonance theory of novas and possibility that supernovas are due to chain reaction 09 p1448 A66-20093
Classification and analysis of supernova outbursts in terms of dimensionless morphology, phenomenological morphology and absolute morphology 09 p1448 A66-20094
Probable relation between OB associations, runaway stars, supernovas and X-ray sources 09 p1443 A66-20469
Intensity of early postexplosion radiation field and high energy electron emission from supernovae 12 p1938 A66-23918
Spherical blast waves in weak dipole magnetic field, calculating distortion by using motion equations, noting similarity to supernovae explosions 15 p2479 A66-29304
Positional coincidence of X-ray source Sco X-3 with extended H II emission region which may be remnant of supernova explosion 15 p2591 A66-29681
C 14 content in tree rings, Tungusk meteor and supernova explosions 15 p2603 A66-29981
Visible spectrum of radiation release from type I supernova outburst 16 p2796 A66-30163
Coherent plasma radio wave emission ineffective for quasar, Crab Nebula and supernovae remnants 17 p2996 A66-31913
Radiation flux measurements from

supernova remnants and radio galaxies 17 p2999 A66-32234
 Neutron star rotational flattening after formation in supernova implosion 21 p3810 A66-38467

SUPEROXIDE
S PEROXIDE
SUPERSATURATION
 Total optical resolution of DL-alpha amino acids from supersaturated aqueous solutions by seeding with pure crystals of L-or D-isomers of amino acid 04 p0473 A66-13453

SUPERSONIC AIRCRAFT
 SA BOEING 733 AIRCRAFT
 SA F-111 AIRCRAFT
 SA HYPERSONIC AIRCRAFT
 Optimization of terrain following performance for supersonic fighter aircraft, developing usable command signal 01 p0102 A66-10045
 Integrated secondary power system to provide additional capabilities for supersonic aircraft [SAE PAPER 650828] 01 p0016 A66-10828
 Heat transfer unit, operational method and data relating heat exchanger performance to deposit forming tendencies of jet fuel for supersonic aircraft [SAE PAPER 650803] 01 p0128 A66-10845
 Deformation of N-shaped ballistic wave from supersonic aircraft when approaching caustic [ONERA TP 273] 02 p0177 A66-11682
 VTOL aircraft application to short haul aircraft, supersonic transports and space launchers 02 p0178 A66-12219
 Analytic processes for evaluation of supersonic aerodynamics of configuration treating drag, wing design, wrap, interference and sidewash [AIAA PAPER 65-717] 03 p0321 A66-13048
 Boundary layer control for improvement of lift at lower angles of attack by carrier-based supersonic aircraft [AIAA PAPER 65-751] 03 p0321 A66-13055
 Sonic boom from supersonic aircraft considering shock system, shock intensity, atmospheric conditions and physiological reactions 04 p0457 A66-13520
 Supersonic aircraft artificial atmosphere, discussing linear relationship between imperceptible perspiration and ambient water vapor pressure 06 p0815 A66-16048
 Mechanization of navigational functions for supersonic aircraft within central airborne digital computer, comparing military experience with commercial requirements 07 p1067 A66-17693
 Subsonic and supersonic aircraft navigational systems requirements, discussing pictorial presentation and effect on command function 07 p1075 A66-17788
 Inertial techniques extended to height measurement in supersonic aircraft by simple computing addition to main navigation platform 09 p1400 A66-20427
 Pressure sensing techniques applied to altimetry in supersonic aircraft 09 p1381 A66-20428
 Aircraft and missiles operating at Mach 2 to 5 using air breathing propulsion systems, noting roles of ramjet and turbine engines 09 p1435 A66-20667
 Engines for supersonic and hypersonic aircraft to be used in next decade, noting suitability for cruise aircraft or boosters 09 p1435 A66-20668
 Supersonic aircraft finishes resisting corrosion and high temperatures, including epoxy-amine cured primers, acrylic paints, silicone, synthetic enamels, etc 10 p1547 A66-21136
 Parametric investigations of supersonic long-haul aircraft, discussing operational profile, optimal lift-drag ratio, takeoff weight, civilian and military aircraft 10 p1482 A66-21371
 Lubricant testing for supersonic aircraft, examining temperature requirements, viscosity, evaporation characteristics, etc 10 p1539 A66-21399
 Fuel requirements for high altitude high-Mach number aircraft, noting thermal stability, autooxidation, self-ignition, specific heat, etc 10 p1590 A66-21400
 Structural design of Concorde supersonic airliner, noting airframe strength parameters 10 p1483 A66-21717

Optimum control for supersonic winged vehicle, allowing for inequality-type limitations in solution algorithm for maximum range in nonmaneuvering flight 11 p1733 A66-23340
 Supersonic business aircraft design problems related to payload and range 12 p1800 A66-23643
 Atmospheric parameter determination by aircraft measurements, noting applicability to supersonic air transports 12 p1879 A66-23752
 Effect of supersonic aircraft on cirrus formation and climate, noting influence of combustion products on stratosphere [AIAA PAPER 66-369] 12 p1907 A66-24497
 Ground reflection shock, compression and expansion waves caused by supersonic aircraft examined, noting correlation between wave intensity, incidence and pressure jump 13 p2062 A66-25403
 Aerodynamic concepts and configuration of Mach 3 XB-70A aircraft [SAE PAPER 660274] 14 p2222 A66-27285
 SST flight operations, maintenance and servicing compared to subsonic aircraft [SAE PAPER 660294] 14 p2222 A66-27290
 VJ-101C high-speed research aircraft having combination of VTOL capability and supersonic level flight speed 17 p2846 A66-32745
 Laboratory physiological-psychological responses to impulsive acoustic stimuli and sonic booms from supersonic aircraft 17 p2868 A66-33030
 Optimization of terrain following performance for supersonic fighter aircraft, developing usable command signal 19 p3397 A66-36484
 Multiloop control interaction using linearized technique, noting variable geometry intake loop 20 p3627 A66-36881
 Interior design techniques in civil aircraft seat design and supersonic aircraft interiors 20 p3495 A66-37425
 Electronic data processing used to analyze AFM 66-1 maintenance data on USAF T-38 supersonic jet trainer for reliability monitoring 20 p3572 A66-37945
 Meteorological problems caused by use of supersonic aircraft 22 p3943 A66-40391
 Dynamic test method for characteristics and interactions of supersonic aircraft propulsion systems, particularly inlet/engine performance and control compatibility aspects [AIAA PAPER 66-741] 22 p3893 A66-40630
 New jet transports, discussing subsonic, SST and stretched versions of subsonic transports 23 p4016 A66-41302
 Air transportation between 1980 and 2000, noting cost limitation, possible trends, management planning, etc 23 p4152 A66-41304
 Aluminum and titanium alloys, composite materials and nonmetallic materials for supersonic transports and VTOL aircraft noting intakes, nozzles and variable-geometry wings [ICAS PAPER 66-1] 23 p4016 A66-41932
 Pressure-perturbation produced by supersonic aircraft near caustic, deriving differential equations 23 p4016 A66-42040
 Criteria for hydraulic fluids for supersonic aircraft noting fluid toxicity, fire hazards, compatibility with elastomeric materials, etc 24 p4229 A66-42380
 Firebee II supersonic jet target drone, power plant performance capabilities, instrumentation and possible modifications after flight tests 24 p4160 A66-42894

SUPERSONIC AIRFOIL
 Linearized supersonic theory for favorable thickness distributions and drag reduction for wings in supersonic flow [AIAA PAPER 65-716] 03 p0314 A66-12542
 Impact of rigid or flexible body on surface of compressible fluid, noting impact of rigid wedge and linear supersonic airfoil theory [ASME PAPER 65-WA/UNT-3] 05 p0663 A66-15600
 Slender profile of infinitely thin supersonic wing that provides minimum mean heat-transfer coefficient at given lift-drag ratio 09 p1328 A66-20754
 Book on theory of optimum aerodynamic shapes 11 p1629 A66-22501
 Optimum two-dimensional wings for minimum drag subjected to pressure

coefficients defined by Busemann second order theory 11 p1630 A66-22501
 Impact of rigid or flexible body on surface of compressible fluid, noting impact of rigid wedge and linear supersonic airfoil theory [ASME PAPER 65-WA-UNT-3] 21 p3731 A66-3953

SUPERSONIC COMBUSTION
 Structure and function of wind tunnel use in supersonic combustion processes 04 p0572 A66-1353
 Supersonic combustion, examining turbulent mixing zone between supersonic streams of carbon dioxide and air 05 p0862 A66-1506
 Supersonic ramjet fuel injection, fuel-air mixing and combustion in turbulent air stream, noting mixing and combustion time 09 p1434 A66-20474
 Control system of supersonic combustion using spectral intensity ratio, monitoring combustion chamber in two wavelength regions 10 p1622 A66-21944
 Supersonic combustion for possible application to ramjets, considering propulsion aspects and combustion in supersonic stream 11 p1761 A66-23244
 High-explosive driven shock tubes, as sources of short duration high-pressure supersonic pulses, applied in accelerating large objects 16 p2674 A66-30428
 Conservation equations for two-dimensional axisymmetric simultaneous turbulent mixing and supersonic combustion of hydrogen-oxygen-nitrogen-water streams solved by finite difference methods [AIAA PAPER 66-617] 18 p3099 A66-34219
 Solid propellant characteristics for application to supersonic combustion, tabulating combustion properties of selected fuels and solid propellants [WSCJ 66-32] 18 p3161 A66-34416
 Current status of technology of using liquid hydrogen in manned aircraft systems [AIAA PAPER 66-671] 18 p3162 A66-34443
 Mechanism of electrode erosion by supersonic flame jets during pulsed discharge 20 p3607 A66-36981
 Penetration distance for secondary liquid injection into supersonic airstream, emphasizing jet flow far from injection orifice 20 p3548 A66-38151
 Shock tunnel external burning experiments to investigate effects of reactive fuel injection into air stream flowing around body [AIAA PAPER 66-744] 22 p3893 A66-40631
 Supersonic combustion simulation facility and duplicable static parameters for hydrogen fuel [AIAA PAPER 66-743] 23 p4052 A66-41327
 Initial air-side boundary layer effect on ignition of slot injected gaseous hydrogen by hot supersonic air stream [AIAA PAPER 66-644] 23 p4149 A66-41513

SUPERSONIC COMMERCIAL AIR TRANSPORT /SCAT/
 Analytic processes for evaluation of supersonic aerodynamics of configuration treating drag, wing design, wrap, interference and sidewash [AIAA PAPER 65-717] 03 p0321 A66-13048
 Aircraft separation criteria applied to supersonic transport, describing standards and parameters of air traffic safety 07 p1066 A66-17682
 Grid navigation method, employing Mercator chart, is suitable for high latitudes and supersonic aircraft 07 p1066 A66-17683
 Supersonic commercial air transport, evaluating communication, navigation and identification systems 07 p1066 A66-17686
 American supersonic commercial air transport design, development and operation 08 p1167 A66-18557
 Two-channel satellite-borne radiometric system to furnish temperature information for SST flight planning, discussing conceptual design, operating mode and data handling procedures [AIAA PAPER 66-372] 12 p1872 A66-24500
 Supersonic transport propulsion systems noting thrust requirement, noise reduction, commercial feasibility, etc [SAE PAPER 660297] 18 p3165 A66-34943
 Liquid methane fueled propulsion system for SST application, noting increased payload capacity, propellant characteristics

and design criteria for storage within aircraft
[AIAA PAPER 66-685] 20 p3625 A66-37259
Design characteristics and marketing prospects of Concorde
ST 23 p4015 A66-41301
SUPERSONIC COMPRESSOR
Pseudoshocks in pipe flow in supersonic compressors represented as diffusion process, noting application in cascade and rotor configuration 10 p1479 A66-21363
Parametric analysis of supersonic compressors, determining relative efficiencies of various leading and trailing guide vane configurations 10 p1479 A66-21365
Supersonic retardation cascades for lossless reduction of supersonic flow to subsonic in turbines and compressors 10 p1591 A66-21380
Supersonic compressor flow induction process as affected by Mach number, cone angle, rotational speed and blade angle [AIAA PAPER 66-615] 19 p3275 A66-35943
SUPERSONIC DIFFUSER
Diffusion in supersonic duct flow composed of boundary layers, with application to supersonic inlet with internal compression [AIAA PAPER 64-245] 05 p0606 A66-15071
Estimation of starting pressure ratio of axisymmetric ejector-diffuser systems for rocket altitude simulation 10 p1481 A66-21933
Performance of simple diffusers of fixed geometry in flow regimes with viscous and compressibility influence involving free-jet test sections, conical and contoured nozzles and gas flows at high Mach numbers 11 p1686 A66-22844
Supersonic diffuser for eliminating separation of boundary layer in isentropic compression 19 p3276 A66-36084
SUPERSONIC DRAG
Configuration synthesis and optimal utilization of supersonic favorable interference to obtain high lift-drag ratios [AIAA PAPER 65-752] 03 p0315 A66-12732
Maximum lift/drag ratio wing for supersonic environment 13 p1991 A66-25634
SUPERSONIC FLIGHT
Supersonic flight control, discussing reliability and safety devices, computer application and multiplex systems 06 p0816 A66-16055
XB-70A, high Mach number handling qualities and suggested improvements through addition of better instrument presentation, automatic flight control, etc 07 p0986 A66-17275
Sequence photography of models used to study head-on interaction between slender cone in supersonic flight and moving shock wave
[AIAA PAPER 66-57] 08 p1163 A66-18990
Nomograms for rapid calculation of maximum ground sonic-boom overpressure for different flight conditions 09 p1330 A66-20747
Frequency distribution of route temperature at supersonic flight levels, noting effect on payload during extended trips
[AIAA PAPER 66-371] 12 p1802 A66-24499
Effect of stratified atmospheric models on sonic boom generated by aircraft in steady level flight, using propagation of weak shock waves theory as base for analysis 17 p2847 A66-33024
Sonic bang experience in United Kingdom from supersonic flights and explosive charges, noting intensity, waveform, damage, etc 17 p2868 A66-33029
SUPERSONIC FLOW
Center of pressure formulae for cowl shapes at zero incidence having profiles for which drag is minimum in Newtonian flow 01 p0006 A66-10344
Supersonic flow past pointed bodies of revolution in calculation of initial ratio of shock to body curvature and initial surface pressure gradient 01 p0007 A66-10631
Boundary layer on spherically blunted cones in supersonic air flow at given wall temperature and thermally insulated wall, graphing calculation results 01 p0008 A66-11016
Stability of plane stationary detonation wave, using detonation model of ideal perfect gas flowing in pipe at constant supersonic velocity 02 p0217 A66-11391
Interference between plane surfaces in

supersonic gas flow between two rectangular parallelepipeds 02 p0220 A66-12180
Aerodynamic blast simulation in hypersonic tunnels, noting unsteady tunnel flow behind blast wave 03 p0316 A66-12794
Pressure field of supersonic flow around hemi-axisymmetric body resting on flat plate 03 p0316 A66-12804
Head-on interaction of plane shock wave and supersonic cone-cylinder body 03 p0316 A66-12812
Performance of supersonic bypass nozzle with small and large secondary flow evaluated theoretically and experimentally [ONERA TP 287] 03 p0316 A66-12897
Supersonic viscous gas flow past bodies calculated by solving approximately system of Navier-Stokes equations for limited regions with great dissipative terms 03 p0359 A66-13183
Flow past slender bodies of revolution or low aspect ratio wings with finite span or cross-sectional area 04 p0454 A66-13517
Extremal problems in aerodynamics, discussing mathematical and physical models for optimum aerodynamic shape 04 p0455 A66-13995
Volterra integral applied to steady supersonic flow past annular wings of various configurations to determine aerodynamic characteristics 04 p0455 A66-14139
Solving supersonic laminar boundary layer separation by velocity profile and energy momentum concept, noting application to wedges and curved surfaces [ASME PAPER 65-APMW-19] 04 p0512 A66-14220
Laminar heat transfer and pressure distribution in open cavity supersonic flow, noting heat-transfer coefficient [ASME PAPER 65-WA/HT-37] 05 p0608 A66-15670
Supersonic cascade tunnel to evaluate compressor blade performance [ASME PAPER 65-WA/GTP-4] 05 p0661 A66-15719
Supersonic flow at exit of radial-inflow turbine flat-vane nozzle ring [ASME PAPER 65-WA/GTP-5] 05 p0608 A66-15720
Two-dimensional problems of diffraction of weak shock or acoustic and elastic waves on obstacles of various shapes, equivalent to supersonic gas flow three-dimensional problems 06 p0909 A66-16706
Very arbitrary triple transformation applied to differential equation of perturbation velocity potential for case of supersonic flow 06 p0873 A66-16916
Linearized wave equation of supersonic flow with single relaxation process, using model gas mixture 06 p0874 A66-17003
Gas dynamics equation for wing of zero-thickness with two subsonic leading edges in supersonic flow reduced to wave equation 06 p0803 A66-17006
Measurements of three coefficients for rectangular, trapezoidal, sweptback, triangular and parabolic wings in subsonic and supersonic flow 07 p0979 A66-17480
Behavior of small cylindrical Langmuir probe in steady low density flow of argon plasma [AIAA PAPER 66-5] 07 p1034 A66-17880
Flow properties in turbulent near wake of circular and elliptic cones at zero angle of attack in Mach 6 flow [AIAA PAPER 66-54] 07 p0980 A66-17897
Mass transfer method for measuring skin friction from isothermal adiabatic leading-edge flat plate in compressible laminar airflow with negligible pressure gradient 07 p0980 A66-17943
Wall pressure fluctuations in subsonic and supersonic turbulent boundary layer flows related to mean shear and turbulence interactions 07 p1023 A66-18113
Method of characteristics applied to three-dimensional supersonic flow equations for compressible inviscid gas 07 p0982 A66-18130
Steady flow interactions of supersonic airstream and jet blown from hemispherical and flat body noses 07 p0982 A66-18137
Minimum drag problem of trapezoidal wing in supersonic flow determined by method of residues in conjunction with complex variable functions 07 p0982 A66-18139

Shock phenomena with mixtures of water and nitrogen in two-phase supersonic tunnel [AIAA PAPER 66-87] 07 p0984 A66-18453
Surface pressure, heat transfer coefficient, wave structure and shock disturbances of inviscid supersonic flow field along corner of intersecting wedges [AIAA PAPER 66-128] 07 p0984 A66-18462
Slender bodies with minimum inviscid pressure drag derived, using hypersonic small disturbance approximation to shock expansion method [AIAA PAPER 66-129] 07 p0984 A66-18463
Numerical method applied to inviscid compressible two-dimensional or axisymmetrical fluid flows for problems involving subsonic, transonic and supersonic flow regions 08 p1207 A66-19127
Inviscid supersonic flow fields of reacting gas mixture around pointed bodies calculated, using characteristics method 08 p1164 A66-19128
Lip shock strength in flow behind backward facing step 08 p1207 A66-19155
Ljapunov stability criterion for panel flutter in supersonic flow derived from second method of Ljapunov 08 p1310 A66-19160
Supersonic airflow past blunt body with various dissociation reactions 08 p1165 A66-19192
Plasma diagnostics by spectroscopic techniques, measuring polarity dependences of temperature and charged particle concentration for flows with shock wave and periodic structure 08 p1265 A66-19470
Approximate methods for integration of equations of plane isentropic motion of gas at supersonic velocities 08 p1165 A66-19572
Ultrasonic velocity of compressed fluid hydrogen between 15 and 100 degrees K and in normal and parahydrogen of saturated liquid between 14.5 and 32.2 degrees K 09 p1392 A66-20081
Unperturbed highly supersonic flow past thin profiles and bodies of revolution with generatrix equations, using law of plane cross sections for solution 09 p1328 A66-20765
Nonstationary supersonic flow in near sonic range, calculating pressure distribution in oscillating profile 09 p1328 A66-20875
Separation of gas mixture in curved supersonic flow, noting parameters of concentration gradient profile variation 10 p1522 A66-21269
Turbulent boundary layer in subsonic or supersonic flow past pinched-waist bodies of revolution at various Mach numbers and pressure gradients 10 p1480 A66-21387
Solving supersonic laminar boundary layer separation by velocity profile and energy momentum concept, noting application to wedges and curved surfaces [ASME PAPER 65-APMW-19] 10 p1523 A66-21469
Ion density profiles in boundary layers associated with supersonic flow of shock heated air over flat plate measured by cylindrical and flush-mounted electrostatic probes [AIAA PAPER 66-159] 10 p1565 A66-21686
Rapid expansion of supersonic boundary layer and application to vortical flow of near wake 10 p1480 A66-21772
Tangency condition and pressure coefficient of supersonic flow past oscillating bodies of revolution 10 p1481 A66-21795
Three-dimensional supersonic gas flow past truncated cone with shock separation calculated by method of characteristics 11 p1629 A66-22336
Stability analysis of freely supported thin elastic conical three-layer shell situated in potential supersonic flow 11 p1780 A66-22349
Optimal contours minimizing pressure drag of symmetric wings, assuming zero angle of attack and sharp edges, using Ackert linear flow theory 11 p1630 A66-22503
Minimization of total drag/pressure and friction/ of two-dimensional wing with unspecified chord, finding extremal solutions which include one, two or three subarcs 11 p1630 A66-22504
Shape determination of bodies of revolution minimizing pressure drag in linearized supersonic flow 11 p1630 A66-22505

Minimizing pressure drag of three-dimensional wing in linearized supersonic flow with Euler equations being partial differential equations 11 p1630 A66-22506

Nonslender bodies of revolution with minimum pressure drag, noting derivation of minimizing curves for Newtonian flow 11 p1631 A66-22514

Pressure distribution and air injection effects in transitional separated flow over spiked hemisphere at supersonic speed 11 p1635 A66-23004

Radiation effect on hydrodynamic shock wave parameter distribution for bodies entering dense atmospheric layers at supersonic velocities 11 p1635 A66-23051

Steady state expansion of gas into vacuum, considering continuum inviscid analysis, collision-free analysis, supersonic flow and hypersonic limits, etc, for spherical and cylindrical symmetry 12 p1860 A66-23607

Supersonic viscous gas flow near blunt body numerically determined by equations similar to Navier-Stokes equations 12 p1796 A66-23900

Turbulent boundary layer separation in supersonic flow 12 p1797 A66-24112

Supersonic flow around blunt body calculated via integral relations, using simultaneous approximation function in two directions 12 p1797 A66-24208

Supersonic air flow past blunt bodies and equilibrium physicochemical conversion effects 12 p1797 A66-24426

Aerodynamic characteristics of shapes constructed by current surfaces of supersonic flows past cones, noting lengthwise variation of cross sections 12 p1798 A66-24438

Flow past elliptic cones in wind tunnels at varying Mach and Reynolds numbers, noting surface pressure distribution, shock wave shapes and flow parameters at supersonic speeds 12 p1798 A66-24439

Numerical solution of problem of supersonic flow at angle of attack past arbitrarily smooth conical bodies 12 p1798 A66-24441

Hypersonic or supersonic flow of gas past yawing delta wing with stall fence 12 p1799 A66-24443

Axissymmetric shock wave formation at nozzle exit when jet pressure is less than ambient pressure 12 p1799 A66-24447

Supersonic flow past blunt body by Taylor series expansion from shock wave, Newton-Busemann expansion, truncated series expansion from axis, etc, and comparison with numerical solutions 13 p1989 A66-25155

Stability criteria of trivial solution of rheolinear differential equation verified by calculating Liapunov function for nonlinear equations 13 p2117 A66-25399

Electrical analogy for wing in unsteady supersonic flow, determining distribution of lifting power for various aspect ratios 13 p1990 A66-25405

Approximate shape of detached shock wave calculated and results compared with empirical findings obtained by supersonic wind tunnel experiments 13 p1990 A66-25452

Shock waves, pressure distribution and mass flow effects on supersonic glide surface parachute 13 p1994 A66-25589

Potential stabilized two-component supersonic flow of thin body and surface form for given pressure distribution and component separation line 13 p1994 A66-26765

Axissymmetric supersonic flow involving shock waves applied to flow near vertex region of pointed bodies of revolution with arbitrary geometry 14 p2218 A66-27354

Solution of boundary value problem for three-dimensional wave equation applied to supersonic gas flow past wing in presence of shock wave, obtaining velocity potential 14 p2218 A66-27387

Mathematical and numerical determinations of aerodynamic forces on harmonically oscillating cylindrical shell under subsonic and supersonic speeds and comparison with slender body theory 14 p2218 A66-27405

Stability of two-dimensional panels in supersonic flow when shock wave is reflecting regularly from surface, using static aerodynamic

approximation 14 p2398 A66-27417

Calibration curve for Preston tubes in supersonic flow obtained by reference-temperature method 14 p2294 A66-27452

Coupled parametric and self-excited vibration of plate with supersonic flow past one side, assuming periodically varying forces act in plane of plate, noting degeneration of parametric resonance main region 14 p2398 A66-27456

Pressure distribution and shock standoff distance on spherically blunt cones in supersonic wind tunnel 14 p2220 A66-27968

Variational problem of designing maximum draft nozzle supersonic section for three-dimensional supersonic flow 14 p2221 A66-28057

Dorodnitsyn-Belotserkovskii method for nonuniform supersonic gas flow past sphere 14 p2221 A66-28066

Arc discharges in supersonic flows, discussing problem of obtaining stable transverse electric arc in supersonic plasma jet 14 p2375 A66-28177

Pressure distribution along wing and body of wing-body combination 14 p2221 A66-28185

Expansion of supersonic flow of air with suspended solid particles during passage through Laval nozzle 14 p2279 A66-28325

Approximate iterative calculation of non-Newtonian supersonic gas flow past highly blunt bodies 15 p2423 A66-28959

Spatial problems in gas dynamics solved by difference methods, discussing supersonic flow 15 p2423 A66-29174

Direct numerical method for calculation of supersonic inviscid flow about axisymmetric blunt body at large angle of attack [AIAA PAPER 65-24] 15 p2423 A66-29269

Oscillatory pressures in idealized annular boundary layer apply to panel flutter of circular cylindrical shell in supersonic flow 15 p2610 A66-29282

Pulsed nitrogen laser action in wind tunnel-simulated supersonic flow 15 p2516 A66-29384

Existence of convective interaction mechanism affecting direction and stability of electric current in flowing gas, using electric arc confined in supersonic flow 15 p2481 A66-29744

Diatomic gas flow past blunt bodies, noting effect of oscillation and dissociation relaxation on mean energy 16 p2627 A66-30100

Linearized unsteady supersonic potential flow theory formulation of boundary value problem of aerodynamic forces on oscillating cylinder and comparison with two-dimensional quasi-steady and slender body approximations 16 p2628 A66-30259

Supersonic cascade tunnel used to evaluate compressor blade performance [ASME PAPER 65-WA/GTP-4] 16 p2673 A66-30340

Electrical discharge probe for transient density measurements in rarefied gas flow, noting density range, flow velocity, etc 16 p2701 A66-30380

Rarefied supersonic flow condensation on cold flat plate, noting capture coefficients, shock wave behavior, etc 16 p2825 A66-30383

Laminar boundary layer separation in supersonic flow on body with symmetry of revolution 16 p2629 A66-30583

Thin body of revolution with annular shield with zero wave resistance in supersonic axial linearized flow 16 p2829 A66-31036

Linearized supersonic flows in quasi-cylindrical tubes and wall form determination from given pressure distribution 16 p2829 A66-31038

Heat transfer between turbulent supersonic air stream and circular water-cooled tube at Mach 1 to 4, using two-dimensional flow model 16 p2829 A66-31161

Spectroscopic data from argon and nitrogen supersonic plasma jets, noting line width, intensity, temperature, etc 16 p2763 A66-31189

Optimum profile of supersonic nozzle with nonequilibrium flow 16 p2687 A66-31287

Mixed sub-and supersonic gas flow in plane pressure nozzle free of vortex and neglecting viscosity and heat conduction 16 p2630 A66-31289

Self-excited vibrations of infinitely long

cylindrical shell, situated in flow

supersonic ideal gas, obtaining motion equations and analyzing stability conditions 16 p2820 A66-31319

Laminar viscous wake interaction with supersonic external inviscid flow downstream treated by implicit finite difference method [AIAA PAPER 66-454] 16 p2689 A66-31414

Behavior of inviscid supersonic conical flow fields near crossflow stagnation point studied by constructing coordinate expansions of exact conical flow equations [AIAA PAPER 66-491] 16 p2631 A66-31414

Shock wave reflection from sonic line during supersonic flow around smooth profile 16 p2632 A66-31618

Position and dimension of separation zone and bottom pressure calculation for supersonic gas flow around body 16 p2632 A66-31618

Shape of head wave in linearized supersonic flow past finite span wing considering waves with convex and concave leading edge 16 p2632 A66-31717

Supersonic section of nondissipative sectional low density plasma accelerator calculating two-dimensional cold plasma flow 17 p2964 A66-31819

Turbulent supersonic base pressure for Chapman-Korst flow model of separated flows 17 p2906 A66-32014

Supersonic flow over downstream-facing step on circumference of ducted axisymmetric body used in flow reattachment, measuring surface pressure distributions 17 p2839 A66-32444

Film cooling in supersonic free stream flowing along flat plate in Mach 3 wind tunnel, using air as secondary fluid 17 p2839 A66-32444

Secondary flow for supersonic boundary layers with or without swept edges, noting effect of compressibility and heat transfer on reverse flow 17 p2840 A66-32448

Longitudinal acceleration and angular velocity of rotation effect on flexural vibration of elongated body of revolution in supersonic flow applied to critical flutter calculation 17 p3027 A66-32600

Flutter of simply supported thin isotropic parallelogrammic flat panels in supersonic flow [AIAA PAPER 66-474] 17 p3028 A66-32761

Flow structure and heat transfer for rearward facing step in supersonic flow discussing critical Reynolds number, flow through lip shock, etc 17 p2913 A66-33061

Critical lengths in subsonic and supersonic gas-particle flow in vertical constant area tube, considering effect of governing variables and inlet conditions of system [ASME PAPER 66-FE-19] 17 p2915 A66-33271

Integral relations method formulation of inverse blunt body problem and corresponding shock wave under supersonic flow of perfect gas 17 p2842 A66-33333

Finite difference method for shock wave propagation into supersonic crossflow 17 p2916 A66-33471

Terminal shock-boundary layer interaction on slender cone-cylinder payloads at supersonic speeds and resulting flow separation [AIAA PAPER 66-471] 18 p3250 A66-33651

Heat transfer caused by combustion of triethylaluminum on flat plate in Mach flow, noting significance of lag at stagnation pressure 18 p3260 A66-33811

Ionization of low temperature supersonic plasma jets, noting kinetics of elementary processes, gas dynamic parameters and effects of combustion and alkali metal admixtures 18 p3143 A66-34003

One-dimensional analysis used by Hope and Segars invalid for ejector with supersonic primary stream 18 p3100 A66-34601

Supersonic MHD flow around right angle bend, constructing characteristic net by applying energy equations 18 p3147 A66-34621

Base pressure behind ridge in separate supersonic flow of compressible gas determined for case of turbulent mixing 18 p3103 A66-35051

Relaxation and emission during equilibrium supersonic air flow incident on normal shock wave 19 p3276 A66-36461

- Numerical approximation of Riemann integration for plane gas flow at supersonic speeds 19 p3276 A66-36475
- Base pressure approximation for two-dimensional isentropic supersonic flow and separation supersonic flow 19 p3277 A66-36476
- Approximation theory for calculating linearized subsonic and supersonic flow over pulsating bodies with low aspect ratio, noting structure of flow field 19 p3277 A66-36641
- Aerodynamics of propulsion plants, discussing cascade flow parameters, sub and supersonic flows, rocket gas cooling, acceleration of electrically conducting gases, etc 19 p3343 A66-36749
- Multistage axisymmetrical supersonic exit cones optimum geometry design diagram based on external oblique and normal compression shock 20 p3628 A66-36927
- Base pressure and flow parameters near trailing edges of axisymmetric blunt bodies in supersonic flow 20 p3492 A66-36768
- Supersonic gas flow states in transition regime, discussing change from dynamical to molecular flow, velocity and pressure distribution and conditions for freezing of translational degrees of freedom 20 p3548 A66-38084
- Supersonic turbulent flow in low temperature plasma accelerator with rapid boundary layer growth 21 p3693 A66-38684
- Supersonic flow of reacting gases in de Laval nozzle for Mach number near unity 21 p3724 A66-38721
- Prediction characteristics of separated turbulent boundary layers in compression corners used to determine aerodynamic heating distributions and dynamic loading of supersonic vehicles 21 p3724 A66-38730
- Applicability of inverse blunt-body computer program /Norair/ to supersonic and transonic flow 21 p3694 A66-38731
- Supersonic nozzle flow of dissociated oxygen, nitrogen and carbon dioxide 21 p3694 A66-39089
- Oblique shock wave formal determination of aerodynamic forces and pressure distribution on delta wings in supersonic or moderately hypersonic flow 21 p3695 A66-39602
- Supersonic flow around thin polygonal wings and polygonal wings of symmetrical thickness studied by Carafoli hydrodynamic analogy for wings in conical flow 21 p3695 A66-39603
- Plane supersonic flow with Mach reflection represented by shock wave interaction, noting integral equation obtained from linearized shock equations 22 p3897 A66-39696
- Shock waves and periodic structures of supersonic plasma flows and effect on velocity of foremost luminous front 22 p3953 A66-39759
- Viscous drag on flat plate in supersonic flow injected with gas in boundary layer, examining exit cone of rocket nozzle 22 p3970 A66-39875
- Mass transfer from cone in supersonic flow in tests performed at zero angle of attack, preserving Mangler transformation which transforms flat plate solution to cone 22 p3843 A66-40036
- Behavior of small cylindrical Langmuir probe in steady low density flow of argon plasma [AIAA PAPER 66-5] 22 p3918 A66-40350
- Langmuir type probe in argon arc jet, discussing surface contamination problems, causes of high electron temperature and development of automatic cleaning technique 22 p3899 A66-40368
- Mach number and body geometry effects on stability characteristics of oscillation in supersonic regime of bodies of revolution 22 p3844 A66-40373
- Laminar mixing of two parallel streams of compressible fluid stability with respect to supersonic disturbances 22 p3900 A66-40385
- Pseudoviscosity method using finite difference equations for calculating two-dimensional flow fields for supersonic motion of inviscid gas 22 p3901 A66-40494
- Linearized potential theory for forced vibration of continuous self-exciting plate on hinged support in supersonic flow, investigating parametric resonance frequencies relation to coupling of eigenfunctions 22 p3995 A66-40508
- Supersonic flow around blunt body calculated via integral relations, using simultaneous approximation function in two directions 22 p3844 A66-40572
- Shock wave instability and mass flow accommodation for ribbon-type parachutes, noting canopy porosity and free stream Mach number 22 p3845 A66-40594
- Supersonic airflow effect on rain droplets measured in wind tunnel, shock tube and sled tests [AIAA PAPER 66-766] 22 p3894 A66-40647
- Lifting wings in supersonic regime, analyzing flow separation at leading edges [ICAS PAPER 66-20] 22 p3847 A66-40670
- Weakly perturbed supersonic flows in presence of arbitrary number of nonequilibrium physicochemical processes 22 p3901 A66-40684
- Airfoil pitching motion and flap rotational motion in two-dimensional low supersonic flow in wind tunnels 23 p4053 A66-40975
- Wind tunnel testing of delta-like lifting bodies at low, supersonic and hypersonic speeds, noting lift to drag ratios and off-design performance of caret wave-rider wings [ICAS PAPER 66-24] 23 p4007 A66-41011
- Supersonic aerodynamic problem of wing-body interaction and solution within lifting-surface theory, using analog method [ICAS PAPER 66-22] 23 p4008 A66-41254
- Supersonic gas flow problems around lattice of conical blades solved in any approximation of perturbation theory 23 p4008 A66-41358
- Theory of wings with curved leading edges in supersonic flow, including delta wings with straight leading edges in case where motion is conical 23 p4008 A66-41379
- Body shapes providing minimum wave resistance to supersonic flow of perfect gas, considering bodies around which flow causes bound shock waves 23 p4009 A66-41717
- Supersonic unsteady state three-dimensional flow around blunted bodies with detached shock wave 23 p4009 A66-41718
- Supersonic unsteady gas flow around bodies at low Strouhal numbers, noting angle of attack amplitude and leading edge shock wave 23 p4009 A66-41719
- Viscous supersonic flow near wall with large local curvature, using asymptotic solutions to Navier-Stokes equations 23 p4056 A66-41721
- Unsteady supersonic gas flow around lattice of thin curved plates for calculation of aerodynamic forces and moments acting on oscillating profile 23 p4009 A66-41722
- Equilibrium temperature and heat transfer of sphere in supersonic flow of rarefied air 23 p4010 A66-41733
- Reaction of three-dimensional shock wave with turbulent boundary layer in supersonic flow around plate 23 p4010 A66-41735
- Slender bodies with minimum inviscid pressure drag derived, using hypersonic small disturbance approximation to shock expansion method [AIAA PAPER 66-129] 23 p4011 A66-41880
- Approximate second-order supersonic delta wing theory taking into account second-order differential equation via approximate particular integral 23 p4011 A66-41897
- Surface mass transfer effect for supersonic flow over cone, examining solution of equations of motion for inviscid compressible gas with velocity field normal to surface of inner cone 23 p4011 A66-41898
- Secondary injection induced shock shape and vertex location solved by equivalent blunt body in supersonic flow 23 p4058 A66-41899
- Steady state inviscid gas flow around conical bodies solved, using stabilization method for three-dimensional supersonic flow around smooth body 23 p4013 A66-42012
- Transonic flow in throat of convergent-divergent nozzle for continuous fluid acceleration from subsonic to supersonic velocities 23 p4013 A66-42015
- Three-dimensional supersonic gas flow past smooth blunt bodies, considering gas dynamic equations for mixed and purely supersonic regions 23 p4013 A66-42016
- Mixing and reattachment of two-dimensional supersonic flow, noting parasitic factors 23 p4014 A66-42023
- Flows with relaxation involving very rapid flow processes accompanied by reactions without chemical or thermodynamic equilibrium, using characteristics method 23 p4014 A66-42048
- Magnetically driven shock tube as tool for aerodynamic studies of high velocity high enthalpy flows 24 p4190 A66-42172
- Supersonic flow past pointed bodies of revolution at small angles of attack 24 p4157 A66-42611
- Maximum wave drag in supersonic flow deflection 24 p4158 A66-42852
- High sensitivity method of visualization of supersonic flow of rarefied gas, using glow from cathode parts of glow discharge 24 p4196 A66-42876
- SUPERSONIC FLOW INLET**
- Supersonic and hypersonic flow fields around plane and axisymmetric bodies and inlets obtained by nonlinear characteristics method 04 p0454 A66-13519
- Analytic design of turbine blades based on inviscid isentropic supersonic vortex flow theory and performance in cascades 12 p1796 A66-23800
- Shock-induced boundary layer separation on supersonic intake, using hodograph technique for flow structure analysis 17 p2841 A66-32896
- SUPERSONIC FLUTTER**
- Panel flutter from Mach 1 to 1.5, correlating analytical and experimental results presented in literature 01 p0151 A66-10342
- Parabolic temperature distribution effect on flutter behavior of panel subjected to supersonic flow over one surface [AIAA PAPER 65-112] 02 p0297 A66-11544
- Supersonic panel flutter using small deflection plate theory and three-dimensional unsteady aerodynamic theory [AIAA PAPER 64-491] 05 p0609 A66-15789
- Supersonic flutter of circular cylindrical shells subjected to internal pressure and axial compression 15 p2610 A66-29281
- Frequency equations from plane cross sections law and exact linearized theory solved for oscillating rigid band in supersonic flow 16 p2823 A66-31631
- Supersonic flutter from vibration characteristics of trapezoidal wing with low aspect ratio 17 p3031 A66-33073
- Two- and three-dimensional plates in high supersonic flow undergoing limit cycle oscillations analyzed, using aerodynamic theory and von Karman large deflection plate theory 18 p3257 A66-34593
- SUPERSONIC HEAT TRANSFER**
- Ablative materials for thermal protection and minimum mass transfer of aircraft flying at hypersonic speeds 10 p1620 A66-21404
- Step function distribution of heat transfer for laminar supersonic boundary layer described as function of decay factor 18 p3261 A66-34363
- SUPERSONIC INLET**
- Relationship between atmospheric gust criteria and performance of supersonic inlet and propulsion [AIAA PAPER 66-367] 12 p1801 A66-24495
- Shock wave systems in design and operation of supersonic intakes, noting motion equation describing flow and role of multiple wedges meeting at one point 12 p1800 A66-25003
- Supersonic compressor flow induction process as affected by Mach number, cone angle, rotational speed and blade angle [AIAA PAPER 66-615] 19 p3275 A66-35943
- SUPERSONIC JET**
- Cluster ion formation by electrical retarding field, measuring spectrum and size distribution in condensed supersonic molecular beams of carbon dioxide 05 p0718 A66-14501
- Astronautics applied to piston aircraft and supersonic jets, advantages and shortcomings 07 p1076 A66-17797
- Supersonic hydrogen jet production in vacuum 08 p1207 A66-19196
- Computation and measurement of Hall

potentials and flow field perturbations in MGD flow of axisymmetric free jet 08 p1266 A66-19815

Free jet of arc heated low-density supersonic argon plasma examined, measuring radiative mechanisms, electron temperatures, thrust, jet structure, etc [AIAA PAPER 66-163] 13 p2138 A66-25167

Supersonic jet interaction for hypersonic flow of Mach 7.1 and for variable Mach number, noting jet instability, stagnation pressure, drag variation, wind tunnel, etc 14 p2220 A66-27467

Collision of opposed supersonic jets in pulse discharges, noting formation of shock-constricted plasma regions between electrodes 15 p2551 A66-29216

Inviscid and viscous flow in central core of supersonic free jet in wind tunnel, noting shock wave location at high Reynolds number 16 p2628 A66-30375

Structure and properties of free supersonic jets including impact pressure and velocity distribution measurements, condensation, etc 16 p2628 A66-30376

High intensity fast molecular beams obtained by skimming and collimating core of supersonic plasma jet from arc-heated source 16 p2760 A66-30431

Oblique condensation discontinuities calculated during flow of supercooled water vapor in supersonic jets 16 p2690 A66-31608

SUPERSONIC NOZZLE

Velocity distributions in molecular beams of argon produced by supersonic nozzle sources, using time of flight method 04 p0548 A66-14012

Gas stream behind shock wave in contracting channel, discussing flow parameters during discharge from supersonic and divergent nozzle 05 p0607 A66-15321

Thrust-vector control and flow field produced by secondary gas injection into supersonic stream 08 p1162 A66-18831

Spectrum line reversal measurements of excitation temperature of Na atoms in expansion flows of shock-heated Ar and one percent nitrogen plus Ar 08 p1258 A66-18939

Inviscid supersonic nozzle flow of ideal dissociating gas, sudden freezing, equilibrium-recombination mechanism and velocity distribution [AIAA PAPER 66-1] 08 p1163 A66-18983

Excitation temperature measurement of arc-heated argon plasma jet by spectroscopic method at supersonic nozzle outlet 12 p1920 A66-23854

Jet boundary determination of underexpanded two-phase carbon dioxide supersonic nozzle flow 14 p2219 A66-27445

Variational problem of designing maximum draft nozzle supersonic section for three-dimensional supersonic flow 14 p2221 A66-28057

Performance of short supersonic nozzles producing expansion and density jumps in flow, noting efficiency in obtaining maximum driving effect 16 p2630 A66-31303

Ice crystal size during expansion of humid air in supersonic nozzle 17 p2948 A66-32417

Carbon dioxide supersaturation and condensation in supersonic nozzles in terms of stagnation pressures, temperatures, and expansion rates 17 p3039 A66-33476

Optimum thrust nozzle contours for chemically reacting gas flows, obtaining set of partial differential equations for gas dynamic properties [AIAA PAPER 66-638] 19 p3277 A66-36599

Optimization of supersonic portion of three-dimensional flow geometry in rocket motor nozzle for maximum thrust [AIAA PAPER 65-568] 23 p4007 A66-41108

Pressure distribution on nozzle block of oblique-exit-plane nozzle with supersonic turbulent flow and calculation of thrust, thrust vector and torques 24 p4157 A66-42774

SUPERSONIC PRESSURE DISTRIBUTION

Air intake with boundary layer trap, examining flow structure under external supersonic pressure and uniformity parameters [ONERA TP 288] 03 p0316 A66-12898

Laminar heat transfer and pressure distribution in open cavity supersonic flow, noting heat-transfer coefficient

[ASME PAPER 65-WA/HT-37] 05 p0608 A66-15670

Compressible fluid flow, discussing simple wave supersonic flow mechanism for bodies with developable surfaces 06 p0802 A66-16352

Surface pressure distribution on high-velocity body with large injection rate or ablation rate [AIAA PAPER 66-89] 07 p0984 A66-18455

Mach number, Reynolds number and boundary layer trip devices effect on base pressure 14 p2219 A66-27443

Surface pressure distribution on high velocity body with large injection rate or ablation rate [AIAA PAPER 66-89] 22 p3844 A66-40348

Detached shock wave determination for calculation of shock layer or wake, discussing theories of conic and explosive wave methods for application to Apollo space capsule 22 p3900 A66-40416

SUPERSONIC SPEED

Royal Aircraft Establishment facilities in England for aircraft structure testing under supersonic conditions, simulating aircraft takeoff, flight and landing 04 p0508 A66-14021

Heat transfer in base flow region, determining parameter of correlation for hydrogen injection and combustion, adiabatic flame temperature, heating rates and recovery temperature [AIAA PAPER 66-108] 06 p0970 A66-16408

Minimal-drag shape of nonslender body of revolution in diffuse free molecular flow 11 p1632 A66-22527

Thick laminar boundary layer influence at supersonic speeds and low Reynolds numbers 11 p1634 A66-22933

Supersonic gas flow past cylindrical obstacle on plate in wind tunnel at Mach number 2.5, noting separation line, pressure distribution and flow orientation 12 p1798 A66-24437

Three-dimensional plane shock wave intersection in space, noting parameter range for which two solutions exist 13 p1991 A66-25635

Optimum conditions for molecular beam generation determined by measuring particle flow density and speed ratio of short beam pulses from convergent nozzle 16 p2752 A66-30384

Subsonic-supersonic speed jet turbulent mixing 17 p2840 A66-32489

Side forces and moments on Tomahawk sounding rocket with and without spin at high Reynolds number and Mach 5 [AIAA PAPER 66-754] 23 p4008 A66-41329

SUPERSONIC TRANSPORT

Aircraft maintenance and maintainability within context of U.S. supersonic transport program 01 p0010 A66-10095

Nature and magnitude of turbulent boundary layer pressure fluctuations over two-dimensional surfaces and narrow delta wings 01 p0005 A66-10124

Titanium alloys as basic structural material for supersonic transport noting strength, corrosion resistance, fatigue, etc [SAE PAPER 650789] 01 p0088 A66-10814

Navigation system for supersonic transport considering central digital computer with data processing systems with feedback 02 p0256 A66-11898

Atmospheric conditions effect on supersonic jet traffic 02 p0178 A66-12030

Design and development of U.S. SST program 03 p0322 A66-13105

Fuels and lubricants with thermally stable molecular structure and antioxidants to meet requirements of supersonic transport 03 p0414 A66-13221

Human factors in Concorde SST program 03 p0329 A66-13357

High-performance hydraulic power system for supersonic transport aircraft, using redundancy of three completely separate and functional systems 04 p0459 A66-13780

Aerodynamics, performance and operational considerations effect on Boeing design of variable sweep supersonic transport aircraft [SAE PAPER 858C] 04 p0458 A66-13929

Ability of airmen to withstand exposure to supersonic transport altitudes 05 p0627 A66-15000

Variable sweep wing effect on supersonic transport stability and control

characteristics [AIAA PAPER 64-603] 05 p0610 A66-15068

Aerodynamic characteristics of fixed-geometry double delta wing SST, noting low speed handling improvement due to vortex flow [AIAA PAPER 64-591] 05 p0610 A66-15069

Accessory power drive, variable sweep wing actuation, hydraulic, electric and environmental control systems of Boeing SST [ASME PAPER 65-AV-13] 05 p0611 A66-15131

Future developments in supersonic transport and V/STOL aircraft 05 p0611 A66-15269

Supersonic commercial aircraft, discussing piloting problems such as reaction time, visual acuity reduction, etc 06 p0816 A66-16060

Supersonic transport design in thermal insulation, structure and air traffic control 06 p0805 A66-16324

SST prospects, history, design and controversy 07 p0985 A66-17203

Design of landing gear for military cargo aircraft and supersonic transports 07 p0985 A66-17255

Interaction of pilot capabilities and economic factors on future air transport, noting problems with SST, V/STOL, Mach 6 transport craft, etc 07 p1156 A66-17611

SST navigation and air traffic control equipment for NAC-60 aircraft, noting climbout, cruise, position, landing, etc 07 p1067 A66-17687

Atmospheric temperature of route of SST and influence on navigation, fuel management and operating economics 07 p0988 A66-17694

Doppler frequency shift and effect on single-sideband HF communication systems for supersonic transport 07 p1001 A66-17699

Weather surveillance radar for SST must have range of 250 nautical miles for 0.2 g passenger acceleration 07 p1001 A66-17700

Route structure and navigation system error over North Atlantic and advantages of SST inertial navigation system 07 p1068 A66-17701

Charting for dynamic map displays preparatory to SST operations 07 p1068 A66-17705

Navigation precision for SST operation having due regard to performance and noise 07 p1069 A66-17709

Simulation of airport with SST aircraft in air traffic control system 07 p1070 A66-17725

Climb profiles by SST pilot evaluated by simulator study using instrument, Mach altitude display and flight director 07 p0988 A66-17783

SST instrumentation problems, discussing reappraisal of flight deck display requirements 07 p1033 A66-17784

Moving map displays for navigation information portrayal, advantages and requirements for subsonic and SST airliners 07 p1076 A66-17796

Inertial navigation on north transatlantic route, examining inertial equipment, flight planning and preflight cockpit checks 07 p1076 A66-17798

Cockpit flight instrument display in integrated navigation system for SST, stressing smooth transition in handling from enroute navigation to terminal-area and approach procedures 07 p1078 A66-17810

Computational reduction of high speed memory requirements in solving optimization problems by dynamic programming and supersonic transport trajectory application 07 p1004 A66-17976

Aircraft design parameter development, discussing supersonic air transport, helicopter and V/STOL design problems, metal fatigue, etc 08 p1167 A66-18707

Error analysis in supersonic transport navigation system 08 p1249 A66-19057

Aircraft turbine lubricant technology for high Mach number engines especially SST, noting stability, autoignition, coking, toxicity, etc [SAE PAPER 660071] 09 p1434 A66-20156

Design and propulsion of 2-B version of Lockheed L-2000 SST noting drooping nose, variable geometry inlets, stressed skin construction, etc 09 p1329 A66-20390

Thermal management /heat-sink and

pressurization and cooling systems/, fuel, flying control and hydraulic and electrical systems of Lockheed L-2000 SST project 09 p1329 A66-20391

Altitude measurement requirements for supersonic transport including flight profile, air traffic control, climb, etc 09 p1400 A66-20426

Dynamic response of supersonic transports to runway unevenness during takeoff or landing 09 p1330 A66-20692

Airport suitability for delta wing commercial supersonic transport, discussing noise objectives 09 p1365 A66-20698

Titanium and alloys examined, noting high strength-weight ratio, corrosion resistance, electrochemical properties, application for supersonic transport, etc 13 p2107 A66-25483

Lockheed supersonic air transport design development 13 p1995 A66-25758

Double-delta supersonic air transport low-speed operational characteristics, noting wind tunnel tests and design parameters 13 p1991 A66-25760

Airmen exposure and safety at high altitude with reference to SST 13 p2015 A66-25762

U.S. SST in competition with other SST and economic effect on airlines and U.S. economy 13 p1995 A66-25765

Navigation precision for SST operation having due regard to performance and noise 13 p2125 A66-25868

Charting for dynamic map displays preparatory to SST 13 p2125 A66-25869

Flight simulation of SST transport using hybrid computer 13 p2028 A66-26330

NASA mission, discussing V-STOL transports, SST and hypersonic cruise vehicles [SAE PAPER 660169] 14 p2416 A66-27282

Airworthiness and operational standards approaches for safety in supersonic transport, noting problems with temperature, altitude, radiation, ozone, etc [SAE PAPER 660293] 14 p2222 A66-27288

Supersonic transport engine requirements in light of past jet transport operation [SAE PAPER 660296] 14 p2373 A66-27291

Nonoptimum flight conditions effects on SST fuel performance, noting sonic boom and atmospheric temperature variations 14 p2224 A66-28230

SST air traffic control and fuel consumption dependence on wind drift and atmospheric temperature 14 p2328 A66-28231

SST navigation systems as affected by shortened computation time and sensor accuracy 14 p2329 A66-28232

SST flight performance as affected by wind, temperature and radiation 14 p2224 A66-28233

Supersonic transport operations, particularly analog computer facility at Langley Research Center and ATC simulator at National Aviation Facilities Experimental Center 15 p2443 A66-28744

SST air traffic control and arrival and departure simulation 15 p2425 A66-28745

Nondestructive metal testing in SST development, noting welded titanium structures 15 p2509 A66-29319

Navigation displays for supersonic transports, discussing inductive reasoning, system performance verification, initial data verification, etc 15 p2535 A66-29625

Operation and maintenance of Lockheed L-2000 double delta SST aircraft with high thrust engine and large delta wings, designed to meet civil aviation requirements [SAE PAPER 660295] 15 p2427 A66-29832

GE-4 turbojet engine for SST design and program development, maintenance, safety, economics, performance, noise, etc [SAE PAPER 660298] 15 p2572 A66-29833

Main landing gear design for Concorde SST 17 p2846 A66-32950

Overall nature and problem of sonic boom, noting roles of aircraft design, aircraft operations and atmosphere 17 p2847 A66-33021

Human reaction to sonic boom 17 p2868 A66-33027

Sonic boom requirements for supersonic transports 17 p2847 A66-33031

Head-up display system design for civil aircraft including SST and current subsonic

jets 17 p2952 A66-33200

Pilot acceptance factors in development of all-weather landing and SST navigation systems 17 p2955 A66-33219

XB-70A research aircraft and flight tests to aid SST 18 p3051 A66-33957

Exhaust nozzle performance noting testing techniques, cruise engine installations, data accuracy, etc [AIAA PAPER 66-641] 18 p3048 A66-34221

Thermal stability aspects of commercial kerosene for supersonic transport [AIAA PAPER 66-670] 18 p3162 A66-34442

Airworthiness codes for supersonic transports, noting current regulations, codes, etc 18 p3268 A66-34622

Sonic boom reduction by aircraft shape modification 19 p3279 A66-36180

XB-70 aircraft safety program developed during flight tests applied to future SST civil aircraft 20 p3494 A66-37006

Air traffic control problems posed by advent of supersonic transport may be eased by pictorial navigation 20 p3598 A66-38185

SST in nonoptimum conditions, discussing cost penalties due to navigation error, air traffic conditions, sonic boom restrictions, clear air turbulence and weather 21 p3695 A66-38451

Costing of parallel route systems for supersonic traffic, examining diurnal traffic patterns, sensitivities to fuel requirements, sonic bang avoidance and layout of track systems 21 p3761 A66-38453

SST aircraft fluid power systems and performance, discussing power requirements, materials, maintenance, configuration, surface temperature distribution, etc [ASME PAPER 66-MD-35] 21 p3697 A66-38487

Titanium alloys with additions of beta stabilizing elements for SST application, noting fabrication problems 21 p3751 A66-39238

Supersonic transport radiation hazard theoretically analyzed, including physiological aging, increased genetic burden and status of fractional cell lethality 22 p3854 A66-39798

Operational cargo handling requirements to make economically feasible supersonic transport and giant subsonic jet 22 p3848 A66-40021

Turbine engines and ramjet for SST and space boosters 22 p3971 A66-40123

Panel flutter analysis via forced vibration technique noting frequency coalescence, flutter boundary and experimental technique [AIAA PAPER 66-769] 22 p3895 A66-40650

Passenger and cargo aircraft development 23 p4152 A66-41647

Supersonic transport production problems, discussing Concorde, Lockheed and Boeing projects, machining, shaping and assembling 23 p4073 A66-41649

British-French cooperation in aeronautics, discussing Concorde SST, variable geometry aircraft, Olympus 593 turbojet, etc 23 p4016 A66-42069

Liquid methane as fuel for SST propulsion in terms of cost, combustion heat and cooling capacity 24 p4261 A66-42240

SUPERSONIC TURBINE

Analytic design of turbine blades based on inviscid isentropic supersonic vortex flow theory and performance in cascades 12 p1796 A66-23800

SUPERSONIC WAKE

Electron density decay in wakes of hypervelocity aluminum and copper spheres in air and nitrogen as function of time, using transmission resonant cavity 02 p0267 A66-11529

Particle in cell method for calculation of supersonic wake flow, noting transient effects for flow initiated by shock diffraction 03 p0316 A66-12791

Three-dimensional flow past ellipsoids of revolution with outgoing shock waves, calculating subsonic and supersonic regions 08 p1162 A66-18873

Photographic results compared with calculations for shock wave reflection velocity and wake processes in electromagnetic shock tube 12 p1921 A66-24214

Mach detonation wave formation

conditions, noting magnitude of shock pressures in metals and possibility of obtaining steady state wave patterns 18 p3266 A66-34629

Photographic results compared with calculations for shock wave reflection velocity and wake processes in electromagnetic shock tube 22 p3957 A66-40578

Limiting initial deceleration forces generated by supersonic decelerators, noting that decelerators deployed in wake region of body result in divergent wake and drag force reduction 22 p3845 A66-40595

Supersonic and hypersonic wake flow dependence on near wake pressure, using momentum integral method 24 p4158 A66-42775

SUPERSONIC WIND TUNNEL

Textbook on design, calibration and operation of near-sonic, transonic, supersonic and hypersonic wind tunnels 03 p0351 A66-12284

Wind tunnel study of supersonic guide surface parachute considering shock waves, pressure distribution and mass flow 04 p0457 A66-13528

ONERA experimental wind tunnel research with jet engine intakes and exits [ONERA TP 292] 05 p0606 A66-15159

Rolling moments of five symmetrical untwisted airfoils of various planform tested in high-speed wind tunnel as functions of angle of attack and angle of yaw 07 p0980 A66-17481

Supersonic wind tunnel facility of German Research Institute for Air and Space Travel in Porz-Wahn, West Germany 08 p1202 A66-18867

Design and capabilities of supersonic wind tunnel of DVL at Porz-Wahn, West Germany 08 p1203 A66-18826

Stagnation temperature control of high-pressure supersonic wind tunnel, using regenerative heat exchangers with porous packing 09 p1471 A66-20802

Iodine evaluated as working fluid in supersonic wind tunnel through study of iodine dissociation process 11 p1683 A66-22594

Thick laminar boundary layer influence at supersonic speeds and low Reynolds numbers 11 p1634 A66-22933

Approximate shape of detached shock wave calculated and results compared with empirical findings obtained by supersonic wind tunnel experiments 13 p1990 A66-25452

Lockheed supersonic wind tunnel and relation to other types 13 p2058 A66-25766

Supersonic wind tunnel measurements in turbulent wake of axisymmetric slender body [AIAA PAPER 66-453] 18 p3046 A66-33649

Gas flow in supersonic wind tunnel measured with high speed photography, noting experimental techniques and applications 22 p3886 A66-40199

Flow pattern of three-dimensional interaction of oblique shock with boundary layer obtained when shock generated by wedge spanning supersonic wind tunnel interacts with side wall 22 p3901 A66-40491

Flat plate laminar boundary layer in supersonic wind tunnel, measuring pressure distribution and profiles and heat transfer rates, noting dissociation fraction effects 24 p4194 A66-42411

SUPERSONIC WIND TUNNEL APPARATUS

Book on uniform steady motion of ideal gas and gas dynamics of supersonic wind tunnels 14 p2220 A66-27789

SUPPLY

S POWER SUPPLY

SUPPORT

SA CHASSIS

Support flexibility effect on natural frequency free vibrations of uniform cantilever carried by mass supported on string 21 p3833 A66-39608

SUPPORT SYSTEM

SA GROUND SUPPORT SYSTEM

SA LIFE SUPPORT SYSTEM

Design limitations on supporting systems in scientific rockets and satellites 03 p0432 A66-12861

Lunar shelter design and support system imposed by lunar environment [SAE PAPER 650834] 05 p0660 A66-15016

Astronomical telescope, discussing support mechanism design for constant mirror shape 05 p0680 A66-15209

Support Evaluation Technique for computer simulation, evaluation and control of complex logistic problems 08 p1203 A66-19527

Target supports of cellular plastic columns and suspension lines in radar reflectivity measurements and associated target weight, measurement frequency and target cross section 10 p1498 A66-21602

Maintenance and logistic support of present and future missile and space systems described in terms of parameters 11 p1789 A66-23443

Launch vehicle parameter design for optimal support of communications satellites [AIAA PAPER 66-285] 12 p1955 A66-24756

Satellite communications central control support system consisting of Earth stations and satellite relays accommodating different RF power, orbits and antenna orientations [AIAA PAPER 66-287] 12 p1859 A66-24758

Manned scientific exploration of Mars, noting support systems on planet surface and experiments to be carried out by two mission designs 13 p2179 A66-25240

Dynamic logic chassis analyzer /DLCA/, diagnostic tool for isolating faults to circuit card or component level in programmer test station /PTS/ and component test station /CTS/ ground support equipment 14 p2260 A66-28266

S-1C stage instrumentation systems and ground support equipment checkout methods used at Kennedy Spaceflight Center 14 p2271 A66-28420

Support systems utilizing maintainability prediction, examining effect of changes, modifications and complete replacement 20 p3682 A66-37240

Atoll computer programming language for spacecraft checkout systems and automatic support operations in Saturn launch vehicle 20 p3544 A66-38257

SURFACE CHEMISTRY

Chemical surface hardening effects on brittle fracture characteristics of machine component steels under dynamic impact, covering mathematical relations for strength improvement 03 p0383 A66-13157

Nature and rate of linear surface regression of TNT, RDX, Tetryl and PETN, using hot-plane pyrolysis technique over surface temperatures to 500 degrees C 04 p0571 A66-13645

Microwave discharge-fast flow to investigate interaction between molybdenum surface and chlorine 06 p0821 A66-16155

Properties of laminar boundary layer undergoing surface catalysis with two reactants and two products obeying Langmuir-Hinshelwood mechanism, solving concentration field by integral equation 13 p2019 A66-26663

Carbon monoxide adsorption on tungsten surface as affected by temperature, noting sticking probability of molecules striking clean or covered surfaces 16 p2721 A66-30108

Clean and oxygen-covered molybdenum /110/ surface analysis using low energy electron diffraction, noting various oxygen structures 16 p2721 A66-30109

SURFACE COOLING

Surface cooling effect on accuracy of black body coefficient determination for highly heated materials 03 p0444 A66-12518

Residual stress distributions in thermoviscoelastic materials due to surface cooling [ASME PAPER 65-APMW-9]

Boundary value problem solution for composite media applied to cooling of composite cylinder by convection at outer surface [ASME PAPER 65-WA/HT-52]

Surface heat flux removal by lithium-sodium-mercury spray cooling, noting vaporization mechanism 07 p1151 A66-17586

Transient heat transfer from liquid sodium spray impinging on vertical plate 07 p1151 A66-17587

Residual stress distributions in thermoviscoelastic materials due to surface cooling [ASME PAPER 65-APMW-9]

Protective cooling of insulated plane surface by multislot and network type gas injection into turbulent boundary layer of incident flow 20 p3681 A66-38123

SURFACE CRACK

Parallel grooves as surface damage in semiconductors produced by ruby laser as diffraction effect 04 p0563 A66-13753

Aluminum alloy surface flaw detection, discussing finishing process methods and parameters for improving penetrant response 06 p0887 A66-16798

Nondestructive test method using fluorescent penetrant techniques for detecting intergranular surface attack on Inconel-X thrust chamber tubing 07 p1040 A66-18392

Three-dimensional stresses near border of discontinuity plane under arbitrary loading, obtaining solution for uniform shear applied to surface of crack 24 p4285 A66-42148

Magnetic field above surface of conductor with flaws that emerge at surface when direct current is passed through 24 p4218 A66-42897

Physical principles of phase sensitive eddy-current method of detecting surface cracks in metal products 24 p4218 A66-42898

Phase-sensitive eddy current method of detecting surface cracks in metal products, examining construction and operating principles of flaw detector 24 p4218 A66-42899

SURFACE DIFFUSION EFFECT

Controlled phosphorus diffusion into silicon from phosphorus pentoxide vapor using red phosphorus as source, noting relations of resistivity-surface concentration to pressure temperature 02 p0275 A66-11872

Angular dependence of radiation intensity scattered from plane diffuse surface illuminated by wideband collimated light 07 p1081 A66-18039

High-and low-temperature surface migration of silicon on tungsten 07 p1104 A66-18364

Photoelectric behavior of n-type Ga-As wafers having shallow zinc diffused surface layers 08 p1269 A66-18869

Unidirectional reflectance of imperfectly diffuse surface defined in terms of surface radiance and equivalent hemispherical radiance of source 08 p1227 A66-19704

Optimum ionizer structure, examining cesium transport through tungsten capillaries [AIAA PAPER 66-207] 12 p1922 A66-24529

Field emission investigation of surface autodiffusion of silicon 15 p2560 A66-28637

Grain boundary grooving in Cr, Mo and W, noting formation mechanism, effect of carbon on activation energy for surface diffusion, etc 18 p3121 A66-33727

Diffusion of chemically frozen partially dissociated gas over surfaces with discontinuous catalytic 18 p3266 A66-34928

Chemical sectioning of p-type surface layers on silicon, presenting electrical and X-ray measurements of boron-induced defect distribution 19 p3436 A66-35424

Surface depletion errors in using effusion method for determining alloy thermodynamic properties, noting time factor 20 p3679 A66-37788

Fabrication methods for lithium drifted surface barrier silicon detectors, discussing

lithium diffusion, stain etching, preparation for and final etch 20 p3535 A66-38417

Kinetics of monosilane pyrolysis, detailing gaseous and solid product formation, surface effects and experiments with added gases 22 p3999 A66-40410

Zn diffusion effect on uniformly Mn-doped GaAs wafer showing via radiotracer technique changes in impurity concentration profile 24 p4250 A66-42255

SURFACE DISTORTION

Formulas for angular resilience of curvilinear surfaces of concave or convex planforms 07 p1038 A66-18068

Statistical approach to determining reflection index estimate from surfaces with small grazing angles 09 p1348 A66-20789

Nonlinear theory for elastic surface deformation, assuming existence of strain-energy function governed mechanically by virtual work 12 p1970 A66-24564

Surface-deformation measurement using wave front reconstruction with interferometry of diffusely reflecting bodies 13 p2080 A66-25991

Streak camera resolution as affected by rotating mirror surface distortion 15 p2498 A66-28824

Maximum load of thin walled I-beam producing beam surface buckling calculated and total stresses defined 16 p2815 A66-30675

Nonlinear theory for deformation of elastic directed surface, assuming existence of strain energy function and postulating virtual work governing mechanical behavior 19 p3474 A66-36167

Statistical approach to determining reflection index estimate from surfaces with small grazing angles 22 p3863 A66-39848

Outflow of liquid from cylindrical tank through central outlet for cases where effect of gravity is small, noting distortion of liquid surface [AICE PREPRINT 17D] 22 p3897 A66-39885

Infinitely small bending deformations of convex surfaces with boundary condition of generalized slip, formulating boundary value problem for bending of surface 22 p3995 A66-40450

SURFACE ENERGY

Scanning electron beam probe for investigating nonuniformity in work function of surfaces known as patch effect 05 p0684 A66-15580

Semiconductor surface plasma density and conductivity, calculating distribution and variation via energy band curvature 06 p0929 A66-16981

Photoconductivity kinetics in thin n-type impurity semiconductor layers with surface capture and recombination levels 07 p1099 A66-17872

Distribution function of semiconductor minority current carriers in presence of pronounced spatial inhomogeneity occurring in intensively absorbing films with intensive surface recombination 07 p1099 A66-17873

Jump-conductivity surface dependence on surface potential in semiconductor, based on field effect basic geometry 07 p1105 A66-18374

Surface phenomena on interface between liquid metals and various refractory compounds, determining surface energy and angle of contact 08 p1238 A66-18898

Internal photoemission measurements show potential barrier profile in thin anodically formed aluminum oxide films between metal electrodes 10 p1509 A66-21541

Field effect and surface states at interface between germanium and electrolytes 10 p1586 A66-22145

Impedance of distributed surface states in MOS structures as function of frequency and bias, noting charge carrier exchange 11 p1757 A66-23206

Oxidation rate and heat treatment effect on density of states of silicon surface potential in silicon-silicon dioxide system 12 p1932 A66-24825

Surface pit formation in aluminum, discussing effects of vacuum, quenching high temperature and repeated cycling 12 p1897 A66-24921

Surface photovoltage measured in vapor-deposited cadmium sulfide using metal-insulator-semiconductor-structures, noting surface potential analysis as applied to thin

film field effect transistor 13 p2164 A66-25487
 Surface photoconductivity dependence on thermal and spectral state and time lag of germanium 14 p2357 A66-27073
 Interatomic interaction effect on adsorption-induced loss of strength in metals 14 p2315 A66-27599
 Field-effect-modulated optical absorption spectrum for various values of Ge surface potential 14 p2366 A66-27765
 Surface states on Si crystal as affected by chemical etching and thermal oxidation studied by pulsed field effect 15 p2567 A66-29403
 Density and location of surface states at silicon-silicon dioxide interface determined by analyzing capacitance-voltage characteristics of MOS diode 15 p2567 A66-29412
 Shubnikov-de Haas oscillations in two-dimensional electron gas in surface of p-type silicon inverted by electric field perpendicular to surface 16 p2771 A66-30204
 Rhenium effect on interface energies of Cr, Mo and W, noting liquid surface tension, solid surface energy and grain-boundary grooving 18 p3121 A66-33726
 Field effect and surface states at interface between germanium and electrolytes 19 p3440 A66-35759
 Dynamic behavior of soap film stretched between two coaxial rings, assuming potential energy of this surface to be proportional to surface area 21 p3772 A66-39353
 Surface photoconductivity dependence on thermal and spectral state and time lag of germanium 22 p3966 A66-40831
 Magnetization measurements of Pb-Tl cylinders in axial magnetic field with superconductivity confined to superconducting surface 23 p4113 A66-41370
 Electron correlation analysis method applied to interelectronic repulsion effect on localized electrons near ideal surface of semiinfinite diamond-like crystal 24 p4252 A66-42349
 Diffusion current in MOS transistors analyzed, using three-dimensional energy band diagrams 24 p4253 A66-42383

SURFACE EROSION
 Mass transfer by sublimation from surface of stationary or rotating naphthalene cone in axisymmetric airstream 04 p0595 A66-13388
 Probe for measuring energy transfer between satellite and upper atmosphere 06 p0878 A66-15922
 Surface pressure distribution on high-velocity body with large injection rate or ablation rate [AIAA PAPER 66-89] 07 p0984 A66-18455
 Crestone crater morphology indicates that it is not meteoritic or cometary in origin 18 p3106 A66-34462
 Softened appearance of certain large lunar craters explained by ash flow theory 19 p3458 A66-35451
 Rain impact-induced erosion of high speed aircraft surfaces and shock wave disintegrating effect on raindrops prior to impact 20 p3495 A66-37809
 Erosion destruction mechanism in polycrystalline graphite, noting effect of gas flow over surfaces, flow pulsation frequency and generated aerodynamic loads 21 p3754 A66-38957
 Oxidation and mechanical performance of tungsten and composite tungsten systems at high temperatures and pressures, determining surface recession rate up to 6750 degrees R [AIAA PAPER 65-293] 22 p3935 A66-40343
 Surface pressure distribution on high velocity body with large injection rate or ablation rate [AIAA PAPER 66-89] 22 p3844 A66-40348

SURFACE FINISH
 Blue haze on electropolished silicon surfaces 09 p1432 A66-20977
 Supersonic aircraft finishes resisting corrosion and high temperatures, including epoxy-amine cured primers, acrylic paints, silicone, synthetic enamels, etc 10 p1547 A66-21136
 Surface finish effect on radial temperature

distributions in optically pumped neodymium trivalent ion glass laser rod by observing thermal stress birefringence 11 p1714 A66-23358
 Surface area and condition and effect on adhesion of aluminum plates 14 p2304 A66-28206
 Asperic surface polishing by driven laps and measurement by air gauge 15 p2509 A66-28825
 Aspheric and other irregular curve generation, using ordinary machinery 15 p2509 A66-28827
 Surface hardening of titanium alloys by copper diffusion for small-size machine parts production 15 p2522 A66-29189
 Surface treatment of joints for structural adhesive bonding design, material selection and metal surface processing for adhesion [ASME PAPER 66-MD-39] 21 p3742 A66-38489
 Adhesive performance testing, noting mechanical methods and types of test specimens [ASME PAPER 66-MD-46] 21 p3742 A66-38492
 Microwave-frequency waveguide losses minimized by controlling effects of geometry, propagation mode, construction materials, surface finish and surface contamination 22 p3874 A66-39992
 Inorganic thin film surface finish for boron filaments, noting improved adhesion to organic resins and high temperature oxidation resistance 23 p4082 A66-41895

SURFACE GEOMETRY
 Specific surface of fine nickel and tungsten powders determined by adsorption of Congo red 01 p0087 A66-10743
 Smoothing of intersection of surfaces of revolution with quadrics of revolution 02 p0297 A66-11244
 Geometrical aspects of optimal processes, discussing existence of limiting surfaces in cost augmented state space, state equations, maximum principle and functional equations for optimal trajectories 04 p0505 A66-13990
 Effect of sample geometry on frequency of helicon waves in lead telluride at low temperature 07 p1101 A66-18201
 Imperfection maps of cylindrical shell surface measured with apparatus consisting of reference surface, rotating mounting plate, oscillograph, low pressure displacement transducer, etc 08 p1310 A66-19159
 Equations of inviscid flow of perfect gas over cusped concave bodies, noting dependency of shock wave slope on infinite Mach number 08 p1166 A66-19818
 Stereoscopic mapping on revolving base, describing process where size of scale is independent of length of half-base 10 p1534 A66-21282
 Thermal radiation from conical surfaces with nonuniform radiosity and application to nozzle design 12 p1977 A66-23598
 Aerodynamic characteristics of shapes constructed by current surfaces of supersonic flows past cones, noting lengthwise variation of cross sections 12 p1798 A66-24438
 Subroutines and functions of BE VISION, package of FORTRAN programs for drawing orthographic views of combinations of plane and quadric surfaces 15 p2510 A66-29770
 Curve equation describing ray surface cutting by arbitrary plane of symmetry in crystals 17 p2989 A66-33486
 Optical system for measurement of aerial profile accuracy of large parabolic reflector noting design principles, instrument composition and experimental results 18 p3113 A66-34276
 Electronic compensation for phase errors in surface profile of reflecting antennas 18 p3081 A66-34277
 Approximate theory for estimating effect of manufacturing tolerances on deep parabolic reflector performance 18 p3082 A66-34284
 Laser system for measuring surface contours in large steerable antennas 18 p3119 A66-34296
 Specific surface of fine nickel and tungsten powders determined by adsorption of Congo red 18 p3124 A66-34980
 Plane surface deviation from ideal plane

measured by interference method, applied to testing of interferometer plates 21 p3738 A66-39131
 Base surface and dimensional characteristics of peripheral gap minimize total force absorbed by ground effect machine with given weight, speed and altitude 21 p3696 A66-39601
 Laval turbine type device for starting rotors of turbojet engines, noting jet energy conversion on wheel blades and geometrical structure 23 p4122 A66-41791
 Middle surface geometry of thin shells using line coordinate system with arbitrary direction and length of base vector 24 p4291 A66-42737

SURFACE INTERACTION
 Quantum theoretic probability of trapping inert gas atom on solid surface with linear lattice 01 p0108 A66-10634
 Surface coating of lyophobic films in affecting surface interactions at phase interfaces of heterogeneous systems during transfer process 01 p0166 A66-10997
 Book on friction and wear covering nature of interaction between solid surfaces, general concepts and engineering and design calculations 04 p0526 A66-13834
 Energy accommodation coefficients calculated for gas particles interacting with cubic crystal lattice 04 p0548 A66-14142
 Solid surface interaction of atoms and molecules of wedge cavity in rarefied free molecular gas stream 04 p0456 A66-14143
 Contact of two axisymmetric plates, showing ability of Reissner theory to overcome classical theory problems [ASME PAPER 65-APMW-26] 04 p0593 A66-14226
 Erected dipole model of adsorbed layer in fluorinated molybdenum filaments exposed to cesium vapor 05 p0737 A66-14986
 Piezoelectric acceleration sensors and fluid interaction with spherical shell container undergoing translational oscillatory motion 08 p1228 A66-19769
 Potential distribution at germanium-electrolyte interface in iodide ion solutions 08 p1278 A66-19824
 Germanium dioxide surface adsorption characteristics with respect to water vapor 10 p1583 A66-21983
 Low temperature chromatographic separation of hydrogen isotopes based on interaction with alumina surface electric fields 11 p1650 A66-23209
 Wave interaction underlying diocotron effect and model of instability presentation, analyzing cylindrical wall-enclosed charge layers for application to plasmas and gas discharges 13 p2136 A66-25041
 Complex variable theory of flame surface interaction and flow field of two-dimensional V-shaped flame simulated by source and sink sheets 15 p2617 A66-29605
 Inherent LF losses of superconducting surface sheath 16 p2769 A66-30167
 Interaction between gas particles and solid surface examined, noting idealization of Morse potential and use of analog computer 16 p2655 A66-30390
 Energy accommodation coefficient variation with energy of gas molecules impinging on clean surfaces or adsorbed monolayers 16 p2645 A66-30391
 Rotating target experiments on nitrogen gas molecule interaction with engineering surfaces and velocity distribution of scattered beam 16 p2753 A66-30394
 Interactions occurring when beam of thermal atoms strikes surface 16 p2753 A66-30396
 Energy transfer measurements in gas-solid surface interactions initiated by electron beam-excited photoemission 16 p2701 A66-30397
 Spatial distribution of high energy Ar atoms scattered by various surfaces 16 p2753 A66-30398
 High energy argon atom interactions with surfaces and variations in accommodation coefficient 18 p2702 A66-30399
 Surface state density of MOS structure, noting difference between gas deposited and thermally grown samples 17 p2978 A66-32405
 Electric and magnetic fields effect on three-dimensional laminar boundary layer of conducting fluid near line of intersection of

two surfaces 17 p2971 A66-32865
 Contact of two axisymmetric plates, showing ability of Reissner theory to overcome classical theory problems [ASME PAPER 65-APMW-26] 18 p3248 A66-33581
 Infiltrated tungsten materials in subsonic air and nitrogen plasma arcs with changes evaluated metallurgically 19 p3377 A66-35610
 Surface effects at interface between linear and nonlinear media representing transmission lines of low pass filter type 22 p3861 A66-39656
 Contact interaction of titanium nitride with Ti, Zr and V at high temperatures in vacuum 22 p3937 A66-40926

SURFACE IONIZATION
 Silicon surface damage, discussing low energy gamma irradiation effect on bulk lifetime and recombination velocity 05 p0729 A66-14565
 Thermionic emission and surface ionization of Cs, K, Na, Li and In atoms on face of n-type silicon of resistivity of 150 ohm-cm for low densities of atom beams 06 p0922 A66-16153
 Silicon planar transistors, noting electron flux induced surface damage mechanism 06 p0854 A66-16684
 Surface ionization of Cs atoms on lanthanum hexaboride cathode with intrinsic thermionic emission of cathode observed from mass-spectrometric measurement of ion current 06 p0912 A66-16885
 Thermionic and photoelectric screening of electric charge on metallic spherical object moving in rarefied ionized medium 06 p0919 A66-16906
 Threshold and optimum conditions of positive surface ionization of two metal-layer systems, considering ion current and ion absorption heat 08 p1264 A66-19194
 Residual gas effect on work function vs critical temperature for surface ionization of cesium on porous tungsten [AIAA PAPER 64-693] 10 p1594 A66-21778
 Refractory metals and metal alloys analyzed regarding electron work function and threshold temperature for surface ionization in all-metal guard ring diode with directly heated wire [AIAA PAPER 66-223] 13 p2129 A66-25171
 Thermionic emission and surface ionization of Cs, K, Na, Li and In atoms on face of n-type silicon of resistivity of 150 ohm-cm for low densities of atom beams 15 p2569 A66-29883
 High fields effect on negative field effect electron carrier mobility on MOS surfaces 16 p2771 A66-30196
 Cesium contact ion engine construction and performance and engine neutralizer [AIAA PAPER 65-375] 16 p2791 A66-30906
 Thermionic and adsorptive properties of zirconium nitride in cesium vapor, determining current-voltage characteristics and temperature dependence 16 p2755 A66-31732
 Surface ionization production of plasma containing negative ions, noting Q machine experiments with Cs and Cl molecules 17 p2970 A66-32654
 Cesium ion source evolved from surface ionization on porous refractory metal ionizers 18 p3138 A66-34240
 Positive electron affinity of tungsten determined by evaporation of positive and negative ions from incandescent tungsten surface 20 p3605 A66-38247
 Saha-Langmuir formula applied to description of temperature dependence of positive ion current in surface ionization of silicon atoms, comparing work functions by methods using contact potential, thermionic emission and Richardson graphs 22 p3968 A66-40942
 Surface photovoltage theory for small signals in Si and Ge, considering photocarrier trapping on surface and conductivity in space charge region 24 p4253 A66-42358

SURFACE LAYER
 Electron passage from surface ion into semiconductor layer interior during charging from corona discharge, estimating thermal overshoot and tunneling through potential barrier 01 p0071 A66-11025
 Thin surface films covering structure,

nucleation, growth and epitaxy observation techniques such as electron and X-ray diffraction field emission, field ion microscopy, etc 04 p0559 A66-13452
 Radar backscattering for tenuous surface layer on Moon 04 p0577 A66-13895
 Structure of sulfide films deposited on silicon and germanium single crystals 07 p1092 A66-17223
 Schottky barrier from silicon surfaces with controlled exposure to oxygen and water vapor, noting work function, semiconductor surface state and thickness of interface layer 07 p1107 A66-18406
 Effect of surface charging on superconducting transition temperature, locating negative charges at oxide-oxygen interface in experiments with thallium films 09 p1419 A66-20043
 Field penetration in superconductors with surface layers, describing LF low field AC susceptibility measurements in swept DC fields 09 p1420 A66-20049
 Rapid cooling induced stress leads to separation between tin and germanium, creating pure germanium surface at plane of separation 09 p1427 A66-20366
 Deformation modulus of airfield pavement materials 09 p1365 A66-20697
 Surface hydride corrosion film effect on electrolytic corrosion and oxidation of titanium 09 p1390 A66-20841
 Barium titanate transition front structure, noting similarity to ferroelectric and nonferroelectric crystal 10 p1582 A66-21881
 Monin-Obukhov similarity theory for turbulent structure of thermally stratified surface layer of atmosphere 11 p1725 A66-22266
 Vacuum effect on fatigue life of aluminum under constant stress cyclic bending deformation 11 p1717 A66-22995
 Second harmonic generation by Q-switched laser pulse from silicon and germanium surfaces 13 p2096 A66-26150
 Macroscopic statistical mechanical derivation of stress tensor for classical fluid surface layer and surface tension of Van der Waals gas 14 p2273 A66-26827
 Metal erosion by airborne quartz dust particles, using energy values as function of material, dust size, temperature, etc, influenced by surface layer of material 16 p2813 A66-30442
 Hypersonic flow past blunt body near stagnation point examined, noting surface layer, characterized by increased density and decreased entropy of gas 16 p2630 A66-31305
 Structure of sulfide films deposited on silicon and germanium single crystals 17 p2976 A66-31994
 Damaged germanium surface epitaxial layer influence on resistivity and mobility of thin semiconductor sheets 17 p2986 A66-33294
 Evaporated and recrystallized CdS layers, discussing electron mobility, level distribution, capture cross section and techniques of measurement 19 p3435 A66-35408
 Photoluminescence measurements on silicon doped gallium arsenide for detection of compensation in shallow surface layers 19 p3436 A66-35430
 Shock waves, boundary surfaces and thin shells in general 20 p3602 A66-37634
 Solid state welding and brazing for surface layer bonding 22 p3925 A66-40269
 Surface layer of heat-treated steel alloy after work hardening 23 p4081 A66-41405
 Substrate temperature measurement and control showing desirability of large-area low temperature radiation source for glass substrate heating 24 p4218 A66-43165

SURFACE PRESSURE
 Nature and magnitude of turbulent boundary layer pressure fluctuations over two-dimensional surfaces and narrow delta wings 01 p0005 A66-10124
 Fluctuating pressures at surface of Saturn vehicle studied by use of 2.75 percent models in wind tunnel 01 p0005 A66-10125
 Supersonic flow past pointed bodies of revolution in calculation of initial ratio of shock to body curvature and initial surface pressure gradient 01 p0007 A66-10631

Contact pressure evaluation, using ultrasonic wave transmission through two surfaces in contact 02 p0235 A66-11688
 Scattering particles for visual polarimetric and UV photometric estimates of surface pressure of Mars 04 p0578 A66-13896
 Wave propagation in elastic-plastic half-space subject to von Mises yield condition, due to combined surface pressure and shear [ASME PAPER 65-WA/APM-11] 05 p0777 A66-15433
 Spherical harmonic analysis of diurnal surface pressure oscillation indicates that it can be represented by wave traveling westward with Sun 07 p1027 A66-17222
 Surface pressure distribution on high velocity body with large injection rate of ablation rate [AIAA PAPER 66-89] 07 p0984 A66-18455
 Spherical harmonic analysis of diurnal surface pressure oscillation 08 p1246 A66-18800
 Carbon dioxide absorption bands in Mars atmosphere, transmission, function of carbon dioxide amount and effective surface pressure [AIAA PAPER 66-147] 08 p1290 A66-19072
 Homogeneous isotropic cone with surface loadings and internal temperature distributions 08 p1309 A66-19142
 Tangency condition and pressure coefficient of supersonic flow past oscillating bodies of revolution 10 p1481 A66-21795
 Flat plate in hypersonic flow analysis in shock tunnel, obtaining surface pressure, using electron beam densitometer 11 p1634 A66-22931
 Surface pressure fluctuations produced by boundary layer turbulence developed above rigid plane surface 12 p1862 A66-23820
 Wave propagation in elastic-plastic half-space subject to von Mises yield condition, due to combined surface pressure and shear [ASME PAPER 65-WA/APM-11] 12 p1961 A66-23986
 Flow past elliptic cones in wind tunnels at varying Mach and Reynolds numbers, noting surface pressure distribution, shock wave shapes and flow parameters at supersonic speeds 12 p1798 A66-24439
 Martian surface pressure and surface density from interpretation of observational data 13 p2180 A66-25291
 Vertical temperature distribution in Martian atmosphere, noting insensitivity to surface pressure and carbon dioxide variations 13 p2186 A66-26132
 Linearized surface pressure distribution on streamlined ducted bodies in axisymmetric flow, considering aerodynamic loading on annular airfoil 13 p1993 A66-26716
 Longitudinal pressure gradient effect on evolution of finite three-dimensional perturbation in transition boundary layer of upper surface of wing section near critical Reynolds number 15 p2423 A66-28521
 Surface pressure on thin two-dimensional airfoils in transonic flow 15 p2478 A66-29246
 Surface friction induced vertical motions for nonaccelerated flow calculated from surface pressure pattern 18 p3129 A66-33963
 Flow analysis of swept back blades in water tunnel, noting flow patterns, surface pressure distribution, lift-drag ratio, etc 18 p3049 A66-34649
 Combustion front pressure rise associated with burning of condensed systems with surface pressure greater than ambient pressure 19 p3478 A66-35748
 Newtonian variational problem for pressure on surface of nonshallow body moving at hypersonic velocity 19 p3276 A66-36472
 Semidiurnal oscillation in surface pressure as result of strong resonance amplification of small oscillations due to surface heating and gravitational tidal force of Sun 22 p3942 A66-40052
 Surface pressure distribution on high velocity body with large injection rate or ablation rate [AIAA PAPER 66-89] 22 p3844 A66-40348
 Concentrated forces on shells, discussing load distributions and pressure variations 23 p4142 A66-41957

SURFACE PROPERTY
SA HARDNESS
 Surface conductivity of germanium gold

alloyed at liquid nitrogen temperature, considering field effect 01 p0127 A66-11059

Device measuring surface properties of semiconductors 02 p0230 A66-11818

Temperature dependence of surface conductivity and Hall effect in germanium alloyed with gold 02 p0276 A66-12078

Effect of surface state of cadmium sulfide on fundamental absorption edge and fine structure obtained from gaseous phase in inert atmosphere 03 p0407 A66-12405

Capacitance-voltage characteristics of anodized InSb surface measured, using metal oxide semiconductor method 03 p0411 A66-13005

Skin effect in semiconducting cylinder analyzed for electric and magnetic cases 07 p1001 A66-17350

Solar absorptance and thermal emittance of vacuum-deposited aluminum, zinc oxide-potassium silicate white paint and high emissivity black paint after exposure to salt atmosphere [AIAA PAPER 66-41] 07 p1053 A66-17892

Boundaries of convexity of star-shaped functions, order alpha, in open circular region /0, 1/ 07 p1059 A66-18098

Effect of fast states with discrete energy levels and quasi-continuous spectrum on capacitance of silicon dielectric film-metal structure 08 p1274 A66-19308

Effect of orientation of silicon substrate on surface charge density and properties of silicon-silicon dioxide interface 10 p1573 A66-21346

Directional characteristics of radiation properties of surfaces and materials as factor in spacecraft thermal control 11 p1777 A66-22459

Surface properties of materials exposed to space environment 11 p1718 A66-23164

Semiconductor surface physics, with emphasis on FET electrical surface phenomena 11 p1759 A66-23462

Dynamic strains and transient deformations on opaque body surfaces measured, using bonded birefringent strip 12 p1961 A66-23988

Heat treatment and ionizing irradiations effect on charge distribution and number of surface states in silicon-silicon dioxide system 12 p1932 A66-24824

Optical method for study of metallic and semiconducting surfaces, based on low energy electron beam scanning 12 p1884 A66-24939

Surface area, complexes and water effect on properties of carbon fiber resin composites 13 p2111 A66-25166

Structural changes in metal surface layers under boundary friction conditions in presence of surface active lubricant additives 13 p2086 A66-25884

Single blow transient testing of compact heat exchanger surfaces [ASME PAPER 66-GT-93] 14 p2411 A66-26997

Optical system correction through coefficient selection of aspheric surface, computing vector sums of all aberration orders to give spot diagrams and light distribution in image 14 p2334 A66-27317

Alloying real germanium surface with gold impurity and increase of fast surface states and rate of surface recombination 14 p2365 A66-27752

Time, pressure and temperature effects on adhesion of structural metals in vacuum and space environment 14 p2316 A66-28005

Surface structure and superconductive properties of electrodeposited tin films 15 p2564 A66-28761

Spherical aberration correction by grinding concave mirror to generate aspheric contour 15 p2498 A66-28826

Low endurance fatigue properties of steel plate 15 p2615 A66-29805

Transistor surface properties degradation by simulated space radiation environment 16 p2662 A66-30998

Surface protrusions and holes, Maxwell kinetic gas theory and surface interaction of current of free molecules and rigid body 16 p2686 A66-31042

Boundary conditions at interface between superconductor-superconductor and superconductor-metal 16 p2780 A66-31177

Tensor analysis of implicit constitutive equations of ideal materials 17 p2956 A66-31929

Two-dimensional excitation problem of circular cylinder with surface impedance varying over cylinder circumference 17 p2874 A66-32247

Surface characteristics of semiconductors with intrinsic conductivity, determining potential distribution electric field, carrier concentrations, etc 17 p2984 A66-33146

Radiation-induced gas ionization effects on surface properties of shielded transistors 18 p3076 A66-33984

Cylinder magnetization in axisymmetric magnetic field, noting calculation of critical current in conductor 18 p3155 A66-34160

Resistivity of semiconductors with periodic inhomogeneity, noting cases of surface perpendicular and surface parallel striations 18 p3155 A66-34229

Reflector surface measurement technique for parabolic antenna with paraboloidal axis at zenith distances 18 p3083 A66-34298

Distribution law for collective coordinates established via probability methods, noting application to Ising model and to problems of absorption 18 p3135 A66-34632

Plane steady flow of thin viscous fluid film between solid wall and free surface, solving linear and nonlinear cases 19 p3342 A66-36469

Ultrahigh vacuum optical measurements on mirrorlike surfaces of Na, K, Rb and Cs prepared in ultrahigh vacuum in wavelength region from 3000 to 25,000 angstroms 20 p3613 A66-37272

Surface patch electrostatic field effects on field emission single crystal plane work function determinations 21 p3770 A66-38656

Surface alterations in manufacturing, discussing effects of electrochemical grinding and electrical discharge grinding in comparison with abrasive grinding and face milling 21 p3744 A66-39194

Fluidic system design of single and double airfoil amplifiers based on airfoil surface characteristics 21 p3698 A66-39464

Surface properties, temperature effect, cooling and detectability of neutron stars, using pure iron and pure magnesium compositions 22 p3976 A66-39803

Surface magnetoconcentration in intrinsic-conductivity semiconductors, noting space-charge region characteristics dependence on surrounding fields 23 p4110 A66-41131

Surface charge mobility measurement method applied to Si and Ge and time variation of surface conductivity 23 p4110 A66-41183

Similar solution of laminar mixing of curved half-jet and curvature effect of boundary layer flow along curved surface 23 p4059 A66-42003

Velocity discontinuity surface instability and fluid compressibility effect on stationary flows 23 p4059 A66-42006

SURFACE REACTION

Surface charges on light-induced charges in contact potential difference of semiconductors 05 p0738 A66-15345

Semiconductor transition to superconducting state, describing field effect action on carriers 06 p0924 A66-16519

Ionizing irradiation effects on oxide covered silicon surface properties, measuring changes in inversion layer conductance 06 p0940 A66-17164

Surface layers on ferroelectric barium-titanate crystals, noting parameters of RF induced electroluminescence 07 p1107 A66-18405

Semiconductor transition to superconducting state, describing field effect action on carriers 09 p1431 A66-20900

Surface physics of ion and electron emission during cesium adsorption on polycrystalline wire surfaces [AIAA PAPER 66-222] 10 p1575 A66-21450

Dissociated laminar boundary layer with heterogeneous recombination 10 p1524 A66-21805

Surface state and surface recombination velocity characteristics of Si-SiO₂ sub 2 interfaces 12 p1932 A66-28827

Hydrogen ion intrusion into stainless steel surface measured with apparatus in which hydrogen and helium condensation pumps provide ultrahigh vacuum 13 p2108 A66-25754

Thermodynamic and physical properties of beryllium hydroxide at four temperatures in

1567-1808 degrees K range, with computation of free energy of formation 14 p2370 A66-27372

Heat treatment of titanium alloy sheets clad with industrial trial-grade titanium for preventing surface oxidation and hydrogen absorption 15 p2522 A66-29191

Surface charges on light-induced charges in contact potential difference of semiconductors 15 p2569 A66-29984

Contaminants, outgassing and sublimation in vacua, noting cleaning procedures to reduce contamination and surface reactions 16 p2635 A66-30452

Dynamics of axisymmetric liquid free surface following stepwise acceleration change 16 p2684 A66-30502

Thermal ignition of flowing gas mixtures at nonreactive noncatalytic hot surfaces 16 p2830 A66-31634

Dangling bonds and dislocations in semiconductors, noting existence of core charge dependent localized state in gap caused by local decrease in atom density 17 p2985 A66-33155

Combustion rate in simultaneous heterogeneous-homogeneous reactions on particle surfaces of catalytic agents added 18 p3265 A66-34550

Boundary conditions and rate equations in surface-catalyzed reactions 18 p3064 A66-34598

Indentation damage and subsequent annealing effect on etch-polished Ge surfaces at room temperature examined with optical microscope, using interference contrast techniques 19 p3434 A66-35401

Secondary mode of nucleation during sublimation growth of nickel bromide, noting formation mechanism 19 p3434 A66-35405

Measurement apparatus for studying kinetics of catalytic recombination of gas atoms at solid surfaces of refractory metals, semiconductors and dielectrics 21 p3735 A66-38522

Insulation surface regression mechanism in rocket motors, examining ablation corrosion and erosion effects 22 p3970 A66-39872

Oxide film surface effect on electrophysical characteristics of Ge surface, noting potential changes and recombination rate 22 p3965 A66-40313

Homogeneous gas phase and surface reactions based on mass transfer mechanism during quenching of oxygen-nitrogen mixtures from high temperatures 24 p4170 A66-42134

Deep /1-10 micron/ penetration of ion implanted donors in silicon, measuring density profiles via C-V method and parameter of penetrating tail section 24 p4250 A66-42256

Avalanche radiation from bulk of long thin forward-biased p-n-p silicon diodes 24 p4180 A66-42258

Laminar boundary layer characteristics on continuous moving surface, noting high critical Reynolds number, disturbance amplitude function and energy criterion for stability 24 p4194 A66-42412

SURFACE ROUGHNESS

MgO coated integrated sphere to determine reflectance and surface roughness on cryogenic space chamber walls [AIAA PAPER 65-674] 01 p0090 A66-10234

Surface roughness of metallic powder particles determined by light scattering, considering iron particles 01 p0069 A66-10747

Electromagnetic wave reflection from rough surface 04 p0481 A66-13748

Microirregularity lubrication to improve reliability of liquid lubricated rotary shaft face seal [ASME PAPER 65-LUB-11] 04 p0527 A66-14244

Radiative capacity of isothermal serrated surface 06 p0972 A66-16848

Structure of microsurface layer of silicon wafers after polishing with polirrit and crocus and thorium, cerium, chromium, aluminum and titanium oxide 07 p1037 A66-17413

Bidirectional reflectance characteristics of rough sintered metal and wire screen surface systems [AIAA PAPER 66-19] 07 p1153 A66-17884

Correlations for reflected energy based on

bidirectional reflectance data of roughened surfaces
[AIAA PAPER 66-20] 07 p1080 A66-17885
Lunar and planetary terrain roughness in terms of curvature statistics, based on Ranger VII and Bonita Lava Flow contour map analysis
[AIAA PAPER 65-389] 10 p1610 A66-21955
Microirregularity lubrication to improve reliability of liquid lubricated rotary shaft face seal
[ASME PAPER 65-LUB-11] 12 p1888 A66-24550
Lunar surface roughness in Mare Cognitum analyzed spectrally and compared with two terrestrial areas
14 p2387 A66-28336
Omnidirectional scattering of ultrasonic waves from rough surfaces satisfying Kirchhoff theory with respect to electromagnetic scattering
15 p2536 A66-28571
Supersmooth optical surfaces polished by water-filled bowl feed technique
15 p2509 A66-28850
True contact surface of metals, examining dependence on macro- and microgeometric structure of surface roughness
16 p2714 A66-30676
Positive ion beam polishing of optical surfaces
17 p2958 A66-32625
Reduced gain and increased sidelobes caused by errors in surface of parabolic reflector
18 p3085 A66-34311
Velocity and temperature profile for turbulent boundary layers in adverse pressure gradients, including Prandtl number and surface roughness effects in analysis
18 p3101 A66-34667
Aerodynamic design criteria for maintaining laminar flow control including instability limit, surface roughness, acoustical environment, etc
18 p3050 A66-34951
Radiation from modulated corrugated surface excited by waveguide, noting reflection coefficient, radiation pattern, etc
19 p3302 A66-35724
Directional distribution of light reflected from roughened surfaces with measurements made of plane-polarized components of reflected light as well as of mixed radiation
20 p3598 A66-36941
Depolarization of electromagnetic waves backscattered from rough surface boundary
20 p3515 A66-37293
Omnidirectional characteristics of scattering of acoustic waves from statistically rough surfaces, measuring scattering cross section as function of incidence and observation angles
21 p3770 A66-38649
Manufacturing of semifinished pressed products of AD31 Al-Mg-Si alloy, examining coarse-grained structure occurring after hardening and machining
22 p3928 A66-40886
Similarity laws in hypersonic flow of real gas around thin blunted bodies, particularly bodies with rough lateral surface
23 p4009 A66-41720
Bidirectional reflectance characteristics of rough sintered metal and wire screen surface systems
[AIAA PAPER 66-19] 23 p4150 A66-41893
Curvature distribution vs slopes distribution as indicator of surface roughness for spacecraft landings
24 p4279 A66-42789

SURFACE ROUGHNESS EFFECT

Effect of poor surface finishes on existence of electromechanical effect in germanium
01 p0124 A66-10773
Surface roughness and loading effect on actual contact surface of metals
01 p0079 A66-11062
Correlation of large and small scale roughness for plane wave scattering from rough surface
03 p0335 A66-12818
Commercial grade sodium boiling from horizontal disk at various pressures and temperatures attaining high heat fluxes, noting surface finish effects
[ASME PAPER 65-HT-51] 05 p0785 A66-14758
Pressurization effect on fuselage drag of Boeing 720 jetliner based on boundary layer measurement
05 p0606 A66-15077
Off-specular peaks in directional distribution of reflected thermal radiation as function of angle of incidence, surface

roughness and wavelength
[ASME PAPER 65-WA/HT-19] 05 p0790 A66-15645
Controlled three-dimensional roughness effect on hypersonic laminar boundary layer transition
[AIAA PAPER 66-26] 06 p0804 A66-17092
Predicting onset of cavitation for surface irregularity on parent body
07 p1024 A66-18167
Hydrofoil profile and surface roughness effect on cavitation performance
07 p1024 A66-18168
Externally pressurized nonrotating porous wall air lubricated journal bearing properties, taking into account surface roughness effects
[ASLE PREPRINT 65AM 3A5] 07 p1039 A66-18286
Fluid resistance of rough disk rotating in closed vessel, noting dependence on flow Reynolds number of plate moment coefficient, axial clearance, etc
08 p1210 A66-19554
Boundary surface roughness effect on polarization of thermal electromagnetic wave emission from dielectric medium
09 p1401 A66-20115
High resolution radar correlometer measurement of spatial correlation radius of RF radiation scattered by disturbed ocean surface
09 p1343 A66-20340
Random deviation statistical analysis of acoustic and electromagnetic waves by comparatively large slope irregularities
09 p1343 A66-20341
Dynamic response of supersonic transports to runway unevenness during takeoff or landing
09 p1330 A66-20692
Dependence of mean scattered power on scattering geometry and wavelength in terms of scale roughness and rms slope of components for bistatic scattering
10 p1499 A66-21612
Electromagnetic wave scattering from very rough surfaces, noting contribution of small and large scale roughness to scattered power
10 p1504 A66-21658
Effect of poor surface finishes on existence of electromechanical effect in germanium
11 p1749 A66-22284
Surface roughness and tolerances in model scattering experiments, noting shape perturbation consequences, frequency characteristics wave behavior, etc
11 p1658 A66-23406
Effect of surface roughness on two-dimensional Mach reflection of moving plane shock waves in air
12 p1863 A66-24096
Locomotion energy requirements for lunar surface vehicles, noting parameters affecting requirements, resistance factors, etc
[SAE PAPER 660149] 12 p1858 A66-24530
Surface roughness effect on boundary friction for various loads, speeds and lubricants
[ASLE PREPRINT 65 AM 6AZ] 13 p2085 A66-25367
Surface roughness effect on laminar-turbulent transition, noting plane flow past isolated cylindrical element in laminar boundary layer
13 p2068 A66-26542
Gas film for protective cooling of surface having regular macroroughness
14 p2410 A66-26783
Electromagnetic wave scattering and depolarization from rough surface, noting existence of surface current vector component pointing in direction of incident wave
14 p2235 A66-27038
Combined frequency and space correlation of wave fields scattered by rough surfaces where conditions of applicability of Kirchhoff approximation hold true
14 p2236 A66-27144
Effective emittance of machined surfaces determined through groove models numerically analyzed
14 p2334 A66-27429
Wave scattering from rough surface having elements comparable in height with length of incident wave
14 p2245 A66-28477
Commercial grade sodium boiling from horizontal disk at various pressures and temperatures attaining high heat fluxes, noting surface finish effects
[ASME PAPER 65-HT-51] 16 p2828 A66-30987
Off-specular peaks in directional distribution of reflected thermal radiation as

function of angle of incidence, surface roughness and wavelength
[ASME PAPER 65-WA/HT-19] 16 p2828 A66-30989

Laminar boundary layer transition in hypersonic shock tunnel of cone, noting effect of high Mach numbers and tip surface roughness, using surface heat transfer gauges
[AIAA PAPER 66-494] 17 p2841 A66-32772
Surface roughness effects in hydromagnetically lubricated externally pressurized bearings and hydromagnetic squeeze film between two circular plates
[ASME PAPER 66-LUBS-9] 17 p2931 A66-33182

Detection and causes of fretting corrosion, discussing prevention via lubrication, effects of load, surface finish, material hardness, friction coefficient, vibration, etc
18 p3117 A66-34400
Liquid high-velocity jets dispersion from variable-rugosity injector nozzles, considering effect of roughness of nozzle walls near orifice
19 p3340 A66-35579
Surface roughness effect on radar backscattering cross section of conducting spherical target examined by applying Kirchhoff method
19 p3304 A66-36407
Rime effect on reflection efficiency of microwave reflectors, noting surface roughness irregularity and relation between icing and meteorological topographical conditions
20 p3516 A66-37726
Structure and properties of thin films in terms of deposition conditions, noting conditions for continuity, surface roughness, grain size, lattice defect density, crystalline orientation, purity, etc
20 p3621 A66-38087
Two-dimensional roughness element effect on boundary layer transition, noting free stream turbulence level influence on amplification rate of disturbance
23 p4060 A66-42020
Backscatter of electromagnetic waves from rough layer simulated by acoustic backscattering from partially submerged Plexiglas layer
24 p4173 A66-42624

SURFACE STABILITY

Surface instabilities discussing stability of movement of nonrigorous planar surface of liquid layer when subjected to motion in direction perpendicular to its face
03 p0354 A66-12537
Stabilizing effect of surface active agents on wave formation in contaminated falling liquid film
07 p1023 A66-18125
Electric field force dragging of fine jets from surface of conducting fluid in form of cylinder and hemispheroid on earthed plate
13 p1219 A66-26301
Interchange instabilities at general Meyer and Schmidt surfaces in plasma pinch model, noting magnetic field role
19 p3418 A66-36537

SURFACE TEMPERATURE

Surface temperatures in space solar simulator may differ from thermal design expectations plus or minus 10 degrees F
02 p0211 A66-11213
Stability criterion for steady state combustion of powder with variable surface temperature under constant pressure
02 p0302 A66-11400
Quasi-stationary temperature in large body with moving surface heat source, considering temperature dependence of thermal properties
[ASLE PREPRINT 65-LC-21] 02 p0305 A66-12250
Axisymmetric modes and frequency vibration of thin conical shells subjected to rapid surface heating
[AIAA PAPER 65-788] 03 p0434 A66-12558
Radiant heat fluxes on surface of heating body with varying temperature
04 p0597 A66-13822
Thermal emittance of cone and cylinder cavities electrically disintegrated in tungsten and molybdenum measured with disappearing-filament pyrometer
05 p0716 A66-14985
Gas compression-conduction mechanism contribution to shock initiation of granular explosives, analyzing surface temperature of interstitial gas and grain distribution
[CI PAPER WSCI-65-30] 05 p0788 A66-15141
Radioactive krypton-85 diffusion technique

for temperature mapping of turbine blade surfaces
 [SAE PAPER 650704] 06 p0944 A66-17078
 Thermal and pressure effects of rocket exhaust impinging on flat plate surface at high vacuum
 [AIAA PAPER 66-46] 07 p1154 A66-17895
 Contact area of boiling bubbles observed through electroconductive glass/heating surface/ into tank 08 p1320 A66-19556
 Microwave radar observations of Venus, discussing surface thermometric temperatures, greenhouse effect, etc 09 p1451 A66-20113
 Accuracy of Iaryshev equation for determining errors in surface temperature measurements due to heat losses in sensor 09 p1380 A66-20314
 Nonstationary temperature distribution in long cylinder solved by integral transforms, giving results in form of series in Bessel and error functions 10 p1620 A66-21327
 Surface temperature of solid bodies measured by crayons, thermography, hardness, etc, particularly heat transfer tubes, current-carrying bodies, etc 12 p1882 A66-24408
 Surface temperature measurement using thermocouples, noting error causes 13 p2081 A66-26221
 Venus surface temperature from microwave measurements, noting thermal and nonthermal radiation 14 p2386 A66-28129
 Optimum wavelength intervals for surface temperature radiometry from total reflectance measurement of common surface minerals 15 p2498 A66-28833
 Surface temperature determination procedure for laser heated metals based on heat conduction equations and ion emission from surface 15 p2514 A66-29035
 Thermological aspects of Martian surface environment based on radiometric temperature measurements 16 p2799 A66-30435
 Radiant-interchange configuration factors between various selected plane surfaces with common contact 16 p2826 A66-30530
 Quasi-stationary temperature in large body with moving surface heat source, considering temperature dependence of thermal properties [ASLE PREPRINT 65-LC-21] 16 p2826 A66-30573
 Two-radiometer technique for rapid verification of total emittance without surface temperature measurement for quality control [AIAA PAPER 65-431] 16 p2706 A66-30912
 Surface heating rates for metals, semiconductors and insulators subject to high irradiance produced by carbon-arc-image furnace 16 p2829 A66-31080
 Thermocouples and resistance thermometers installation techniques for surface temperature measurement 18 p3109 A66-33548
 Local and mean heat transfer coefficients determined in tubes with high heat flux densities 18 p3261 A66-34360
 Surface temperature measurements techniques noting thermistors, sensors, paints, pellets, etc 18 p3114 A66-34898
 Venus atmosphere, surface temperature and radiation characteristics 19 p3460 A66-35799
 Surface temperature of semiinfinite solid exposed to one-dimensional heat flux calculated with method allowing accuracy at long time intervals 20 p3678 A66-37388
 Climatology of surface temperature which meets most engineering design requirements 20 p3593 A66-38180
 Energies of ions generated from metal surface irradiated by single giant pulse laser 20 p3582 A66-38412
 Surface temperature measurement of metal body by electromagnetic effects, metallurgical techniques and miscellaneous techniques 23 p4067 A66-41199
 Spontaneous ignition of inflammable fluids by hot surfaces, discussing static hot plate and wind tunnel rigs 23 p4083 A66-41278
 Semiconductor surface thermocouples, determining heat-transfer rates associated with wind tunnel testing 24 p4208 A66-42178

SURFACE TENSION

SA LIQUID-LIQUID INTERFACE

Disruption of thin liquid film flowing over heating surface, investigating boiling, evaporation and thermocapillary effects 01 p0165 A66-10906
 Gas-filled closed ring-current surface with continuum of equilibrium figures in external magnetic field in case of surface tension 03 p0354 A66-12388
 Electrohydrostatic boundary equations solving two-and three-dimensional axisymmetric situation and sessile drop problem 04 p0545 A66-13808
 Linear deformation of elastic solid in which potential energy-density is function of strain and first and second gradients 04 p0591 A66-14166
 Size distribution law for dimensions of gas bubbles formed during cavitation in turbulent flow of liquid 06 p0870 A66-16199
 Behavior of fluids under weightlessness and in weak gravitational fields, formulating small linear oscillations of ideal fluid under surface tension 06 p0873 A66-16708
 Zero-g vapor feed system with no moving parts, noting ion engine testing, propellant use efficiency and surface tension storage [AIAA PAPER 66-249] 11 p1761 A66-23083
 Surface tension and buoyancy effects in cellular convection of electrically conducting liquid in magnetic field 12 p1978 A66-23953
 Gas-filled closed ring-current surface with continuum of equilibrium figures in external magnetic field in case of surface tension 13 p2062 A66-25393
 Size distribution law for dimensions of gas bubbles formed during cavitation in turbulent flow of liquid 13 p2064 A66-25915
 Motion equation of viscous oil flow under action of electric forces caused by surface charge 13 p2070 A66-26709
 Self-similar motion of weightless fluid under action of surface tension 14 p2277 A66-28053
 Streamlines in Benard convection cells induced by surface tension and buoyancy 15 p2478 A66-29247
 Surface tension propellant storage and feed systems for zero-g ion engines 19 p3450 A66-35615
 Circuitry of automatic surface tension measurement device 20 p3559 A66-37502
 Stability and surface tension of colloidal graphite dispersions in absence and presence of nonelectrolytes 21 p3754 A66-39150
 Liquid oxygen converter designed to provide oxygen for space flight, using combined forces of surface tension and paramagnetism [AICE PREPRINT 24C] 22 p3886 A66-39898
 Marangoni flow, motion of liquid surfaces under influence of surface tension gradients, explaining high fluxes obtained in boiling heat transfer 22 p3999 A66-40303
 Viscosity, surface tension and inclination angle effect on motion of long bubbles in closed tubes 22 p3900 A66-40388
 Density, viscosity, surface tension, vapor pressure and vapor liquid equilibria data of liquid ozone-fluorine mixtures considered as Newtonian fluids 23 p4119 A66-41244
 Wave motions of liquid extended to case where derivative functions describing free surface are present in boundary conditions of problem 23 p4057 A66-41833
 Drop bursting by surface forces such as electric fields and fluid environments with larger viscosity 23 p4060 A66-42018
 Griffith and bond fracture with singular stresses near crack point examined via numerical analysis 24 p4288 A66-42276

SURFACE TO AIR MISSILE

Tabulation and description of missiles in service or under development 04 p0586 A66-13944
 U.S. tactical defense systems noting SAM types, interceptors, technical problems, data handling, radar, etc 24 p4297 A66-42951

SURFACE TREATMENT

Increased aluminum panel acoustic resistance due to combination of surface treatment and mylar gasket-universal head mounting technique 01 p0149 A66-10144
 Optimum proportion of surface-damping treatment to surface metal thickness to minimize randomly excited skin surface stresses in stiffened plate 01 p0149 A66-10148

Temperature at which predecomposition or decomposition of ammonium perchlorate occurs, changed by perchlorate surface treatment and reflected in burning rate of propellant containing perchlorate [CI PAPER WSCI-65-36] 05 p0744 A66-15151
 Surface film effects on fatigue life of steels 05 p0703 A66-15483
 Increased heat of ablation and performance of injection cooling by addition of surface active agent [ASME PAPER 65-WA/HT-49] 05 p0792 A66-15660
 Fracturing model of surface-hardened materials with triaxial stress at subsurface interface from loading [ASME PAPER 65-MET-2] 06 p0961 A66-16204
 Surface treatment and coating for beryllium corrosion and surface damage 08 p1230 A66-18847
 Effect of plastic coatings on fatigue strength of steel and welded steel samples subjected to concentrated stress 08 p1231 A66-19171
 Instantaneous strength, rigidity and strain characteristics of reinforced plastics surface-heated on one side 12 p1899 A66-24041
 Pulse field effect technique investigation of electrical properties of surface states on practical Si surfaces with various surface 16 p2781 A66-31356
 Surface treatment of joints for structural adhesive bonding design, material selection and metal surface processing for adhesion [ASME PAPER 66-MD-39] 21 p3742 A66-38489
 Adhesive performance testing, noting mechanical methods and types of test specimens [ASME PAPER 66-MD-46] 21 p3742 A66-38492
 Surface alterations in manufacturing, discussing effects of electrochemical grinding and electrical discharge grinding in comparison with abrasive grinding and face milling 21 p3744 A66-39194
 Surface layer of heat-treated steel alloy after work hardening 23 p4081 A66-41405
 Machining of gear train made of titanium alloy, discussing surface treatment 23 p4074 A66-41650
 Contour epitaxial deposition for semiconductor devices and integrated circuits, producing regions with well defined doping and geometry in crystal with flat surface 24 p4181 A66-42386

SURFACE VEHICLE

SA LUNAR SURFACE VEHICLE

System design technique for extraterrestrial vehicles which maximizes effectiveness of complex system operating in partially defined environment 13 p2057 A66-25247
 Unmanned Mars surface roving vehicle design, system and subsystem development, telecommunication and guidance modes, etc 13 p2057 A66-25265
 Coordinated air-surface transportation microeconomic analysis 15 p2620 A66-29796
 Future improvements in economic and service performance of cargo carriers in surface modes of transportation 15 p2620 A66-29797

SURFACE WAVE

Waves on surface of moving viscous fluid of infinite depth 01 p0055 A66-10172
 Field structure of electromagnetic surface waves at Yagi array acting as waveguide 01 p0036 A66-10367
 Attenuation of surface waves in plasma columns in weak axial magnetic field 01 p0026 A66-10543
 Reflection of second harmonic waves created in nonlinear interaction of waves at plasma boundary for case of oblique incidence and weak spatial dispersion 01 p0030 A66-10698
 Hydraulic analogy experiments at optimum depths obtained analytically, noting surface waves in liquid 02 p0217 A66-11555
 Resonance effect on surface wave propagation in plasma with varying density, noting absorption and spatial plasma dispersion 03 p0396 A66-12287
 Waveguide surface waves launched onto glass-clad plasma column to test validity of quasi-static analysis when small column

condition is not satisfied 04 p0551 A66-13737

High electric fields effect on propagation of 24-GHz microwaves along surface on n-type indium antimonide 04 p0562 A66-13749

Effective excitation of radial cylindrical surface waves using Green function for excitation of impedance cylinder resting on impedance plane 06 p0823 A66-15882

Surface wave diffraction by wedge as determined by Chu and Kouyoumjian compared with results using simpler Green function 06 p0827 A66-16043

Scattering of TM surface wave by metallic strip above dielectric-clad ground plane, developing expression for Green function and formula for reflection coefficient 06 p0845 A66-16091

Growth and excitation of surface waves on capillary liquid jet stressed by electric field 07 p1087 A66-17946

Electromagnetic scattering by finite dense plasma sphere, discussing effects of surface wave, absorption and inhomogeneity 07 p1091 A66-18409

Surface oscillations in bounded cold plasma with charged particle fluxes along stationary magnetic field 08 p1262 A66-18982

Surface wave propagation in magnetoactive plasma along plasma-vacuum boundary, plasma layer and plasma cylinder 08 p1263 A66-19173

Electromagnetic waves in optically-inactive isotropic semiconducting media bounded by vacuum 08 p1276 A66-19609

Surface plasma wave dispersion in metals, noting method for solving Kulik equation 09 p1389 A66-20615

Direct piezoelectric coupling to surface elastic waves by spatially periodic electrode, noting measurements in quartz plate and CdS film 10 p1533 A66-21068

Axial magnetic field effect on resonance of surface waves propagating along cylindrical plasma column 10 p1497 A66-21559

Surface and interface waves in plasma gaps, discussing backward wave 10 p1564 A66-21584

Short pulse radar return of cone-sphere measured to determine contribution of individual scattering elements to total scattered field, noting creeping wave contribution 10 p1502 A66-21636

Kinetic approximation of electromagnetic surface wave propagation in infinite plasma sheath solved by Fourier method, noting resulting dispersion equation 11 p1743 A66-22441

Radiation field and surface waves generated by linearly phased electric line current and electric current component oriented in plane parallel to unidirectional conducting screen, solved by modal method 11 p1652 A66-22549

Reflection of second harmonic waves created in nonlinear interaction of waves at plasma boundary for case of oblique incidence and weak spatial dispersion 11 p1658 A66-23300

Interaction of electromagnetic radiation falling on plasma surface with plasma surface wave, showing that wave amplitude increases or decreases exponentially 12 p1921 A66-24211

Diffraction of scalar surface waves impinging at arbitrary angle on fracture in impedance plane 13 p2024 A66-25947

Surface wave emission by charges passing through interface between vacuum and real dielectric, emphasizing energy loss equations 13 p2025 A66-26051

Surface wave propagation in circular waveguide containing axial plasma column 13 p2026 A66-26102

Amplification of helicon waves in single-component solid state plasma 13 p2169 A66-26277

Surface waves supported by plane boundary of semiinfinite region of gyrotropic plasma analyzed when magnetostatic field direction is parallel to interface and propagation direction 14 p2241 A66-27961

Interaction between surface elastic wave and semiinfinite plasma 14 p2346 A66-28236

Model of reentry plasma layer consisting of magnetic line source in ground plane, determining plasma temperature effect, computing radiation pattern of far-zone

field 17 p2875 A66-32387

Frequency range in which Vavilov-Cerenkov surface wave exists in plasma-vacuum boundary 17 p2968 A66-32540

Plane wave interaction with surface waves at plasma boundary 17 p2968 A66-32541

Surface wave propagation along plasma column noting discharge tube properties, density distribution variation with magnetic field, attenuation due to collisional losses, etc 17 p2970 A66-32651

Electromagnetic waves in optically-inactive isotropic semiconducting media bounded by vacuum 17 p2983 A66-33123

General hybrid surface wave mode diffraction at surface reactance discontinuity 18 p3065 A66-33531

Surface waves at plane interface between vacuum and plasma with magnetostatic field normal to interface 18 p3074 A66-33532

Group velocity and power flow relations for surface waves in plane-stratified anisotropic media 18 p3066 A66-33539

Group velocity and power flow of surface waves on uniaxial plasma slab 18 p3066 A66-33540

Dispersion relations of plane surface waves on grounded anisotropic magnetoplasma slab immersed in free space 18 p3068 A66-34084

High-gain surface wave antenna arrays for satellite communication, comparing volumetric array and parabolic dish antenna 18 p3085 A66-34318

H-type surface wave propagation in rectangular waveguide having wall consisting of transversely magnetized ferrite plate 19 p3313 A66-35456

Dielectric fiber cylindrical surface waveguide with refractive index higher than surrounding region for energy transmission at optical frequencies 19 p3302 A66-35725

Electromagnetic field analysis, determining dispersion relationship of array of identical fibers, assuming surface wave modes of each fiber are excited 19 p3305 A66-36418

Spheroidal-type seismogram study of wave generation, propagation, dispersion and attenuation in realistic spherical Earth models, especially Gutenberg-Bullen A-prime model 20 p3550 A66-37433

Doppler effect on emission spectrum and energy of moving oscillator and intensity of surface wave excited by it 20 p3519 A66-37995

Horn transitions from empty waveguides to dielectric surface waveguides using telegraphers equations, determining launching horn shape with minimum reflection coefficient 21 p3711 A66-38836

Radio wave propagation over Earth surface, determining conductivity and dielectric constant taking into account ground effect 21 p3706 A66-39514

Backscattering characteristics of overdense essentially collisionless spherical plasma explained by surface wave interference 22 p3955 A66-40108

Interaction of electromagnetic radiation falling on plasma surface with plasma surface wave, showing that wave amplitude increases or decreases exponentially 22 p3956 A66-40575

Monochromatic wave interaction with isotropic electron-plasma, determining field and surface wave generated on basis of Maxwell equations 22 p3870 A66-40948

Rectangular terminal block in rectangular waveguide and dispersion equation for surface wave propagating along waveguide 23 p4046 A66-41516

Wave resistance of viscous liquid of infinite depth, examining system of normal stresses that flow along surface 23 p4056 A66-41730

Bifurcated parallel plate waveguide solution extended to solution of open ended parallel plate waveguide radiating into space 24 p4184 A66-42703

SURVEILLANCE

SA ICE SURVEILLANCE

SA RECONNAISSANCE

SA SPACE SURVEILLANCE SYSTEM

Advanced avionics systems for improved surveillance and communications for Army ground-support aircraft 13 p2023 A66-25644

Proposed one-satellite synchronous satellite system for over-ocean surveillance of

aircraft 14 p2329 A66-28364

SURVEILLANCE RADAR

Secondary surveillance radar operational implications in technical aspects 02 p0192 A66-12013

Flight test evaluation of improvement in signal-detection performance of ground surveillance radar 06 p0836 A66-16980

Weather surveillance radar for SST must have range of 250 nautical miles for 0.2 g passenger acceleration 07 p1001 A66-17700

Digitalization of moving target indicator signals for adaptation of digital detectors to air surveillance radars 11 p1655 A66-22657

Secondary surveillance radar in aiding airport traffic through aircraft transponder interrogation 13 p2124 A66-25701

Air traffic control radars, discussing airport surveillance radar /ASR/, precision approach radar /PAR/ and secondary surveillance radar /SSR/ 16 p2666 A66-31444

Surveillance radar optimization by separating search and tracking functions and controlling operation of radar by tracking computer 20 p3520 A66-38141

Probability ratio sequential detector for use with mechanically scanned surveillance radars 23 p4045 A66-41323

SURVEYING

S GEODETIC SURVEYING

S MAGNETIC SURVEY

SURVEYOR I SPACECRAFT

Optimal correlation of tracking data determining Surveyor I location 23 p4129 A66-41780

SURVEYOR PROJECT

Automatic control in space reviewing tracking techniques, IR horizon sensors, Apollo spacecraft guidance computer and control systems and terminal guidance system of Surveyor spacecraft 03 p0351 A66-13258

Lunar landing spacecraft analysis and Surveyor reliability data acquisition 13 p2192 A66-25506

Prediction of flight transient torsional acceleration at base of Surveyor spacecraft and implementation of pulse qualification testing 14 p2392 A66-28001

Terminal guidance system instrumentation for Surveyor project lunar soft-landing spacecraft 18 p3132 A66-33881

Surveyor midcourse guidance treated by minima and maxima theory, noting terminal phase 19 p3397 A66-35600

Surveyor vernier propulsion system, discussing design of thrust chamber, propellant tank assemblies, functions of VPS, etc [AIAA PAPER 66-593] 20 p3629 A66-37632

Performance capabilities of Surveyor spacecraft lunar landing TV system operating in mode that reduces RF power requirements for lunar distances 20 p3562 A66-38383

Free fall test of Surveyor test vehicle unaided by recovery parachutes to radar-controlled soft landing on ground 24 p4284 A66-42896

SURVIVAL

SA LIFE SUPPORT SYSTEM

Airline evaluation of aircraft survival equipment, noting Arctic survival exercises and testing 20 p3494 A66-37002

Safety and survival in manned space flights, discussing space suits, escape, life preservation after soft landing, etc 24 p4169 A66-43145

SUSCEPTIBILITY

SA MAGNETIC SUSCEPTIBILITY

Standard parallel wire susceptibility testing on signal lines at component and/or subsystem level 18 p3078 A66-34170

Miller phenomenological rule for computing nonlinear susceptibility, determining magnitude by geometrical factor 24 p4223 A66-42568

SUSPENSION

SA MAGNETIC SUSPENSION

SA SOLID SUSPENSION

Separating force determined for boundary layer of nonsedimentating suspension of various configurations 01 p0060 A66-11092

Metallized propellant and gas-solid suspension flow through nozzle in high energy systems 06 p0803 A66-16912

Gyro drifts in Cardan suspension with mobile base, determining angle of

- rotation 17 p2926 A66-32798
- USPENSION SYSTEM**
- SA SPRING**
- Shape of elastic suspension plate for cycloidal pendulum 04 p0524 A66-14395
- Azimuthal mismatch of two Cardan suspensions when used to determine azimuth of distant object in relation to moving object 21 p3770 A66-38968
- Astatic gyroscope in rotating Cardan suspension and drifts due to angular oscillations of base 21 p3737 A66-38969
- Gyro in Cardan suspension, discussing stability criteria for rotations about largest or smallest moment of inertia 22 p3947 A66-39695
- Analysis of perfect frictionless suspension of rotating body with two degrees of freedom mounted on rotating shaft of spin axis deflection [AIAA PAPER 65-435] 23 p4066 A66-41100
- WAN BAND**
- Absolute band and oscillator strengths and absolute Einstein A coefficients for C-2 Swan system 04 p0549 A66-14313
- Cometary and hydrocarbon flame spectra compared, discussing Swan, HCO and other band systems 17 p3013 A66-33404
- WEDEN**
- Swedish Air Force personnel testing for somatic classification, appraising body dimensions, muscular capacity, endurance index, etc 04 p0471 A66-14087
- Space research in Sweden including cosmic rays, aurora, radio astronomy, rocket sounding, etc 09 p1459 A66-20724
- National report on space research in Sweden 15 p2601 A66-29933
- Swedish aircraft incident/near accident/documentation and analysis, discussing high rate in air force, prevention and psychophysiological excitation of in-flight tasks 20 p3508 A66-37007
- WEEP**
- S LEADING-EDGE SWEEP**
- S VARIABLE SWEEP**
- WEEP FREQUENCY**
- Nonlinear time-variant phase-lock loop differential equation for arbitrary loop voltage-controlled oscillator sweep voltages used in aerospace tracking and communication systems 04 p0502 A66-13605
- Measuring rapidly changing microwave phase and attenuation, using swept-frequency bridge circuit 05 p0644 A66-14581
- Scope display width expansion via simple switching circuit with binary counter and several resistors 10 p1508 A66-21300
- Oblique ionospheric sounding at medium-sweep frequencies, noting performance of chirp techniques 14 p2233 A66-26771
- Swept frequency antenna gain measurements, evaluating mismatch losses at feedpoint and obtaining gain-frequency curves 14 p2256 A66-27911
- Frequency sweep method of measuring relaxation times and determining Q value in high Q superconducting cavities 14 p2258 A66-27955
- Ionospheric electron density measurement by gyroplasma probe, using sweep frequency impedance technique 15 p2604 A66-30047
- Swept frequency measurement of water-drop diameter in spherical resonator, using dielectric materials 19 p3394 A66-36417
- Pulse compression using diffraction gratings and frequency sweeps of 30 mc in quartz crystal ultrasonic transducer 23 p4034 A66-41017
- Pulsed compression network for linear FM signals using short circuited delay line and with sweep frequency corresponding to output response peak 23 p4034 A66-41020
- WEPT FREQUENCY TOPSIDE SOUNDER**
- S ALOUETTE SATELLITE**
- S TOPSIDE PROGRAM**
- WEPT WING**
- Transonic wind tunnel investigation of optimum roll effectiveness of large swept wing transport aircraft with conventional and spoiler ailerons [AIAA PAPER 65-789] 03 p0352 A66-12595
- Variable-sweep aircraft design, with application to trainer, strike fighter and supersonic transport 04 p0458 A66-13928
- Preventing turbulent contamination of laminar flow on highly swept wings by attaching bump on leading edge 06 p0801 A66-15993
- Circulation distribution for swept-back wing of finite span and large aspect ratio in subsonic flow by asymptotic method 07 p0981 A66-18033
- Variable sweepback wing noting design problems, adaptability, controllability and comfort 10 p1482 A66-21370
- Boundary layer transition measurements on swept wings with supersonic leading edges 14 p2219 A66-27439
- Boundary layer control on walls by means of longitudinal vortices created by row of wings in shape of swallow 17 p2907 A66-32328
- Flow analysis of swept back blades in water tunnel, noting flow patterns, surface pressure distribution, lift-drag ratio, etc 18 p3049 A66-34649
- Critical parameters and flow characteristics of swept wings with full-chord laminar flow, noting boundary layer disturbance effects 18 p3050 A66-34950
- Downwash corrections for wings with arbitrary sweepback in open and closed circular wind tunnels with base plate 21 p3694 A66-38936
- Flight testing of laminar flow control on full-scale swept wings, examining total pressure probes, wing wake drag and boundary layer stability utilizing pressure transducer [AIAA PAPER 66-734] 22 p3846 A66-40625
- Mass point transfer matrix for coupled bending-torsion of swept wing and tail surfaces 23 p4134 A66-40986
- SWEEPBACK TAIL SURFACE**
- Mass point transfer matrix for coupled bending-torsion of swept wing and tail surfaces 23 p4134 A66-40986
- SWITCH**
- SA ELECTRONIC SWITCH**
- Pulse operated miniature RF switch for space use and design from command decoder 03 p0348 A66-13343
- Integrated circuits containing transistor, diode and resistor with unilateral and bilateral switches, noting application 12 p1834 A66-24087
- Characteristics and application of electromechanical switches 13 p2043 A66-26313
- Low-inductance hydrogen gas discharge switch tube based on gas pressure-electrode spacing control of ionizing collisions 19 p3280 A66-35812
- Bourdon-helix pressure-sensitive switch for air vehicle hydraulic system of XB-70A aircraft and other instruments operating in severe environment 24 p4213 A66-42824
- SWITCHING**
- SA BEAM SWITCHING**
- SA MAGNETIC SWITCHING**
- SA MICROWAVE SWITCHING**
- Energy calculation as time function required to switch toroidal ferrimagnetic core from one remanent state to another, considering core type used in antenna phased arrays 05 p0642 A66-14564
- Traffic aspects of communications systems involving single wideband facilities carrying simultaneously traffic of various bandwidths and group switching to meet individual traffic requests 06 p0830 A66-16334
- Transient process during instantaneous switching of semiconductor junction diode from forward to neutral direction 06 p0852 A66-16546
- Room temperature quasi-continuously pumped ruby giant pulse laser with saturable absorber 10 p1541 A66-21248
- Period of constant reverse current occurring when limited-base diode is switched from forward to backward direction of current flow 13 p2028 A66-25094
- Stability of variable-structure control systems, noting two-stage motion in linear system stabilization and image point impingment on switching surface 15 p2471 A66-29161
- Solution of optimal problem with single-cycle switching 16 p2734 A66-30748
- Solid laser radiation operating in Q-switched resonator regime noting effect of finite rate of switching, finiteness of relaxation time, transmission coefficient factor, etc 20 p3576 A66-37142
- Constant voltage avalanche breakdown state of gallium arsenide diodes after switching attributed to peak in hole generation rate 23 p4047 A66-41623
- SWITCHING CIRCUIT**
- SA DUPLEXER**
- Advantages of tunnel diode/transistor switching circuits as medium speed building blocks for exploring detailed behavior of tunnel diode staircase circuits 01 p0043 A66-10915
- Switching with optical signals classifying polycrystalline noncoherent and coherent types of optoelectronic devices 02 p0200 A66-11890
- Universal definition of figure of merit associated with variable parameter one-port for RF switching and modulation 02 p0201 A66-11903
- Binary-ternary switching algebra used to analyze multiterminal two-position contact networks which include resistors and ideal rectifiers 02 p0209 A66-11911
- Direct-coupled silicon transistor switching circuits with high reliability rather than with maximum gain 03 p0340 A66-12493
- Technical developments in field of semiconductor devices measured by degree of integration of electrical devices 03 p0345 A66-13236
- Temperature dependence of input and output current-voltage characteristics of N-triode 03 p0346 A66-13320
- Cryotron-type DC to AC voltage converter and measurements of cryotron circuits 04 p0494 A66-13755
- Semiconductor diode pulse parameters measured in various operating conditions, showing changes in leading edge steepness and switching amplitude of circuits 04 p0495 A66-13887
- Semiconductor devices used in switching circuits at high pulse rates, emphasizing transistor and tunnel diode circuitry 04 p0497 A66-13962
- Switching circuit theory and logical design - IEEE Annual Symposium, University of Michigan, Ann Arbor, October 1965 05 p0637 A66-14926
- Self-repairing digital computer, discussing switching mechanism activated diagnostic procedure and failed circuitry replacement 05 p0637 A66-14930
- Reliability, life and relevance of circuit design in electromechanical switching devices 06 p0839 A66-15946
- Filter techniques for high-speed diode switches designed to suppress troublesome switching transients 06 p0842 A66-15974
- Book on switching theory covering circuit synthesis and analysis, Boolean algebra, functional theory, relay type network, etc 06 p0861 A66-16197
- Book on unified treatment of switching theory, emphasizing synthesis and analysis aspects of switching circuits 06 p0861 A66-16198
- Current-switching half adder construction, operation and results 06 p0858 A66-16992
- Switching transients of semiconductor junction diodes with arbitrarily thick base 06 p0859 A66-17189
- Iterative procedure for determining linear separability of Boolean function and threshold functions for logical switching circuit design 07 p1059 A66-17971
- Switching waveform prediction of simple transistor inverter circuit from charge control equations 08 p1195 A66-19358
- Improvement of transient response of third order servosystems by discrete control of system parameters, noting application of switching circuit 09 p1360 A66-19859
- Dynamic programming in linear vector system and application in switching system 09 p1393 A66-19909
- Integrated circuit for switching-type high-efficiency power supply with feedback regulation 09 p1354 A66-20566
- Charge-controlled /p-n-p/ transistors, discussing three-dimensional asymmetric model, dynamic characteristics and switching time calculation 09 p1355 A66-20569
- Field effect transistor used in analog switching circuits 09 p1355 A66-20571
- Switching device for pneumatic signals, measuring pressure and handling numerous channels simultaneously 10 p1534 A66-21199

Scope display width expansion via simple switching circuit with binary counter and several resistors 10 p1508 A66-21300

Switching properties of partially set square-loop ferrite core, noting flux level influence, measurement techniques, etc 10 p1508 A66-21413

Superconducting continuous film store evaluated, noting switching thresholds and functional dependence of disturb pulse sequences on film parameters 10 p1509 A66-21416

Phase switching of two-circuit parametric oscillator operating as three-position trigger 11 p1666 A66-22721

Sinusoidal voltage converted to rectangular voltage, using charge storage diodes 11 p1668 A66-23064

Monostable and bistable counting circuit synthesis and analysis of volt-ampere characteristics 11 p1678 A66-23238

Field effect transistors in digital circuits, FET transient behavior, transistor logic and switching circuitry 11 p1673 A66-23472

Pulse-height radio-pulse tunnel diode triggers with internal radio-pulse rectification and amplitude recording of information 12 p1830 A66-23734

Reliability, life and relevance of circuit design in electromechanical switching devices 12 p1831 A66-23791

Silicon monolithic Semiconductor Memory Integrated Device /SMID/ memory system and memory storage element 12 p1827 A66-23834

Integrated stability augmentation circuits in AN/ASW-16 automatic flight control system 12 p1837 A66-24381

System approach and requirements of particular switching system of Automated Patching System /Aps/ for use on Atlantic Missile Range /AMR/ 12 p1818 A66-24596

Statistical model of switching time jitter for tunnel diode threshold-crossing detector 12 p1842 A66-24655

Standard redundancy techniques for determining reliability of series elements and interchangeable stand-by components in digital circuits 12 p1888 A66-24821

Linear power amplification with switching techniques, using pulse width modulation 13 p2036 A66-25522

Electronic circuit design handbook covering control, detection, pulse and oscillator circuits, configurations, application, etc 13 p2042 A66-26056

Integrated circuit binary counters using majority logic current mode gate element 14 p2255 A66-27803

Ground-based test setup using p-n-p-n controlled switches, logic circuitry and sensitive relays to analyze telemetered pulse signals from four lines of airborne electronic system 14 p2255 A66-27807

Voltage-controlled switch using p-i-n diodes loop-coupled to section of WR975 waveguide for use in satellite tracking radar system 14 p2258 A66-27953

Temperature dependence of input and output current-voltage characteristics of N-triode 14 p2260 A66-28294

Cryotron-type DC to AC voltage converter and measurements of cryotron circuits 15 p2454 A66-28552

National Relay Conference, Oklahoma State University, April 1966 15 p2458 A66-28988

Life expectancy of form C dry reed switch as function of operating environment 15 p2460 A66-28992

Book on automatic communication switching systems, logic, logical switching components, storage elements, relay centers, etc 15 p2465 A66-29644

Semiconductor diode pulse parameters measured in various operating conditions, showing changes in leading edge steepness and switching amplitude of circuits 15 p2466 A66-29699

Program for calculating and designing diode switching circuits consisting of AND and OR gates, where interrelationship of input variable is determined by single switching function 15 p2453 A66-29867

Delay time and current transients occurring when thyristor is switched on by control-current pulse 15 p2468 A66-29918

Equivalent circuit analysis of switching time of dynistor with active

load 15 p2468 A66-29919

Static regime of trigger using two tunnel diodes with inductive memory 15 p2468 A66-29925

Pulse switching of thin ferromagnetic films in nanosecond range and operation characteristics of measuring circuit 16 p2773 A66-30681

Switching time of semiconductor diode with limited base region analyzed by charge control techniques 16 p2777 A66-30867

Cryoelectronic integrated circuits utilizing superconducting storage and switching devices 16 p2665 A66-31417

Three-stage time division switching network with pulse shifting and direct junctions using computer simulation for blocking probability estimation 17 p2878 A66-31812

Circuit with single externally driven switch, operated at fundamental frequency gives efficient conversion of DC to AC at that frequency or any specified harmonic of it 17 p2848 A66-31818

MOS transistors in integrated switching circuits to obtain desirable characteristics of pentode vacuum tubes and bipolar transistors 17 p2882 A66-32109

Operational methods of semiconductor switching circuits in pulsed powered circuit /PPC/ mode for reduced power consumption 18 p3090 A66-34070

Minimum feedback loop realizations of synchronous sequential switching circuits 18 p3090 A66-34072

Fluid circuit theory, discussing setting up of electrical analogs, transfer functions, transmission line equations, wave propagation speed, etc 18 p3099 A66-34127

Fluid amplifier operation characteristics, noting gain, switching circuits, power jet pressure effects, etc 18 p3054 A66-34128

Nonlinear operational amplifier with high power switching devices, noting volt-ampere characteristics 18 p3086 A66-34494

Variable-structure automatic control system with switchable phase-shifting filters for linear plants, converting error signal to control switching device 18 p3092 A66-34994

Switching transients of semiconductor junction diodes with arbitrarily thick base 19 p3314 A66-35547

Optimum fabrication of microelectronic devices by interconnection of integrated circuits on ceramic substrates 19 p3323 A66-36820

Space control system using digital SUBORDINATE OR logic blocks to add optimum response capability to maneuver commands 20 p3662 A66-37229

Pulse-height radio-pulse tunnel diode triggers with internal radio-pulse rectification and amplitude recording of information 22 p3875 A66-40077

Tunnel diode monostable oscillator with triggering threshold when load resistance, inductance and bias provide three states of dynamic equilibrium 22 p3876 A66-40167

Phase switching of two-circuit parametric oscillator operating as three-position trigger 23 p4045 A66-41459

Thyristor circuit, basis for capacitive switching circuits, expressing switching capacitance by DC source 24 p4181 A66-42485

FET characteristics in chopping and analog switching applications 24 p4182 A66-42500

Laplace transform analysis of transistor switching circuit controlled by RC time constant, using PWM circuit as example 24 p4185 A66-42946

SWITCHING ELEMENT

SA FLUID SWITCHING ELEMENT

Protective automatic switching systems for high-capacity radio channels 04 p0495 A66-13802

Selective saturation of organic dyes by monochromatic light for high speed switches and optical pulse amplifier 04 p0533 A66-14329

Integrated circuit current switching logic element fabrication, using transistors and standard isolation techniques 05 p0643 A66-14570

High power semiconductor devices, particularly power handling device 07 p1012 A66-18273

Rectangular voltage pulse generator using capacitor partial discharge and pulsed

thyatron as switching element 08 p1194 A66-19281

Light activated low level switch consisting of electroluminescent GaAs p-n diode and double emitter silicon transistor 08 p1195 A66-19359

Superregenerator used in construction of trigger devices 08 p1199 A66-19768

Efficiency of superconducting thermal switches determined, noting optimal operation parameters 09 p1420 A66-20052

Static and dynamic characteristics of four-layer semiconductor switches as components of binary storage circuits 09 p1356 A66-20621

Monolithic transistor-transistor logic gate capable of 1 to 2 nanosecond delays 10 p1511 A66-21697

Boron semiconductor devices acting as contactless switches, based on current vs voltage characteristics of boron 10 p1511 A66-21729

Spontaneous switching from closed to open state observed in four-layer silicon diodes, serving as keying elements in automatic systems 11 p1667 A66-22743

Junction field effect transistor used for switching 14 p2252 A66-27459

Minimal prime implicant covers of switching functions determined, using connected cover term matrices 14 p2265 A66-27483

Diode gate design, using bridge circuit to eliminate spurious gating signals 14 p2267 A66-27802

Master-graph technique for predicting performance of amplifying and switching systems, using charts which present circuit response to basic step-function inputs 15 p2458 A66-28887

Effects of angular dispersion of anisotropy and film thickness on thin permalloy ferromagnetic film pulse switching 16 p2773 A66-30682

Pulse switching of permalloy films by use of interrupted pulses and Kerr magneto-optical effect 16 p2773 A66-30683

Switching characteristics of small-geometry thin-film superconductors 16 p2783 A66-31428

Textbook on transistor electronics of semiconductor switching devices in digital, and some analog installations 17 p2876 A66-33190

Bilateral switching thyristor system on common silicon substrate, discussing ignition 19 p3313 A66-35500

Equilibrium photocurrents in silicon switching diodes from nondestructively measured electrical parameters 20 p3526 A66-37322

Electric analog approximation of static and dynamic performance of Kearfott ball valve switching device, discussing application to complex circuit design 20 p3501 A66-37650

Gold doping effects on recovery time of phosphorus, boron and arsenic impurity gaseous-diffused junction diodes and estimated gold recombination center densities 22 p3873 A66-39749

Spontaneous switching from closed to open state observed in four-layer silicon diodes serving as keying elements in automatic systems 23 p4046 A66-41481

SWITCHING FUNCTION

Application of graph theory to synthesis of single contact networks and functions, noting functional and terminal transformation 04 p0506 A66-14203

Adaptive logic network structure matched to relationships in input environment, defining task network has to learn, using switching functions 05 p0653 A66-14599

Theory for switching power rectifiers from forward to reverse state derived and confirmed by measurements 05 p0646 A66-14662

Light interaction effects potentially useful in optical logic functions, emphasizing fiber lasers 05 p0693 A66-18225

Switching surfaces in three-dimensional phase space obtained by analog computer for optimizing nonlinear control systems 06 p0862 A66-16361

Digital latching phase shifter which combines submicrosecond switching with compact ferrite strip transmission line structure 07 p1007 A66-17506

Convergence, oscillation, functional stability and reliability of m-by-1

homogeneous polyfunctional nets under operation 10 p1517 A66-21691

Iterative technique for determination of prime implicants of switching functions specified in maxterm 10 p1517 A66-21695

Programmable patching system at Cape Kennedy for communications network composed of two individual switching subsystems, using solid state devices and glass-reed relays 14 p2233 A66-26805

Rise and fall times of transistors in switching operation, comparing variation of lifetime of minority carriers with results obtained from cut-off frequency measurements 19 p3313 A66-35350

Optimum design of piecewise-linear switching functions for linear, constant, damped systems with single ideal relay controller 19 p3336 A66-36708

Stability and quality of automatic control of plant with pure time delay, using regulator with constant and switching parameters 20 p3537 A66-36894

Boolean algebraic analysis of AND, OR, NAND and NOR functions in electronic integrated circuits 21 p3720 A66-39625

Tabular minimization procedure for ternary switching functions in obtaining minimal irredundant function form, using limited set of reduction rules 24 p4177 A66-43186

SWITZERLAND

Layout and design of air terminal for Basel, Switzerland, noting passenger accommodation and air traffic problems 05 p0660 A66-15199

Swiss space research program, apparatus and experiments 15 p2600 A66-29904

SYMMETRICAL BODY

SA GEOID

Critical condition for aerosol deposition from symmetrical flow past solid body, considering case of circular cylinder 08 p1247 A66-19304

Temperature dependence of thermal diffusivity and thermoconductivity of symmetrical body 11 p1786 A66-23062

Stability of baroclinic axially symmetric vortex on F plane to axially symmetric disturbances 16 p2700 A66-31643

Critical condition for aerosol deposition from symmetrical flow past solid body, considering case of circular cylinder 19 p3393 A66-36041

SYMMETRY

SA AXISYMMETRY

SA ISOTROPISM

Normal scalar nonet, K1 meson-2 pion decay, K1-K2 mass difference and S-wave pion scattering 15 p2544 A66-28946

Broken symmetry densities within current algebra arising in magnetic moment ratio, renormalization constants and unitary symmetry correction 20 p3606 A66-38293

SYMPATHETIC NERVOUS SYSTEM

Sympathetic nervous system integrity following water immersion evaluated by measuring plasma-free fatty acid responses to passive tilting 16 p2639 A66-30649

YNAPSE

Hypoxia of simulated high altitude exposure prolongs synaptic delay and conduction time in brain system of rats 22 p3855 A66-40403

SYNCHROCYCLOTRON

High energy protons in synchrocyclotron testing of polyethylene, aluminum, lead and titanium hydride materials 05 p0627 A66-15118

SYNCHRONIZATION

SA BIT SYNCHRONIZATION

SA FREQUENCY SYNCHRONIZATION

Automatic synchronization system for antenna based only on geometric considerations 06 p0835 A66-16865

Joint experiment of U.S. Naval Observatory and Japan Radio Research Laboratories for synchronizing standard time pulses, using Relay II satellite 12 p1818 A66-24473

Synchro system transfer functions comprising synchro and resolver cascades of nonidentical units, giving graphs for system transformation ratio and phase shift 16 p2672 A66-31440

Stability of synchronous one-frequency regime for system of nonlinear unidentical objects with one degree of freedom under

action of mutual couplings 16 p2748 A66-31503

Experimental meteor burst system for microsecond synchronization of isolated clocks 20 p3515 A66-37227

Haag general synchronization theory for oscillating systems with one degree of freedom applied to boundary value problems for multivibrating systems 21 p3774 A66-39607

SYNCHRONIZATION CODE

Insertion of 2 bits of specific code into frame of digital data of burst-error-correcting code for synchronism recovery 02 p0190 A66-11524

Digital synchronization at information levels of words, cycles and subcycles 06 p0836 A66-17027

Computer design of programmable demodulator for multiformat PCM telemetry data 14 p2246 A66-28432

Binary block codes simultaneously correcting additive and synchronization errors in data transmission systems 15 p2452 A66-29660

Synchronization efficiency of PCM signals coded in NRZ, RZ and split phase formats in noisy channel 19 p3302 A66-35706

Timing and framing synchronization of PCM communication systems using analog techniques, analyzing transient state and jitter 21 p3705 A66-39226

Self-synchronizing codes derived from binary cyclic codes 21 p3720 A66-39635

SYNCHRONIZED OSCILLATOR

Synchronized mode of excitation for diffraction-coupled laser 03 p0375 A66-12293

Stability and synchronizing properties of third order phase-locked oscillator system 06 p0823 A66-15889

Q-switched optical maser synchronization, discussing experimental design, setup and performance 07 p1041 A66-17297

Intrinsic noise effect on synchronization of self-excited oscillators, determining phase diffusion coefficient, frequency fluctuation spectra and spectral line length 09 p1344 A66-20345

Transient processes in vacuum tube oscillator synchronized by small harmonic signal with random initial phase in presence of noise 09 p1357 A66-20775

Weak harmonic signal effect on synchronized oscillator analyzed, based on van der Pol equation 11 p1667 A66-22790

Synchronous-phase LC oscillator 14 p2259 A66-28164

General synchronization theory and application 17 p3032 A66-33423

Spark shadow projections in air for giant pulse synchronization from two lasers, using rotating prism to modulate quality factors 18 p3144 A66-34036

Weak harmonic signal effect on synchronized oscillator analyzed, based on van der Pol equation 20 p3525 A66-37130

Stable limiting cycles of laser resulting from mutual synchronization of phase-shifted oscillation modes 22 p3929 A66-39653

Transient processes in vacuum tube oscillator synchronized by small harmonic signal with random initial phase in presence of noise 22 p3873 A66-39834

SYNCHRONOUS COMMUNICATIONS

/SYNCOM/ SATELLITE P

Spin-stabilization system for attitude and orbit control of synchronous Syncom and Early Bird satellites 01 p0145 A66-11133

Syncom synchronous communications satellite design and development, discussing orbit control and reliability 08 p1301 A66-18564

Second degree sectorial harmonic of Earth gravitational potential based on 338-day variation in revolution period of Syncom 11 p1697 A66-22436

International Telecommunications Satellite /INTELSAT/ Consortium and COMSAT participation in program 12 p1982 A66-24799

Proposed one-satellite synchronous satellite system for over-ocean surveillance of aircraft 14 p2329 A66-28364

Latitudinal variations of ionospheric irregularities studied via synchro and 1000 km satellites, noting Early Bird data, scintillation index graphs, radio star signals, etc 15 p2496 A66-30071

Syncom communications satellite reaction control system for spin axis precession and orbit correction, noting design and operation 18 p3242 A66-33854

Mounting problem for land-borne and ship-borne antennas for tracking synchronous, subsynchronous and other communications satellites 18 p3070 A66-34263

Civil aviation communications between pilot and ground controller on over-ocean flights, considering use of VHF and HF and synchronous satellite to extend VHF 20 p3515 A66-37234

VHF aircraft antennas for propagation and communication via synchronous satellite, discussing nose radome yagi and window cavity arrays 20 p3525 A66-37235

Television transmission and reception by satellite relay 20 p3521 A66-38425

Lagrange libration points in plane of two mutually gravitating heavy masses applied to theory of SYNCOM lunar satellites 22 p3979 A66-40176

SYNCHRONOUS COMMUNICATIONS

/SYNCOM-II/ SATELLITE P

Syncom II electrical power system, discussing design, air mass one to air mass zero extrapolation and spacial performance [AIAA PAPER 64-456] 14 p2226 A66-27889

SYNCHRONOUS COMMUNICATIONS

/SYNCOM-III/ SATELLITE P

Listening and two-way communication tests to study satellite as active relay for communications between aircraft in-flight and ground terminal, using Syncom III 08 p1185 A66-19538

SYNCHRONOUS COMMUNICATIONS

SATELLITE PROJECT P

Fundamental design features that have made synchronous communications satellites practical 01 p0030 A66-10806

USN contributions to space communications, noting Syncom program, communications by Moon relay, design of antenna aboard Kingsport vessel, etc [AIAA PAPER 66-270] 12 p1820 A66-24743

SYNCHRONOUS DETECTOR

Selectivity of synchronous detector with preliminary filter taking into account odd harmonics 14 p2252 A66-27244

SYNCHRONOUS METEOROLOGICAL

SATELLITE /SMS/

Model estimation of radiation received from Earth by synchronous meteorological satellite 03 p0365 A66-12746

SYNCHRONOUS SATELLITE

SA DODGE SATELLITE

Diurnal variations of strength and polarization of VHF signals from synchronous Early Bird satellite 08 p1185 A66-19537

Final spin states of planets and satellites, deriving criteria for synchronous rotation 11 p1769 A66-22528

Characteristics and performance of synchronous satellite military communication system [AIAA PAPER 66-268] 12 p1859 A66-24741

Synchronous stationary satellite system for networking television and radio material to broadcast stations, noting frequency requirements and constraints [AIAA PAPER 66-284] 12 p1821 A66-24755

Synchronous orbit stationkeeping techniques, examining thrust control requirements of spin-stabilized spacecraft [AIAA PAPER 66-304] 12 p1955 A66-24771

Minimum cost ground receiving station for synchronous satellite system [AIAA PAPER 66-311] 12 p1859 A66-24777

Lunar communication satellites, discussing satellite relay, librational, random, and synchronous satellite design, lunar orbits, etc [AIAA PAPER 66-315] 12 p1823 A66-24781

Compensated coordinates of artificial Earth satellites from synchronous observations at two given points on Earth surface 12 p1824 A66-24875

Tracking record of synchronous satellites over two-year period revealing effects of second and third order longitude components in Earth gravity potential field 12 p1875 A66-24893

Synchronous orbit tracking and communication satellite using electronically steered antenna, tracking interferometers and low-powered solid state transmitter-

- receiver components 14 p2244 A66-28405
 Worldwide sea-air navigation system using
 synchronous satellites, noting limitations and
 economic factors 17 p2955 A66-33221
 Tesseral perturbations of repeating ground
 track synchronous satellite orbits in
 gravitational potential 18 p3233 A66-34595
 Passive stabilization of space vehicles with
 asymmetric mass distribution, using coupled
 system with optimum damping 20 p3659 A66-36869
- SYNCHRONOUS SATELLITE SYSTEM**
 Synchronous orbit communications
 satellites, noting advantages in reliability
 and cost 05 p0771 A66-15828
- SYNCHROTRON**
SA PARTICLE ACCELERATOR
 Parameter perturbations of magnet and
 accelerating systems of electron synchrotron
 determined from position of center of
 gravity of beam 13 p2147 A66-25747
 Accelerator with nonlinear spiral focusing,
 approximating size of stability region,
 adiabatic damping, transverse phase stability
 and perturbations effect 14 p2347 A66-28309
 Linear polarization of continuum emission
 from galaxy and discrete sources, detection
 in radio astronomy, noting relevant
 synchrotron theories 21 p3815 A66-39488
 Evolving synchrotron self-absorption model
 of extragalactic nonthermal radio
 sources 23 p4132 A66-42074
- SYNCHROTRON RADIATION**
 Propagation of cosmic synchrotron
 radiation by individual and aggregate
 electrons and effect on propagation and
 radiation of electromagnetic waves 01 p0133 A66-10647
 Continuous electromagnetic radiation of
 two solar flares attributed to
 bremsstrahlung of nonrelativistic electrons
 and synchrotron radiation 02 p0283 A66-11660
 Galactic X-ray astronomy discussing
 neutron stars, thermal bremsstrahlung and
 synchrotron radiation 02 p0290 A66-11864
 Magnetic bremsstrahlung of relativistic
 electrons in plasma during generation of
 type IV radio emission 03 p0422 A66-12913
 Synchrotron radiation from primary cosmic
 ray, describing near field produced by
 relativistic single charge moving in circle in
 medium of constant refractive index 05 p0749 A66-15053
 Observational results on radio galaxies and
 quasars, noting nonthermal radio spectra
 believed to originate from synchrotron
 emission 05 p0768 A66-15763
 Reabsorption of synchrotron radiation as
 error source in discrete radio emission
 source parameter determination 08 p1297 A66-19450
 Relation of Jupiter decimeter radiation
 intensity and polarization to distribution of
 synchrotron radiating electrons in Van Allen
 belt 09 p1450 A66-20107
 Intensity of early postexplosion radiation
 field and high energy electron emission
 from supernovae 12 p1938 A66-23918
 Compton process argument for quasar
 relative nearness to our Galaxy and contrast
 between Compton and synchrotron radiation
 scattering effects 12 p1950 A66-24389
 Magnetic bremsstrahlung of relativistic
 electrons in plasma during generation of
 type IV radio emission 14 p2376 A66-27262
 Propagation of cosmic synchrotron
 radiation by individual and aggregate
 electrons and effect on propagation and
 radiation of electromagnetic waves 17 p2992 A66-32062
 X-ray emission from Scorpio X-1,
 discussing origin of extar and possible role
 in stellar evolution 18 p3166 A66-34158
 Reabsorption of synchrotron radiation as
 error source in discrete radio emission
 source parameter determination 18 p3169 A66-34479
 Galactic magnetic field strength and
 distribution determined from synchrotron
 emission of relativistic electrons, noting
 Faraday rotation of polarized radiation from
 distant radio sources 18 p3235 A66-34744
 Synchrotron radiation of relativistic
 electrons in magnetic field of
 dipole 19 p3455 A66-35255
 Cosmic radioastronomy, discussing radio
 wave emission from quasars, synchrotron
 effect, hydrogen emission, leptons,
 gravitational fields, origins of matter and
 antimatter, etc 20 p3651 A66-37437
 Synchrotron radiation measurements near
 magnetic equator, noting radio spectrum
 radiation due to injection of relativistic
 electrons into trapped orbits of geomagnetic
 field 20 p3644 A66-38347
 Synchrotron radiation from high-energy
 electrons spiraling in magnetic field, noting
 parameter effects and computation of
 numerical results 20 p3644 A66-38348
 Inverse Compton scattering effect in
 quasars, examining assumption that they are
 at cosmological distances 22 p3980 A66-40399
 Time evolution of synchrotron radiation
 spectrum of radio sources, considering only
 radiation losses where magnetic field is
 isotropic with constant intensity and random
 space orientation 24 p4278 A66-42707
 Stimulated emission prevailing over
 absorption in high harmonics band of
 electron moving in magnetic field 24 p4226 A66-43054
- SYNCOM PROJECT**
S SYNCHRONOUS COMMUNICATIONS
SATELLITE PROJECT
SYNCOM SATELLITE
S SYNCHRONOUS COMMUNICATIONS
 /SYNCOM/ SATELLITE
- SYNCOPE**
 Vasovagal syncope induced by application
 of negative pressure to lower half of human
 body, noting effect on lung CO diffusing
 capacity 11 p1643 A66-22580
- SYNOPTIC METEOROLOGY**
 Radar network observation for obtaining
 accurate meteorological data for synoptic
 analysis 02 p0252 A66-11269
 Dynamic equations in quasi-static and
 quasi-solenoidal approximations to describe
 synoptic meteorologic processes in spherical
 coordinate system 04 p0540 A66-13412
 Numerical experiment with general
 circulation model with simple hydrologic
 cycle 08 p1247 A66-18925
 Synoptic analysis on structure of cold
 vortex with steady eastward movement by
 time-space transformation technique 09 p1400 A66-20858
 Mesoscale disturbance observed in vicinity
 of cold vortex center, emphasizing gravity
 waves 09 p1400 A66-20859
 Synoptic scale storm development stages
 traced by Tiros satellite photography of
 associated cloud vortex patterns 11 p1727 A66-22314
 Synoptic interpretation of tropical land
 convection over Philippines 11 p1728 A66-22322
 Preferred thunderstorm development near
 surface boundary between maritime tropical
 air masses and dry air masses, defining
 radar echo areas 11 p1731 A66-23382
 Suggested procedures for operationally
 integrating meteorological satellite /neph
 mosaic/ and conventional data for
 extratropical regions 11 p1731 A66-23383
 Synoptics of stratosphere and stratospheric
 warming of winter of 1963 14 p2283 A66-27095
 Synoptic analysis of nature and cause of
 clear air turbulence 15 p2531 A66-28914
 Atmospheric model describing generation
 of clear air turbulence /CAT/, noting
 horizontal shear effect 15 p2532 A66-28915
 Synoptic interpretation of Tiros III
 radiation data recorded on July 16,
 1961 18 p3129 A66-34216
 Winds caused by synoptic situations and
 strong local turbulence effect on
 evaporation measurements at Adriatic
 seaboard of Central Italy 18 p3130 A66-34720
 Atmospheric circulation - International
 Space Science Symposium, Argentina, May
 1965 19 p3346 A66-35636
 Physical, mathematical, statistical, synoptic
 and applicative aspects of medium- and long-
 range weather prediction 22 p3942 A66-39729
 Atmospheric ozone data on basis of
 meteorological observations and synoptic
 maps on ship in Atlantic 23 p4065 A66-41804
- SYNTHESIS**
SA FREQUENCY SYNTHESIS
SA NETWORK SYNTHESIS
SA NUCLEOSYNTHESIS
SA PHOTOSYNTHESIS
 Synthesis of complex lithium aluminum
 hydride, lithium hexahydroalunate, having
 hydrogen to aluminum ratio greater than
 four 11 p1649 A66-22407
- SYNTHETIC FIBER**
SA NYLON
SA POLYAMIDE
SA POLYBENZIMIDAZOLE
SA POLYESTER
 Magnetization of synthetic filamentary
 superconductors, discussing sample
 preparation, critical field and transition
 temperature effect on flux jumping and
 magnetic hysteresis loop 13 p2157 A66-25033
 Creep behavior of selected polypropylene
 monofilament under axial loading 17 p3029 A66-32785
- SYNTHETIC RESIN**
SA PHENOL RESIN
SA PLASTIC
SA POLYESTER
SA POLYETHYLENE
SA POLYMETHYL METHACRYLATE
SA POLYPYROPYLENE
SA POLYSTYRENE
SA POLYTETRAFLUOROETHYLENE
SA POLYURETHANE
SA POLYVINYL CHLORIDE
 Resin compacts prepared by high
 temperature compression of hardened resin
 mixed with unhardened resins, noting
 strength, thermal behavior and
 physicochemical properties 13 p2113 A66-25913
- SYNTHETIC RUBBER**
SA ELASTOMER
SA POLYISOBUTYLENE
 Urethane rubber for wide range of
 experimental stress analysis problems 03 p0434 A66-12366
 Statistical variability of ultimate properties
 for eight samples of SBR-sulfur gum
 vulcanizates 05 p0706 A66-15460
 Nitroso rubbers, fully fluorinated
 elastomers for nitrogen tetroxide
 application 14 p2371 A66-28010

Reliability of electronic systems, discussing redundant systems, series and parallel grouping and exponential survival law 12 p1831 A66-23792
Electronic equipment failures, which show characteristic dependence on time, divided into initial, chance and wear-out failures 12 p1832 A66-24074
Inherent reliability of equipment estimated during design stage, using component failure data 12 p1833 A66-24075
Tabulated reliability data on communications systems components for possible application to other fields 12 p1833 A66-24080
Component failure-rate testing by inspection or sampling, noting recommendations of advisory groups 12 p1833 A66-24081
Queuing model digital simulation techniques used to determine reliability of stand-by system with maintenance station 12 p1834 A66-24085
Dimensionless parameter reliability analysis, deriving system reliability functions as applied to mechanical creep [ASME PAPER 65-WA/MET-6] 12 p1970 A66-24540
Alternative method of determining incentive fee schedule for government contracts, based on linear programming and system reliability 12 p1888 A66-24669
System with unknown failure-rate parameter undergoing reliability test of accept-reject variety, based on Bayesian context 12 p1888 A66-24670
IR applications to reliability assessment, stress analysis, testing, etc, of electrically energized components, thermally or by power dissipation 12 p1842 A66-24671
Reliability improvement through redundancy at various system levels in analog systems 12 p1844 A66-24733
Reliability testing of electronic components at low stress levels, showing higher failure rates and different failure distributions than at maximum ratings 12 p1846 A66-24911
Yield and reliability of integrated electronic devices and electronic digital systems, using redundant components by triplicating voting circuits 12 p1846 A66-24914
Planning, design and evaluation of systems tests, using Shannon information theory 13 p2057 A66-25283
Reliability, durability and reduction of failure probability in radioisotope energy source design 13 p2085 A66-25285
Optimum tests for check of working order of system with minimal material losses of safe or fault system functioning 13 p2045 A66-25298
Lifetime and reliability requirements of electronic systems for projected unmanned and manned space missions 13 p2039 A66-25690
Test system design, discussing operative systems and equipment for Sea Vixen radar and Seaslug Mark I missile 13 p2058 A66-25698
Component failure examples of Gemini rendezvous radar, emphasizing need for closed loop reliability program 13 p2039 A66-25786
Reliability assessment techniques for microelectronics, considering integrated circuits, testing procedures, etc 13 p2043 A66-26226
British Air Registration Board approach to safety of advanced complex aircraft and assessment of aircraft reliability 13 p2088 A66-26690
Reliability improvement in airborne electronic equipment 13 p2044 A66-26692
Engine reliability data for four Rolls-Royce civil aircraft engines 13 p2174 A66-26694
Probability assessment of reliability effect on sortie of patrolling aircraft 13 p1996 A66-26695
Solid propellant rocket engine omnlaxis liquid injection thrust vector control system, using function generator in signal-summing feedback loop to control flow in servovalves and increase motor reliability 14 p2226 A66-27700
Power conditioning and ion thruster module size and number effect in terms of reliability 14 p2375 A66-27883
[AIAA PAPER 65-68] 14 p2375 A66-27883
Effective mean time to failure for two-element redundant system with generalized repair times 14 p2302 A66-28189
Statistical characteristics of number of pulse periods during unaffected operation of analog computer after

- malfunction 14 p2246 A66-28354
Ariel II /UK-2/ international satellite environmental test 14 p2394 A66-28426
program 14 p2394 A66-28426
Component testing and system reliability at various confidence limits for serially connected systems 14 p2305 A66-28428
Missile propellant explosion simulation by digital computer with estimate of physical parameters 14 p2395 A66-28445
Aborted Atlas-Centaur launch data of environmental conditions and use in engineering design 14 p2395 A66-28446
Systems malfunction emphasizing parameter choice for detection 15 p2469 A66-28547
Functional analysis of electromechanical control systems, noting application of mathematical methods for system reliability determination 15 p2428 A66-28797
Reliability-maintenance relationship including accessibility, design, crew duty cycle, and equipment failure rates, number of restorations, etc, in long-duration manned missions 15 p2606 A66-28804
Test program for Gemini Attitude Control and Maneuver Electronics /ACME/ system, establishment and execution 16 p2676 A66-30438
Laboratory tests on complete systems for reliability of Earth satellites, noting effect of time and thermal level on problem detection, comparison of space problems with simulated space problems, etc 16 p2677 A66-30449
Quasi-redundant system reliability, solving differential equations for repair environment via computer 16 p2714 A66-30665
Reliability data analysis for systems, discussing confidence intervals, limits and parameters independent of mathematical models employed 16 p2714 A66-30666
Approximation method determining follow-up failure conditions for nonlinear automatic systems in presence of control and noise signals 16 p2669 A66-30755
Random distribution function of nonfailure operation time, taking into account exponential time distribution law of fault occurrence 16 p2672 A66-31407
Sensor threshold definitions applied to rate gyros, comparing old and new AIAA specifications, noting threshold definitions relation to flight control system malfunctions 16 p2708 A66-31439
Reliability of back-up system with consideration of failures in switches and automatic control systems 17 p2880 A66-31904
Peak power stresses in semiconductor device testing for space power equipment, using photo methods 17 p2880 A66-31984
Reliability procedures in converting Thor tactical system to advanced booster in space program, noting time and costs 17 p3015 A66-31985
Quantitative identification of situational variables affecting system operator-control performance 17 p2865 A66-32184
Reliability of stand-by system with automatic reserve cut-in, considering probability method 17 p2888 A66-32709
Inertial navigation system reliability and effects of computer and chart display choice 17 p2955 A66-33222
Shock and vibration test characteristics revealing equipment failures, designed to have damage potential of field conditions 18 p3095 A66-34206
Electronic equipment for guided weapons design and quality 18 p3079 A66-34210
evaluation 18 p3079 A66-34210
Computer program for airborne surveillance system 18 p3052 A66-34212
reliability 18 p3052 A66-34212
Reliability of automatic control systems, considering properties of controlled plant, taking error probability in control as criterion 18 p3091 A66-34676
Reliability of complex electronic device incorporating great number of components 18 p3087 A66-34957
Nondestructive testing of nonlinearities in passive electronic components, uncovering uneven film depositions, bad grindings, unreliable contacts, etc 18 p3088 A66-35020
Automatic landing of aircraft in blind flying conditions, Royal Aircraft Establishment equipment accuracy and safety 18 p3133 A66-35243
Auxiliary autonomous piggyback detector and recorder system for spacecraft failure detection following touchdown 19 p3315 A66-35676
Automatic failure detection, location and correction system for failures in unmanned spacecraft using frequency-shift-keyed subcarrier 19 p3316 A66-35679
Time to failure and mean recovery time calculated for system with recoverable elements 20 p3525 A66-37127
Transition matrices of ergodic finite Markov chains and readiness models in cost effectiveness systems 20 p3681 A66-37176
analysis 20 p3681 A66-37176
Reliability requirements for spacecraft guidance and control systems, emphasizing redundancy in existing systems 20 p3596 A66-37177
Predelivery reflight policies role in airplane system reliability, noting failures during various test and retest flights 20 p3495 A66-37178
Component reliability and failure rates in aerospace electric power systems with relays 20 p3525 A66-37180
Reliability statistical confidence levels and relation to mean time between failures /MTBF/ 20 p3682 A66-37182
Destructive grounding system fault currents and abortive interference and elimination, using functional diagrams 20 p3542 A66-37241
Alternate mode of operation for minimizing occurrence of delays caused by launch support equipment failures for Saturn manned missions 20 p3542 A66-37243
Quantification of relative contributions of various functions to performance of mission combined with availability and dependability for system effectiveness 20 p3684 A66-37883
Deterministic and quasi-deterministic class of electronic failure predictions as prevention strategy for use in aerospace system test or checkout 20 p3566 A66-37887
program 20 p3566 A66-37887
Materials problems concerning structural reliability, modes of failure and load and strength distributions 20 p3567 A66-37897
Performance degradation and system failures in metal-metal, metal-oxide and metal-semiconductor systems 20 p3532 A66-37900
Digital computer programmed optimization model of Earth-orbiting space station with missions including reliability, maintainability and cost considerations 20 p3663 A66-37902
Structural design factors to achieve desired level of reliability and correct testing criteria 20 p3567 A66-37905
Ultrahigh reliability medium-power lightweight TWT design 20 p3532 A66-37906
Planned inspection of hardware based on warning analysis, relation to improved cost effectiveness 20 p3569 A66-37921
Missile and space system accident potential evaluated numerically 20 p3685 A66-37931
System safety concept relation to cost and system effectiveness 20 p3685 A66-37932
Weapon system reliability prediction and relations of spare consumption and of maintenance 20 p3571 A66-37937
Contractor performance evaluation program and relation to weapon system effectiveness 20 p3571 A66-37940
Maximum entropy in estimating damage distribution of single degree of freedom system subjected to random loading, noting reliability 20 p3571 A66-37942
Prediction of avionic equipment reliability in early design stage, noting equations for line replaceable unit /LRU/, classification, regression techniques, etc 20 p3573 A66-37953
Relationship between predicted and observed failure rates of units when parts complement is known, noting factors and mathematical model 20 p3573 A66-37954
Integrated reliability test-to-failure program as applied to Shillelagh guided missile subsystem 20 p3573 A66-37955
Relationship of earliest failures to fleet size and parent population 20 p3573 A66-37956
Mechanical reliability research and development for space systems, noting effect of random dynamic loading, fatigue damage, etc 20 p3573 A66-37956
Reliability and maintainability research program of USAF concerning measurement, control, failures etc, of equipment under various stresses and environmental conditions 20 p3573 A66-37960
Reliability analysis problem involving set of 30 identical parts which had intervals to failure recorded in order to make inferences about population from which parts are random sample, noting Weibull population 20 p3592 A66-37960
Truncated sequential life acceptance test of AGREE Task Group Three type, noting that such tests while useful are not optimum 20 p3574 A66-37960
Ultrareliable six redundant sensor attitude reference system for Manned Orbiting Laboratory with limited sparring capability 21 p3767 A66-38892
Reliability handbook covering system effectiveness, fatigue life patterns, reliability testing, malfunction and failure analysis, etc 21 p3744 A66-39211
Reliability predictions for repairable systems composed of units with constant failure and repair rates 21 p3713 A66-39344
Reliability of system having standby spare noting repair capability and failure times with results presented in graphs 21 p3745 A66-39344
Guaranteed estimations of system reliability for systems with incomplete element reliability data 22 p3922 A66-39901
Series form of failure probability for systems with spares 22 p4001 A66-40511
Parachute stress analysis during inflation evaluating magnitude and distribution of snap stress to prevent canopy failure 22 p3850 A66-40604
Information and failure warnings monitoring by flight crew during autopilot operation, particularly during very low visibility landing [ICAS PAPER 66-17] 22 p3945 A66-40673
Optimization of VTOL control concepts with and without stabilization compared with six degree of freedom motion simulator, noting system failure effects and nonlinear concepts [ICAS PAPER 66-9] 22 p3851 A66-40673
Logical processing units and interconnection networks design noting reliability, fault diagnosis, computer coordination of data and control processes etc 22 p3871 A66-40720
Premature pressure vessel failure prevention in Apollo spacecraft 23 p4072 A66-41124
Reliability and maintainability /RAM/ interface associated with controls assuring desired RAM predictions and design requirements 23 p4073 A66-41604
Reliability analysis techniques for spacecraft subsystems 23 p4047 A66-41604
Generalized system for project control and evaluation, considering cost, time, performance and reliability 23 p4152 A66-41777
Minuteman weapon system maintainability, discussing fault detection and isolation ground system, standardization, tools and system requirements 24 p4281 A66-42093
analysis 24 p4281 A66-42093
System maintainability in Back-Up Interceptor Control System /BUIC II/ using modular design of system, discussing software and failure 24 p4178 A66-42093
Reliability prediction, failure rates, fail safe design and packaging of integrated circuit and MOS-FET microminiaturized electronic equipment 24 p4179 A66-42093
Factors involved in bringing propulsor system to operational status noting engine design, development, cost, testing, etc 24 p4296 A66-42241
Reliability criteria of systems with recovery, noting mean time to failure of system and mean time of system operation between failures 24 p4217 A66-42477
Electronic system reliability prediction methods, comparing indices of new design with existing design 24 p4184 A66-42647
Reliability analysis and measurement program used by space contractor to indicate failure rates for various components and systems 24 p4217 A66-42647

- Bourdon-helix pressure-sensitive switch for aircraft vehicle hydraulic system of XB-70A aircraft and other instruments operating in severe environment 24 p4213 A66-42824
- Reliability prediction for electronic systems based on constant failure rate and MTBF /mean time between failures/ 24 p4185 A66-42866
- SYSTEM FOR NUCLEAR AUXILIARY POWER /SNAP/ PROGRAM
- SNAP-2
- SNAP-8
- SNAP-9A
- SNAP PROGRAM
- SNAP-10A
- SNAP-15
- SNAP-50
- SYSTEM LIFE
- System reliability in terms of availability and reliability function in dynamic theory category which treats behavior of system in time domain 12 p1832 A66-24072
- Redundancy as method for systems reliability, either by using two identical channels operating simultaneously or by holding one channel in reserve 12 p1832 A66-24073
- Truncation method for determining life characteristics of electronic components such as transistors and vacuum tubes before testing to destruction 12 p1833 A66-24078
- Lifetime and reliability requirements of electronic systems for projected unmanned and manned space missions 13 p2039 A66-25690
- System effectiveness through reliability prediction, reviewing fundamentals of prediction techniques including time-to-failure, variables data and physics of failure 20 p3572 A66-37952
- SYSTEM STABILITY
- Stability analysis of multiloop multirate sampled systems using identities expressing Laplace transforms of sampled signals in terms of shifted transforms of same signals sampled with smaller periods 01 p0100 A66-10018
- Interaction between Rayleigh waves in CdS-type piezoelectric crystal and charged particle beam traveling within crystal, system becoming unstable during wave resonance in beam 01 p0125 A66-10775
- Proof of Hermite-Fujiwara theorem of dynamic system stability based on Liapunov-type methods 02 p0261 A66-12158
- Stationary resonance regimes of nonlinear systems and stability 03 p0348 A66-12625
- Stability of solution to autonomous Lienard equation, using second Liapunov method 03 p0392 A66-12688
- Stability of automatic control system with nonlinear elements, obtaining quadratic equations by using Liapunov method 03 p0349 A66-12707
- Structure-borne active vibration damper and relation of passive and reactive feedback paths to system stability 03 p0373 A66-12821
- Motion stability of linear continuous systems noting influence of various forces 03 p0438 A66-13094
- Liapunov stability equilibrium for systems with infinite number of degrees of freedom, discussing stability criteria 04 p0545 A66-13558
- Book on state variables for control theory noting transfer functions, time domain, nonlinear system stability using Liapunov method, optimization, etc 04 p0504 A66-13836
- Global asymptotic stability problem for complex high order system solved by transformation into interconnected set of lower subsystems 05 p0654 A66-14608
- Boundaries of stability sector of nonlinear controlled systems with delay, deriving criterion for designing maximum boundaries 05 p0657 A66-15114
- Absolute stability of multiply connected pulse systems containing linear continuous portion, pulse elements in phase and nonlinear elements with time dependent characteristics 05 p0658 A66-15331
- Transient wave diffraction problem solution, discussing response of elastic solid to harmonic incident pulse [ASME PAPER 65-WA/AMP-16] 05 p0777 A66-15438
- Nonconservative loading on linear two-degree of freedom elastic system, discussing damping effects on equilibrium stability [ASME PAPER 65-WA/APM-17] 05 p0777 A66-15439
- Fundamental Theorem of Stability for systematic determination of practical stability regions for nonlinear systems [ASME PAPER 65-WA/AUT-19] 05 p0659 A66-15617
- Equilibrium solution stability of discrete systems represented by origin in state space studied by Liapunov functions and quadratic moments [ASME PAPER 65-WA/AUT-17] 05 p0710 A66-15619
- Describing-function method for approximate representation of stability boundaries for typical nonlinear systems [ASME PAPER 65-WA/AUT-3] 05 p0711 A66-15704
- Extension of Popov stability analysis to multilinear discrete or continuous systems 07 p1013 A66-17424
- Principle of stabilization systems design based on sequential reduction of dimensionality of phase plane of controlled variable and derivatives 07 p1013 A66-17427
- Stabilization of system containing variable-structure component characterized by linear properties and determined by amplitude and phase frequency characteristics 07 p1013 A66-17428
- Stability in small of two types of extremal systems with modulating action, using linear difference equation with periodic coefficients 07 p1013 A66-17429
- Stability domains distinguished for nonlinear discrete systems with respect to values of variables and initial conditions 07 p1080 A66-17450
- Perturbation method in theory of dynamic stability of systems with distributed parameters, discussing linear Hamiltonian equation in separable Hilbert space 07 p1056 A66-17606
- Sufficient conditions for stabilization of motion of nonstationary controlled system 07 p1016 A66-18186
- Asymptotic stability of periodic solutions of nonautonomous quasi-linear systems with two degrees of freedom 07 p1016 A66-18187
- Improving estimates of solutions of linear perturbed-motion equations of mechanical systems with variable coefficients 07 p1060 A66-18188
- Phased oscillator stability solved, using hydrodynamic approximation 08 p1266 A66-19668
- Reliability, stability and time-to-failure probability characteristics of system operating at random intervals 08 p1201 A66-19671
- Nonlinear stability elimination in long term numerical integration of motion equations required for medium-range weather forecasting 09 p1399 A66-20730
- Stability of characteristic indices of limiting solutions of linear systems 10 p1549 A66-21236
- Realignment saturation in linear servomechanism, determining structure and corrector networks leading to overall stability 10 p1517 A66-21284
- Phased oscillator stability solved, using hydrodynamic approximation 10 p1568 A66-21835
- Stability of linear time-lag systems with stochastic parameters examined, deriving sufficient condition for asymptotic stability 11 p1674 A66-22224
- Interaction between Rayleigh waves in CdS-type piezoelectric crystal and charged particle beam traveling within crystal, system becoming unstable during wave resonance in beam 11 p1749 A66-22287
- Free oscillation stability of closed-loop self-adjusting system with several parameters, noting two methods of measuring relative damping 11 p1677 A66-22760
- Stability definitions for generalized control systems 11 p1681 A66-23450
- Metastable Ti-Mo-Fe-Al beta-alloy system, discussing metal hardening, heat effects, etc 12 p1893 A66-23761
- Automatic pilot consisting of guidance system for flight trajectory control and stabilization system for angular acceleration control 12 p1909 A66-23815
- Nonconservative loading on linear two-degree of freedom elastic system, discussing damping effects on equilibrium stability [ASME PAPER 65-WA/APM-17] 12 p1961 A66-23983
- Nonholonomic couplings effect on stability of mechanical system, showing weakening from asymptotic to nonasymptotic stability 12 p1967 A66-24108
- Frequency stability requirements for space communications and tracking systems 12 p1815 A66-24131
- Short term frequency stability affecting resolution and range of Doppler radar, noting system and circuit requirements when operating under severe vibration and acoustic environment 12 p1815 A66-24133
- Stability inequality for class of nonlinear feedback systems partially answered by taking into account slope of nonlinear function 12 p1849 A66-24252
- Two theorems on Liapunov second method, discussing related automatic control system techniques and asymptotic system stability 12 p1850 A66-24264
- Stability of automatic phase control system for output generation from voltage controlled oscillator 12 p1836 A66-24305
- Algebraic and graphical methods for evaluating system stability and parameter sensitivity 12 p1854 A66-24382
- Dynamic system stability, developments, application and literature 12 p1854 A66-24636
- Optimal control and stability for stochastic systems, viewing linear diffusion models based upon Gaussian-Markov process as finite dimensional linear system driven by white noise 12 p1854 A66-24637
- Four new theorems on absolute stability of nonautonomous nonlinear control system with strongly bounded or monotonically bounded input 12 p1856 A66-24653
- Stability of systems - Discussion, IME Automatic Control Group, London, May 1964 13 p2118 A66-25580
- Mathematical methods for examining stability of linear and nonlinear systems, with survey of stability criteria 13 p2118 A66-25581
- Phase stability of system of particles in cyclic accelerator with automatic frequency correction of accelerating field, noting kinetic equation method 13 p2147 A66-25748
- Monotone feedback shift register /MFSR/, enumerating closed cycles and stable MFSRs 13 p2050 A66-26063
- Stability and sensitivity requirements considered simultaneously in control system design, minimizing time domain sensitivity index and incorporating transient response characteristics 13 p2052 A66-26073
- Sufficient conditions of stability of single-loop nonlinear feedback systems 13 p2052 A66-26074
- Stability limits of linear system of k-th order with periodic coefficients 13 p2055 A66-26340
- Stability of rectangular transversely isotropic plate hinged at three sides under uniform pressure applied to two opposite hinged sides 13 p2205 A66-26453
- Stability criteria of system with negative differential conductivity showing generation of longitudinal waves, noting amplitude buildup increment 14 p2358 A66-27085
- Approximation of optimum-control providing stability to system with memory 14 p2266 A66-27593
- Mean square asymptotic stability of linear system described by nth order equation with random coefficients 15 p2537 A66-28964
- Existence and stability theorems for almost periodic solutions of nearly Liapunov systems 15 p2527 A66-29050
- Relation between exact and approximate solutions to equations of dynamics within finite time interval, noting stability of systems with many degrees of freedom 15 p2539 A66-29146
- Dynamic system stability, control and observation, noting optimal system synthesis, application of functional analysis, Liapunov function and dynamic programming 15 p2470 A66-29149
- Stability of variable-structure control systems, noting two-stage motion in linear system stabilization and image point

impingement on switching surface 15 p2471 A66-29161

Stability of gyroscopes, gyrostabilizers and gyroscopic systems treated by methods of Liapunov and Chetaev 15 p2542 A66-29173

Behavior, properties and related concepts of control systems, noting attainability function 15 p2472 A66-29373

Prolongations and prolongational limit sets of point useful in analysis of stability and recurrence for dynamical systems 15 p2473 A66-29374

Stochastic extensions of techniques for using Liapunov second method in design and analysis of feedback controls, using differential equations 15 p2473 A66-29376

Absolute stability of multiply connected pulse systems containing linear continuous portion, pulse elements in phase and nonlinear elements with time-dependent characteristics 15 p2475 A66-29976

Explosive and nonexplosive onsets of instability by nonlinear analysis 16 p2757 A66-30152

Stability of synchronous one-frequency regime for system of nonlinear unidentical objects with one degree of freedom under action of mutual couplings 16 p2748 A66-31503

Stability of pulse-type automatic system described by matrix algebra 16 p2673 A66-31793

Behavior of self-adaptive system under external periodic action, using point transformation method 17 p2901 A66-32251

Stability analysis of linear dynamic system in form of rigid straight shaft having several stable mathematical pendulums 17 p2958 A66-32607

Amplitude maxima for nonstationary oscillations of dynamic system with multiple degrees of freedom 17 p3030 A66-32813

Sensitivity of linear and nonlinear systems to parameter variations studied by analog computer simulation 18 p3089 A66-33910

Phase characteristics and amplitude of correcting device ensuring closed loop mechanical system stability at critical frequency 18 p3092 A66-34995

System having insensitivity to variation of plant parameters, characteristics or particular elements shown as structural problem 19 p3329 A66-36026

Stability of characteristic indices of limiting solutions of linear systems 19 p3389 A66-36183

Stability limits of coupled and specially damped system subjected to parametric random excitation by white noise 19 p3401 A66-36301

Sufficient condition for stability of linearly viscoelastic continuum subjected to surface tractions following partial deformation of solid are nonconservative and associated with energy source 19 p3401 A66-36302

Liapunov second method and stability theory of autonomous and certain nonautonomous systems 19 p3391 A66-36438

Rapid parameter identification system for linear time-invariant plant with only input and output measurable 19 p3336 A66-36709

Explicit method for calculating closed-loop gains defining stability boundary and subsequent phase margin boundaries of two-loop linear feedback system 19 p3337 A66-36716

Liapunov functions for finite time stochastic stability and analysis of tracking system 19 p3338 A66-36738

Input-output stability conditions of time-varying nonlinear feedback systems obtained, using concepts of loop gain, concity and positivity 19 p3338 A66-36739

Equivalent transfer function of linear two-channel system of automatic control, discussing system stability dependence on cross links 20 p3537 A66-36891

Reliability, stability and time-to-failure probability characteristics of system operating at random intervals 20 p3538 A66-37263

Transfer matrix in calculating natural frequencies and normal modes of one-dimensional system, noting numerical stability problem in evaluating frequency determinant 21 p3823 A66-38563

Dynamical system stability examined using direct method of Liapunov, noting

application to periodic solutions 21 p3718 A66-39104

Absolute stability of distributed control system with nonlinear elements of backlash type analyzed by distributed parameters method 22 p3883 A66-39660

High speed stable system through combination of hunting-type control system without closed cycles designed for plant optimization, with recycling type controller 22 p3883 A66-39661

Human operator transfer function capability bounds and system stability characteristics and performance 22 p3858 A66-40252

Stability of nonlinear controlled systems with infinite degrees of freedom 22 p3885 A66-40692

Stability of nonlinear multivariable systems exhibiting symmetric loop transmission about nonlinear elements 22 p3885 A66-40694

Stability criteria of system with negative differential conductivity showing generation of longitudinal waves, noting amplitude buildup increment 22 p3967 A66-40841

Stability conditions for system with two degrees of freedom, considering effect of inertial and resistance forces on inertialess body 23 p4137 A66-41001

Transients and stability of idealized two-level laser system, obtaining rate equation solution, noting characterization by relaxation times 23 p4076 A66-41034

Asymmetrical nonlinear oscillations of control systems analyzed by parameter plane method, considering systems with reference-perturbing and slow-varying input signals 23 p4050 A66-41610

Periodic symmetric two-impacts-per-cycle motion of impact damper solved, determining asymptotically stable regions 24 p4216 A66-42146

System of differential equations describing stability of certain generalized processes in language of functional sets and distributions 24 p4230 A66-42214

Stability of solution obtained in first approximation, introducing concept of quantity gamma for n-dimensional systems 24 p4230 A66-42216

Equations describing stability in Liapunov sense with respect to permanently existing perturbation 24 p4230 A66-42217

Asymptotic stability of linear systems, using matrix analysis 24 p4187 A66-42375

Oscillations of nonlinear system with one degree of freedom caused by periodic force and with random variation in natural frequency 24 p4237 A66-42446

Approximation of optimum control providing stability to system with memory 24 p4189 A66-42726

Absolute stability of specific class of nonlinear pulsed automatic systems, noting error signal and amplitude modulation 24 p4189 A66-42948

Three-dimensional voltage traps for charged particles, using equilibrium equations with or without thermal agitation 24 p4245 A66-42996

SYSTEMS ANALYSIS

Operational readiness, decision-making technique for management taking into account reliability, maintainability and safety 01 p0167 A66-10051

Evaluation and future of cost effectiveness management 01 p0167 A66-10052

Weapon subsystem safety estimation by fault-tree method alone or in combination with Karnaugh maps 01 p0168 A66-10069

Stability of single-frequency solutions to quasi-linear autonomous systems with two degrees of freedom 02 p0262 A66-12175

Design stage maintainability analysis simplified by technique for evaluation and analysis of maintainability /TEAM/ [AIAA PAPER 65-733] 03 p0446 A66-12582

Auto-oscillations in relay systems discussing parameters, stability region boundaries and clearance effect 04 p0503 A66-13707

Developing, controlling and packaging approach to critical element of software schematic noting mechanical, electrical and hydraulic functions 04 p0526 A66-13798

Fatigue relaxation model for describing optimum performance of system 04 p0504 A66-13967

Time domain and frequency domain analysis of linear time invariant systems applied to radar return signal analysis 04 p0506 A66-14108

Pre-and postdetection integration noting signal to noise ratio, finite integration time, scanning radar and high speed airborne target 04 p0487 A66-14127

System requirements analysis provides orderly identification of hardware, facilities, personnel and procedures necessary for system mission success [ASME PAPER 65-WA/AV-2] 05 p0794 A66-15639

Reliability of electronic equipment needed to increase availability and reduce maintenance cost 06 p0840 A66-15953

Multicordinate systems, discussing control method development for plants with large number of correlated inputs and outputs 06 p0863 A66-16527

Optimum speed control of automatic system, noting nonlinear mechanical characteristics of slave motor and speed dependence of load moment 06 p0863 A66-16531

XB-70A systems, particularly J-39 engine, including ground aborts, in-flight shutdowns, hydraulic and fuel contamination, nozzle control difficulties, etc 07 p0986 A66-17276

Reliability of system, with recovery, consisting of n plus m elements, m elements being in redundant system 08 p1200 A66-19670

Optimization of quality control procedures in searching for faults, using mathematical models 08 p1232 A66-19767

Improvement of transient response of third order servosystems by discrete control of system parameters, noting application of switching circuit 09 p1360 A66-19859

Standard system for radar cross section error determination, noting calibration techniques, background level reduction methods, etc 10 p1504 A66-21660

Prediction and assessment of electronic equipment in early design, particularly that of mean time between failure 10 p1513 A66-21858

Electric propulsion system effective mass dependent on trajectory, vehicle parameters and thruster characteristics [AIAA PAPER 64-676] 10 p1595 A66-21936

Nonlinear filters, including system analysis optimization, realization via Volterra functionals, etc 11 p1675 A66-22630

Black box analysis from input and output and estimation of subsystem switching by combination of differential approximation, quasi-linearization and dynamic programming technique 11 p1660 A66-23186

Automata theory and control theory analytically compared for general and linear systems and tolerance automata 11 p1680 A66-23275

Parameter estimation utilizing state vector model, regression methods, asymptotic methods, etc 11 p1680 A66-23278

Lockheed multiprocessor simulation system /LOMUS I/, data processing system for computer design and analysis 12 p1827 A66-23832

Generalization of parameter plane method for case when characteristic equation coefficients are nonlinear functions of system of adjustable parameters 12 p1855 A66-24642

Equivalent circuit for cycloconverter valid for AC and DC outputs, noting data on voltage drops 12 p1804 A66-24659

Space digital computer reliability laboratory testing by failure data collection from prototype equipment 13 p2027 A66-25507

Reliability demonstration, discussing tests on antipersonnel radar system, selective identification set, quick reaction capability radar, etc 13 p2086 A66-25663

Radar range measurement accuracy shown to depend on receiver filter 13 p2023 A66-25666

Mathematical models for logistics planning providing complete analysis of requirements through computer simulation 14 p2245 A66-27122

Mathematical models of system reliability, redundancy and design optimization 14 p2227 A66-28425

auto-oscillations in relay systems, discussing parameters, stability region boundaries and clearance 15 p2469 A66-28550
 American Society for Quality Control - Conference, Los Angeles, May 15 p2505 A66-28788
 System theory - Symposium, New York, April 1965 15 p2471 A66-29367
 System theory including communications systems, filtering, feedback, optimal control, etc 15 p2472 A66-29368
 Systems analysis, discussing mathematical model formulation and control 15 p2472 A66-29369
 Generalized dynamics, concepts and problems, noting application in system theory 15 p2472 A66-29372
 System measurement and identification, considering stochastic transformation between input and output functions, noting connection with radio communication problems 15 p2473 A66-29375
 Lubricant testing system optimizing with respect to machine ability and cost [ASLE PAPER 66AM 5D2] 16 p2711 A66-30411
 System availability, noting lower confidence limit and estimation of time-to-failure and time-to-repair from test data 16 p2661 A66-30664
 Multicoordinate systems, discussing control method development for plants with large number of correlated inputs and outputs 16 p2670 A66-30837
 Cause and effect interdependence in linear system, noting distribution theory and double Laplace transform 16 p2670 A66-31024
 Statistical evolution of physical system in contact with thermostat, defining matrix associated with relaxation of system 16 p2754 A66-31206
 System analyst/model designer problems in digital simulation of large-scale system 16 p2657 A66-31246
 Design stage maintainability analysis simplified by technique for evaluation and analysis of maintainability /TEAM/ [AIAA PAPER 65-733] 16 p2683 A66-31327
 Book on systems and simulation including mathematics of simulator, random processes, industrial systems, traffic and cargo problems, etc 16 p2739 A66-31739
 Nonlinear automatic systems analyzed by reduction to first and second order systems by linear nonsingular transformation of variables 17 p2901 A66-32250
 Systems integration in helicopters, discussing design history, equipment used, operational features, etc 17 p3040 A66-32729
 Algorithm for cost effectiveness comparison of aircraft tradeoffs of performance vs cost vs time of obtainability 18 p3052 A66-34165
 Total value concepts applied in system effectiveness analysis are helping Contract Definition type contracts meet cost effectiveness requirements 18 p3268 A66-34251
 Pulse-type nonlinear automatic systems and systems with single nonlinear element 18 p3091 A66-34548
 Systems phenomena representation by time-phased sequence of complementary activities 19 p3467 A66-35398
 Independent research management 19 p3480 A66-35534
 Dynamic system parameters substituting integral equation for differential equation of motion, noting application to nonlinear, differential and PDE systems 19 p3325 A66-35987
 Sensitivity methods in control theory - International Symposium on Sensitivity Analysis, Dubrovnik, Yugoslavia, August-September 1964 19 p3326 A66-36009
 Nonlinear and nonstationary finite differential system identification by quasi-linearization and differential approximation 19 p3335 A66-36701
 Optimal self-adapting control system analysis with external actions information lacking 20 p3536 A66-36882
 Optimal control analysis of system behavior described by linear stochastic differential equations 20 p3537 A66-36893
 Self-adjusting control systems with models, reviewing basic theoretical problems of

analysis and synthesis 20 p3537 A66-36896
 System and cost effectiveness techniques applied to procurement of military operational systems, noting need for new standards for reliability input 20 p3682 A66-37183
 Instrumentation simulation, discussing data system simulator facility, noting application for telemetry and instrumentation design 20 p3542 A66-37248
 Reliability of system with recovery consisting of n plus m elements, m elements being in redundant system 20 p3538 A66-37262
 System effectiveness and achievement levels, discussing difficulties in application to mission requirements 20 p3566 A66-37885
 Systems analysis for space programs, emphasizing systematic quantitative studies of reliability and maintainability 20 p3684 A66-37910
 Variables/attributes/error/propagation /VAEP/ method of system estimation from performance parameters, using binomial analysis 20 p3568 A66-37919
 System safety definition and measurement, examining probability of control of hazards for system and cost effectiveness analyses 20 p3570 A66-37930
 System analysis as management tool, noting application in aviation 20 p3686 A66-37972
 Data acquisition and analysis for quantitative and qualitative assessment of complex space vehicle hardware 20 p3523 A66-37975
 Optimal control of variable structure system in presence of perturbation, discussing quality control and preservation of sliding plane 21 p3719 A66-39285
 Feedback compensated third-order control systems analysis, using coefficient plane reference system 23 p4051 A66-41703
 Vibrations of systems governed by nonlinear partial differential equations analyzed by perturbation method 24 p4236 A66-42267
 Book on project ERIE covering techniques for analytic evaluation of space equipment designs with respect to environments and missions required in 1975 24 p4217 A66-42572
SYSTEMS DESIGN
 Changes to improve reliability of attack aircraft, estimating cost and gains in operational effectiveness 01 p0167 A66-10049
 Evaluation of alternatives which involve risk-taking decisions under numerous uncertainties for planning and system selection 01 p0167 A66-10050
 System design for maximum reliability when gross weight of system is assigned or minimum weight when system reliability is designated 01 p0078 A66-10795
 General purpose computers for solution of problems in creative design 01 p0033 A66-10863
 Function of instruments and ancillaries of Mariner Mars science subsystem 01 p0072 A66-11111
 Functional system integration as means of displaying complex electrical and electronic systems to minimize initial design, equipment checkout and trouble shooting problems 02 p0306 A66-11637
 Standard amplifier building blocks used in systems design, stressing manufacture by silicon integrated circuit processes 02 p0203 A66-11924
 Integrated logic circuit design through breadboard, model assembly, system development, final layout, construction and testing 02 p0204 A66-11939
 Ideal energy dissipating mechanisms to synthesize weight or mass index in terms of pertinent design indices, structural efficiency and material efficiency parameters 03 p0436 A66-12753
 Synthesis of optimum discrete system for continuous information transmission, using statistical theory of estimates 04 p0482 A66-13971
 Complex signal analysis concepts indicating versatility in system design methodology and illustrating tradeoffs in performance due to parameter alteration 04 p0485 A66-14112
 Radar target of fixed geometry and statistical models 04 p0487 A66-14128
 Pitch, roll and yaw axis stability

augmentation system providing automatic failure detection of portions of system and further stability augmentation after any single failure 04 p0544 A66-14136
 Synthesis method for linear time-varying systems, discussing integral formulation and approximation functions 05 p0654 A66-14609
 Psychological research relevant to human factors engineering of man-machine systems, discussing information processing 05 p0626 A66-14616
 Book on structural synthesis of high-accuracy automatic control systems with large stable amplification 05 p0657 A66-15086
 Systems design techniques applied to laser rangefinder and imaging devices, emphasizing relation between operational requirements and laser technology 06 p0889 A66-15967
 System costs and pharmacological techniques as function of exercise program designed to maintain space crew physical fitness 07 p0999 A66-17658
 System constraint effects on mechanical design of spacecraft structures 08 p1302 A66-18737
 System designing with all-magnetic logic circuits based on resistance shift register circuit 08 p1187 A66-19101
 Optimum-in-mean controlled stochastic system design 09 p1363 A66-20749
 Feedback control design analysis using circuit determinants for active and passive elements 10 p1516 A66-21233
 Fluid dynamic behavior of system predicted by performing measurements on model of system 11 p1693 A66-23173
 System controllers for signal reproduction in noise conditions, noting limitations on regular and random components, controller optimality criterion, etc 11 p1681 A66-23341
 System effectiveness, reviewing principal factors, management technology, planning, etc, as presented by Weapon System Effectiveness Industry Advisory Committee 11 p1789 A66-23438
 Systems effectiveness and F-111, concept, cost, applicability, reliability, performance, etc, and use during F-111 aircraft development 11 p1789 A66-23440
 Systems effectiveness through design function management, noting necessity of decision guide activities 11 p1789 A66-23441
 Distinction between concept and indicator of system effectiveness, in terms of matrix algebra, reliability, operational readiness and design adequacy 11 p1789 A66-23442
 Maintenance and logistic support of present and future missile and space systems described in terms of parameters 11 p1789 A66-23443
 System effectiveness, integration of quality control, reliability and value engineering with development, production and maintenance 11 p1790 A66-23444
 Human factors and system effectiveness, noting role of customer project officer, contractor engineering manager and human factor specialist 11 p1790 A66-23445
 Past and future of cost effectiveness, noting actions needed to implement growth 11 p1790 A66-23446
 Systems design of automatic dynamic control for piloted aircraft, discussing stability, accuracy, response and behavior to external perturbations 12 p1803 A66-24090
 Properties helping design of linear sampled data systems containing periodically time-varying components like parametric amplifiers 12 p1848 A66-24139
 Automatic control, systems science, cybernetics, biomedical engineering, human factors - IEEE International Convention, New York, March 1966 12 p1854 A66-24634
 Parametric analysis, penalty-effectiveness tradeoff and system selection for communications satellites, using block digital computer synthesis with subroutines for operational requirements [AIAA PAPER 66-330] 12 p1824 A66-24797
 Design of system analyzing operating conditions of jet engine up to overhaul, recording regime of engine revolutions, exhaust gas temperatures, accelerations, etc 13 p2076 A66-25078
 System design technique for extraterrestrial vehicles which maximizes effectiveness of complex system operating

in partially defined environment 13 p2057 A66-25247

Test system design, discussing operative systems and equipment for Sea Vixen radar and Seaslug Mark I missile 13 p2058 A66-25698

Accuracy of test device determining conductivity of semiconductor materials increased by using error calculation and design systematology 13 p2085 A66-26761

Spacecraft communications system design steps, discussing radiation pattern coverage, tradeoff, operating frequencies, signal strength, etc 14 p2244 A66-28403

Quality system analysis, determining structural soundness, requirements and functional relationship of components 15 p2507 A66-28794

Application of escape probability concept to systems development for quality control, noting minimization of system failure 15 p2508 A66-28812

Weapon system design, noting variables for manning and skill requirements, parameters of operational readiness, etc 15 p2618 A66-28813

Circuit selection and analysis of model reference nonscanning adaptive system for rapid response controlled plant 15 p2476 A66-29992

Synthesis problem of optimum dynamic characteristics of multivariate linear control systems with random input signals 16 p2668 A66-30752

Analytical design method for synthesis of feedback controller for multivariable linear control systems, considering transfer function 16 p2671 A66-31111

Digital differential analyzer for on-line studies of dynamic systems 16 p2657 A66-31245

Human and man/system requirements to provide criteria for choosing alternative mission and lunar surface roving vehicles design concepts 17 p2903 A66-32170

Modern control theory applied to system design for reduction of sensitivity of system to plant-parameter variation by use of feedback 17 p2901 A66-32290

Water management system design for long duration manned space flights emphasizing hardware, flow diagram, operation and control rather than component design or selection [AICE PREPRINT 54B] 17 p2867 A66-32669

Flight control system design for high performance aircraft, particularly longitudinal transient response handling qualities 19 p3278 A66-35509

System design analysis of laser methods of deep space communication, examining local heterodyne system /LHS/, direct detection system /DDS/ and transmitted reference system 19 p3300 A66-35666

Extended sensitivity design concept for achieving compensation to plant parameter variations 19 p3328 A66-36022

Optimum design of piecewise-linear switching functions for linear, constant, lumped systems with single ideal relay controller 19 p3336 A66-36708

Ordinary differential equations experimentally determined for describing performance of existing lumped-parameter time-invariant nonlinear physical systems 19 p3392 A66-36710

Design synthesis of adaptive control system for linear discrete plants with time varying parameters, noisy measurements and statistical and deterministic disturbances 19 p3337 A66-36711

Pattern recognition techniques applied to process identification, examining capability of mode learning machines for on-line identification of both linear and nonlinear processes 19 p3310 A66-36712

Parameter optimization using steepest descent approximation for systems subject to worst bounded disturbance in order to provide performance index minimization 19 p3337 A66-36713

Sampled data nonlinear system design for three axes acceleration measurement, noting effect of limit cycle trajectory and parameter choice on system velocity output error 19 p3361 A66-36715

Systems design noting integration off all separate system-oriented

activities 20 p3682 A66-37184

System effectiveness, Volume 5 - Reliability and Maintainability Conference, New York, July 1966 20 p3563 A66-37879

Product performance model for predicting system effectiveness satisfying restrictions on time, money and input data 20 p3566 A66-37884

Reliability consideration effect on solar-powered electric-propulsion system design 20 p3568 A66-37908

Failure mode and effect analysis /FMEA/ application to each stage of system design and development oriented reliability program 20 p3568 A66-37915

Identifying critical elements /parts and components/ as criteria for system design tradeoff at system and circuit levels 20 p3568 A66-37916

XB-70A reliability program applied to initial system design stage from inception to present flight test program 20 p3568 A66-37917

Management planning and profit and loss in systems design 20 p3685 A66-37918

Graphical method for trading off systems reliability against systems maintainability in designing system simple to maintain and repair 20 p3569 A66-37925

Reliability specifications in system design and evaluation 20 p3571 A66-37938

Prediction of avionic equipment reliability in early design stage, noting equations for line replaceable unit /LRU/, classification, regression techniques, etc 20 p3573 A66-37953

Aircraft, missile and space launch systems, considering in-flight transportation and separate and multiple orbital missions [AIAA PAPER 65-344] 20 p3664 A66-38150

Design of integrating and position servomechanisms having tachometer-generator feedback, noting role of inertial moments effect 20 p3540 A66-38444

Guidance and control - AIAA/JACC Conference, Seattle, August 1966 21 p3761 A66-38838

Pulse amplitude/code modulation /PACM/ system design noting word format, synchronization methods, carrier, etc 21 p3706 A66-39481

Signal systems design approach to problems of communication and radar systems, discussing channel and constraint modeling, data processor performance and signal optimization 22 p3688 A66-40720

Electronic reliability - IEEE Conference, New York, May 1966 24 p4178 A66-42087

Maintainability impact on redundant system design of phased array radar, presenting Monte Carlo technique for assessing availability of array portion 24 p4178 A66-42091

System maintainability in Back-Up Interceptor Control System /BUIC II/ using modular design of system, discussing software and failure 24 p4178 A66-42093

Systems design and packaging with integrated circuits, discussing proper circuit selection guidelines and parameters 24 p4182 A66-42499

Electronic system reliability prediction methods, comparing indices of new design with existing design 24 p4184 A66-42647

Reliability analysis and measurement program used by space contractor to indicate failure rates for various components and systems 24 p4217 A66-42648

SYSTEMS ENGINEERING

System safety engineering plan /SSEP/ for achieving total safety program 01 p0076 A66-10068

System engineering methodologies to show how prediction of human error leads to higher system performance reliabilities 01 p0019 A66-10117

Book on systems engineering problems and tools for solution noting energy, materials, modeling, simulation, computers, control, statistics, signals, etc 02 p0307 A66-12280

Systems engineering, historical evolution, modern day concept and application [ASME PAPER 65-WA/AV-1] 05 p0794 A66-15640

Methodology of systems effectiveness based on reliability, maintainability, value, safety and human engineering disciplines 11 p1789 A66-23436

Laboratory payload concept of automated laboratories for planetary exploration, noting systems engineering advantages 13 p2179 A66-25237

Management of large physical systems, detailing characteristics of mission planning for Mars exploration including process optimization, computer programming, systems engineering, etc 13 p2179 A66-25238

System engineering techniques applied to analysis of spacecraft sterilization objectives and available technology 13 p2012 A66-25268

Planning, design and evaluation of systems tests, using Shannon information theory 13 p2057 A66-25283

Circuit and system theory - Allerton Conference, University of Illinois, October 1965 13 p2049 A66-26057

Value engineering and configuration management in management network for system compatibility and mission success at lowest cost 14 p2417 A66-28436

Tradeoff for high reliability program, discussing development of satellite equipment for Telescope project 15 p2507 A66-28796

Process of troubleshooting analyzed, noting symptom recognition, defect recording and classification remedial action, cause determination, corrective action and follow-up 15 p2507 A66-28801

Pearson universal random distribution generator, noting analysis of randomly chosen variables for unimodal underlying distribution 15 p2526 A66-28808

System engineering model formulation and evaluation, citing as examples X-15 aircraft and Manhattan automobile traffic control systems problems 15 p2619 A66-29381

Selection, flow and transference of technology in large electronics aerospace firm, noting methodology, planning, market area selection, etc 16 p2830 A66-30400

Failure mode and effect analysis /FMEA/ application to each stage of system design and development oriented reliability program 20 p3568 A66-37915

System effectiveness in manned space program through correct management decisions 20 p3687 A66-37974

Optimum use of microelectronic reliability data in system development, discussing relation to sources 24 p4179 A66-42099

Optimization of aircraft performance, pilot performance and mission completion [ICAS PAPER 66-4] 24 p4159 A66-42492

T

T TAIL SURFACE

Wind tunnel research of deep stall aerodynamic characteristics of T tail analyzed as preliminary design guide [AIAA PAPER 65-737] 03 p0317 A66-12547

T tail aircraft in deep stall conditions in fixed-base cockpit simulation at large angle of attack [AIAA PAPER 65-781] 03 p0322 A66-13068

Deep-stall characteristics of T-tailed aircraft configurations and recovery procedures, noting parameters of pitch-up, angle of attack, etc [AIAA PAPER 66-13] 07 p0989 A66-18446

Stress concentration in T tails of turbine blades by photoelasticity and photo creep 12 p1966 A66-24064

Wind tunnel research of deep stall aerodynamic characteristics of T tail analyzed as preliminary design guide [AIAA PAPER 65-737] 19 p3280 A66-36491

Irreversible trimmed stalls at high angles of attack for aircraft with aft-mounted engine nacelles and high-or T-tails 20 p3496 A66-38255

T-34 AIRCRAFT

Stall prevention device for Beechcraft T-34B aircraft equipped with stall warning wing device 17 p2843 A66-32190

T-38 AIRCRAFT

F-5/T-38 design philosophy to meet rigorous operational and maintenance requirements 01 p0010 A66-10094

T-39 AIRCRAFT

North American Sabreliner laminate windshield for bird-proofing pilot compartment

Takeoff load distribution predetermination
for commercial transport craft based on
appropriate weight ratios 12 p1800 A66-23784
- TAKEOFF AND LANDING**
SA AIRCRAFT LANDING
XC-142A tri-service V/STOL aircraft
specifications, considering control and
transmission systems and flight test
results 03 p0321 A66-12889
Dynamic response of supersonic transports
to runway unevenness during takeoff or
landing 09 p1330 A66-20692
Airborne camera system used to obtain
roll, pitch and heading angles for aircraft
during takeoff and landing
[AIAA PAPER 65-210] 09 p1330 A66-20744
Radio augmented and calibrated inertial
navigation equipment and
operation 10 p1554 A66-21898
DC-9 Douglas short-and medium-range air
transport, discussing takeoff field length,
fuel capacity, payload and landing-field
length 12 p1800 A66-23754
Static and dynamic forces against
pneumatic tire used to predict off-runway
takeoff and landing performance
[AIAA PAPER 66-328] 16 p2634 A66-31320
Wind shear problems in terminal
operations, considering effects on aircraft as
longitudinal and lateral
components 17 p2843 A66-32202
Military STOL and conventional civil
aircraft behavior on rudimentary
airstrips 18 p3051 A66-33686
Nonlinear control laws for takeoff and
landing of circular-orbit winged glide space
vehicle 18 p3132 A66-33880
Flight safety in Soviet civil aviation
including takeoff and landing, cruising in
airport vicinity, meteorology and
medicine 20 p3494 A66-36991
Takeoff and landings by periscope under
various flight conditions, noting effect of
variations in image
magnification 22 p3946 A66-40859
- TAKEOFF RUN**
Formula for determining takeoff distance
of aircraft, taking into account lifting force,
air and motion resistance and transition to
larger angle of attack 11 p1637 A66-22849
- TAKEOFF SYSTEM**
Initial conditions determination in aircraft
takeoff from mobile platform required for
solution of differential equations of motions
of gravity center 11 p1734 A66-23345
Derivative-expansion method of first-order
asymptotic expansion of takeoff of satellite
from circular orbit by small thrust inclined
at finite angle to radius vector
[AIAA PAPER 65-688] 19 p3462 A66-35894
- TALON AIRCRAFT**
S T-38 AIRCRAFT
TANDEM-ROTOR HELICOPTER
Unsteady aerodynamics of tandem rotor
operating in vortex ring
state 17 p2840 A66-32744
- TANDEM WING**
Tandem interference effects of
supercavitating struts within framework of
two-dimensional inviscid irrotational and
linearized hydrodynamic
theory 01 p0057 A66-10443
- TANK**
S CYLINDRICAL TANK
S FUEL TANK
S PROPELLANT TANK
S STORAGE TANK
S WING TANK
TANK GEOMETRY
Shape and stability of liquid-gas interface
in annular tank in force field determined by
numerical integration of boundary value
problem and eigenvalue
[AIAA PAPER 66-425] 16 p2689 A66-31488
- TANTALUM**
Tantalum extraction and technology
including properties, machining, cladding
and welding, noting chemical plant
application 02 p0244 A66-11737
Three-stage hardening in tantalum single
crystals deformed in tension over limited
range of orientations, temperatures and
strain rates 02 p0246 A66-12194
Liquid element tantalum diode
characteristics 03 p0345 A66-13103
Vacuum diffusion welding of zirconium,
niobium and tantalum carbides to high-
- melting niobium, tantalum, molybdenum and
tungsten 06 p0887 A66-16696
Binding energy between oxygen atom and
dislocation in tantalum by measuring critical
temperature at which discontinuous yield
disappears on heating 07 p1052 A66-18514
Effect of voltage and film thickness on
sputtered tantalum film resistivity when
used as microcircuits 09 p1411 A66-19941
Anomalous densities of states in normal
tantalum and niobium 09 p1417 A66-20029
Thermal expansion of tungsten and
tantalum in high temperature
range 09 p1388 A66-20147
Oxygen content effect on recovery of cold
worked tantalum investigated by measuring
Snoek damping, electric resistivity and
dynamic E modulus 11 p1717 A66-22997
High remelt temperature brazing of Ta-
10W honeycomb structures by brazing with
pure titanium, using diffusion sink
concept 13 p2109 A66-25774
Secondary emission of excited cesium
atoms during bombardment of molybdenum
and tantalum by fast cesium
ions 14 p2338 A66-28248
Oxidation of powdered titanium, zirconium,
hafnium, vanadium, niobium and
tantalum 16 p2724 A66-31355
Tantalum and niobium powder properties
effect on plastic characteristics of
compacted samples, noting ductility and
tensile strength dependence on particle size
and chemical composition 17 p2939 A66-32391
Technique for formation of thin tantalum
film resistors on silicon integrated
circuits 17 p2887 A66-32699
Solubility curve of tantalum in nickel,
determining cause of resistance anomalies
observed in nickel-tantalum
systems 17 p2940 A66-32968
Embrittlement of tantalum by room
temperature deformation in presence of
hydrogen 17 p2941 A66-33441
Elastic relaxation effect due to diffusion of
interstitial hydrogen in tantalum and
niobium 18 p3123 A66-34058
High temperature combustion of tantalum
and molybdenum in oxygen gas compared
with experiments in carbon dioxide, water,
argon and mixtures of these
gases 18 p3264 A66-34426
Oxidation-resistant silicide
thermoprotective coatings for tantalum and
tantalum-based alloys 19 p3384 A66-36146
Electrical and thermal conductivity and
integral degree of blackness of tantalum at
temperatures above 1000 degrees
C 20 p3582 A66-36977
Substrate properties effect on processing
and reliability of tantalum thin film circuits
[ACS PAPER 2-S5-65] 21 p3710 A66-38678
Thermal expansion of tungsten and
tantalum in high temperature
range 21 p3753 A66-39418
Sputtering voltage and current effects on
resistivity of films sputtered from pure
tantalum appear to be traceable to pressure
and growth rate 24 p4251 A66-42297
Carbon solubility in Ta, Nb and V at
temperatures from 1500 degrees C to
eutectic temperatures 24 p4228 A66-43062
- TANTALUM ALLOY**
Oxidation kinetics of tantalum-iron and
tantalum-cobalt alloys and iron and cobalt at
500-900 degrees C 04 p0535 A66-13696
Ultrahigh-vacuum creep behavior of
columbium and tantalum alloys at high
temperature and over long
period 06 p0894 A66-18069
Yttrium effect on recrystallization and
grain growth of tantalum 07 p1052 A66-18350
Feasibility of using columbium alloy B-66
and Ta-10W as regeneratively cooled nozzle
materials in hydrogen fuel
engine 10 p1547 A66-21782
Columbium and tantalum alloy tubing
production for space power systems
including extruding, rocking, annealing, flow
diagram, etc 12 p1893 A66-23627
Segregation by controlled solidification of
small quantities of dissolved tantalum in
niobium, using titanium as third component
in ternary alloy 12 p1897 A66-24917
High temperature oxidation-resistant
hafnium tantalum alloys, noting phase
composition 14 p2315 A66-27501
Cleavage behavior of solid solution alloy

Ta-Mo, noting electric resistivity, tensile properties, lattice parameters, diffraction coefficients, etc 15 p2520 A66-28650

Structure, bending strength, impact toughness and hardness of Wc-TaC-Co alloys with various proportions of components 16 p2724 A66-31234

Work function of solid solutions of tungsten with molybdenum and tantalum explained by surface adsorption effects 16 p2728 A66-31772

Fabrication process for turning cast Ch-10W-10Ta alloy ingots into large-diameter rings by forging and ring rolling 19 p3366 A66-36111

Brazed lap joints between stainless steel and tantalum or Ta-10W alloy obtained with pure copper or silver-copper-base brazing alloys 19 p3367 A66-36112

Weldability of nearly 100 tantalum binary or ternary solid solution alloys and dispersion-strengthened alloys, using room temperature bend ductility as criterion 19 p3368 A66-36125

Protective coatings for titanium and tantalum refractory alloy brazing envelopes, offering ephemeral protection from oxidation at ultrahigh temperatures 19 p3384 A66-36143

Oxidation-resistant silicide thermoprotective coatings for tantalum and tantalum-based alloys 19 p3384 A66-36146

Thermoprotective coating for high temperature tantalum alloy 19 p3384 A66-36147

Niobium addition effect on solid state transformations in vanadium-tantalum alloys 19 p3387 A66-36452

Superconductivity of Ta-Ti solid solution alloy wires subject to steady magnetic high field 22 p3960 A66-39782

Dislocation arrangement and twin fault formation by quenching and tempering in titanium-tantalum alloy investigated by internal friction measurement and microscopy 24 p4228 A66-42511

TANTALUM CARBIDE

Effect of tantalum carbide additions on mechanical, thermal and chemical properties of WC-TiC-Co alloys 08 p1239 A66-18902

Refractory properties and resistance to thermal shock of sintered tantalum carbide impregnated with copper or silver at high temperature [ONERA TP 323] 11 p1718 A66-23201

Zeta phase in tantalum-carbon system, noting diffusionless transformation of carbon-deficient lattice under compressive stress 12 p1892 A66-23566

Work function for thermionic emission of TaC and ZrC refractory metal carbides in vacuum and in cesium vapor 12 p1922 A66-24220

Electric conductivity of beta and gamma phases of tantalum-carbon system as affected by temperature and composition 19 p3386 A66-36424

Electric and magnetic properties in TaC systems and dependency on C-to-Ta ratio 22 p3934 A66-40091

TANTALUM COMPOUND

Variations of transition temperature and long-range order parameter of tantalum-tin compounds studied as functions of sintering time and temperature 02 p0271 A66-11441

Simple active filters using tantalum thin film technology 02 p0202 A66-11919

Interaction of vanadium, niobium and tantalum diborides with carbon 07 p1049 A66-17904

Superconductivity variation in tantalum noting dependence of critical current, transition temperature and magnetic field on impurity concentration 12 p1927 A66-23856

Electro-optic effect and elastic wave propagation in single-domain ferroelectric lithium tantalate 13 p2170 A66-26589

Anodic oxide film growth on sputtered tantalum films in dilute sulfuric acid, noting ionic conductivity, dielectric constant and optical properties 15 p2562 A66-28718

Internal friction as function of temperature in cold worked tantalum and niobium containing oxygen and nitrogen 19 p3387 A66-36729

Interaction of vanadium, niobium and tantalum diborides with carbon 21 p3752 A66-39404

TANTALUM OXIDE

Electron diffraction study of structural defects in cubic phases in epitaxial tantalum oxide thin films 15 p2557 A66-28560

Suboxides of tantalum, examining formation, stability, structure and properties 16 p2722 A66-30221

Transient charge and discharge currents in tantalum oxide with anodic electrolyte and tantalum oxide with anodic metal 19 p3448 A66-36754

Humidity effect on ferroelectric properties of barium titanate with tantalum oxide admixture, noting growth of dielectric constant and crystal polarization 20 p3617 A66-37553

Electron diffraction study of structural defects in cubic phases in epitaxial tantalum oxide thin films 23 p4112 A66-41281

Origin and identity of oxide platelets observed in tantalum sheet and ribbon after oxidation and quenching 24 p4228 A66-42615

TAPE**S MAGNETIC TAPE****TAPE RECORDER****SA MAGNETIC TAPE RECORDER**

Tape recorders of flight parameters, tabulating characteristics of ten instruments 01 p0071 A66-11072

Tape recording meteor diffraction characteristics from three stations by measuring velocities and orbits of individual meteors by radio 07 p1032 A66-17637

Spacecraft tape recorders, noting necessary characteristics for applicability 11 p1706 A66-22956

Gemini Voice Recording System, MRS 200 for voice-time tape recording during manned space flights 13 p2081 A66-26025

Properties of metallic recording media in terms of physical properties of medium and geometrical dimensions of recording system 13 p2082 A66-26295

Performance testing, evaluation and system specification of broadband predetection recording instruments 14 p2298 A66-28430

Dynamic spectrum of geomagnetic pulsations at low latitude studied by magnetic tape recording 15 p2484 A66-28904

Aerospace tape recorder characteristics of 70 models from 20 manufacturers 15 p2502 A66-29359

Continuous loop magnetic tape recorders used in Vanguard, Tiros and Nimbus satellites 15 p2502 A66-29360

Ampex tape recorders 1600 and 1800 series, design and performance 15 p2503 A66-29769

Data recording and telemetry system for sounding rocket, noting operation and testing results 19 p3307 A66-35680

Strain gauge signal recording accuracy on stereophonic tape recorder 24 p4214 A66-43014

TAPERED COLUMN

Bending characteristics of tapered cylindrical shells, discussing edge and internal influence coefficients 18 p3253 A66-33806

TAPERED WING

Average pressure and skin friction on slender two-dimensional wings in hypersonic flow, taking into account displacement effects of boundary layer 18 p3048 A66-33823

TAPERING

Optimum study of anticlastic deformations of elastic strips with tapered edges, using Newton-Raphson iteration method 11 p1780 A66-22328

TARGET**SA RADAR TARGET**

Gated laser night-viewing system, calculating apparent illuminance as function of target distance 20 p3511 A66-36938

Bistatic radar method for determination of permeability and permittivity of material for smooth spherical target 22 p3863 A66-39941

TARGET ACQUISITION

Two-axis pedestal tracking limitations in station vicinity such as angular acceleration, velocity and reacquisition capability [ASME PAPER 65-WA-MD-17] 05 p0635 A66-15522

Multichannel radar detection of nonmoving target with variable resolving power 06 p0836 A66-17179

Visual aid in detection, recognition and acquisition of targets at different altitudes

and speeds 07 p0998 A66-17288

Minimum dispersion of estimate of angular coordinate of target fluctuating in unison with pulse scanning radar 07 p1001 A66-17358

Ballistic missile defense and national security, discussing defense system requirements, strategy types, etc 08 p1322 A66-18560

Unaided visual detection of target satellite for rendezvous purposes, discussing intensity and angular velocity in star field 08 p1176 A66-18815

Cross correlation radar system for mapping of target distribution 12 p1813 A66-23789

Near-real time acquisition of aerial reconnaissance radar imagery from continuously moving and static displays 12 p1808 A66-23921

Detection and false alarm probabilities for number of sinusoidal pulses in Gaussian noise subjected to amplitude limiting of arbitrary hardness 12 p1820 A66-24649

Probability of detection of smooth satellite-launched aluminum spheres, noting orbital parameters, microwave radar efficiency, etc 14 p2391 A66-27039

Optimal system determined from maximum probability criteria of target hitting 17 p2901 A66-32571

Multichannel radar detection of nonmoving target with variable resolving power 19 p3297 A66-35537

Resolution of multiple target ambiguities in twin-channel frequency-modulated continuous wave radar system using fixed antenna 20 p3596 A66-37218

Systems design analysis of lunar survey viewfinder /LSV/ consisting of pointing and tracking telescope for high-resolution lunar surface survey 20 p3558 A66-37225

Image intensifier application as aid to visual acquisition of weak luminous moving targets against night sky 23 p4071 A66-41676

TARGET AIRCRAFT

McCulloch Model 4318 Drone Target Aircraft Engine for maintainability, reliability, moderate cost and high power-to-weight ratio 01 p0129 A66-10091

Firebee II supersonic jet target drone, power plant performance capabilities, instrumentation and possible modifications after flight tests 24 p4160 A66-42894

TARGET PENETRATION

SA PROJECTILE PENETRATION

Hypervelocity impact force per crater surface area correlated to stress-to-fracture of target, experimenting with aluminum and copper as targets and projectiles 01 p0154 A66-10496

Hypervelocity crater depth and target strength 03 p0437 A66-12802

Cratering in materials analysis, considering transient, primary, secondary and recovery phases, using rod projectiles at high velocity impact 15 p2607 A66-28702

Munroe jet formation when small cavity or bubble in liquid is subjected to impact or shock 20 p3546 A66-37804

Penetration parameters of individual targets of different materials, examining impulse due to perforation, penetration hole diameter and front and back dispersion angles 20 p3672 A66-38115

Penetration resistance of fiberglass-reinforced plastics against small-caliber projectiles noting relations between energy loss, stopping power and plate thickness 22 p3938 A66-40433

Strength factor expressed as empirical penetration equation for impact target, combining effects of resistance to penetration and strain hardening 23 p4140 A66-41918

TARGET RECOGNITION

Statistical performance of energy and heterodyne detection techniques in pulsed-optical radar compared for target detection capability 02 p0240 A66-11456

Tactical air target sensors include conventional and multispectrum photography, side-looking radar, IR line scanner, UV line scanner, laser scanner, low-light-level TV, electronic ferret and biological sensors 04 p0458 A66-13924

Statistical methods used in estimation of target parameters on basis of signal transmitted radar pulse 04 p0485 A66-14114

Radar target detection analysis in presence

- thermal noise 04 p0487 A66-14129
- Information matrices for estimating range parameters of moving targets obtained by combining a priori information with reflected radar signals with additive white Gaussian noise 08 p1180 A66-18711
- Linear perturbation theory computation of target errors in lunar impact trajectories due to random injection
- Errors 08 p1289 A66-18828
- Effect of altitude and camera field-of-view on various degrees of geographic orientation and error in target position, using TV data 08 p1225 A66-19531
- Recognition of target on TV display as affected by target shape-smear and background clutter 08 p1226 A66-19532
- Radar separation of closely spaced aircraft fire-control weapon system 10 p1553 A66-21268
- Object identification system using multiple observations of scattering matrix, noting noise magnitude role in recognition 10 p1503 A66-21640
- Radar cross sections of ducks and chickens vertical polarization and 400 Mc 10 p1503 A66-21647
- Probabilities of detection for fluctuating radar targets 10 p1506 A66-22051
- Digital detector for automatic radar target identification, noting design, construction and operation 11 p1654 A66-22655
- Decreased flying ability of pilots in simulated low altitude high speed flight from 0.4 to 0.9 Mach 12 p1809 A66-23928
- Automatic target recognition, discussing machine analysis problems of aerial reconnaissance data 13 p2124 A66-25657
- IR trackers, discussing method of operation, performance characteristics and application 13 p2025 A66-25983
- Scintillating target intensity effect on performance of PPM optical tracker used as error sensor in various guidance systems 13 p2125 A66-25985
- Target recognition performance, examining relative effect of size and smear or blur of display 17 p2864 A66-32155
- Stability of automatic systems for tracking point targets, noting nonlinear dependence of signals on channel mismatch and its limiting values 17 p2902 A66-32579
- Low altitude-high speed flight simulation experiment in air-to-ground target recognition via closed-circuit TV, determining effects of camera view field and target size 17 p2927 A66-33450
- Measurement of various target signatures on radar performance prediction, using transfer function of target 18 p3070 A66-34258
- Target identification by processing outputs from widely spaced elements of large antenna array to form microwave imaging 18 p3071 A66-34308
- Relation between size of visual fields of observers and time required to locate targets on static displays, presenting equations determining search time 21 p3701 A66-39421
- Human performance analysis based on two criteria, zero and 100 percent legibility of moving targets consisting of black alphanumeric symbols, finding mean angular velocities 21 p3701 A66-39423
- Telescopic magnification and observation time effect on target identification in simulated orbital reconnaissance 21 p3701 A66-39424
- Target conspicuity for predicting level of search performance as function of spatial and temporal variables 22 p3859 A66-40862
- TARGET SIMULATION**
- Collector target complex eliminating target life time and test equipment contamination by sputtered target material, applied in testing of electrical propulsion systems [AIAA PAPER 66-500] 17 p2991 A66-32774
- TARGET THICKNESS**
- Optical ray tracing to predict focusing characteristics of laser light in refractive targets, calculating heating effects in target, noting target geometry, refractive index, thickness of skin layers, etc 13 p2090 A66-25531
- Electrons from linear accelerator directed in collimated beam at normal incidence upon thick targets of various materials, obtaining energy spectra of retrofugal electrons 13 p2136 A66-26280
- TARGET RATE**
- Stimulated Brillouin scattering in ferroelectric triglycine sulphate crystals and Rochelle salt exhibiting second-order phase transition, measuring scattering threshold as temperature function 20 p3620 A66-37770
- TASK**
- SA AUDITORY TASK**
- SA VISUAL TASK**
- Helicopter pilot proficiency based on performance of 151 tasks in primary and basic training phases 12 p1809 A66-23930
- TASK COMPLEXITY**
- Reliability estimation procedure combines task ratings with empirically based data in derivation of regression equation 01 p0018 A66-10076
- Task loading effect on pilot performance in computer simulated low altitude high speed flight 02 p0187 A66-11829
- Planning European space projects in industry 06 p0973 A66-16497
- Total simulation system mass effect on certain human force outputs in tractionless environments 13 p3293 A66-36243
- Psychomotor test equipment, describing Two-hand Device, Reaction Sensing Device and Rudder Control Test 23 p4029 A66-41042
- TAU STAR**
- Soviet radio telescope observation /1964/ of 3.3 and 0.8-cm radio emission sources from Tau-A, 3C 84, 3C 273 and 3C 279 05 p0759 A66-14872
- TAUTOMER**
- Spectroscopic analysis of isotope shift between tetraborane /10/ and pentaborane /11/ 15 p2446 A66-29236
- TAXIING**
- Landing run and taxiing problems in very low visibility 17 p2952 A66-33206
- Aircraft taxi loads, discussing runway transfer function, random profiles, analog mathematical model, analog taxi simulation program and peak count [AIAA PAPER 66-469] 18 p3050 A66-33652
- TAYLOR INSTABILITY**
- Rayleigh-Taylor instabilities of z-pinch discharge during contraction process solved by use of snowplow model for initial phase of z-pinch 04 p0557 A66-14429
- Rotating fluid sphere, discussing power law for dependence of Rayleigh number on Taylor number 04 p0599 A66-14471
- Taylor relation between velocity partial time and space derivatives in high Reynolds number turbulent shear flow 10 p1522 A66-21467
- Taylor stability of liquid film on body surface and flow stabilization relative to two-dimensional perturbations 12 p1863 A66-24434
- Small gap equations for Couette flow stability considering nonaxisymmetric disturbances, solving eigenvalue problem and noting role in instability of Taylor vortices 12 p1866 A66-24946
- Stabilization of drift instability in traps with magnetic field increasing toward plasma boundary, taking into account Taylor instabilities 13 p2139 A66-25335
- Taylor-Helmholtz instability between liquid of constant shear and vacuum 13 p2068 A66-26682
- Rayleigh-Taylor nonconfined and Kelvin-Helmholtz confined interchange instabilities obtained from nonlinear computer models 17 p2967 A66-32434
- Spiral flow stability of idealized viscoelastic liquid between two rotating concentric cylinders with axial pressure gradient 17 p2914 A66-33171
- Stabilizing effect of vertical uniform magnetic field on Rayleigh-Taylor instability for electrolyte solutions 20 p3608 A66-37458
- Stabilization of drift instability in traps with magnetic field increasing toward plasma boundary, taking into account Taylor instabilities 22 p3952 A66-39712
- Rayleigh-Taylor instability of plasma is unaffected by inclusion of Hall current and electron-inertia terms in generalized Ohm law 22 p3956 A66-40420
- Taylor stability of time-dependent flow between two concentric circular cylinders, noting solution of differential equations for perturbations by Galerkin method 22 p3902 A66-40706
- Taylor vortices growth and instability using mathematical model 23 p4062 A66-42045
- TAYLOR THEOREM**
- Experimental analysis of Taylor columns likely to bear on processes occurring in Jupiter atmosphere 17 p3006 A66-33013
- Coefficients of Taylor expansion of correlation function in various velocities defined to describe space-time behavior 21 p3770 A66-38749
- TCG**
- S TRANSPONDER CONTROL GROUP /TCG/**

- Devitrification of glass around collapsed bubbles in tektites, noting formation mechanism 11 p1773 A66-22962
- Comparison of cratering on Earth and Moon, resulting from high velocity impact of solid objects upon planetary masses 12 p1949 A66-24199
- Aerodynamic analysis of vapor pressure of tektite glass and bearing on atmosphere entry trajectories of tektites 12 p1952 A66-24895
- Rubidium-strontium isotopic study of five types of glass from Bosumtwi crater in Ghana and Ivory Coast tektites 14 p2284 A66-27602
- Tektites, approximate age and probable lunar origin 14 p2383 A66-27823
- Terrestrial origin of tektites, noting possible connection with cometary collision and evidence of lunar origin for some 16 p2802 A66-30926
- Tektites origin and formation, noting chemical composition, age, properties, silica glasses, meteoritic craters, etc 16 p2806 A66-31743
- Major element analysis of chemical

composition of Georgia tektite 17 p3004 A66-32931
 Meteorite impact and ejection mechanism of tektites, examining large distances traveled by tektites 17 p3007 A66-33283
 Australites, external form and structure, describing specific gravity value variation with size, effect of aerodynamic heating upon atmospheric entry, etc 17 p3007 A66-33288
 Fluid mechanical analysis of tektite origin, based on hypothesis of material ejection from Earth surface in liquid jet form upon meteoritic impact 18 p3227 A66-33694
 Moldavites and Indoaustralian tektites, comparison of size, surface sculpture and origin of various specimens 18 p3238 A66-35233
 Glassy spherules found in precipitate of melted ice in Antarctica may be cosmic dust particles /microtektites/ 19 p3465 A66-36389
 Origin of tektites with Moon considered most likely extraterrestrial source 20 p3656 A66-38059

TELECOMMUNICATION

Mariner Mars telecommunications system using PCM/PSK/PM modulation-demodulation in combination with pseudorandom sync codes 03 p0335 A66-12905
 Radio, telemetry and command subsystems of Mariner Mars 1964 telecommunications system 04 p0479 A66-13604
 Radar, telecommunication devices, antiraid equipment and computers for air defense system 04 p0494 A66-13693
 Feedback control system in design of delta-modulation data transmission system 05 p0654 A66-14610
 Telecommunications satellite developments and prospects, discussing salient characteristics and traffic requirements 06 p0960 A66-16954
 Synchronism between transmitting and receiving terminal of transmission systems, particularly single channel systems, using code pulse modulation 09 p1346 A66-20546
 Telecommunication of satellite and rocket data, noting channel errors, coding systems, secrecy, etc 09 p1346 A66-20549
 Gridistor, semiconductor device with form of field-effect triode and application as amplifier or oscillator for wide range of frequencies and powers 10 p1511 A66-21714
 Telesensors, teleoperators and telecontrols for remote operations 12 p1876 A66-23672
 Operation results of Mariner and Pioneer telecommunication systems, including system design and future capabilities 12 p1819 A66-24609
 Communications satellites for small nations, describing requirements of worldwide multiple access system [AIAA PAPER 66-281] 12 p1821 A66-24753
 Data processing centers integration through ground and satellite telecommunications networks for global information network [AIAA PAPER 66-331] 12 p1824 A66-24798
 Approaches to microelectronics, application of microelectronics to telecommunication equipment, noting logic circuits, radio relay, etc 13 p2043 A66-26316
 Space telecommunications for mass media, detailing use of point-to-point, distribution and broadcasting satellites 14 p2239 A66-27678
 Interplanetary spacecraft telecommunications system design including block diagrams 14 p2239 A66-27822
 Laser light modulation by Pockels or Kerr effect for application to telecommunications system, examining electrical birefringence modulation 19 p3304 A66-36262
 Space telecommunications techniques, examining reduction of all transmissions to digital type, using current theoretical coding methods and recurrent codes and block codes for error detection 20 p3516 A66-37432
 Interplanetary medium and S-band telecommunications obtained from tracking data from Mariner II and Mariner IV spacecraft 20 p3520 A66-38187

TELEGRAPHY

SA RADIO TELEGRAPHY
 Nonlinear system optimizing by analytical method, deriving expression for random telegraph signal 11 p1676 A66-22756

TELEMETER

Channel sample-and-hold PCM telemeter, system modules, multiplexer gate groups, analog-to-digital converter, etc 08 p1184 A66-19518

TELEMETRY

SA P.A.C.M. TELEMETRY
 SA PFM TELEMETRY
 SA PHYSIOLOGICAL TELEMETRY
 SA RADIO TELEMETRY
 Pulse code modulation /PCM/ for telemetry and communication between Gemini spacecraft Agena D satellite and ground stations for data processing and display 01 p0031 A66-10938
 Radio beacon telemetry system for measuring orbital performance of Echo II satellite, including internal pressure and skin temperature 01 p0032 A66-11125
 Electronically programmable telemeter using random access multiplexing and stored program control for aerospace missions 01 p0032 A66-11130
 Redundancy reduction techniques for data compression and adaptive telemetry for aerospace application 01 p0032 A66-11131
 Bit synchronization of coded messages transmitted by telemetering 03 p0333 A66-12474
 Pulse shape radiated by miniature micropower telemetry transmitter 04 p0477 A66-13583
 FM telemetry digitizing system operating on-line in real time environment results in automatic data processing 04 p0489 A66-13600
 Five-channel FM/FM telemetry encoder using molecular electronics, noting oscillators, delay lines and linear amplification functional blocks 04 p0493 A66-13601
 Real-time telemetry data system for linking remote tracking stations with central station near Cape Kennedy 04 p0479 A66-13615
 Data control constant-bandwidth frequency system and tricom system discussed as examples of better methods of taking advantage of communication frequency spectrum 04 p0480 A66-13727
 Keying phase-sensitive loop with capacitive loading in selection circuits for frequency separation of telemetry signals 04 p0504 A66-13775
 False-signal probability in telemetry signals using group distribution and group variable-performance codes 04 p0504 A66-13776
 Logical design for phase-coherent and comma-free biorthogonal telemetry system less RF carrier 06 p0823 A66-15965
 Molecularized FM-FM telemetry system for providing more reliable FM subcarrier oscillators with reduced size, weight and power dissipation 06 p0824 A66-15968
 Digital synchronization at information levels of words, cycles and subcycles 06 p0836 A66-17027
 Solid state voltage-controlled subcarrier oscillator for satellite and spacecraft low-power telemetry systems 08 p1196 A66-19519
 Nonbinary codes used to improve noise rejection and reliability of telemechanical systems 09 p1361 A66-20315
 Automated ground station, with computer controlled telemetry system, for Saturn launch vehicle checkout 09 p1347 A66-20675
 Tracking and recording of telemetry from artificial Earth satellites and space probes as South African contribution to space research 09 p1459 A66-20723
 Satellite Telemetry Automatic Reduction System /STARS/ capable of processing data at capacity of 200 million data points per day [ISA PAPER 7.2-2-65] 10 p1507 A66-21904
 Pressure and heat transfer measurement by FM telemetry for models flying freely in hypersonic wind tunnel streams 10 p1538 A66-22041
 Miniature telemetry systems, examining AM, FM, frequency and time multiplexing, etc 11 p1656 A66-22999
 Telemetry systems for data transmission from satellites, discussing modulation techniques for noise elimination and flexibility 12 p1812 A66-23570
 Nomograph for FM/FM telemetry system design 12 p1815 A66-24103
 Solid state UHF telemetry converter using

microwave interdigital multiplexing filter containing integrated semiconductor elements 12 p1840 A66-2462
 Subminiature high-performance biopotential telemetry system with inexpensive components and simple construction 13 p2015 A66-2579
 Satellite tracking telemetry system used by Diane network of ground stations 14 p2233 A66-2680
 French D-1 satellite, design, attitude stabilization, solar power supply, telemetry, etc 14 p2390 A66-2686
 Magnetic amplifier telemetry encoder circuit, using silicon controlled rectifier /SCR/, for application in satellites and rockets 14 p2390 A66-2706
 Effect of transition of telemetry frequencies from VHF /215-260 mc/ to 2300 mc range on aerospace vehicle telemetry antennas of general purpose omnidirectional type 14 p2253 A66-2752
 Fundamental principles of circuits used by Iris telemetry stations, including narrow bandwidth locking phase loop, coherent phase demodulator and diversity combining network 14 p2238 A66-2754
 Fixed and mobile versions of antenna portion of Iris telemetry and remote control systems 14 p2253 A66-2754
 Electronic equipment for Iris telemetry and remote control stations for satellites 14 p2270 A66-2754
 BTC-2 master clock provides basic information and reference signals for operation of various units of satellite tracking and telemetry station 14 p2295 A66-2755
 Ground-based test setup using p-n-p-controlled switches, logic circuitry and sensitive relays to analyze telemetered pulse signals from four lines of airborne electronic system 14 p2255 A66-2780
 Real-time telemetry data system for linking remote tracking stations with central station near Cape Kennedy 14 p2243 A66-2834
 Five-channel FM/FM telemetry encoder using molecular electronics, noting oscillators, delay lines and linear amplification functional blocks 14 p2243 A66-2835
 Performance testing, evaluation and system specification of broadband predetection recording instruments 14 p2298 A66-2843
 Air Force Eastern Test Range /AFETR/ Central Telemetry Station /TEL-4/, facilities and objectives 14 p2272 A66-2843
 Analog telemetering system, discussing design, transmitter principle, receiver elements, special features and test results 15 p2451 A66-2936
 Telemetering - International Conference Washington, D.C., May 1965 16 p2647 A66-30534
 Receiving and predetection recording system with frequency translation and wideband FM for Atlantic Missile Range 16 p2648 A66-30534
 FM telemetry Rf link performance evaluated by constructing model of subcarrier multiplex, based on predicted noise power spectrum at Rf demodulator output 16 p2649 A66-30543
 S-band telemetry transmitter noting size, reliability, efficiency, etc 16 p2659 A66-30550
 S-band automatic tracking telemetry antenna, using tracking mount and servosystem of T-9 radar tracker for microwave telemetry studies and other experiments 16 p2659 A66-30551
 Telemetry tracking acquisition aid system /TELTRAC/ applied to Gemini project noting antenna, receiver, error analysis, etc 16 p2650 A66-30553
 Nuclear radiation hardened telemetry transmitter in L-band, noting tests and radiation effect problems 16 p2650 A66-30554
 UHF telemetry system to withstand high shock of gun launched vertical sounding probes 16 p2650 A66-30555
 Telemetry systems of Tiros and Nimbus satellites 16 p2650 A66-30555
 1680 mc/s telemetry system for meteorological rockets 16 p2651 A66-30555
 Packaging techniques for telemetry components and systems to withstand gun launch accelerations up to 250,000

- 16 p2651 A66-30561
FM/FM and PAM/PM integrated telemetry systems with MDI for missile evaluation system 16 p2651 A66-30562
Centralized Flexible Automatic Computer Telemetry System /FACTS/ for spacecraft, providing capability of revising sampling structure 16 p2651 A66-30563
Digital computer application as real time telemetry processor 16 p2651 A66-30565
Apollo/Saturn S-II telemetry data processing systems 16 p2652 A66-30567
Topocentric distance of geodetic satellite GEOS-A measured by laser telemetry from station 16 p2652 A66-30586
Launching range facilities of Diamant rocket including equipment, radars, interferometers, telemetry, data processing, etc 16 p2682 A66-31233
Zero-level drift errors in telemetry 17 p2873 A66-31965
Optimal receiver of PWM telemetering signals 17 p2873 A66-32071
Automatic reduction of recorded flight data from balloons equipped with radiation detectors and SPARMO telemetry 17 p2926 A66-33148
Text on radio remote control and telemetry and missile application, including modulation and multiplex techniques 17 p2876 A66-33189
Modified AN/GMD-1, -2 as S-band tracking and telemetry system 18 p3066 A66-33620
CNES network of stations for FR-1 and D-1A, discussing checks of proper functioning, orbital corrections, telemetry, ground control, etc 18 p3094 A66-33978
Redundancy removal processes, classification and nomenclature compared by plotting compression ratio vs rms error and stressing ZVA process 18 p3070 A66-34261
Ground stations used in telemetry, tracking and remote control of French satellites 18 p3071 A66-34466
Telemetering - National Conference, Boston, May 1966 19 p3297 A66-35661
LEM Data Reduction System that performs concurrent data processing and telemetry conversion on computer time-shared arrangement 19 p3299 A66-35662
Design of Apollo project lunar-based telemetry system for transmitting experiment data to Earth for one year 19 p3300 A66-35671
Falling sphere experiment instrumentation for aerospace density determination including sensor, transit-time accelerometer and telemetry system 19 p3356 A66-35672
Automatic telemetry checkout station for Saturn V systems using real time signal digitizer and general purpose computer 19 p3339 A66-35677
Telemetry transmitters using solid state wideband microwave voltage-controlled oscillators operating in S, C and X bands 19 p3316 A66-35683
Personal telemetry system design and operation 19 p3301 A66-35689
Ultralow-noise planetary radar receiving system with high-performance feed and maser preamplifiers, noting aperture utilization 19 p3301 A66-35690
Airborne UHF telemetry receiver utilizing solid state components and high-density packaging technique 19 p3316 A66-35691
Phase comparison telemetry consisting of passive VHF receivers and CW transmitters for satellite detection 19 p3301 A66-35692
Data processing of PFM telemetry whereby resolution of frequency measurements is dependent upon SNR, for application to satellite parameters 19 p3301 A66-35696
Signal detection techniques for discrete-frequency, phase-coherent pulse frequency modulation telemetry system, using analog and digital circuits 19 p3302 A66-35698
Changing of PCM telemetry from individual, integrated bipolar and/or MOS logic elements to complex MOS subsystems 19 p3317 A66-35700
Ultrahigh speed PCM telemetry systems using high-speed FET circuits 19 p3302 A66-35701
Implementation and individual units design for DATA-CORE telemetry processing system utilized in data acquisition and processing from Saturn/Apollo 19 p3307 A66-35708
Telemetry data for extreme orbital deviations of Soviet satellites with orbital inclination of 65 and 51 degrees 19 p3468 A66-35722
Solid propellant rocket engine space probe for telemetric study of upper atmosphere 20 p3659 A66-37048
Core-memory-programmed telemetry system for aerospace vehicle with application capability for deep-space probes, orbiting spacecraft or avionic data systems 20 p3513 A66-37199
Periodic burst technique for real-time retransmission of data from multiple asynchronous PCM telemetry links, providing accurate determination of individual sample time 20 p3513 A66-37200
Telemetry system design for astronaut maneuvering unit /AMU/ involving digital combination and filtering of serial PCM pulse train used to modulate RF transmitter 20 p3513 A66-37206
Real-time data gathering and flight-test technique for aircraft-carried weapons system development 20 p3495 A66-37207
High speed technique for automatically testing spacecraft PCM telemetry systems 20 p3514 A66-37213
PCM telemetry system for satellites based on projected requirements and subsystems currently available, noting satellite ESRO II as example of digital telemetry application 20 p3519 A66-38062
Instrumentation of ESRO telemetry receiving stations noting receiver, recording, monitoring and demodulation equipment 21 p3702 A66-38604
Communication and data transmission techniques via unmanned interplanetary satellites, examining video and telemetry systems 21 p3703 A66-38750
Book on aerospace telemetry covering FM data systems, PACM-pulse amplitude-code modulation, data compression, etc 21 p3706 A66-39476
Space modulation systems characteristics, considering data flow rate, spacecraft weight and power, antenna gain, noise figure, etc 21 p3706 A66-39477
Single-sideband FM for data transmission on vibration and acoustic measurements, noting SNR performance, transmission link, etc 21 p3706 A66-39479
Adaptive telemetry applied to data compression, analyzing redundancy reduction, adaptive sampling, data reconstruction, etc 21 p3708 A66-39480
Hybrid PCM telemetry system packaging for Nimbus B spacecraft 21 p3706 A66-39585
Space vehicle telemetric data transmission by FM, PCM, frequency multiplex, etc 21 p3717 A66-39633
Total aerodynamic forces and moments of free flying body in wind tunnel determined from accelerations measured and telemetered by onboard instruments [AIAA PAPER 66-775] 22 p3896 A66-40655
Launch and recovery system for large instrumented free flight models in high speed wind tunnel, using miniaturized telemetry and recording equipment [AIAA PAPER 66-776] 22 p3896 A66-40656
Overlay transistors at microwave frequencies for amplifiers, oscillators, etc, used in telemetry 22 p3879 A66-40722
Pulse amplitude measurement from scintillation cosmic-ray counter 22 p3920 A66-40771
Ballistic range blast-traversal testing technique using scale models containing fast response FM telemetry system modulated by capacitance type pressure transducer [AIAA PAPER 66-777] 23 p4053 A66-41333
Complexity and reliability of telemetric systems and distribution law of number of interrogations for telemetric systems with dispersed objects 23 p4038 A66-41570
Onboard miniaturized telemetry system for stagnation point temperature measurements on free-flight models in ballistic ranges 24 p4209 A66-42189
Simultaneous FM telemetry measurement of four aerodynamic forces acting on free flying models in wind tunnel 24 p4209 A66-42190
Silicon integrated circuits in rocket telemetry transmitter phase-lock frequency stabilization unit 24 p4180 A66-42262
TELEPHONY
SA RADIOTELEPHONY
Microwave communications, discussing radio relay techniques, carrier telephony, satellite microwave communications, television, laser light wave communication, etc 11 p1655 A66-22696
TELEPHOTOMETRY
Linear polarization and relative intensity variations of skylight measured with aircraft-mounted telephotopolarimeter during solar eclipse 19 p3349 A66-36346
TELESCOPE
SA ASTRONOMICAL TELESCOPE
SA DIFFRACTION TELESCOPE
SA PROTON TELESCOPE
SA RADIO TELESCOPE
SA REFLECTING TELESCOPE
SA REFRACTING TELESCOPE
SA SPECTROSCOPIC TELESCOPE
SA STRATOSCOPE II TELESCOPE
Coarse-wire objective grating method applied to determination of coma-magnitude scale distortion and magnitude errors in long-focus refracting telescope 05 p0678 A66-15090
Conversion of small-telescope mounting to electrical control 05 p0680 A66-15210
Three-directional optical square, used with alignment telescope, establishes three mutually perpendicular lines-of-sight in one instrument setting [SAE PAPER 650757] 06 p0878 A66-16014
Periodical and quasi-periodical cosmic ray variation according to data of worldwide network of stations, using crossed telescope 07 p1127 A66-18013
Spacecraft orientation during interplanetary flights, using system employing two rigidly connected telescopes, one aimed at Sun and other aimed at stars 15 p2447 A66-28506
Telescope design for detection of muons produced by neutrinos installed underground and consisting of plastic scintillators 18 p3222 A66-35212
High accuracy directional recording of cosmic ray flux components, using counter telescope 24 p4213 A66-42943
TELETYPE
Updating of air cargo documentation permitting intranet control and orderly accumulation of statistical information, noting forms and teletype machines 15 p2621 A66-29800
TELEVISION
SA CLOSED CIRCUIT TELEVISION
SA COLOR TELEVISION
SA EDUCATIONAL TELEVISION
SA SATELLITE TELEVISION
SA SPACECRAFT TELEVISION
In-flight entertainment system discussing video, audio and motion picture systems 02 p0231 A66-12015
Gabor wavefront reconstruction process applied to three-dimensional facsimile system 03 p0367 A66-12309
TELEVISION CAMERA
Echo II TV system to observe deployment, inflation and injection into orbit 01 p0073 A66-11124
TV camera, visual display and video-signal information storage tubes, noting secondary electron conduction camera tube 05 p0642 A66-14561
Solid state camera system consisting of monolithic phototransistor mosaic sensor and molecular digital readout system 06 p0878 A66-15975
Photoelectric storage tube capable of long term integration of faint optical images, employing as storage target low density layer of KCl for increased charge multiplication 06 p0883 A66-17017
Television camera system circuit design, mission requirements and optical response for Apollo mission to Moon 08 p1222 A66-18729
Determination of lunar luminance to set video gain of Ranger TV cameras 08 p1222 A66-18733
Operational space flight simulator using closed-circuit TV with pinhole optics 10 p1518 A66-21231
Dielectric-tape TV camera for panoramic scanning application in meteorological satellite, discussing subject logic and control

- system design 14 p2262 A66-28418
 Camera tubes for recording Stratoscope II telescope, noting photometric fidelity 15 p2500 A66-28969
 Low altitude-high speed flight simulation experiment in air-to-ground target recognition via closed-circuit TV, determining effects of camera view field and target size 17 p2927 A66-33450
 Shutters, lenses, vidicons, data rates and calibration techniques for TV cameras of Rangers VI, VII, VIII and IX 23 p4070 A66-41671

TELEVISION EQUIPMENT

- Mariner IV TV system for photographing Mars surface during flyby 01 p0073 A66-11118
 Closed circuit television display system performance levels required for human visual simulation in flight training [AIAA PAPER 65-264] 03 p0353 A66-12778
 Ranger Block III television system for lunar surface photography 06 p0958 A66-15934
 Recognition of target on TV display as affected by target shape-smear and background clutter 08 p1226 A66-19532
 Miniaturized TV system capable of operation in launch and flight environments of space vehicles 20 p3557 A66-37205
 Laser TV system operation, performance characteristics and application 20 p3517 A66-37743
 Electron tubes operation and performance, discussing TV, vidicon, photographic recording tubes and photoelectric devices 21 p3718 A66-39618
 Horizontal deflection in TV display produced by Bragg reflection of laser light by ultrasonic waves in water 24 p4212 A66-42816

TELEVISION RECEPTION

- Ultralong-range propagation of meter radio waves, noting equipment details and television signal reception 02 p0192 A66-12137
 Geometrical distortions of Tiros satellites television pictures, estimating loss of contiguity and photogrammetry 07 p1036 A66-18480
 IR AM TV transmitter and receiver using GaAs diode and telescope with photomultiplier 08 p1184 A66-19348
 Ultralong-range propagation of meter radio waves, noting equipment and television signal reception 14 p2241 A66-28093
 Laser illuminated electro-optical imaging noting energy variation parameters, equipment used and results obtained in TV reception 19 p3355 A66-35531

TELEVISION TRANSMISSION
 SA AUTOMATIC PICTURE
 TRANSMISSION /APT/

- Proposals for television satellite in Europe noting direct transmission of TV programs, design principles and power supply 01 p0030 A66-10797
 International TV communications using satellite relaying systems noting Telstar, Relay and Syncom satellites and frequency sharing, video bandwidth, etc 02 p0190 A66-11519
 Design and test procedures for batteries and voltage regulator of power subsystem for Ranger TV system 04 p0459 A66-13582
 Simultaneous long distance tropospheric propagation measurements at 560 and 774 mc/s over North Sea 04 p0483 A66-14045
 Digital computer research program for reducing bandwidth schemes and quality for picture transmission 05 p0676 A66-14820
 Color TV for exploration of space environment, noting techniques for signal transmission via satellites 08 p1180 A66-18611
 IR AM TV transmitter and receiver using GaAs diode and telescope with photomultiplier 08 p1184 A66-19348
 Effect of altitude and camera field-of-view at various degrees on geographic orientation and error in target position, using TV data 08 p1225 A66-19531
 Raster magnification effect of moire images to observe plane deformation in specimens subjected to impact 11 p1782 A66-22857
 Television transmission of Fresnel type hologram for originally transparent object 11 p1707 A66-23092
 Hologram television transmission using

- microwave wavelength, yielding aperture-limited resolution and aperture-size reduction method for low resolution 12 p1881 A66-24152
 Synchronous stationary satellite system for networking television and radio material to broadcast stations, noting frequency requirements and constraints [AIAA PAPER 66-284] 12 p1821 A66-24755
 Direct-to-home TV broadcasting satellite system for upper UHF, describing stabilization, thermal control, antenna, power amplifier, etc [AIAA PAPER 66-309] 12 p1955 A66-24776
 Future pattern of communications satellite systems, reviewing world requirements for telephony, telex, TV and radio [AIAA PAPER 66-319] 12 p1824 A66-24790
 Breguet 941 STOL aircraft, considering possibilities as television relay platform with Citroen ID 19 station wagon 14 p2238 A66-27677
 Solar pumping and modulation of various laser materials for deep space communication, noting TV picture transmission 15 p2513 A66-28971
 Millimeter wave transmission and reception of television signals, examining picture quality and tropospheric scintillation and attenuation relative to weather 15 p2450 A66-28997
 Digital data compression techniques applicable in spacecraft television systems, emphasizing bandwidth reduction techniques 16 p2653 A66-30891
 Vista satellite and transmitter for color television transmission from satellites 17 p2875 A66-32503
 Signal transmission through double FM regaining LF signal by two-stage frequency demodulation at receiving end 17 p2876 A66-33451
 Satellite broadcasting system for TV, international shortwave and high fidelity FM communication 18 p3066 A66-33783
 Folded antennas, discussing Franklin array and current distribution via equivalent circuit analysis and application for TV transmission and reception 20 p3530 A66-37712
 Medium frequency, FM, VHF and UHF TV broadcasting and receiving antennas 20 p3530 A66-37717
 Monograph on TV transmissions from space covering application to space missions, geodetical studies and existing and planned facilities 20 p3561 A66-38031
 Data compression for TV transmission from space, using improved gray scale /IGS/ and coarse-fine PCM systems 20 p3561 A66-38262
 Television transmission and reception by satellite relay 20 p3521 A66-38425

- Temperature effect of nonlinear volt-ampere characteristics in piezoelectric semiconducting tellurium 03 p0410 A66-12730
 Anisotropy of scattering in tellurium, correlating cyclotron frequency data and galvanomagnetic measurements 05 p0738 A66-15353
 Photovoltaic effect in thin ternary semiconductors of Cd-Te-Hg 07 p1092 A66-17248
 Piezoelectric and acoustoelectric effects observable in tellurium crystals at temperature of liquid nitrogen 07 p1098 A66-17826
 Electrical conductivity, Hall coefficient and thermoelectric power of tellurium calculated, using models for anomalous sign

- reversal of Hall coefficient 08 p1271 A66-19240
 Segregation processes and coefficients of effective distribution and diffusion during solidification of doped tellurium 08 p1272 A66-19247
 Anisotropy of scattering in tellurium, correlating cyclotron frequency data and galvanomagnetic measurements 09 p1431 A66-20899
 Lithium diffusion effects on electrical properties of tellurium doped n-type GaSb 10 p1578 A66-21582
 Stimulated emission from electron beam excitation of tellurium and pure and n-type doped indium antimonide in semiconductor lasers 13 p2099 A66-26179
 Resistivity and Seebeck coefficient of liquid thallium-tellurium semiconductors 14 p2366 A66-27760
 Anisotropy and annealing behavior in extrinsic single-crystal tellurium studied by measuring electric resistivity and Hall coefficient 15 p2562 A66-28725
 Electrical conductivity and thermoelectric measurements of intermediate phases in erbium tellurium system 17 p2979 A66-32631
 Absorption spectra, reflection index and photoelectric emission of tellurium 20 p3618 A66-37566

TELLURIUM ALLOY

- Thermal and electrical properties of copper antimony telluride/tin telluride system as function of composition 01 p0116 A66-10190
 Tellurium alloyed impurity on IR absorption spectrum in n-type gallium arsenide 04 p0569 A66-14360
 Recombination radiation spectra of n-type gallium antimonide on concentration of tellurium base region 04 p0570 A66-14364
 Tellurium alloyed impurity on IR absorption spectrum in n-type gallium arsenide 14 p2369 A66-28258
 Recombination radiation spectra of n-type gallium antimonide on concentration of tellurium base region 14 p2369 A66-28263
 Thermoelectric power and electric resistivity measurements of n-type silver telluride at melting point and in liquid state 17 p2981 A66-32955
 Semiconducting properties of several gallium and indium antimony tellurides systems and their metallurgical aspects 17 p2986 A66-33296

TELLURIUM COMPOUND

- Second harmonic generated by transmitting laser radiation through tellurium monocrystal, while filtering out fundamental frequency 13 p2090 A66-25437
 Thermionic emission from barium telluride measured by cathodes formed by direct reaction of elements and reduction of barium tellurate 19 p3436 A66-35426

TELSTAR I SATELLITE

- Explorer XV and Telstar I satellite trapped radiation measurements, noting connection between magnetospheric trapped particles and natural plasmas in space 07 p1131 A66-18084

TELSTAR SATELLITE

- Traffic needs of communications satellites, including random-passing, station-keeping /phased-passing/ and geostationary satellites 06 p0959 A66-16495
 Operational experience with Telstar communications satellite, emphasizing long life satellite design 08 p1301 A66-18563
 Dividing filter facilitates simultaneous transmission and reception of data between Telstar satellite and ground station at Raisting 09 p1364 A66-20590
 Telstar orbit prediction method compared with accuracy of solutions obtained by Brouwer, by Izsak and by Hall-Gawlowicz-Vahradian 10 p1609 A66-21790
 Orbital elements for Telstar communications satellites, using angle only and/or angle range data time as input information 16 p2723 A66-30898
 Global TV communications systems utilizing Telstar and Early Bird 17 p2875 A66-32900

 INSULATION
 SKIN TEMPERATURE /BIOL/

Optical damage of spacecraft thermal control coatings in simulated space radiation environment of geomagnetically trapped particles

AIAA PAPER 65-646] 01 p0089 A66-10227
 Spacecraft thermal control surface damage by solar wind bombardment in hydrogen and helium plasmas, with measurements of solar spectral reflectance and thermal emittance
 AIAA PAPER 65-647] 01 p0089 A66-10228

Spacecraft Thermal environment control to insulate cryogenics in bulk for space use 01 p0161 A66-10290

Temperature control of graphite nuclear furnace, using thermocouples 02 p0228 A66-11517

Thermal control in advanced integrated life support system design to accommodate four-man crew on one-year Earth orbit mission 02 p0185 A66-11631

Heat loss in space, discussing temperature regulation during space walk via heat exchangers in air ventilated space suit 04 p0470 A66-14070

Vibration temperature chamber design considering access to top of shaker head, fast stabilization time and reduced downtime for maintenance and adaptability 04 p0508 A66-14449

Aluminum diffusion bonding for fabrication of Apollo cold plates, noting alternate bonding techniques

SAE PAPER 650779] 05 p0687 A66-15007
 Optical properties of spacecraft temperature control coatings under simulated geomagnetically trapped electron bombardment

AIAA PAPER 65-137] 05 p0706 A66-15792
 Low density thermal insulation materials, discussing temperature control, ablation efficiency and processing qualities of materials for missile use 06 p0900 A66-16296

Mariner IV thermal control in steady state space conditions and in short-term transient variations near Earth or Mars 06 p0959 A66-16316

Thermal control of spacecraft 08 p1301 A66-18736

Thyatron temperature regulator, operation and application 08 p1223 A66-18799

Thermal stress of unbounded plate and cylinder heated under variation of medium temperature 08 p1313 A66-19442

Stagnation temperature control of high-pressure supersonic wind tunnel, using regenerative heat exchangers with porous packing 09 p1471 A66-20802

High temperature thermocouples as in-core sensors provide NRX and KIWI reactor temperature control

AIAA PAPER 65-598] 10 p1555 A66-21944

D-1 satellite thermal control while in orbit featuring heating resistance and controllable power supply, noting simulated test program 10 p1612 A66-21960

Satellite protective coatings using vacuum UV radiation absorbers for temperature control 11 p1720 A66-23125

Spacecraft thermal control by fusible or phase-change materials 11 p1787 A66-23165

Solar thermionic power conversion, discussing converters, flux and temperature controls, energy storage generators, support structures, etc

[AIAA PAPER 64-734] 13 p2006 A66-26641
 Space thermal control using fusible materials, with analysis of one-dimensional adiabatic system 18 p2826 A66-30505

Two-radiometer technique for rapid verification of total emittance without surface temperature measurement for quality control

[AIAA PAPER 65-431] 16 p2706 A66-30912
 Optimum temperature conditions for cultivating thermophilic strains of *Chlorella* under varying radiant flux intensities 16 p2644 A66-31589

Near UV effects on thermal control surfaces at cryogenic temperature 17 p3035 A66-32749

Temperature control of unmanned satellites for lunar or interplanetary missions 17 p3018 A66-33257

Temperature autostabilizing nonlinear dielectric element /TANDEL/ to obtain desirable and optimal working temperatures of ferroelectric crystal and electro-optical devices 17 p2896 A66-33298

Space environment degradation of thermal control coatings tested by experimental packages on Pegasus I, II and III [AIAA PAPER 66-419] 18 p3239 A66-33640

Control of spacecraft internal temperature, using movable shutters reflecting diffusely [AIAA PAPER 65-425] 18 p3260 A66-33826

Thermal scale modeling of modified prototype of Mariner Mars 64 spacecraft used to predict inside temperature of spacecraft

[AIAA PAPER 65-386] 19 p3468 A66-35622
 Cryodeposits effects on spacecraft thermal control systems with respect to surface radiative properties and to shadow shield surfaces 19 p3468 A66-35955

Temperature sensing and control by fluidic devices, using FM and phase discrimination for gas turbine engine application 19 p3361 A66-36672

Temperature automatic control system in photographic laboratory compensating for humidity changes by using semiwet bulb controller 20 p3561 A66-38049

Water-circulation-cooled space suit, discussing heat dissipation mechanism, body temperature maintenance, metabolic rates, astronaut comfort, etc 20 p3509 A66-38164

Temperature-modulated optical absorption in Si, GaAs, CdS and potassium tantalate semiconductors 20 p3623 A66-38389

Mariner IV temperature control subsystem hardware, examining thermal shields, thermally actuated louver system and flexible multilayer shields [ASME PAPER 66-MD-64] 21 p3818 A66-38496

Spacecraft attitude reference system using passive temperature control device and four gyros in skewed position 21 p3764 A66-38853

Recirculation of liquid through cell and external heat exchanger to solve problem of repeated flashing in europium chelate lasers 21 p3747 A66-39108

Mechanical and thermal requirements of attitude, translation and descent engine controls of Lunar Excursion Module /LEM/ 21 p3808 A66-39519

Testing for mechanical properties of materials at liquid hydrogen temperatures, noting liquid transfer system and safety regulations [AICE PREPRINT 22B] 22 p3886 A66-39890

Simulated solar absorbance of spacecraft thermal control coatings determined calorimetrically in vacuum at room and cryogenic temperatures 22 p3889 A66-40217

Thermal control surface contamination due to rocket exhaust plumes and effects on solar absorbance and IR emittance of protective coatings 22 p3891 A66-40231

Fluid venting effects on thermal control surfaces studied, using vacuum chamber for thermal environment simulation 22 p3891 A66-40236

Cooled blades in gas turbines allowing use of higher gas temperatures and necessitating calculation of heat transfer and skin friction coefficients 22 p3899 A66-40492

Temperature loop operation and transient response performance of pneumatic temperature control consisting of sensor and valve 22 p3853 A66-40540

Susceptibility to cold deformation of semifinished B95-2 Al-Zn-Mg-Cu alloy products, noting machinability in manufacturing of parts 22 p3928 A66-40885

Thermistor temperature sensing bridge for precision temperature control of liquid volume 24 p4214 A66-43033

TEMPERATURE DIFFERENCE

Variations of equivalent line widths of first overtone of carbon monoxide band at transition from photosphere to facula, estimating temperature difference 01 p0131 A66-10278

Surface temperatures in space solar simulator may differ from thermal design expectations plus or minus 10 degrees F 02 p0211 A66-11213

Temperature difference method of computing convective heat transfer, using flat plate laminar boundary layer equations 02 p0303 A66-11569

Rotational temperatures derived from molecular nitrogen ion in aurora along with simultaneous height measurements 02 p0223 A66-11833

Silicone copolymers lubricants containing both trifluoropropyl and halophenyl substitution to cover wide temperature range [ASLE PREPRINT 65-LC-5] 02 p0237 A66-12233

Liquid-gas coexistence curve shape near critical point, allowing for volume and temperature deviations and for mathematical singularities 08 p1316 A66-18796

Harris and Priester model used to compute amplitude of diurnally varying component of horizontal pressure acceleration, showing increase with altitude 10 p1529 A66-21150

Silicone copolymer lubricants containing both trifluoropropyl and halophenyl substitution to cover wide temperature range [ASLE PREPRINT 65-LC-5] 12 p1889 A66-24990

Constant section mixture of flows with different enthalpies, noting sonic blocking for terminal temperature differences 13 p1991 A66-25470

Time variation of current, temperature and resistance in premelt stage of wire explosion expressed in terms of initial wire and circuit data 15 p2537 A66-28722

Absence of temperature difference between solar equatorial and polar limb near minimum, employing photoelectric comparison of Fraunhofer line strengths 16 p2800 A66-30643

Radio measurements of Moon, particularly IR, showing brightness-temperature maps of new, half and full Moon 19 p3458 A66-35453

Analytical expressions for maximum slope of fluid temperature transient response, based on Hansen mathematical model, and for reduced time slope attained 20 p3678 A66-37119

Substantial pulse type stratospheric temperature fluctuations over Armenia based on diurnal observations 21 p3734 A66-39293

Marangoni flow, motion of liquid surfaces under influence of surface tension gradients, explaining high fluxes obtained in boiling heat transfer 22 p3999 A66-40303

Skin temperature rate reentry guidance and control system using thermocouple sensors and operating in manual or automatic mode [AIAA PAPER 65-47] 24 p4235 A66-42765

TEMPERATURE DISTRIBUTION

SA WALL TEMPERATURE DISTRIBUTION

Parabolic temperature distribution effect on flutter behavior of panel subjected to supersonic flow over one surface [AIAA PAPER 65-112] 02 p0297 A66-11544

Stratospheric monthly temperature variation at latitude 15 degrees N between 25 to 55 km in phase angles and amplitude 02 p0223 A66-11959

Hypersonic flow separation over simple geometries and aerodynamic controls, noting pressure gradients and heating-rate distributions

[AIAA PAPER 65-753] 03 p0314 A66-12587

Energy balance of cylindrically symmetric hydrogen arc immersed in axial magnetic field led to current-voltage characteristic and radial temperature

distribution 04 p0554 A66-14298

Radiative heat transfer in flat layer of absorbing, reradiating and nonscattering gray medium with optical properties independent of temperature

04 p0598 A66-14425

High pressure high current argon discharge, calculating statistical variations of photon radiation, electron and ion densities

05 p0720 A66-14504

Effect of asymmetrical heating on turbulent heat transfer in rectangular duct

[ASME PAPER 65-HT-11] 05 p0782 A66-14735

Effectiveness of split cross-flow heat exchangers, emphasizing uniform exit temperature distribution for unmixed fluids

[ASME PAPER 65-HT-24] 05 p0783 A66-14745

Space-time temperature distribution in one-dimensional systems with heat transfer across contacts

[ASME PAPER 65-HT-59] 05 p0785 A66-14761

Exact solution for wall and fluid temperature distributions for counterflow heat exchanger with effect of longitudinal heat conduction

[ASME PAPER 65-HT-63] 05 p0786 A66-14764

Temperature distribution along thin fins with temperature-dependent thermal properties and internal heat generation

[ASME PAPER 65-WA/HT-50] 05 p0791 A66-15657

Method of zones for calculation of temperature distribution in components of complicated artificial satellites

[ASME PAPER 65-WA/HT-47] 05 p0792 A66-15662

Laminar heat transfer in inlet tube, determining velocity and temperature distribution

[ASME PAPER 65-WA/HT-36] 05 p0792 A66-15671

Pressure and temperature distribution across contact strip between two elastic cylinders with parallel axes in presence of frictional heating

[ASME PAPER 65-LUBS-1] 06 p0961 A66-16201

Temperature distribution of fluid in laminar boundary layer of flat plate and heat flow from fluid to plate wall

06 p0872 A66-16467

Temperature distribution in homogeneous eccentric annular layer with constant internal heat generation

06 p0971 A66-16471

Periodic temperature fluctuations in mesosphere based on underground measurements of cosmic ray intensity at Yakutsk, Siberia

06 p0950 A66-16595

Radial distribution of electrical conductivity in ionized gas jet based on value measured by induction method and known temperature

distribution 06 p0919 A66-16880

Temperature distribution and thermal stresses in liquid-filled cylindrical shell

07 p1143 A66-17397

Use of point and line heat sources for measuring thermophysical quantities of plane-parallel plates and thin films

07 p1149 A66-17530

Unsteady heat conduction in finite homogeneous region of arbitrary geometry and initial conditions with inhomogeneous boundary conditions

07 p1150 A66-17578

Steady state temperature distribution for cylindrical shells under space conditions, calculating effect of internal radiation and surface coatings

07 p1143 A66-17591

Temperature distribution in infinite closed circular cylindrical shell with fixed heat source of constant intensity

07 p1154 A66-18067

Peak irradiance of optical pump and total pump-energy incident upon laser crystal determined, accounting for temperature variation effects

07 p1047 A66-18487

Polymeric material deformation under harmonically varying load action, noting steady state regime temperature distribution

effects 08 p1243 A66-18879

Thermal conductivity of infinite hollow cylinder 08 p1319 A66-19425

Temperature distribution in fluid spherical layer enveloping gravitating sphere 08 p1320 A66-19485

Analogy between eigenvalues for fluid convection and flow stability extended to rotating cylinders with corresponding temperature distribution for given angular velocities 08 p1212 A66-19821

Temperature distribution of propeller heated by electric antifer, with solutions for heater and propeller surface 09 p1328 A66-20753

Steady thermal regimes in multilayer medium with perfect and imperfect contacts and varying heat conductivity 09 p1471 A66-20831

Hopf analytical solution for values of ratio of gray absorption coefficients for insulating and escaping radiation /greenhouse parameter/ assumed constant at all depths, presenting temperature distribution graphs 10 p1605 A66-21204

Nonstationary temperature distribution in long cylinder solved by integral transforms, giving results in form of series in Bessel and error functions 10 p1620 A66-21327

Time reversal heat conduction problems in thermodynamical system with known boundary conditions solved for various structures 10 p1623 A66-22060

Pressure and temperature distribution in flow of combustion products in presence of transverse magnetic field 11 p1786 A66-22596

Unsteady temperature field in infinite cylinder in presence of internal heat source 11 p1786 A66-22852

Surface finish effect on radial temperature distributions in optically pumped neodymium trivalent ion glass laser rod by observing thermal stress birefringence 11 p1714 A66-23358

Time and height variations of temperature, wind speed and moisture content during dissipation of low level jet on May 14, 1962 before sunrise near Dallas 11 p1730 A66-23379

Creep buckling of columns under axially nonuniform temperature distribution 12 p1969 A66-24364

Interferometric determination of temperature field in two-dimensional finite space in conditions of free convection with internal heat sources 13 p2209 A66-25317

Velocity pattern in turbulent wake behind symmetric body and conservation of temperature and enthalpy in wake in cylindrical polar coordinates when incoming flow is nonuniform 13 p1992 A66-26704

Correlation expressing reduced coefficient of thermal expansion as function of reduced Debye temperature for metallic solids used for predicting coefficient at any temperature 14 p2411 A66-27375

Heat transfer equation to find temperature distribution in two-dimensional and circular jets 14 p2274 A66-27378

Composition and temperature variation of thermosphere, using mass spectrometry and optical methods 14 p2285 A66-27622

Thermal stresses in finite cylinder with prescribed temperature distribution on curved lateral surface and with ends in contact with smooth insulating plates 14 p2400 A66-27725

Nonhomogeneous solid sphere radiative cooling asymptotic representation based on heat conduction theory by Laplace transforms 14 p2414 A66-28144

Brewster coefficient as function of temperature, number of cross-linking modes and styrene content for diethylene-glycol succinofumarates copolymerized with styrene 14 p2319 A66-28273

Laminar flow of incompressible fluid in rectangular channel, determining temperature distribution over channel cross section and thermal flux through wall for case of energy dissipation 14 p2415 A66-28317

Creep buckling of column with nonuniform vertical temperature distribution 14 p2408 A66-28344

Radiative energy transfer between concentric spheres separated by absorbing and emitting gas, noting analogy to atmosphere with spherical symmetry 15 p2615 A66-28861

Spectroscopic studies of plasma pulsed discharge on hard electrodes in vacuum determining excitation temperatures for various portions of jet 15 p2550 A66-29222

Shape and location of diurnal bulge upper atmosphere, analyzing density and temperature distribution at high latitudes from satellite drag data 15 p2490 A66-29822

Sandwich panel bending under thermal and mechanical loads, solving differential equations for temperature distribution transverse load and uniform edge compression with boundary conditions 16 p2812 A66-30202

Reissner variational formulation of temperature distribution boundary value problem of axisymmetric thermal stresses isotropic sandwich shells of revolution [AIAA PAPER 66-528] 16 p2814 A66-30602

Temperature distribution and efficiency thick plate and annular fins used on heat exchangers, space radiators and nuclear fuel elements analyzed through heat conduction equation 16 p2827 A66-30802

Heat pipe exhibiting very high effective thermal conductivity, showing temperature distribution, boiling heat transfer coefficients, vapor temperature and pressure drop 16 p2827 A66-30902

Temperature and pressure distribution for fluid flow through porous walls of cylindrical and spherical bodies and sectors [AIAA PAPER 66-433] 16 p2829 A66-31402

Thermal stresses in anisotropic hollow cylinder by arbitrary radial temperature distribution 17 p3020 A66-31902

Radial temperature distribution within argon plasma column determined spectroscopically at various arc currents noting argon thermoconductivity 17 p2966 A66-32422

Dimensional analysis of temperature distribution within spherical particle during nonisothermal evaporation 17 p3033 A66-32442

HF electrodeless plasmatron working at atmospheric pressure, noting plasma discharge and temperature distribution characteristics, obtaining constricted plasma jet 18 p3142 A66-34022

Temperature distribution in rectangular flat plate during heat application and cooling periods in spot welding procedure 18 p3260 A66-34062

Temperature profile and design parameter in adiabatic fuel cell with stationary electrolyte where cooling takes place by convection and conduction 18 p3263 A66-34382

Mathematical analysis of thermal wave technique for linear kinetics from viewpoint of solid-liquid interface motion 18 p3265 A66-34502

Temperature at wedge under action of heat source of variable dimensions and intensity 18 p3266 A66-35052

Temperature distribution and propagation of periodic temperature fluctuations in damped semilinear rod 18 p3267 A66-35062

Thermal self-ignition theory employing general functions of temperature characterizing reaction rate of explosive 19 p3477 A66-35742

Couette and Poiseuille flow and temperature distribution of fluids with two viscosity ranges, including viscoplastic and dilatant fluids 19 p3341 A66-36302

Vertical velocities in atmospheric free motions, noting pressure and temperature field distributions and application of computer to solve obtained equations 20 p3593 A66-37752

Exact solution of thermoelastic problem in two dimensions, using doubly infinite Fourier series 20 p3673 A66-38272

Thermoelasticity of semilinear state plane with circular coolant holes 21 p3826 A66-38582

Electron temperature of solar corona noting radiative transfer of radio emission in corona, deriving distribution of brightness temperature over solar disk 21 p3811 A66-38632

Thermal stresses in flat rectangular isotropic plate of constant thickness under arbitrary and no temperature variation in terms of Fourier series and

- integrals 21 p3832 A66-39443
- Natural frequency variations caused by thermal membrane stresses applied to circular disks for fundamental frequency increases, noting temperature distribution 22 p3989 A66-39774
- Radiative heat exchange between body and enclosure when temperature and emissivity are not uniform on surface, using series solution 22 p3998 A66-40142
- Temperature distribution in two-layer plate during welding by laser light 22 p3923 A66-40194
- Nonlinear boundary value problem for temperature distribution in convex solid with radiation boundary 22 p3999 A66-40565
- Laminar heat transfer in plane channel with nonuniform temperature field at inlet 22 p4000 A66-40812
- Heat transfer in incompressible viscous fluid between two nearly parallel walls with harmonically varying distance, determining velocity field and temperature distribution 23 p4150 A66-42029
- Temperature distribution of laminar channel flow with tangential stress and wall temperature 24 p4294 A66-42720
- ## TEMPERATURE EFFECT
- ### HEAT EFFECT
- Compensating temperature effects in systems using LDG type logarithmic germanium diode 01 p0035 A66-10205
- Screening field and specific heat of superconductivity of sintered niobium tannide at temperatures above 4.2 degrees 01 p0117 A66-10245

- Seasonal variations of cosmic ray intensity in stratosphere compared with temperature variation in atmosphere 02 p0281 A66-11333
- Temperature dependence of viscoelastic behavior of polystyrene analyzed in terms of creep and recovery 02 p0248 A66-11592
- Increase in extinction distance with temperature in silicon determined via high temperature electron microscopy 02 p0272 A66-11709
- Extension of study showing that increase in temperature of silicon carbide increases absorption coefficient of defect, for case of heavy particle irradiation 02 p0274 A66-11723
- Anomalous thermal expansion above and below Curie point as function of temperature in gadolinium single crystal 02 p0274 A66-11725
- Temperature parameters introduced into expressions characterizing transistor performance as function of temperature 02 p0199 A66-11756
- Photovoltage profiles of rhodium to p-silicon contact at high and low level injection and various temperatures 02 p0275 A66-11873
- Forced motion of viscous liquid heated nonuniformly from below and subject to nonlinear basic temperature profile 02 p0219 A66-11958
- Thermal expansion coefficient of materials determined by tensometric method based on measurement of temperature dependence of resistance of strain gauge sensing elements 02 p0231 A66-11998
- Temperature dependence of surface conductivity and Hall effect in germanium alloyed with gold 02 p0276 A66-12078
- Temperature dependence of heat conductivity and thermal emf in n-type InP 02 p0277 A66-12094
- Dependence of magnetic moment and thermal coefficient of permanent magnets on annealing temperature and length/diameter ratio 02 p0232 A66-12147
- Upper thermal tolerance limits for unimpaired mental performance 03 p0325 A66-12359
- Mechanical characteristics of columbium steels and synthetic iron-carbon-niobium alloys as function of temperature at which they are converted to austenite 03 p0381 A66-12540
- Temperature effect of nonlinear voltage-ampere characteristics in piezoelectric semiconducting tellurium 03 p0410 A66-12730
- Animal temperature sensing for studying effect of prolonged orbital flight on circadian rhythms of pocket mice 03 p0328 A66-12767
- Acceptor level in iron doped Ga-As moves toward valence band with increasing temperature at approximately same rate band gap decreases 03 p0410 A66-13004
- Stress and temperature effects on nickel creep strength after prestressing at 4.2 and 300 degrees K 03 p0383 A66-13126
- Current-voltage characteristics of gallium arsenide diode noting temperature effect on threshold voltage and breakdown current 03 p0346 A66-13323
- Gamma ray and neutron irradiation and temperature effects on wear-life of solid lubricants for aerospace application [ASLE PREPRINT 65AM 5C4] 04 p0524 A66-13398
- State equation for carbon dioxide describing gaseous and liquid phases and left and right boundary curves at temperatures and pressures 04 p0572 A66-13660
- Critical current in planar and cylindrical superconducting tin films as affected by magnetic field and temperature 04 p0559 A66-13715
- Temperature dependence of effective mass and influence of two-phonon processes on mobility in semiconductors with narrow forbidden bands 04 p0565 A66-14263
- Temperature dependence of hole-capture cross section in germanium 04 p0565 A66-14271
- Temperature dependence of effective electron mass of indium antimonide 04 p0565 A66-14275
- Knight shift for nuclear resonance lines of intermetallic Nb-Sn phase varies with transition temperature 04 p0566 A66-14289
- Electric oscillation by monochromatic light in high resistivity gallium arsenide, noting temperature dependence 04 p0569 A66-14361
- Instability of tunnel diode frequency converter, discussing effects of temperature and instability 04 p0501 A66-14411
- Cadmium sulfide and cadmium selenide recombination centers, discussing temperature dependence of electron capture cross sections 05 p0731 A66-14661
- Temperature dependence of Mie scattering, covering absorption and scattering of electromagnetic radiation on spherical aluminum oxide particles 05 p0718 A66-14917
- Temperature at which predecomposition or decomposition of ammonium perchlorate occurs, changed by perchlorate surface treatment and reflected in burning rate of propellant containing perchlorate [CI PAPER WSCI-65-36] 05 p0744 A66-15151
- Optical properties of semiconductors by measuring spectral emittance of transparent and opaque solids and measurements on materials used in IR optics [AIAA PAPER 65-654] 05 p0678 A66-15164
- Effects of nitrogen and carbon on low temperature embrittlement of vanadium, noting transition temperature increases 05 p0702 A66-15468
- Cesium plasma thermionic converter, calculating voltage drop in emitter, collector and plasma 05 p0615 A66-15536
- Emitter materials for nuclear thermionic converters, discussing /UZr/C, fuel life and performance parameters, material compatibility, etc 05 p0713 A66-15584
- Gas-cooled electronic equipment, discussing experimental heat transfer and pressure drop data, packaging and thermal effectiveness parameters [ASME PAPER 65-WA/HT-44] 05 p0650 A66-15665
- Effects of prior low temperature deformation on subsequent creep rupture behavior of alloys [ASME PAPER 65-WA/MET-14] 05 p0703 A66-15684
- Prior creep exposure on 1400 degrees F strength of Inco 713 cast nickel-base alloy, discussing microstructural change effects on mechanical properties [ASME PAPER 65-WA/MET-12] 05 p0703 A66-15686
- Temperature, density and gravitational escape on Mars, Mercury, Jupiter and Venus atmospheres 05 p0768 A66-15759
- Carbon diffusion into titanium and zirconium nitrides, noting carbide layer parabolic growth rate and experimental techniques 05 p0704 A66-15817
- Austenitic chromium-nickel-manganese steel, describing temperature effects on crystal structure and experimental techniques 05 p0704 A66-15819
- Exponential absorption edge of gallium arsenide 05 p0742 A66-15870
- Average energy expended per ionized electron-hole pair in silicon and germanium as function of temperature 05 p0742 A66-15871
- Temperature and oxygen effect on aromatic solute sensitized photo-decomposition of ethanol and ether glasses 06 p0821 A66-16125
- Temperature effect on diffraction curve profile for Bragg case using triple crystal spectrometer, observing intrinsic temperature effect due to thermal motion 06 p0923 A66-16186
- Thermal response of ablative materials for nozzles and leading edges in terms of specific thermal and mechanical properties 06 p0899 A66-16291
- Cellular room-temperature-vulcanizing silicone-rubber, describing compound properties, application and possible structural modifications 06 p0900 A66-16295
- Temperature effect on amplitude of cochlear microphonic and on latency action potential of auditory nerve 06 p0812 A66-16405
- Fuel drop ignition, discussing parametric extension of quasi-flame surface theory to higher reaction orders and arbitrary stoichiometric ratios [AIAA PAPER 66-70] 06 p0970 A66-16415
- Helium-neon gas lasers, discussing amplitude variation suppression technique 06 p0892 A66-16670
- Relation between hardness and ultimate strength of tungsten and molybdenum over wide temperature range 06 p0897 A66-16698
- Low temperature and ionization effects on stability of close-pair defects in semiconductors and behavior at higher temperatures 06 p0932 A66-17113
- Carrier temperature injected into InSb effect on shape of direct intrinsic line 07 p1095 A66-17317
- Temperature dependence of loss and gain factor of GaAs diode and threshold current density of GaAs laser and junction luminescence of GaAs 07 p1042 A66-17332
- Temperature factors and intensities of absorption bands of molecular vibrational spectrum 07 p1082 A66-17531
- Horizontal propagation of sound from jet engine at ground proximity, discussing effects of vector wind, ground absorption and temperature gradient 07 p1080 A66-17730
- Temperature dependence of electrical conductivity in organic semiconductors, examining compounds during transition from solid to liquid state 07 p1100 A66-17931
- Effect of structural transformations /such as aging/ on temperature dependence of stress relaxation criteria of certain alloys 07 p1050 A66-18061
- Pinch-effect theory in electron-hole plasmas, noting power input-asymptotic axial temperature interdependence in semiconductors 07 p1103 A66-18217
- Pressure distribution, surface temperature and deformation profile in conjunctive region of lubricated cylindrical disks rolling or sliding on their peripheral surfaces [ASLE PREPRINT 65AM 4A3]

Thermal elastohydrodynamic lubrication of rolling and sliding cylinders, noting correlation with film thickness and friction experimental data [ASLE PREPRINT 65AM 4A2] 07 p1039 A66-18290

Electron energy spectra in neon, xenon and helium-neon laser discharges, calculating production and destruction rate parameters 07 p1040 A66-18291

Electrical properties of carrier generation-recombination centers in silicon p-n junctions, noting energy levels, effective capture cross sections for holes, etc 07 p1107 A66-18402

Surface layers on ferroelectric barium-titanate crystals, noting parameters of RF induced electroluminescence 07 p1107 A66-18405

Dielectric constants of alkali and thallium halides determined for various temperatures and frequencies, showing results obtained on sodium chloride 07 p1108 A66-18417

Superconductivity of tin diffused niobium wires, comparing obtained transition temperature changes with De Sorbo data 08 p1267 A66-18633

Experimental apparatus for studying temperature dependence of electrical properties of semiconductors at low temperature 08 p1221 A66-18705

Deformation of polycrystalline MgO at elevated temperatures, with stress-strain curves for five types 08 p1243 A66-18773

Gas temperature effect on thermal condition of vanes during acceleration of gas turbine engine 08 p1281 A66-18866

Temperature dependence of optical birefringence on single crystals of lead zirconate-titanate solid solution measured, noting they are optically negative 08 p1269 A66-19006

Kinetics of hydroxyl radical in aqueous solution, examining electron spin resonance spectrum as function of flow rate, temperature and mixture composition 08 p1178 A66-19066

Electrical properties of alpha ferric oxide containing magnesium, noting temperature effect, carrier concentration, conductivity variations, etc 08 p1271 A66-19221

Dependence of lifetime on dislocation density in vacuum-zone purified silicon single crystals 08 p1272 A66-19242

Grid dispersion mobility dependence on temperature in p-type Ge, noting discrepancy of theoretical and experimental results 08 p1273 A66-19257

Correlation factor for induced radiation frequency shifts and crystal temperature variations in ruby laser 08 p1233 A66-19269

Time resolved photoluminescence spectra of two green broad emission bands in CdS as function of temperature, attributing new structure to transverse optical phonons 08 p1276 A66-19368

Liquid oxygen density as function of temperature and pressure 08 p1280 A66-19428

Crystallization kinetics of tri-alpha-naphthyl benzene in large temperature range, noting transition in morphology, crystal growth rate and viscosity 08 p1179 A66-19595

Charging current density, electrolyte concentration and temperature during charge effects on porous cadmium electrodes in nickel cadmium cells 08 p1171 A66-19645

Effect of low temperature on maintenance of vented sintered-plate nickel-cadmium batteries, noting charging methods 08 p1173 A66-19659

Temperature change effect on cumulative fatigue damage on 24S-T3 aluminum alloy and type 301 stainless steel 08 p1242 A66-19720

Resistance temperature dependence, Hall constant, thermal emf and Hall mobility of silicon with phosphorus impurities 08 p1278 A66-19772

Hall effect in germanium telluride samples with various current carrier concentrations at temperatures up to 500 degrees C 09 p1413 A66-20000

DC pair-tunneling peaks in two superconductors with thin insulation at finite voltages as affected by temperature variations 09 p1418 A66-20036

Temperature dependence of Ginzburg-Landau coefficient in type I superconductors 09 p1420 A66-20048

Magnetocaloric effects in high-field superconductor, noting magnetic field-induced temperature variation effects on thermally isolated superconducting alloy specimen 09 p1420 A66-20051

Sample resistance of niobium oxy-nitrides as function of temperature, using four-contact DC technique 09 p1424 A66-20073

Forced convection problem for steady fully-developed laminar flow in straight channel when fluid properties are functions of temperature 09 p1366 A66-20175

Dynamic flexural rigidity of polymer plates, measuring elastic modulus, noting variation of Youngs modulus, Poisson ratio with temperature and rate of loading 09 p1466 A66-20183

Wave propagation in magnetoplasmas noting momentum transfer, dispersion relations, temperature relaxation effects and collisional energy exchange 09 p1408 A66-20372

Dependence of step-like structure of voltage characteristics of superconducting Sn-I-Sn tunnel junction as function of temperature, magnetic field and junction dimensions 09 p1428 A66-20593

Logarithmic temperature dependence of electrical resistivity found in metallic impurity conduction in n-type germanium 09 p1430 A66-20849

Temperature dependence of electrical conductivity in molybdenum and tungsten at 4.2 to 300 degrees K 09 p1391 A66-20862

Tempering temperature effect of annealed and workhardened steel on structural stability 09 p1391 A66-20863

Temperature and environment effect on absorption spectra of two-level system, using stochastic model and Green function 09 p1348 A66-20959

Vapor etching of gallium arsenide crystals with hydrogen chloride, noting usefulness in pretreatment for epitaxial substrates 10 p1575 A66-21358

Lubricant testing for supersonic aircraft, examining temperature requirements, viscosity, evaporation characteristics, etc 10 p1539 A66-21399

Superconducting continuous film store evaluated, noting switching thresholds and functional dependence of disturb pulse sequences on film parameters 10 p1509 A66-21416

Superconductivity of composite of fine niobium wire in copper, measuring critical temperature, transverse magnetic field, current density, etc 10 p1575 A66-21535

Frequency and temperature effects on dielectric properties of calcium, strontium and barium fluorides 10 p1577 A66-21561

Dynamic transient thermal response and voltage feedback in junction transistors 10 p1512 A66-21764

Nonstationary problem of thermal explosion, taking into account temperature dependence on induction time coordinate 10 p1622 A66-22018

Phonon series in cadmium sulfide single crystal emissions at low temperature range 10 p1583 A66-22025

Atmospheric properties important to aviation and aerospace medicine including composition, weather conditions, radiation, temperature effect at various heights, etc 10 p1553 A66-22105

Temperature and alloying effect on indium antimonide reflection spectrum 10 p1588 A66-22159

Temperature dependence of crystalline ammonia elastic moduli 10 p1589 A66-22166

Temperature dependence of dielectric properties of antiferroelectrics of perovskite structure in SHF range 10 p1589 A66-22168

Silicon and lead sulfide electron paramagnetic resonance spectra, showing gas action and temperature effect on EPR signal amplitude and absorption lines 11 p1748 A66-22276

Yield strength dependence on normal to cryogenic temperatures of high strength alloys [ASME PAPER 65-PROD-14] 11 p1715 A66-22475

Electron beam machines for thermal

milling, noting factors influencing size of heat affected zones such as current density, lens aberration, temperature rise, etc 11 p1710 A66-2270

Losses and overheating temperature dependences in toroidal coils with various core configurations 11 p1667 A66-2279

Selection of minimum noise temperature for HF amplifiers in SHF receivers 11 p1667 A66-2279

Changes in domain structure of cobalt films as function of substrate temperature during sputtering and transformation from poly- to single-crystal structure 11 p1753 A66-2280

Abrasion of reverse side of cutter effect on thermal state of cutter during sharpening of steel specimens 11 p1710 A66-2286

Devitrification of glass around collapse bubbles in tektites, noting formation mechanism 11 p1773 A66-2296

Thermally grown silicon dioxide layer examined, noting ionic and structural changes induced by applied electric fields at different temperatures 11 p1756 A66-2302

Temperature dependence of thermal diffusivity and thermoconductivity of symmetrical body 11 p1786 A66-2306

Circuit design techniques for linear integrated circuits, noting manufacturing methods, achievement of monolithic construction, etc 11 p1670 A66-2324

Single observation method for determining coefficient of heat transfer as function of temperature in stationary regime 11 p1787 A66-2331

Temperature dependence of electrical resistivities of dilute binary alloys, using phenomenological approach of Krishnan and Bhatia 11 p1718 A66-2336

Meteorological effects on atmospheric concentrations of radon beta activity in ground proximity, noting effects of wind temperature, radioactive precipitation and atmospheric scavenging 11 p1731 A66-2348

Variational principle application to heat conduction in solids, noting temperature dependence, physical meaning of Lagrangian heat flow between parallel plates, etc 12 p1975 A66-23542

Vibrocreeep mechanism resulting from polymeric material heating under vibrating load, noting increase of creep rate and structural changes 12 p1958 A66-23665

Simulation of lubricating oil circulation in aviation turbine engines by constructed model, noting change of viscosity, acid number and electrical conductivity at high temperatures 12 p1803 A66-23751

Metastable Ti-Mo-Fe-Al beta-alloy system, discussing metal hardening, heat effects, etc 12 p1893 A66-23761

Hydrogen effect on strength, plasticity and brittleness of metals with fcc lattice at various temperatures and hydrogen concentrations 12 p1894 A66-23763

Strain rate and temperature changes in solution hardened niobium alloy, emphasizing behavioral difference between pure niobium and alloy, noting flow stress 12 p1894 A66-23941

Transient processes in thermistor circuits during pulsation-type variations in heat transfer 12 p1978 A66-24369

Time-temperature total hemispherical emittance study of gold-plated 304 stainless steel in temperature range of 1000-1800 degrees F 12 p1895 A66-24376

Absorption spectrum of germanium at various temperatures and wavelengths and of heavily doped germanium at room temperature, obtaining agreement for both cases with theory of structural absorption of holes 12 p1929 A66-24452

Frequency distribution of route temperature at supersonic flight levels, noting effect on payload during extended trips [AIAA PAPER 66-371] 12 p1802 A66-24499

Prior creep exposure on 1400 degrees F strength of Inco 713 cast nickel-base alloy, discussing microstructural change effects on mechanical properties [ASME PAPER 65-WA/MET-12] 12 p1896 A66-24542

Kinetic theory of dense gases generalized for all orders, deriving integral equations for transport coefficients and showing

- temperature dependence of bulk viscosity 12 p1979 A66-24565
- Low temperature behavior of manganese permanganate compared to manganese titanate, noting magnetic susceptibility 12 p1931 A66-24811
- Heat treatment effect on structure, hardness, microhardness and corrosion resistance of VT1 titanium and OT4 titanium manganese-aluminum alloy 12 p1897 A66-24900
- Sheets 12 p1897 A66-24900
- Oxidation of hot pressed and extruded zirconium during heating in air at various temperatures and for various heating times 12 p1897 A66-24902
- Granato-Luecke frequency dependent internal friction calculated for pinning point distributions after vibration at dislocation temperature 12 p1971 A66-24922
- Aluminum alloy with various metal additions analyzed for aging, using electron microscope 12 p1898 A66-25022
- Aging effect on structure of cobalt alloys annealed at 1200 degrees C suggests formation of laminar regions 12 p1898 A66-25030
- Direct current conduction of thin evaporated silicon oxide films, noting functional dependence on degree of oxidation, composition, temperature and adherence to Schottky emission 13 p2157 A66-25034
- Magnetization of synthetic filamentary superconductors, discussing sample preparation, critical field and transition temperature effect on flux jumping and magnetic hysteresis loop 13 p2157 A66-25037
- RF sputtering of insulators, noting effects of auxiliary magnetic field, electrode size, oxygen concentration, substrate temperature and target material on thin dielectric film formation 13 p2157 A66-25039
- Length changes in electron irradiated high purity germanium at liquid helium and nitrogen temperatures, noting large initial expansion 13 p2157 A66-25047
- Electroreflectance effect on gallium arsenide surfaces, noting reflectance response upon electric field modulation 13 p2158 A66-25051
- Deviations from BCS behavior in temperature dependence of ultrasonic absorption in superconducting tin 13 p2158 A66-25056
- Ultrasonic observation of magnetization and flux jumping in superconducting niobium-zirconium alloy, analyzing field penetration effect on temperature dependent compressional wave absorption structure 13 p2159 A66-25071
- Relationship between shock wave phenomena during collapse of cavitation bubbles in water and temperature and gas content of water 13 p2060 A66-25091
- Thermoplastics behavior under cyclic stress, noting failure under crack propagation or temperature due to damping capacity 13 p2112 A66-25306
- High temperature structural properties of polybenzimidazole, polyimide and phenolic laminates under different loading conditions 13 p2113 A66-25311
- Alloying effects on temperature dependence of titanium normal elastic modulus between -186 and 800 degrees C 13 p2106 A66-25329
- Glow-discharge shock tube examination of chemiluminescent, surface-catalytic and gas-phase reaction rates, noting temperature dependence of NO-O and CO-O chemiluminescent reactions 13 p2016 A66-25368
- Nitrogen adsorption effect on thermionic emission from polycrystalline tungsten ribbon at high and low applied fields, explaining work function changes 13 p2162 A66-25381
- Temperature dependence on Hall effect of thin iron layers 13 p2162 A66-25412
- Hall mobility and Hall constant variation for lead telluride-tin telluride polycrystals at high temperatures 13 p2163 A66-25419
- HF and LF alternating electric fields effect on weakly ionized argon, temperature modulation and production of harmonics 13 p2141 A66-25447
- Photo emf of gallium arsenide determined as function of temperature, light intensity, external electric field and surface quality 13 p2165 A66-25679
- Photoconductivity and optical transmission of cadmium-indium-telluride, noting temperature dependence 13 p2165 A66-25685
- Effects of notch geometry on mechanical behavior /yield strength, tensile strength, etc/ of duplex annealed quaternary alloy at various temperatures 13 p2109 A66-25856
- Resin compacts prepared by high temperature compression of hardened resins mixed with unhardened resins, noting strength, thermal behavior and physicochemical properties 13 p2113 A66-25911
- 24-channel recorder for stress-strain states due to thermal effects of operating epoxy-resin machine components 13 p2080 A66-25914
- Cadmium sulfide and cadmium selenide recombination centers, discussing temperature dependence of electron capture cross sections 13 p2168 A66-25936
- Spectrum of electron excitations with small energies compared to critical temperature of superconducting transition in absence of magnetic field 13 p2168 A66-25978
- Bonded-wire, foil and semiconductor strain gauges, noting design, operation, application, gauge materials, temperature effect, etc 13 p2081 A66-26100
- Uniaxial tensile test data on stress-strain properties of polymers and elastomers as function of strain rate and temperature 13 p2115 A66-26118
- Absorption behavior of optically pumped ruby rod, noting amplification at room temperature and absorption at cryogenic temperature 13 p2098 A66-26174
- Temperature effect on displacement and resonance line broadening of rubidium excited by argon 13 p2104 A66-26344
- Inverse variation of external efficiency of incoherent radiation in GaAs diode with temperature due to increased absorption, noting constancy of quantum efficiency 13 p2105 A66-26570
- Heat transfer in Couette flow of radiating fluid with viscous dissipation, noting conduction coupling, effects of temperature level, profile, wall emission, fluid optical thickness, etc 13 p2210 A66-26718
- Simultaneous diffusion of momentum and energy in turbulent mixing, noting static and stagnation properties, density and temperature variations, flow pattern, etc 13 p2070 A66-26721
- Shrinkage process in zirconium diboride during sintering, noting variation with length of isothermal processing 14 p2310 A66-26789
- Magnetic field-temperature relations of type II superconductor Nb upon adiabatic magnetization of superconducting state 14 p2350 A66-26877
- Structural effect on DC magnetic behavior of high temperature alloys 14 p2311 A66-26884
- High speed milling of titanium alloys, discussing cutting velocities, feed rates, tool wear, etc [ASTME PAPER MR66-151] 14 p2299 A66-26952
- Effect of temperature on cyclic minimum creep rate and other phenomena associated with cycle dependent deformation from 77.4 to 295 degrees K [ASME PAPER 66-MET-7] 14 p2395 A66-26975
- Effect of vacuum arc remelting of airmelt electrodes on structure and elevated temperature properties of nickel base gas turbine superalloy [ASME PAPER 66-GT-113] 14 p2313 A66-27007
- Circumventing turbine inlet temperature limitation of gas turbines by direct fluid-to-fluid energy exchanger, using isentropic compression waves to avoid shock losses [ASME PAPER 66-GT-117] 14 p2373 A66-27009
- Temperature dependence of dielectric permittivity and relative expansion of bismuth ferrite in large temperature intervals, detecting phase transitions 14 p2357 A66-27078
- Semiconductor properties of reduced barium titanate analyzed by electron spin resonance measurements at various temperatures 14 p2359 A66-27132
- Thallium admixture effect on electrical conductivity of crystalline and liquid selenium, noting decrease and increase in conductivity, determining temperature dependency and activation energy 14 p2359 A66-27177
- Crack susceptibility of ultrahigh-strength steel welds related to thermal cycles in welding and heat treating 14 p2292 A66-27325
- Crack susceptibility of ultrahigh-strength steel welds related to thermal cycles in welding and heat treating 14 p2301 A66-27345
- Mathematical analysis of relationships between weld strength, maximum temperature and time at temperature of type 2219 aluminum 14 p2302 A66-27347
- Elastoplastic properties of copper, aluminum alloys and brass under explosive load, noting increased temperature effect on elastoplastic wave parameters 14 p2314 A66-27370
- State equation analysis from tensile or compression test data and influence of strain, strain rate and temperature on strain-hardening curve for metals such as Al, Cu, Pb, etc 14 p2397 A66-27393
- Response of Langmuir probes in rocket exhaust jets, noting sensitivity to chamber temperature and pressure and alkali metal concentration 14 p2294 A66-27421
- Oxygen addition to niobium-zirconium alloys at high temperatures, noting oxygen solubility and oxide precipitation 14 p2315 A66-27492
- Elutration diagrams in determination of adsorption enthalpies from temperature dependence of retention volume in band maximum 14 p2232 A66-27604
- Viscosity of liquid nitrogen and oxygen measured as function of temperature and pressure 14 p2276 A66-27642
- Temperature-dependence of electric conductivity and Hall coefficient in semiconductors 14 p2364 A66-27730
- Temperature variation and carrier concentration effects on density-of-states effective mass, polar and dipolar thermoelectricity, electron and phonon scattering and electron-phonon interaction in doped Si-Ge alloys 14 p2365 A66-27759
- Strength of adhesive-bonded lap joints as affected by changes in temperature and fatigue 14 p2401 A66-27772
- Light output of alpha particles in crystalline and vapor anthracene as function of pressure and temperature 14 p2296 A66-27796
- Space probe sterilization procedures, considering heat and radiation 14 p2230 A66-27844
- Antenna cost, efficiency, noise, minimum detectable signal and signal temperature relationships 14 p2257 A66-27928
- Shear relaxation time of monatomic fluids for liquid and dense gas phases calculated, using LF viscosity data and estimates of HF elastic moduli 14 p2277 A66-27977
- Structure and mechanical properties of rolled aluminum clad products obtained from SAP, noting microstructural flaws 14 p2303 A66-28194
- Temperature of container heated during pressing aluminum alloy sections 14 p2304 A66-28204
- Electric oscillation by monochromatic light in high resistivity gallium arsenide, noting temperature dependence 14 p2369 A66-28259
- Current-voltage characteristics of gallium arsenide diode, noting temperature effect on threshold voltage and breakdown current 14 p2260 A66-28297
- Temperature effect on motion stability of fluid between rotating cylinders 14 p2415 A66-28323
- HF transistor circuit design, noting effect of bias frequency and temperature on y and h parameters 14 p2261 A66-28369
- Temperature dependence of FET drain characteristics, square wave behavior, carrier mobility transfer characteristics and contact potential 14 p2261 A66-28375
- Differential equation for lubrication layer pressure in gas lubrication of sliding bearings at large transverse temperature drops 15 p2505 A66-28524
- Transient and steady state

photoconductivity in plastically bent germanium, noting logarithmic decay of photocurrent and logarithmic lux-ampere characteristics 15 p2558 A66-28608

Strong electron-phonon interaction which couples electron to lattice motion in F center of alkali halide crystal by measuring temperature dependence of F center absorption and emission bands 15 p2559 A66-28629

Temperature dependence of Hall emf and electrical resistance of Sendust type Fe-Si-Al alloys 15 p2560 A66-28678

Effect of temperature changes on flux-jumping behavior of niobium stannide superconducting solenoids in superfluid helium 15 p2560 A66-28686

Temperature shift of ruby laser emission measured interferometrically for temperatures between 66 and 210 degrees K 15 p2512 A66-28701

Electric conductivity in thin metal films deposited on single crystal sodium chloride substrates, thermally activated with negative temperature coefficient of resistance 15 p2561 A66-28704

Negative effect of air counter currents and thermal stresses on performance of cooling systems of gas turbine rotor disks with lateral air flow 15 p2570 A66-28776

Logarithmic decrements of quartz crystal driven in torsional vibration mode at resonant frequency determined as function of temperature in liquid helium 15 p2537 A66-28869

Optical properties and thermal behavior of new absorption bands in oxygen doped silicon irradiated at low temperatures 15 p2564 A66-28874

Thermal models for microwave dissipation within p-i-n diode for forward and reverse biased states 15 p2458 A66-28890

Intensity of oxygen red line in night airglow analyzed, obtaining temperature dependence of rate coefficients of ion atom interchange reaction and collisional deactivation, noting red line intensity dependence on solar activity 15 p2484 A66-28905

Atmospheric temperature changes as factor in detection of clear air turbulence, especially above 25,000 ft, noting aircraft instrumentation used 15 p2532 A66-28918

Temperature dependence of line width and anisotropy field in Mn substituted ZnY 15 p2565 A66-29028

Liquid flow with viscosity changing under effect of nonisothermicity 15 p2478 A66-29222

Surface degradation-vaporization characteristics of porous polystyrene under intense surface heating in inert and reactive atmosphere, measuring regression rate [ATAA PAPER 65-58] 15 p2616 A66-29278

Temperature and creep aftereffect in high purity crystalline cadmium 15 p2523 A66-29600

Biological and engineering problems in spacecraft sterilization, noting heat treatment 15 p2445 A66-29996

Lewis method for obtaining thermodynamic relation between energy gap of superconductor and critical field and temperature slope 16 p2768 A66-30141

Subharmonic structure in superconductive Pb-Pb tunneling junctions, noting energy gap values and background current temperature dependence 16 p2769 A66-30160

Very low DC voltage measurement using chopper principle, based on resistance effect and employing magnetically controlled resistances 16 p2701 A66-30274

Superconductivity of chalcogenide lanthanum telluride, noting temperature variations relationship to stoichiometric composition of samples 16 p2772 A66-30290

Centrifuge performance, noting angular velocity constancy vibration levels in terms of acceleration, temperature effects, etc 16 p2679 A66-30476

Sliding characteristics of polytetrafluoroethylene (PTFE)/dry lubricant, examining effects of time, temperature and environment 16 p2713 A66-30570

Extruded tungsten composites containing fibered or reacted additives examined, noting stress rupture life, temperature

effect, creep properties, density, hardness, etc 16 p2723 A66-30639

Temperature dependence of domain structure of thin ferromagnetic films prepared by thermal evaporation in vacuum 16 p2774 A66-30696

Temperature dependences of coercive force, hysteresis loops and domain structure of thin iron-gadolinium alloy films 16 p2774 A66-30698

Temperature effect on UV absorption continuum of oxygen, using photoelectric techniques, obtaining absolute absorption cross sections 16 p2695 A66-30711

Limiting conditions of temperature, gas flow rate and heat removal for combustion of methane in atomic oxygen, calculating heat balance of process 16 p2827 A66-30792

Paramagnetic resonance spectra shift due to temperature change in cross-relaxation rutile maser 16 p2718 A66-30820

Phonon series in cadmium sulfide single crystal emissions at low temperature range 16 p2776 A66-30844

Thermal conductivity of polytetrafluoroethylene, noting temperature effect, crystal structure, etc 16 p2730 A66-30854

Temperature dependence of resistivity of zirconium oxide with copper oxide additions indicates suitability as heat sensitive resistor material in 300 to 1000 degree C range 16 p2777 A66-30872

Transition variable as function of superconductor reduced temperature, showing temperature dependency of penetration depth, acoustical attenuation and thermoconductivity 16 p2777 A66-30937

Effect of thermal population of /000/ and /100/ conduction bands on elastic constants of heavily doped n-type germanium 16 p2778 A66-31070

Electrical conductivity of metals, explaining electron scattering amplitude changes, phonon spectrum distortion and temperature effects caused by impurity concentration in conductor 16 p2780 A66-31180

Temperature effect on color of thin layers of gold of various thicknesses connected with anomalous absorption phenomenon in gold layers 16 p2780 A66-31212

Mechanical behavior of polycrystalline iron and single crystal molybdenum in compression over various strain rate ranges, noting temperature role 16 p2724 A66-31264

LF internal friction of beryllium, noting strain amplitude dependency variation with temperature and purity, obtaining activation energies 16 p2724 A66-31265

Temperature and structure effect on hydride precipitation kinetics in titanium, using resistometric technique, noting nucleation problem 16 p2724 A66-31266

Molybdenum films prepared by sputtering onto oxidized silicon substrates, analyzing resistivity, lattice parameter, orientation and grain size as function of substrate temperature and bias 16 p2783 A66-31424

Structure and electrical resistance as function of temperature for Nichrome-silicon monoxide cermet films on single crystal Si substrates 16 p2783 A66-31425

Effect of storage in air at high temperatures on resistance, temperature coefficient of resistance of metal alloy film resistors, noting effect of silicon oxide protective overcoating 16 p2783 A66-31426

Effects and parameters influencing optical path length within pumping process in ruby and doped glass laser rods 16 p2719 A66-31443

Mechanical properties of semiconductors, such as elastic modulus and internal friction determined, noting vacuum and temperature conditions 16 p2785 A66-31669

Preparation temperature and condensation rate effect on current carrier mobility in lead selenide and telluride films 16 p2787 A66-31769

Temperature dependence of lifetime of electrons and holes in GaAs, noting trapping effect of recombination centers and capture levels 16 p2787 A66-31771

Photo-Hall effect and photoconductivity on compensated p-InSb at low temperatures, examining temperature dependence of carrier mobility 16 p2788 A66-31773

Temperature dependence of mean ionization energy changes in germanium and silicon samples exposed to X-rays caused by changes in forbidden bandwidth 16 p2788 A66-31782

Peculiarities of Hall curves of n-type alpha silicon carbide, noting concentration of conduction electrons related to temperature 16 p2789 A66-31789

Energy levels in forbidden band of gallium arsenide alloyed with silver or gold determining impurity levels from temperature dependence of electric conductivity and Hall constant 16 p2789 A66-31791

Structural changes effect on creep resistance of heat resistant alloys 16 p2728 A66-31801

Electrical conductivity and Hall mobility of p-and n-type semiconductors at various temperatures 17 p2975 A66-31900

Temperature dependence of electrical resistance of thin nichrome films investigated by vacuum deposition on mica base 17 p2939 A66-31965

Integrated and transistor circuit design, discussing parasitic effects, diode structures, volt-ampere characteristics, capacitors and resistors, temperature and doping effect, etc 17 p2881 A66-32104

Space cabin contamination control, discussing temperature effects, analysis by IR gas chromatography and chemical methods 17 p2863 A66-32144

Charge carrier mobility variation with temperature in copper phthalocyanine thin film 17 p2977 A66-32286

Model of reentry plasma layer consisting of magnetic line source in ground plane, determining plasma temperature effect, computing radiation pattern of far-zone field 17 p2875 A66-32387

Electron capture detector parameters in pulse sampling mode analyzed, noting kinetic processes, temperature effect, etc 17 p2961 A66-32660

Snow runway construction, discussing physical characteristics of snow, mechanical properties related to supporting capacity, temperature effect, etc 17 p2904 A66-32933

Linearity of mechanical behavior and applicability of yield stress master curve analyzed for various crystalline-type polymers 17 p2943 A66-33004

Fluorescence bands produced by electron bombardment of ZnSe show threshold of annealing stages of radiation damage 17 p2985 A66-33154

Electron-hole conductivity effect on temperature variations of Hall coefficient and Nerst-Ettingshausen effect in semiconductor 17 p2986 A66-33309

Proper mechanical vibrations effect on some properties of triglycine sulfate TANDEL /temperature autostabilizing nonlinear dielectric element/ 18 p3075 A66-33632

Elevated temperature tensile properties of copper alloy-tungsten fiber-reinforced composites 18 p3120 A66-33724

Rhenium effect on interface energies of Cr, Mo and W, noting liquid surface tension, solid surface energy and grain-boundary grooving 18 p3121 A66-33726

O-O and O-N clusters in niobium detected via internal friction and elastic aftereffect measurements, noting equilibrium, kinetic properties, binding enthalpy, etc 18 p3121 A66-33728

Temperature and strain rate effects on yield and flow stresses of alpha titanium determined, using continuous and differential testing 18 p3122 A66-33748

Hardness and lattice parameter increase effect on oxidation temperature of internally oxidized Ag-Mg and Ag-Al alloys 18 p3122 A66-33750

Geometric dimensional, plasma temperature and pressure effects on capillary discharge with evaporating wall /CDEW/ 18 p3143 A66-34028

Black body radiation, pressure and temperature dependences of equilibrium composition, enthalpy, specific heat and electron density of air-carbon plasmas 18 p3144 A66-34040

H, C, N, O, Cl, Ca and Al negative ion formation in plasma, noting role of

- continuous radiation, formation temperature
metastable and stable 18 p3144 A66-34041
- temperature effects in n-type and p-type
PS Si transistors 18 p3077 A66-34075
- microwave coaxial termination as low
temperature noise-reference source, noting
variation of VSWR with voltage and
frequency 18 p3077 A66-34078
- fatigue damage accumulation in materials
high temperatures under variable loads,
aging calculation of fatigue 18 p3254 A66-34230
- zero bias anomalies in normal metal tunnel
junctions, noting dependence of dynamic
resistance of junction on voltage and
temperature 18 p3156 A66-34469
- evaporation of liquid fuel injected in
rotated horizontal circular pipe for straight
and swirl air flow, noting increased rate of
evaporation in swirl airflow for increased
fuel supply 18 p3265 A66-34490
- radiant equilibrium temperature of opaque
absorbing body relation to radiative
temperature variations of 18 p3265 A66-34611
- photoconductivity of thin layers of CdS,
noting intrinsic maximum for various
impurities, temperature effect, activation
energy, etc 18 p3157 A66-34628
- lubrication for spacecraft application
under space conditions of vacuum,
temperature and 18 p3117 A66-34650
- radiation, time and loading conditions
for adhesion or cohesion of structural
metals in vacuum 18 p3117 A66-34651
- disintegration of alkali halide single
crystals, polymers and glasses under laser
radiation, noting parameters of
disintegration region 18 p3119 A66-34681
- Ne-He laser output dependence on
pressure and nonexcited atom
concentration 18 p3119 A66-34696
- solar and sidereal daily variations of
cosmic ray intensity at depth of 60 mwe
underground in London 18 p3178 A66-34763
- temperature behavior of transistor using
reference equivalent temperature-drift
surfaces at input of idealized drift-free
transistor 18 p3088 A66-35041
- temperature dependence of sputtering
yields of germanium under low energy ion
bombardment, observing atom ejection
patterns above annealing
temperatures 19 p3436 A66-35422
- dielectric constant variation in silicon
single crystals, noting frequency dependence
of dielectric loss, conductivity and
temperature effects 19 p3436 A66-35423
- temperature effect on dry friction
coefficient in titanium
alloys 19 p3376 A66-35462
- magnetic properties and structure of
ferromagnetic films obtained on single-
crystal sodium chloride substrates heated to
various temperatures during spray
coating 19 p3438 A66-35497
- microorganism changes under extreme
environmental factors, noting possible
Martian life and meteoritic organic
compounds 19 p3284 A66-35574
- survival and growth of *Bacillus cereus* and
S. subtilis in simulated Martian environment
of diurnal temperature cycling and low
moisture and oxygen
level 19 p3284 A66-35576
- formation of sporadic E layer in middle
latitudes due to transport phenomenon and
local production 19 p3346 A66-35589
- cracking and stress corrosion of titanium
alloys noting test environment, temperature
and measurement
techniques 19 p3378 A66-35652
- stress corrosion cracking of titanium alloy
in long duration and high temperature tests,
singing salt coating of
specimens 19 p3379 A66-35657
- tungsten heat conductivity between 1500
and 3000 degrees K and Lorentz number
temperature dependence 19 p3380 A66-35750
- temperature and alloying effect on indium
antimonide reflection
spectrum 19 p3440 A66-35773
- temperature dependence of crystalline
ammonia elastic moduli 19 p3441 A66-35780
- temperature dependence of dielectric
properties of antiferroelectrics of perovskite
structure in SHF range 19 p3441 A66-35782
- lithium-drifted germanium detector
resolution and efficiency as function of
temperature for gamma
rays 19 p3359 A66-35915
- hardening during deformation in
stoichiometric nickel manganite alloy noting
temperature effect, surface characteristics
and electric resistance 19 p3381 A66-35930
- minimum electric resistivity of chromium
in antiferromagnetic state shows no
disappearance in longitudinal magnetic
field 19 p3444 A66-36071
- singularities of temperature dependence of
electric resistivity of aluminum at helium
temperatures 19 p3382 A66-36072
- pulsed laser action in visible spectrum of
singly ionized Ge, Sn, Pb, In, Cd and Zn,
listing temperature and pressure
ranges 19 p3444 A66-36076
- temperature and magnetic field effect on
flux pinning by superconducting Sn
precipitates in lead-indium matrix, noting
occurrence of magnetic
hysteresis 19 p3444 A66-36077
- tensile properties of shear spun W in
various high temperature intervals between
900 and 6000 degrees F 19 p3383 A66-36131
- effect of electric and magnetic properties
of titanium oxide explained through
Matsubara and Yokota theory extended to
finite temperatures 19 p3444 A66-36175
- thermal conductivity measurements for
hydrogen via coaxial cylindrical cell noting
temperature, pressure effects, residual and
conductivity values 19 p3479 A66-36290
- approximate molecular-field and quantum
mechanical methods used to describe
temperature dependence of saturation
magnetization in ferrites and
ferromagnets 19 p3445 A66-36317
- electrical conductivities of boron
trifluoride in chlorine and bromine
trifluorides studied as function of
temperature and
concentration 19 p3295 A66-36367
- freezing of supercooled water drops to
determine dependence of heterogeneous
nucleation on temperature and on duration
of supercooling 19 p3394 A66-36384
- electric conductivity of beta and gamma
phases of tantalum-carbon system as
affected by temperature and
composition 19 p3386 A66-36424
- temperature dependence of UV radiation
absorption coefficient in quartz undergoing
phase transition for several spectral
lines 19 p3447 A66-36722
- internal friction as function of
temperature in cold worked tantalum and
niobium containing oxygen and
nitrogen 19 p3387 A66-36729
- temperature dependence of dissociative
recombination coefficients in argon
according to hypotheses of Bates and
Palgarno 19 p3404 A66-36758
- temperature effect on dispersion and
damping of electron plasma
wave 19 p3432 A66-36762
- statistical thermodynamics of Fermi and
Bose gases 20 p3674 A66-36905
- density of lithium, sodium and potassium
up to 1600 degrees C, using pycnometer
method, showing dependence of density on
temperature 20 p3582 A66-36979
- spatial correlation coefficients and
transverse temperature perturbation scales
during turbulent nonisothermal flow of
mercury in circular pipe 20 p3607 A66-36982
- P-V-T behavior of argon, nitrogen and
argon-nitrogen gas
mixtures 20 p3677 A66-37089
- three-dimensional heat conduction of body
of revolution of arbitrary shape for
exponential temperature-time
relationship 20 p3678 A66-37112
- selection of minimum noise temperature
for HF amplifiers in SHF
receivers 20 p3525 A66-37132
- high saturation core material magnetic
behavior, noting structural instability
accompanied by deteriorating magnetic
properties at high
temperatures 20 p3583 A66-37258
- superconducting transition temperature of
thin film, showing growth of temperature
and decrease in film thickness due to
phonon electron
interaction 20 p3616 A66-37378
- work function of semiconducting barium
titanate as function of temperature for
testing Heywang theory of polycrystalline
material anomalous resistance
behavior 20 p3616 A66-37404
- conductivity, temperature dependence,
thermal emf Hall constant, thermal
conductivity and resistivity of aluminides of
transition metals 20 p3584 A66-37417
- dependence of Hall effect and conductivity
of irradiated samples on reciprocal
temperature in nuclear transmutations
produced in InSb by bombardment with
slow neutrons 20 p3617 A66-37485
- book on transonic and hypersonic flow
theory covering motion and shock equations,
application of Newtonian theory,
temperature effect, behavior of minimum
drag bodies, etc 20 p3492 A66-37495
- thermal conductivity of lanthanum and
monochalcogenides, noting role and
temperature dependence of crystal-lattice
conductivity 20 p3617 A66-37556
- radio emission of Venus at 3 cm and solar
activity 20 p3653 A66-37616
- absorption spectrum of germanium at
various temperatures and wavelengths and
of heavily doped germanium at room
temperature, obtaining agreement for both
cases with theory of structural absorption of
holes 20 p3619 A66-37684
- japanese antenna engineering, discussing
linear, microwave, slot and plate antennas,
arrangement, radiation and temperature
characteristics, etc 20 p3529 A66-37704
- stimulated Brillouin scattering in
ferroelectric triglycine sulphate crystals and
Rochelle salt exhibiting second-order phase
transition, measuring scattering threshold as
temperature function 20 p3620 A66-37770
- photodissociation laser system, discussing
output energy dependence on pressure,
temperature and number of successive
optical pumping flashes 20 p3579 A66-37781
- spin wave excitation by ferromagnetic
resonance, measuring coercive field as
function of temperature by Kerr effect
method and determining magnetic properties
of thin films 20 p3621 A66-38085
- gas sorption and desorption processes at
low pressures, discussing molecular
adherence to cold solid surfaces, adsorption
mechanism of isotherms, vacuum generation
via cryotrapping effect,
etc 20 p3605 A66-38088
- dependence of step-like structure of volt-
ampere characteristics of superconducting
Sn-I-Sn tunnel junction as function of
temperature, magnetic field and junction
dimensions 20 p3622 A66-38126
- thermodynamics of molten lithium nitride
galvanic cell, noting emf temperature
dependence 20 p3503 A66-38189
- successive approximation method for
solving fundamental equations of nonlinear
flexural vibration for rectangular elastic
plate, noting effect of temperature and
large amplitude 20 p3872 A66-38236
- quenching, annealing and high temperature
treatment effect on transverse rupture
strength of sintered tungsten carbide
[ASME PAPER 66-MD-17] 21 p3750 A66-38478
- minimum changes in viscosity of liquid
lubricants with temperature, discussing low
temperature lubricating oils
[ASME PAPER 66-MD-68] 21 p3743 A66-38497
- metallurgical and design characteristics of
dispersion strengthened metals as function
of temperature
[ASME PAPER 66-MD-88] 21 p3750 A66-38505
- relationship between shock wave
phenomena during collapse of cavitation
bubbles in water and temperature and gas
content of water 21 p3723 A66-38516
- thermoelastic stresses in elastic strips and
cylinders, computing numerical value along
axes and centers of
elements 21 p3826 A66-38590
- creep analysis at variable temperatures,
noting creep rate and strain, transformed
time hypothesis, temperature gradient
effect, etc 21 p3826 A66-38615

Sound absorption in air at 1/3-octave frequency intervals as function of humidity and temperature at normal atmospheric pressure for studies in room acoustics 21 p3769 A66-38648

Breakdown diodes in voltage stabilization, noting temperature effects, cascade switching, etc 21 p3710 A66-38748

ESR line width of phosphorus doped silicon measured, noting relation between line width and temperature in metallic impurity conduction 21 p3798 A66-38764

Temperature variations due to noise sources via feedback paths and variations of system energy, noting influence on noise parameters of transistor 21 p3711 A66-38834

Quantum oscillations of Hall effect and longitudinal and transverse reluctance in n-indium antimonide, noting spin splitting and temperature and electron concentration effect on oscillation maximum 21 p3799 A66-38924

Interchannel generation transfer and multichannel generation in laser with four unsplit levels, noting radiation density, temperature effect and variations in coefficients of losses 21 p3746 A66-38956

Magnetic properties of ferromagnetic zinc-zirconium alloy between 120 degrees and 0.1 degrees K, suggesting possible indication of superconductivity 21 p3801 A66-39000

Absorption cross section of electron systems in bands of diatomic molecules calculated, noting effects of temperature variation 21 p3775 A66-39077

Temperature dependence of integral absorption and band half-width in IR spectra of methyl and ethyl siloxanes 21 p3802 A66-39160

Compensation of positive and negative anisotropies in ZnNi and ZnLi ferrites, noting effects of magnetization, wall motion and temperature on rotational permeability 21 p3803 A66-39203

Beryllium properties and application in aerospace noting alloy sheet fabrication, temperature effect, toxicity, impact tests, etc 21 p3752 A66-39239

Kinetic energy causing anomalous increase in thermoelectric power in semiconducting p-type iron-chromium sulfide near Curie temperature 21 p3803 A66-39261

Cryogenic, flame and nuclear radiation temperature effects on pressure transducers, noting zero and sensitivity shifts and thermal gradients 21 p3740 A66-39427

Transient temperature response of transpiration-cooled porous matrix entering planetary atmosphere with constant velocity and negative entry angle 21 p3821 A66-39455

Resistivity and Hall coefficient of Sb doped Ge at He temperatures measured as function of magnetic field and temperature to determine high field effects on impurity conduction 21 p3805 A66-39579

Reflectance measurement of barium titanate single crystal as function of temperature 21 p3805 A66-39583

Transmission electron microscopy on polycrystalline Al, determining hardening and tensile yield stress variations as function of quenching temperature 21 p3753 A66-39586

Vibrocreep mechanism resulting from polymeric material heating under vibrating load, noting increase of creep rate and structural changes 22 p3988 A66-39709

Equations derived for thermal drift of MOS-FET operated at drain voltages beyond pinchoff voltage 22 p3872 A66-39722

Surface properties, temperature effect, cooling and detectability of neutron stars, using pure iron and pure magnesium compositions 22 p3976 A66-39803

Time dependent Ising-model description of binary liquid mixture near critical temperature 22 p3947 A66-39922

IR absorption coefficients of water vapor as function of temperature obtained from absorption and emission spectra 22 p3950 A66-40114

Residual stresses and strains for cases with/without secondary plastic deformations during unloading under nonuniform heating 22 p3990 A66-40144

Method for compensating resistance of strain gauges for thermal

expansion 22 p3918 A66-40155

Brightness temperature of shock waves dependence on wave amplitude in xenon and air at high temperature 22 p3898 A66-40190

Effects of low density, temperature, proton radiation and electromagnetic radiation on thermal control materials, using synergistic testing 22 p3889 A66-40219

Utilization tests of nonradiating Francia cellular structures placed on spiral insulator and heated to low and medium temperatures 22 p3852 A66-40247

Electric field domain motion in Ge samples with Au and Sb impurities, noting temperature and illumination effect on V-I characteristics 22 p3964 A66-40312

Temperature dependence of relaxation-type ultrasound attenuation maxima in plastic deformation of molybdenum and niobium single crystals 22 p3965 A66-40322

Electron beam density measurements, discussing effect of elevated rotational and vibrational temperatures 22 p3918 A66-40365

Steady liquid flow between rotating coaxial cylinders with arbitrary dependence of viscosity on temperature 22 p3902 A66-40814

Temperature dependence of dielectric permittivity and relative expansion of bismuth ferrite in large temperature intervals, detecting phase transition 22 p3967 A66-40834

Contact interaction of titanium nitride with Ti, Zr and V at high temperatures in vacuum 22 p3937 A66-40926

Saha-Langmuir formula applied to description of temperature dependence of positive ion current in surface ionization of silicon atoms, comparing work functions by methods using contact potential, thermionic emission and Richardson graphs 22 p3968 A66-40942

Current characteristics of solution and vapor grown p-n Ge-Si and Ge-GaAs heterojunctions as function of voltage and temperature 22 p3968 A66-40963

Plate and rod systems to test abrupt intensive heating effects, discussing dynamic stresses and bending moments via approximate equations 23 p4137 A66-41004

Miniature welding of joints, discussing wire-to-wire welding and advantages over soldered connections in light of environmental parameters 23 p4043 A66-41195

Crystal defects and performance in ruby laser, measuring coherence function of light and output energy and crystal homogeneity 23 p4077 A66-41291

Physiological and mechanical effects of radial accelerations on brain temperature of dog and rabbit 23 p4026 A66-41336

Low temperature thermodynamic properties of vanadium, discussing specific heats and transition temperatures in superconducting and normal states 23 p4080 A66-41371

Energy gap and critical field rules for superconductors, discussing empirical and experimental values 23 p4113 A66-41375

BCS model extended to intermediate and strong-coupling superconductors effective interaction strength as function of absolute-zero energy gap, phonon-frequency cut-off and Fermi surface density of states 23 p4113 A66-41376

Carbon diffusion into titanium and zirconium nitrides, noting carbide layer parabolic growth rate and experimental techniques 23 p4083 A66-41383

Temperature homogenization effect on structure of industrial aluminum, determining mechanical properties dependency on Fe/Si ratio 23 p4081 A66-41403

Effect of manganese and zirconium additions on recrystallization temperature and grain size of aluminum 23 p4081 A66-41404

Dirac delta function representation of spark ignition, considering heat transfer from reaction zone to fresh gas and flame propagation 23 p4148 A66-41413

Aluminum alloy tube for combustion chamber of Japanese SSR, noting mechanical properties, temperature effects, etc 23 p4081 A66-41424

GaAs semiconductor quantum generator heating during injection pulse, analyzing

temperature effect on external quantum output and generator efficiency 23 p4078 A66-4162

Flame propagation velocity parameters in turbulent flow as function of flow pulsatic velocity, normal burning velocity and relative heating 23 p4149 A66-4171

Line strengths variation in spectra of H 124224 and HD 19832 analyzed, establishing anticorrelation of He I variations with variations in temperature 23 p4130 A66-4180

Similar solutions for laminar boundary layer under forced convection of mixture of fluids with constant mass density and temperature and composition dependence parameters for flat plate analysis 23 p4059 A66-4200

Hydrodynamic stability of incompressible fluid based on Navier-Stokes equations including numerical calculations of boundary layer disturbances and temperature-dependent material constants 23 p4060 A66-4202

Thermal accommodation coefficients of H₂ on tungsten and hydrogen on hydrogen-covered tungsten at temperatures of 32, 403 and 473 degrees K 23 p4033 A66-4205

Thermal responses of man during rest and exercise in helium oxygen environment for various temperatures 24 p4163 A66-4231

Hall coefficient, electrical conductivity and thermoelectric power of GaSb-Ga₂Te₃ solid solutions as functions of composition and temperature 24 p4254 A66-4242

Frequency temperature dependence of longitudinal and transverse hypersonic wave absorption coefficients in quartz and artificial ruby crystal 24 p4255 A66-4251

Magnetostriction of yttrium terbium ferrite garnets, noting absence of correlation between temperature dependences of magnetostriction and magnetization for high Tb content 24 p4256 A66-4251

Approximate solution of variation problem in heat explosion theory, noting difficulty resulting from heat liberation dependence on temperature 24 p4295 A66-4288

Argon entropy diagram calculation from sound velocity data and P-V-T relation 24 p4238 A66-4288

Temperature stabilization of transistorized circuits calculated via equivalent circuit stability characteristics 24 p4185 A66-4289

Dispersion equation for cyclotron electromagnetic waves for magnetoactive plasma injected with charged particles 24 p4245 A66-4301

Carbon solubility in Ta, Nb and V at temperatures from 1500 degrees C to eutectic temperatures 24 p4228 A66-4306

TEMPERATURE FIELD

Measuring apparatus for autoignition time of explosives, propellants and pyrotechnics under various initial vacuum or pressure ranges 01 p0054 A66-10854

Temperature fields in pipe filled with Raschig rings with internal heat source during gas flow calculated by electrical analogy method 01 p0166 A66-10999

Arc temperature field with transpiration cooled anode in argon atmosphere measured by spectroscopy, noting semiluminous region [AIAA PAPER 65-94] 02 p0303 A66-11538

Heat equation of temperature field by monotonic heating or cooling of thin plate 04 p0596 A66-13658

Numerical integration of heat propagation equation, calculating temperature field in fluid flow with variable physical parameters 04 p0596 A66-13658

Niobium resistivity dependence on hydrogen-impurity content at various temperature ranges 05 p0699 A66-14697

Heat transfer and equilibrium temperature on flat plate in region of strong interaction in hypersonic flow 05 p0607 A66-15463

Thermoconductivity measurements of high polar gases and equimolar mixture at various temperature ranges 06 p0968 A66-16121

Curvature effect on response of shells to steady and nonsteady temperature fields [AIAA PAPER 66-84] 06 p0968 A66-17099

Approximate method determining nonstationary thermal fields in solid bodies with thermal capacity and thermoconductivity coefficient depending linearly on temperature 07 p1148 A66-17399

Nonideal superconducting properties of
homogeneous tin alloys with data on
resistive temperature and field transitions,
magnetization curves, etc 07 p1107 A66-18411
Zinc-silver oxide battery for extreme
temperatures, noting electrode utilization
efficiencies as function of current
density 08 p1173 A66-19662
Temperature range of transition from
superconducting to normal state in very
pure lead determined from variation of
specific heat and magnetic
susceptibility 09 p1419 A66-20044
Plastic deformation effect on critical
temperature and magnetic field of
superconducting junctions in titanium under
uniform high compression
09 p1428 A66-20591
Temperature field in infinite plate heated
simultaneously by radiation and
convection 09 p1471 A66-20748
Differential equations describing boundary
conditions at front of change of aggregation
state, computing temperature
field 09 p1471 A66-20825
Temperature field of elements of thin-
shelled surfaces of satellites for radiant
heat transfer 11 p1786 A66-23045
Space and time dependent randomly
distributed stress and temperature fields in
cylinder with deformable surface calculated,
using approximation 12 p1959 A66-23864
Larmor precession of charged particles
effect on nonstationary temperature field in
plane channel 12 p1922 A66-24361
Potential representation of solution of
equations for homogeneous and isotropic
medium in presence of magnetic and
temperature fields 13 p2195 A66-25401
Temperature stresses and heat transfer at
thin plate edges reinforced with thin rods
under nonstationary thermal
conditions 13 p2202 A66-26416
Impurity effects on stress and temperature
field distribution in elastic bodies, deriving
equations 13 p2203 A66-26425
Thermal field effect on stress-strain state
of infinite elastic plane with circular hole
examined, using Muskhelishvili
principle 13 p2204 A66-26435
Stress-strain state and temperature field
near circular hole in thermoelastic plate,
assuming stresses and strains propagate as
waves 13 p2205 A66-26439
Temperature field of infinite plate with
variable temperature at one edge
determined, using double Fourier integral
transform 14 p2411 A66-27166
Behavior of rotating solid and hollow
cylinders of ideal elastoplastic material
subjected to rotation and action of quasi-
steady-state temperature field, considering
adaptability when physicomachanical
characteristics are
constant 14 p2301 A66-27175
Fail-safe system used in temperature
environment testing chambers functioning
independently of control system and
reacting to valve failure, power loss,
etc 14 p2270 A66-27666
Heat accumulation in semifinite body
during abrupt temperature
changes 14 p2415 A66-28321
Two-dimensional thermoelastic problem for
infinite medium with cylindrical
inclusion 15 p2608 A66-28778
Free cooling of thin rod in constant
temperature medium, finding temperature
field for thermodynamics
application 15 p2616 A66-29223
Temperature field distortion in region of
thermocouple function which arises when
thermal conductivity of junction differs
from object whose temperature is to be
measured 16 p2707 A66-31163
Method for observing thermal field of
semiconductor device using temperature
dependence of zinc sulfide
phosphor 16 p2664 A66-31360
Vertical propagation of long period small
amplitude temperature perturbation in
medium with photochemical processes and
radiative heat transfer 16 p2742 A66-31642
Thermoviscoelastic stresses in linear
viscoelastic materials subjected to slowly
moving temperature
fields 17 p3024 A66-32358

Factors determining line reversal
temperature of flame with realistic
temperature cross section explained by
calculation of sodium D-line
contours 17 p3038 A66-33324
Conductive sheet analogy applied to steady
heat conduction problem, noting evaluation
without use of
potentiometers 18 p3265 A66-34491
Velocity and temperature fields in mixed
flow of five turbulent jets injected by
means of separate nozzles into
chamber 18 p3103 A66-35051
Method for determining temperature
dependence of heat conductivity of
dielectric and semiconductor
materials 18 p3159 A66-35054
Statistical characteristics of atmospheric
ozone distribution, determining
autocorrelation and cross correlation
functions, concentration and temperature
profiles 20 p3552 A66-37751
Plastic deformation effect on critical
temperature and magnetic field of
superconducting junctions in titanium under
uniform high compression
loads 20 p3622 A66-38124
Axisymmetric temperature field
determination in cylindrical
bodies 21 p3835 A66-38908
Nonaxisymmetric temperature fields for
orthotropic hollow cylinder and sphere
solved using Bessel functions, noting heat
transfer between external and internal
surfaces 22 p4000 A66-40693
Polar coronal temperature inferred from
density gradients and based on solar wind
and latitude dependence of coronal
composition 22 p3983 A66-40698
Finite integral transform to solve
unsteady-state heat conduction problems for
hollow cylinders with moving internal
boundary 22 p4000 A66-40819
Approximation method for calculating
transient temperature field in solid for case
where heat-transfer coefficient
varies 24 p4296 A66-43224

TEMPERATURE GRADIENT

Temperature distribution of slow
incompressible viscous flow through conical
tube and comparison with two inclined
walls 01 p0161 A66-10435
Thermomagnetic current density in
semiconductors and metals with temperature
gradient 01 p0125 A66-10779
Applicability of Pascal law in nonuniformly
heated gases verified by measuring pressure
anisotropy vs temperature gradient in gas
sample 03 p0393 A66-13187
Thermal deformation of flat plate
considering temperature gradient effect
through thickness, showing that plate is not
exhibiting Euler buckling 03 p0442 A66-13301
Temperature distribution in flow past
sphere, discussing time dependent form of
Boussinesq transformation
[ASME PAPER 65-HT-38] 05 p0784 A66-14752
Axial thermal gradient stresses in finite
length thin cylinders, evaluating distinct
boundary conditions
[ASME PAPER 65-WA/MET-17] 05 p0780 A66-15682
Temperature boundary layer and electric
sheath near cooled
electrode 05 p0625 A66-15813
Nature and properties of white band in
welded steels, occurring also as result of
heating, noting role of critical temperature
range and gradient 07 p1037 A66-17443
Similar solutions to laminar boundary layer
equations affected by Prandtl number,
viscosity-temperature variation, mass
transfer and hypersonic
parameter 07 p1023 A66-18136
Two-fluid approximation of one-dimensional
steady state flow of inviscid plasma with
thermal gradients, considering ionization and
recombination processes 08 p1265 A66-19466
Equilibrium stability of horizontal layer of
fluid in field of modulated temperature
gradient when layer thickness is greater
than penetration depth of heat
waves 08 p1320 A66-19471
Viscosity and density variations due to
imposed radial temperature gradient effects
on Couette flow stability between rotating
cylinders 08 p1211 A66-19681
Equations relating maximum temperature

stresses in infinite plate and dimensionless
numbers, determining heating
rate 09 p1468 A66-20832
Temperature oscillations in molten metals
and relation to growth striae in melt-grown
crystals 10 p1572 A66-21167
Transition front movements in barium
titanate, noting dependence of velocity on
rate of heating and thermal
gradients 10 p1582 A66-21882
Thermomagnetic current density in
semiconductors and metals with temperature
gradient 11 p1749 A66-22291
Light beam deflection due to linear
temperature gradients across electro-optic
modulator crystals 11 p1737 A66-23431
Equilibrium temperature gradient
determined from theoretical calculations and
balloon and aircraft
measurements 12 p1875 A66-24872
Thermocouple emf, noting pressure
dependence and effects of contamination,
plastic deformation, electrical shunting,
temperature gradients,
etc 13 p2076 A66-25042
Unsteady laminar forced and free
convection in coaxial sector tubes in
presence of constant axial temperature
gradient, accounting for oscillation and
resonance 13 p2210 A66-26719
Motion of gas bubble in weightless viscous
fluid with temperature
gradient 14 p2273 A66-26786
CAT detection by radiometric
measurement of mm wave emission from
oxygen molecules and measurement of
ambient air temperature and temperature
gradient 15 p2532 A66-28926
Stability to infinitesimal disturbances of
plane Couette flow in presence of negative
vertical temperature gradient, noting
instability at critical Rayleigh number for
convection without shear 15 p2481 A66-29741
Thermal forces on vortices and entropy
transport by vortex flow in type II
superconductor from measurements of
temperature gradient and potential
differences 16 p2770 A66-30189
Creep bending of circular plate with
temperature gradients, using iterative
technique 16 p2813 A66-30269
Lower atmospheric diurnal variations in air
temperature, directional wind velocity and
gradients during clear anticyclonic
weather 16 p2742 A66-30774
Effect of temperature gradient at surface
of metal on thermionic emission
current 16 p2778 A66-31079
Temperature gradient of microplasma in
silicon p-n junction 16 p2781 A66-31404
Initial value problem for small amplitude
wave perturbations solved on zonal
atmospheric flow with constant vertical
shear and vanishing temperature lapse
rate 16 p2699 A66-31638
Doping and firing atmosphere effects on
electric resistivity of polycrystalline barium
titanate, noting oxidation of small grain and
positive temperature coefficient effect on
large grain 17 p2978 A66-32404
Fabry-Perot etalon use for interferometry
and laser control, noting low angle
scattering, laser oscillation, thermal tuning
sensitivity, etc 17 p2925 A66-32619
Current instability of plasma injected into
germanium, noting effect of strong electric
field in presence of temperature
gradient 17 p2987 A66-33313
Bending behavior under lateral loads and
stretching effects due to in-plane forces
described by two uncoupled differential
equations governing circular
plates 18 p3253 A66-33803
Optimum averaging periods in
measurements of wind velocity profile,
temperature gradient, vertical thermal
turbulent flow and
atmospheric
drag 18 p3130 A66-34609
Altitude distribution of combinations of
meridional gradients of pressure,
temperature and density 19 p3393 A66-35394
Horizontal temperature gradient produced
by water body effect on distribution of
wind velocity and direction in atmospheric
boundary layer 20 p3594 A66-38375
Temperature gradient-induced GaAs crystal
inhomogeneity effects on electric
properties 22 p3959 A66-39742

Mean viscous dissipation and bulk temperature variation in incompressible fully developed duct heat transfer, using Green theorem 22 p3998 A66-40033

Equilibrium temperature gradient determined from theoretical calculations and balloon and aircraft measurements 22 p3912 A66-40333

Spectral characteristics of turbulence in presence of mean velocity and temperature gradients 23 p4087 A66-41801

Solar UV emission lines for 11 elements heavier than helium analyzed, obtaining relative abundances values and relation between electron temperature and temperature gradient in chromosphere-corona transition region 23 p4130 A66-41809

Unsteady compressible boundary layer equations solved when wall temperature is perturbing about zero and steady mean 23 p4057 A66-41868

Deflection analysis of temperature gradient-induced buckling, curling and bending in thin unsupported plate with variable thickness 23 p4146 A66-41996

Frontogenetic potentialities of wind deformation fields determined, using mathematical model of atmosphere 24 p4234 A66-42979

Upward heat flux with vanishing counter potential temperature gradient in lower atmosphere and in laboratory experiments 24 p4202 A66-42983

Irregular diffraction analysis with ultrasonic waves, measuring air stream temperature fluctuations and velocity 24 p4176 A66-43020

TEMPERATURE INDICATOR

Temperature indicating paints applied to high-temperature and high-velocity gas streams in gas turbine design [SAE PAPER 650705] 07 p1110 A66-17866

Heat-sensitive paint in measuring kinetic heating in hypersonic wind tunnel 08 p1316 A66-18720

Seebeck coefficient of germanium films vacuum-deposited on Vycor substrate 15 p2562 A66-28723

Calibration and testing of temperature measuring devices in -200 to 3000 degrees C 16 p2704 A66-30632

Measuring aerodynamic heating of wind-tunnel models by temperature sensitive paint, noting ambient pressure effect 16 p2682 A66-30916

MOS structure as resistor in monolithic integrated circuits, noting volt-ampere characteristics, temperature coefficient, etc 17 p2887 A66-32697

VECO 32A11 thermistor element for temperature and liquid level sensing in hazardous gases such as Freon 12 21 p3740 A66-39388

TEMPERATURE MEASUREMENT

SA CALORIMETRY

SA OPTICAL PYROMETER

SA PYROMETER

SA THERMOCOUPLE

SA THERMOMETRY

Evaluating temperature measuring methods for hot gas stream in thermal-to electric-energy converters 01 p0066 A66-10204

Dynamic pressure and temperature measurements of forward gas expulsion during high speed stall of jet engines [SAE PAPER 650840] 01 p0130 A66-10832

Four test methods for determining temperature sensitivity of bonded resistance strain gauges at high temperatures 01 p0070 A66-10886

Wind tunnel equipment for automatic temperature digital recording, discussing measurement of arrowhead wing model 02 p0210 A66-11208

Heat flux measurements and electrode temperature estimation in pulse electromagnetic plasma accelerator 02 p0265 A66-11398

Hertzian and IR radiometry applied to temperature determination for use in aerial navigation 02 p0257 A66-12032

Maximum error in high-temperature hardness determination for tungsten and molybdenum with known measurement errors 02 p0233 A66-12275

Transition temperature dependence on thickness of superimposed films of iron and tin 03 p0407 A66-12323

Linewidth parameters for self-broadening and foreign gas broadening of water line measured, noting temperature dependent result and Zeeman components 03 p0443 A66-12342

Local heat transfer during turbulent gas flow in pipe for large temperature differences, describing test apparatus and results 03 p0443 A66-12517

Optical processes effect on integral water plasma radiation to determine atmospheric pressure and temperature 03 p0399 A66-12824

Temperature fluctuation intensity measurement in turbulent flow of mercury 03 p0356 A66-12827

Micropyrometer with constant focal length and replaceable lenses for measuring temperature of small bodies 03 p0369 A66-12829

Graphite-carbon thermocouple used for measuring high temperatures in reduction and inert gas media 03 p0370 A66-12838

Temperature of hydrogen plasma jet at atmospheric pressure by measuring electric field on profile of Stark broadened line 03 p0403 A66-12973

Reflectivity of n-type lead sulfide measured as function of wavelength, temperature and carrier density 03 p0412 A66-13147

Reference tables for 0 to 1880 degrees C established for platinum-rhodium thermocouples 03 p0371 A66-13251

High temperature measurement in combustion chambers of air breathing engines discussing optical, pneumatic, acoustic and calorimeter methods 04 p0518 A66-13537

Pulse shape radiated by miniature micropower telemetry transmitter 04 p0477 A66-13583

Temperature sensitivity of p-n junction volt-ampere characteristic may make such devices suitable for meteorological sensors 04 p0519 A66-13675

Base heating of launch vehicles examined by studying heat transfer processes in two-dimensional recirculation zone behind blunt trailing edge in Mach 3 wind tunnel [AIAA PAPER 65-825] 04 p0454 A66-13690

Electrical resistivity of Nb-Zr alloys of four compositions determined as functions of temperature from 4.2 to 273.2 degrees K with nearly linear dependence 04 p0562 A66-13740

Calculation of mean temperature of mixture burning in flame tube of annular combustion chamber 04 p0597 A66-13760

Temperature of gas moving in frame of reference with respect to rest frame 04 p0597 A66-13814

Measurement of temperature at which silicon begins to undergo plastic deformation 04 p0565 A66-14272

Heating processes in plasma jet with hot interior and colder sheath, determining velocity and temperature 04 p0554 A66-14297

Gas temperature behind detonation front in acetylene-oxygen mixture measured by time-base photometry of hydrogen beta and gamma spectral lines 04 p0598 A66-14433

Röntgen characteristic temperature of germanium and silicon calculated from elastic oscillation spectra 05 p0730 A66-14647

Heat transfer rate to simulated skin, discussing power input determination from temperature rise [ASME PAPER 65-HT-33] 05 p0627 A66-14749

Nonlinear inverse heat conduction problem solved by finite difference method, using least squares and future temperatures [ASME PAPER 65-HT-40] 05 p0784 A66-14753

Rise of junction temperature during continuous operation of GaAs injection laser 05 p0692 A66-14771

High uncertainty in measurement of helium plasma temperature by two-line relative intensity method 05 p0722 A66-14913

Thermistor for measuring rate of liquid-phase exothermal and endothermal reactions in terms of heat loss, considering condensation polymerization of terephthalyl chloride with ethylene glycol in dioxane solution 05 p0787 A66-14959

Resonance radiation emitted by alkali cloud for ionospheric temperature measurement, considering multiple scattering and radiative transfer inside

cloud 05 p0672 A66-15044

Central lunar temperature measured at mm wavelength as time and phase function during total eclipse 05 p0763 A66-15299

Temperature and electron concentration in argon and nitrogen arc plasmas by photometering plasma cross sections and comparing with reference image 05 p0729 A66-15855

System of adjustable parameters for measuring fast varying temperatures in bounded space, using thermocouple with compensating circuit 06 p0879 A66-16442

FM/AM temperature telemetering system for unrestrained intact ruminants, discussing design, fabrication and application 06 p0820 A66-16855

Diluted nickel alloys, describing calorimetric determination of specific heat at low temperatures 06 p0897 A66-16939

Radioactive krypton-85 diffusion technique for temperature mapping of turbine blade surfaces [SAE PAPER 650704] 06 p0944 A66-17077

Temperature dependence of emission spectrum and threshold current in GaAs lasers 07 p1042 A66-17339

HF resonance type resistance thermometer 07 p1031 A66-17419

Pool boiling potassium, discussing heat flux behavior, experimental setup and results for burnout heat flux 07 p1152 A66-17599

Temperature and plasma-composition determination for pure thermal carbon plasma 07 p1086 A66-17739

Skua Meteorological Rocket and use for temperature and wind data 07 p1141 A66-18338

Skua Meteorological Rocket program including analysis of stratospheric winter circulation and spring reversal and temperature soundings on Outer Hebrides 07 p1063 A66-18336

Semiconductor diodes and transistors applied to temperature measurement and control, examining automation application 08 p1221 A66-18699

Brightness temperature measurements of Mars at 3.75 cm from February to June 1965 08 p1288 A66-18788

Light pulse absorption in gas and measurement of temperatures attained noting hydrodynamic, breakdown and radiative transfer mechanisms and wave velocities 08 p1319 A66-19276

Engineering method for measuring rapidly changing temperatures of gas flow with steady or variable heat transfer 09 p1470 A66-20142

Accuracy of Iaryshev equation for determining errors in surface temperature measurements due to heat losses in sensor 09 p1380 A66-20314

Temperature and gas pressure in sunspots determined by measuring equivalent width and intensity of damped wings of spectral lines 09 p1457 A66-20465

Ball shaped miniature transistorized transmitter for temperature measurement 09 p1381 A66-20495

Optical methods of temperature measurement and law of thermal radiation 09 p1381 A66-20503

Optical spectroscopic temperature measurements in shock tubes from relative emission intensities in two wavelength regions of molecular band system 09 p1382 A66-20507

Ion temperature measurement of streaming helium plasma by Langmuir double probe method, discussing effect of stream velocity 10 p1558 A66-21071

Plasma electron density as function of radius compared with ion cyclotron heating theory and stability criteria [AIAA PAPER 66-158] 10 p1560 A66-21423

High gas temperature measurement using colliding shock waves 10 p1622 A66-21883

Electron temperature measurement by relative intensity of He I lines shown as inapplicable for high plasma densities 10 p1571 A66-22021

Millimeter wavelength brightness temperatures of Mars, Jupiter and Saturn calculated from antenna temperatures 11 p1769 A66-22532

Effects of long-wave radiation exchange near Earth surface, extrapolating air

- temperature measurements to ground to estimate surface temperature, obtaining equivalent black body temperature of ground 11 p1702 A66-23155
- Miniature long-life telemetry system for implanting in animal to study deep body temperature 11 p1649 A66-23499
- Atmospheric conditions during total eclipse of February 15, 1961 in France, particularly temperature curves 12 p1868 A66-23533
- NERVA reactor instrumentation noting core temperature thermocouples, neutron detectors, vibration and pressure transducers, strain gauges, etc 12 p1912 A66-23703
- Chemical relaxation effects in nozzle flow by measuring high temperatures created by detonation waves in shock tube, using hydrocarbon mixtures 12 p1977 A66-23748
- Templugs, temperature-sensitive metal inserts that function on basis that certain alloys undergo permanent hardness changes upon heating 12 p1880 A66-24070
- Thin body temperature during periodic variations of heat transfer coefficient and ambient medium 12 p1978 A66-24370
- Surface temperature of solid bodies measured by crayons, thermography, hardness, etc, particularly heat transfer tubes, current-carrying bodies, etc 12 p1882 A66-24408
- Loki Dart meteorological rocket system for temperature and wind measurement in 5,000 to 200,000 ft altitude region [AIAA PAPER 66-383] 12 p1908 A66-24507
- Heat transfer equations for rocketborne atmospheric temperature sensor in form of spherical bead thermistor and experimental analysis of physical, thermodynamic and electrical characteristics of rocketsonde [AIAA PAPER 66-385] 12 p1882 A66-24508
- Laboratory studies of heat balance in rocketsonde thermistors for measurement of upper air temperature, noting dissipation constant and solar radiation effect [AIAA PAPER 66-386] 12 p1883 A66-24509
- High altitude mesospheric temperature measurements, discussing air-to-sensor heat transfer mechanism, bead thermistor and descent rate [AIAA PAPER 66-388] 12 p1908 A66-24510
- Temperature measurement in shock heated cases via spectrum line reversal method, noting connection between electronic excitation and effective vibrational temperature 13 p2208 A66-25159
- Interferometric determination of temperature field compared with exact analytical solutions for laminar boundary layer in case of free convection 13 p2208 A66-25314
- Heat transfer measurement in solid cylindrical isotropic probes, considering isothermal heat transmission under steady state conditions 13 p2209 A66-25566
- Röntgen characteristic temperature of germanium and silicon calculated from elastic oscillation spectra 13 p2167 A66-25922
- Time resolved Langmuir probe measurements of plasma density in electromagnetic shock tubes 13 p2149 A66-26243
- Calorimetric measurement of local temperatures in nitrogen plasma jet at atmospheric and subatmospheric pressures [DGRR PAPER 66-002] 13 p2082 A66-26493
- Pipe flow turbulent temperature fluctuation measurements in mercury and ethylene glycol with fast response thermocouple 14 p2410 A66-26936
- Spectroscopic analysis of helium plasma shock waves, produced by annular discharge type conical coil shock tube 14 p2341 A66-27310
- Dynamic method of measuring gas temperature up to 2500 degrees C by short-term exposure of thermocouple to gas stream 14 p2294 A66-27486
- Receiver noise-temperature measurement uncertainty and dependence on source impedance 14 p2238 A66-27584
- Entropy and heat of formation of lead telluride determined by emf temperature coefficient measurement 14 p2369 A66-28330
- Temperatures, Lorentzian widths and drift velocities of excited neutral and ionic species in argon-ion laser, noting thermal equilibrium achievement 15 p2512 A66-28695
- Excitation temperature of three states of atomic oxygen determined to be 2000 degrees K from intensity ratio of three atomic oxygen 1300 angstrom triplet lines in dayglow 15 p2484 A66-28907
- Temperature measurement above 1000 degrees K, using disappearing filament and line reversal optical pyrometers 15 p2502 A66-29063
- Measuring techniques of winds and temperatures in upper atmosphere with Judi-Dart and other small meteorological rockets 15 p2485 A66-29066
- Rotational distribution function of flowing nitrogen in low density wind tunnel using electron beam fluorescence 15 p2481 A66-29737
- Mass spectrometric measurements of upper atmosphere temperature 15 p2495 A66-30062
- Plasma electron temperature measured from soft X-ray bremsstrahlung absorption by beryllium foil 16 p2756 A66-30096
- Solar wind proton measurements by Vela II satellite electrostatic analyzers and relationship between temperature, solar wind velocity and geomagnetic disturbance index 16 p2793 A66-30184
- Thermological aspects of Martian surface environment based on radiometric temperature measurements 16 p2799 A66-30435
- Pressure and temperature measurements obtained from closed loop, forced convection boiling and condensing processes under zero gravity 16 p2826 A66-30490
- Radiometric temperature measurement of Mars surface microclimate, examining heat flow balance, taking into account solar and planetary radiation effects [AIAA PAPER 66-436] 16 p2799 A66-30522
- Temperature and radii of nova photospheres 16 p2800 A66-30640
- Rocket borne ionospheric direct sounding instruments to measure ion and electron density, electron temperature, thermal electron energy distribution and space electric potential versus rocket potential 16 p2705 A66-30819
- Electron temperature measurement by relative intensity of He I lines shown as inapplicable for high plasma densities 16 p2760 A66-30840
- Heat transfer rate to simulated skin, discussing power input determination from temperature rise [ASME PAPER 65-HT-33] 16 p2643 A66-30984
- Harness-mounted temperature sensor for prolonged monitoring of human skin temperature 16 p2643 A66-31128
- Spectroscopy of plasmajets and electric arcs, noting spectral intensity, line width, etc 16 p2707 A66-31188
- Maximum absolute error of temperature measurements by means of standard platinum resistance thermometer 16 p2709 A66-31610
- Whaples highly abstract proof that zeroth law of thermodynamics leads to existence of empirical temperature 16 p2830 A66-31723
- Thermal radiation shields for gas temperature sensing 17 p2924 A66-32039
- Changes of surface optical properties of metal surfaces determined through equilibrium temperature measurements in space flight experiments 17 p3033 A66-32463
- Upper atmospheric temperature measurement from Doppler line widths of atomic oxygen auroral and nightglow emission, using Michelson interferometer 17 p2919 A66-32993
- Radio telescopic temperature measurements of Venus at 3.75 cm wavelength over full cycle of planetary phase angle 17 p3006 A66-33017
- Balloon altitude pressure-temperature measuring device using voltage-controlled oscillator 17 p2927 A66-33149
- Ambient temperature measurements from radiosondes flown on constant-level balloons 17 p2949 A66-33342
- Thermocouples and resistance thermometers installation techniques for surface temperature measurement 18 p3109 A66-33548
- Shock tube techniques used in measurement of temperature and absolute line intensities for neutral atoms of iron, lead and tin 18 p3109 A66-33695
- Directional heat meter for wall shear stress measurements in turbulent boundary layers 18 p3112 A66-34242
- Heat transfer rates and two-color temperature measurements for propane-oxygen flame seeded with aluminum powder [WSCF 66-2] 18 p3264 A66-34422
- Surface temperature measurements techniques noting thermistors, sensors, paints, pellets, etc 18 p3114 A66-34898
- Interior temperature of Sun determined, using high and low threshold solar neutrino detectors 18 p3238 A66-35218
- Temperature rate measurement for design of control and guidance system in reentry vehicles, using Temperature Rate Flight Control System/TRFCS/ 19 p3396 A66-35511
- Coolant passage wall temperature measurement in nuclear rocket nozzle during chemical stimulation testing by radiometry without affecting hot gas or coolant flow or disrupting heat flow 19 p3356 A66-35632
- Critical temperatures and critical magnetic fields determined for superposed normal and superconducting films, noting dependence on metal thickness 19 p3443 A66-36003
- Critical temperatures of binary alloy films in which major constituent is superconducting amorphous bismuth 19 p3444 A66-36007
- Airborne IR system to detect temperature discontinuities characterizes some forms of clear air turbulence /CAT/ [AIAA PAPER 65-459] 19 p3360 A66-36482
- Temperature fluctuation intensity measurement in turbulent flow of mercury 19 p3343 A66-36769
- Micropyrometer with constant focal length and replaceable lenses for measuring temperature of small bodies 19 p3362 A66-36771
- Graphite-carbon thermocouple used for measuring high temperatures in reduction and inert gas media 19 p3362 A66-36779
- Temperature potentials in cylinder of known radius, investigating optimal heating regime and thermal kinetic factor effect on maximum potential magnitude 20 p3665 A66-36912
- Color temperature measurement in first stage of electrical explosion of copper, silver and constantan wires as function of magnitude of energy input for various heating times 20 p3599 A66-36985
- Venus brightness temperature and polarization of integral radio emission at 3.75 cm wavelength 20 p3648 A66-37044
- Simplifying large cryogenic research tankage temperature measurement methods including thermocouples, resistance thermometers, semiconductors, piezoelectric probes and combinations thereof 20 p3556 A66-37072
- Strength of certain lines of titanium oxide measured in sunspot spectra, determining rotational temperature 20 p3650 A66-37341
- Operation principles of fluid switches and oscillators, examining possible practical application to temperature measurement 20 p3560 A66-37651
- Aircraft instrumentation for oceanographic measurement platform including radiation thermometer, wave meter and expendable bathythermograph [AIAA PAPER 66-695] 20 p3496 A66-38036
- Temperature measurement with thermodynamic thermometers 21 p3736 A66-38814
- Axissymmetric temperature field determination in cylindrical bodies 21 p3835 A66-38908
- Electron, charged particle density spectrum and temperature measurements in arc jet of partially ionized argon 21 p3790 A66-39082
- Imaging techniques to obtain temperature and emissivity measurements and phase diagrams of high melting point ceramic oxides with aid of solar furnace 21 p3738 A66-39102
- Engineering method for measuring rapidly changing temperatures of gas flow with steady or variable heat transfer 21 p3836 A66-39413

Dissipation of sheet of heated air in turbulent air flow in pipe 21 p3836 A66-39445

IR astronomical measurements for computation of bolometric corrections and effective temperatures of stars of various spectral types 21 p3815 A66-39486

Abundance and temperature of carbon dioxide in Martian atmosphere, noting implications, observation methods and results 21 p3816 A66-39558

Unmanned space vehicle on board measurements and data transmission to ground station, examining temperature and propellant measuring techniques 21 p3741 A66-39631

Degree of population inversion and inverse temperature measurement in medium 22 p3917 A66-39663

Melting point and microhardness of carbon-saturated TiC-VC solid solutions, noting temperature of eutectic of TiC-VC with graphite 22 p3934 A66-39866

Graphical determination of atmospheric pressure from rocketsonde temperature measurements 22 p3943 A66-40056

Temperature measurement in shock tubes and transition probabilities of argon spectrum lines from emission intensities 22 p3956 A66-40406

Rotational temperatures of CO molecule oscillative-rotational bands in solar atmosphere, refuting assumed temperature nonuniformities 22 p3985 A66-40949

Surface temperature measurement of metal body by electromagnetic effects, metallurgical techniques and miscellaneous techniques 23 p4067 A66-41199

Spectroscopic measurements of electron densities and temperatures in argon-hydrogen plasma jet 23 p4068 A66-41290

Flame temperature measurements by thermal neutron probe providing data on measured and computed transmission vs Cd foil thickness 23 p4148 A66-41501

Combustion mechanism of composite propellants including solid propellant combustion rate measurements, flames spectrography, temperature at propellant surface, etc 23 p4122 A66-41660

Transient fiber optics probe for space resolved diagnostics of dense plasmas, noting adaptation to temperature measurements by line intensity and line ratio method 23 p4107 A66-41887

Stagnation pressure, temperature and static pressure measurement in shock driven facilities, using equipment with piezoelectric crystal and fast response thermocouple 24 p4207 A66-42175

Network for compensating electrical output of thin film resistance thermometers for deviations due to large heat-transfer rates 24 p4207 A66-42176

Potential sensitivity of energy radiation detectors, examining measurement error causes for radiation power of natural and artificial sources 24 p4172 A66-42523

Pressure, temperature, gas velocity, thrust and specific impulse of rocket combustion chambers determined, using differential equation and Runge-Kutta method 24 p4261 A66-42743

Thermometry of solar interior via neutrino flux measurement, noting temperature dependence of number of events in detectors 24 p4270 A66-42931

Tidal circulation system induced by stratospheric wind field perturbations via diurnal ozonospheric heating 24 p4203 A66-42985

Temperature and humidity variations in weak convection over England, noting measurement techniques and results 24 p4235 A66-43076

Substrate temperature measurement and control showing desirability of large-area low temperature radiation source for glass substrate heating 24 p4218 A66-43165

Phased array receiver compared with conventional system by defining effective input noise temperature, computing by two-port cascade form 24 p4187 A66-43193

Low temperature system for thermal conductivity measurements using Ge and Pt resistance thermometers and He exchange gas switch 24 p4215 A66-43207

Automatic double probe to determine electron temperatures in ion engine

exhaust 24 p4215 A66-43208

TEMPERATURE PHOTOMETER

Spectrographic and interferometric techniques used in temperature determinations of auroral and airglow emissions in upper atmosphere 05 p0671 A66-15020

TEMPERATURE PROBE

Linear quartz crystal temperature sensing element for digital data presentation 02 p0228 A66-11516

Temperature sensor in form of two-terminal networks with single semiconductor thermal resistance operating in linear regime 04 p0503 A66-13708

High temperature resin binders, discussing thermosetting polymer properties, functions, temperature resistivity and application 06 p0900 A66-16294

Exact measurement of local temperature, determining grain boundary temperature gradient, describing probe 06 p0882 A66-16938

Measuring temperature coefficient and drift for small capacitors, noting design and environmental control 09 p1359 A66-20921

Triple-probe measurement of electron temperature of transient plasma from plasma gun 13 p2149 A66-26242

Temperature sensor in form of two-terminal networks with single semiconductor thermal resistance operating in linear regime 15 p2469 A66-28551

Semiautomatic potentiometer measurement of nitrogen specific heat at small intervals, noting applicability of logarithmic law for other temperature ranges 16 p2829 A66-31168

Anomalous behavior of superconducting transition temperature for certain magnetic ordering of paramagnetic impurities 21 p3803 A66-39264

TEMPERATURE PROFILE

Maximum temperature profile in phenolic resin-siliceous fiber heat shields on ICBM and Mercury spacecraft [AIAA PAPER 65-638] 01 p0162 A66-10596

Viscous dissipation effect on temperature profile in thermal entrance region between parallel plates, considering flow laminar and velocity profile developed 03 p0358 A66-13092

Wind velocity, vertical wind profile and temperature fluctuations in near-water air layer measured, noting differences from pulsation measurements 04 p0542 A66-14300

Vertical distribution of turbulence and wind velocity characteristics in atmospheric boundary layer, considering temperature stratification in boundary layer 04 p0542 A66-14301

Dependence of vertical structure parameters of atmospheric temperature and humidity fields on atmospheric long-wave radiation field, noting transport equation 04 p0542 A66-14303

Model simulating energy distribution process /thermal stratification/ within liquid hydrogen stored aboard moving rocket to avoid pump cavitation [AIAA PAPER 64-426] 08 p1279 A66-18809

Temperature fluctuations of elastic isotropic cylinder, obtaining temperature equilibrium equations and reducing three-dimensional problems of thermoconductivity and thermoelasticity to boundary value problems 08 p1307 A66-18886

Static diffusion models of upper atmosphere with density and composition determined for wide exospheric temperature ranges 09 p1370 A66-19901

Line-of-sight IR spectral temperature profile measurements in inhomogeneous hot gas 09 p1382 A66-20505

Reversal temperature profile across small rocket exit measured by sodium line reversal technique 09 p1382 A66-20506

MHD natural convection in cylinder, noting independence of thermodynamic profile from magnetic field 10 p1566 A66-21794

Internal gravity wave propagation in thermally stratified atmosphere 11 p1697 A66-22567

Plane stationary problem of heat conduction for mixed boundary conditions solved, using Fredholm integral equation with symmetrical kernel 12 p1979 A66-24372

Monthly temperature variations in tropical stratosphere and mesosphere between 25 and 80 km

[AIAA PAPER 66-344] 12 p1872 A66-24474

Predictability of winds and virtual temperature profiles for flight and static test operations, establishing forecast verification criteria [AIAA PAPER 66-378] 12 p1908 A66-24508

Atmospheric vertical temperature profile determined from outgoing radiation spectrum, evaluating error probability and accuracy 12 p1874 A66-24868

Structural constant of temperature fluctuations in atmosphere determined by methods involving turbulent energy dissipation velocity and velocity distribution probability 12 p1875 A66-24871

Vertical temperature distribution in Martian atmosphere, noting insensitivity to surface pressure and carbon dioxide variations 13 p2186 A66-26132

Thermal profiles in turbulent boundary layers with obstacles at wall temperature 13 p1991 A66-26338

Measurement of temperature profile in gas stream by moving thermocouple at constant rate in both directions across cross section of stream 14 p2294 A66-27488

Transient thermoelastic stresses under thermoelastic and sublimation ablation noting temperature profile 14 p2402 A66-27970

Vertical distribution of turbulence and wind velocity characteristics in atmospheric boundary layer, considering temperature stratification in boundary layer 14 p2327 A66-28215

Dependence of vertical structure parameters of atmospheric temperature and humidity fields on atmospheric long-wave radiation field, noting transport equation 14 p2327 A66-28217

Interplanetary-space temperature profile appropriate to uniformly expanding corona model 15 p2597 A66-29256

Falling sphere measurements of atmospheric density, noting temperature and density profiles, pressure distribution, etc 15 p2494 A66-30041

Velocity and temperature profiles, hydrodynamic elements, heat transfer and friction coefficients of turbulent incompressible flow through circular and flat tube 17 p2909 A66-32583

Arc operation under nonsteady electrical inputs, noting initial conditions, energy equation solution, temperature profiles, application of Green function for moving boundary problem, etc [AIAA PAPER 66-480] 17 p2970 A66-32769

Pressure and temperature profiles in turbulent wake behind cone at Mach 5 17 p2842 A66-33472

Continuous wave power ratings of strip transmission lines, noting temperature profile parameters, power limit curves, etc 18 p3077 A66-34062

Thermodynamic properties of plasmas in pressure and temperature equilibrium, showing evaluation accuracy to 4 percent 18 p3145 A66-34104

Heat transfer effectiveness-number of transfer unit relations determined, using differential equations to obtain temperature profile of each channel in exchanger 18 p3262 A66-34382

Numerical solution of integral form of radiative transfer equation from measurements in finite set of spectral intervals for deducing atmospheric temperature profiles, using satellites 18 p3129 A66-34554

Velocity and temperature profile for turbulent boundary layers in adverse pressure gradients, including Prandtl number and surface roughness effects in analysis 18 p3101 A66-34667

Output current characteristics of thermionic converters derived without reference to elastic and inelastic collisions and expressed as plasma electron density and temperature profile 19 p3405 A66-35428

Stratification with bottom heating analysis, using approximate integral approach 19 p3477 A66-35631

Two-dimensional problems in which heat flow is predominantly in one direction solved by approximate methods, noting constant profile of temperature role 19 p3478 A66-35854

Ultrasonic attenuation in lithium fluoride
from liquid helium to room temperature,
including anharmonic attenuation of slow
transverse mode to vary with
frequency 19 p3447 A66-36398
Lead loss in thermocouple imbedded in
burning propellant, noting possibility of loss
reduction by using flattened junction
parallel to burning
surface 20 p3681 A66-38177
Boundary layer equation solution along
vertical hot plate for constant plate
temperature, noting use of Blasius
technique 21 p3837 A66-39590
Ozone measurements with rocketborne
sondes, showing graphs of distribution
as function of altitude and temperature
profile 22 p3903 A66-39683
Heat transfer equation solution for ablating
solid, assuming exponential temperature
profile with numerical solution on digital
computer by Runge-Kutta
method 22 p3998 A66-40035
Atmospheric vertical temperature profile
determined from outgoing radiation
spectrum, evaluating error probability and
accuracy 22 p3912 A66-40330
Structural constant of temperature
fluctuations in atmosphere determined by
methods involving turbulent energy
dissipation velocity and velocity distribution
probability 22 p3912 A66-40332
Temperature profiles and Nusselt numbers
for heat transfer to MHD laminar Hartmann
flow in thermal entrance region of flat
duct 22 p4000 A66-40920
Approximate solution of PDE for heat
transfer in uniform-property universal
turbulent boundary layer 22 p4001 A66-40923
Heat transfer through turbulent boundary
layer, using velocity and temperature
profiles as phenomenological
relations 23 p4147 A66-41120
Temperature profiles across argon plasma
arc calculated from measured radiation
intensities at arc currents from 1 to 400
amp 23 p4104 A66-41495
Absorption and brightness temperature
variations of atmosphere on basis of
statistical characteristics of vertical
temperature and humidity
structures 23 p4087 A66-41802
Heat transfer from enclosed rotating disk,
analyzing effects of radial outflow and
inflow on temperature profile and Nusselt
numbers on rotor and
stator 24 p4294 A66-42705
Wind and temperature profiles for
constant flux atmospheric boundary layer in
stable stratification implying relation
between eddy transfer coefficient ratio and
stability parameter 24 p4202 A66-42982
TEMPERATURE REGULATION
TEMPERATURE TRANSDUCER
Thermometric transducer and RC loop for
measuring rapidly changing temperature in
pulsed gas flow 05 p0682 A66-15312
Pyroelectric effect in barium titanate
ceramics used for weak thermal radiation
recording 06 p0881 A66-16725
Dynamic properties of contact thermal
receivers investigated with aid of digital
computer 07 p1035 A66-18092
Control-voltage transducer synthesis with
variable capacitor compensation of quartz
resonator frequency-temperature
characteristics 09 p1354 A66-20451
Transducer for measuring pressure,
temperature, velocity, force, torque and
displacement 13 p2082 A66-26312
Capacitance type ferrite transducers
consisting of polycrystalline yttrium garnet
of high resistivity 14 p2252 A66-27248
Voltage output characteristics of axial
gradient heat flux transducers employing
thermoelectric temperature difference
sensing 16 p2702 A66-30426
Pyroelectric heat-transfer sensor
performance compared with thin skin
thermocouple heat sensors, noting
discrepancy in measurement results in
severe environment 24 p4207 A66-42177
TEMPERING
Phase separation from tempering of
martensite in iron-nickel alloys with
aluminum additions 19 p3386 A66-36426

TENSILE CREEP

Effects of prior low temperature
deformation on subsequent creep rupture
behavior of alloys
[ASME PAPER 65-WA/MET-14]
05 p0703 A66-15684
Space environment effect on fatigue,
tensile and creep behavior of
metals 07 p1141 A66-17210
Grain size effects on tensile and creep
properties of arc-melted and electron-beam-
melted tungsten 07 p1048 A66-17475
Heat resistance, bending and tensile creep
of multicomponent Ti
alloys 15 p2519 A66-28534
Tensile and compressive creep behavior
deduced from deflection measurements in
creep bending tests on beams of trapezoidal
cross section 15 p2614 A66-29666
Finite creep equations derived for circular
sandwich plate under lateral pressure,
considering bending moments and tensile
forces 19 p3472 A66-35392
Creep testing of tubular copper samples
under combined tension and torsion with
constant and variable
loads 23 p4083 A66-41976

TENSILE DEFORMATION

Nonconservative motion of jogged screw
dislocations in high temperature deformation
of Al-Mg alloys 03 p0382 A66-12937
Sheet metal testing covering one-and two-
axial static and dynamic tensile methods,
defect detection, elimination, effect of
anisotropy, etc 03 p0439 A66-13159
Tungsten crystal deformation and fracture
analyzed as orientation function, noting
tensile tests and stress-strain
curves 03 p0385 A66-13208
Mechanical testing methods, discussing
quasi-static and fatigue fracture due to
tensile compressive load and cyclic
deformation characteristics of
materials 04 p0537 A66-14399
Yield criterion of prestrained materials,
covering effects of characteristic index and
stress direction on yield stress
[ASME PAPER 65-WA/MET-4]
05 p0780 A66-15691
Deformability of porous sintered materials
in tension, examining properties of dense
materials, variation in number of pores,
pore shape and material loosening during
loading 06 p0897 A66-16692
Strain distribution in tensile deformation
of aluminum alloy coated with gridded
Prussian blue coating 08 p1241 A66-19716
Changes in microhardness, elastic modulus
and shear orientation at boundary between
elastic and plastic deformation in steel
under tensile stress 11 p1719 A66-23387
High-temperature deformation of magnesium
single crystals with /110/ tensile axis,
favoring slip on systems with oblique
vectors, related to observations on /001/
crystals 12 p1898 A66-23564
Yield criterion of prestrained materials,
covering effects of characteristic index and
stress direction on yield stress
[ASME PAPER 65-WA/MET-4]
12 p1970 A66-24537
Tension shell theory applied to Voyager
mission, noting equations for lateral loading
for entry at zero angle of attack, shear and
bending of wall role, etc 14 p2407 A66-28027
Preferred orientation of pyrolytic carbons,
noting relationships and equivalence of
parameters 16 p2870 A66-31099
Calibration method for tensile testing
apparatus for testing elongated high
modulus fibers and graphing of typical load
elongation curves 17 p2943 A66-32400
Characteristic microstresses in plastically
deformed iron and aluminum alloy under
tensile testing studied by X-ray
techniques 19 p3376 A66-35400
High temperature tensile deformation of
polycrystalline magnesia prepared by single-
crystal recrystallization and hot
pressing 21 p3753 A66-38592
Deformation of aluminum single crystals
during constant load tensile
test 22 p3935 A66-40201
Error correction in Vlasov equations of
continuity of deformations in curvilinear
coordinates 22 p3948 A66-40374
TENSILE STRENGTH
Stress-aging, differences from strain-aging

and effect on tensile properties of various
stainless steels 01 p0085 A66-10409
Uniaxial tensile data for elastomers
including stress-strain
curve characteristics 02 p0248 A66-11428
New titanium alloy for 900 degrees F
surface in jet engines 02 p0242 A66-11513
High strength structural bolts under static
loadings of tension and
shear 02 p0301 A66-12241
Effect of nonuniform distribution of
number of pores in cross sections of metal
specimens on strength
characteristics 02 p0246 A66-12274
Influence of fiber and matrix
characteristics on mechanics of deformation
and fracture of fibrous
composite 05 p0773 A66-14810
Elastic modulus and ultimate tensile
strength of fibers and fiber
composites 05 p0705 A66-14814
Stress-strain behavior of tungsten fiber-
reinforced copper composites, discussing
room-temperature tensile and dynamic-
modulus tests 05 p0702 A66-15324
Room-temperature tensile behavior of
tungsten and tungsten-rhenium single
crystals 06 p0894 A66-16068
Dilute tungsten rhenium alloys,
determining ductility parameters,
fabrication, tensile properties and creep
behavior 06 p0894 A66-16070
Heat resistance and tensile strength of
aluminum filament wire compared to
ordinary wire 07 p1049 A66-17869
Structural design with ceramic materials,
using prestraining and prestressing for
improved tensile and impact strength and
stiffness 07 p1054 A66-18501
Stress-strain state of elastic space,
examining circular crack for axial tensile
load effects 08 p1305 A66-18597
Generalized strength criterion for
anisotropic materials with different tensile,
compression and shear
strengths 08 p1307 A66-18881
Interaction of dislocations with coherent
ordered zones, discussing results of electron
transmission and tensile test
experiments 08 p1240 A66-19251
Galvanic corrosion in panel-type couples of
dissimilar metals with magnesium evaluated
from tensile strength loss 08 p1241 A66-19714
Aluminum alloys, tensile properties and
testing 08 p1241 A66-19715
Tensile properties of composites of
tungsten or molybdenum wire uniaxially
aligned in copper matrix 09 p1393 A66-20661
Boron filament tensile and flexural
strength affected by surface and internal
flaws with chemical
polishing 10 p1548 A66-21728
Glass fiber reinforcement for plastics,
determining tensile strength of fibers, glass
structure, elasticity modulus improvement
via annealing, etc 11 p1720 A66-23126
Mechanical properties of butt welded
joints in high-strength aluminum alloy sheet,
noting tensile strength, welding techniques
and test results 12 p1893 A66-23708
Thermal properties, tensile strength and
uses of combination of glass fiber and epoxy
resin material, Fiberglass S /994/, in space
vehicles 12 p1899 A66-23966
Tensile testing of fiberglass plastic
anisotropic specimens with axis at angle to
reinforcing fiber
direction 12 p1899 A66-24040
Reinforcement with whiskers of high
temperature metals such as nickel, cobalt
and nickel-chrome alloys 12 p1896 A66-24467
Fiber orientation effect on ultimate tensile
strength of aluminum-steel-silica fiber-
reinforced metals 12 p1896 A66-24533
Niobium addition effect on mechanical
properties of steel, noting improvement of
tensile strength and cold brittleness
threshold decrease 12 p1897 A66-24899
Evaluation of model of strain hardening in
fatigue with crack propagation occurring by
plastic flow away from crack tip during
tensile part of cycle 12 p1898 A66-24971
Condensed nickel and iron films measured
for tensile strength and
microhardness 13 p2106 A66-25333
High speed tensile testing of materials
under destructive loads at high strain
rates 13 p2197 A66-26107

Stress relaxation, stress-strain curve and time-temperature-strain rate equivalence for thermoplastic and viscoelastic polymers 13 p2114 A66-26109

Static and high strain rate tensile behavior of epoxy, polyester and urethane resins reinforced with 181-S, 184-E and woven roving glass materials and nylon 13 p2114 A66-26111

Microstructural response and tensile failure mechanisms in solid propellant 13 p2171 A66-26117

Uniaxial tensile test data on stress-strain properties of polymers and elastomers as function of strain rate and temperature 13 p2115 A66-26118

Fracture and mechanical failure of polymeric solids at high strain rates 13 p2198 A66-26120

Forming of titanium alloy pellets which are extruded to make dense bars and composites, noting mechanical and tensile properties 14 p2310 A66-26832

Stress-corrosion susceptibility of high-strength steel at various levels of tensile yield strength and fracture toughness [ASME PAPER 66-MET-5] 14 p2300 A66-26973

ASTM-ASME Joint Committee report on high temperature properties of stainless steels such as stress-temperature, yield and rupture curves, etc 14 p2313 A66-27229

State equation analysis from tensile or compression test data and influence of strain, strain rate and temperature on strain-hardening curve for metals such as Al, Cu, Pb, etc 14 p2397 A66-27393

Limit load of flat notched bars subject to tension, discussing rupture force magnitude, plastic strain occurrence, rupture stress and yield limit curves, etc 14 p2398 A66-27394

Tensile strength of fiber reinforced metal containing aligned fibers at angle to tensile axis 14 p2316 A66-27785

Tensile strength and deformation resistance increase with increasing test rate 14 p2401 A66-27832

Microstructure and cooling rate effect on tensile and impact properties of titanium alloy Ti-6Al-4V-2Sn 15 p2521 A66-29072

Mechanical properties of solid propellants, determining elastic modulus from tensile tests via stress-strain diagram 16 p2790 A66-31193

Change in tensile strength during winding of prestressed oriented glass fiber filaments 17 p2942 A66-32047

Stability of annular plate with nonuniform stress field and nodal diameters arising with stability loss, obtaining solution for radial force intensity ratio 17 p3026 A66-32597

Elevated temperature tensile properties of copper alloy-tungsten fiber-reinforced composites 18 p3120 A66-33724

Cold working effect on room temperature tensile properties of TiNi intermetallic compound 18 p3123 A66-33756

Tensile properties of protectively coated refractory metals for structural components in high temperature oxidizing environments 19 p3385 A66-36151

Electron beam welding of maraging steel, noting tensile test results on efficiency, defect formation, region of fracture nucleation, etc 19 p3371 A66-36632

Cobalt addition to titanium alloy, discussing effect on tensile strength, thermal stability fatigue strength, ductility and notch sensitivity 20 p3582 A66-37049

High strength weldable Al alloys with good cryogenic toughness, stress-corrosion cracking resistance and tensile strength 20 p3582 A66-37091

Tensile, creep and stress-strain behavior of high nitrogen content stainless steel quenched alloy at cryogenic temperatures 20 p3583 A66-37093

Combined nuclear radiation damage and cryogenic temperature effects on tensile and shear properties of materials in outer space 20 p3583 A66-37096

Lattice defects and tensile strength 20 p3584 A66-37694

Continuous silicon carbide filaments prepared using chemical vapor-deposition techniques, analyzing cross sections, x-ray diffraction and tensile strength 20 p3588 A66-37772

Maraging steel properties, discussing composition, strengthening mechanism, tensile and impact toughness, mechanical and fatigue properties, etc 20 p3587 A66-38431

Factors affecting strength of whisker reinforced metals, noting characteristics [ASME PAPER 66-MD-81] 21 p3750 A66-38504

Book on strength of turbine disks, analyzing material properties, design and operating conditions 21 p3743 A66-38948

High strength aluminum alloys, evaluating tensile strength, toughness and stress-corrosion resistance 21 p3751 A66-39234

UV radiation effect on polyethylene-terephthalate film tensile strength in vacuum and air 22 p3937 A66-39818

Mechanical properties of VAD23 alloy noting tensile, compression, crushing and shearing strength and notch sensitivity and comparison with D16T alloy 22 p3936 A66-40881

Metallic impurities effect on tensile strength of binary nickel alloys under tension 22 p3937 A66-40924

K values for crack propagation rates obtained from fatigue experiments on metals, noting correlation with tensile properties of metals 23 p4082 A66-41865

Structural steel design specifications, discussing anisotropy, stress-strain in tension and compression, cold working effects, etc 24 p4289 A66-42285

High cycle fatigue strength of titanium, Cu and Al alloys correlated with constants of logarithmic true stress-true strain curve 24 p4229 A66-43080

TENSILE STRESS

Thin ferromagnetic Fe-Ni films, discussing elastic tensile stresses on structure of interdomain boundaries and distribution of magnetization vectors 04 p0563 A66-13876

Mechanical double refraction of unsaturated copolymer polyesters of styrene subjected at different temperatures to constant tensile stress 04 p0538 A66-14242

Alloy steel yield strength, strain rate sensitivity, material parameters and power-law relationship [ASME PAPER 65-WA/MET-8] 05 p0703 A66-15688

Piezoresistance in semiconductors, noting anisotropic effect of mechanical stresses on electrical conductivity 07 p1034 A66-17834

Limiting equilibrium state of round infinite plate with circular arc-shaped cracks subject to plane tensile loads 08 p1305 A66-18596

Carbon and tungsten effects compared on tensile flow stress recovery of molybdenum 08 p1237 A66-18764

Elastic tensile stress effect on domain structure of thin ferromagnetic films composed of iron and nickel 09 p1431 A66-20870

Simplified formula for circumferential tensile stresses at boundary of suddenly punched circular hole in stretched plate 10 p1617 A66-21499

Formation of fatigue cracks in center notched sheet specimens of various metals ultrasonically tested for axial tensile fatigue 12 p1957 A66-23630

Circumferential creep strain of cylinders subjected to internal pressure 12 p1959 A66-23797

Inner boundary layer existence in circular plate under symmetric tensile stress obtained by asymptotic method 12 p1968 A66-24345

Alloy steel yield strength, strain rate sensitivity, material parameters and power-law relationship [ASME PAPER 65-WA/MET-8] 12 p1896 A66-24536

Elastic problem of infinite plane in stressed state, weakened by two circular holes, solved in system of bipolar coordinates for forces applied at hole edges 12 p1970 A66-24783

Inhomogeneous elastic half-spaces examined for circular crack in plane of contact and perpendicular tensile forces, using Griffith fracture theory 13 p2203 A66-26421

Critical load of infinite plane under

tension weakened by crack evaluated by Griffith fracture theory 13 p2203 A66-26421

Stress redistribution in vicinity of holes in polymeric plate under tensile stress 14 p2396 A66-27181

Thin ferromagnetic Fe-Ni films, discussing elastic tensile stresses on structure of interdomain boundaries and distribution of magnetization vectors 14 p2363 A66-27581

Opening of parallel cracks by applied tensile stress in terms of dislocation distribution theory 14 p2408 A66-28381

Stress of isotropic rectangular plate with elastic collar soldered into it under tensile load 15 p2607 A66-28771

Aluminum screw coupling resistance to stresses as affected by profile, thread depth and composition 15 p2509 A66-29111

Viscoelasticity and tensile stress-strain distribution in fiber-reinforced plastics 15 p2524 A66-29344

Linear stress-strain relation for expressing tensile stress for nonlinear large elastic deformations 17 p3018 A66-31871

Plastic expansion in metals due to alternating torsional and static tensile loading 17 p3029 A66-32801

Model-forming process in which plane sheet is stretched by pair of loads, producing biaxial principal stresses, examining stress ratios, loads and plastic strains 18 p3247 A66-33571

Stress field due to circular sliding contact region carrying hemispherical Hertzian normal pressure and proportional distributed shearing traction 18 p3248 A66-33581

Tensile properties of shear spun W in various high temperature intervals between 900 and 6000 degrees F 19 p3383 A66-36131

Stress concentration factors at notches, fillets and circular holes in plates under uniaxial load obtained from equations for elastic stress distribution 20 p3667 A66-37481

Relationship between plasticity characteristics for metals in tension determining uniform elongation 21 p3827 A66-38611

Program controlled device for applying tensile force and torque to thin walled tubular specimen during analysis of creep under stress 21 p3827 A66-38611

Load carrying capacities of rotationally symmetric plates and shells for limited anisotropic behavior and different yield stresses in tension and compression 21 p3831 A66-39375

Transmission electron microscopy on polycrystalline Al, determining hardening and tensile yield stress variations as function of quenching temperature 21 p3753 A66-39586

Tensile stress effect on strain aging of iron, niobium and tantalum 23 p4081 A66-41713

Photoelastic determination of stress concentration factor for flat strips notched on both sides under tension 23 p4140 A66-41852

Photoelastic stress-concentration measurements in variously-reinforced circularly shaped cut-outs under uniaxial tension, three-dimensional effects and validity of neglecting bending stiffness 23 p4141 A66-41949

Stress distribution analysis on contracted section of cylindrical tensile test pieces based on Stassi plasticity condition 23 p4142 A66-41950

Stress intensity factors, strains and rotation in infinite eccentrically cracked strip under uniform tensile stress applied at infinity 24 p4286 A66-42157

Stress concentration near circular cut in unbounded plane plate and reinforced by thin walled infinitely long cylindrical shell under tension applied at infinity 24 p4290 A66-42445

Stress redistribution in vicinity of holes in polymeric plate under tensile stress 24 p4290 A66-42733

TENSILE TESTING MACHINE

Mechanical properties of commercial heats of air and vacuum melted steel, deriving data from impact and tensile tests, noting ways of increasing toughness 01 p0086 A66-10413

Fracture mechanics and amount of deformation metals can withstand subject to

forming procedures 08 p1235 A66-18690
 Pressure forming of tungsten, molybdenum, titanium, beryllium and zirconium composite 08 p1229 A66-18692
 Short-time high temperature tensile testing machine capable of constant rate loading up to 85 kg/sec and heating up to 80 degrees /sec 10 p1618 A66-22179
 Combined cryostat/oven and specimen transfer device for tensile testing, noting design, operation and results 11 p1683 A66-22699
 Closed loop hydraulic high-speed universal testing machine and simulation of high strain rate conditions 13 p2197 A66-26108
 Impact properties of six materials compared with two falling-weight tensile impact testers, pendulum tester and high speed universal tensile tester, giving stress-strain curves 13 p2197 A66-26110
 AMRA high speed tensile tester analysis of dynamic stress-strain behavior in beryllium oxide in flexure and in compression 13 p2115 A66-26114
 Strain rate and pressure effects on tensile behavior of viscoelastic composite solid propellant 13 p2171 A66-26116
 Maximum uniform elongation in uniaxial tensile tests of sheet metal 15 p2510 A66-29779
 Calibration method for tensile testing apparatus for testing elongated high modulus fibers and graphing of typical load elongation curves 17 p2943 A66-32400
 Tensile testing method for tungsten and molybdenum single crystals 24 p4210 A66-42221
 Vibrational creep of Al alloy at normal temperature, noting plastic deformation magnitudes creep limit equations, etc 24 p4228 A66-42864
 Vacuum furnace for studying high temperature fracture of ceramic materials, noting tests on polycrystalline aluminum oxide 24 p4192 A66-43220
TENSIO METER
 Thermal expansion coefficient of materials determined by tensometric method based on measurement of temperature dependence of resistance of strain gauge sensing elements 02 p0231 A66-11998
TENSION
 SA OXYGEN TENSION
 SA SURFACE TENSION
 Computer programming of diagonal tension analysis of flat panels in shear 01 p0152 A66-10345
 Plastic behavior of notched bars pulled in tension 13 p2199 A66-26378
 Kosmodamianskii approximate method for solution of tension problem of isotropic plate with two similar circular holes reinforced by rigid rings 15 p2613 A66-29431
 Elasticity equations for materials with different resistance to tension and compression 17 p3025 A66-32590
 Motion equations for large-amplitude transverse vibrations of tensioned string and necessary conditions for linearization 17 p2959 A66-33033
TENSION TESTING MACHINE
 Simple auxiliary torsion testing device for use with universal tension-compression testing machines 01 p0151 A66-10201
 Strain ratio measurements from uniaxial tension tests predicting metal sheet performance during pressing, considering crystal deformation 01 p0086 A66-10411
 Circuitry of automatic surface tension measurement device 20 p3559 A66-37502
TENSOR
 S STRESS TENSOR
 S TRANSFORMATION TENSOR
TENSOR ANALYSIS
 Tensorial character of eddy viscosity coefficient in incompressible turbulent flow 03 p0358 A66-13099
 Propagation mode of plane waves in isotropic plastic solids, deriving tensor equations with numerical solutions 05 p0774 A66-15055
 Heat capacity and thermal conductivity related to elastic-mechanical macroscopic physical properties, using invariance properties of tensors 06 p0971 A66-16616
 Two-fluid anisotropic warm plasma, characterizing macroscopic electromagnetic properties via compressivity and

permittivity tensor and permeability 06 p0920 A66-16975
 Fundamental concepts of tensor calculus essential for technological application 08 p1245 A66-18859
 Tensor product analysis of alternating direction implicit iteration techniques for approximate solution of elliptic partial differential equations 09 p1396 A66-20637
 Velocity, acceleration and static force analyses of spatial linkages, using matrix algebra [ASME PAPER 65-APMW-13] 10 p1539 A66-21487
 Tensor component of dielectric permittivity of isothermal plasma derived from kinetic equation, accounting for effect of magnetic field on collision between particles 11 p1745 A66-22588
 Conditions that principal invariants of tensor must satisfy to be symmetric or orthogonal 12 p1902 A66-23948
 Einstein gravitational theory in terms of orthogonal reference points, describing energy and momentum distribution by generally covariant tensors 13 p2128 A66-25946
 Tensor analysis, discussing stress tensors, metric tensors, Riemann-Christoffel curvature tensor, coordinate transformations, etc 14 p2320 A66-26921
 Tensor analysis of implicit constitutive equations of ideal materials 17 p2956 A66-31929
 Maxwell equation solution for source currents in unbounded magnetoionic medium with uniaxial dielectric tensor, using Fourier transform technique 17 p2959 A66-32962
 Geometrical and kinematical conditions of compatibility associated with moving discontinuities in material media 17 p3032 A66-33501
 Common representation of electromagnetic field tensor and stress tensor 19 p3474 A66-36319
 Photoelastic Wertheim law in general tensor coordinate system derived for linearly anisotropic or isotropic homogeneous matter 19 p3474 A66-36320
 Properties of anisotropic continuous media with energy and stresses depending on deformation-tensor gradients and other tensor magnitudes 19 p3476 A66-36833
 Linear model for macroscopically uniform elastic medium, deriving expression for Green tensor in weakly and highly dispersed isotropic media 19 p3476 A66-36834
 Tensor calculus applied to meteorology, including geopotential phenomenology, zonal and meridional directions, hydrostatic equations, gradient and geostrophic wind, etc 20 p3593 A66-37312
 Shell theory, discussing relationship between stress function tensors and shell stress function 20 p3673 A66-38275
 Dependencies of independent components of elastic compliance and rigidity tensors of elastic body reinforced in two directions 22 p3989 A66-39819
 Complex load effect on shell buckling, determining compliance tensor components during stability loss 22 p3989 A66-39820
 Weierstrass characteristic and covariant constant vector fields, noting two metric tensors with same Christoffel symbols, two connections with same curvature tensor and Ch-equivalence class of metric tensors 22 p3941 A66-40567
 Continuum mechanical Cartesian tensor analysis theorem on completeness of Beltrami stress function 23 p4139 A66-41544
 Einsteinian gravitation equations stated in terms of three-dimensional tensor analysis as applied in conformal space 23 p4091 A66-41834
 Middle surface geometry of thin shells using line coordinate system with arbitrary direction and length of base vector 24 p4291 A66-42737
TENSOR FIELD
 Nonlinear conduction tensor of magnetoactive plasma, measuring effectiveness of generation of longitudinal and transverse fields during resonance merging of waves 14 p2348 A66-28469
TERBIUM
 Magnetic transitions in terbium and dysprosium as affected by hydrostatic

pressure at various high pressures and low temperatures 08 p1274 A66-19361
 Fluorescence behavior of gadolinium and terbium, noting nonradiative energy transfer in borate glass 13 p2158 A66-25052
 X-ray analysis of lattice structure of terbium crystals at 120 to 300 degrees K 21 p3803 A66-39304
TERMINAL
S ELECTRIC TERMINAL
TERMINAL GUIDANCE
 Optimization of guidance laws to achieve orbital rendezvous with propulsion system of only moderate throttling capability 01 p0100 A66-10027
 Terminal prediction guidance for rocket vehicles in terms of strapped-down and gimbaled platform concepts 01 p0101 A66-10042
 Automatic control in space reviewing tracking techniques, IR horizon sensors, Apollo spacecraft guidance computer and control systems and terminal guidance system of Surveyor spacecraft 03 p0351 A66-13258
 Computer-controlled vidicon terminal guidance system 08 p1253 A66-19541
 Optimal control for mechanical system ensuring optimal stabilization and maximum accuracy at terminal moment through minimization of difference between perturbed and unperturbed motion 12 p1914 A66-24239
 Meteorological environment considerations in terminal flight region relating to all-weather land recovery operations of lifting reentry vehicles [AIAA PAPER 66-360] 12 p1907 A66-24492
 Terminal reentry and dynamics evaluation computer program for small particles, using point-mass calculation during initial phase and determining drag coefficient [AIAA PAPER 66-380] 12 p1951 A66-24505
 Guidance control technique for soft automatic lunar landing 16 p2743 A66-30887
 Terminal guidance system instrumentation for Surveyor project lunar soft-landing spacecraft 18 p3132 A66-33881
 Stability and sensitivity of terminal linear feedback control systems 19 p3334 A66-36668
 Combined computer and physical simulation of manual tracking system for coupled-camera photography of one space vehicle from another when wieldable viewfinder is used 20 p3597 A66-37233
 Error correcting problem in space trajectory of continuous powered space vehicle, discussing optimal terminal guidance [AIAA PAPER 65-696] 22 p3945 A66-40367
 Optimization of guidance laws to achieve orbital rendezvous with propulsion system of only moderate throttling capability 24 p4235 A66-42766
TERNARY ALGEBRA
 Ternary-pentary majority algebra, Boolean-to-majority function conversion, and derivative identities 08 p1188 A66-19672
 Ternary-pentary majority algebra, Boolean-to-majority function conversion and derivative identities 20 p3522 A66-37264
TERNARY ALLOY
 Fractography and optical metallography analysis of fracture mode of thorium-tungsten-rhenium alloy showing ductility 01 p0085 A66-10410
 Selective separation of nickel titanium and nickel aluminum alloys and electrochemical behavior in various electrolytes 06 p0896 A66-16542
 Electrical resistivity, thermoelectric power and thermal conductivity of pseudoternary alloys in temperature range of 77 to 300 degrees K measured 11 p1750 A66-22697
 Book on niobium alloys including binary and ternary alloys, physical, chemical and mechanical properties, electron structure, heat treatment, resistance, etc 12 p1893 A66-23654
 Hot and cold hardening of aluminum-copper-magnesium alloys for application to missiles and aircraft skins analyzed, using electron microscope, noting metastable phases 12 p1893 A66-23747
 Phase equilibrium diagram of Ti-Co-Al system at 800 degree C, based on X-ray and Microstructural analyses 12 p1893 A66-23762
 Segregation by controlled solidification of small quantities of dissolved tantalum in

niobium, using titanium as third component in ternary alloy 12 p1897 A66-24917

X-ray analysis of molybdenum-nickel-silicon ternary crystal structure 13 p2108 A66-25683

Production techniques for fissures in weld-deposited and wrought Ni-Cr-Fe alloy fatigue specimens and fissure effect on fatigue strength 13 p2110 A66-26017

Scattering mechanical properties of ternary alloy creep resistant steel, emphasizing effect of heat treatment on microstructure [ASME PAPER 66-GT-112] 14 p2312 A66-27006

Effect of liquation inhomogeneity on superconducting properties of ternary alloy, noting enhancement of critical current density in wire prepared from this alloy 14 p2314 A66-27367

Fe-Ni-P system and structure of iron meteorites 15 p2603 A66-29967

Sigma-type phase occurrence in austenitic superalloys, discussing electron/atom density, residual matrix composition, etc 16 p2725 A66-31456

Semiconducting properties of several gallium and indium antimony tellurides systems and their metallurgical aspects 17 p2986 A66-33296

Feasibility analysis of very high temperature uranium-bearing liquid alloy heat exchanger for hydrogen gas, considering several ternary component liquid alloy systems [AIAA PAPER 66-622] 19 p3476 A66-35358

Weldability of nearly 100 tantalum binary or ternary solid solution alloys and dispersion-strengthened alloys, using room temperature bend ductility as criterion 19 p3368 A66-36125

X-ray analysis of crystal structure relationships among transition elements in binary and ternary aluminide alloys 20 p3586 A66-38092

TERNARY SYSTEM

Quasi-binary cross sections and phase diagrams for ternary semiconductor systems obtained on basis of combination energy estimates 01 p0118 A66-10288

Thermal and microscopic analysis and determination of microhardness, electrical conductivity and emf in titanium-aluminum-oxygen ternary system 01 p0087 A66-10659

Mechanical characteristics of columbium steels and synthetic iron-carbon-niobium alloys as function of temperature at which they are converted to austenite 03 p0381 A66-12540

Thermal, micrographic and X-ray diffraction techniques used for constitution diagram of ternary system tungsten-molybdenum-osmium at various high temperatures 03 p0385 A66-13209

Individual and combined effects of tungsten, molybdenum and zirconium additions on hardness of recrystallized niobium at various temperatures 05 p0699 A66-14698

Phase diagram of ternary system niobium-aluminum-nickel with results of thermal, microstructural and X-ray phase analyses and hardness measurements 07 p1050 A66-18063

Phase equilibria in Zr-Co-C and Nb-Fe-C ternary systems at high temperatures, using X-ray and microscopic analyses 10 p1546 A66-21509

Carbon deposition boundaries and other constant parameter curves in triangular representation of C-H-O equilibria, with application to fuel cells 11 p1639 A66-22243

Sequence of crystallization during heat treatment of ternary system of lithium aluminosilicate glasses 12 p1900 A66-24860

Equilibrium in nickel corner of nickel-titanium-borium system 13 p2109 A66-25878

Phase equilibria in Zr-Co-C and Nb-Fe-C ternary systems at high temperatures, using X-ray and microscopic analyses 23 p4081 A66-41529

TERRAIN

SA TOPOGRAPHY

Landscape interpretation of aerial photographs 15 p2505 A66-30013

Field determination of coordinates of points of mountainous terrain from aerial photographs with known elements of external orientation 19 p3353 A66-35363

Correlation of like and cross polarized

side-looking radar images with geologic features for terrain discrimination 24 p4173 A66-42634

Curvature distribution vs slopes distribution as indicator of surface roughness for spacecraft landings 24 p4279 A66-42789

Shoreline bending of homogeneous arcs of polar aurora passing perpendicular to shore 24 p4205 A66-43158

TERRAIN FOLLOWING AIRCRAFT

Optimization of terrain following performance for supersonic fighter aircraft, developing usable command signal 01 p0102 A66-10045

Task loading effect on pilot performance in computer simulated low altitude high speed flight 02 p0187 A66-11829

Added pilot work load imposed by additional commands in compensatory display reduces tracking performance in control of simulated terrain-following aircraft 12 p1808 A66-23922

Terraplane, air-cushion vehicle for varied terrain, design, performance characteristics, etc 13 p1997 A66-26735

Low-altitude control of U.S. Army rotary wing aircraft 17 p2950 A66-32722

Optimization of terrain following performance for supersonic fighter aircraft, developing usable command signal 19 p3397 A66-36484

Program management at subsystem subcontractor level for product reliability and maintainability in developing AN/APQ-110 terrain following radar for F-111A 20 p3685 A66-37914

TERRESTRIAL DUST BELT

Comparison of circumterrestrial and heliocentric dust cloud contributions to integral brightness of zodiacal light 05 p0668 A66-14881

Meteoritic material investigation using rocket and satellite measurements 05 p0761 A66-15228

Dynamical and light scattering properties of small dust grains orbiting Earth 10 p1529 A66-21154

Inconclusiveness of satellite measurements of micrometeoroid fluxes using piezoelectric microphone detectors in supporting hypothesis of cloud of dust surrounding Earth 23 p4128 A66-41213

TERRESTRIAL MAGNETISM

S GEOMAGNETISM

TERRESTRIAL RADIATION

Five-year measurements of circumglobal radiation and of short wave radiation from lateral half-spaces 02 p0220 A66-11258

Radiation measurements made at Antarctic station at Mirny including solar radiation, total radiation and short and long wave reflection and radiation balance 02 p0220 A66-11260

Approximation of effect of albedo inhomogeneity on flux of short wave radiation leaving Earth 02 p0222 A66-11658

Model estimation of radiation received from Earth by synchronous meteorological satellite 03 p0365 A66-12746

Magnetic particle motion, analyzing effect of Earth electric dipole field 05 p0752 A66-15387

Earth radiation field characteristics from radiation transfer equation for plane model of atmosphere for specific region, considering ozone absorption and molecular scattering 06 p0876 A66-16553

Mesostructure of integral terrestrial thermal radiation field determined from outgoing radiation, cloudiness and satellite data 07 p1029 A66-17922

Malkevich atmospheric transfer function calculation for Northern Hemisphere in order to correct satellite radiation measurements 09 p1435 A66-19887

Variations in vertical temperature and humidity profiles used to determine underlying terrestrial surface temperature from outgoing radiation 09 p1398 A66-19888

Relation between ascending fluxes of Earth and troposphere long-wave IR radiation and temperature of mean energy level 09 p1398 A66-19889

Terrestrial thermal radiation field from IR diffraction scanning spectrophotometer onboard Cosmos XLV 09 p1376 A66-20995

Night sky luminosity and solar UV

reflection from Earth measured by Cosmos XLV 09 p1376 A66-20995

Angular distribution of IR radiation on Earth and atmosphere from rocket and balloon sounding 09 p1376 A66-20995

Angular and spectral distribution of IR radiation emitted by Earth 09 p1376 A66-20995

Scattered Lyman alpha radiation measurements near Earth and in interplanetary space by Zond I, using NC filled photon counters with LiF windows 10 p1596 A66-2104

Meteorological satellite terrestrial UV radiation and cloud formation photographic data interpretation 11 p1728 A66-2231

Mesostructure of integral terrestrial thermal radiation field determined from outgoing radiation, cloudiness and satellite data 12 p1869 A66-2388

Earth radiation field characteristics from radiation transfer equation for plane model of atmosphere for specific region, considering ozone absorption and molecular scattering 14 p2289 A66-2822

Time variation of ocean temperatures and relation to internal waves and oceanic heat flow measurements from four stations 14 p2289 A66-2833

Outgoing Earth and atmospheric radiation observed in IR spectrum at various altitude by geophysical balloons and rockets 15 p2483 A66-2873

Cosmos-65 spectrophotometric measurements of atmosphere-reflected UV radiation spectra 15 p2485 A66-2907

IR transition zone between Earth and space studied by gyro-stabilized satellite 15 p2494 A66-3004

Relative values and daily totals for calculation of global and solar radiation 17 p2917 A66-3226

Solar terrestrial physics - Symposium Japan, December 1965 20 p3634 A66-3821

Angular, spectral and geographical distributions of outgoing fluxes of thermal radiation and Earth albedo measured, using Cosmos satellite 22 p3913 A66-4047

Performance degradation of transistors and solar cells due to terrestrial radiation effects, from studies on Tiroso Operational Satellite systems 24 p4247 A66-42095

TESSERAL HARMONICS

Artificial satellite theory extended to include long-periodic variations due to solid tesseral harmonics of geopotential 08 p1295 A66-19351

Tracking record of synchronous satellites over two-year period revealing effects of second and third order longitude components in Earth gravity potential field 12 p1875 A66-24893

Tesseral harmonics of coordinates using Baker-Nunn data and geopotential and dynamical procedures, noting iterative cycle for correction 15 p2491 A66-29999

Transformation of tesseral harmonics under rotation in elementary and self-contained method 17 p2921 A66-33225

Tesseral perturbations of repeating ground track synchronous satellite orbits in gravitational potential 18 p3233 A66-34595

Satellite motion under influence of longitude-dependent terms of geopotential in reference frame rotating with satellite mean motion, noting tesseral harmonics effect and dynamical and librational resonances 19 p3470 A66-36388

Tesseral harmonics of Earth gravitational field camera tracking of five satellites 23 p4066 A66-41847

Tests of advanced life support and environmental control systems in manned space laboratory simulator 02 p0186 A66-11646
IR nondestructive testing system for usability analysis in production line inspection of Polaris A-3 03 p0373 A66-12996
Instrumentation for testing first stage lox-kerosene rocket engines of ELDO satellite launcher, noting pressure transducer and computer data system [ISA PREPRINT 1.12-5-65] 05 p0684 A66-15514
Pattern recognition applied to fault detection in equipment testing procedure 06 p0868 A66-15984
Experimental assembly using liquid gallium cycle for testing electromagnetic pumps and flow meters 06 p0918 A66-16847
Motion picture on cavitation hysteresis, details on test apparatus, noting cavitation delay time 07 p1025 A66-18178
Digital computers to control automatic test equipment 08 p1187 A66-18741
Combination kneading-compaction, dynamic consolidation and shear testing machine, which is also simulator of abrasion effects for evaluation of airfield pavement 09 p1382 A66-20700
Servo tester with automatic data acquisition and reduction /STADAR/, discussing design and operational capability in Apollo program 13 p2027 A66-25661
Test system design, discussing operative systems and equipment for Sea Vixen radar and Seaslug Mark I 13 p2058 A66-25698
Dynamic logic chassis analyzer /DLCA/, diagnostic tool for isolating faults to circuit card or component level in programmer test station /PTS/ and component test station /CTS/ ground support
- equipment 14 p2260 A66-28266
Universal tester resembling microscope to test image-forming systems of mirrors and lenses by autocollimation with aluminized flat 15 p2499 A66-28840
Operational test instrument for PCM bit synchronizers/signal conditioners, discussing importance of bit decision errors 16 p2659 A66-30541
Test pad stability measurement using two accelerometers and recording autocollimator 18 p3110 A66-33815
Special missile flight test equipment, detailing velocity accumulator, elevation programmer, telemetry system, junction box and illumination measurement 18 p3111 A66-34049
Space packaged automatic checkout system for aerospace vehicles including test equipment, control, measurement capability and computer program 20 p3542 A66-37244
Thermoelectric device for semiconductor analysis, determining whether material is of n-or p-type conductivity 20 p3560 A66-37586
Diode curve tracer for observing I-V characteristics of semiconductor junctions and diodes via pulse method 20 p3560 A66-37587
Testing of adhesive bonding at high temperatures for use in reentry vehicles, using IR energy on specimen preloaded in shear [ASME PAPER 66-MD-38] 21 p3742 A66-38488
Resonance machine design for producing torsion and bending, ensuring equality of dynamic amplification factors 21 p3827 A66-38619
Automatic testing equipment, examining role of computer in reliability, quality of testing and time and cost savings 22 p3892 A66-40543
Integrated thermoelectric life and performance testing system including environmental chambers, automatic control systems and central data scanning and recording system 24 p4190 A66-42120
Tests of advanced life support and environmental control systems in manned space laboratory simulator 24 p4168 A66-42779
- TEST FACILITY
SA LABORATORY
SA ROCKET TEST STATION
SA SIMULATOR
SA TRANSIENT REACTOR TEST /TREAT/ FACILITY
SA WIND TUNNEL
Review of current knowledge and techniques for stabilizing test pads for high precision inertial guidance and control components 01 p0051 A66-10028
Wind tunnel test facilities of Modane-Avrileux test center 02 p0209 A66-11201
Ground and laboratory testing of HFB 320 Hansa considering static, dynamic, wind tunnel and deicing tests 02 p0176 A66-11245
USAF Central Inertial Guidance Test Facility for testing aircraft navigation systems 02 p0259 A66-12051
Flymotor rocket engine testing facility noting unique compressed air system 04 p0506 A66-13407
Automatic testing and evaluation system for launch-vehicle digital computer and data adapter of Saturn IB/Saturn V guidance system 04 p0507 A66-13612
Three electronic/digital computer techniques for compensating errors in transient-thrust measurements of captive rocket engine 04 p0507 A66-13613
Automatic control in captive testing of large space-vehicle propulsion systems and components 04 p0507 A66-13614
Royal Aircraft Establishment facilities in England for aircraft structure testing under supersonic conditions, simulating aircraft takeoff, flight and landing 04 p0508 A66-14021
MHD accelerators offer increase in performance capabilities of test facilities, noting Faraday accelerator is best at high flow densities [AIAA PAPER 65-631] 05 p0660 A66-15165
Role of ground and flight simulation test facility on past, current and future developments in aerospace propulsion 06 p0867 A66-15932
Goddard Space Flight Center Space Environment Simulator instrumentation subsystems reliability design factors 06 p0868 A66-15962
Aerodynamics of hangar-type engine test facilities, discussing flow stabilization, soundproofing and effect of external winds 12 p1860 A66-24973
Sequential Noise Output Recording Equipment /SNORE/, aircraft engine noise test facility, for jet noise and compressor noise and acoustic absorption materials test facility [ASME PAPER 66-GT/N-41] 14 p2269 A66-26986
Combined Irradiation Facility for simulation of selected space environments used to study optical behavior of materials 16 p2676 A66-30437
Factors to be considered in capital equipment and facilities for environmental testing, including management planning, work load reorientation, etc 16 p2831 A66-30441
Test facility for combined sonic and mechanical excitation of flight-and surface-vehicle hardware, using electropneumatic transducers 16 p2676 A66-30444
Space simulation facility, based on ion-getter pump system, using ion and titanium sublimation pumps and stainless steel shrouds for thermal conditioning 16 p2677 A66-30453
Design concepts and requirements for combined acceleration-vibration testing 16 p2678 A66-30459
Design of test facility capable of producing eight environments either singly or in combination 16 p2681 A66-30506
Collector target complex eliminating target life time and test equipment contamination by sputtered target material, applied in testing of electrical propulsion systems [AIAA PAPER 66-500] 17 p2991 A66-32774
Test equipment for Viggens motor version of Pratt and Whitney JT8D1 turbojet engine 18 p3093 A66-33938
Atoll computer programming language for spacecraft checkout systems and automatic support operations in Saturn launch vehicle 20 p3544 A66-38257
Inertial platform test station for shipboard maintenance and calibration of platform used in A6A and E2A aircraft, examining accelerometer bias and gyro drift tests 21 p3723 A66-38889
Vacuum optical bench /VOB/ spacecraft testing facility for calibration of telescopes, radiometers, spectrographs and monochromators and measurement of intensity distribution, radiation source and contamination 22 p3891 A66-40232
SH-3A airframe fatigue test facility for automatic simulation of helicopter flight and landing loads 22 p3992 A66-40251
Model tests on free jet scramjet facility configurations at high Mach numbers, obtaining data on bypass flow pressure recovery and diffusion process [AIAA PAPER 66-745] 22 p3846 A66-40632
Arc heated impulse wind tunnel facility including Mach 16 contoured nozzle [AIAA PAPER 66-759] 22 p3894 A66-40642
Simulation role in automatic testing system for missiles and rocket stages 23 p4052 A66-41135
Flight simulation laboratory layout and construction using hybrid computer systems, noting cost estimation 23 p4052 A66-41136
Total system compatibility in V/STOL propulsion system development and testing [AIAA PAPER 66-738] 23 p4121 A66-41325
Do 31 system test stand including cockpit with instruments, fuselage frame, wing structure, etc 24 p4192 A66-42488
Shock-on-shock test facility converted from combustion driver shock tunnel, noting model surface transient pressure results [AIAA PAPER 66-764] 24 p4192 A66-42571
- TEST FIRING
X-ray image intensifier in conjunction with motion picture film sequencing of thrust chamber image during hot firing to obtain failure analysis data 13 p2079 A66-25819
- TEST METHOD
Digital computer automated X-ray diffraction method to determine residual stress to improve processing

- reliability 01 p0033 A66-10102
 Statistical development testing discussing wear rate, factorial design, random balance design, evolutionary operation and component search pattern 01 p0077 A66-10116
 Four test methods for determining temperature sensitivity of bonded resistance strain gauges at high temperatures 01 p0070 A66-10886
 Laboratory simulation to test image-velocity measuring device yielding accurate and useful results 02 p0227 A66-11379
 Laboratory test methods for hypersonic flow simulation past reentry vehicle, ICBM and meteorite 04 p0506 A66-13502
 Input initiation energy and potential impact energies available under processing conditions, interpreting test data 05 p0787 A66-15138
 Test method evaluating explosive sensitivity, due to shock, of materials immersed in oxygen difluoride for application to rocket propulsion systems [CI PAPER WSCI-65-34] 05 p0743 A66-15150
 Accurate measurement of signal to noise ratio 05 p0634 A66-15497
 Book on metal testing at high temperatures including tension, relaxation, compression, impact, nonsteady conditions, hardness, etc 06 p0966 A66-16561
 Guidance system for British Navy anti-aircraft missile Seaslug using Cartesian control beam-riding, noting simulation testing 07 p1079 A66-18327
 Space vehicle automatic electric power system test mockup 08 p1169 A66-19503
 System with unknown failure-rate parameter undergoing reliability test of accept-reject variety, based on Bayesian context 12 p1888 A66-24670
 Planning, design and evaluation of systems tests, using Shannon information theory 13 p2057 A66-25283
 Near minimal set of tests detecting all single faults in combinational logic net, using shortcut methods 13 p2040 A66-25804
 System availability, noting lower confidence limit and estimation of time-to-failure and time-to-repair from test data 16 p2661 A66-30664
 Test system for n-digit combinational comparison unit realizing special, previously described algorithm 16 p2656 A66-30765
 Irradiation system for experiments with Plum Brook Reactor in nuclear rocket program, noting cryogenic system, dynamic testing, etc 17 p2956 A66-32045
 Testing and evaluation of aerospace ordnance, considering squibs, detonators, flares and explosive train devices 18 p3095 A66-34194
 Indirect testing of dynamic systems involving maximum measure of parameter values from minimum test points, noting dependency of error propagation on system structure 20 p3521 A66-37210
 Mechanical signature analysis using sound and vibration signals for product assurance and early fault detection 20 p3571 A66-37939
 Electronic test method for determining ultrasonic transducer frequency response involving actual signal transmission and reception 21 p3738 A66-39151
 Gas mixtures evaluation for MIG welding aluminum alloy noting nondestructive, mechanical and stress corrosion testing 22 p3925 A66-40266
 Wind tunnel tests of sonic boom phenomena, noting weak pressure field measurement, construction of extremely small models, boundary layer effects, etc [AIAA PAPER 66-765] 22 p3894 A66-40646
 Supersonic airflow effect on rain droplets measured in wind tunnel, shock tube and sled tests [AIAA PAPER 66-766] 22 p3894 A66-40647
 Result of testing cosmological models with red shift magnitude observations of cluster galaxies and quasi-stellar radio sources 23 p4125 A66-41066
 Ballistic range blast-traversal testing technique using scale models containing fast response FM telemetry system modulated by capacitance type pressure transducer [AIAA PAPER 66-777] 23 p4053 A66-41333
- TEST PILOT**
 Aerospace - Society of Experimental Test Pilots Symposium, Beverly Hills, September 1965 07 p0985 A66-17267
- TEST PROGRAM**
 Major phases in total testing program to validate booster in man-rated launch vehicle 01 p0141 A66-10107
 Microwave phase-measuring distance-determining system /SHIRAN/ enabling evaluation of slant ranges from airplane to four transponders located at ground control 02 p0227 A66-11378
 Design and test procedures for batteries and voltage regulator of power subsystem for Ranger TV system 04 p0459 A66-13582
 Statistical base for intuitive reliance on validity of conventional component qualification testing 04 p0528 A66-14447
 First stage of program for implementation of converters heated by nuclear reactor, consisting of cylindrical converters for endurance tests without reactor 05 p0617 A66-15548
 Nondestructive testing system for Polaris missiles and service correlation 12 p1884 A66-23649
 Ground test verification of SNAP-8 flight reactor design and operation of reactor while coupled to power conversion system 12 p1911 A66-23679
 Reliability engineering concepts for manned spacecraft development and test program to achieve operational readiness with minimum flight tests 12 p1884 A66-23742
 Human factor tests in large-scale operational system testing techniques [ASME PAPER 66-HUF-11] 14 p2229 A66-26967
 Simulated Martian entry conditions in Earth test program showing requirements for launch vehicle, tracking, cost and schedule [AIAA PAPER 65-219] 14 p2392 A66-27874
 Onboard testing and checkout of manned space vehicles 14 p2272 A66-28424
 Launch vehicle testing and hardware reliability in Gemini launch vehicle and Titan II 14 p2394 A66-28427
 Component testing and system reliability at various confidence limits for serially connected systems 14 p2305 A66-28428
 Stability and control test program for Canadair CL-84 tilt-wing V/STOL aircraft prototype [SAE PAPER 66-0315] 15 p2427 A66-29839
 Test program for Gemini Attitude Control and Maneuver Electronics /ACME/ system, establishment and execution 16 p2676 A66-30438
 Laboratory tests on complete systems for reliability of Earth satellites, noting effect of time and thermal level on problem detection, comparison of space problems with simulated space problems, etc 16 p2677 A66-30449
 High speed computer technique for simulating test design parameters for evaluation of ballistic-weapon system accuracy [AIAA PAPER 65-222] 16 p2809 A66-30888
 Test program philosophy of electric propulsion and power for planetary mission application [AIAA PAPER 65-67] 16 p2791 A66-30901
 Test program for data on plug nozzle behavior especially for solid propellant rockets, noting similarity with de Laval type nozzles 17 p2990 A66-32373
 Hypersonic wind-tunnel test program giving data on turbulent boundary layer with mass addition including Mach number effect on heat transfer and skin friction reduction and massive blowing 17 p2839 A66-32477
 Laboratory physiological-psychological responses to impulsive acoustic stimuli and sonic booms from supersonic aircraft 17 p2868 A66-33030
 Optimum number of test aircraft in test program to predetermine endurance and service life of same aircraft in serial production 20 p3493 A66-36921
 Design and performance of vacuum-insulated pipe used to transfer cryogenic fluids in space program 20 p3541 A66-37069
 XB-70A reliability program applied to initial system design stage from inception to present flight test
- program 20 p3568 A66-3797
 Integrated reliability test-to-failure program as applied to Shillelagh guided missile subsystem 20 p3573 A66-3798
 Lunar Excursion Module /LEM/ reliability program, discussing engineering, manufacturing and techniques of design and qualification testing of electronic components 21 p3714 A66-3958
 Coordinated laboratory and flight test program, determining stability of solar concentrator reflective surfaces in orbit environment 22 p3889 A66-4022
 Tests for obtaining water trajectory data and underwater flow field photographs used in determining deployment sequence water recovery system flotation bag for reentry vehicle 22 p3987 A66-4060
 Super- and hypersonic first-stage decelerators for stabilization and initial deceleration for final recovery device noting Ballute and reefed ribbon canopy types, testing, fabrication, etc 22 p3850 A66-4060
 Statistically designed experiments in wind tunnel test programs dealing with exhaust nozzles, discussing data analysis technique [AIAA PAPER 66-742] 23 p4052 A66-4132
 Electronic component reliability test program review including test planning objectives and relation of types of review to projects 23 p4152 A66-4160
- TEST RANGE**
 Measurement accuracy of antenna test range evaluated for gain, ellipticity, polarization angle, boresight axis and ground-reflected energy 12 p1836 A66-2415
 Operations research model for automatic in range scheduling function 14 p2272 A66-2843
 ETR range control modification for greater flexibility to meet overload 14 p2272 A66-2843
 Range instrumentation systems calibration and evaluation at Air Force Eastern Test Range 14 p2272 A66-2844
- TEST STAND**
 Slab motions affecting test mounts for gyroscopes and accelerometers investigated at underground and surface test locations 01 p0051 A66-1002
 Site selection, construction features and acceleration criteria for inertial test facility 01 p0052 A66-1004
 Testing installations for third stage of ELDO rocket noting test stands, control center and fuel depot 02 p0214 A66-1124
 Design and operation of test stands for ELDO rocket engines under simulated high altitude conditions 10 p1519 A66-2138
 Electronic hydrogen leak and fire detector systems installed on Saturn S-IVB static test firing stands, discussing installation and operational problems 20 p3557 A66-3721
- TEST TIME**
 Contamination-free test duration in test section of shock tunnel 11 p1685 A66-2283
- TEST TRACK**
 Nose-down pitching of capsule crew escape system observed during track test after separation from test vehicle and due to change in capsule pressure distribution 22 p3850 A66-4060
- TEST VEHICLE**
 S DRONE
 S FLIGHT TEST VEHICLE
- TETRACHLORIDE**
 S CARBON TETRACHLORIDE
 S SILICON TETRACHLORIDE
- TETRAETHYL**
 Lead oxides formed from tetraethyl lead /TEL/ in combustion zone identified in analysis of antiknock properties 03 p0413 A66-1248
- TETRAFLUOROHYDRAZINE**
 Reaction kinetics of tetrafluorohydrazine with fluorine to yield nitrogen trifluoride measured by colorimetric technique 04 p0472 A66-1339
 Nitronium tetrafluoroborate as versatile nitrating agent for nitrogen compounds 23 p4117 A66-4122
 Thermally initiated reaction between tert-butyl iodide and tetrafluorohydrazine provides synthetic route to tert-butyl difluoramine 23 p4118 A66-4123
- TETRAHEDRON**
 Tetrahedron elements with linearly varying

train for matrix displacement method,
interpreting stresses at nodal
oints 07 p1143 A66-17493
Passive spaceborne trajectory tracking
ystem design, using tetrahedral tracking
ometry 08 p1184 A66-19509
Results of applying tetrahedron method for
ynchronous observations of Echo I made
uring May and June 20 p3518 A66-37843
Rectangular-parallelepiped problem of
strained torsion produced by mutual
otation of two absolutely rigid diaphragms
atched to opposite
aces 21 p3831 A66-39292
AIRCRAFT
F-111 AIRCRAFT
THALLIUM
Dielectric constants of alkali and thallium
alides determined for various temperatures
and frequencies, showing results obtained
in sodium chloride 07 p1108 A66-18417
Velocity and attenuation of ultrasonic
aves in thallium when product of sound
ave vector and electron mean free path is
ess than unity 07 p1109 A66-18445
Critical magnetic field and temperature in
uperconducting metal 08 p1278 A66-19637
Pressure effect and superconducting
ransition temperature effect on thallium
and mercury-impure 09 p1411 A66-19957
Thallium admixture effect on electrical
conductivity of crystalline and liquid
elenium, noting decrease and increase in
conductivity, determining temperature
ependency and activation 14 p2359 A66-27177
Resistivity and Seebeck coefficient of
iquid thallium-tellurium
emiconductors 14 p2366 A66-27760
Absorption, excitation, and emission
pectra of TI-activated NaI single crystals at
iquid helium
emperatures 15 p2566 A66-29347
Critical magnetic field and temperature in
uperconducting metal 18 p3155 A66-34180
Absorption, excitation, and emission
pectra of TI-activated NaI single crystals at
iquid helium
emperatures 20 p3615 A66-37352
Indium and thallium first spectra sp² atom
onfigurations and configuration
nixing 22 p3960 A66-39801
THEODOLITE
Tower and triple theodolite pilot balloon
measurements of time and space
variability 11 p1730 A66-23380
Relationship of layer thickness and/or wind
speed to wind shear
[AIAA PAPER 66-352] 12 p1907 A66-24488
Optical techniques for satellite tracking
and star identification, describing ASTRO II
theodolite with photoelectric data
recording 12 p1883 A66-24933
Upper wind theodolite measurement error
caused by ambiguous utilization of rate of
climb of balloon 18 p3128 A66-33962

THERMAL ABSORPTION
Spacecraft thermal control by fusible or
phase-change materials 11 p1787 A66-23165
Heat accumulation in semiinfinite body
during abrupt temperature
changes 14 p2415 A66-28321
Absorption of thermal radiation from
gaseous fuel by transparent wall of nuclear
light bulb rocket engine
[AIAA PAPER 66-619] 18 p3134 A66-34434
Simulated solar absorbance of spacecraft
thermal control coatings determined
calorimetrically in vacuum at room and
cryogenic temperatures 22 p3889 A66-40217
THERMAL ACCOMMODATION
COEFFICIENT
Analog computation of contact thermal
resistances for two joined materials and
interstitial gas 13 p2209 A66-25477
Thermal energy exchange between gases
and solid surfaces, using realistic interaction

potentials of Morse type, Maxwellian velocity
distribution 16 p2825 A66-30387
Heat conduction in rarefied gases between
concentric spheres by moment method,
considering accommodation coefficients at
inner sphere surface 21 p3834 A66-38708
Temperature coefficient of resistance in
thin metal films, using Sondarmayer analysis
for vapor deposited Au, Ag and Cu
films 22 p3963 A66-40105
Thermal accommodation coefficients of He
on tungsten and hydrogen on hydrogen-
covered tungsten at temperatures of 325,
403 and 473 degrees K 23 p4033 A66-42078
THERMAL BATTERY
Molten-salt thermocell power output as
affected by hot electrode and figure of
merit 07 p0992 A66-18093
Power and efficiency analysis of molten
salt thermocell as thermoelectrochemical
energy converter 09 p1333 A66-20499
THERMAL BOUNDARY LAYER
Thermal conductivity and interference
pattern of temperature boundary layer
developed in reflected air shock
wave 04 p0598 A66-14327
Temperature distribution in homogeneous
eccentric annular layer with constant
internal heat generation 06 p0971 A66-16471
Thermal laminar boundary layer formation
on semiinfinite isothermal plate during
uniform motion in viscous incompressible
fluid over Prandtl number
ranges 08 p1206 A66-18874
Free convection thermal transfer in narrow
horizontal channels and infinitely wide
channels 09 p1471 A66-20704
Surface degradation-vaporization
characteristics of porous polystyrene under
intense surface heating in inert and reactive
atmosphere, measuring regression rate
[AIAA PAPER 65-58] 15 p2616 A66-29278
Turbulent boundary layers in compressible
and incompressible flow, examining pressure
gradients, temperature distribution and heat
transfer effects 18 p3097 A66-33595
Book on flow and thermal boundary layers
including laminar and turbulent flow
velocity profiles, Prandtl equation, heat
transfer problems, etc 22 p3897 A66-39702
Regression rate for gas-solid hybrid motor
described by convective heat transfer
feedback mechanism through laminar
sublayer
[AICE PREPRINT 34B] 22 p3970 A66-39876
Free convective heat transfer in thermal
boundary layer of rarefied
gas 22 p3902 A66-40922
Approximate integral method for
determining thermal boundary layer and
heat transfer on flat plate with insulated
surface 23 p4150 A66-41920
Temperature compensated
thermoanemometer using bead shaped
thermistor, for use in nonisothermal
boundary layers 24 p4212 A66-42704
Energy equation of boundary layer in heat-
insulating part of flat wall used to derive
equations for gas heat shield efficiency,
demonstrating effect of nonisothermicity
and compressibility 24 p4196 A66-42881
THERMAL BUCKLING
General Marguerre equations derived for
thin shallow shells subject to uniformly
distributed thermal
potential 01 p0155 A66-10716
Skin-heating temperature required to
eliminate buckling of airframe occurring
during spot electrical contact
welding 09 p1384 A66-20764
Bending of isotropic perforated plate with
linear temperature
gradient 13 p2201 A66-26405
Creep buckling of column subjected to
arbitrary temperature distribution along
column, considering aluminum
alloy 14 p2403 A66-27971
Snap-through buckling of open bimetallic
shallow spherical shell under uniform
temperature field 16 p2821 A66-31380
Thermal buckling modification in large
deflection equations for thin shallow
cylindrical shell 20 p3673 A66-38274
Turbine engine self-excited vibrations from
thermal deformation of engine components
during transient operating conditions, noting
vibration elimination and preventive
measures 21 p3807 A66-38622

Beam column supported by linear rotational and extensional springs representing elasticity of test rig, used in analog study of thermal buckling behavior of thin cylindrical shells 21 p3828 A66-38706

Deflection analysis of temperature gradient-induced buckling, curling and bending in thin unsupported plate with variable thickness 23 p4146 A66-41996

Notch and heat treatment effect on compressive buckling of WC/Co alloys 24 p4228 A66-43063

THERMAL COMFORT

Personal thermal conditioning system emphasizing heat exchange between body and environment to provide comfort with water-cooled protective clothing 02 p0188 A66-12012

Human thermal comfort prediction in oxygen-nitrogen atmospheres 06 p0817 A66-16235

Body heat storage experiments conducted to physiological limit in pressurized suits 06 p0817 A66-16238

Heat regulation, acclimatization and human tolerance upon exposure to moderate, hot and cold temperatures 10 p1489 A66-22119

Personnel comfort and protection from thermal stress, discussing clothing, environmental temperature, metabolic heat production, solar radiation, etc 10 p1492 A66-22120

Environmental parameters affecting spacecrew comfort during weightlessness and optimization of comfort system 14 p2231 A66-28412

Sport-type knit suit indicated as most suitable astronaut clothing in small-volume cabin during comfortable microclimatic conditions 15 p2443 A66-29458

Mathematical solution for expressing comfort level of man in gas-cooled space suit and space cabin, noting environmental parameters 17 p2863 A66-32142

Thermal comfort zones for helium-oxygen and helium-nitrogen atmospheres at reduced pressures 17 p2865 A66-32193

Water-circulation-cooled space suit, discussing heat dissipation mechanism, body temperature maintenance, metabolic rates, astronaut comfort, etc 20 p3509 A66-38164

Life support systems for crew comfort and safety, considering thermal and radiation environmental control, carbon dioxide removal, cryogenic gas storage, etc 22 p3857 A66-40129

THERMAL CONDUCTOR

Thermal flow meter incorporating effect of axial conduction [ASME PAPER 65-HT-19] 05 p0676 A66-14741

Grapho-analytical method of determining heat carrier parameters of cooler-radiator system in off-design operation 06 p0970 A66-16326

Efficiency of superconducting thermal switches determined, noting optimal operation parameters 09 p1420 A66-20052

Thermal flow meter incorporating effect of axial conduction [ASME PAPER 65-HT-19] 11 p1703 A66-22187

Electrical resistivity, thermoelectric power and thermal conductivity of pseudoternary alloys in temperature range of 77 to 300 degrees K measured 11 p1750 A66-22697

Heat transfer in liquids situated in gap between coaxial cylinders in presence of natural convection, determining effective thermal conductivity coefficient for water and ethanol 16 p2825 A66-30325

Chemical deposition fabrication techniques to integrate isolated thermal and electrical path into thin film substrate 17 p2883 A66-32118

Thermal conductivity of lanthanum and monochalcogenides, noting role and temperature dependence of crystal-lattice conductivity 20 p3617 A66-37556

Thermal transient characteristics of prolate spheroidal solid, using diffusion equation for heat conduction 22 p3998 A66-40034

Applications for new class of materials termed oxide-dispersion strengthened materials offering stability at high temperatures and high thermal and electrical conductivity 22 p3935 A66-40526

THERMAL CONVECTION

Viscosity effect on transition between axisymmetric and nonaxisymmetric flow

regimes of vertical rotating annulus of liquid 02 p0223 A66-11826

Two-dimensionality effect on suppression of thermal turbulence in air between two horizontal plates 02 p0218 A66-11954

Marginal convection in self-gravitating sphere of uniform incompressible fluid with uniform heat sources 11 p1785 A66-22437

distribution 11 p1785 A66-22437

Nonlinear hydrodynamic stability theory, considering application to thermal convection and curved flows 12 p1976 A66-23551

Instability criterion in air, argon and carbon dioxide at various pressures and layer depths, detecting convection and determining Rayleigh number for application in transport properties of gases 12 p1980 A66-24942

Entrainment problem, convective clouds and atmospheric thermal convection 14 p2325 A66-27280

Boussinesq approximation for hydrodynamic stability of natural thermal convection of fluid between two parallel vertical planes and calculation of critical Reynolds number 15 p2617 A66-29399

Dust cloud formation by thermal convection in Martian atmosphere 16 p2802 A66-30925

Stability of baroclinic axially symmetric vortex on F plane to axially symmetric disturbances 16 p2700 A66-31643

Steady state heat convection in viscous incompressible fluid sandwiched between two surfaces perpendicular to direction of force of gravity 19 p3342 A66-36471

Boundary layer equations of MHD free convection from heated horizontal plate in vertical uniform magnetic field 21 p3776 A66-38707

Turbulent viscosity forces in nonlinear three-dimensional nonstationary problem of thermal convection 21 p3760 A66-39359

Thermal convection in horizontally infinite layer of fluid confined between rigid heat conducting plates driven by temperature difference 23 p4151 A66-42055

Temperature and humidity variations in weak convection over England, noting measurement techniques and results 24 p4235 A66-43076

THERMAL CURRENT

Thermal counterflow of He 2 in wide channels of rectangular cross section investigated in terms of damping of small-amplitude transverse vibration of fine wire 04 p0510 A66-13712

Cumuli above sea in spite of stable layer between sea surface and cloud boundary, noting condensation around salt particles penetrating ascending thermals 04 p0542 A66-14306

Heat transfer coefficients in liquid metal concurrent flow double pipe heat exchangers 07 p1150 A66-17582

Dark electric conductivity, Hall effect and thermally stimulated currents in gallium arsenide single crystals 09 p1413 A66-19998

Cumuli above sea in spite of stable layer between sea surface and cloud boundary, noting condensation around salt particles penetrating ascending thermals 14 p2327 A66-28219

THERMAL CYCLING

Temperature cycling effect on welds of known strength which are encapsulated with several types of resins to determine internal stress in electronic modules 02 p0234 A66-11326

Continuous thermal cycling apparatus for small electronic component samples 10 p1511 A66-21751

Surface pit formation in aluminum, discussing effects of vacuum, quenching high temperature and repeated cycling 12 p1897 A66-24921

Destruction of heat resistant alloys by repeated heating and cooling, deriving formulas which are applied to thermocyclic loads under conditions of stressed state 14 p2310 A66-26790

New cycle concepts in development of gas turbine and turbomachinery [ASME PAPER 66-GT-85] 14 p2372 A66-26991

Crack susceptibility of ultrahigh-strength steel welds related to thermal cycles in welding and heat treating 14 p2292 A66-27325

Crack susceptibility of ultrahigh-strength steel welds related to thermal cycles in welding and heat treating 14 p2301 A66-2734

Creep fatigue, thermal cycling, vibration control, transient thermal response control, structural loads and hot part reliability relating to long-life jet engine failure [SAE PAPER 660311] 15 p2572 A66-2985

Absorbance and emittance of metal surfaces determined via cyclic incident radiation, noting error computation and method accuracy parameters [AIAA PAPER 66-416] 16 p2829 A66-3148

Optimization of efficiency of gas turbine cycles with heat recovery by fin difference method using digital computer 21 p3807 A66-3880

THERMAL DECOMPOSITION

Nitrogen trioxide given off during low pressure combustion of typical double base propellant 02 p0303 A66-1155

Char formation in solid rocket nozzle exit cones made from reinforced plastic predicted from corrosion standpoint 07 p1151 A66-1758

Ozone decomposition effect upon heat transfer determined, using differential energy and material balance equations 07 p1152 A66-1759

Low temperature chemical vapor-plating process for obtaining pyrolytic titanium diboride filaments for ablative composites 08 p1244 A66-1914

Thermal decomposition of difluorocarbon radical diluted in argon analyzed behind incident shock waves at high temperatures 12 p1811 A66-2362

Kinetics of two-phase decomposition of solid solution of magnesium-aluminum alloy using X-ray analysis, noting grain orientation and size 12 p1898 A66-2502

Thermal decomposition of tert.-butyl hydroperoxide with oxygen and acetone addition studied by isotopic tracer 13 p2017 A66-2630

Lanthanothermal reduction of samarium oxide and vapor pressure dependence on temperature 14 p2314 A66-2734

Chemical pumped UV laser action through thermal decomposition of dimethyl peroxide 15 p2513 A66-2883

Liquid hydrazine decomposition process to determine what chemical or physical changes may be occurring that cause break in burning rate/pressure curves, measuring flame temperature and light emission 15 p2570 A66-2961

Refractory oxides from alkoxides for group IVB transition and rare-earth metals applied to powders and coating of zirconia materials by thermal decomposition 16 p2730 A66-3024

Thermal conductivity cell measurements of depolymerization rate of polytetrafluoroethylene exposed to gamma radiation in flowing helium atmosphere 17 p2942 A66-3188

Shock wave studies with quadrupole mass filter, examining thermal decomposition of nitrous oxide from 1800 to 3500 degrees K 17 p2871 A66-3346

Prior gamma irradiation effect on thermal volatilization of vinyl and vinylidene fluoride polymers 20 p3587 A66-3731

Vacuum thermal decomposition of InSb and GaSb surfaces, noting evaporation rates 20 p3624 A66-3841

Pyrolytic graphite production by thermal decomposition of hydrocarbon gas on heated surface, noting annealing, alloying and residual stresses [ASME PAPER 66-MD-54] 21 p3753 A66-3849

Kinetics of monosilane pyrolysis, detailing gaseous and solid product formation, surface effects and experiments with added gases 22 p3999 A66-4041

Manometric measurement of pressure rise as measure of formation rate of volatile products of thermal decomposition of hydrazinium monoperchlorate and hydrazinium dperchlorate 23 p4117 A66-4122

Decomposition reaction for nitronium perchlorate involving formation of nitronium perchlorate and oxygen 23 p4031 A66-4122

Effects of isothermal decomposition of gamma ray irradiated orthorhombic crystal of ammonium perchlorate 24 p4170 A66-4242

- Autoignition of nitromethane vapors
plutated with Ar at high temperatures,
determining monomolecular decomposition
constant 24 p4295 A66-43199
- Chemical interaction among components of
FeO, ZnO and PbO admixtures in ammonium
perchlorate, noting effect on thermal
decomposition 24 p4295 A66-43200
- THERMAL DEGRADATION**
- Explosive hazard of gases generated by
transformer potting materials of styrene-
polyester copolymer, epoxy resin and
polyimide resin when subjected to
overloads 02 p0247 A66-11286
- Effectiveness of charring ablators strongly
influenced by stream enthalpy level and
heating rate 08 p1316 A66-18812
- Thermal degradation mechanism of
polystyrene, measuring volatilization rate
and molecular weight dependence on extent
of pyrolysis 08 p1243 A66-19067
- Thermal degradation of mesoporphyrin,
obtaining various alkylpyrroles and
hydrocarbons, noting role of controlled
pyrolysis as adjunct to mass
spectrometry 15 p2446 A66-28865
- Surface states on Si crystal as affected by
chemical etching and thermal oxidation
studied by pulsed field
effect 15 p2567 A66-29403
- Thermal degradation mechanism of
polyether-polyurethanes, analyzing
tractionation and measuring molecular
weights 17 p2943 A66-32834
- Fission spectrum neutron damage and
gamma ray damage in n-type Si, comparing
results of measurements by degradation of
minority carrier lifetimes 22 p3962 A66-40086
- THERMAL DIFFUSION**
- Cohen theory of square cascades and
countercurrent separation processes for
thermal diffusion columns 04 p0598 A66-14317
- Performance of thermal diffusion columns
studied for limits of validity of theory of
isotopic mixtures in case of mixtures of
gases 04 p0598 A66-14325
- Thermal diffusion of impurity atoms
suggested as possible cause of GaAs Esaki
diode deterioration by Weisberg and
Gold 05 p0733 A66-14672
- Convection heat transfer for turbulent flow
in subsonic diffusers
[ASME PAPER 65-HT-64] 05 p0605 A66-14765
- Thermal diffuse elastic electron scattering
in polycrystalline Al foil, using retarding
field apparatus 05 p0736 A66-14980
- Monte Carlo method to reveal properties
of hydrogen transport near critical level of
escape of Earth upper
atmosphere 07 p1028 A66-17362
- Thermal diffusion coefficient and
composition of gas mixtures by measuring
gas flow rate in capillary tube as function
of viscosity 07 p1148 A66-17394
- Thermal oxidation kinetics of silicon,
describing diffusion process, oxide layer
boundary reactions and space charge effects
on initial phase 07 p1106 A66-18401
- Electron diffusion coefficient estimated
and compared with theory for case of
infinite plane parallel plasma and constant
electric field 08 p1264 A66-19226
- Theoretical formulae for thermal diffusion
of binary gas mixtures 08 p1320 A66-19569
- Asymptotic steady state solution to
problem of thermal separation of
components across shear layer between cold
wet mixture and hot ambient
gas 09 p1470 A66-20178
- Plasma and carbide coatings for protecting
graphite surfaces at high temperatures
obtained by sputtering or deposition and
thermal treatment to induce
diffusion 10 p1548 A66-21508
- Heat conduction equation for axisymmetric
pulse heating of cylindrical sample with
constant surface
conditions 10 p1622 A66-21884
- Temperature dependence of thermal
diffusivity and thermoconductivity of
symmetrical body 11 p1786 A66-23062
- Radiochemical and electrical determination
of sodium distribution in thermal oxide on
silicon 12 p1933 A66-24829
- Thermal diffusivity of ammonium
perchlorate and sodium chloride powders
measured as function of porosity and
temperature 14 p2370 A66-27414
- Thermal diffusivity and specific heat of
molybdenum at high temperatures measured,
using variable heating in induction
furnace 15 p2523 A66-29226
- Approximation method for thermal
diffusion factor of almost Lorentzian gas
mixture with better convergence properties
than Chapman-Enskog
approximation 16 p2824 A66-30119
- Thermal diffusion in isotopic gas
mixtures 16 p2826 A66-30576
- Ohm law for nonisothermal plasma,
considering thermal diffusion forces,
obtaining expressions for electric
coefficient 16 p2761 A66-31085
- Flame propagation theory using one-
dimensional model and radial temperature
variation to obtain dependence of
propagation velocity on thermal-diffusivity
coefficient 16 p2830 A66-31515
- Behavior of ceramic insulating materials
under nonisothermal conditions at high
temperatures 16 p2731 A66-31605
- Thermal diffusion factor of binary gas
mixtures, discussing some relatively
unknown characteristics 17 p3033 A66-32041
- Turbulent flow near boundary and
equations for mass-or heat-transfer
coefficient in terms of turbulent diffusion
coefficient and thermal
diffusivity 17 p3037 A66-33042
- High temperature diffusion of potassium in
single crystal and polycrystalline
molybdenum 17 p2940 A66-33230
- Chemical vapor deposited thermoprotective
coatings for tungsten-and molybdenum-based
refractory alloys, discussing diffusion barrier
selection, interfacial microhardness, high
temperature diffusion-annealing tests,
etc 19 p3383 A66-36142
- Separation centers and dislocations during
diffusion of Zn into GaAs at high
temperatures, analyzing photographs of p-n
junctions 19 p3445 A66-36339
- Navier-Stokes equations for plane interface
with stagnation point formed by expelling
different gas from leading edge of airfoil
opposite to main flow 19 p3277 A66-36635
- Heat transfer, thermal conductivity and
thermal diffusivity of loose fibrous materials
under vacuum 20 p3587 A66-36978
- Simultaneous measurement of heat
conductivity, heat capacity and thermal
diffusivity of solid and liquid metals at high
temperature 20 p3678 A66-37120
- Thermal conductivity of gases measured,
using thermal diffusion
columns 23 p4149 A66-41502
- Plasma and carbide coatings for protecting
graphite surfaces at high temperatures
obtained by sputtering or deposition and
thermal treatment to induce
diffusion 23 p4083 A66-41528
- Diffusion thermo effect on temperature
field in combined heat and mass transfer
processes, noting experiments with
stagnation flow, turbulent boundary layer,
etc 24 p4293 A66-42282
- Diffusion of phosphorus into silicon, using
doped silicon oxide skin sources produced
by anodic oxidation 24 p4255 A66-42504
- THERMAL DISSOCIATION**
- Population inversion by thermal
dissociation of molecules in shock
wave 02 p0263 A66-11730
- High temperature kinetics of difluoroamino
radical decomposition in excess argon
studied behind incident shock
waves 03 p0413 A66-12337
- Shock tube measurements of carbon
dioxide dissociation in argon mixtures at
6000 to 11,000 degrees K 03 p0443 A66-12339
- Dissociation or ionization effects of air on
inviscid hypersonic flow past circular cone
with attached shock wave 03 p0316 A66-12928
- Diatomic molecules, discussing interrelation
between vibrational relaxation and thermal
dissociation 04 p0597 A66-13878
- Thermal dissociation in interactions of
carbon with carbon dioxide and
oxygen 08 p1320 A66-19639
- High temperature equilibria among vapor
species produced by fluorination of
beryllium in Knudsen effusion cell, using
mass spectrometer, deriving dissociation
energy 12 p1811 A66-23621
- Thermal dissociation rate of nitrogen oxide
in shock waves measured by IR
emission 13 p2208 A66-25084
- Homogeneous dissociation kinetics of gas
examined by means of adiabatic compression
apparatus attached to mass
spectrometer 13 p2079 A66-25821
- Nonequilibrium laminar boundary layer of
binary dissociating gas determined by
solving nonlinear partial differential
equations governing system
[AIAA PAPER 65-129] 14 p2274 A66-27406
- Stagnation region for body of revolution in
analyzing temperature, velocity and atom
hypersonic flow with low Reynolds number,
concentration under aerodynamic
heating 16 p2686 A66-31037
- Dissociation energies of chlorides of
alkaline-earth metals determined from
equilibrium reactions of metals with
chlorine in flames 16 p2830 A66-31613
- Interferometric study of dissociation rate
of nitrogen behind shock
waves 17 p2908 A66-32437
- Thermal dissociation of molecular fluorine
in inert gas from 1650 to 2700 degrees K in
shock tube coupled to time-of-flight mass
spectrometer 18 p3139 A66-34501
- THERMAL EFFECT**
- Two-dimensional problem of
thermoelasticity involving periodic thermal
effects, using Parkus thermoelastic
displacement potential 01 p0155 A66-10652
- Thermal limitations on capabilities of
gallium arsenide p-n junction
lasers 01 p0082 A66-10895
- Brillouin scattering in liquids examining
velocity, frequency and lifetime of thermally
excited hypersonic sound waves, using laser
light sources 03 p0376 A66-12422
- Bead leakage affect on voltmeter,
discussing quality control measurement and
thermal effects on electric
equipment 04 p0521 A66-13942
- Roberts method determining
accommodation coefficients of gases on bare
wires leads to erroneous conclusions due to
thermal inertia of experimental apparatus in
vicinity of current paths 04 p0545 A66-14170
- Rubber-compound fatigue resistance,
examining effects of preliminary prolonged
heating and cooling 06 p0901 A66-16482
- Electron irradiation and thermal effects on
electrical transport properties of n-type II-
VI semiconductors 06 p0935 A66-17131
- Aerodynamic and heat transfer
characteristics of cross-stream wedge in low
density aerodynamics, investigating
transition from continuum to free molecular
flow 07 p0982 A66-18126
- Thermal ionization of small traps in cubic
piezoelectric 07 p1105 A66-18377
- Built-in surface charge on thermally
oxidized silicon as function of exposed
crystal face orientation 09 p1411 A66-19929
- Effect of thermal and thermomagnetic
treatment of nickel-cobalt ferrite single
crystal on rotational magnetic hysteresis
losses 09 p1412 A66-19983
- Two-dimensional problem of
thermoelasticity involving periodic thermal
effects, using Parkus thermoelastic
displacement potential 12 p1963 A66-24014
- Germanium specimens with various
dislocation densities quenched from high
temperatures to introduce vacancies,
contamination by copper atom diffusion,
finding activation energy 12 p1930 A66-24801
- Superconductors for mixed AC-DC power
transmission and thermal dissipation
effect 13 p2030 A66-25219
- Thermally-induced optical path distortions
in laser rods measured by obtaining time
resolved interferograms, using Mach-Zehnder
interferometer and Q-switched
laser 13 p2092 A66-25994
- Thermal optical behavior of glasses and
other potential laser materials and thermal
distortion in air, water, benzene, ethanol and
toluene 13 p2092 A66-25996
- Amplification of interaction of atoms and
of pulsed or periodic cooling of transparent
media produced by laser beam, noting
changes in kinetic energy of
atoms 13 p2093 A66-26021
- Impurity effects on stress and temperature
field distribution in elastic bodies, deriving
equations 13 p2203 A66-26425

Thermal field effect on stress-strain state of infinite elastic plane with circular hole examined, using Muskhelishvili principle 13 p2204 A66-26435

Metal welding technology, including problems of thermal deformation and heat effect on properties of welded materials 14 p2298 A66-26945

ASTM-ASME Joint Committee report on high temperature properties of stainless steels such as stress-temperature, yield and rupture curves, etc 14 p2313 A66-27229

Heat resistance, bending and tensile creep of multicomponent Ti alloys 15 p2519 A66-28534

Thermal effects in various media due to laser beam 15 p2515 A66-29209

Effect of heating of ionosphere by photoelectrons coming from magnetically conjugate point, using electron temperature measurements 16 p2698 A66-31214

Manometer for measuring gas pressure from current required to heat platinum wire to certain temperature 16 p2708 A66-31359

Infrared and thermal suppression of photoconductivity in mercury sulfide crystals with copper and silver impurities 16 p2786 A66-31729

Mechanics, thermodynamics and constitutive equations of nonpolar materials under thermal effects and mechanical forces 17 p2957 A66-31930

Thermal synthesis of amino acids from methane-ammonia-water mixture passing through Earth-crust materials 17 p2851 A66-32089

Thermal effects in various media due to laser beam 17 p2936 A66-33058

Acousto-thermal effect in semiconductors in which carriers are characterized by isotropic effective mass and relaxation time, both dependent on energy 18 p3154 A66-33944

Two-dimensional nonlinear equations of finite thermal oscillations of anisotropic thin elastic plates 20 p3673 A66-38278

Plasma electron thermal motion influence on propagation of plane oscillations of plasma which are adiabatic 21 p3781 A66-39014

CW ruby laser of 10-mm length in ellipsoidal pumping system under water cooling, noting various modes 22 p3931 A66-40100

Functioning of progressive wave plasma accelerators, discussing role of electromagnetic forces 23 p4100 A66-41177

Viscoelastic stress analysis for load bearing components made of plastics and polymers, discussing time and thermal effects, irreversibility, solution techniques and design applications 23 p4145 A66-41974

Mode selection, relaxation oscillations, mode interaction and thermal effects in room temperature CW lasers in ellipsoidal pumping systems 24 p4221 A66-42546

Reentry and recovery of space vehicles in reliable shock free landings, using modified helicopter rotor for hypersonic flow and thermal problems 24 p4284 A66-43073

THERMAL EFFICIENCY

Increasing mass flow through gas turbine without additional work from compressor and consequently increasing thermal efficiency, noting combustion problem [WSC1 66-17] 18 p3164 A66-34424

Thermodynamics of MHD converter cycles with previously mixed liquid metal used as working body, discussing thermal, electrical and energetic efficiency 20 p3496 A66-36986

THERMAL EMISSION

Optical thickness of Jupiter isothermal atmosphere assuming it consists of hydrogen, methane and ammonia 05 p0759 A66-14879

Thermal emittance of cone and cylinder cavities electrically disintegrated in tungsten and molybdenum measured with pyrometer 05 p0716 A66-14985

Measurement of surface emittance of surface coatings for selected metals, providing low-thermal emittance characteristics in IR spectrum for thermal and corrosion control [AIAA PAPER 66-18] 05 p0705 A66-15849

Solar absorptance and thermal emittance of vacuum-deposited aluminum, zinc oxide-

potassium silicate white paint and high emissivity black paint after exposure to salt atmosphere [AIAA PAPER 66-41] 07 p1053 A66-17892

Boundary surface roughness effect on polarization of thermal electromagnetic wave emission from dielectric medium 09 p1401 A66-20115

Directional monochromatic emittance of isothermal diathermanous coatings on various conductors [AIAA PAPER 65-119] 14 p2411 A66-27410

Emissivity-thermoconductivity relationship in polished metals 15 p2616 A66-28764

Potential on hot body in plasma as function of surface temperature and plasma characteristics, considering case where photoemission is present 15 p2595 A66-29087

Measurement of sticking coefficient for thermal electrons in oxygen and air, using microwave circuits 16 p2756 A66-30101

Plasma probe in thermal emission converter with high cesium vapor, noting parameters of diffusion, electron concentration, etc 16 p2756 A66-30103

Absorptance and emittance of metal surfaces determined via cyclic incident radiation, noting error computation and method accuracy parameters [AIAA PAPER 66-416] 16 p2829 A66-31487

Thermal emittance and reflectance of diffuse-bottomed, specular-walled groove in solar radiant-flux environment [AIAA PAPER 66-459] 16 p2811 A66-31491

Spectral distribution of thermal emission intensity of magnetically active plasma bounded by cylindrical surface 17 p2965 A66-32240

Local emissivity of vertex point of diffuse conical or V-groove cavity, noting dependence on wall material, angle factor and agreement with theoretical solution 17 p3035 A66-32613

Frequency spectrum of continuous thermal radio emission of plasma layer 17 p2974 A66-33285

Error in plane-layer approximation of boundary layer emission associated with gray gas flow past plane plate 19 p3341 A66-35752

X-ray and metallographic examination of tungsten alloys, noting decrease of work function during thermal emission upon addition of lanthanum hexaboride 20 p3584 A66-37414

Numerical extrapolation solution of kernel-characterized integral equations for apparent emissivity of conical and cylindrical cavities 20 p3681 A66-38298

Thermal emission in subsonic and supersonic nozzles based on energy equation solution and laws of heat transfer 24 p4295 A66-42878

THERMAL ENERGY

Design of radiation source system simulating albedo and planetary emission energy flux to space vehicle in any planetary orbit 02 p0212 A66-11218

Carbon dioxide reduction systems using chemical, electrochemical and thermal energy 02 p0185 A66-11641

Quantum statistical theory of multicomponent systems applied to fully ionized gas in thermal equilibrium 03 p0398 A66-12605

Dichloroborane synthesized in quantitative yields by thermal hydrogenation of boron trichloride 05 p0629 A66-14540

Thermionic converter transforming calorific energy of flame into electric energy having protective coating of enamel-covered alumina 05 p0623 A66-15594

Atmospheric ionization, discussing formation of different ionospheric regions 05 p0675 A66-15744

Fuel cell systems, particularly hydrogen peroxide type, noting electrochemical oxidation, water production, thermal energy, electrolyte, etc 06 p0808 A66-16391

Critical heat flux under forced motion of underheated alcoholic aqueous solutions 09 p1470 A66-20148

Electrical and optical experiments performed on single crystals of beta-rhombohedral boron, noting resistivity decrease and differences between thermal and optical band gap 10 p1579 A66-21720

IR applications to reliability assessment,

stress analysis, testing, etc, of electrical energized components, thermally or by power dissipation 12 p1842 A66-2467

Simplified method of evaluating thermal and ionizing energies from fission of uranium atoms 16 p2744 A66-3043

Rocket borne ionospheric direct sounding instruments to measure ion and electron density, electron temperature, thermal electron energy distribution and space electric potential versus rocket potential 16 p2705 A66-3081

Structure of hydromagnetic shockfront wherein electrostatic turbulence continuously develops, analyzed to aimed orders of magnitude for front width electron and ion heating and magnitude of fluctuation excitation 19 p3408 A66-3627

Electron beam interaction with plasma in mirror magnetic fields and heating of plasma components under beam instability, noting oscillation spectrum and thermal energy 19 p3430 A66-3658

High frequency-stability EM wave source, applying thermal excitation methods to pencil quantum generator in IR region 21 p3749 A66-3933

High frequency-stability EM wave source, applying thermal excitation methods to pencil quantum generator in IR region 22 p3929 A66-3970

Thermal energy Ar charge transfer reactions measured in pulsed-discharge flowing-afterglow system with mass spectrometer detection 22 p3860 A66-3992

THERMAL ENERGY STORAGE

Analytical prediction of transient heat transfer performance of thermal energy storage devices 01 p0016 A66-1091

Magnetic storage, discussing mechanics and thermal energy conversion in magnetic field energy and electromagnetic energy transfer 05 p0717 A66-1533

Thermal energy storage using solar Brayton cycle cavity receiver with lithium fluoride heat storage [AIAA PAPER 64-727] 13 p2006 A66-2663

Magnetic storage, discussing mechanics and thermal energy conversion in magnetic field energy and electromagnetic energy transfer 15 p2543 A66-2998

THERMAL ENVIRONMENT

SA HIGH TEMPERATURE

ENVIRONMENT

Design guide-lines for vehicles which must survive thermal environment of space 03 p0433 A66-1333

Thermal management of Lockheed L-2000 supersonic transport heat sources and sinks considering flight profile, aircraft configuration and heat transfer mode [ASME PAPER 65-AV-40] 09 p1329 A66-2029

Variation of mean thermal conductivity of nickel-cadmium cell determined as function of overcharge current and environmental temperature [AIAA PAPER 64-751] 13 p2007 A66-2665

Lateral creep deflection vs time relation in nonuniform thermal environments for linear polymer column described as combination of Maxwell and Voigt elements 14 p2396 A66-2735

Aerospace thermal environments, examining effects on components of large aperture photographic catadioptric systems 15 p2498 A66-2882

Thermal analysis of ceramic-based hybrid microcircuits, using lumped-constant electrical analog 16 p2667 A66-3159

Computer-simulated mathematical model of thermal environmental effects on expulsion system design parameters for liquid propellant gas-generator rocket engine [AIAA PAPER 66-686] 18 p3163 A66-3422

Thermal sterilization environment as significant design condition for planetary lander entry-shield bond-structure combination 20 p3509 A66-3816

Performance changes of various commercial types of vidicons tested in thermal chamber at practical extremes of temperature 24 p4185 A66-4295

THERMAL EXPANSION

Hot glow probe determination of plasma space potential noting disturbance due to contact potential drift and probe construction, accuracy and applicability 01 p0113 A66-1063

- High temperature dilatometer for shrinkage measurements in sintering of powdered metal compacts 01 p0069 A66-10748
- X-ray measurements of thermal expansion arc-cast carbides of titanium, zirconium and hafnium 03 p0381 A66-12636
- Thin section bearings used to solve spatial needs and temperature problems of high altitude flying 08 p1229 A66-18827
- Thermal expansion of tungsten and tantalum in high temperature range 09 p1388 A66-20147
- Structural anisotropy coefficients of crystallization in carbon-graphite materials from X-ray and linear expansion data 10 p1548 A66-21240
- Variational calculus methods for convective heat transfer to nonhomogeneous fluids and fluids with thermal expansion 12 p1979 A66-24817
- Specific heat of liquids with constant volume determined, using pycnometer cell, obtaining formula for specific heat in terms of measurable thermal parameters 13 p2077 A66-25354
- Temperature and creep aftereffect in high purity crystalline cadmium 15 p2523 A66-29600
- Silicon carbide coatings on molybdenum and tungsten by pyrolysis of methyl trichlorosilane, discussing oxidation tests and spalling due to thermal expansion mismatch 16 p2729 A66-30248
- Thermal expansion and electrical resistivity measurements below 400 degrees K on niobium and two niobium alloys containing tungsten 16 p2725 A66-31454
- Thermal-expansion characteristics of several refractory metals to 2500 degrees C, noting optical measurement in helium 16 p2726 A66-31463
- Structural anisotropy coefficients of crystallization in carbon-graphite materials from X-ray and linear expansion data 19 p3388 A66-35863
- Electric resistance and thermal expansion of Ti-Nb-Cr alloys, noting phase composition 19 p3387 A66-36450
- Thermal expansion of tungsten and tantalum in high temperature range 21 p3753 A66-39418
- Method for compensating resistance of strain gauges for thermal expansion 22 p3918 A66-40155
- THERMAL EXPANSION COEFFICIENT**
- Thermal expansion of complex semiconductors from 20 to 340 degrees K, calculating Grunisen constant for diamond, silicon, germanium, tin, etc 01 p0124 A66-10769
- Anomalous thermal expansion above and below Curie point as function of temperature in gadolinium single crystal 02 p0274 A66-11725
- Thermal expansion coefficient of materials determined by tensometric method based on measurement of temperature dependence of resistance of strain gauge sensing elements 02 p0231 A66-11998
- X-ray diffraction method for measuring thermal expansion coefficient of germanium, silicon, indium antimonide and gallium arsenide 06 p0930 A66-17047
- Dependence of expansion ratio on impurity concentration for silicon samples differing in impurity and dislocation content 09 p1412 A66-19991
- Thermal expansion of complex semiconductors from 20 to 340 degrees K, calculating Grunisen constant for diamond, silicon, germanium, tin, etc 11 p1749 A66-22280
- Effect of variation in thermal expansion coefficient upon thermal stress in thin leading edge to set upper and lower limits 12 p1957 A66-23597
- Elastic constants and thermal expansion coefficients of bodies with inhomogeneous regular structure 12 p1958 A66-23666
- Correlation expressing reduced coefficient of thermal expansion as function of reduced Debye temperature for metallic solids used or predicting coefficient at any temperature 14 p2411 A66-27375
- Thermal expansion coefficient of doped germanium, noting correlation between impurity used and coefficient variation 14 p2368 A66-28244
- Linear expansion at various temperatures of titanium alloys and effect of alpha grain size and heat treatment on expansion coefficient 15 p2522 A66-29182
- Elastic constants and thermal expansion coefficients of bodies with inhomogeneous regular structure 22 p3988 A66-39713
- Mechanical properties, coefficient of linear expansion and microstructure of aluminum-based sintered-powder alloy containing silicon and nickel 22 p3937 A66-40884
- THERMAL FATIGUE**
- Electrical analog model with distributed capacitance and resistance generates charge flow equivalent to two-dimensional transient heat conduction [ASME PAPER 65-HT-66] 05 p0786 A66-14766
- Oxidation, stress-to-rupture, thermal and vibration fatigue tests at various temperatures carried out on protectively coated molybdenum and titanium-molybdenum alloy 05 p0702 A66-15469
- Aluminum alloy surface flaw detection, discussing finishing process methods and parameters for improving penetrant response 06 p0887 A66-16798
- Thermal fatigue of constrained bars made of linearly hardened material evaluated, using mathematical analysis 06 p0967 A66-16969
- High temperature alloys for gas turbine, examining advances in creep strength, low cycle fatigue and wrought and cast turbine blading alloys [SAE PAPER 650708] 06 p0898 A66-17079
- Nickel alloy testing for thermal fatigue and bow evaluation, using miniature airfoil specimens, in aircraft gas turbine application [SAE PAPER 660056] 09 p1388 A66-20154
- Heating unit of device for testing small samples of sintered materials for thermal fatigue 11 p1709 A66-23475
- Thermal fatigue testing of large cross-linked polystyrene feedhorn window and control specimens 15 p2524 A66-28882
- Text on thermal stress and low-cycle fatigue covering elastic stresses, plastic flow and creep, stress cycling, etc 18 p3258 A66-34715
- Heat flux dependence and directional effect of thermal contact resistance for interface between dissimilar metals 22 p4000 A66-40921
- Environmental testing and evaluation of useful life of insulation material for aircraft electrical equipment operating at 280 degrees C 24 p4229 A66-43083
- THERMAL INSTABILITY**
- Thermal stability to racemization and resolution of several racemic amino acid diastereomeric derivatives by gas chromatography 01 p0021 A66-10604
- Deformation resistance and stability dependence of strain-induced distortions in nickel alloys on various aluminum oxide distributions 01 p0087 A66-10749
- Phonon field effect on plasma frequency of dense electron gas for nonzero temperatures 02 p0267 A66-11708
- Thermal instability analogous to thermal runaway occurring in differential transistor amplifiers 04 p0500 A66-14097
- Effect of thermal instability in shop areas, static and dynamic loading and floor movement on precision fabrication and assembly [SAE PAPER 650759] 05 p0688 A66-15274
- Thermal instability causes negative-resistance region in nonohmic point contact conduction in semimetals 16 p2769 A66-30155
- Thermal stability aspects of commercial kerosene for supersonic transport [AIAA PAPER 66-670] 18 p3162 A66-34442
- Deformation resistance and stability dependence of strain-induced distortions in nickel alloys on various aluminum oxide distributions 18 p3124 A66-34983
- Behavior of thermally coupled transistors in differential amplifier explained in terms of empirical equation for transistor current 19 p3317 A66-35726
- Serrated yielding by metals during tension tests at temperatures near absolute zero 19 p3380 A66-35846
- Thermal instability of small amplitude disturbances in solar chromosphere, showing linear wave amplification 20 p3654 A66-38019
- Thermal instabilities role in star formation, discussing intercloud medium, magnetic pressure and gravitational collapse 23 p4125 A66-41062
- Model of plasma state prior to flare satisfying thermal equilibrium conditions by acoustic heating and radiation 23 p4127 A66-41082
- THERMAL INSULATION**
- SA HEAT SHIELD**
- Reliability and reproducibility of SIL-TEMP 84 fabric used as reinforced filler in ablative components and high temperature insulating material in rockets and missiles 01 p0089 A66-10089
- Spacecraft Thermal environment control to insulate cryogenics in bulk for space use 01 p0161 A66-10290
- Glass, quartz, mineral and ceramic fibers woven into fabric provide thermal insulation, reinforced plastic, filtration, friction materials and electrical insulation 01 p0091 A66-10356
- Low density thermal insulation materials, discussing temperature control, ablation efficiency and processing qualities of materials for missile use 06 p0900 A66-16296
- Elastomeric silicone for aerospace electric and thermal insulation, discussing properties, application and new developments 06 p0900 A66-16297
- Carbon dioxide frost as thermal insulation for hypersonic spacecraft, noting conductivity 06 p0969 A66-16301
- Supersonic transport design in thermal insulation, structure and air traffic control 06 p0805 A66-16324
- High temperature insulation systems for thermal protection of reentry and hypersonic cruise vehicles [AIAA PAPER 66-43] 07 p1154 A66-17894
- New thermal insulations and product design 09 p1393 A66-20937
- Thermal insulation of hypersonic blunt body by central coolant injection formation of insulating layer between body and high temperature freestream 10 p1481 A66-21797
- Compressibility effect on flow in MHD boundary layer of semilinear thermally insulated flat plate 10 p1525 A66-21847
- Problems of manned spacecraft design such as weight restriction, structural problems, heat protection, thermal control, vibration, etc 11 p1778 A66-23073
- Long duration manned spacecraft material and structural requirements in radiation and meteoroid shielding, thermal control, cabin sealing, etc 11 p1778 A66-23074
- Direct-to-home TV broadcasting satellite system for upper UHF, describing stabilization, thermal control, antenna, power amplifier, etc [AIAA PAPER 66-309] 12 p1955 A66-24776
- Thermal insulation of surfaces by cold gas injection into laminar compressible boundary layer of air in chemical equilibrium 13 p1993 A66-26730
- Thermal model for performance of cork insulation on Minuteman missile in launch environment [AIAA PAPER 65-117] 16 p2827 A66-30893
- Material properties and thermal inputs on heat shields for Mars entry, noting importance of insulation vs ablation due to uncertainties in radiant heating inputs 16 p2809 A66-30895
- Lightweight inflatable shadow shields for cryogenic space vehicles and performance in conjunction with superinsulation 16 p2810 A66-30899
- Impact of propellant heating on nuclear spacecraft insulation and pressurization systems design 18 p3240 A66-33816
- Shingle attachment of multilayer insulation to cryogenic flight tanks 20 p3674 A66-37061
- Compressive load effects on heat flux through multilayer insulation 20 p3675 A66-37062
- Air purging of high-performance multilayer insulation system with helium 20 p3675 A66-37064
- Reinforced plastic materials evaluated as potential low temperature structural insulators 20 p3676 A66-37084
- Space environmental effects on thermal control coating, describing simulation facility design, components and functions 20 p3543 A66-37315

Compression per stack layer varying as power of layer thickness when multilayer structures are compressed under loads of up to 5 x 10 super 3 lbf 20 p3667 A66-37480

Heating environment for space vehicle, examining wind and incident radiation effects on heat transfer to liquid hydrogen, insulation surface thermal properties and optimization of insulation system 22 p3986 A66-39777

Insulation surface regression mechanism in rocket motors, examining ablation corrosion and erosion effects 22 p3970 A66-39872

Multilayer insulating material thermal-mechanical environmental tests for use as heat shields in cryogenic storage tanks [AICE PREPRINT 22F] 22 p3997 A66-39889

Satellite thermal control by phase-change materials with heat-transfer equation solved by finite difference method and electrical analogs compared with other insulators 23 p4147 A66-41105

Thermal and physical properties of elastomeric internal insulating materials for solid propellant rocket engine 23 p4120 A66-41116

Heat insulation coating for Japanese SSR /special small rocket/ and materials testing by torch-burner method 23 p4148 A66-41426

Heat insulation coating on cylinder wall of solid propellant rocket motor using epoxy resin, polysulfide plastic, metal oxides, etc 23 p4148 A66-41431

Thermal insulation and structural support for thermoelectric devices, discussing fabrication of diffusion bonded structures in conjunction with material selection 24 p4293 A66-42121

THERMAL NEUTRON

Effects of recoil in semiconductor with thermal-neutron-absorption cross section, measuring changes in luminescence and conductive properties of CdS 13 p2166 A66-25792

Thermal neutron irradiation effect on superconducting properties of niobium aluminide and vanadium silicide doped with fissionable impurities 17 p2979 A66-32630

Flame temperature measurements by thermal neutron probe providing data on measured and computed transmission vs Cd foil thickness 23 p4148 A66-41501

THERMAL NOISE

Ultimate sensitivity limit and photoelectron statistics for photomultiplier lit by coherent and noncoherent light 03 p0377 A66-12473

Thermal noise radiation in microwave region from lower atmosphere 04 p0474 A66-13379

Radar target detection analysis in presence of thermal noise 04 p0487 A66-14129

Noise in metal oxide semiconductor field effect transistors, using thermal noise activity in conducting channel 05 p0644 A66-14580

Thermal noise effects in field effect transistors at LF 06 p0850 A66-16440

P-n junctions and vacuum diodes used to demonstrate that thermal and shot noise are produced by nonuniform velocity distributions in charge-carrier plasmas 06 p0858 A66-16989

Two-dimensional theory of noise emission from magnetically shielded thermionic cathodes 06 p0858 A66-17014

Correlation matrix of natural thermal noise put forward for arbitrary passive linear system described by Lagrange equations and thermal equilibrium 07 p1013 A66-17431

Thermal phase noise and VCO effects at ground receiver output of coherent two-way Doppler communication system 08 p1304 A66-19133

Theory of thermal noise in ionosphere developed from Nyquist theorem expressing thermal fluctuations of current in localized resistance 09 p1340 A66-19846

Spatial variation of electric field in amplifying CdS measured, using electro-optic effect to study acoustic flux from thermal noise 11 p1758 A66-23356

Thermal noise, shot noise and 1/f noise in field effect transistors 11 p1672 A66-23466

Cross correlation measurements of oscillator frequency stability and thermal noise and application to atomic hydrogen maser 12 p1835 A66-24128

Thermal noise of input conductance and

gate-drain conductance in junction-gate FET 15 p2458 A66-28892

Thermal noise theory extended for insulated gate /MOS/ FET with gate voltage induced channel structure by including bulk charge from ionized impurities in semiconductor substrate 16 p2663 A66-31016

Enhancement mode MOS-FET HF thermal noise in drain and gate analyzed, using channel transmission line model 17 p2897 A66-33462

Thermal noise in internal measuring instruments affecting limitations on spacecraft open-loop inertial autonomous control system precision 18 p3132 A66-33872

Atmospheric thermal radiation in clouds and rainfall causing antenna radio noise, considering long waves due to heterodyning of molecular radiations 20 p3520 A66-38143

Fokker-Planck equation applied to laser under influence of quantum fluctuations connected with dissipation, pumping and cavity thermal noise, noting distribution and correlation function 21 p3746 A66-38930

Thermal noise hypothesis applied rigorously to space charge limited diodes 22 p3872 A66-39747

Quantum mechanical picture of additive interrelation between signal and thermal noise, noting energy loss 23 p4035 A66-41049

Angle of arrival in amplitude-comparison monopulse antenna arrangement including thermal noise as interference and pulsed radar with ideal radar target 23 p4044 A66-41314

THERMAL PLASMA

Propagation of longitudinal oscillations in plasma with thermal velocity spread 01 p0029 A66-10576

Relative density and shock front velocity for strong shock waves in hydrogen, helium and argon, using ionization-potential drop deducible from Debye-Huckel theory 04 p0556 A66-14338

Coulomb collision effect on transverse electron oscillations in fully ionized hot plasma determined by Fokker-Planck equation 05 p0721 A66-14715

Perturbation theory used to distinguish between weak and strong thermal turbulence in plasmas 05 p0726 A66-15256

General dynamical effects of suprathermal gas particles on hydromagnetic wave propagation in interstellar space 05 p0749 A66-15275

Chapman-Cowling formalism used to obtain transport equations for charged particle species in low energy three-component two-temperature plasmas 05 p0727 A66-15540

Temperature and plasma-composition determination for pure thermal carbon plasma 07 p1086 A66-17734

Two-fluid approximation of one-dimensional steady state flow of inviscid plasma with thermal gradients, considering ionization and recombination processes 08 p1265 A66-19466

Structure of plane shock wave of arbitrary force propagating across magnetic field in hot rarefied plasma 08 p1265 A66-19467

Plasma permittivity modulation by ion waves for thermally ionized alkali plasma in microwave resonator 08 p1266 A66-19811

Balescu-Lenard kinetic equation derived for fully ionized zero-external-field homogeneous unbounded plasma, with relativistic corrections for thermal motion 10 p1567 A66-21816

RF electromagnetic fields to control state of flowing thermal plasma [AIAA PAPER 66-166] 11 p1742 A66-22210

Effect of cold plasma admixture on LF oscillation spectrum and stability of nonhomogeneous hot plasma contained by magnetic field 11 p1744 A66-22450

Plane electromagnetic wave scattering by conducting cylinder surrounded by hot magnetoplasma sheath 11 p1657 A66-23112

Dipolar resonances when axially uniform warm plasma column is subjected to transverse RF electric field 12 p1815 A66-23962

Linear spatial response of electron plasma to localized one-dimensional electric field, whose frequency is low compared with electron-collision frequency 12 p1923 A66-24575

Plasmoid propagation in field-free space, discussing thermal expansion, velocity

distribution, charged particle density distribution, energy distribution in absence of thermodynamic equilibrium, etc 13 p2154 A66-26528

Electro-magnetoplasma-gas-dynamics /EMPGD/ equations for warm compressible electron gas drifting at constant velocity: finding equation for refractive index of plasma waves 14 p2339 A66-26882

Electron-cyclotron-heated plasma stability in mirror containment systems possessing shear, minimum-B properties or both 15 p2555 A66-29760

Negative-mass instability in threshold properties of energetic proton plasma 16 p2757 A66-3015

Electric potential and space charge density near Langmuir probe in hot rarefied plasma at rest, calculating current collected from plasma 16 p2759 A66-30372

Trapped electron effect and stationary longitudinal wave propagation in Maxwellian hot plasma based on exact solution of nonlinear collisionless Boltzmann equation compatible with equilibrium electron distribution 16 p2761 A66-31009

Charge exchange loss of confined thermal plasma in mirror magnetic field 17 p2972 A66-32978

Radiated fields for plasma external to dielectric coating surrounding biconical antenna, equivalent circuit developed for terminating impedance 19 p3305 A66-36422

Buildup and confinement of plasma with high-energy electrons in PR-5 apparatus using magnetron injection method 19 p3412 A66-36497

Plasma heating and confinement in magnetic well, using deuterium plasma jet obtained by induction gun, measuring lifetimes 19 p3412 A66-36499

Drift-wave instability in weakly inhomogeneous fully ionized plasma confined in strong magnetic field in Q machine 19 p3416 A66-36523

Hot plasma production in Ogra-II by injection of fast hydrogen atoms into magnetic mirror trap with stabilizing hexagonal field 19 p3421 A66-36542

High ion and electron temperature plasmas produced by fast internal injection from turbulent plasma jet and contained in magnetic mirror trap of composite type 19 p3421 A66-36544

Microinstability due to non-Maxwellian velocity distribution in hot electron plasma within magnetic mirror configuration 19 p3422 A66-36545

Electron density, temperature and other related electromagnetic effects of deuterium plasma focus formed by coaxial electrode discharge as result of Z pinch 19 p3425 A66-36561

Production of hot plasma by Penning discharge in inhomogeneous magnetic field accelerating ions to high energy level by strong electric field 19 p3431 A66-36592

Reversible property of Vlasov equation describing thermalization of electron beam in plasma and Landau damping, noting entropy is constant in nonlinear approximation 20 p3608 A66-37460

Heat-flux density transmitted by relatively broad low-velocity argon plasma jet to vertical cold plate 20 p3608 A66-37461

Scintillation counter and proportional counter spectral measurements of solar flare X-ray emissions and analogies to hot plasma 20 p3633 A66-38191

Potentials for cylindrical warm plasmas, noting anisotropic effects caused by external magnetic field 20 p3611 A66-38362

Total energy and radial energy distribution of plasmoids, examining error in measurement by probe consisting of heat sensor and thermocouple 21 p3785 A66-39034

Input resistance of short filamental antenna in warm isotropic plasma from kinetic /Vlasov equation/ rather than hydrodynamic approach 22 p3874 A66-39939

Chapman-Cowling formalism used to obtain transport equations for charged particle species in low energy three-component two-temperature plasmas 22 p3955 A66-40096

Resonant frequencies of VHF Lecher line coupled to mercury arc plasma via split cylinder coupler measured as function of electron density 23 p4100 A66-41155

Electric field normally incident onto warm
 minifinite plasma obtained by Wiener-
 topf technique and Vlasov
 23 p4103 A66-41492

Flute type oscillations of hot ion plasma in
 homogeneous magnetic field with wave-
 plasma resonances 23 p4105 A66-41705

LF drift waves observed in thermally
 ionized cesium plasma in magnetic field
 with variable curvature 23 p4106 A66-41710

LF oscillation modes in TOPSY thermally
 ionized cesium plasma devices
 investigated as function of plasma
 parameters 24 p4240 A66-42299

(High temperature physicochemical
 characteristics of thermoelectric plasma,
 examining operating principles of several
 versions of plasma generator 24 p4243 A66-42537

THERMAL PROPERTY

Quasi-stationary temperature in large body
 with moving surface heat source,
 considering temperature dependence of
 thermal properties
 [ASME PREPRINT 65-LC-21] 02 p0305 A66-12250

Materials at cryogenic temperatures
 discussing thermal lattice effects, specific
 heat, electrical and thermal conductivity,
 thermal expansion and mechanical
 properties 04 p0534 A66-13371

High temperature behavior and properties
 of refractory materials such as molybdenum,
 tungsten, silicides, aluminides and
 carbides 04 p0534 A66-13372

Thermal resistance and capacitance of
 semiconductor device components
 determined, using thermal equivalent circuit
 or plotting cooling curves 04 p0492 A66-13491

Fabrication, structure and properties of
 pyrolytic materials, particularly pyrolytic
 graphite, noting thermal and mechanical
 properties, oxidation, vaporization,
 etc 07 p1055 A66-18503

Physical, thermal, electrical and optical
 properties of beryllium 08 p1238 A66-18849

Crystal structure and allotropic
 transformation of cobalt and thermal,
 thermodynamic, electrical and magnetic
 properties 08 p1240 A66-18961

Resistance-grown pyrolytic graphite in
 crystallographic, thermal and electrical
 measurements 08 p1244 A66-19223

Thermal properties of gaseous mixtures
 measured with experimental apparatus
 containing differential manometer 11 p1704 A66-22595

Spectral sensitivity and temperature
 characteristics of light generated pairs of
 photoelectric converters 11 p1640 A66-23046

Green function random phase decoupling
 scheme investigation of magnetic impurities
 effect on thermal properties of cubic spin-
 1/2 Heisenberg ferromagnet 11 p1758 A66-23394

Thermal properties, tensile strength and
 uses of combination of glass fiber and epoxy
 resin material, Fiberglass S /994/, in space
 vehicles 12 p1899 A66-23966

Critical temperature of two-band
 superconductor model with paramagnetic
 impurity 14 p2360 A66-27194

Turbulent jet theory, thermal ignition
 theory and flameout characteristics of bluff
 body flame stabilizers 14 p2413 A66-27694

Reinforced plastics measured for thermal
 conductivity, specific heat and thermal
 expansion at cryogenic temperature
 [AIAA PAPER 65-423] 14 p2318 A66-27891

Extrapolation of experimental thermal data
 to high pressure region, examining Tait and
 Biron state equations 14 p2415 A66-28326

Quasi-stationary temperature in large body
 with moving surface heat source,
 considering temperature dependence of
 thermal properties
 [ASME PREPRINT 65-LC-21] 16 p2826 A66-30573

Vortex tube with double row nozzle,
 discussing energy separation efficiency,
 velocity profile, temperature characteristics,
 etc 16 p2685 A66-30801

Thermal performances of radiative and
 convective plate fins, considering effect of
 mutual irradiation between surfaces, solving
 integro-differential equations describing
 process 16 p2827 A66-30816

High temperature properties and
 recrystallization of heat-resistant alloy A-286
 experimentally studied, noting faster
 occurrence of overaging with increased cold
 working 19 p3376 A66-35357

Temperature potentials in cylinder of
 known radius, investigating optimal heating
 regime and thermal kinetic factor effect on
 maximum potential magnitude 20 p3665 A66-36912

Superconducting properties of Nb-Zr alloy,
 discussing resistive transition, ultrasonic
 attenuation, flux jump magnetic instabilities,
 etc 21 p3796 A66-38550

Clear fused quartz thermal parameter
 measurements 21 p3736 A66-38727

Curing problems of highly exothermic
 propellants investigated using mathematical
 models, detailing heat conduction and
 thermal properties 22 p3968 A66-39868

Critical temperature of two-band
 superconductor model with paramagnetic
 impurity 24 p4259 A66-43092

THERMAL PROTECTION

Thermal energy balance of orbiting
 spacecraft simulated, using tungsten-filament
 lamp without duplicating solar
 spectrum 02 p0214 A66-11239

Temperature distribution in porous tube,
 examining transpiration cooling as thermal
 protection to surfaces exposed to high
 temperatures 03 p0445 A66-12806

Uncertainties in thermophysical properties
 of char-forming ablative in intense
 convective and radiative heat transfer
 environments and effect on mathematical
 and physical models [AIAA PAPER 65-639] 03 p0445 A66-13010

Effects of cold and abnormal atmosphere
 discussing tolerance limits to hypercapnia,
 anoxia induced hypothermia and
 hypoxia 04 p0454 A66-14067

Materials for extreme temperature and g
 loading during suborbital, manned and
 superorbital reentry 07 p1051 A66-18303

Ablative materials for thermal protection
 and minimum mass transfer of aircraft
 flying at hypersonic speeds 10 p1620 A66-21404

Approximate solution of ablation of
 reinforced plastic for heat
 protection 10 p1621 A66-21500

Directional characteristics of radiation
 properties of surfaces and materials as
 factor in spacecraft thermal control 11 p1777 A66-22459

Diffusion and flame-sprayed coatings and
 need for standard tests for thermal
 protection coatings 13 p2111 A66-26289

Thermal protection system for Apollo
 command module 14 p2393 A66-28004

Thermal design of satellite with metal-
 covered skin using space/solar
 simulator 14 p2271 A66-28341

Space suit for thermal, radiation and
 exposure protection for man on
 Moon 14 p2231 A66-28413

Particle size and heat treatment effects on
 stability and reflectance of thermal control
 glass pigment coatings under UV radiation
 [AIAA PAPER 65-136] 15 p2616 A66-29288

Chemical vapor deposition of refractory
 thermoprotective coatings on refractory
 metal structures 19 p3370 A66-36141

Thermoprotective coating for high
 temperature tantalum alloy 19 p3384 A66-36147

Thermoprotective coating of niobium-based
 and other refractory alloy metal
 foils 19 p3384 A66-36150

Interplanetary space environment effect on
 surface thermal radiative properties, noting
 results of exposure to simulated solar
 plasma, solar UV, solar wind,
 etc 22 p3889 A66-40218

Effects of low density, temperature, proton
 radiation and electromagnetic radiation on
 thermal control materials, using synergistic
 testing 22 p3889 A66-40219

Coordinated laboratory and flight test
 program, determining stability of solar
 concentrator reflective surfaces in orbital
 environment 22 p3889 A66-40220

Sheet cork as thermal protection during
 vehicle launch and ascent flight
 [AIAA PAPER 65-356] 22 p3999 A66-40358

Plastic laminates use for ablation shields,
 noting importance of heat flow and

comparison of thermal
 screens 22 p3938 A66-40417

Composite thermal coating consisting of
 refractory facing and slightly heat-
 conducting decomposing
 lining 22 p4000 A66-40818

Book on problems of return from space
 including heat protection, materials,
 development testing, life support, design,
 simulation and other related
 activities 22 p3988 A66-40875

Flat-pack case for thermal resistance of
 integrated circuit to space
 environment 24 p4186 A66-43059

THERMAL RADIATION

SA INFRARED RADIATION

Reflectance and emittance properties of
 binary coatings in sintered or compacted
 powder form in terms of properties of pure
 components [AIAA PAPER 65-670] 01 p0090 A66-10231

Fluctuations in energy absorbed within
 definite periods of time by plane-surface
 thermal emission sensors of arbitrary
 dielectric permeability 01 p0069 A66-10722

Estimates of collision cross sections for
 carbon dioxide and air molecules at 200
 degrees K with thermal radiation field as
 error source 01 p0062 A66-10762

Thermal radiation absorption by droplet or
 spray during ignition and combustion of
 atomized liquid fuels 01 p0164 A66-10899

Computed magnitude of thermal X
 radiation flux of Sun at wavelengths shorter
 than 20 angstroms 02 p0289 A66-11659

Transient cooling of spherical mass of high
 temperature gas by thermal radiation,
 neglecting ionization and dissociation effects
 [ASME PAPER 65-APMW-22] 04 p0598 A66-14223

Heat transfer rate to simulated skin,
 discussing power input determination from
 temperature rise [ASME PAPER 65-HT-33] 05 p0627 A66-14749

Off-specular peaks in directional
 distribution of reflected thermal radiation as
 function of angle of incidence, surface
 roughness and wavelength
 [ASME PAPER 65-WA/HT-19] 05 p0790 A66-15645

Monte Carlo computer program for
 simulation of thermal radiation among
 opaque surfaces in vacuum
 [ASME PAPER 65-WA/HT-40] 05 p0792 A66-15668

Atmospheric thermal radiation calculated
 from unresolved molecular absorption
 spectra of atmospheric carbon dioxide and
 water 05 p0675 A66-15860

High resolution equilibrium radiation
 spectra for shock layer of blunt bodies at
 reentry velocities and radiative
 recombination of N and O ions
 [AIAA PAPER 66-104] 07 p0984 A66-18458

Thermal radiation into space of limited
 areas of inner walls of space radiators
 determined, assuming cylinder and cone are
 isothermal black body radiators 08 p1317 A66-18835

IR spectrophotometry of Moon and
 Galilean satellites of Jupiter, noting surface
 properties, thermal radiation and albedo
 increase with wavelength variation 08 p1298 A66-19458

Russian monograph on thermal radiation
 from metals, ceramics, partly transparent
 bodies, films, etc 08 p1256 A66-19567

Radio observation of Mercury, Venus, Mars,
 Saturn and Uranus and black body
 temperatures of planets 09 p1450 A66-20110

Lunar and planetary surfaces investigated
 from thermal radiation standpoint 09 p1451 A66-20114

Terrestrial thermal radiation field from IR
 diffraction scanning spectrophotometer
 onboard Cosmos XLV 09 p1376 A66-20995

Radio brightness distribution over quiet
 Sun and various deductions concerning
 electron temperature and density of corona,
 including data on overdense regions
 radiating thermally 10 p1601 A66-21061

Transient cooling of spherical mass of high
 temperature gas by thermal radiation,
 neglecting ionization and dissociation effects
 [ASME PAPER 65-APMW-22] 10 p1621 A66-21468

Variation of thermal radiation emitted with
 mass flow rate of argon plasma

torch 10 p1621 A66-21798
 Balloon-borne instrument for measuring downward flux of thermal radiation from atmospheric water vapor, using gold doped germanium detector 11 p1706 A66-22888
 Stray radiation error reduction in spectral emittance measurements for diffusely reflecting materials 11 p1737 A66-23410
 Thermal radiation from conical surfaces with nonuniform radiosity and application to nozzle design 12 p1977 A66-23598
 Thermal radiation resonance of plasma cylinder in presence or absence of magnetic field 12 p1919 A66-23774
 Time-temperature total hemispherical emittance study of gold-plated 304 stainless steel in temperature range of 1000-1800 degrees F 12 p1895 A66-24376
 Thermal radiation parameter measurements of coating materials, using steady state heat balance method [AIAA PAPER 64-256] 12 p1979 A66-24701
 Absolute flux measurement for pulsed and triggered lasers requiring only quantum receivers 13 p2104 A66-26375
 Estimates of collision cross sections for carbon dioxide and air molecules at 200 degrees K with thermal radiation field as error source 14 p2286 A66-27861
 Radio astronomy measurement of galactic structure, using thermal and nonthermal radiation, and neutral hydrogen line emission 15 p2594 A66-28983
 Millimeter wavelength solar radiation consisting of thermal, slowly varying active and burst components and eclipse measurements of brightness distribution 15 p2594 A66-29001
 Thermal radiation from argon plasma arc of wall-stabilized type with Poiseuille flow, comparing experimental measurements with theoretical reentry predictions [AIAA PAPER 65-546] 15 p2551 A66-29274
 Shock and blast, thermal radiation and nuclear radiation as basic elements of nuclear weapon environment, analyzing effect on personnel and materiel 16 p2745 A66-30440
 Heat transfer rate to simulated skin, discussing power input determination from temperature rise [ASME PAPER 65-HT-33] 16 p2643 A66-30984
 Off-specular peaks in directional distribution of reflected thermal radiation as function of angle of incidence, surface roughness and wavelength [ASME PAPER 65-WA/HT-19] 16 p2828 A66-30989
 Effective thermal radiation surface of humans subjected to omnidirectional radiation 16 p2645 A66-31806
 Thermal radiation shields for gas temperature sensing probes 17 p2924 A66-32039
 Thermal and UV radiation effect on thermionic emission from tungsten cathode 17 p2980 A66-32644
 Near UV effects on thermal control surfaces at cryogenic temperature 17 p3035 A66-32749
 Radiative interactions between absorbing-emitting and flowing media with internal energy generation [AIAA PAPER 66-434] 17 p3035 A66-32755
 Simulator solar incidence factors for thermal analysis of imperfectly collimated radiation [AIAA PAPER 66-458] 17 p3036 A66-32763
 Transient radiative cooling of semiinfinite solid with parallel walled cavities 18 p3261 A66-34359
 IR spectrophotometry of Moon and Galilean satellites of Jupiter, noting surface properties, thermal radiation and albedo increase with wavelength variation 18 p3232 A66-34487
 Galactic X-ray energy spectrum noting equipment used, shape of spectra in terms of thermal radiation intensity, etc 18 p3177 A66-34757
 IR measurements on eclipsed Moon, discovering hot spots on lunar surface 19 p3457 A66-35448
 Maximum temperature of any substance in equilibrium with thermal radiation, considering properties of hot matter at very high densities, including gravitational interaction of photons 19 p3463 A66-36069

Electronic theory of metals applied to study of total hemispherical thermal emission factors of polished metal bodies at temperatures below 800 degrees K 19 p3479 A66-36254
 Thermal radiation of nonhomogeneous plasma sheath, obtaining radiation intensity formula via fluctuation theory 19 p3409 A66-36281
 Ionosphere as anisotropic dissipative medium where charged particles random thermal motion acts as thermal radiation source, noting relation between driven AC conduction current density and applied AC electric field intensity 19 p3352 A66-36630
 Ionospheric thermal radiation, discussing noise power per unit volume, spectral distribution, frequency, etc 19 p3352 A66-36631
 Energy transport within cryodeposit layer subjected to thermal radiation 20 p3676 A66-37085
 Fluctuations in energy absorbed within definite periods of time by plane-surface thermal emission sensors of arbitrary dielectric permeability 20 p3560 A66-37660
 Radiant heat transfer between concentric cylinders determined by extending validity of Rosseland diffusion approximation by introducing temperature jump boundary condition at gas solid surface 21 p3837 A66-39462
 Radiometer measuring total intensity of UV, visible and IR radiation 22 p3918 A66-40228
 IR observation of Mercury as evidence of nonsynchronous rotation, considering energy radiation as function of position 22 p3979 A66-40305
 Thin film thermal radiation detector noting construction, calibration, performance, error sources and advantages of pyroelectric over thin film gauges 24 p4208 A66-42179
THERMAL RADIO EMISSION
 Radio noise emission from Venus surface explained in terms of glow discharge 06 p0957 A66-17174
 Stokes parameters measurement as function of frequency for anomalous polarized OH emission originating near thermal radio source W3 22 p3978 A66-40015
THERMAL SHOCK
 Thermal shock and wrinkled diaphragms effect on calibration of pressure transducers 01 p0070 A66-10887
 Wave propagation in elastic-viscoplastic semispace generated by thermal shock 04 p0511 A66-14205
 Similarity theory applied to thermal shock resistance of brittle eermets 06 p0897 A66-16699
 Thermal shock resistant carbides, using arc-casting techniques, noting microstructure, phase diagram, mechanical properties, etc 07 p1055 A66-18504
 Propagation of spherical waves produced by thermal shock acting on boundary of spherical cavity in infinite elastoviscoplastic body 08 p1309 A66-19115
 Refractory properties and resistance to thermal shock of sintered tantalum carbide impregnated with copper or silver at high temperature [ONERA TP 323] 11 p1718 A66-23201
 Stress field of thermal shock on surface of spherical cavity in infinite elastic-plastic body 14 p2399 A66-27457
 Extremely high thermal shock resistance in group IVA carbides of carbide-graphite composites fabricated, using vacuum arc melting and casting techniques 15 p2524 A66-29287
 Scattered light spectrum of thermal sound waves used to provide velocity and absorption data about hypersonic waves in several liquids 16 p2745 A66-30300
 Thermal shock resistance of zirconia with 15 mole percent titanium determined by radially quenching disks with thermally insulated faces 19 p3381 A66-35978
 Improved thermal shock resistance of zirconia upon addition of 15 mole percent titanium attributed to metal in grain boundary 19 p3381 A66-35979
 Laboratory simulation of thermal shock failure in tungsten under missile firing conditions 19 p3385 A66-36154
 Temperature associated with longitudinal

thermal velocities overshoots for Mach numbers slightly higher than 1 for monatomic gases in rarefied gas flows 21 p3727 A66-39184
 Adhesively bonded joints withstand severe thermal shock and have excellent bonding with high strength structural alloys in cryogenic liquids 22 p3937 A66-39778
THERMAL SIMULATION
 Correlating heat flux from quartz envelope tungsten filament lamps in Aerospace Research Chamber to simulate solar irradiated surfaces 02 p0302 A66-11214
 Mathematical model of thermal simulation of manned spacecraft in space chamber [AIAA PAPER 66-22] 07 p1140 A66-17887
 Thermal vacuum simulation in satellite design of UK-3 07 p1018 A66-18052
 Radiation energy transfer rates characteristic of environments for advanced entry missions, examining laboratory simulation techniques, particularly plasma arc generators 11 p1687 A66-22866
 Equilibrium temperature measurements of thermal scale model used for spacecraft testing in cold wall vacuum chamber 14 p2270 A66-27886
 Test program for thermal-vacuum testing of Centaur vehicle components 16 p2808 A66-30485
 Test chamber to simulate vacuum and heat sink characteristics of space, measuring optical constants of coatings 16 p2680 A66-30491
 Vacuum thermal environmental testing of Nimbus I control system 16 p2809 A66-30504
 Thermal vacuum simulation in satellite design of UK-3 16 p2682 A66-31198
 Thermal similarity study of models in space environmental chambers for deducing characteristics of typical space vehicle element [AIAA PAPER 66-460] 16 p2683 A66-31469
 Digital computer analysis of mission parameters governing spacecraft thermal behavior 17 p3034 A66-32513
 Requirements for thermal and vacuum space environment simulation for component and system testing [AIAA PAPER 64-201] 19 p3339 A66-35596
 Thermal scale modeling of modified prototype of Mariner Mars 64 spacecraft used to predict inside temperature of spacecraft [AIAA PAPER 65-386] 19 p3468 A66-35622
 Thermal vacuum solar simulation system for spacecraft thermal design, examining operational characteristics and development 22 p3888 A66-40208
 Design and operational performance criteria for adequate simulation of thermal environment of spacecraft at lunar surface 22 p3888 A66-40209
 Conceptual analytical method for simulating lunar surface environment, using computer program for parametric curves 22 p3888 A66-40210
 Thermal-vacuum performance testing of scaled models as technique for reducing development costs of spacecraft 22 p3888 A66-40211
 Steady state and transient thermal behavior of truncated cone predicted from observation on half-and quarter-scale thermal models 22 p3888 A66-40212
 Half-scale thermal model of Mariner IV spacecraft for solar simulation and high vacuum testing in JPL 10-ft space simulator 22 p3888 A66-40213
 Reduced-scale models for predicting image degradation due to nonuniform temperatures and resulting deformations of structural and optical elements in large spaceborne telescopes 22 p3889 A66-40215
 Fluid venting effects on thermal control surfaces studied, using vacuum chamber for thermal environment simulation tests 22 p3891 A66-40236
THERMAL STRESS
SA HEAT STROKE
 Distribution of thermal stress in infinite elastic solid containing penny-shaped crack 01 p0157 A66-10960
 Parabolic temperature distribution effect on flutter behavior of panel subjected to supersonic flow over one surface [AIAA PAPER 65-112] 02 p0297 A66-11544
 Comparison of materials for thermal stress

- Application based on engine operating conditions and considering metal strength 02 p0245 A66-11797
- Heat stress and minimal dehydration effect upon human tolerance to positive acceleration 03 p0326 A66-12353
- Space hazards to spacecraft include extreme temperatures, micrometeorites, low pressures and electromagnetic and corpuscular radiations 03 p0425 A66-12860
- Large deflection analysis of elliptical plate of lenticular section subjected to uniform temperature gradient through thickness 03 p0440 A66-13271
- Thermal deformation of flat plate considering temperature gradient effect through thickness, showing that plate is not exhibiting Euler buckling 03 p0442 A66-13301
- Plane-strain and generalized plane-stress analysis of viscoelastic disk by comparing transient thermal stresses in disk and cylinder 04 p0591 A66-14204
- Green functions for coupled problem of thermoelasticity obtained from solutions of thermal stresses theory 04 p0591 A66-14206
- Steady state problems in orthotropic slabs subjected to forces and temperature distribution on faces solved by Fourier transform [ASME PAPER 65-APMW-33] 04 p0593 A66-14233
- Exact thermoelastic solutions for clearance variation in short cylindrical dry journal bearings with unsymmetrical frictional heating [ASME PAPER 65-LUB-3] 04 p0527 A66-14239
- Book on large variations in temperature and thermal expansion which produce thermal stresses in materials whose properties are time-independent 05 p0771 A66-14519
- Thermoelastic stresses due to cylindrical half-elliptic inclusion with radioactivity imbedded at surface of elastic half-space 05 p0673 A66-15045
- Matrix methods in dimensional analysis discussing algebraic, matrix and shortcut methods [ASME PAPER 65-WA/MD-20] 05 p0710 A66-15523
- Axial thermal gradient stresses in finite length thin cylinders, evaluating distinct boundary conditions [ASME PAPER 65-WA/MET-17] 05 p0780 A66-15682
- Nonuniform shear modulus effect on thermal stress analysis of hollow viscoelastic cylinder [AIAA PAPER 66-121] 06 p0962 A66-16260
- Thermal stress concentration factors for rectangular flat plates penetrated by holes [AIAA PAPER 66-120] 06 p0962 A66-16262
- Curvature effect on response of shells to steady and nonsteady temperature fields [AIAA PAPER 66-84] 06 p0968 A66-17095
- Thermal stress of infinite closed circular cylindrical shell acted upon by concentrated heat source moving along generatrix of cylinder 07 p1142 A66-17265
- Temperature distribution and thermal stresses in liquid-filled cylindrical shell 07 p1143 A66-17397
- Thermal stress in infinite nonisotropic elastic slab with heated element on upper surface and base of slab in contact with insulating plane 07 p1145 A66-18227
- Residual stresses arising during local stress relieving operations 08 p1228 A66-18630
- Homogeneous isotropic cone with surface loadings and internal temperature distributions 08 p1309 A66-19142
- Thermal stress of unbounded plate and cylinder heated under variation of medium temperature 08 p1313 A66-19442
- Dynamic thermal stresses in infinite plate resulting from cosine-law variations in temperature at one boundary 08 p1313 A66-19443
- Thermal stresses due to axisymmetric heat flow past spherical cavity inside long circular cylinder solved by stress functions and thermoelastic displacement potentials 08 p1313 A66-19547
- Singular solutions of concentrated force and concentrated heat source thermoelasticity 09 p1467 A66-20498
- Hematological and metabolic effects of short intense thermal stress 09 p1334 A66-20523
- Thermal stresses arising at high velocities in aircraft skin consisting of two load-carrying layers separated by filler 09 p1468 A66-20758
- Equations relating maximum temperature stresses in infinite plate and dimensionless numbers, determining heating rate 09 p1468 A66-20832
- Thermal stress distribution in thin solid disk analyzed, based on thermoelastic relationships for stress, strain, displacement and equilibrium 10 p1613 A66-21320
- Free and forced vibrations, static and dynamic stability and aeroelasticity of orthotropic shells and plates in variable temperature field 11 p1781 A66-22614
- Surface finish effect on radial temperature distributions in optically pumped neodymium trivalent ion glass laser rod by observing thermal stress birefringence 11 p1714 A66-23358
- Thermally induced vibration of thin nonshallow spherical shells, investigating missile and space vehicle structures [AIAA PAPER 65-409] 12 p1957 A66-23586
- Effect of variation in thermal expansion coefficient upon thermal stress in thin leading edge to set upper and lower limits 12 p1957 A66-23597
- Steady state problems in orthotropic slabs subjected to forces and temperature distribution on faces, solved by Fourier transform [ASME PAPER 65-APMW-33] 12 p1960 A66-23973
- Temperature stresses and heat transfer at thin plate edges reinforced with thin rods under nonstationary thermal conditions 13 p2202 A66-26416
- Stress concentration at thermally insulated holes in elastic material created by disturbance of uniform heat flow at holes 13 p2206 A66-26459
- Thermal stresses in finite cylinder with prescribed temperature distribution on curved lateral surface and with ends in contact with smooth insulating plates 14 p2400 A66-27725
- Moiré data recording and processing techniques in thermal strain fields at high temperatures, comparing experimental data with elasticity theory 14 p2400 A66-27768
- Ablation effects on transient thermoelasticity in semiminfinite elastic solid 14 p2402 A66-27969
- Thermoelastic stress in infinite flat slab due to sudden application of transient temperature field 14 p2407 A66-28047
- Stress relaxation dependence on heat deformation regime in Ti alloys VT14, VT3-1 and VTS-1 15 p2519 A66-28537
- Negative effect of air countercurrents and thermal stresses on performance of cooling systems of gas turbine rotor disks with lateral air flow 15 p2570 A66-28776
- Two-dimensional thermoelastic problem for infinite medium with cylindrical inclusion 15 p2608 A66-28778
- Lagrangian multiplier method applied to mixed boundary value problems such as stresses due to temperature changes in semiminfinite slab 15 p2615 A66-29733
- Creep bending of circular plate with temperature gradients, using iterative technique 16 p2813 A66-30269
- Design and construction of 10 ft diameter bakeable UHV all metal seal, taking into account thermal stresses and effect on flanges 16 p2712 A66-30455
- Thermal contact resistance between smooth rigid isothermal planes separated by elastically deformed smooth spheres [AIAA PAPER 66-461] 16 p2814 A66-30604
- Reissner variational formulation of temperature distribution boundary value problem of axisymmetric thermal stresses in isotropic sandwich shells of revolution [AIAA PAPER 66-528] 16 p2814 A66-30611
- Boundary value problem of temperature stresses of rectangular orthotropic plates solved, using separation of variables method 16 p2818 A66-31067
- Thermoelastic problem for plate with prismatic inclusion of rectangular cross section discussing stress, elastic deformation, displacement potential, etc 16 p2818 A66-31108
- Nozzle guide vanes of ZrS-6K alloy in thermal stress induction of surface layer crystal structure changes 16 p2727 A66-31531
- Thermal stresses in anisotropic hollow cylinder by arbitrary radial temperature distribution 17 p3020 A66-31997
- Anisotropic nonhomogeneous linear viscoelasticity analogy with thermal stresses in terms of Fourier transform 17 p3020 A66-31998
- Nonstationary heat-transfer coefficient dependence on thermal stress variation in heat exchanging surface 17 p3034 A66-32559
- Thermal stresses of infinite thin plate with given temperature at one edge 17 p3027 A66-32713
- Thermo-rheological equation of state derived for fiber-reinforced polymers indicating dependence of elongation or contraction on linear expansion coefficients 18 p3125 A66-33711
- Text on thermal stress and low-cycle fatigue covering elastic stresses, plastic flow and creep, stress cycling, etc 18 p3258 A66-34715
- Thermally induced circumferential-longitudinal cracking of refractory metal inserts in solid propellant rocket engine nozzles 19 p3385 A66-36153
- Contact problem of half-plane inelasticity theory using Jacobi polynomials and taking into account thermal stresses and presence of adhesion and friction in contact area 19 p3476 A66-36835
- Steady state stress in flat plate with elliptical hole subjected to linear heat source 20 p3669 A66-37575
- Exact solution of thermoelastic problems in two dimensions, using doubly infinite Fourier series 20 p3673 A66-38276
- Thermoelasticity of semiminfinite state plane with circular coolant holes 21 p3826 A66-38589
- Elasticity and thermal stress in infinite orthotropic plate exposed to distributed and concentrated heat source 21 p3830 A66-38985
- Thermodynamics of irreversible processes methods applied to stress-strain relations of single-phase nonelastic continuous medium 21 p3830 A66-38986
- Thermal stresses in flat rectangular isotropic plate of constant thickness under arbitrary and no temperature variation in terms of Fourier series and integrals 21 p3832 A66-39443
- Natural frequency variations caused by thermal membrane stresses applied to circular disks for fundamental frequency increases, noting temperature distribution 22 p3989 A66-39774
- Plate and rod systems to test abrupt intensive heating effects, discussing dynamic stresses and bending moments via approximate equations 23 p4137 A66-41004
- Solar cell as most reliable energy conversion device for near-Earth missions, noting semiconductor material and thermal stress 23 p4017 A66-41167
- Relaxation of temperature stresses in thin walled pipe under conditions of elastoplastic deformation 23 p4140 A66-41797
- Griffith type crack propagation due to localized thermal stress at holes, cavities, penny-shaped cracks and inclusions disturbing uniform heat flow 23 p4146 A66-41993
- Turbine rotor subject to thermal stresses due to friction of accidental contact with stator 23 p4075 A66-41995
- Wave propagation in thermoplastic media, discussing dynamic behavior, formation of wave fronts, velocity, etc 24 p4284 A66-42139
- Series solution to problem of spherically isotropic elastic medium bounded by concentric spherical surfaces, noting force and stress concentration 24 p4285 A66-42141
- THERMIONIC CATHODE**
- Pulsed volt-ampere characteristics of oxide-coated cathode at various pulse repetition rates 06 p0838 A66-15890
- Two-dimensional theory of noise emission from magnetically shielded thermionic cathodes 06 p0858 A66-17014
- Auxiliary arc heating hollow cylindrical cathode and preionization of interelectrode space, obtaining thermionic emission [AIAA PAPER 66-191] 10 p1562 A66-21437

Drift instabilities in thermionic plasmas, noting excitation of LF oscillations with finite perturbation amplitude around cathode ion sheath 13 p2145 A66-25729

THERMIONIC CONVERTER

Low voltage arc in cesium vapor for case in which free-path length of particles is small compared to electrode

spacing 01 p0016 A66-10702

Four modes of thermionic-converter operation compared for maximum power output 03 p0396 A66-12295

Solar sail attitude stabilizer integration with thermionic power generation to obtain weight, simplicity and reliability advantages 03 p0431 A66-12762

Ionization by solar photons in thermoelectronic converters 03 p0323 A66-12970

Energy conversion into electrical power considering solar cells, thermoelectrics and thermionics noting advantages over fuel cells, dynamic machines and MHD 03 p0324 A66-13272

Thermionic converters used in combination with core reactor for auxiliary propulsion of spacecraft 04 p0573 A66-13548

Discrepancy between observed ion production rate in cesium thermionic converter and Saha-Langmuir equation prediction suggests locality of ion formation 05 p0612 A66-14984

Thermionic electrical power generation - European Nuclear Energy Agency and IEE International Conference, London, September 1965 05 p0613 A66-15532

Photon radiation effect on ionization of cesium vapor 05 p0615 A66-15533

Electric power of thermionic converters, discussing electron space charge effects and relation to gas converters 05 p0615 A66-15534

Cesium plasma thermionic converter, calculating voltage drop in emitter, collector and plasma 05 p0615 A66-15536

Plasma diode analog, determining behavior of unsteady state series-parallel systems for thermionic reactor control 05 p0615 A66-15537

Chapman-Cowling formalism used to obtain transport equations for charged particle species in low energy three-component two-temperature plasmas 05 p0727 A66-15540

Fine structure of cut-off characteristic, particularly influence of emission current density in crossed-field thermionic converter 05 p0616 A66-15541

High pressure thermionic converter, discussing current-voltage characteristics at high collector temperatures 05 p0616 A66-15545

Prototype of cesium plasma converter implementing heavy-duty electric power generator with nuclear reactor as primary energy source 05 p0617 A66-15547

First stage of program for implementation of converters heated by nuclear reactor, consisting of cylindrical converters for endurance tests without reactor 05 p0617 A66-15548

Ignited mode of current voltage characteristics of thermionic diodes 05 p0617 A66-15550

Cesium thermionic converter with tungsten cathode and nickel anode improved operation by increasing cesium pressure 05 p0617 A66-15551

Output characteristics of thermionic converter and improvement of performance by using emitter surfaces with particular crystallographic orientation 05 p0617 A66-15553

Thermionic converters with two alkalines using graphite insertion composites for imparting supplementary degree of freedom to cesium plasma diode 05 p0617 A66-15554

Noble gas-filled thermionic converter characteristics, performance and application 05 p0617 A66-15555

Inert gas-filled controllable thermionic generator in form of gas triodes based on gas discharge phenomena 05 p0618 A66-15556

Cesium diode with cylindrical molybdenum emitter and niobium collector fueled with uranium dioxide in out pile test 05 p0618 A66-15557

Current and power gain of noble gas filled converter as affected by auxiliary emitter position to electrode and

geometry 05 p0618 A66-15560

Lifetime and stability of emitter and collector materials in noble gas converters with barium covered tantalum electrodes 05 p0619 A66-15561

Electron work function analysis using cesium compounds vapor combinations in thermionic energy converter, noting role of vapor pressure 05 p0619 A66-15562

Thermionic power systems using mixed vapor, noting conversion efficiency, sensitivity of emitter temperature to input power and dynamic response to power input variation 05 p0619 A66-15563

I-V characteristics of thermionic converters with ohmic resistance, using differential equation with boundary conditions for local potential difference between emitter and collector 05 p0619 A66-15564

In-pile pumping system tested on thermionic converter SIRENE 56 for gaseous fission products 05 p0619 A66-15565

Performance of thermionic converters using clad and unclad UC-ZrC emitters operated at high temperatures, noting cesium pressure effect 05 p0619 A66-15566

Correlating mean-to-surface flux ratio for highly enriched fuel rods of in-pile diodes of similar composition and geometry 05 p0620 A66-15567

Arc mode thermionic converter output characteristics relationship to neutralization plasma properties 05 p0620 A66-15570

Cesium plasma created in thermionic converter investigated by Langmuir probe to determine potential, gain, velocity and oscillations 05 p0620 A66-15571

Negative resistance of dynatron type and oscillations in reverse current range of cesium thermionic energy converter 05 p0620 A66-15572

Electron temperature and ion density profiles across interelectrode gap of thermionic diode operating in ignited mode 05 p0621 A66-15573

Influence of plasma on efficiency of thermionic converter filled with krypton, noting current-voltage characteristics 05 p0621 A66-15574

Low work function collector with B-covered thin aluminum trioxide film electrodes for high efficiency thermionic converters 05 p0621 A66-15575

Work function distribution of different refractory metals by Shelton method, noting dependence of electron emission of thermionic converter 05 p0621 A66-15577

Thermodynamic validity of two cesium adsorption theories analyzed from semiclassical approach and electronegativity approach 05 p0622 A66-15581

Electron microscope study of emitter inhomogeneity influence on determination of electron emission constants and performance of thermionic converters 05 p0622 A66-15583

Emitter materials for nuclear thermionic converters, discussing $^{238}\text{U}/\text{Zr}/\text{C}$, fuel life and performance parameters, material compatibility, etc 05 p0713 A66-15584

Nuclear fuel-cladding diffusion and interactions in uranium-tungsten and uranium-molybdenum systems, covering compatibility, transport rate, thermal cycling effects and cladding surface contamination 05 p0714 A66-15588

Thermionic converters, discussing resistant metal-bond use for collector-emitter insulation 05 p0622 A66-15590

Insulators from high purity oxides used in nuclear thermionic power converters, tabulating refractory materials compatibility and noting thermal expansion, electrical conductivity, etc 05 p0714 A66-15592

Thermionic converter transforming calorific energy of flame into electric energy having protective coating of enamel-covered alumina 05 p0623 A66-15594

Emitter of thermionic converter with cesium plasma heated by solar energy, determining electric power values 05 p0623 A66-15595

Thermionic reactor network reliability as function matrix network and converter reliability 05 p0623 A66-15596

Improving thermionic power conversion devices through various material design configurations 05 p0623 A66-15597

Solar-heated thermionic generator design

and fabrication evaluation, considering mirror configurations 05 p0623 A66-15598

Solar-thermionic energy conversion system design using mathematical simulation relating characteristics of solar collector and cavity absorber 05 p0623 A66-15599

Direct and indirect converters emphasizing pre-concentration of solar radiation, noting thermophotovoltaic generators of p-i-n type 06 p0807 A66-15911

Thermionic energy conversion noting power generation sources like nuclear reactors, solar furnaces, etc 06 p0809 A66-16331

Cyclic analysis of Gabor-type auxiliary discharge thermionic energy converter determining critical equation parameters 07 p0991 A66-17241

Theory and operation of cesium thermionic converter 07 p0995 A66-18321

Ionizing role of photon radiation in gas thermionic converter, noting experimental results and application to solar energy converters, tubular emitter converters, etc 09 p1405 A66-20921

Solar energy powered cesium-plasma thermionic converter, noting development output and application 09 p1333 A66-20922

Cesium diode thermionic converter, noting design, operation, application 10 p1485 A66-21511

Energetic conversion of solar radiation, noting photovoltaic, thermoelectric, thermoelectric, thermionic and heliochemical generators 11 p1638 A66-22241

Low voltage arc in cesium vapor for case in which free-path length of particles is small compared to electrode spacing 11 p1640 A66-23301

Thermionic energy-conversion diode using liquid metal as electron oscillator 11 p1640 A66-23401

Thermionic energy converter energy losses through resonance emission and excited atom diffusion, accounting for de-excitation at electrodes 12 p1922 A66-24211

Thermionic converter, motive diagram and current voltage characteristics, showing variations of power at maximum efficiency with emitter temperature 13 p2181 A66-25521

Gabor type auxiliary discharge thermionic converter producing ions for space charge neutralization by impact, noting critical converter equation 13 p1998 A66-25531

Multiple-converter thermionic module for operation from common liquid-metal heat source [AIAA PAPER 64-761] 13 p2005 A66-26621

Iterative process used in parametric studies and preliminary designs of advanced nuclear thermionic space power plants [AIAA PAPER 64-766] 13 p2005 A66-26622

Design, fabrication and performance of double-diode fueled thermionic converter [AIAA PAPER 64-762] 13 p2005 A66-26631

Solar thermionic power conversion, discussing converters, flux and temperature controls, energy storage generators, support structures, etc [AIAA PAPER 64-734] 13 p2006 A66-26641

Performance optimization, misorientation and cyclic and transient response tests on thermionic generators exposed to solar flux [AIAA PAPER 64-735] 13 p2006 A66-26642

Thermionic converter and use in reactor 14 p2226 A66-28033

Plasma probe in thermal emission converter with high cesium vapor, noting parameters of diffusion, electron concentration, etc 16 p2756 A66-30103

Thermionic conversion research, discussing direct conversion of nuclear produced heat into electricity, converter performance, lifetime, etc 18 p3053 A66-34055

Alpha emitter actinide element application as heat source for isotopic generators, discussing safety precautions required, economy, etc 18 p3134 A66-34056

Low pressure combination of barium and cesium vapors for reduction of transport-affected losses in thermionic energy converters, noting work function and V-I characteristics 18 p3055 A66-34584

Output current characteristics of thermionic converters derived without reference to elastic and inelastic collisions and expressed as plasma electron density and temperature profile 19 p3405 A66-35421

- Plasma model representing phenomena occurring in cesium thermionic converters operating in collisional ignited mode 19 p3406 A66-35429
- Reservoirless thermionic energy converter developed for obtaining large quantity of electrical power in space [AIAA PAPER 65-472] 19 p3280 A66-35623
- Refractory materials in thermionic converters for spacecraft use, noting manufacturing problems and performance characteristics 19 p3371 A66-36162
- Spacecraft power source, discussing energy conversion, processes, solar cells, radio isotopes, thermionic power converters, turbogenerators, etc 19 p3282 A66-36797
- Chapman-Cowling formalism used to obtain transport equations for charged particle species in low energy three-component two-temperature plasmas 22 p3955 A66-40096
- Thermionic energy converter energy loss through resonance emission and excited atom diffusion, accounting for de-excitation at electrodes 22 p3957 A66-40583
- Output characteristics of cesium thermionic converter as function of size of electrode gap, using device with movable air-cooled stainless steel mode 22 p3853 A66-40943
- Inert gas effect on performance characteristics of cesium thermionic converter, noting saturation current increase 22 p3853 A66-40944
- Solar hybrid systems /photovoltaic-thermoelectric and photovoltaic-thermionic/ analyzed, determining potential for missions loyal to Sun 23 p4019 A66-41746
- Thermionic energy conversion phenomena and advances, detailing Cs diode and optimum ideal performance 23 p4021 A66-41756
- Out-of-pile thermionic power system using inert gas for heat transfer from reactor to converter, noting creep-rupture problem of materials 23 p4023 A66-41767
- Isotope and solar thermoelectric generator, solar cell and battery electric power sources for unmanned scientific exploration of solar system 24 p4162 A66-42681
- THERMIONIC DIODE**
- Erected dipole model of adsorbed layer in fluorinated molybdenum filaments exposed to cesium vapor 05 p0737 A66-14986
- Optimization of design of fossil-fueled thermionic generators using thermionic diodes as basic building blocks 05 p0612 A66-15304
- Heat transfer measured at different conditions of diode operation, obtaining data on plasma properties and electrode sheaths 05 p0616 A66-15546
- Uranium dioxide fueled molybdenum emitter of nuclear heater thermionic converter for use in construction of cylindrical thermionic diode 05 p0620 A66-15569
- Theoretical efficiency of thermionic diode calculated as function of cathode temperature for optimum values of anode potential 09 p1353 A66-20418
- Refractory metals and metal alloys analyzed regarding electron work function and threshold temperature for surface ionization in all-metal guard ring diode with directly heated wire [AIAA PAPER 66-223] 13 p2129 A66-25171
- Alternating current thermionic power diode with magnetic regeneration 18 p3163 A66-33813
- THERMIONIC EMISSION**
- SA SCHOTTKY EFFECT**
- Decrease in work function of W-Hf system caused by formation of alloy with better emission properties than those of hafnium 02 p0270 A66-11425
- Emission current density and effective work function of samarium, europium and gadolinium hexaborides 02 p0270 A66-11426
- Titanium, zirconium and hafnium, row of metals and platinum metals as new electron emitters for thermionic generators 05 p0621 A66-15576
- Scanning electron beam probe for investigating nonuniformity in work function of surfaces known as patch effect 05 p0684 A66-15580
- Uranium oxide as nuclear fuel when in contact with tungsten, molybdenum and tungsten-25 percent rhenium thermionic emitter 05 p0713 A66-15586
- Fabrication methods for production of uranium-zirconium monocarbide spherical particles for thermionic emitters 05 p0714 A66-15587
- Uranium-containing materials, refractory metals and alloys, discussing interface interaction, thermionic properties and parameters of vacuum electron emission stability 05 p0714 A66-15589
- Tungsten as thermionic emitter prepared by hydrogen reduction of tungsten fluoride, noting resistance to grain growth and properties 05 p0714 A66-15593
- Semiconductor cathode thermionic emission by solving simultaneously Boltzmann and Poisson equations relating field intensity with electron concentration 06 p0838 A66-15892
- Thermionic emission and surface ionization of Cs, K, Na, Li and In atoms on face of n-type silicon of resistivity of 150 ohm-cm for low densities of atom beams 06 p0922 A66-16153
- Surface ionization of Cs atoms on lanthanum hexaboride cathode with intrinsic thermionic emission of cathode observed from mass-spectrometric measurement of ion current 06 p0912 A66-16885
- Thermionic and photoelectric screening of electric charge on metallic spherical object moving in rarefied ionized medium 06 p0919 A66-16906
- Photocathode scanned storage tube for detection of faint optical images 06 p0883 A66-17016
- Thermionic emission properties of rhenium tape coated with lanthanum hexaboride, examining usefulness as low temperature emitter 06 p0883 A66-17029
- Hot electron emission from semiconductor cathode in vacuum-tube diode during tapping of thermoelectronic and autoelectronic current 09 p1429 A66-20813
- Electron temperatures in hot argon-potassium discharges determined, using ratio of electron energy slopes from floating double-probe curve 10 p1568 A66-21880
- Electron beam machines for thermal milling, noting factors influencing size of heat affected zones such as current density, lens aberration, temperature rise, etc 11 p1710 A66-22700
- Cesium ion emission patterns obtained from rear-fed porous refractory metals, using thermal emission microscope [AIAA PAPER 66-220] 11 p1746 A66-23086
- Thermionic energy converter energy loss through resonance emission and excited atom diffusion, accounting for de-excitation at electrodes 12 p1922 A66-24219
- Work function for thermionic emission of TaC and ZrC refractory metal carbides in vacuum and in cesium vapor 12 p1922 A66-24220
- Nitrogen adsorption effect on thermionic emission from polycrystalline tungsten ribbon at high and low applied fields, explaining work function changes 13 p2162 A66-25381
- Schottky and Langmuir laws verification by thermionic emission of lithium aluminosilicate with respect to current limitation caused by space charge 13 p2163 A66-25436
- Conductivity of working fluid of MHD generator, using thermionic emission from suspended lanthanum hexaboride powder 15 p2552 A66-29408
- Thermionic emission and surface ionization of Cs, K, Na, Li and In atoms on face of n-type silicon of resistivity of 150 ohm-cm for low densities of atom beams 15 p2569 A66-29883
- Effect of temperature gradient at surface of metal on thermionic emission current 16 p2778 A66-31079
- Thermionic and adsorptive properties of zirconium nitride in cesium vapor, determining current-voltage characteristics and temperature dependence 16 p2755 A66-31732
- Thermal and UV radiation effect on thermionic emission from tungsten cathode 17 p2980 A66-32644
- Field and thermionic field emission responsible for excess currents in Schottky barriers formed on doped semiconductors 19 p3434 A66-35345
- Thermionic emission from barium telluride measured by cathodes formed by direct reaction of elements and reduction of barium tellurate 19 p3436 A66-35426
- Pulsed von Ardenne sources having filament substituted by point sources of emission 19 p3406 A66-35585
- Vacuum thermionic work function for well-outgassed polycrystalline surfaces, noting techniques for accurate measurement of current, area and temperature values 20 p3587 A66-38401
- Change in thermionic emission current of palladium wire at 1000 degrees C due to exposure to molecular and atomic-hydrogen beams 22 p3859 A66-39913
- Thermionic energy converter energy loss through resonance emission and excited atom diffusion, accounting for de-excitation at electrodes 22 p3957 A66-40583
- Saha-Langmuir formula applied to description of temperature dependence of positive ion current in surface ionization of silicon atoms, comparing work functions by methods using contact potential, thermionic emission and Richardson graphs 22 p3968 A66-40942
- Uniform-current-density thermionic and secondary electron emission from dense plasma interaction with negatively biased solid surface at high temperature under high current arc cathode simulated conditions 23 p4107 A66-41908
- THERMIONIC RADIATOR**
- Heat pipes as heat removal systems in space thermionic power supplies, discussing laminar, turbulent flow and heat transfer efficiency 05 p0789 A66-15542
- Hypersonic plasma generator for reentry vehicles with arc tunnel experimental data and analysis of nonequilibrium chemical reaction between cesium atoms and ionized air species 20 p3497 A66-37158
- THERMIONIC REACTOR**
- Fission heated generator using cesium ion space charge neutralization for operation in-pile 05 p0620 A66-15568
- Refractory material cermet fabrication, discussing techniques of preparation, fuel-metal compatibility and fuel canning 05 p0713 A66-15585
- THERMIONICS**
- Vacuum thermionic work functions of polycrystalline Be, Ti, Cr, Fe, Ni, Cu, Pt and type 304 stainless steel 17 p2979 A66-32633
- THERMISTOR**
- SA RADIOSONDE THERMISTOR**
- Harmonic frequency divider by using inertialess nonlinear element and inertial nonlinear element such as thermistor 09 p1353 A66-20447
- Ambient temperature compensation in indirectly heated thermistors with negative temperature coefficients used as control elements 11 p1681 A66-22273
- Thermistor hot-wire anemometer with feedback bridge circuit for measuring air flow rates to 20 m/sec from zero to 50 degrees C 11 p1709 A66-23320
- Transient processes in thermistor circuits during pulsation-type variations in heat transfer 12 p1978 A66-24369
- Laboratory studies of heat balance in rocketsonde thermistors for measurement of upper air temperature, noting dissipation constant and solar radiation effect [AIAA PAPER 66-386] 12 p1883 A66-24509
- VECO 32A11 thermistor element for temperature and liquid level sensing in hazardous gases such as Freon 12 21 p3740 A66-39388
- Sputtering, slurry and doctor-blade techniques for depositing thin thermistor films of lanthanum-doped barium-strontium-titanate for bolometer application 23 p4109 A66-41127
- Thermistor temperature sensing bridge for precision temperature control of liquid volume 24 p4214 A66-43033
- THERMOCHEMISTRY**
- SA AEROTHERMOCHEMISTRY**
- Thermochemical interaction between ablation material and environment during manned reentry, using mainly graphite and composite materials [AIAA PAPER 65-642] 01 p0160 A66-10226
- Operation principle, design and application

of colorists which change color at predetermined temperatures determined by current passing through them 03 p0340 A66-12475
Thermochemical deposition of refractory metals, alloys and compounds, discussing tungsten, rhenium and molybdenum impurity, grain orientation and application to thermionic devices 05 p0622 A66-15591
Heat of combustion of tricarbonyl-cyclopentadienylmanganese 08 p1279 A66-18798

Carbide-graphite skeleton materials prepared by sintering compressed graphite powder during thermochemical treatment with carbide-forming elements 15 p2524 A66-28751
Aids in converging particular numerical process, noting similar technique for isentropic expansions in thermochemical equilibrium air 17 p2946 A66-32475
Heat of formation of perfluoroammonium ion estimated from thermochemical correlations and compared with estimates by means of Kapustinskii approximation for lattice energies 23 p4031 A66-41222
Series of tricyanomethyl compounds prepared in refluxing acetonitrile by alkylating potassium tricyanomethanide with alkyl iodides, alkyl, propargyl and benzyl bromides 23 p4117 A66-41229
Thermally initiated reaction between tert-butyl iodide and tetrafluorohydrazine provides synthetic route to tert-butyl difluoroamine 23 p4118 A66-41234

THERMOCONDUCTIVITY

SA FOURIER LAW

Heat potential theories applied to boundary value problem for heat conduction equation 01 p0160 A66-10167
Heating of solar prominence by surrounding corona, considering nonlinear dependence of thermoconductivity coefficient on temperature 01 p0131 A66-10268
Slow motion of sphere in compressible, viscous and heat conducting fluid analyzed, using Navier-Stokes equations 01 p0006 A66-10424
Char generation and determination of thermal conductivity function under simulated entry heating conditions [AIAA PAPER 65-640] 01 p0162 A66-10597
Heat transfer between metallic surfaces in contact [AIAA PAPER 65-661] 01 p0086 A66-10599
Partial-region method for solving nonsteady heat conduction problems in which region considered is divided into several subregions 01 p0163 A66-10739
Thermal limitations on capabilities of gallium arsenide p-n junction lasers 01 p0082 A66-10895
Perturbation technique applied to nonlinear problem in heat conduction 01 p0164 A66-10900
Thermoconductivity decrease of bismuth-telluride based solid solutions due to forbidden bandwidth and majority and minority carrier mobility 01 p0127 A66-11029
Thermal and magnetic properties of GeTe and PbTe semiconductors containing transition elements in solution 01 p0127 A66-11079
Equation solution for flame propagatin in gas mixture with first-order exothermic chemical reaction 02 p0302 A66-11392
Single crystal semiconductor thermal detector with constant bias current and self-cooling, taking into account end cooling 02 p0232 A66-12063
Anomalous heat conductivity in ferrites at Neel temperature due to corresponding anomalous heat capacity 02 p0277 A66-12088
Temperature dependence of heat conductivity and thermal emf in n-type InP 02 p0277 A66-12094
Energy gap and thermoconductivity of normal and superconducting fcc lanthanum 03 p0407 A66-12320
Heat conductivity measurement of solids at 200 to 1000 degrees C from radial thermal flux, specifically Armco iron and stainless steel 03 p0443 A66-12513
Heat resistant ceramic coating on steel produced by gas-flame spraying of refractory oxides investigated for effective heat conductivity and integral radiative

capacity 03 p0443 A66-12514
Heat conductivity of metals and application of van der Waal equation of state 03 p0381 A66-12515
Thermal conductivity measurements of argon plasma produced by stabilized electrical arc 03 p0399 A66-12825
Total thermoconductivity of ionized gas calculated with no simplification of components 03 p0401 A66-12964
Conductive heat transfer through gases contained between two concentric cylinders, comparing results with different methods [ASME PAPER 65-HT-4] 04 p0595 A66-13390
Method for steady state heat conduction of bodies of revolution 04 p0596 A66-13439
Thermal bridge similar to Wheatstone bridge for measuring thermoconductivity of solid semiconductors 04 p0519 A66-13661
Heat conductivity measurement of solids to determine exact values of experimental error 04 p0521 A66-14187
Thermoconductivity of gallium arsenide from 300 to 470 degrees K 04 p0566 A66-14299
Thermal conductivity and interference pattern of temperature boundary layer developed in reflected air shock wave 04 p0598 A66-14327
Absorption spectrum sidebands for quasi-local oscillation in KCl-H crystals 05 p0730 A66-14648
Thermoconductivity of alloyed solid silicon-germanium solutions 05 p0731 A66-14652
Thermal conductivity of Ar, Ne and Kr from 1500 to 5000 degrees K [ASME PAPER 65-HT-3] 05 p0782 A66-14733
Radiative heat exchange between conducting plates with specular reflection discussing internal conduction, surface radiation and application to radiating fins [ASME PAPER 65-HT-28] 05 p0784 A66-14747
Nonlinear inverse heat conduction problem solved by finite difference method, using least squares and future temperatures [ASME PAPER 65-HT-40] 05 p0784 A66-14753
Interfacial metallic foils effect on thermal contact resistance [ASME PAPER 65-HT-44] 05 p0785 A66-14755
Heat transfer through porous ceramics and thermally degraded ablation material, discussing conductivity [ASME PAPER 65-HT-46] 05 p0785 A66-14756
Thermal resistance across aluminum bolted joints in vacuum environment [ASME PAPER 65-HT-53] 05 p0785 A66-14759
Gas compression-conduction mechanism contribution to shock initiation of granular explosives, analyzing surface temperature of interstitial gas and grain distribution [CI PAPER WSCI-65-30] 05 p0788 A66-15141
Thermal conductivity of liquid and gaseous ammonia between 20 and 177 degrees C and 1 to 500 atm 05 p0744 A66-15464
Electrical resistivity and characteristic temperature of technetium based on thermoconductivity of pure element at and above room temperature 05 p0703 A66-15470
Electron temperature distribution in plasma diode, discussing electron transport properties and current-voltage characteristics 05 p0615 A66-15535
Heat pipes as heat removal systems in space thermionic power supplies, discussing laminar, turbulent flow and heat transfer efficiency 05 p0789 A66-15542
Heat pipe performance, emphasizing heat carrying and waste heat dissipation functions, construction and materials testing 05 p0616 A66-15543
Heat pipe characteristics covering performance analysis and experimental results such as heat transfer rate, life tests, working liquid selection, etc 05 p0616 A66-15544
Heat transfer and velocity characteristics of thermal and hydrodynamic laminar flow in ducts of arbitrary cross section, considering boundary conditions at wall [ASME PAPER 65-WA/HT-13] 05 p0790 A66-15650
Predicting thermal conductivity of filled and reinforced plastics from individual component values [ASME PAPER 65-WA/HT-4] 05 p0791 A66-15655
Geometric electrical analog for two-dimensional transient heat conduction

[ASME PAPER 65-WA/HT-42]

05 p0792 A66-15666
Reversed heat conduction in natural convection at thermal leading edge on vertical wall [ASME PAPER 65-WA/HT-34] 05 p0792 A66-15672
Temperature dependent thermal conductivity, considering one-dimensional plate problem with linearly varying heat conduction and constant-volumetric specific heat [ASME PAPER 65-WA/HT-29] 05 p0793 A66-15675
Low temperature thermal conductivity of 2-mev electron-irradiated and annealed single-crystal silicon 05 p0741 A66-15868
Lattice thermal conductivity of GaAs and InSb calculated for 2 to 300 degrees K, considering separate contributions of longitudinal and transverse phonons 05 p0742 A66-15872
Thermoconductivity measurements of high polar gases and equimolar mixture at various temperature ranges 06 p0968 A66-16121
Heat transfer at low temperatures, discussing thermal conduction parameters of powdered alumina in helium gas 06 p0969 A66-16282
Heat conduction for solid circular cylinder with nonuniform boundary conditions 06 p0970 A66-16327
Plane stationary thermoconductivity problem for infinite series of identical circular holes having same temperature 06 p0970 A66-16328
Nonuniqueness of stationary solutions to system of equations in burning theory with piecewise invariable reaction rate and thermoconductivity and diffusion coefficients 06 p0970 A66-16345
Derivation of wave-type heat equation satisfying second law of thermodynamics and modified Onsager symmetry relations 06 p0971 A66-16503
Heat capacity and thermal conductivity related to elastic-mechanical macroscopic physical properties, using invariance properties of tensors 06 p0971 A66-16616
One-dimensional unsteady motions of heat conducting gas in which heat conduction has significant role, formulating boundary value problems with self-similar solutions 06 p0917 A66-16709
Width of influence zone for heat conduction equation in Cauchy problem 06 p0971 A66-16711
Melting and freezing of finite and semilinear bodies, discussing variational, heat balance integral, Riemann-Mellin contour integral, etc 06 p0971 A66-16728
Assembly for determining thermal conductivity coefficients of liquid bismuth selenide-bismuth telluride semiconductor at 970 to 1280 degrees C 06 p0882 A66-16839
Heat conductivity problems for two- and three-layer systems solved by splitting boundary conditions and dividing system into single layers 06 p0972 A66-16842
Energy transfer to small disturbances in viscous compressible heat-conductive medium defined as quantity that is monotone nonincreasing function of time 06 p0874 A66-17005
Length change, X-ray lattice parameter, small angle X-ray scattering, electron microscopy and thermal conductivity measurements related to radiation-induced defects in semiconductors 06 p0933 A66-17117
Thermal conductivity of neutron-irradiated silicon crystal, based on Callaway model 06 p0933 A66-17118
Rapid neutrons irradiation effect on thermal conductivity of ternary semiconducting arsenide compounds 06 p0933 A66-17119
Transport theory based on relaxation time applied to bismuth, deriving analytic expressions for electric resistance, thermoconductivity and Hall, Seebeck and Nernst coefficients 07 p0990 A66-17237
Approximate method determining nonstationary thermal fields in solid bodies with thermal capacity and thermoconductivity coefficient depending linearly on temperature 07 p1148 A66-17392
Heat transfer between two metallic

- cylinders in close contact, examining effect of interstitial gas on thermal contact resistances 07 p1149 A66-17452
 Heat exchange through absorbing media, determining combined modes of radiation and conduction via exchange factor approximation 07 p1152 A66-17590
 Networks method applied to approximate solution of heat conduction equation for partial boundary conditions with aid of theory of hypermatrices 07 p1153 A66-17863
 Steady state thermal conductance coefficient at interface formed by nominally flat rough contacting surface placed in vacuum environment AIAA PAPER 66-42] 07 p1153 A66-17893
 Heat conductivity of binary gas mixtures compared with theoretical and experimental results 07 p1155 A66-18159
 Asymptotic expansion applied to strong explosion in heat-conducting gas 07 p1025 A66-18181
 Specific heat, thermal expansion and conductivity and electrical conductivity of nearly perfect crystalline materials 07 p1109 A66-18497
 Thermoconductivity of annealed pyrolytic graphite from 100 to 900 degrees K, using phonon mean free path characteristics 07 p1055 A66-18518
 One-dimensional heat flow to cool wall, discussing effects of compressibility and variable thermal conductivity 08 p1205 A66-18540
 Temperature fluctuations of elastic isotropic cylinder, obtaining temperature equilibrium equations and reducing three-dimensional problems of thermoconductivity and thermoelasticity to boundary value problems 08 p1307 A66-18886
 Thermal conductivity of infinite hollow cylinder 08 p1319 A66-19425
 Stationary heat transfer through wall with longitudinal rectangular ribs and variable coefficient of thermal conductivity 08 p1319 A66-19426
 Heat transfer to wedge in nearly free-molecular hypersonic flow of strongly rarefied gas 08 p1165 A66-19484
 Thermal conductivity and emf of gallium arsenide at low temperatures, showing phonon drag effect 08 p1278 A66-19626
 Thermal conductivity of NaCl crystals and dependence on Ag, Br, Li, K, I and Rb ion concentration 08 p1278 A66-19627
 Equivalent circuit diagram determination of change in quadrupole parameters in transistor due to current-induced heating 08 p1198 A66-19729
 Electronic thermal conductivity, longitudinal sound wave decay and nuclear-spin temperature in superconductors with paramagnetic impurities 09 p1421 A66-20054
 Ionization effect on plasma thermoconductivity, noting expressions for conductivity due to energy transfer or dissociation 09 p1407 A66-20136
 Heat conductivity, enthalpy, entropy and isobaric-isothermal potential of niobium calculated from zero to 2740 degrees K 09 p1388 A66-20138
 Approximate solution of nonlinear heat conduction problems for boundary conditions of first and third kind, using Leibenson integral 09 p1471 A66-20750
 Temperature distribution of propeller heated by electric anticer, with solutions for heater and propeller surface 09 p1328 A66-20753
 Thermal balance and electric resistance of vacuum-heated wire for thermoconductivity measurements 09 p1390 A66-20830
 Superconductor current acceleration by application of long-wavelength magnetic field below critical temperature 10 p1573 A66-21176
 Thermal and electrical conductivities of molybdenum-rhenium alloys in superconducting and normal states 10 p1573 A66-21178
 Variation of IR emission from Mars surface with Mars local time in terms of diurnal temperature variations, including atmosphere effect, results suggest low thermoconductivity 10 p1604 A66-21201
 Nonequilibrium transport properties and electron relaxation at cooled surface of partially ionized argon 10 p1559 A66-21270
 Energy transfer by radiation and thermal conductivity in high temperature oxygen and nitrogen [AIAA PAPER 66-182] 10 p1620 A66-21432
 Measured thermal conductivities of magnesium oxide, aluminum oxide and zirconium oxide powders 10 p1546 A66-21538
 Theoretical expression for thermal conductivities of magnesium oxide, aluminum oxide and zirconium oxide powder 10 p1546 A66-21539
 Heat conduction equation for axisymmetric pulse heating of cylindrical sample with constant surface conditions 10 p1622 A66-21884
 Closed-form solution for constant velocity solidification of spheres initially at fusion temperature 10 p1622 A66-21889
 Prediction of thermal conductivity of binary mixture of solids, particularly solid propellants utilizing metallic filaments 10 p1590 A66-21957
 Existence possibility of nondamped superthermal conductivity in two-band coupled semiconductors and validity of Landau criterion for superfluidity 10 p1583 A66-21969
 Time reversal heat conduction problems in thermodynamical system with known boundary conditions solved for various structures 10 p1623 A66-22060
 Plastic deformation effect on heat conduction of crystal lattice of sodium and potassium chlorides single crystals 10 p1587 A66-22148
 Thermoconductivity measurements of p-type gallium antimonide in solid and liquid state 10 p1590 A66-22176
 Radiative heat exchange between conducting plates with specular reflection, discussing internal conduction, surface radiation and application to radiating fins [ASME PAPER 65-HT-28] 11 p1784 A66-22183
 Thermal conductivity of Ar, Ne and Kr from 1500 to 5000 degrees K [ASME PAPER 65-HT-3] 11 p1785 A66-22185
 Nonuniqueness of stationary solutions to system of equations in burning theory with piecewise invariable reaction rate and thermoconductivity and diffusion coefficients 11 p1785 A66-22340
 Thermal conduction of hydrogen-helium gas mixtures and dependence on hydrogen concentration 11 p1786 A66-22500
 Temperature dependence of thermal diffusivity and thermoconductivity of symmetrical body 11 p1786 A66-23062
 Thermal transpiration analysis with various gases, testing relation between translation component of thermoconductivity coefficient and maximum transpiration effect for particular gas, obtaining rotational collision numbers 11 p1787 A66-23214
 Transport properties, thermoconductivity, molecular collision and viscosity of polyatomic gas of circular cylindrical molecules with hemispherical caps 11 p1741 A66-23215
 Linear heat conduction in metals with temperature-dependent physical properties and constant illumination 11 p1787 A66-23264
 Accuracy and applicability of approximate formulas describing heat conductivity of binary gas mixture 11 p1787 A66-23318
 Single observation method for determining coefficient of heat transfer as function of temperature in stationary regime 11 p1787 A66-23319
 Revised equation for thermokinetic phenomena under Fourier relationship, considering certain finite time is required for development, noting role of flux density 12 p1973 A66-23526
 Maxwellian theory, within classical mechanics of fluids, adapted to material and thermal conductivity in turbulent flows, calculating mass and heat transfer 12 p1973 A66-23529
 Mathematical analysis of analogies between theory of heat conduction and theory of functions of complex variable 12 p1977 A66-23562
 Digital computer determination of equilibrium conductivity effect on MHD plasma engine performance 12 p1935 A66-23604
 Axisymmetric problems of heat conductivity theory for layer with one constant boundary and one circular boundary solved by paired integral equations method 12 p1978 A66-24207
 Viscosity and thermoconductivity effects on asymptotic sonic flow structure near profiles and bodies of revolution 12 p1863 A66-24342
 Kinetic theory of dense gases generalized for all orders, deriving integral equations for transport coefficients and showing temperature dependence of bulk viscosity 12 p1979 A66-24565
 Transport coefficients of moderately dense gas calculated by three methods based on correlation function or generalized Boltzmann equation 12 p1979 A66-24586
 Relaxing gas in cylindrical heat conductivity cell showing homogeneous gas phase maintained in thermal equilibrium by surface effects and exhibiting characteristics of monatomic gas 12 p1980 A66-24909
 Digital calculation of transient one-dimensional heat flow confirms accuracy of small and large Fourier number approximations 12 p1981 A66-24998
 Sudden appearances and disappearances of filaments and changes in thermoconductivity of chromospheric plasma due to variation in magnetic field strength, noting reestablishment of thermal equilibrium 13 p2180 A66-25413
 Heat transfer through contact zone of two solids which are joined 13 p2209 A66-25445
 Cooling of stellar material by thermal conduction under solar atmospheric conditions in presence and absence of magnetic field 13 p2174 A66-25618
 Two-fluid approach for solutions to hydromagnetic waves including pressure, viscosity, heat conduction, etc, using partial differential equations 13 p2146 A66-25741
 Absorption spectrum sidebands for quasi-local oscillation in KCl-H crystals 13 p2167 A66-25923
 Thermoconductivity of alloyed solid silicon-germanium solutions 13 p2167 A66-25927
 Relativistic hydrothermodynamics in covariant form for simple viscous fluid, omitting infinite heat conduction velocity and instantaneous diffusion flux theory from treatment of Eckart 13 p2210 A66-26333
 Diffusion-induced stress concentration near cavity, relating deformation diffusion and heat conduction via differential equations 13 p2203 A66-26426
 Single blow transient testing of compact heat exchanger surfaces [ASME PAPER 66-GT-93] 14 p2411 A66-26997
 Electron and lattice heat conductivity of mercury selenide crystals 14 p2356 A66-27066
 Thermoconductivity of germanium alloyed with arsenic and gallium depends on impurity type starting from certain impurity concentration 14 p2359 A66-27178
 First order in density corrections to transport coefficients of moderately dense gas /viscosity and thermoconductivity/, using Boltzmann equation 14 p2276 A66-27636
 Temperature variation and carrier concentration effects on density-of-states effective mass, polar and dipolar thermoconductivity, electron and phonon scattering and electron-phonon interaction in doped Si-Ge alloys 14 p2365 A66-27759
 Thermal conductivity of equilibrium dissociating nitrogen tetroxide 14 p2371 A66-27828
 Nonhomogeneous solid sphere radiative cooling asymptotic representation based on heat conduction theory by Laplace transforms 14 p2414 A66-28144
 Perturbation solutions in differential analysis of radiation interactions with conduction and convection 14 p2259 A66-28162
 Emissivity-thermoconductivity relationship in polished metals 15 p2616 A66-28764
 Surface temperature determination procedure for laser heated metals based on heat conduction equations and ion emission from surface 15 p2514 A66-29035
 Thermal conductivity coefficient and integral hemispherical degree of blackness of niobium at temperatures above 1000 degrees C 15 p2523 A66-29217
 Current voltage characteristic of gas discharge for one-dimensional stationary

case with fixed temperatures at conductor end, noting voltage saturation 15 p2551 A66-29224

Thermoconductivity and electrical resistivity measurements with derived Lorentz functions for various compounds, using longitudinal heat flow 16 p2771 A66-30252

Measuring and calculating methods for dilute gas transport properties independent of fluid dynamic environment in which they operate 16 p2825 A66-30306

Thermal conductivity of polytetrafluoroethylene, noting temperature effect, crystal structure, etc 16 p2730 A66-30854

Heat pipe exhibiting very high effective thermal conductivity, showing temperature distribution, boiling heat transfer coefficients, vapor temperature and pressure drop 16 p2827 A66-30914

Transition variable as function of superconductor reduced temperature, showing temperature dependency of penetration depth, acoustical attenuation and thermoconductivity 16 p2777 A66-30937

Temperature field distortion in region of thermocouple function which arises when thermal conductivity of junction differs from object whose temperature is to be measured 16 p2707 A66-31163

Electronic encapsulant thermal conductivities increased, noting dry filling potting technique, considering module repairability 16 p2664 A66-31378

MHD wave propagation emphasizing viscosity, heat and electrical conductivity, Hall current, no nonequilibrium phenomena and effect of medium inhomogeneity 16 p2766 A66-31583

Thermal conductivity coefficient of refractory materials at temperatures to 1600 degrees C 16 p2683 A66-31674

Effective thermal conductivity in toroidal plasma filament for Tokamak geometry and Stellarator with figure eight shape 17 p2963 A66-31829

Radial temperature distribution within argon plasma column determined spectroscopically at various arc currents, noting argon thermoconductivity 17 p2966 A66-32427

Various heat treat tempers of 2014 Al alloy and corresponding values of eddy current 17 p2940 A66-33099

Thermal conductivity and emf of gallium arsenide at low temperatures, showing phonon drag effect 17 p2984 A66-33140

Thermal conductivity of NaCl crystals and dependence on Ag, Br, Li, K, I and Rb ion concentration 17 p2984 A66-33141

Heat conductivity coefficient of cesium vapor at temperatures from 1000 to 1600 degrees K and 1 to 5 torr measured by hot tungsten filament method 18 p3142 A66-34022

Thermal conductivity coefficient experimentally determined for argon plasma at atmospheric pressure and temperatures from 10,000 to 13,000 degrees K 18 p3144 A66-34038

Thermoconductivity, mechanical stress, processing characteristics, etc, of various adhesives used in integrated circuits, noting neoprene cement 18 p3077 A66-34051

Fermi surface shape and size determination and thermoconductivity and conduction electron properties in metals 18 p3155 A66-34135

Thermal conductivity of hydrogen at temperatures up to 4700 degrees F determined indirectly from effective conductivity of porous tungsten specimens filled with pressurized hydrogen 18 p3125 A66-34387

Conductive sheet analogy applied to steady heat conduction problem, noting evaluation without use of potentiometers 18 p3265 A66-34491

Fast neutron effect on conductivity and thermoelectric power of germanium, noting decrease of conductivity due to phonon scattering 18 p3157 A66-34626

Young-Liebmann relaxation method for calculation of perturbed geothermal field 18 p3108 A66-34713

Thermal conductivity and electrical resistivity measurements on nickel alloyed steels in cast and wrought

conditions 18 p3124 A66-34895

Numerical solution for complete Navier-Stokes equations for one-dimensional time-dependent propagation of compressible viscous thermally conducting diatomic gas, including presence of traveling shock wave 18 p3102 A66-34918

Transport properties of ionized monatomic gases, using Chapman-Enskog-Burnett approximation method for determination of thermal conductivity, diffusion coefficients and viscosity 18 p3149 A66-34927

Method for determining temperature dependence of heat conductivity of dielectric and semiconductor materials 18 p3159 A66-35054

Plane steady state problem solved in thermoconductivity theory in case of boundary conditions of third kind for regions of special shape 18 p3267 A66-35055

Nonequilibrium thermoconductivity coefficient for heat transfer in dissociating gas system at low pressure 19 p3477 A66-35366

Thermal and electric properties of InAs-GaAs alloy as function of composition, impurity additions and temperature 19 p3436 A66-35427

Tungsten heat conductivity between 1500 and 3000 degrees K and Lorentz number temperature dependence 19 p3380 A66-35750

Plastic deformation effect on heat conduction of crystal lattice of sodium and potassium chlorides single crystals 19 p3440 A66-35762

Thermoconductivity measurements of p-type gallium antimonide in solid and liquid state 19 p3441 A66-35790

Specific heat and thermal conductivity of metals at cryogenic temperatures 19 p3381 A66-35849

Third boundary problem solution for two-dimensional equation of thermal conductivity in arbitrary region by locally one-dimensional method 19 p3478 A66-35934

Thermoconductivity through rarefied gases at rest contained between concentric cylinders, varying pressure 19 p3478 A66-36061

Thermal conductivity measurements for hydrogen via coaxial cylindrical cell noting temperature, pressure effects, residual and conductivity values 19 p3479 A66-36290

Thermal conductivity measurements of argon plasma produced by stabilized electrical arc 19 p3433 A66-36767

Approximate solution of unsteady thermal conductivity for plate with unlimited number of layers 20 p3674 A66-36906

Electrical and thermal conductivity and integral degree of blackness of tantalum at temperatures above 1000 degrees C 20 p3582 A66-36977

Heat transfer, thermal conductivity and thermal diffusivity of loose fibrous materials under vacuum 20 p3587 A66-36978

Thermal conductivity of gas-charged cryogenic powder insulation 20 p3675 A66-37067

Three-dimensional heat conduction of body of revolution of arbitrary shape for exponential temperature-time relationship 20 p3678 A66-37112

Simultaneous measurement of heat conductivity, heat capacity and thermal diffusivity of solid and liquid metals at high temperature 20 p3678 A66-37120

Effect of partial substitution of silicon, germanium and lead for tin on thermal emf and thermoconductivity of solid solutions of tin telluride 20 p3612 A66-37123

Viscous thermoconductive model of solar wind motion, using Navier-Stokes equations 20 p3631 A66-37335

Conductivity, temperature dependence, thermal emf Hall constant, thermal conductivity and resistivity of aluminides of transition metals 20 p3584 A66-37417

Heat conductivity coefficients of granular materials calculated by cylindrical and spherical models with porosity of 0.215 and 0.476 respectively 20 p3678 A66-37421

Neutral atmosphere reduces electron gas thermal conductivity below 200 km during both day and night 20 p3552 A66-37590

Thermal history of Bruderheim meteorite showing lost of 90 percent radiogenic argon 40 20 p3651 A66-37591

Thermoconductive energy transfer from cathode of low pressure gas discharge 20 p3679 A66-38010

Stability analysis of one-dimensional steady laminar flame propagation with conductive heat loss 20 p3680 A66-38045

Weak shock wave structure in viscous heat-conducting fluid, accounting for dissipation of energy during one-dimensional flow 21 p3723 A66-38587

Shubnikov-de Haas effect for transport properties of electron gas in magnetic field, noting oscillatory parts of thermal and electric conductivities 21 p3776 A66-38633

Heat conduction in rarefied gases between concentric spheres by moment method, considering accommodation coefficients at inner sphere surface 21 p3834 A66-38708

Temperature dependence of mixed-state thermoconductivity of type II superconducting In-Pb alloys in magnetic field 21 p3797 A66-38751

Thermal conductivity of finely divided and granular materials through solid phase and interstitial gas or by radiation between granules 21 p3835 A66-38768

Thermal conductivity and accommodation coefficient measurements in gas mixture of atomic and molecular oxygen 21 p3836 A66-39174

Equivalent problem method of heat conduction theory applied to mixed flow, produced by convergence of two jets ejected from two plane-parallel nozzles with parallel axes 21 p3728 A66-39256

Ionization effect on plasma thermoconductivity, noting expressions for conductivity due to energy transfer or dissociation 21 p3793 A66-39408

Heat conductivity, enthalpy, entropy and isobaric-isothermal potential of niobium, calculated from zero to 2740 degrees K 21 p3752 A66-39410

Thermal conductivity of carbon dioxide in critical region interpreted, considering gas as mixture of clusters and heat transfer due to formation and breaking of clusters 21 p3837 A66-39454

Existence possibility of nondamped superthermal conductivity in two-band coupled semiconductors and validity of Landau criterion for superfluidity 21 p3805 A66-39548

Thermal emf of semiconductors in strong magnetic field, examining formation of spherically symmetric zone subject to arbitrary conduction-electron energy dispersion law 22 p3960 A66-39824

Curing problems of highly exothermic propellants investigated using mathematical models, detailing heat conduction and thermal properties 22 p3968 A66-39868

Thermal conductivity of formed-plastic composite insulation systems for liquid hydrogen storage tank [AICE PREPRINT 22D] 22 p3997 A66-39893

Integral equation for heat flux in inverse heat conduction for infinite flat plate as in solid rocket igniters 22 p3998 A66-40033

Calculating specific heat and conductivity of ablating specimens exposed to radiant heat fluxes 22 p3998 A66-40032

Thermal conductivity of InP-GaAs solid solutions in vacuum 22 p3962 A66-40051

Stability criteria for solid propellant burning for case of linear variation in propellant thermal conductivity, noting parameters and shift in instability modes 22 p3969 A66-40353

Simultaneous one-dimensional heat conduction equations solved by means of matrix similarity transformations in direct computational procedure 22 p3940 A66-40488

Axisymmetric problems of heat conductivity theory for layer with one constant boundary and one circular boundary solved by paired integral equations method 22 p4000 A66-40571

Finite integral transform to solve unsteady-state heat conduction problems for hollow cylinders with moving internal boundary 22 p4000 A66-40819

Electron and lattice heat conductivity of mercury selenide crystals 22 p3966 A66-40825

Explosive nature of chromospheric flares, effect of magnetic fields and thermoconductivity calculated, using mathematical model 22 p3975 A66-40852

- Two-dimensional problem for layer with fixed boundary conditions, obtaining solutions for Fredholm integral equations and relations for temperature distribution 22 p4001 A66-40930
- Thermal conductivity of gases measured, using thermal diffusion columns 23 p4149 A66-41502
- Radiation, molecular orientation, crystallinity and molecular weight influences thermoconductivity of high polymers 23 p4083 A66-41551
- Wiener-Hopf solution of thermoconductivity boundary value problems 23 p4149 A66-41558
- Numerical solution via digital computer of nonlinear transient heat conduction with phase changes 23 p4149 A66-41697
- Electric and thermal conductivity effects MHD instabilities in diffuse linear pinch 23 p4105 A66-41706
- Thermal convection in horizontally infinite layer of fluid confined between rigid heat conducting plates driven by temperature difference 23 p4151 A66-42055
- Thermoconductivity of small thermoelectric samples measured, using disk-shaped resistance heater 24 p4248 A66-42110
- Parabolic equations applied to nonlinear thermoconductivity and filtration, describing propagation of plane wave 24 p4230 A66-42219
- Thermal conductivity change in single crystal InSb irradiated with electrons, noting additive thermal resistivity increases 24 p4249 A66-42228
- Energy balance equation for ionosphere including effects of O, He, and H ions, thermoconductivity and cooling by atomic hydrogen and helium 24 p4198 A66-42431
- Integral method derivation of thermoconductivity coefficient of cylindrical semiconductor immersed in liquid He and superheated by Joule heating 24 p4255 A66-42494
- THERMOCOUPLE**
- COUPLING**
- PYROMETER**
- SEEBECK EFFECT**
- TEMPERATURE MEASUREMENT**
- Temperature control of graphite nuclear furnace, using thermocouples 02 p0228 A66-11517
- Graphite-carbon thermocouple used for measuring high temperatures in reduction and inert gas media 03 p0370 A66-12838
- Reference tables for 0 to 1880 degrees C established for platinum-rhodium thermocouples 03 p0371 A66-13251
- Semiconductor thin film p-n junction thermocouples consisting of germanium crystal deposit in vacuum 05 p0736 A66-14971
- Heat conduction in thermocouples with lateral heat leakages applied to calibration of microcalorimeters of Calvet type 05 p0679 A66-15174
- System of adjustable parameters for measuring fast varying temperatures in bounded space, using thermocouple with compensating circuit 06 p0879 A66-16420
- Steady thermal inertia of chromel-alumel and copper-constantan microthermocouples 06 p0882 A66-16846
- High temperature compacted-ceramic insulated, metal sheathed and hermetically sealed thermocouples for use in nuclear reactors and nonnuclear environment 12 p1879 A66-23698
- Thermocouple emf, noting pressure dependence and effects of contamination, plastic deformation, electrical shunting, temperature gradients, etc 13 p2076 A66-25042
- Thermocouple emf pressure dependence measured for Chromel/Alumel and platinum/platinum-10 percent rhodium and platinum/platinum-13 percent rhodium 13 p2076 A66-25073
- Surface temperature measurement using thermocouples, noting error causes 13 p2081 A66-26221
- Measurement of temperature profile in gas stream by moving thermocouple at constant rate in both directions across cross section of stream 14 p2294 A66-27485
- Dynamic method of measuring gas temperature up to 2500 degrees C by short-term exposure of thermocouple to gas stream 14 p2294 A66-27486
- SNAP-15A design and performance, comparison with semiconductor or metal thermocouples, test results, safety, etc 15 p2429 A66-29603
- Output power and thermal efficiency of molten salt thermocell, examining applicability as generator for direct conversion of heat into electric energy 16 p2636 A66-30673
- Temperature field distortion in region of thermocouple junction which arises when thermal conductivity of junction differs from object whose temperature is to be measured 16 p2707 A66-31163
- Thermal emf of metallic liquid couples measured as function of thermal difference between junctions and alloys composition, noting correlation between thermodynamic and thermoelectric properties of alloys 16 p2781 A66-31410
- Ribbon ablative thermocouples for 3000 to 5000 degree F range 17 p2924 A66-32038
- High temperature, electrically insulating refractory tubes of boron carbonitride for protection of metal thermocouples 17 p2944 A66-33144
- Thermocouples and resistance thermometers installation techniques for surface temperature measurement 18 p3109 A66-33548
- Flame temperature measurement using response time of Wolfram-rhenium thermocouples to correct radiation errors in optical pyrometer readings 19 p3360 A66-36160
- Graphite-carbon thermocouple used for measuring high temperatures in reduction and inert gas media 19 p3362 A66-36779
- Chemical diffusion as affected by tungsten concentration in columbium-tungsten system measured, using couples prepared from polycrystalline pure metal 20 p3585 A66-37785
- Lead loss in thermocouple imbedded in burning propellant, noting possibility of loss reduction by using flattened junction parallel to burning surface 20 p3681 A66-38177
- Global solar radiation distribution in three spectral regions at Genoa measured by thermopiles with various filters 21 p3731 A66-38628
- Total energy and radial energy distribution of plasmoids, examining error in measurement by probe consisting of heat sensor and thermocouple 21 p3785 A66-39034
- Magnesium antimonide and magnesium bismuthide as materials for power generating thermocouples 24 p4227 A66-42111
- Plasma thermocouple and MHD generator as energy conversion devices, with bibliography 24 p4162 A66-43119
- THERMOCOUPLE GAUGE**
- Plasma temperature measurement from 3000 to 4000 C using platinum thermocouple with heating-curve time analyzer 18 p3111 A66-34031
- Stagnation pressure, temperature and static pressure measurement in shock driven facilities, using equipment with piezoelectric crystal and fast response thermocouple 24 p4207 A66-42175
- Pyroelectric heat-transfer sensor performance compared with thin skin thermocouple heat sensors, noting discrepancy in measurement results in severe environment 24 p4207 A66-42177
- Semiconductor surface thermocouples, determining heat-transfer rates associated with wind tunnel testing 24 p4208 A66-42178
- THERMODYNAMIC COUPLING**
- BCS model extended to intermediate and strong-coupling superconductors effective interaction strength as function of absolute-zero energy gap, phonon-frequency cut-off and Fermi surface density of states 23 p4113 A66-41376
- THERMODYNAMIC EFFICIENCY**
- Air conditions, flight altitude and fuel composition effects on ramjet engine, specific impulse and efficiency 01 p0130 A66-10925
- Thermodynamic analysis of MHD generator with vapor liquid injector 03 p0323 A66-12831
- Maximum obtainable efficiencies of cesium diodes with cesium fluoride additive from experimental U-I curves 05 p0618 A66-15559
- Engine technology including higher turbine operating temperatures, high speed fan and nacelle design, increased by-pass ratio and improved power plant efficiency 06 p0943 A66-16924
- Gaseous heat engine cycle with gas compression from molecular effusion through capillary material 11 p1639 A66-22244
- Thermomolecular heat pump with cooling from gas diffusion through capillary material driven by external pressure difference 11 p1639 A66-22245
- Computer programs for efficiency predictions of axial flow turbines, using Ainley-Mathieson and Soderberg methods of loss correlation 13 p1991 A66-26224
- Second thermodynamic law analysis of availability balance for conventional gas turbine and free-piston gasifier [ASME PAPER 66-GT-96] 14 p2372 A66-26999
- Liquid phase compression in closed cycle gas turbine by using particular working fluids for application to nuclear power stations [ASME PAPER 66-GT-111] 14 p2411 A66-27005
- Thermodynamic cycles with compression in liquid phase using nitrogen tetroxide, calculating I-S diagram 14 p2413 A66-27826
- Thermodynamic analysis of MHD generator with vapor liquid injector 19 p3282 A66-36773
- Flow velocity effect on thermometer reading and consequences for measuring thermodynamic efficiency of hydraulic machines 21 p3737 A66-38935
- THERMODYNAMIC EQUILIBRIUM**
- Equilibrium thermodynamics from transport theory including interaction studied up to second virial coefficient, determining velocity of first sound and zero sound 01 p0161 A66-10327
- Structure of disturbed plasma in thermodynamic equilibrium situated near charged solid surface ideally reflecting incident particles 03 p0397 A66-12381
- Thermodynamic functions determined for nonequilibrium system using Gibbs local equilibrium ensembles to incorporate temperature inhomogeneity 03 p0445 A66-13191
- Book on data for plasma in local thermodynamic equilibrium, containing tables on numerical values of reduced Saha-Eggert equations, partition functions, etc 04 p0557 A66-14457
- High temperature air-carbon plasma noting black body radiation, atomic constants and thermodynamic equilibrium 04 p0599 A66-14460
- Isentropic expansion of argon plasma in Laval nozzle, discussing parallel flow parameters, frozen flow, thermodynamic equilibrium, energy balance, etc 05 p0720 A66-14509
- Equilibrium conditions for whole complex cryogenic cycle analyzed by means of Claude-Heyland cycle 05 p0786 A66-14900
- Equilibrium properties of system of interacting molecules calculated from differential equation of state for real gas, employing classical and thermodynamic relations 06 p0912 A66-16841
- Hot electron recombination peculiarities, ignoring electron temperature concept, for moderate fields and lattice temperatures 07 p1104 A66-18220
- Particle distribution and motion in field of force, discussing density profile, energy dissipation, Coulomb charge shielding for local thermodynamic equilibrium and free orbital motion 08 p1261 A66-18743
- Relativistic hydrodynamics of relaxation, discussing limiting cases depending on chemical reaction and annihilation rates and pair growth 08 p1206 A66-18974
- Laminar circulation and thermal equilibrium in stars generated by nonspherical perturbations 09 p1448 A66-20096
- Departures from local thermal equilibrium in helium plasma produced by magnetically-driven shock wave in T-tube 10 p1566 A66-21811
- Carbon deposition boundaries and other constant parameter curves in triangular representation of C-H-O equilibria, with application to fuel cells 11 p1639 A66-22243
- Unattainability of detailed balancing in

thermodynamic equilibrium of gray atmosphere 11 p1772 A66-22776
 Structure of disturbed plasma in thermodynamic equilibrium situated near charged solid surface ideally reflecting incident particles 13 p2139 A66-25386
 Differences between thermodynamic equilibrium of hydrogen plasma, accounting for increased atomic energy levels 13 p2141 A66-25459
 Relativistic hydrothermodynamics in covariant form for simple viscous fluid, omitting infinite heat conduction velocity and instantaneous diffusion flux theory from treatment of Eckart 13 p2210 A66-26333
 Perturbation method analysis of thermodynamic equilibrium properties of multicomponent plasma 14 p2345 A66-27984
 Equilibrium binary correlations in classical relativistic homogeneous electron gas 14 p2336 A66-28275
 Epitaxial growth of semiconductors in isothermal system approaching thermodynamic equilibrium, noting growth parameters, activation energy, etc 17 p2886 A66-32495
 Statistical correlation theory for extending Onsager symmetry relationship to nonisolated systems, discussing equilibrium and reversibility conditions 18 p3117 A66-33554
 Ionization outside equilibrium and relaxation of ionization in cesium seeded argon 18 p3144 A66-34102
 Equilibrium deviation occurring in plasma with variable kinetic temperature due to radiation transport within plasma volume and outflow beyond limits of volume 20 p3606 A66-36973
 Temperature measurement in shock tubes and transition probabilities of argon spectrum lines from emission intensities 22 p3956 A66-40406
 Finite conductivity and heat release on magnetohydrostatic equilibrium of thermodynamically ideal plasma 23 p4099 A66-41081
 Inequality, derived from entropy law, for irreversible processes of nonequilibrium thermodynamics, with attention to viscoelastic materials 24 p4293 A66-42136

THERMODYNAMIC PROPERTY
 Thermodynamic properties of cobalt-molybdenum alloys determined by emf method measured between 1170 and 1470 degrees K 01 p0088 A66-10940
 Thermodynamic properties of cobalt-niobium alloys determined by emf method measured between 1275 and 1425 degrees K 01 p0088 A66-10941
 Thermodynamic properties of substances in ideal gas state in finite series representation 03 p0443 A66-12512
 Total complexions for isolated assembly of N quasi-independent localized systems with equally spaced energy levels 03 p0444 A66-12610
 Machine computation of thermodynamic properties of hydrazine from 32 degrees F to 1.02 times critical density 03 p0414 A66-12760
 Thermodynamic properties of hydrogen ionized plasma in equilibrium 03 p0403 A66-12966
 Nonadditive entropy of thermal system with regions of different temperatures 03 p0445 A66-13188
 Aluminum carbide thermodynamic properties over large temperature interval calculated from low-temperature heat capacity and high-temperature relative enthalpy 04 p0536 A66-13832
 Thermodynamic calculations and experimental measurements to illustrate material properties pertinent to ablation process and to suggest refractory compounds as ablating materials 05 p0706 A66-15472
 One- and two-dimensional superconductivity, discussing effect of thermodynamic fluctuations on off-diagonal long-range order 05 p0718 A66-15865
 Low temperature excitation spectrum for ferro- and antiferromagnets with large crystalline field splittings 05 p0741 A66-15867
 Partition functions in equilibrium chemical composition and thermodynamic properties of nitrogen and oxygen

plasmas 07 p1087 A66-17936
 Thermodynamic stability and reaction kinetics of solids at high temperature 07 p1054 A66-18496
 Thermodynamic parameters of carbon dioxide and argon mixture behind straight shock wavefront 09 p1470 A66-20146
 Thermodynamic property calculations from equations of state and ideal gas properties, using entropy as illustrative example 10 p1619 A66-21077
 Thermodynamic properties and appearance potentials of cubane /tricyclooctane/ 10 p1495 A66-21166
 MHD natural convection in cylinder, noting independence of thermodynamic profile from magnetic field 10 p1566 A66-21794
 Thermodynamic parameters in heterogeneous reduction equilibrium of nickel titanate with CO from 1285 to 1435 degrees K 11 p1719 A66-23449
 Relating general theory of elastic-plastic continuum, valid for nonisothermal deformations and explicit thermodynamic restrictions, to Drucker postulate 12 p1959 A66-23862
 Book on thermodynamic properties of combustion gases 12 p1978 A66-24192
 Nonrelativistic force in simple magnetizable fluid derived from thermodynamic information about energy and power 12 p1915 A66-24651
 Free energy of pure fluids as function of thermodynamic temperature determined from measurements of internal energy, noting case of carbon dioxide 12 p1981 A66-24997
 Perfect thermodynamic vapor, deriving analytic relation for efficiency of two Rankine cycles 13 p2001 A66-26254
 Book on thermodynamic functions and shock adiabats of air at high temperature and pressure 14 p2413 A66-27787
 Calculating thermodynamic functions of dissociating nitrogen tetroxide 14 p2413 A66-27825
 Statistical thermodynamics analysis of interaction limit problem for real system 14 p2414 A66-28277
 Thermodynamic characteristics of two volumes of binary gas mixture connected through capillary tube 14 p2415 A66-28324
 Entropy and heat of formation of lead telluride determined by emf temperature coefficient measurement 14 p2369 A66-28330
 Lewis method for obtaining thermodynamic relation between energy gap of superconductor and critical field and temperature slope 16 p2728 A66-30141
 Thermal emf of metallic liquid couples measured as function of thermal difference between junctions and alloys composition, noting correlation between thermodynamic and thermoelectric properties of alloys 16 p2781 A66-31410
 Thermodynamic parameters of gas behind strong shock wave in helium 16 p2690 A66-31630
 Lead stearate effect on thermodynamic properties of propellant, using heat-of-explosion test 16 p2790 A66-31685
 Text on thermodynamics of refractory compounds covering thermodynamic properties of borides, carbides, nitrides and oxides of 31 elements 16 p2728 A66-31748
 Thermodynamic and optical properties of Ge, Si, diamond and GaAs, obtained by inelastic neutron scattering technique, used to measure vibrational spectrum 18 p3154 A66-33922
 Equilibrium thermodynamic and gas dynamic parameter calculation for low temperature plasma, using electromagnetic and diaphragm-type shock tubes 18 p3144 A66-34037
 Black body radiation, pressure and temperature dependences of equilibrium composition, enthalpy, specific heat and electron density of air-carbon plasmas 18 p3144 A66-34040
 Thermodynamic properties of plasmas in pressure and temperature equilibrium, showing evaluation accuracy to 4 percent 18 p3145 A66-34104
 Correlation method of law of corresponding states for calculating thermodynamic properties of real gases and their mixtures 18 p3267 A66-35060

Thermodynamic properties and electromotive force of germanium telluride used in electrochemical schemes 19 p3434 A66-35831
 Nonlinear material with memory defined by constitutive functional, examining fading memory theory 19 p3438 A66-35841
 Thermodynamic properties and solubility of He molecular nitrogen, molecular oxygen, Ar and nitrogen trioxide in liquid nitrogen tetroxide 19 p3449 A66-36361
 Cavitation flow of water and ethyl alcohol in venturi tube, noting effect of vapor concentration and thermodynamic properties 20 p3544 A66-36891
 Heat of fusion and density of solid argon slush hydrogen at pressures to about 4 atm 20 p3625 A66-37011
 Surface depletion errors in using effusion method for determining alloy thermodynamic properties, noting twin factor 20 p3679 A66-37711
 Calculation of performance data of several thermodynamic propellant combinations with determination of principal thermodynamic coefficients 20 p3626 A66-38011
 Jet flow turbulence characteristics, calculating vertical wind velocity pulsation component, determining thermodynamic characteristics of atmosphere 20 p3595 A66-38311
 Temperature and pressure of cesium plasma in wake of incident and reflected shock wave 21 p3790 A66-39011
 Thermodynamic parameters of carbon dioxide and argon mixture behind straight shock wavefront 21 p3836 A66-39411
 Thermodynamic and reaction kinetic parameters in solid rocket motor efficiency examining Le Chatelier effect of environmental pressure, influence of propellant temperature and system thermodynamic losses 22 p3970 A66-39811
 Short duration technique providing simulation of thermodynamic properties as composition of exhaust products of liquid and solid propellant rocket engine [AIAA PAPER 66-760] 22 p3894 A66-40611
 Thermodynamic similarity of nitrogen, oxygen and air by comparing critical parameter pressure, volume and temperature in dimensionless form 22 p4000 A66-40811
 Enthalpy and entropy of dissociating nitrogen tetroxide, using thermodynamic dependences 23 p4148 A66-41211
 Low temperature thermodynamic properties of vanadium, discussing specific heats and transition temperatures for superconducting and normal states 23 p4080 A66-41311
 Specific heat measurements and cryogenic thermodynamic properties of single crystals of V in mixed state under 12 different magnetic fields 23 p4080 A66-41311
 Thermodynamics of real air expansion using state equation applied to large temperature range, including contribution of vibrational energy 24 p4293 A66-42111
 Functional interdependence of four distinctly different parameters represented by gamma in study of thermodynamic relations for shock waves 24 p4193 A66-42211
 Thermodynamic properties of electron plasma investigated by Bogolubov-Born-Green-Kirkwood-Yvon hierarchy equation calculating correlation energy 24 p4243 A66-42711
 Monte Carlo analysis of plasma of heavy ions, obtaining thermodynamic properties, potential energy and pair distribution 24 p4245 A66-43011
 Thermodynamic properties of high temperature gas deviating widely from ideal gas, considering acetylene combustion products 24 p4295 A66-43111

THERMOELASTICITY

SA AEROTHERMOELASTICITY

Two-dimensional problem of thermoelasticity involving periodic thermal effects, using Parkus thermoelastic displacement potential 01 p0155 A66-10652

General Marguerre equations derived for thin shallow shells subject to uniformly distributed thermal potential 01 p0155 A66-10716

Uniqueness of mixed problem of anisotropic body dynamic thermoelasticity when radiative heat transfer is absent, using thermodynamics and Onsager relations 02 p0300 A66-12001

Green functions for coupled problem of thermoelasticity obtained from solutions of thermal stresses theory 04 p0591 A66-14206

Exact thermoelastic solutions for clearance variation in short cylindrical dry journal bearings with unsymmetrical frictional heating [ASME PAPER 65-LUB-3] 04 p0527 A66-14239

Pressure and temperature distribution across contact strip between two elastic cylinders with parallel axes in presence of frictional heating [ASME PAPER 65-LUBS-1] 06 p0961 A66-16201

Displacements and temperatures accompanying deformation in unbounded thermoelastic semispace with concentrated force and heat source 06 p0966 A66-16505

Higher order approximations derived for bending equations of isotropic homogeneous thermoelastic plates 07 p1142 A66-17266

Stress distribution due to nucleus of thermoelastic strain placed at center of elliptic insert in infinite plate of different elastic material 07 p1145 A66-18244

Temperature fluctuations of elastic isotropic cylinder, obtaining temperature equilibrium equations and reducing three-dimensional problems of thermoconductivity and thermoelasticity to boundary value problems 08 p1307 A66-18886

Modification of Fourier law used to obtain hyperbolic wave equations of thermomagnetoelasticity for conductors and wave equations of thermopiezoelectricity 08 p1270 A66-19113

Discontinuity surface propagation in linearly thermoelastic solid 08 p1311 A66-19227

Singular solutions of concentrated force and concentrated heat source thermoelasticity 09 p1467 A66-20498

Numerical computation verifying Forte contentment in connection with relaxation phenomena associated with thermoelastic dissipation in solids 10 p1555 A66-21197

Wave equations of thermoelasticity derived, based on wave equation of heat conduction 10 p1555 A66-21312

Model approximation method for induced elastic and thermal characteristics of materials reinforced by circular cylindrical fibers 11 p1720 A66-22231

Uncoupling thermoelastic field equations via simple transformation 12 p1962 A66-23992

Two-dimensional problem of thermoelasticity involving periodic thermal effects, using Parkus thermoelastic displacement potential 12 p1963 A66-24014

Variational formulation for linearly coupled magnetoelastoclasticity, examining electrodynamics of slow moving media, equations of motion and coupled thermoconductivity equation 12 p1963 A66-24028

Propagation modes of small disturbances in homogeneous incompressible magnetoelastic medium at Alfvén velocities 12 p1929 A66-24379

Theory, basic relations and general theorems for coupled thermoelasticity 13 p2199 A66-26377

Stress-strain state and temperature field near circular hole in thermoelastic plate, assuming stresses and strains propagate as waves 13 p2205 A66-26439

Solution of quasi-static problem in thermoelasticity for cylinder with time dependent boundary conditions obtained as series of Bessel functions and error functions 14 p2397 A66-27385

Estimate of energy dissipation in metals, using continuous distribution of oscillating dislocations joined with Zener thermoelastic effects 14 p2315 A66-27658

Motion equations for beam with lateral surface thermally insulated, including effects of shear deformation and rotatory inertia and thermoelastic coupling in heat conduction equation 14 p2399 A66-27661

Transient thermoelastic stresses under thermoelastic and sublimation ablation, noting temperature profile 14 p2402 A66-27970

Ablation effects on transient thermoelastic phenomenon 14 p2416 A66-28343

Thermoelasticity equations describing harmonic vibrations of medium solved via singular integral equation 14 p2408 A66-28390

Singular integral equations for thermoelasticity equations describing harmonic oscillations of medium, applied in boundary value problems 15 p2611 A66-29419

Green functions for heat source and concentrated force acting in unbounded thermoelastic space, applying perturbation method and Laplace transforms 17 p3018 A66-31836

Couple stress theory and virtual work principle applied to thermoelasticity of Cosserat medium, including energetic, uniqueness and reciprocity theorems 17 p3031 A66-33330

Variational and reciprocity theorems on thermoelastic distortions in homogeneous isotropic body 17 p3032 A66-33331

Reduction of plane thermoelastic problem of anisotropic body to determination of three analytical functions of complex variables, solving temperature stress distribution in anisotropic plate 18 p3258 A66-34702

Asymptotic solutions for large time obtained for predominantly mechanical mode of one-dimensional solution of coupled thermoelastic equations 19 p3400 A66-35853

Two-dimensional nonlinear equations of finite thermal oscillations of anisotropic thin elastic plates 20 p3673 A66-38278

Thermoelastic stresses in elastic strips and cylinders, computing numerical value along axes and centers of elements 21 p3826 A66-38590

Equilibrium phases of elastic materials occurring at uniform temperature and pressure and at zero deviatoric stress, examining rapid quenching and shearing effects 21 p3829 A66-38940

Thermoelastic wave equations in continuum mechanics model of laser-induced fracture in transparent media in terms of laser beam energy absorption 22 p3931 A66-40089

Plate and rod systems to test abrupt intensive heating effects, discussing dynamic stresses and bending moments via approximate equations 23 p4137 A66-41004

Linear thermoelastic theory of general thin shells, adopting Love-Kirchhoff assumptions and considering analogy between thermal field and fictitious body force vector 23 p4143 A66-41966

Static elastic and thermoelastic stability, discussing kinetic theory and physical interpretation of energy methods 24 p4287 A66-42271

THERMOELECTRIC CONVERSION SYSTEM

Evaluating temperature measuring methods for hot gas stream in thermal-to electric-energy converters 01 p0066 A66-10204

Molten-salt thermocell power output as affected by hot electrode and figure of merit 07 p0992 A66-18093

Silicon-germanium thermoelectric power-generating devices 07 p0994 A66-18318

Radioisotope-fueled thermoelectric generator for long life and reliability 07 p0994 A66-18319

Transient behavior of thermoelectric generator 07 p0994 A66-18320

Energetic conversion of solar radiation noting photovoltaic, thermoelastic, thermoelectric, thermionic and heliochemical generators 11 p1638 A66-22240

SNAP-15A radioisotope thermoelectric generator with power output of about 1 mw, design, development and potential uses 12 p1911 A66-23680

Solar power conversion unit consisting of thermoelectric generator, thermal storage

container and waste heat radiator [AIAA PAPER 64-728] 13 p2006 A66-26681

Radiant energy conversion using thermoelectric films in thermoelectrostatic cycle [AIAA PAPER 64-729] 13 p2006 A66-26682

SNAP-15A design and performance comparison with semiconductor or metal thermocouples, test results, safety, etc 15 p2429 A66-29601

Brayton cycle, Rankine cycle and thermoelectric systems considered as radioisotope secondary power systems for MOL [ASME PAPER 65-AV-18] 16 p2636 A66-30818

Design, fabrication and testing of flat plate solar thermoelectric generator for near Earth orbits, including comparison with photovoltaic cell 16 p2636 A66-31017

Design and laboratory tests of vapor-phase heat exchanger coupled to power generating bismuth telluride thermopile for waste heat dissipation 16 p2637 A66-31101

Flat plate solar thermoelectric generator panels for near-Earth orbits, comparing design, fabrication and testing to photovoltaic cells 16 p2637 A66-31101

Transistor inverter with 80 percent efficiency for 400 mv source voltage, noting simplicity of design 17 p2848 A66-31811

Thermoelectric solar energy converter, discussing thermoelectric material properties and American radioisotope generators 17 p2848 A66-32851

Book on direct energy conversion covering thermoelectric, photovoltaic, thermionic and MHD generators and fuel cell 18 p3054 A66-34161

Bismuth telluride alloy solar thermoelectric flat plate generators applied to auxiliary power systems for exploratory mission toward Sun 20 p3497 A66-37161

Calculation of optimum temperature of junction of solar thermoelectric generator and optimum concentration of solar radiation in relation to efficiency as a function of concentration of solar radiation 20 p3502 A66-37731

Unmanned lunar roving vehicle power requirements, comparing radioisotope thermoelectric generator and solar cell/battery systems 23 p4017 A66-41101

SNAP radioisotopic thermoelectric generator fabrication and application 23 p4089 A66-41601

Solar hybrid systems /photovoltaic-thermoelectric and photovoltaic-thermionic analyzed, determining potential for mission close to Sun 23 p4019 A66-41741

Nuclear reactor-thermoelectric power converter for unmanned satellite application 23 p4020 A66-41741

Thermally-Regenerative Alloy Cell /TRAC system using sodium amalgam reaction with mercury as closed cycle thermal-electric conversion system 23 p4023 A66-41761

Fabrication of thermoelectric elements by arc plasma spraying 24 p4216 A66-42111

Digital computer program for analysis and weight optimization of thermoelectric generators for space applications 24 p4161 A66-42111

Integrated thermoelectric life and performance testing system including environmental chambers, automatic control systems and central data scanning and recording system 24 p4190 A66-42121

THERMOELECTRIC COOLING

Temperature effect on amplitude of cochlear microphonic and on latency action potential of auditory nerve 06 p0812 A66-16401

Thermoelectric cooling of IR detectors examining thermistor bolometers and photoconductive detectors 08 p1221 A66-18681

Drinking water reclamation from urine by thermoelectrics, including operational theory and data for working models 08 p1176 A66-18731

Seebeck and Thomson coefficients and variable resistivity effects on thermoelectric heat pump performance 09 p1333 A66-20971

THERMOELECTRIC MATERIAL

Thermal and electric properties of indium antimonide/indium telluride alloys as function of composition and annealing temperature 01 p0116 A66-10181

Thermal and electrical properties of

- bismuth antimony telluride/tin telluride
 as function of composition 01 p0116 A66-10190
 variation in thermoelectromotive force and
 magnetoresistance in quantizing magnetic
 field in indium antimonide semiconductor,
 considering electron spin and conduction
 and nonparabolicity 01 p0124 A66-10770
 quantum oscillation associated with
 quantization of electron energy spectrum of
 p-type indium antimonide 02 p0274 A66-11735
 thermocouple and inertialess temperature
 sensor for velocity fluctuations in gas
 flow 04 p0519 A66-13657
 electric conductivity and thermoelectric
 power measurements in Er-Se system
 dilutes degenerate semiconductors 04 p0562 A66-13736
 temperature dependent component in low
 temperature thermoelectric power of doped
 germanium observed in liquid helium
 region, noting negative magnetoresistance 04 p0570 A66-14369
 anomalies in low temperature properties
 of noble metal alloys such as thermoelectric
 power and nonmonotonic behavior of
 resistivity with temperature 08 p1274 A66-19362
 single crystal p-type zinc antimonide in
 thermoelectric, thermoconductivity and
 electronic transport measurements 08 p1275 A66-19365
 thermal conductivity and emf of gallium
 antimonide at low temperatures, showing
 phonon drag effect 08 p1278 A66-19626
 tin telluride electric properties analysis
 for verifying semiconductor model with two
 valence bands in connection with Hall effect
 dependence on temperature 09 p1412 A66-19993
 phonon drag in p-GaAs, graphing
 temperature dependence of thermoelectric
 power 09 p1426 A66-20196
 variation in thermoelectromotive force and
 magnetoresistance in quantizing magnetic
 field in indium antimonide semiconductor,
 considering electron spin and conduction
 and nonparabolicity 11 p1749 A66-22281
 electrical resistivity, thermoelectric power
 and thermal conductivity of pseudoternary
 alloys in temperature range of 77 to 300
 degrees K measured 11 p1750 A66-22697
 correction to theory of Harman method of
 determining thermoelectric figure of
 merit 12 p1928 A66-23963
 Ettingshausen-Nernst effects in InAs-InP
 solid solutions, discussing differential
 thermal emf, scattering at acoustical and
 thermal oscillations of lattice, ionic
 impurities, etc 12 p1930 A66-24685
 materials for producing electric energy
 from heat by direct conversion 13 p1997 A66-25116
 electrical resistance and thermoelectric
 power of Ni-Cu solid solutions near Curie
 point 13 p2162 A66-25407
 zinc-antimonide with high and constant
 thermoelectric figure of merit obtained by
 solid phase diffusion 13 p2163 A66-25453
 pure selenium conductivity, thermal emf
 and Hall effect 15 p2563 A66-28737
 thermoelectric power in niobium-zirconium
 alloys noting phonon drag peak attenuation
 due to Zr solute addition at very low
 temperatures 16 p2780 A66-31156
 electrical conductivity and thermoelectric
 measurements of intermediate phases in
 rubidium tellurium system 17 p2979 A66-32631
 thermoelectric solar energy converters,
 discussing thermoelectric material properties
 and American radioisotope generators 17 p2848 A66-32855
 thermoelectric power and electric
 resistivity measurements of n-type silver
 telluride at melting point and in liquid
 state 17 p2981 A66-32955
 thermal conductivity and emf of gallium
 arsenide at low temperatures, showing
 phonon drag effect 17 p2984 A66-33140
 phonon-drag thermopower variation in
 dilute copper alloys assuming Rayleigh law
 for phonon scattering 17 p2984 A66-33152
 fast neutron effect on conductivity and
 thermoelectric power of germanium, noting
 decrease of conductivity due to phonon
 scattering 18 p3157 A66-34626
 thermoelectric properties of solid solution
 of germanium telluride in copper antimony
 telluride 23 p4114 A66-41572
 thermoelectric power and electric
 resistivity of copper-gold alloy doped with
 3d transition metals as function of
 temperature and atomic number of
 impurity 23 p4114 A66-41712
 bond degradation and diffusion of braze
 and shoe constituents in lead telluride
 thermoelectric elements 24 p4247 A66-42107
 evaporation rates of lead telluride and
 lead tin telluride in pressed and sintered
 thermoelement form 24 p4247 A66-42108
 neutron activation analysis of sodium
 dopant concentrations and distributions in
 lead telluride thermoelectric materials
 during couple operation in vacuum and
 argon atmosphere 24 p4247 A66-42109
 thermoconductivity of small thermoelectric
 samples measured, using disk-shaped
 resistance heater 24 p4248 A66-42110
 thermoelectric material testing and
 selection for high-performance generator,
 noting lead telluride 24 p4160 A66-42112
 manganese-silicon p-type thermoelectric
 material for intermediate temperature
 application 24 p4248 A66-42113
 maximum figure of merit for broadband
 semiconductors, using theory of mobility
 due to acoustic mode and optical mode
 scattering 24 p4248 A66-42114
 silicon-germanium lead-telluride
 segmenting for improved thermoelectric
 efficiency, noting sequential fabrication
 process difficulties 24 p4248 A66-42115
 thermal insulation and structural support
 for thermoelectric devices, discussing
 fabrication of diffusion bonded structures in
 conjunction with material selection 24 p4293 A66-42121
 electron microprobe for studying
 thermoelectric materials and heat-resistant
 steel for gas-turbine blading 24 p4211 A66-42507
 thermoelectric power measurement
 method for thin bismuth lamella, obtaining
 Peltier and Thomson coefficients 24 p4258 A66-43010
THERMOELECTRICITY
SA SEEBECK EFFECT
SA THERMOCOUPLE
 increase in collector voltage at constant
 power dissipation will increase junction
 temperature and give apparent effect of
 higher thermal resistance 04 p0500 A66-14102
 thermoelectric emf related to entropy in
 quantizing magnetic field in semiconductor
 with polyellipsoidal conduction band 04 p0564 A66-14252
 thermal-electrical systems for showing
 effect of variations in integrated circuit
 geometry and packaging on thermal
 response characteristics of simple
 structure 06 p0841 A66-15972
 local laser heating of cathode for electron
 extraction from plasmoid 06 p0889 A66-16149
 Hall coefficient, electric resistance and
 thermoelectric power in indium-rich solid
 solutions measured at various pressures and
 at 110 degrees C 06 p0922 A66-16172
 energetics/engineering developments in
 energy conversion/ - ASME International
 Conference, University of Rochester, August
 1965 07 p0992 A66-18308
 electrical conductivity, Hall coefficient and
 thermoelectric power of tellurium
 calculated, using models for anomalous sign
 reversal of Hall coefficient 08 p1271 A66-19240
 random nonuniformities effect on
 measurements of thermal emf and Nernst
 coefficient in strong magnetic
 field 09 p1412 A66-19982
 low temperature study of resistivity and
 thermoelectric power variations of silver-
 palladium alloys as function of
 concentration, caused by electron
 diffusion 09 p1425 A66-20079
 thermoelectric power of actual
 ferromagnetic metals over wide temperature
 range, examining effect of alloying and
 solute magnetic ions 09 p1425 A66-20080
 growth and propagation of infinitesimal
 space charge waves under differential
 negative resistance and inhibition of dipole
 waves and domains in gallium arsenide,
 estimating thermoelectric effects 10 p1584 A66-22069
 Green function random phase decoupling
 scheme investigation of magnetic impurities
 effect on thermal properties of cubic spin-
 1/2 Helsenberg 11 p1758 A66-23394
 ferromagnet 11 p1758 A66-23394
 resistivity and thermoelectric power of
 copper telluride at various temperatures,
 finding that it retains semiconducting
 properties in liquid state 13 p2162 A66-25411
 hot carrier microwave detector based on
 thermoelectric effect of warm carriers in
 bulk semiconductor and assuming Maxwell-
 Boltzmann distribution for heated
 carriers 15 p2461 A66-29014
 local laser heating of cathode for electron
 extraction from plasmoid 15 p2519 A66-29879
 voltage output characteristics of axial
 gradient heat flux transducers employing
 thermoelectric temperature difference
 sensing 16 p2702 A66-30426
 thermal emf of metallic liquid couples
 measured as function of thermal difference
 between junctions and alloys composition,
 noting correlation between thermodynamic
 and thermoelectric properties of
 alloys 16 p2781 A66-31410
 longitudinal Faraday emf, thermoelectric
 and Hall effects on channel flow of ionized
 gas 17 p2972 A66-32868
 gold and silver doping effect on Hall
 effect, electroconductivity thermal emf and
 conductivity of CdSb 17 p2984 A66-33145
 quantum oscillations in magnetoresistance,
 Hall coefficient and thermoelectric power in
 strong transverse and longitudinal magnetic
 fields for n-InAs polycrystals at liquid
 helium temperature 19 p3438 A66-35479
 thermoelectric device for semiconductor
 analysis, determining whether material is of
 n-or p-type conductivity 20 p3560 A66-37586
 thermoelectric and thermomagnetic
 properties of semiconductors applied to
 refrigeration, discussing Peltier and
 Ettingshausen effects 21 p3798 A66-38767
 kinetic energy causing anomalous increase
 in thermoelectric power in semiconducting
 p-type iron-chromium sulfide near Curie
 temperature 21 p3803 A66-39261
 IEEE and AIAA Thermoelectric Specialists
 Conference, Washington, D.C., May
 1966 24 p4160 A66-42106
 anisotropic thermoelectric power in
 semiconductors as result of combined
 phonon and impurity scattering or in
 presence of carrier with anisotropic
 effective mass 24 p4252 A66-42352
 electrical properties of barium plumbate
 noting conductivity, Hall field,
 thermoelectromotive force, magnetization,
 etc 24 p4253 A66-42382
 Hall coefficient, electrical conductivity and
 thermoelectric power of GaSb-Ga₂Te₃ solid
 solutions as functions of composition and
 temperature 24 p4254 A66-42425
THERMOGRAM
S BATHYTHERMOGRAPH
THERMOGRAVIMETRY
 Chebyshev approximation for function in
 equation of thermogravimetric data
 plot 07 p1149 A66-17470
 charge carrier mobility by combining
 conductance with thermogravimetric
 measurements 24 p4250 A66-42295
THERMOLUMINESCENCE
 minerals responsible for
 thermoluminescence of meteorites identified
 and radiation age derived 19 p3465 A66-36386
THERMOMAGNETIC CONVERSION SYSTEM
 operating characteristics equations of
 energy converters constructed of anisotropic
 materials and subjected to physically
 meaningful constraints 19 p3281 A66-36292
THERMOMAGNETISM
 thermomagnetic current density in
 semiconductors and metals with temperature
 gradient 01 p0125 A66-10779
 magnetophonon fluctuation of thermal emf
 of n-InSb in longitudinal magnetic
 field 09 p1412 A66-19985
 magnetothermal effects in type II niobium
 rod superconductors in parallel and
 perpendicular magnetic field 09 p1421 A66-20056
 thermomagnetic current density in
 semiconductors and metals with temperature
 gradient 11 p1749 A66-22291
 galvanomagnetic and thermomagnetic
 effects in mixed state of type II
 superconductor 16 p2771 A66-30197

Geomagnetic field intensity in India over past 4,000 years determined from ancient remanent magnetization in bricks, pots and potsherds 18 p3108 A66-34716

Thermoelectric and thermomagnetic properties of semiconductors applied to refrigeration, discussing Peltier and Ettingshausen effects 21 p3798 A66-38767

Nonlinear thermomagnetic wave theory and amplification in case of plasma instability 21 p3792 A66-39310

THERMOMECHANICS

Thermomechanical treatment and temperature on diffusion mobility and heat resistance of titanium alloys 03 p0384 A66-13170

Ductility in polycrystalline single phase ceramics, noting behavior at room and high temperature of single crystal structure, dislocation, etc 07 p1054 A66-18498

Thermomechanical response studies of solid propellants subjected to cyclic and random loading [AIAA PAPER 65-160] 10 p1590 A66-21776

Mechanical properties of structural steels subjected to thermomechanical strengthening treatment 13 p2109 A66-25885

Seizing effect at interfaces SAP-SAP and Sap-Al, noting optimum thermomechanical conditions 14 p2303 A66-28196

Effect of high temperature thermomechanical condition on structure and phase composition of titanium alloys, noting deformation role in hardening 15 p2522 A66-29184

Thermomechanical instability in viscoelastic structures subject to prescribed HF alternating loads 16 p2820 A66-31277

THERMOMETER

SA BOLOMETER

SA RESISTANCE THERMOMETER

Cryogenic problems in temperature and level sensing discussing thermocouples, resistance sensors, vapor and gas bulb thermometers and level gauges and probes 01 p0070 A66-10955

Quartz thermometer measuring temperatures automatically and directly on digital display, using quartz wafer with linear coefficient cut 03 p0367 A66-12373

Thermometer for continuous temperature measurement of dielectrics and semiconductors in electromagnetic HF fields 19 p3358 A66-35836

Sonic anemometer-thermometer for general use 19 p3360 A66-36055

Temperature measurement with thermodynamic thermometers 21 p3736 A66-38814

Flow velocity effect on thermometer reading and consequences for measuring thermodynamic efficiency of hydraulic machines 21 p3737 A66-38935

Frequency distortions correction for pulsation amplifier of thermoelement 21 p3739 A66-39331

THERMOMETRY

SA PYROMETRY

SA TEMPERATURE MEASUREMENT

Thermometric characteristics of gallium arsenide and germanium diodes 04 p0495 A66-13894

Thermometric characteristics of gallium arsenide and germanium diodes 15 p2467 A66-29708

Limitations imposed on upper atmospheric sonic thermometry by lowering of density with increasing altitude 21 p3741 A66-39428

THERMONUCLEAR ENERGY

Controlled thermonuclear fusion technology including production, heating and containment of extreme temperature plasmas 06 p0917 A66-16394

Thermionic conversion research, discussing direct conversion of nuclear produced heat into electricity, converter performance, lifetime, etc 18 p3053 A66-34055

Controlled thermonuclear fusion program noting nuclear reactions, plasma production and confinement, etc 24 p4247 A66-43121

THERMONUCLEAR EQUIPMENT

Tokamak-3 experimental thermonuclear device for analysis of toroidal quasi-stationary discharge in strong longitudinal magnetic field 13 p2146 A66-25737

THERMONUCLEAR EXPLOSION

Radioactivity of Cosmos III satellite after U.S. thermonuclear explosion over Johnston

Island 11 p1764 A66-23053

Macroparticle accelerators and possible application in triggering thermonuclear explosions 15 p2552 A66-29333

THERMONUCLEAR PHENOMENON

Plasma gun and injection techniques for establishing hot field-free cusped plasmas that are MHD stable in equilibrium configuration 19 p3425 A66-36564

THERMONUCLEAR REACTION

SA FUSION

Earth atmosphere effect on determining presence of CH molecule in Martian atmosphere, origin of quasars and stellar thermonuclear reactions 03 p0428 A66-12990

Solar thermonuclear process, radiation phenomena, structural measurements, observations and properties 05 p0767 A66-15757

Thermonuclear reaction rates in medium and heavy nuclei determined from statistical properties 09 p1404 A66-20368

Anomalous escape of ions from plasma contained in magnetic mirror into loss cone studied for evaluation feasibility of controlled thermonuclear reaction in magnetic mirror trap 19 p3415 A66-36517

Noncollision ergodic shock wave propagating in plasma situated in magnetic field and thermal oscillation effect on thermonuclear kinetics 21 p3787 A66-39052

Superconductor solenoid application to laser devices and development of magnetic plasma traps for research in controlled thermonuclear reactions 23 p4115 A66-41743

THERMOPHILIC PLANT

Optimum temperature conditions for cultivating thermophilic strains of *Chlorella* under varying radiant flux wave intensities 16 p2644 A66-31589

THERMOPHYSICAL PROPERTY

Potential parameters used to calculate thermophysical characteristics of some hydrocarbons at high temperatures 03 p0330 A66-12826

Thermophysical characteristics of film thermoelements determined by method utilizing Borel theorem 03 p0445 A66-12837

Uncertainties in thermophysical properties of char-forming ablatives in intense convective and radiative heat transfer environments and effect on mathematical and physical models [AIAA PAPER 65-639] 03 p0445 A66-13010

Temperature dependence of thermal diffusivity and thermoconductivity of symmetrical body 11 p1786 A66-23062

Specific heat and thermal conductivity of metals at cryogenic temperatures 19 p3381 A66-35849

Potential parameters used to calculate thermophysical characteristics of some hydrocarbons at high temperatures 19 p3295 A66-36768

Electrical and thermal conductivity and integral degree of blackness of tantalum at temperatures above 1000 degrees C 20 p3582 A66-36977

THERMOPHYSICS

Thermostimulated induced electron emission from samples cut from laser ruby crystals detected with open point counter 08 p1232 A66-18609

THERMOPLASTIC

Stress crazing mechanism for amorphous thermoplastics 13 p2112 A66-25305

Thermoplastics behavior under cyclic stress, noting failure under crack propagation or temperature due to damping capacity 13 p2112 A66-25306

Resin compacts prepared by high temperature compression of hardened resins mixed with unhardened resins, noting strength, thermal behavior and physicochemical properties 13 p2113 A66-25911

Phase hologram generation by means of thermoplastic xerography 13 p2081 A66-26001

Stress relaxation, stress-strain curve and time-temperature-strain rate equivalence for thermoplastic and viscoelastic polymers 13 p2114 A66-26109

Thermoplastic surface response to intense surface heating exposure, examining linear pyrolysis of polymethyl methacrylate [WSCI 66-24] 18 p3263 A66-34418

THERMOPLASTICITY

Wave propagation in thermoplastic media,

discussing dynamic behavior, formation of wave fronts, velocity, etc 24 p4284 A66-42121

THERMORECEPTOR

Thermophysical characteristics of film thermoelements determined by method utilizing Borel theorem 03 p0445 A66-12837

THERMOREGULATION

S BODY TEMPERATURE REGULATION

THERMOSETTING

High temperature resin binders, discussing thermosetting polymer properties, function, temperature resistivity and application 06 p0900 A66-16221

THERMOSPHERE

Atomic hydrogen reaction with HO-2 as source of hydrogen molecules in lower thermosphere 02 p0221 A66-11500

Physics of lower thermosphere studied by using conditions applying to oxygen atmosphere and oxygen-nitrogen atmosphere 05 p0671 A66-15011

Increased diurnal amplitude in density of thermosphere between 200 and 300 km for decreasing solar activity 05 p0671 A66-15011

Air motions and physical factors affecting general circulation in mesosphere and lower thermosphere 05 p0711 A66-15022

Atmospheric structure in lower thermosphere, examining grenade clouds to determine density 09 p1375 A66-20899

Thermospheric wind velocities computed from satellite orbital data 09 p1376 A66-20999

Harris and Priester model used to compute amplitude of diurnally varying component of horizontal pressure acceleration, showing increase with altitude 10 p1529 A66-21115

Distribution and variation of atmospheric density over thermosphere, including aurora region, noting wind motion and high altitude circulation 14 p2382 A66-27611

Composition and temperature variation of thermosphere, using mass spectrometry and optical methods 14 p2285 A66-27622

Seasonal-latitudinal variations in lower thermospheric density, temperature and composition 15 p2490 A66-29882

Average rate of eddy mixing obtained from some eddy transport problems in thermosphere, noting molecular diffusion 15 p2490 A66-29944

Aerobee-borne magnetic mass spectrometric measurements of neutral composition of lower thermosphere 15 p2490 A66-29944

Lower thermospheric turbulence investigated for scale size, turbulent velocity spectra and energy dissipation rate 15 p2491 A66-29954

Atmosphere models for seasonal and latitudinal variation in thermosphere as function of solar flux and geomagnetic index 15 p2492 A66-30031

Atomic-to-molecular oxygen concentrations ratio values in upper atmosphere used to determine strength of turbulent mixing in atmosphere, noting definition of turbopause height 16 p2694 A66-30704

Atmospheric circulation and eddy diffusion based on thermal structure, oxygen transport continuity and sodium trail spreading in thermosphere 19 p3347 A66-35644

Nitrogen temperature and density in thermosphere region from thermosphere probe data, examining inconsistency with satellite drag estimates 19 p3349 A66-36347

Physical structure of upper atmosphere given by pressure and density scale heights and mean molecular mass due to diffusion 19 p3349 A66-36347

Lyman alpha airglow observations indicate diurnal variation of atomic hydrogen in thermosphere and exosphere with abundance change with solar activity 19 p3349 A66-36347

Thermospheric energetics characterized as series of superposed and interconnected atmospheric heat engines and refrigerators 22 p3913 A66-40531

THERMOSTABILITY

Thermal homeostasis under hypoxia in man, discussing thermal stress adaptation and physiological responses in oxygen deficient environment 04 p0465 A66-14061

Temperature autostabilization in barium and strontium titanate solid solutions during dielectric heating 06 p0927 A66-16722

Thermal conditions in boiling liquids

- cluding container wall damage-flux density relationship, stable and unstable boiling in bubble evaporation region and film vaporization 07 p1154 A66-18066
- Time dependence of forward overload current passing through silicon rectifier, considering thermostability loss, current characteristics and p-n junction temperatures 08 p1195 A66-19314
- Fuel requirements for high altitude high-number aircraft, noting thermal stability, autooxidation, self-ignition, specific heat, etc 10 p1590 A66-21400
- Thermal stability of endothermic hydrocarbon heat-sink fuels, noting application, flying in 10 Mach speed range 11 p1759 A66-23124
- Nonlinear Benard convection 12 p1976 A66-23549
- High temperature equilibria among vapor species produced by fluorination of beryllium in Knudsen effusion cell, using mass spectrometer, deriving dissociation energy 12 p1811 A66-23621
- Syntheses of three macromolecular fluorocarbons, studying structure and configuration, noting high thermal stability and chemical inertness 12 p1812 A66-23633
- Behavior of pyrotechnic devices and explosives studied when heated to 145 degrees C for 36 hours /three separate times/ for development of dry-heat sterilizable equipment for space vehicles 13 p2014 A66-25288
- Evaluation of polyimide impregnated resins for application as heat shield binder when combined with silica and carbon fibers, noting thermostability characteristics 13 p2112 A66-25309
- Scintillators stable at 110 degrees C from styrene/divinyl benzene copolymers and additions of phosphors, establishing optimum thermal conditions for block polymerization and determining luminescence field 13 p2077 A66-25326
- Temperature stable high power C band digital many-phased-array-radar phase shifter 13 p2035 A66-25502
- Black body radiation law deduced from stochastic electrodynamics 14 p2414 A66-28173
- Thermal stratification and thermostability effects on turbulent diffusion approximated by Swinbank exponential wind profile 15 p2530 A66-28603
- Temperatures, Lorentzian widths and drift velocities of excited neutral and ionic species in argon-ion laser, noting thermal equilibrium achievement 15 p2512 A66-28695
- Excitation temperature of three states of atomic oxygen determined to be 2000 degrees K from intensity ratio of three atomic oxygen 1300 angstrom triplet lines in dayglow 15 p2484 A66-28907
- Exchange principle for thermal stability of completely confined fluid in arbitrary region with rigid bounding surface 15 p2553 A66-29685
- Thermostability and control of airborne electronic equipment in closed-loop forced-air cooling systems 16 p2663 A66-31325
- Dielectric properties and thermostability of low-discharge thin organic polymer films for electronic application 16 p2783 A66-31429
- Differential thermal analysis for study of thermal decomposition of organic lubricant system 17 p2928 A66-31899
- Heat transfer and stress wave evolution prior to ablation and thermal equilibrium in exposure of solid and liquid materials to laser sources 17 p2979 A66-32638
- Analytic thermal compensation technique eliminating thermal stabilization time, applied to inertial navigation systems operating in military environment 19 p3397 A66-35518
- Planetary nebula condensation, examining stability of thermal equilibrium 20 p3649 A66-37326
- Thermostability of germanium power transistors, noting collector leakage current 21 p3709 A66-38673
- Applications for new class of materials termed oxide-dispersion strengthened materials offering stability at high temperatures and high thermal and electrical conductivity 22 p3935 A66-40526
- Equilibrium temperature and heat transfer of sphere in supersonic flow of rarefied air 23 p4010 A66-41733
- Free and forced vibrations, static and dynamic stability and air elasticity of orthotropic shells and plates in time-alternating temperature field 23 p4142 A66-41955
- Behavior of pyrotechnic devices and explosives studied when heated to 145 degrees C for 36 hours /three separate times/ for development of dry heat sterilizable equipment for space vehicles 24 p4260 A66-42784
- Temperature stabilization of transistorized circuits calculated via equivalent circuit stability characteristics 24 p4185 A66-42892
- THERMOSTAT**
SA CRYOSTAT
Statistical evolution of physical system in contact with thermostat, defining matrix associated with relaxation of system 16 p2754 A66-31206
- THERMOSTRUCTURE**
Manned lifting body sizing, discussing system requirements, constraints and relationship to parametric vehicle design data [AIAA PAPER 66-47] 06 p0958 A66-16259
- Optimum structural and thermostructural design theory for advanced aerospace vehicles 08 p1306 A66-18805
- Earth atmosphere layers described according to thermal structure 09 p1371 A66-20269
- THERMOSYPHON**
Condensation in variable acceleration field, especially linear variation occurring in constant cross section rotating thermosyphon [ASME PAPER 64-WA/GTP-2] 02 p0304 A66-11764
- THERMOVISCOELASTICITY**
Residual stress distributions in thermoviscoelastic materials due to surface cooling [ASME PAPER 65-APMW-9] 04 p0592 A66-14215
- Regularity of thermoviscoelastic deformation in polymer binders for glass-fiber-reinforced plastics 08 p1313 A66-19441
- Residual stress distributions in thermoviscoelastic materials due to surface cooling [ASME PAPER 65-APMW-9] 10 p1615 A66-21482
- Thermoviscoelastic stresses in linear viscoelastic materials subjected to slowly moving temperature fields 17 p3024 A66-32358
- Stress-strain temperature equations and energy equation with heat conduction for isotropic nonlinear viscoelastic materials, using irreversible thermodynamics 24 p4289 A66-42280
- THETA PINCH**
Electron and ion temperatures determination for helium plasma produced by theta-pinch with azimuthal magnetic field, using Doppler broadening and X-ray absorption 03 p0396 A66-12292
- Temperature in toroidal theta pinch discharge with image converter camera 04 p0553 A66-14284
- Hard X-ray emission during few half-cycles of theta pinch discharge before breakdown explained by bremsstrahlung of free accelerated electrons colliding with tube wall 04 p0555 A66-14326
- Local electron temperature and electron density in theta pinch measured by means of scattering of laser beam 04 p0555 A66-14334
- Finite discharge-coil length effect on axial behavior of theta pinch plasma column determined from time and space-resolved electron densities 04 p0558 A66-14496
- Ion motions in theta pinch discharge studies from time-resolved profile measurements of impurity lines 06 p0921 A66-17050
- E-and H-filaments formed in space periodic structure of high speed high current plasma, examining stability relative to theta-and z-pinch 07 p1085 A66-17644
- Doppler broadened Cv spectral line from theta pinch and microscopic plasma velocities by reducing axial motion effect 07 p1086 A66-17654
- Breakdown of theta pinch in helium at high initial densities without preionization 09 p1408 A66-20422
- Dense high-temperature plasma produced by 30-kjoule theta pinch examined by IR maser-excited coupled resonator system [AIAA PAPER 66-151] 10 p1559 A66-21420
- Local magnetic field, ion density flow and electric field in plasma measured downstream of theta-pinch accelerator in presence of uniform guide field [AIAA PAPER 66-155] 10 p1565 A66-21684
- Rapid electron-density oscillations on axis of imploding plasma annulus with radial oscillations 13 p2137 A66-25055
- Laser pumping by intense noble gas discharge in zeta-pinch geometry 13 p2092 A66-25995
- Spectroscopic analysis of helium plasma shock waves, produced by annular discharge type conical coil shock tube 14 p2341 A66-27310
- New inner-shell resonance lines in highly ionized sulfur and chlorine from high-energy theta-pinch plasma light source 14 p2338 A66-28130
- Transfer efficiency of theta pinch in converting capacitively stored electrical energy to plasma energy measured, using calorimeter technique 16 p2761 A66-31090
- Hexapole magnetic field for guiding accelerated plasma injected from inductive conical theta pinch gun 17 p2962 A66-31824
- Plasma injected into magnetic trap with aid of conical theta pinch investigated to determine ion and electron energy, lifetime and charged particle concentration variation 17 p2969 A66-32546
- Theta pinch discharge study of four times ionized nitrogen /N V/ spectrum 18 p3136 A66-33628
- Three-fluid hydromagnetic computer code for studying dynamic phase of small theta-pinch, noting effects of impurity ionization and radiation losses 18 p3148 A66-34911
- Deuterium plasma containment and stability in theta pinch configuration using megajoule capacitor banks, studying density, temperature and radial distribution 19 p3413 A66-36505
- Transient axial flow of plasma to ends of coils in causing loss in theta pinch 19 p3413 A66-36506
- Stability, heating and end loss of 3.5-MJ theta pinch measured by various methods 19 p3413 A66-36507
- Isar I, fast megajoule theta pinch experiment with extremely high compression magnetic fields 19 p3414 A66-36508
- Plasma confinement, heating and losses in theta pinch experiment /Pharos/ with extended current pulse 19 p3414 A66-36509
- Hydromagnetic disturbances during radial implosion phase of preionized theta pinch /Cariddi/ 19 p3414 A66-36510
- Stable and unstable behavior of preheated hydrogen plasma in linear and cusped theta pinches 19 p3414 A66-36511
- Doppler shift measurements to investigate plasma rotation in theta pinch 19 p3414 A66-36512
- Toroidal theta pinch discharge with superimposed hexapole magnetic field provides stable toroidal high-beta equilibrium configuration 19 p3414 A66-36513
- Plasma gun and injection techniques for establishing hot field-free cusped plasmas that are MHD stable in equilibrium configuration 19 p3425 A66-36564
- Plasma stability increase in Zeta discharge as affected by such initial conditions as pressure and theta pinch parameter 19 p3429 A66-36583
- Implosion of fast nonpreionized theta pinch studied, using first and second harmonic of ruby laser light 20 p3609 A66-37638
- Diffusion of antiparallel bias magnetic field during initial stages of theta pinch explained as loss of trapped flux 21 p3791 A66-39179
- End loss mechanism of slow theta pinch plasma analyzed, using mirror coil in which plasma did not drift to wall 21 p3795 A66-39582
- Theta pinch discharge as spectroscopic light source in highly ionized gas spectroscopy 24 p4241 A66-42393

Ruby laser light scattering measurements of electron and ion temperatures of hydrogen and deuterium plasmas produced in theta pinch devices 24 p4222 A66-42558
Spectrum of three-times ionized nitrogen analyzed in wavelength region 300-8000 angstroms, using theta pinch discharge, connecting singlets and triplets 24 p4240 A66-43104

THICKNESS

S AIRFOIL THICKNESS
S FILM THICKNESS
S OPTICAL THICKNESS
S TARGET THICKNESS

THICKNESS RATIO

Pressure distribution over slender delta wing, considering thickness effect 12 p1796 A66-23606
Nonuniform thickness of dielectric films effect on capacitance and tunnel currents of elements with metal-insulator-metal structure 24 p4254 A66-42387

THIN AIRFOIL

Oscillating thin airfoil theory, using Oseen method for classical potential solution of flow about thin airfoil 04 p0456 A66-14476
Loading of thin ring airfoil in unbounded spherical source flow field, calculating vortex distribution, strength, etc [ASME PAPER 66-FE-3] 17 p2914 A66-33259
Entry problem of thin symmetric wedge impinging normally on free surface of compressible inviscid liquid, neglecting gravitational effects 20 p3547 A66-37981
Shear flow generated in rotational flow, noting honeycomb structure satisfactory in rotational flow about thin airfoils 21 p3724 A66-38735

THIN BODY

Minimization of radar cross section of thin cylinder by central loading, calculating backscatter field 05 p0632 A66-14842
Axial thermal gradient stresses in finite length thin cylinders, evaluating distinct boundary conditions [ASME PAPER 65-WA/MET-17] 05 p0780 A66-15682
Unperturbed highly supersonic flow past thin profiles and bodies of revolution with generatrix equations, using law of plane cross sections for solution 09 p1328 A66-20765
Extended physical optics methods for calculating nose-on echo area of axisymmetric thin bodies having sharp apices 10 p1500 A66-21617
Thin body temperature during periodic variations of heat transfer coefficient and ambient medium 12 p1978 A66-24370
Potential stabilized two-component supersonic flow of thin body and surface form for given pressure distribution and component separation 13 p1994 A66-26765
Stress distribution in thin circular annular disk, rotating with variable angular velocity, having transient shearing stress applied on outer edge 15 p2510 A66-29732
Approximation solution to plane bend problem in thin rod of variable rigidity 18 p3254 A66-33933
Second approximation of transonic theory gas laws for thin bodies 20 p3493 A66-37988
Plane stressed state of nonlinear plate with opening reinforced by thin elastic rod in case of small deviations from Hooke law 22 p3991 A66-40152
Velocity of sound vibration in partially plated piezoelectric ceramics differs in plated region and unplated region due to piezoelectric effect 22 p3877 A66-40186

THIN FILM

SA MAGNETIC FILM
SA PLATING
Microelectronic integrated circuits and thin films applied to inertial navigation systems to achieve cost reduction 01 p0034 A66-10011
Multiple scattering of medium velocity electrons in thin films of Ni, Ge, Ag and Au 01 p0116 A66-10196
Growth of single crystal gold films in ultrahigh vacuum on clean vacuum-cleaved salt surfaces 01 p0117 A66-10242
Thin metal film growth under applied electric field 01 p0118 A66-10246
Luminous phenomena and electron emission discontinuity in aluminum thin film

tunnel diodes 01 p0119 A66-10392
Face-down ultrasonic bonding, assembly technique to bond integrated circuit chips to thin films 01 p0037 A66-10501
Isothermal cross section of phase diagram of Zn-Cd-S and sulfide 01 p0125 A66-10781
Disruption of thin liquid film flowing over heating surface, investigating boiling, evaporation and thermocapillary effects 01 p0165 A66-10906
Radiative recombination in thin film structures observing characteristic of aluminum 01 p0127 A66-11089
Thin film epitaxial single crystal silicon on insulating substrate sapphire and advantages of these microelectronic devices 01 p0048 A66-11145
Single crystal silicon films on sapphire in terms of materials properties and impact on thin film semiconductor microelectronics 01 p0048 A66-11146
Fabrication of thin single crystal silicon films on sapphire and integrated circuit process technology 01 p0048 A66-11147
Thin film silicon on sapphire diode matrix fixed memory of extremely high density and very low capacitance 01 p0049 A66-11149
Stoichiometric thin films of AlSb prepared by coevaporation of elements onto glass substrates held at 550 degrees C 02 p0270 A66-11436
Zero-bias capacitance of thin intrinsic semiconductor film sandwiched between identical electron-injecting contacts compared with value for noninjecting contacts 02 p0270 A66-11437
Cubic beta-silicon carbide films grown on single crystal silicon substrates by heating in presence of graphite in argon atmosphere 02 p0275 A66-11871
Applications of microelectronics - IEE Symposium, Southampton University, England, September 1965 02 p0201 A66-11914
Recent trends in microelectronics manufacturing techniques emphasizing production capabilities 02 p0202 A66-11915
Microelectronic digital chronometer and frequency meter, noting design details and thin film circuits 02 p0231 A66-11916
Digital IF amplifier for thin film radar receiver 02 p0202 A66-11917
Thin film integrated wideband amplifier with details on circuit, construction, performance and outline of design process 02 p0202 A66-11918
Simple active filters using tantalum thin film technology 02 p0202 A66-11919
Feasibility of guard channel receiver, transmitter and marker receiver system by thin film circuit techniques, noting reliability with minimum servicing 02 p0203 A66-11920
Liquid cooling of thin film resistors including use of nucleate boiling 02 p0203 A66-11921
Microelectronics technology noting integrated circuits, passive and active elements, reliability, etc 02 p0209 A66-11926
Hybrid integrated-and-conventional circuit configuration in electronic equipment noting thin film circuits, encapsulation, costs, reliability, etc 02 p0204 A66-11928
Cadmium selenide thin film transistors /TFT/ where electron mobility values exceed bulk single crystal values 02 p0276 A66-11979
Thin film hybrid approach to economical and time saving miniaturization of integrated electronic circuits 03 p0346 A66-13328
Thin film and monolithic circuits combined to satisfy need to couple integrated circuit designer to fabrication process 03 p0347 A66-13329
High gain high-impedance three-stage operational amplifier with Darlington output in I/C form design and construction to illustrate mating metal film resistor with oxide passivated semiconductor device 03 p0347 A66-13334
Thin surface films covering structure, nucleation, growth and epitaxy observation techniques such as electron and X-ray diffraction field emission, field ion microscopy, etc 04 p0559 A66-13452
Practical component packaging system for compatible use of integrated and thin film

circuits in spaceborne digital command and data handling equipment 04 p0492 A66-13467
RC circuit resistance effect on characteristics of selective filters consisting of semiconductor or thin film RC circuit with range multiplier and distributed parameters 04 p0496 A66-13901
Hall effect in thin polycrystalline evaporated bismuth films obtained by sublimation under very hard vacuum 04 p0567 A66-14324
Trimming microcircuit elements like evaporated thin-film and silk-screened cermet-film resistors attempted with CV and pulsed lasers 05 p0692 A66-14562
Diffusion and film techniques combined in design and fabrication of complex integrated computer logic circuits on small die 05 p0643 A66-14577
Synthesis of rational transfer functions by using thin film distributed RC active networks incorporating single-pole partitioned capacitance 05 p0652 A66-14584
Semiconductor thin film p-n junction thermocouples consisting of germanium crystal deposit in vacuum 05 p0736 A66-14977
UV optical absorption of cobalt and nickel in thin films 05 p0737 A66-15110
Shock sensitivity and high-low detonator regimes in thin explosive films studied by highly instrumented two-dimensional analog of card-gap test [CI PAPER WSCI-65-29] 05 p0787 A66-15136
Equipment and processes of thin film evaporators, noting cermet circuits produced in nonvacuum environments and thin film circuits produced by vacuum deposition 05 p0689 A66-15473
Surface film effects on fatigue life of steels 05 p0703 A66-15483
Low work function collector with Ba-covered thin aluminum trioxide film electrodes for high efficiency thermionic converters 05 p0621 A66-15575
Fluid squeeze-film damping, presenting linear analysis and approximate design equations for several damper configurations [ASME PAPER 65-WA/AUT-6] 05 p0664 A66-15706
Optical properties of polycrystalline InSb films noting index of refraction, absorption coefficient and transmission curves 05 p0741 A66-15852
Gold thin films of 1800 angstroms to be used as lubricants were vapor-deposited on Ni, Ni-Cr and Ni-Re substrates in vacuum 06 p0884 A66-15937
Design charts for transient response times of thin film networks used in digital circuits 06 p0842 A66-16009
Storage stability, moisture degradation and thermal cycling durability of cadmium sulfide-copper sulfide thin film solar cells 06 p0808 A66-16012
Thin film deposition by electron-beam and glow-discharge activation of various gaseous ambients 06 p0848 A66-16302
RF sputtering for deposition of wide variety of thin films, discussing basic theory and apparatus 06 p0924 A66-16431
Various conduction mechanisms through thin insulating films and relevance to possible thin film devices 06 p0852 A66-16508
Lead telluride single crystal grown on cleaved rock-salt substrates for thin-film field effect transistors 06 p0854 A66-16679
Electric properties of thin ferroelectric films of barium titanate compound 06 p0927 A66-16724
Phosphorus diffusion into silicon film and resultant defect structures 06 p0928 A66-16762
Thin film strain gauge transducers noting temperature performance, power dissipation, metallic or ceramic construction and application to nuclear radiation testing, airborne equipment, etc 06 p0882 A66-16898
Thin film microcircuit for digital systems 06 p0856 A66-16927
Anisotropy axes dispersion relation to plane galvanomagnetic effect in thin permalloy films to obtain Gaussian directional distribution 07 p1092 A66-17222
Thin film coating effect on silicon solar cell performance 07 p0991 A66-17288
Active thin-film elements /diodes and transistors/, properties and deposition

- Techniques 07 p1006 A66-17415
- Use of point and line heat sources for measuring thermophysical quantities of plane-parallel plates and thin films 07 p1149 A66-17530
- Stabilizing effect of surface active agents and wave formation in contaminated falling liquid film 07 p1023 A66-18125
- Structural formation and electrical properties of polycrystalline thin films of α -Sb obtained by discrete vacuum evaporation method 08 p1267 A66-18588
- Substitution of solid electrolytes for conventional liquid electrolytes in dry cell to enhance battery miniaturization potential without sacrifice of shelf life 08 p1167 A66-18715
- Thin film microelectronics including passive and active circuit element, electric properties, vacuum apparatus and instruments 08 p1192 A66-18962
- Electric properties of passive circuit thin film components in microelectronics, discussing resistors, capacitors and microcircuit interconnections on method of preparation 08 p1192 A66-18963
- Fabrication of active thin film elements, considering bipolar and unipolar transistor, of electron devices, field effect transistors and single crystal semiconductor 08 p1192 A66-18964
- Vacuum deposition apparatus and techniques used for producing thin solid films in microelectron assemblies on conductive substrates, emphasizing evaporation and cathodic sputtering 08 p1231 A66-18966
- Monitoring techniques for thin film deposition in passive microcircuit networks 08 p1192 A66-18967
- Methods for producing microcircuits from vacuum deposited thin film elements, discussing layout, masking and etching 08 p1192 A66-18968
- Electron microscopic estimation of perpendicular anisotropy of magnetic thin film originating from nonmagnetic grain boundaries 08 p1270 A66-19012
- Postdeposition vacuum heat treatments of cadmium sulfide films, examining effect on photocurrent and photocurrent to dark current ratio 08 p1273 A66-19258
- Microminiaturization in control equipment and computers 08 p1194 A66-19300
- Minority-carrier lifetimes from two-probe measurements of photoconductivity of semiconductor films 08 p1274 A66-19318
- Refinement of Lewis formula for reversible susceptibility along hard axis of thin permalloy film to account for effect of small amplitude magnetic ripple in film plane 08 p1274 A66-19347
- Unilateral conductivity of thin high-density film of refractory metal oxides, discussing formation of p-n junctions 08 p1276 A66-19568
- Superconductivity of thin semiconductor films 08 p1277 A66-19617
- Photoelectric properties of Cd, Si, Ge, GaAs and Se semiconductor films with narrow forbidden zone, producing abnormally high photovoltages 08 p1277 A66-19621
- Angular and magnetic dispersion of anisotropy and its effect on behavior of thin magnetic films, allowing for magnetostatic interactions 08 p1278 A66-19743
- Magnetic measurements and exchange interactions in thin anisotropic ferromagnetic films 09 p1410 A66-19905
- Thin film transistors using evaporated silicon films on sapphire 09 p1351 A66-19939
- Discharge in germanium thin films at liquid helium temperatures, noting electrostatic ionization of impurities and shock-ionization region expansion 09 p1412 A66-19990
- Effect of electric field and crystalline dimensions on position of optical absorption edge in cadmium sulfide thin films obtained by vacuum deposition 09 p1412 A66-19995
- Microwave transmission and reflection coefficients of thin films in normal and superconducting states 09 p1416 A66-20023
- Measuring penetration depth and flux quantum in superconductor by rectangular loop consisting of two insulation-separated superconducting plates 09 p1418 A66-20039
- Magnetic properties of quantized vortices in superconducting films determined by extension of Abrikosov model 09 p1422 A66-20062
- Burst effects due to vortex motion within thin superconducting films in which perpendicular magnetic field acts upon current flow 09 p1422 A66-20063
- Critical fields of thin superconducting films calculated by Bardeen generalization of Ginzburg-Landau equation and extended to nonzero temperatures and finite mean free path 09 p1422 A66-20064
- Tunnel and Schottky in aluminum oxide thin film element 09 p1426 A66-20193
- Fourier analysis, used to determine particle size, strains and faulting, applied to silver films evaporated onto glass substrates at different residual gas pressures 09 p1383 A66-20255
- Size-effect problem affecting charge transport coefficients in thin films 09 p1428 A66-20577
- Photovoltaic cells based on p-n junctions of ternary Cd-Te-Hg films, noting fabricating methods for n-or p-types 09 p1431 A66-20926
- Transistor fabrication method ensuring minimization of variation in properties of semiconducting film by vacuum deposition 09 p1359 A66-20976
- Small angle scattering technique with high resolution electron microscopy to determine columnar structure of thin vacuum condensed Pd films 10 p1573 A66-21247
- Microelectronic devices and circuits including integrated, monolithic, diffused and deposited, noting reliability and costs 10 p1507 A66-21285
- Preparation and physical properties of polytetraacyanoethylene (TCNE)/copper chelate film, noting electric conductivity and heat treatment effect 10 p1574 A66-21348
- Thin-film triode devices to investigate hot-electron penetration of oxide films 10 p1509 A66-21540
- Internal photoemission measurements show potential barrier profile in thin anodically formed aluminum oxide films between metal electrodes 10 p1509 A66-21541
- Low-energy electron diffraction studies adsorption of cesium on Si (111) 10 p1576 A66-21551
- Compositional variations in thin evaporated nickel-iron films 10 p1577 A66-21555
- Numerical method of Schroedinger equation and WKB approximation compared in determination of transmission coefficients for thin insulating films 10 p1577 A66-21558
- Optical properties of indium oxide, noting direct and indirect transitions in thin films and crystal plates, absorption coefficient as function of photon energy, etc 10 p1577 A66-21560
- Strength and structure of thin films of Al, Ag, Ge and Ni studied with electron microscope and electron diffraction technique 10 p1578 A66-21663
- Electrical conductivity of thin metallic films with two surfaces having different probabilities of specular scattering 10 p1579 A66-21681
- Vacuum deposited amorphous boron films, presenting structure, optical measurements and electrical properties 10 p1580 A66-21726
- Hybrid circuit rejects avoided by using ceramic channels and ultrasonic bonders during assembly of active semiconductor devices and integrated circuits to thin film network 10 p1512 A66-21759
- Thin film problems, discussing slow moving electron emission, electron penetration as function of energy level, etc 10 p1583 A66-22053
- Hot electron emission from thin metallic films of island structure 10 p1589 A66-22171
- Isothermal cross section of phase diagram of Zn-Cd-S and sulfide films 11 p1749 A66-22294
- Electron Coulomb interaction in strongly alloyed semiconductor films tends to reduce all energies to constant value without changing spectrum shape 11 p1750 A66-22344
- Electrophysical characteristics and preparation of thin organic semiconductor film on radiothermally modified polyethylene 11 p1750 A66-22609
- Thin ferromagnetic film physics - All-Union Symposium, Irkutsk, U.S.S.R., July 1964
- 11 p1751 A66-22796
- Nucleation during pulse remagnetization of thin films, showing domain structure of formation, growth of nuclei, etc 11 p1752 A66-22797
- Amplitudes and linewidth of discrete spectrum of natural frequencies of thin magnetic films, noting motion equations, dispersion ratio and resonance peaks 11 p1752 A66-22799
- Motion of magnetic moment of thin ferromagnetic films in rotating magnetic field, determining signals of first and second harmonics as function of field intensity 11 p1752 A66-22800
- Friction and inertia fields induced by electromagnetic effects arising in motion of hard magnetic moment in thin circular film 11 p1753 A66-22808
- SHF susceptibility of ferromagnetic thin films for constant magnetic fields far from electromagnet resonance 11 p1753 A66-22809
- Electron and nuclear magnetic system interaction in ferromagnetic crystals, effect on basic characteristics of nuclear magnetic resonance in ferromagnetics 11 p1754 A66-22813
- Kerr effect measurement of coercive force, nucleation field and saturation field for thin films 11 p1754 A66-22814
- Induced anisotropy of ferromagnetic atom pairs and magnetostriction stresses in Fe-Ni thin films subject to annealing 11 p1755 A66-22818
- Critical curves of quasi-static reverse magnetization of thin permalloy films analyzed, based on angular dependence of critical fields 11 p1755 A66-22819
- Magneto-optical study of critical curves of thin films by observing domain structures during magnetization process 11 p1755 A66-22820
- Local reverse magnetization regions, threshold field and residual saturation states in nonuniform rotation processes in thin permalloy films 11 p1755 A66-22821
- Ferromagnetic resonance in thin magnetic permalloy films, examining laws governing spin-wave spectrum for parallel orientation of magnetic field 11 p1755 A66-22822
- Quasi-static reverse magnetization of thin ferromagnetic films under action of SHF field 11 p1755 A66-22823
- Incoherent rotation of reverse magnetization in thin ferromagnetic films, allowing for internal magnetostriction and exchange interaction 11 p1755 A66-22824
- Optical constants of thin films deposited on nonabsorbing window obtained by Kramers-Kronig method 11 p1755 A66-22871
- Mean and dynamic skin friction, separation and transition in low-speed laminar and turbulent flow measured by thin-film heated element 11 p1693 A66-23013
- Indium antimonide thin film preparation via vacuum deposition, noting evaporation rate effects on electrical properties of film 11 p1756 A66-23022
- Electric current heating method to obtain high purity silicon epitaxial films 11 p1757 A66-23281
- Sandwich method in closed system for growing semiconductor germanium epitaxial films 11 p1757 A66-23282
- Changes in mechanical and electrical properties of thin Zn, Cd and Cu films during machining and thermal treatment 11 p1758 A66-23322
- Coercive force for Bloch wall displacement of thin magnetic films coupled with stripe domain neon-iron films 11 p1758 A66-23359
- Energy gap of clean superconducting thin films of tin in both parallel and perpendicular magnetic fields, using one-dimensional solution of Ginzburg-Landau equation 11 p1758 A66-23396
- Monographs on field effect transistors 11 p1671 A66-23460
- Thin silicon-dioxide film properties and growth for insulating gate electrode and semiconductor of MOS field effect device 11 p1759 A66-23464
- Concise numerical technique for reduction of data from thin platinum film heat transfer resistance 12 p1876 A66-23608
- thermometer
- Verification of Kiessig equation for

interference fringes formed by X-rays scattered from thin films 12 p1926 A66-23712

Digital and RF/linear circuits compared noting monolithic, hybrid and thin film circuit limitations, phase locked loop design, etc 12 p1830 A66-23756

Plane wave shielding effectiveness of vacuum deposited thin films, using section of air-filled coaxial transmission line 12 p1835 A66-24142

Hall generator constructed by vapor deposition of thin films of indium arsenide from 4 to 500 degrees K 12 p1838 A66-24407

Liquid film flow stability, considering two-dimensional perturbations, hydrodynamic friction with allowance for finite curvature radius of bounding surface 12 p1864 A66-24435

Photosensitivity of semiconductor thin films deposited on metallic substrates in vacuum, noting photochemical transformation and photodecomposition of substance 12 p1930 A66-24458

Secondary electron emission in zinc sulfide and magnesium fluoride thin dielectric films and semiconductor layers due to electric field stimulation 12 p1930 A66-24459

Lumped-element circuit model used to accurately and effectively analyze transients in thin film RC microcircuits 12 p1843 A66-24724

Superconducting film stability under current, noting metastable state near transition point via potential analysis 12 p1930 A66-24787

Maximum dielectric strength of thin evaporated silicon oxide films, calculating breakdown processes 12 p1933 A66-24830

Epitaxial deposition of silicon by sublimation process at 750 degrees C, using ultrathin alloy zone crystallization 12 p1846 A66-24912

Thermocompression bonding applied to integrated circuits of semiconductor and thin film type, noting resistance, ultrasonic and electron beam welding 12 p1846 A66-24916

Functional approach to electronic packaging of 60-mc intermediate frequency amplifier using thin film circuits 12 p1847 A66-24952

Incremental design technique virtually eliminates effect of dimensional variations on tolerances of thin film resistor networks 12 p1847 A66-24953

Vacuum-evaporation method of fabricating thin film circuits, using resistance-heating process or electron beam gun 12 p1847 A66-24954

Low energy independent-discharge three-element sputtering system and use in thin film fabrication 12 p1847 A66-24955

Effect of preparation conditions on formation of carbide phases in iron-carbon thin films, using vacuum condensation 12 p1933 A66-25025

Domain structure of partially oriented thin permalloy films analyzed through appearance of adjoining 180 degree walls of equal contrast and by electron microscopy 12 p1934 A66-25029

Nonuniform rotation of local magnetization vectors in thin nickel-iron films, measuring contribution of time-dependent variations in torque during magnetic field reversal 12 p1934 A66-25031

RF sputtering of insulators, noting effects of auxiliary magnetic field, electrode size, oxygen concentration, substrate temperature and target material on thin dielectric film formation 13 p2157 A66-25039

Current voltage characteristics of dielectric films 13 p2157 A66-25040

Dependence of electric properties of sublimated zinc telluride films on specimen thickness, substrate preheating temperature and sign of current 13 p2160 A66-25098

Temperature dependence on Hall effect of thin iron layers 13 p2162 A66-25412

Longitudinal and transverse resistance-coefficients of thin film supporting materials, noting deformation resistance 13 p2107 A66-25460

Surface photovoltage measured in vapor-deposited cadmium sulfide using metal-insulator-semiconductor-structures, noting surface potential analysis as applied to thin

film field effect transistor 13 p2164 A66-25487

Passive thin-film component materials, vacuum evaporation and sputtering processes 13 p2039 A66-25645

Microparallel gap welding approach for bonding fine leads to thin films 13 p2040 A66-25842

Index of refraction of thin film coatings from transmittance and reflectivity measurements with attention to titanium and silver films 13 p2168 A66-25944

Probe measurement theory for determining thin semiconductor film electrical conductivity 13 p2168 A66-25945

Radiant energy conversion using thin dielectric films in thermoelectrostatic cycle [AIAA PAPER 64-729] 13 p2006 A66-26639

Magnetostatically generated microwave acoustic pulse in thin films of Dy, Ho, Gd and Er 14 p2350 A66-26876

Domain boundaries and superdislocations of structure of Alnico V by thin film electron transmission microscopy 14 p2311 A66-26882

Spin wave excitations and surface impedance in microwave transmission through thin permalloy films 14 p2350 A66-26885

Domain wall mobility effect on multilayer magnetic thin films consisting of permalloy layers separated by silicon oxide layers 14 p2351 A66-26888

Multilayer composite magnetic thin films used to constrain domain walls to localized region 14 p2351 A66-26889

Thin magnetic film with helical anisotropy 14 p2351 A66-26890

Energy and width of domain walls in double films 14 p2351 A66-26891

Relation between angular dispersion and grain size in evaporated permalloy films 14 p2352 A66-26892

Magnetostatic model for perpendicular anisotropy in polycrystalline nickel-iron thin films 14 p2352 A66-26893

RF probe measurements to determine local magnetization direction and H sub k values in planar films 14 p2352 A66-26894

Anisotropic resistance in permalloy films based on imperfection orientation model 14 p2352 A66-26895

Magnetostatic interaction effect on real and imaginary parts of transverse biased permeability in thin Ni-Fe films 14 p2352 A66-26896

Longitudinal magnetostatic force and effect on magnetic ripple in thin films 14 p2352 A66-26897

Lever mechanism for magnetization creep in nickel-iron thin films in longitudinal DC and transverse AC field 14 p2353 A66-26898

Minimum internal energy and magnetization distribution for two parallel Bloch walls in thin films 14 p2353 A66-26899

Layered film of Cr and NiFe exhibit biased hysteresis loop in easy axis direction and asymmetric hysteresis loops in hard axis direction 14 p2353 A66-26901

Anisotropy spectrum in nonmagnetostriuctive permalloy films 14 p2353 A66-26902

Uniaxial anisotropy field measurement for magnetic annealing of permalloy films 14 p2353 A66-26903

Composition dependence of irradiation-induced uniaxial magnetic anisotropy energy of permalloy films 14 p2354 A66-26904

Torsional strain sensitivity and absolute compositional analysis of permalloy films 14 p2354 A66-26905

Structural properties correlated with magnetic characteristics of annealed electrodeposited permalloy film 14 p2354 A66-26906

Magnetic torque and hysteresis loop measurements, examining exchange anisotropy in sulfided Fe films 14 p2354 A66-26907

Magnetic properties of vacuum deposited iron nickel films 14 p2354 A66-26908

Bias-sputtering of nickel-iron thin films for memory elements 14 p2354 A66-26909

Static magnetic properties of zero-magnetostriuctive permalloy films during vacuum deposition and substrate heating and cooling period 14 p2355 A66-26910

Magnetic and electrical properties of intermetallic compound FeRh, discussing

preparation of thin films 14 p2355 A66-26911

Positive and negative NiFe magnetostriiction film exhibits striped domain when evaporated at oblique incidence 14 p2355 A66-26912

Magnetic hysteresis and switching property of manganese-bismuth thin magnetic films epitaxially grown by vapor deposition technique 14 p2355 A66-26913

Light reflection from dielectric films of continuously varying refractive index 14 p2356 A66-26968

180-stage integrated thin film scalar generator, noting design characteristics 14 p2247 A66-27031

Growth kinetics and structure of evaporated tin thin films on amorphous carbon film, noting three stages after nucleation, archipelago, labyrinth and closing 14 p2359 A66-27107

Chemically deposited thin ferrite and garnet films 14 p2249 A66-27104

Effective-mass approximation of conduction electron scattering in very thin films 14 p2360 A66-27192

Behavior of thin superconducting film in stationary magnetic field, deriving spectrum which is used to determine film specific heat 14 p2360 A66-27194

Transmission spectra, electroluminescence-brightness variations with applied frequency and voltage and physical properties of ZnS thin films 14 p2361 A66-27315

Thin films as possible transmitting and reflecting polarizers in vacuum UV region 14 p2361 A66-27337

Electron energy distribution for emission from aluminum-aluminum oxide-gold thin films 14 p2257 A66-27942

Surface blistering of metals due to low energy hydrogen ion bombardment, determining solar absorptance change in gold-plated specimens 14 p2316 A66-28007

Thin film hybrid packaging method for series of computer logic circuits designed to operate at 100-mc clock rate 14 p2260 A66-28267

Absorption bands in thin lead films, vacuum prepared, considering general analysis of elements in group IVA of periodic table 14 p2369 A66-28271

Electron diffraction study of structural defects in cubic phases in epitaxial tantalum oxide thin films 15 p2557 A66-28560

Production of thin copper and nickel ferrite films in inert gas plasma reveal spinel structure in electron diffraction patterns 15 p2557 A66-28564

Mercury selenium thin film transistors, measuring electric properties 15 p2560 A66-28634

Free carrier absorption, on GaAs films which exhibit absorption edge shift to lower energies 15 p2561 A66-28698

Epitaxial growth of silicon on basal plane of hexagonal silicon carbide substrates analyzed, using silane pyrolysis in flow system, evaluating effects of deposition variables on grown film properties 15 p2561 A66-28703

Electric conductivity in thin metal films deposited on single crystal sodium chloride substrates, thermally activated with negative temperature coefficient of resistance 15 p2561 A66-28704

Damaged depth in germanium thin films induced by bombardment with low energy argon ions measured, using differences in sputtering yield for given energy 15 p2561 A66-28705

Seebeck coefficient of germanium films vacuum-deposited on Vycor substrate 15 p2562 A66-28723

Double barrier transmission resonance in metal thin film triode 15 p2563 A66-28731

Hall coefficient and mobility in thin evaporated gold films on glass substrates 15 p2563 A66-28733

Surface structure and superconductive properties of electrodeposited tin films 15 p2564 A66-28761

Heat transfer coefficients between layers of thin film structure on niobium and aluminum substrates at liquid helium temperature 15 p2616 A66-28763

Critical excitation function used to estimate transient response of thin film devices at time intervals exceeding greatest

- constant 15 p2459 A66-28895
- errite-air interface in waveguide with
ducting thin film coated core solved by
boundary condition or impedance
15 p2565 A66-29053
- Effect of electrical charge on surface of
ss substrate on nucleation density and
ial growth structure of thin films of gold
pared by evaporation under ultrahigh
um 15 p2466 A66-29683
- dSe-Au-Ge metal base transistor
ricated, based on fact that Ge-Au
on barrier is low and CdSe-Au
on is Schottky 16 p2660 A66-30615
- Formula derived for estimating reflection
efficient of cylindrical resistive-film
enuator for traveling wave 16 p2660 A66-30617
- ysics of thin ferromagnetic films - All-
ion Conference, Irkutsk, U.S.S.R., July
4 16 p2772 A66-30680
- pulse switching of thin ferromagnetic films
nanosecond range and operation
characteristics of measuring
circuit 16 p2773 A66-30681
- Effects of angular dispersion of anisotropy
l film thickness on thin permalloy
romagnetic film pulse
atching 16 p2773 A66-30682
- lanar Hall /galvanomagnetic/ effect in
in iron or nickel ferromagnetic
ms 16 p2773 A66-30684
- atic properties of vacuum deposited thin
rmalloy films 16 p2773 A66-30687
- Technology, preparation and properties of
ultilayer ferromagnetic films, including
luence of composition and deposition
ditions on coercive force values, shape of
teresis loops, etc 16 p2773 A66-30688
- obalt doping effect on magnetic
roperties of nickel thin films prepared by
hemical precipitation 16 p2774 A66-30694
- Effect of annealing in magnetic field on
uctural and magnetic properties of thin
ms prepared from nickel 16 p2774 A66-30695
- Temperature dependence of domain
structure of thin ferromagnetic films
pared by thermal evaporation in
um 16 p2774 A66-30696
- pparatus for analysis and preparation of
magnetic properties of thin ferromagnetic
ms in vacuo, noting hysteresis loop,
ermal evaporation, etc 16 p2661 A66-30697
- Temperature dependences of coercive
ce, hysteresis loops and domain structure
thin iron-gadolinium alloy 16 p2774 A66-30698
- Domain structure and hysteresis loops of
in iron-gadolinium films of different
icknesses 16 p2775 A66-30699
- agnetostriction, negative anisotropy and
ainlike domain walls along line defects in
in permalloy films 16 p2776 A66-30803
- all constant of semiconductor films
posited on electrically conducting
substrates calculated by formula derived
om Konkov phenomenological
eory 16 p2777 A66-30869
- Contact resistance of sliding contact over
in film as affected by material, pressure
d contact area 16 p2662 A66-30963
- Multiple reflection effects in Faraday
tation in thin film 16 p2778 A66-31073
- miconductors 16 p2778 A66-31073
- Photovoltage of aluminum-aluminum oxide-
minium thin film sandwich with aluminum
ide layer of 60 angstroms measured as
nction of wavelength and incident light
ensity 16 p2778 A66-31076
- Effect of annealing on thin gold films
ndwiched between two evaporated layers
zinc sulfide, presenting resistance
rves 16 p2779 A66-31083
- Structure and electron mobility of thin
ium arsenide films prepared by co-
aporation technique 16 p2780 A66-31094
- Thickness of gold, silver and copper thin
ms determined, using measurements of
istance and Hall 16 p2780 A66-31096
- Device for controlling thickness of thin
ms prepared by sputtering in
uum 16 p2708 A66-31362
- aterials science and technology in
egrated electronics - Conference, San
ancisco, September 16 p2781 A66-31414
- Thin silicon film deposition on amorphous
fused quartz substrates by cathodic
sputtering in argon atmosphere, noting
resistivity data 16 p2782 A66-31421
- Physical properties of thin films of CdS
and CdSe formed by vacuum deposition
analyzed as function of deposition and
processing conditions 16 p2782 A66-31422
- Sputtering of aluminum thin films
prepared by bell-jar vacuum systems /getter
sputtering and standard diode/ for
electronic application 16 p2783 A66-31423
- Switching characteristics of small-geometry
thin-film superconductors 16 p2783 A66-31428
- Dielectric properties and thermostability of
glow-discharge thin organic polymer films
for electronic application 16 p2783 A66-31429
- Thin film technology in microwave power
tubes noting ceramic mounted structures,
secondary emitters, semiconducting and
dispersion hardened thin films,
etc 16 p2665 A66-31432
- High-mobility InSb thin film preparation by
flash evaporation of elemental In and Sb in
vacuum and oxidation of film surface prior
to recrystallization in inert
atmosphere 16 p2785 A66-31575
- Hall effect of homogeneous semiconductors
in nonuniform magnetic fields and of thin
inhomogeneous films in uniform
field 16 p2666 A66-31576
- Compatible thin film resistor-capacitor
process using nichrome and alumina-silica
glass for silicon integrated
circuits 16 p2667 A66-31595
- Superconductivity of nondegenerate
semiconductor thin films, dependence on
current carrier concentration, impurity level
positions and film
thickness 16 p2787 A66-31762
- Temperature dependence of electrical
resistance of thin nichrome films
Investigated by vacuum deposition on mica
base 17 p2939 A66-31969
- Mechanical properties of Ag, Al, Ge, Cu,
Ni and Fe thin films, showing elastic
deformation and strength greater in thinner
films 17 p2939 A66-31971
- Vapor deposited gold thin films to obtain
adhesion and durability between film and
substrate essential as lubricants in high
vacuum 17 p2929 A66-31979
- Anisotropy axes dispersion relation to
plane galvanomagnetic effect in thin
permalloy films to obtain Gaussian
directional distribution 17 p2976 A66-31993
- Basic techniques for producing thin-film
electronic components 17 p2881 A66-32105
- Thin film passive devices combined with
monolithic silicon techniques to produce
circuits superior in electrical and
environmental performance to conventional
integrated circuit 17 p2882 A66-32106
- Substrate layout and deposition of all thin
film differential amplifier 17 p2882 A66-32112
- Small size and low power consumption in
thin film microcircuits
design 17 p2882 A66-32113
- Thin film inductors design limitations due
to low inductance values, low Q and
undesirable coupling
effect 17 p2882 A66-32116
- Chemical deposition fabrication techniques
to integrate isolated thermal and electrical
path into thin film
substrate 17 p2883 A66-32118
- Silver oxide films by cathodic sputtering,
discussing changes in sample preparation
and material characteristics due to aging
and heat treatment 17 p2976 A66-32262
- Field emission in thin semiconductor layers
upon metallic substrate, noting V-I
characteristics dependence on Si layer
thickness, tunnel effects,
etc 17 p2977 A66-32265
- Charge carrier mobility variation with
temperature in copper phthalocyanin thin
film 17 p2977 A66-32286
- Electrical properties of SiO films, noting
independence of dielectric constant on film
thickness and dependence of conductivity on
applied field 17 p2978 A66-32411
- Plotting of first and second derivatives of
tunnel junction V-I characteristics, noting
application to thin films prepared by
vacuum evaporation 17 p2886 A66-32496
- Technique for formation of thin tantalum
film resistors on silicon integrated
circuits 17 p2887 A66-32699
- Growth of single crystal and polycrystalline
thin films of magnesium aluminum oxide
and magnesium iron oxide, discussing
techniques employed, results,
etc 17 p2982 A66-33061
- Superconductivity of thin semiconductor
films 17 p2983 A66-33131
- Photoelectric properties of Cd, Si, Ge,
GaAs and Se semiconductor films with
narrow forbidden zone, producing
abnormally high
photovoltages 17 p2984 A66-33135
- Structural defects in epitaxial films noting
nucleation mechanism, stacking faults,
growth defects, etc 17 p2985 A66-33157
- Effect of ferroelectric polarization
interacting with space charge on insulated-
gate thin-film transistor
parameters 17 p2896 A66-33299
- Electron angular distribution in copper and
gold thin films attributed to individual close
interaction scattering
phenomena 17 p2987 A66-33314
- Recrystallization of Ge and Si thin films
and structural changes due to electron
bombardment and thermal
annealing 17 p2988 A66-33456
- Nickel, nickel-zinc and magnesium-zinc
ferrite thin films, using chemical deposition
on alumina substrates for millimeter wave
application 18 p3153 A66-33732
- Photoconductivity of thin layers of CdS,
noting intrinsic maximum for various
dopants, temperature effect, activation
energy, etc 18 p3157 A66-34628
- Order-disorder parameter determined from
HF absorption in pure superconducting
films 18 p3158 A66-34687
- Electron energy quantization phenomenon
in thin film studied by using dielectric
barrier sandwiched between semiconductor
films of same conductivity
type 19 p3433 A66-35309
- Optical absorption of island films of gold
as function of island density obtained from
electron micrographs and film
thickness 19 p3435 A66-35416
- Thin film transmission electron microscopy
on n-type silicon irradiated with fast
neutrons, noting erratic polishing process
and irregular surface 19 p3436 A66-35431
- Vacuum evaporation of metallic films on
substrate 19 p3437 A66-35457
- Hexagonal crystal structure growth of
CdTe thin film 19 p3438 A66-35480
- Hot electron emission from thin metallic
films of island structure 19 p3441 A66-35785
- Texture and electric conductivity of
cadmium sulfide thin
films 19 p3442 A66-35865
- Solid structure tunnel diode, discussing
design and manufacture, noting use of thin
film photolithographic process for improved
reliability 19 p3319 A66-36164
- Plane steady flow of thin viscous fluid film
between solid wall and free surface, solving
linear and nonlinear
cases 19 p3342 A66-36469
- System comparison of magnetic matrix
memory procedure 19 p3311 A66-36816
- Integrated circuits, examining thin film
evolution, noting advantages of size
reduction, reliability and functional
value 19 p3322 A66-36817
- Thin insulating Teflon film bonding to
internal surface of space cryopanel for
increased heat transfer and faster
cooling 20 p3677 A66-37100
- X-ray absorption edge observation by
transmittance measurements through thin
unbacked metal films in XUV as function of
wavelength 20 p3613 A66-37275
- Vectorial photoelectric effect and quantum
efficiency measurement in thin gold films
for two light polarizations, using Lallemand
electronic camera 20 p3614 A66-37279
- Time-dependent response of polycrystalline
cadmium selenide thin film transistor to
transient high energy
radiation 20 p3525 A66-37316
- Superconducting transition temperature of
thin film, showing growth of temperature
and decrease in film thickness due to
phonon electron
interaction 20 p3616 A66-37378
- Absorption spectra, reflection index and

photoelectric emission of tellurium 20 p3618 A66-37566

Photosensitivity of semiconductor thin films deposited on metallic substrates in vacuum, noting photochemical transformation and photodecomposition of substance 20 p3620 A66-37690

Secondary electron emission in zinc sulfide and magnesium fluoride thin dielectric films and semiconductor layers due to electric field stimulation 20 p3620 A66-37691

Anomalous photovoltaic effect in semiconductor Ge, Si, CdTe and GaAs thin films due to photodiffusion and microtransitions 20 p3620 A66-37701

Test for stiffness of fabrics used to measure flexural stiffness of thin plastic films and metal-plastic laminates for spacecraft application 20 p3588 A66-37793

RC circuit resistance effect on characteristics of selective filters consisting of semiconductor or thin film RC circuit with range multiplier and distributed parameters 20 p3532 A66-37866

International Union for Vacuum Science, Technique and Applications - International Congress, Stuttgart, June-July 1965 20 p3621 A66-38083

Spin wave excitation by ferromagnetic resonance, measuring coercive field as function of temperature by Kerr effect method and determining magnetic properties of thin films 20 p3621 A66-38085

Thin film research in Great Britain, discussing vacuum deposition techniques, electrical properties, nucleation and growth, stress, applications, etc 20 p3621 A66-38086

Structure and properties of thin films in terms of deposition conditions, noting conditions for continuity, surface roughness, grain size, lattice defect density, crystalline orientation, purity, etc 20 p3621 A66-38087

Thin dielectric film wave scattering, EM interaction responses and conductivity tensor 20 p3622 A66-38385

Normal incidence reflectivity and transmissivity coefficient measurements in Ge thin epitaxial films 20 p3623 A66-38397

Relation between surface grain structure and galvanomagnetic properties of polycrystalline mercury telluride thin films with high current-carrier mobility 20 p3624 A66-38434

Substrate properties effect on processing and reliability of tantalum thin film circuits [ACS PAPER 2-S5-65] 21 p3710 A66-38678

Miniature assembly for obtaining thin metal and semiconductor cell films by vacuum-evaporation techniques 21 p3737 A66-38919

Diffuse boundary scattering as possible explanation for enhanced field effect in thin metallic films through polarization reversal of ferroelectric substrates 21 p3800 A66-38990

Resistance decrease in vacuum-evaporated gold films from 150 to 250 degrees C when environment is cycled from inert to oxidizing 21 p3802 A66-39161

Heteroepitaxial deposition of films of germanium in single-crystal form on sapphire by vapor growth techniques 21 p3802 A66-39163

UV radiation effect on polyethylene-terephthalate film tensile strength in vacuum and air 22 p3937 A66-39818

Temperature coefficient of resistance in thin metal films, using Sonderrmayer analysis for vapor deposited Au, Ag and Cu films 22 p3963 A66-40105

Thin film microcircuit fabrication for space environment application 22 p3882 A66-40792

Fired circuitry application to ceramic substrates by thick film process and use of thin films on ceramic and glass substrates by vapor deposition 23 p4043 A66-41126

Sputtering, slurry and doctor-blade techniques for depositing thin thermistor films of lanthanum-doped barium-strontium-titanate for bolometer application 23 p4109 A66-41127

Oxygen inhibition of grain boundary movement and stabilization of optical transmission in cuprous iodide thin film 23 p4110 A66-41152

Four-point probe technique to measure conductivity of epitaxial layers on conducting substrates 23 p4110 A66-41157

Microbonding - Colloquium, Sunbury-on-Thames, Middlesex, England, January 1966 23 p4043 A66-41188

Parallel-gap joining techniques, examining electrode using copper insert and brazing application to thin films 23 p4072 A66-41191

Vacuum coating techniques for thin film layers for bonding, examining adhesion, bonding layer reinforcement and surface oxidation 23 p4043 A66-41194

Electron diffraction study of structural defects in cubic phases in epitaxial tantalum oxide thin films 23 p4112 A66-41281

Production of thin copper and nickel ferrite films in inert gas plasma reveal spinel structure in electron diffraction patterns 23 p4112 A66-41285

Thin films and semiconductors for integrated circuits in microelectronics, for application to aeronautics and astronautics 23 p4048 A66-41657

Superconductivity applications in power engineering, examining properties of superconducting materials such as thin films, wires and ribbons made of ductile and brittle alloys 23 p4114 A66-41741

Thin film manufacturing problems for applications in optics, examining physical and chemical factors 23 p4071 A66-41871

Inorganic thin film surface finish for boron filaments, noting improved adhesion to organic resins and high temperature oxidation resistance 23 p4082 A66-41895

Spatial distribution of hot electrons coherently scattering in thin Au film 23 p4115 A66-42063

Network for compensating electrical output of thin film resistance thermometers for deviations due to large heat-transfer rates 24 p4207 A66-42176

Thin film thermal radiation detector noting construction, calibration, performance, error sources and advantages of pyroelectric over thin film gauges 24 p4208 A66-42179

Sputtering voltage and current effects on resistivity of films sputtered from pure tantalum appear to be traceable to pressure and growth rate 24 p4251 A66-42297

Transitions between phases and states of crystallographic order in films, noting conditions for preferential nucleation and analogies between two-and three-dimensional phase diagrams 24 p4251 A66-42305

Adhesive backed birefringent tape for separation of thin film and printed circuit master drawings with near perfect registration for microelectronic production masking purposes 24 p4180 A66-42312

Failure mechanisms of CdS and CdSe thin film FETs noting volt-ampere characteristics, temperature, electrical stress and humidity effects 24 p4181 A66-42381

Nonuniform thickness of dielectric films effect on capacitance and tunnel currents of elements with metal-insulator-metal structure 24 p4254 A66-42387

Nonlinear dependence of current in electric field in thin semiconductor film in quantizing magnetic field 24 p4256 A66-42525

Critical fields of thin superconducting films determined by specular reflection of electrons from surfaces 24 p4256 A66-42531

Calculation method for optimum number of thin film elements on substrate of micromodule consisting of active and passive conducting, resisting and dielectric elements 24 p4257 A66-42536

Thin film space-charge-limited triode employing dielectric surface gate structure 24 p4183 A66-42627

Precision microwave power measurement methods noting calorimetry, bolometry and thin film 24 p4184 A66-42649

Optical constants of triple, symmetrical and absorbing thin film used with layer thickness to determine complex transmission factor 24 p4258 A66-42994

Effective-mass approximation of conduction electron scattering in very thin films 24 p4259 A66-43090

Behavior of thin superconducting film in stationary magnetic field, deriving spectrum which is used to determine film specific heat 24 p4259 A66-43094

Mechanical properties, optical microstructure and thin foil electron microstructure of commercial pure titanium plate investigated for cause of ductility

deterioration 24 p4229 A66-43105

Dielectric breakdown phenomena in evaporated silicon monoxide thin film, noting electron collision effect 24 p4260 A66-43106

Multifunction monolithic thin film compatible diode-transistor logic circuits for data processing 24 p4178 A66-43187

Mechanical system for monitored deposition of sequential thin films on any one of five substrates from any of five independent sources and through any of five masks 24 p4218 A66-43216

THIN FILM TRANSISTOR /TFT/

S FIELD EFFECT TRANSISTOR /FET/

THIN LAYER CHROMATOGRAPHY

Saturation problem for middle sections of CO solar spectral lines, using thin layer absorption concept 08 p1297 A66-19453

Saturation problem for middle sections of CO solar spectral lines, using thin layer absorption concept 18 p3232 A66-34482

THIN PLATE

Plate theory for case of thin elastic deformable circular plate under rotationally symmetrical stress 02 p0296 A66-11243

High speed compression of viscoplastic thin disk between smooth dies considering inertia effects 02 p0299 A66-11690

Heat equation of temperature field by monotonic heating or cooling of thin plate 04 p0596 A66-13658

Book on large variations in temperature and thermal expansion which produce thermal stresses in materials whose properties are time-independent 05 p0771 A66-14519

Thermal contact resistance between uniformly loaded thin plates in vacuum, noting hysteresis test for effect of creep [ASME PAPER 65-HT-16] 05 p0783 A66-14740

Fundamental solutions of static and dynamic linear inextensional theories of thin elastic plates [ASME PAPER 65-WA/APM-23] 05 p0778 A66-15445

Small parameter method determination of pure bending and torsion of thin plate with circular hole, where material of plate obeys nonlinear elasticity law 08 p1312 A66-19435

Deflection of thin circular plate under eccentric loading using complex variables, obtaining expressions in series form 09 p1467 A66-20581

Flexure of semiinfinite nonsymmetric three-layer plate under steady transverse compression, using state equation to determine load values impairing equilibrium of plate 09 p1468 A66-20760

Diffraction of plane electromagnetic wave at planar array consisting of thin rectangular plates 09 p1347 A66-20787

Kinetic theory of leading edge of plate interacting with streaming gas evaluated by Bhatnagar-Gross-Krook equation of statistical mechanics 11 p1633 A66-22924

Fundamental solutions of static and dynamic linear inextensional theories of thin elastic plates [ASME PAPER 65-WA/APM-23] 12 p1960 A66-23971

Aerodynamic forces on system of N thin slightly twisted profiles in subsonic unsteady flow for small angle of attack, examining acoustic resonance for arbitrary small harmonic oscillations 12 p1798 A66-24436

Critical load under uniaxial tension for thin infinite plates with holes weakened by cracks 13 p2202 A66-26415

Temperature stresses and heat transfer at thin plate edges reinforced with thin rods under nonstationary thermal conditions 13 p2202 A66-26416

Stress expansion-wave propagation from circular hole in thin infinite plate under abrupt permanent load 13 p2202 A66-26419

Bending moment of thin nonlinearly elastic plates, noting dependence of coefficient of moment concentration on external load and material properties 13 p2203 A66-26429

Temperature field of infinite plate with variable temperature at one edge determined, using double Fourier integral transform 14 p2411 A66-27166

Derivation of approximate two-dimensional equations for thin elastic plates without resorting to Kirchhoff-type

- hypothesis 14 p2408 A66-28061
- Meteoritic penetration through relatively thin shield 15 p2606 A66-28499
- Boundary between applicability ranges of network and steepest descent methods in equation integration of Timoshenko theory in analysis of plate 15 p2608 A66-28962
- Reformation 15 p2608 A66-28962
- Flexure of thin elastic plate clamped to rigid columns, determining functions of complex variable 15 p2613 A66-29433
- Boundary perturbation solution of stress concentration around curved hole in thin plate under elastic bending 16 p2819 A66-31140
- Arbitrary bending of hinged thin plate reinforced with circular ring 16 p2819 A66-31141
- Brittle materials failure theory for cases where presence of plane deformation or plane stressed state is assumed, using Griffith theory 16 p2822 A66-31510
- Symmetrical stress wave propagation in thin plate with small, circular hole at center, noting boundary conditions and solutions via Laplace transforms and by method of characteristics 17 p3022 A66-32012
- Thermal stresses of infinite thin plate with given temperature at one edge 17 p3027 A66-32713
- Natural frequency of thin rectangular plate for first six modes under clamped and free-edge conditions 17 p3032 A66-33526
- Creep testing of glass fiber reinforced thin plastic plates and beams under torsion and bending 19 p3473 A66-35756
- High-speed photographic techniques, recording impact and postimpact phenomena, used in prediction of flow resulting from hypervelocity impact of pellet with thin plate 20 p3560 A66-37740
- Elastoplastic bending of thin annular plates with free inner edge, based on Mises yield condition and Hencky stress-strain relation 20 p3671 A66-38102
- Two-dimensional nonlinear equations of finite thermal oscillations of anisotropic thin elastic plates 20 p3673 A66-38278
- Elliptic BVP in equilibrium theory of thin plates employing iterated Laplace operator 21 p3822 A66-38464
- Diffraction of plane electromagnetic wave at planar array consisting of thin rectangular plates 22 p3862 A66-39846
- Existence of smooth solution for system of equations describing nonlinear oscillations of thin plate and shallow shell 22 p3989 A66-39905
- Bending of isotropic thin plate in moment theory of elasticity, noting Kirchhoff-Love hypothesis from which relations for bending moment torque and shear force are obtained 22 p3991 A66-40151
- Penetration resistance of fiberglass-reinforced plastics against small-caliber projectiles noting relations between energy loss, stopping power and plate thickness 22 p3938 A66-40433
- Approximate solution of boundary value problems in elasticity theory as applied to thin plate theory, using homogeneous equations 23 p4136 A66-41000
- Two-dimensional elastic equilibrium problems in reinforced plates with holes and bending theory problems in reinforced thin plates 23 p4137 A66-41003
- Unsteady supersonic gas flow around lattice of thinly curved plates for calculation of aerodynamic forces and moments acting on oscillating profile 23 p4009 A66-41722
- Unsteady state lift and moment action on lattice of profiles moving in incompressible fluid, determining suction originating at leading edges of profiles 23 p4009 A66-41723
- Reaction of three-dimensional shock wave with turbulent boundary layer in supersonic flow around plate 23 p4010 A66-41735
- Downwash angles behind rectangular wings of small aspect ratio calculated at subsonic velocities according to nonlinear theory 23 p4010 A66-41781
- Boundary value problem of steady two-dimensional MHD flow of viscous incompressible fluid past rigid plate 23 p4106 A66-41875
- Notched plates stress distribution solution under conditions of plane stress in elastoplastic domain of
- straining 23 p4146 A66-41994
- Deflection analysis of temperature gradient-induced buckling, curling and bending in thin unsupported plate with variable thickness 23 p4146 A66-41996
- THIN WALL**
- Thin metallic end windows for pressure vessels produced by hydrostatic forming 07 p1040 A66-18493
- Probability theory to calculate technological deviations in dimensions effect on strength and rigidity of thin walled structures 11 p1782 A66-22858
- Asymptotic behavior of coupling coefficients of infinite array of thin walled rectangular waveguide 14 p2257 A66-27927
- Critical stress, stability loss and load carrying capacity of axially compressed thin walled aluminum alloy rods 16 p2819 A66-31142
- Program controlled device for applying tensile force and torque to thin walled tubular specimen during analysis of creep under stress 21 p3827 A66-38618
- THIN WALLED SHELL**
- Space-time correlation function of response of finite cylindrical shell to purely random pressure field and to subsonic boundary layer pressure fluctuations 01 p0147 A66-10131
- General Marguerre equations derived for thin shallow shells subject to uniformly distributed thermal potential 01 p0155 A66-10716
- Linear and nonlinear stability and critical strains of closed thin walled circular cylindrical shell under hydrostatic pressure 01 p0155 A66-10738
- Flexible-wall tubes flattened by fluid when velocity reaches critical value, with differential equations describing effect of stability loss 01 p0158 A66-11035
- Free vibration and transient elastic response of thin shells within scope of linear theory 04 p0586 A66-13405
- Dynamic matrices for natural vibrations of missile considered as beam and as thin walled shell under given boundary conditions 04 p0587 A66-13534
- Asymptotic integration of thin elastic shell equations for design of shells of revolution subject to effect of cyclic edge loads 04 p0590 A66-14149
- Linear small deflection theory and statistical analysis in dynamic buckling of thin cylindrical shell under axial impact [ASME PAPER 65-APMW-17] 04 p0592 A66-14218
- Brazier effect and overlap effect in bending of slit thin walled circular tubes [ASME PAPER 65-APMW-20] 04 p0592 A66-14221
- Linear elastic theory of thin shells, considering membrane and bending theories of open and closed cylindrical shell 05 p0775 A66-15083
- Asymptotic expressions for axial stress in thin viscoelastic shells due to longitudinal impact obtained, using Laplace transform, determining viscosity effect on propagating wave shape [ASME PAPER 65-WA/APM-10] 05 p0776 A66-15432
- Asymptotic analysis for equations of axisymmetric vibrations of thin shells [ASME PAPER 65-WA/APM-15] 05 p0777 A66-15437
- Drucker stability hypothesis indicates strain rate as dominant fracture criteria for thin spherical shell under blast loading 07 p1141 A66-17211
- Thin elastic shell transient vibration, deriving solution for response to time dependent surface loads 07 p1143 A66-17497
- Thin shell theory to determine natural frequencies for cylindrical shells with any end conditions 07 p1146 A66-18279
- Collapse under end load of pressurized axially stiffened thin cylinders 07 p1147 A66-18282
- Equations of motion in elasticity theory for thin-walled rod in rotating inertialess system of coordinates 08 p1307 A66-18860
- Creep problem of thin shallow shells in terms of viscoelastic theory, considering isotropic homogeneous and orthotropic quasi-homogeneous materials 08 p1311 A66-19340
- Stability of thin-walled conical shells under axially symmetric loading determined from nonlinear shell theory 10 p1614 A66-21382
- Asymptotic expressions for axial stress in thin viscoelastic shells due to longitudinal impact obtained, using Laplace transform, determining viscosity effect on propagating wave shape [ASME PAPER 65-WA/APM-10] 10 p1615 A66-21476
- Generalized analysis of rotationally symmetric thin elastic shells applied to cases where shell wall consists of any number of layers of isotropic or orthotropic material 10 p1617 A66-21496
- Thin walled shallow shell equations derived for case of nonlinear stress-strain relation 11 p1779 A66-22227
- Functional derived in nonlinear theory of shells of variable thickness, taking into account temperature field and potential mass forces 11 p1779 A66-22228
- Stability limit of symmetric thin walled three-dimensionally loaded rods under arbitrarily distributed and concentrated conservative transverse and longitudinal loads 11 p1779 A66-22230
- Curvature effect on stress distribution for thin walled circular cylindrical shell with small aperture 11 p1779 A66-22237
- Numerical analysis of thin cylindrical shell under action of external forces for small deformations, using first-order theory 11 p1783 A66-23016
- Engineering theory of thin shallow plastic shells with zero Gaussian curvature 11 p1784 A66-23314
- Dynamic transient response of cylindrical shell to internal pressure pulse generated by blast wave 12 p1959 A66-23799
- Brazier effect and overlap effect in bending of slit thin walled circular tubes [ASME PAPER 65-APMW-20] 12 p1961 A66-23976
- Linear small deflection theory and statistical analysis in dynamic buckling of thin cylindrical shell under axial impact [ASME PAPER 65-APMW-17] 12 p1961 A66-23980
- Cold forming of metals, noting thin tube flow boundary variation with permanent deformation due to torsion and tension 13 p2195 A66-25455
- Nonlinear theory of thin elastic shells, discussing surface geometry and deformation, equations of equilibrium and boundary conditions and stress functions 13 p2196 A66-25600
- Torsional oscillations of hollow cylinder of finite length encased in thin elastic shell 14 p2406 A66-27999
- Stability analysis of symmetrically loaded thin walled spherical shell, noting construction of asymptotic expansion, error estimation and application of elasticity theory 15 p2608 A66-28955
- Cylindrical thin shells with axial stringers under axial compression 15 p2614 A66-29636
- Torsion analysis of thin walled profile of bisymmetrical cross section subjected to finite twist 15 p2615 A66-29722
- Stress distribution near rigid circular inserts attached to thin spherical shells 16 p2816 A66-30859
- Stability of truncated conical thin shells under torsional load 16 p2821 A66-31382
- Laminated thin shell theory applied to calculation of elastic coefficients of fiber reinforced shells [AIAA PAPER 66-526] 16 p2822 A66-31499
- Shear effect on deflection and torsion angles in thin walled pipes theory 16 p2822 A66-31624
- Frequency equations and mode displacement functions derived for plane strain free-transverse vibration of solid cylinder with elastic core bonded to thin elastic shell 16 p2823 A66-31716
- Hollow metallic O rings used for sealing as thin shells under axisymmetric loading 17 p3020 A66-32002
- Local buckling in curved two-dimensional manifolds, detailing experimental exposition of phenomenon in stability and deformation of shallow spherical shell 17 p3021 A66-32005
- Cylindrical thin shells under pressure, axial load and torque, determining plastic yield curves 17 p3021 A66-32006

Radial loading effect on vibration frequencies of thin spherical shells 17 p3024 A66-32362

Dynamic response of clamped shallow thin elastic spherical shells under time dependent loads 17 p3027 A66-32758

[AIAA PAPER 66-446] 17 p3027 A66-32758

Accuracy of approximations using shell equations for predicting dynamic behavior of thin cylindrical shells, with exact solutions form Flugge shell equation [AIAA PAPER 66-447] 17 p3028 A66-32759

Stiffness matrix of thin flat triangular elements of nonzero Gaussian curvature derived by reducing geometrical idealization errors 17 p3028 A66-32776

[AIAA PAPER 66-530] 17 p3028 A66-32776

Transient response of thin elastic shells resting on viscoelastic foundation 17 p3030 A66-33035

Asymptotic static analysis of pressurized torus shells, predicting vibratory frequencies and buckling under external pressure [AIAA PAPER 66-445] 18 p3250 A66-33647

Torsion of slit overlapped thin walled tubes, noting change in slope at point of first instability in torque-twist relationship 18 p3253 A66-33802

Stress analysis of junction of thin elastic shells of revolution, considering axisymmetric wind and sinusoidal load distributions 18 p3253 A66-33804

Monograph on thin walled rods under bending and torsion, discussing calculations in lightweight structure design 18 p3254 A66-33966

Elastic stability of thin walled circular cylindrical shells in torsion, applying Galerkin method to Donnell equations for critical stresses 18 p3258 A66-34648

Forced motions of hollow cylinder encased in thin elastic shell and subjected to time-harmonic pressure at inner surface of cylinder 18 p3259 A66-35026

Extension of Vlasov bending theory for thin shells to include shells with undamped solutions, obtaining partial differential equations for normal deflection and stress function 19 p3472 A66-35466

Moment theory for thin spherical elastic shells under axisymmetric loading, noting role of Poisson ratio 19 p3474 A66-35851

Shock waves, boundary surfaces and thin shells in general 20 p3602 A66-37634

Beam column supported by linear rotational and extensional springs representing elasticity of test rig, used in analog study of thermal buckling behavior of thin cylindrical shells 21 p3828 A66-38706

Plastic equilibrium flow equations of thin walled shells 21 p3830 A66-38982

Monograph on stress analysis, stability calculations and oscillation estimates for thin walled shells 21 p3831 A66-39278

Novozhilov transformation of equation system for thin laminar shells 22 p3991 A66-40147

Cylindrical shell analysis for short segments of shells of revolution with axisymmetric edge-loading and variable wall thickness, using matrix method 22 p3994 A66-40369

Fredholm integral equations obtained in study of boundary value problem occurring in thin shallow shell theory 23 p4140 A66-41835

Linear thermoelastic theory of general thin shells, adopting Love-Kirchhoff assumptions and considering analogy between thermal field and fictitious body force vector 23 p4143 A66-41966

Middle surface geometry of thin shells using line coordinate system with arbitrary direction and length of base vector 24 p4291 A66-42737

Numerical integration of equations of Love first approximation for thin isotropic shells, presenting results for torus and flask having variable wall thickness 24 p4292 A66-42964

THIN WING

Text on aerodynamics of wings and bodies, emphasizing matched asymptotic expansion methods for boundary value problems and numerical techniques for loading predictions via computers 03 p0313 A66-12297

Air disturbances due to small transverse vibrations of finite span thin wing with

variable velocity 07 p0981 A66-18111

Vortex characteristics of thin very elongated wings in low velocity flow 08 p1161 A66-18719

Rotational derivative coefficients of angular wing of arbitrary aspect ratio situated in ideal incompressible media 08 p1162 A66-18875

Numerical method of calculating unsteady flow past arbitrary thin wing moving in ideal incompressible fluid 12 p1797 A66-24430

Velocity field excitation due to thin wing motion in vicinity of finite length pressure wave with variable gas parameters 12 p1797 A66-24431

Supersonic flow around thin polygonal wings and polygonal wings of symmetrical thickness studied by Carafoli hydrodynamic analogy for wings in conical flow 21 p3695 A66-39603

THIRD STAGE

SA MISSILE

SA PAYLOAD

SA SATELLITE

ELDO launch vehicle third stage configuration, propulsion system, guidance and control system and ground installations and equipment 09 p1464 A66-20468

Third stage and protective housing of Diamant launch vehicle 10 p1611 A66-21257

THIXOTROPY

Shear stress, shear rate, inelastic thixotropic properties and speed-torque curves for time-independent non-Newtonian fluids 10 p1618 A66-21885

THOMAS-FERMI THEORY

Electrostatic potential near nucleus immersed in plasma evaluated, using finite-temperature Thomas-Fermi model 18 p3230 A66-34152

Electron energy spectrum for alloyed semiconductors, determining state densities via Thomas-Fermi statistical method 20 p3618 A66-37562

Effective diffusion cross section for meteor atoms in atmosphere, using Thomas-Fermi-Dirac and dumbbell molecule models 22 p3983 A66-40764

THOMSON EFFECT

SA PELTIER EFFECT

SA SEEBECK EFFECT

Seebeck and Thomson coefficients and variable resistivity effects on thermoelectric heat pump performance 09 p1333 A66-20971

Radiative corrections to Thomson scattering in laser beams arising from damping of electron motion and photon density, using quantum mechanics 16 p2717 A66-30628

Laser mode operation in pressure of radiation absorbing impurity analyzed by extended Thomson type system 16 p2720 A66-31558

THOR LAUNCH VEHICLE

Reliability procedures in converting Thor tactical system to advanced booster in space program, noting time and costs savings 17 p3015 A66-31985

THORAX

Origin of chest pains associated with G force sinusoidal vibration, noting effect of anterior chest wall anesthetization, results suggest pain originates in chest wall 19 p3286 A66-36375

THORIUM COMPOUND

Emission of Auer-Welsbach mixture in flames 16 p2827 A66-30852

THORIUM OXIDE

Alloy additions of Zr, Ta, Nb, Re, Mo and Hf tendency to interact with thorium oxide particles in tungsten base alloys during exposure to greater than 2000 degrees C 23 p4079 A66-41067

Creep rate of polycrystalline thorium dioxide for high temperatures and pressures, examining intergranular voids formed by growth and coalescence of pores along grain boundaries 23 p4082 A66-41772

THORON

Periodic and height-dependent solutions for disturbances of concentrations of radon and thoron and decay products above Earth surface, considering turbulent diffusion and radioactive decay 19 p3453 A66-36385

THREE-BODY PROBLEM

Routh criterion concerning existence of periodic solutions around triangular libration

centers is shown to be valid only at first order

[AIAA PAPER 65-681] 01 p0134 A66-10233

Three-body problem solution in form of power series 02 p0289 A66-11655

Intermolecular forces for two-, three- and four-bodies and those in liquid or condensed medium 06 p0911 A66-16161

Nonplanar trajectory originating near Earth and passing close to Moon in restricted three-body problem 08 p1292 A66-19146

Recurrent power series integration used to compute characteristic exponents in planar restricted problem of three bodies 08 p1296 A66-19355

Trajectory analysis and Birkhoff rings in restricted three-body problem in three dimensional coordinate system 09 p1453 A66-20251

Short-period Trojan orbits in restricted three-body problem numerically determined using Jupiter and Sun as principal masses 13 p2185 A66-25807

Inclined periodic solutions of restricted three-body problem in form of orbit parameters 13 p2185 A66-25809

Periodic solutions for sputnik motion in gravitational field of two other bodies of finite mass 13 p2186 A66-25882

Soviet monograph on celestial mechanics of satellites and space probes covering trajectory problems, two- and three-body systems, space flight duration between two points, etc 13 p2188 A66-26465

Three-dimensional statically indeterminate frame with rigid nodes, noting effect of bending moments for shifting forces 13 p2207 A66-26498

Earth Moon trajectories with consecutive collisions treated, using Birkhoff transformation in planar restricted three-body problem [AIAA PAPER 65-86] 14 p2381 A66-27422

Active-control and similar-control stabilization of Lagrange solutions of restricted three-body linear perturbation problem 14 p2382 A66-27559

Nonlinear diffusion equations in electron beam excited plasma noting two- and three-body recombination, radial distribution of electron density, light intensity, etc 15 p2555 A66-29761

Three-body nonadditivity of repulsive forces on classical third virial coefficient 16 p2749 A66-30113

Three-body problem of cislunar space flight, noting effect of solar gravitational field on spacecraft trajectory 16 p2804 A66-31332

Lagrange theorem extended for solution of three-body problem to regular configurations of more than three particles 16 p2804 A66-31393

Fourier series convergence domain of perturbation function in restricted three-body problem representing planetary configuration 17 p2995 A66-31845

Perturbation function expansion in power series of eccentricities in elliptical three-body problem, describing algorithm for numerical values of Newcomb operators of arbitrary order and giving tables for Ljach series expansions 17 p2995 A66-31850

Motion of close satellite of smaller primary in restricted three-body problem referred to conventional rotating frame in which central angle is chosen as independent variable 17 p2999 A66-32066

Sundman variable for regularization of three-body problem motion equations 17 p3004 A66-32952

Dynamical system of two degrees of freedom, with application to restricted problem and lunar theory 18 p3234 A66-34654

Theory and application of motion associated with equilibrium configurations of dynamical systems applied to astronomy and space dynamics 19 p3461 A66-35888

Three-body model including low thrust forces used to generate artificial libration points or assure stability of five Lagrangian libration points in Earth-Moon space [AIAA PAPER 65-682] 19 p3461 A66-35889

Effect of Sun perturbations on motion near Earth-Moon equilateral libration points [AIAA PAPER 65-683] 19 p3461 A66-35890

Elliptic restricted problem of three bodies, discussing analytical determination of

- characteristic exponent to equilibrium solutions
[AIAA PAPER 65-685] 19 p3461 A66-35892
- Restricted three-body problem integrated by Steffensen recurrence formulas using power series 20 p3602 A66-37540
- Plane restricted three-body problem for quasi-periodic, semiergodic and escape orbits 20 p3653 A66-37765
- Restricted three-body problem in plane, with two equal masses and nonperiodic orbits 20 p3653 A66-37798
- Existence of new isolating integral in restricted three-body problem, computing orbits for various parameter values and initial conditions 24 p4272 A66-42202
- THREE-DIMENSIONAL BOUNDARY LAYER**
- Three-dimensional laminar boundary layer on body of revolution at small incidence at its stability 01 p0055 A66-10203
- Schlichting two-dimensional unsteady boundary layer problem results extended to three-dimensional periodic boundary layers 08 p1208 A66-19341
- Initial velocity and density conditions for three-dimensional boundary layer equations, noting wakes and jets 10 p1522 A66-21303
- Turbulent auxiliary functions for symmetric three-dimensional boundary layer 12 p1862 A66-23952
- Three-dimensional boundary layer separation, assuming zero friction 16 p2630 A66-31286
- Three-dimensional boundary layer flow over windward side of flat delta wing in hypersonic flow at moderate angle of attack, examining viscous-inviscid interaction [AIAA PAPER 66-492] 16 p2631 A66-31477
- Three-dimensional boundary layer for accelerating flow over semiinfinite flat plate with or without suction 17 p2911 A66-32838
- Energy transport mechanism in magnetosphere analyzed by study of character of three-dimensional hydromagnetic waves in uniform cold plasma 21 p3734 A66-39218
- Pressure gradient calculation in three-dimensional laminar boundary layer, using method of local similarity 23 p4009 A66-41724
- Motion equations, shear stress and skin friction for three-dimensional flow in conical pipes 23 p4014 A66-42062
- THREE-DIMENSIONAL FLOW**
- Three-dimensional theory of incompressible and inviscid flow through mixed flow turbomachines [ASME PAPER 64-WA/GTP-1] 02 p0176 A66-11765
- Compatibility conditions derived from Castigliano principle by three-dimensional stress function 02 p0299 A66-11804
- Three-dimensional unsteady flow in uniformly expanding layer and dispersion of gas in vacuum 02 p0220 A66-12177
- Stress concentration due to two rigid spherical inclusions in three-dimensional theory of elasticity, noting spherical dipolar harmonics [ASME PAPER 65-APMW-21] 04 p0592 A66-14222
- Fan-wing combinations for three-dimensional flow solutions investigated to determine V/STOL aerodynamic characteristics [AIAA PAPER 65-85] 05 p0606 A66-15076
- Law of wake and plane of symmetry flows in three-dimensional turbulent boundary layer [ASME PAPER 65-WA/FE-1] 05 p0664 A66-15708
- Detached shock wave created by rectilinear uniform translation of obstacle placed in perfect gas in adiabatic flow 07 p0979 A66-17448
- Method of characteristics applied to three-dimensional supersonic flow equations for compressible inviscid gas 07 p0982 A66-18130
- Three-dimensional flow past ellipsoids of revolution with outgoing shock waves, calculating subsonic and supersonic regions 08 p1162 A66-18873
- Schlichting two-dimensional unsteady boundary layer problem results extended to three-dimensional periodic boundary layers 08 p1208 A66-19341
- Simple analytical method for calculating stream functions in three-dimensional steady flow past slender bodies 08 p1166 A66-19827
- Visualization of flow in transverse plane across main stream past cylinder 09 p1364 A66-20600
- Cross flow relation to force distribution on circular cylinders curved in plane containing wind vector at subcritical Reynolds number 09 p1328 A66-20746
- Wake transition and Strouhal number for incompressible wake of solid cones, spheres, disks and teardrops 10 p1524 A66-21807
- Visualization technique for solving three-dimensional liquid flow problems, using small particles suspended in and moving with liquid 11 p1682 A66-22206
- Three-dimensional supersonic gas flow past truncated cone with shock separation calculated by method of characteristics 11 p1629 A66-22336
- Minimizing pressure drag of three-dimensional wing in linearized supersonic flow with Euler equations being partial differential equations 11 p1630 A66-22506
- Stress concentration due to two rigid spherical inclusions in three-dimensional theory of elasticity, noting spherical dipolar harmonics [ASME PAPER 65-APMW-21] 12 p1961 A66-23975
- Law of wake and plane of symmetry flows in three-dimensional turbulent boundary layer [ASME PAPER 65-WA/FE-1] 12 p1864 A66-24541
- Three-dimensional plane shock wave intersection in space, noting parameter range for which two solutions exist 13 p1991 A66-25635
- Three-dimensional periodic oscillations in jet at high Reynolds 14 p2273 A66-26929
- Three-dimensional flow visualization approach to complex flow characteristics in centrifugal impeller [ASME PAPER 66-GT-83] 14 p2274 A66-26989
- Fan-wing combinations for three-dimensional flow solutions investigated to determine V/STOL aerodynamic characteristics [AIAA PAPER 65-85] 14 p2274 A66-27415
- Variational problem of designing maximum draft nozzle supersonic section for three-dimensional supersonic flow 14 p2221 A66-28057
- Points in interior and boundary of three-dimensional supersonic gas flow determined, using characteristic method, deriving difference equations 14 p2278 A66-28284
- Three-dimensional viscous free mixing, describing numerical and experimental solutions for wake and jet flows [AIAA PAPER 65-49] 15 p2424 A66-29272
- Filter cake growth and filtration rate on circular leaf in three dimensions, noting Lucite-sugar water runs 15 p2480 A66-29671
- Three-dimensional MHD flow near forward stagnation point magnetic fields with large induction values described by differential equations, showing tendency towards two-dimensional flow 16 p2765 A66-31373
- Three-dimensional flow separation of plane boundary layer caused by half delta wing on flat plate using Cooke small cross-flow method and Maskell separation criterion [AIAA PAPER 66-428] 16 p2631 A66-31465
- Three dimensional character of wake of circular cylinder at three Reynolds numbers utilizing hot wire anemometers 16 p2632 A66-31659
- Electric and magnetic fields effect on three-dimensional laminar boundary layer of conducting fluid near line of intersection of two surfaces 17 p2971 A66-32865
- Three-dimensional flow separation about immersed surfaces 18 p3098 A66-34019
- Three-dimensional heat conduction of body of revolution of arbitrary shape for exponential temperature-time relationship 20 p3678 A66-37112
- Stress velocities and numbers and use in hydrodynamic distorted and undistorted models 22 p3897 A66-39674
- Differential equations for stream functions of particle trajectories in unsteady three-dimensional flows in cylindrical and spherical coordinate systems 22 p3898 A66-40111
- Turbulent wakes formed by elliptic disks in low speed wind tunnel, presenting similarity velocity defect profiles, drag coefficients and turbulence 22 p3844 A66-40347
- Optimization of supersonic portion of three-dimensional flow geometry in rocket motor nozzle for maximum thrust [AIAA PAPER 65-568] 23 p4007 A66-41108
- Supersonic unsteady state three-dimensional flow around blunted bodies with detached shock wave 23 p4009 A66-41718
- Steady three-dimensional rotational vortex flow of incompressible fluid, considering viscosity effects 23 p4058 A66-41929
- Steady state inviscid gas flow around conical bodies solved, using stabilization method for three-dimensional supersonic flow around smooth body 23 p4013 A66-42012
- Three-dimensional supersonic gas flow past smooth blunt bodies, considering gas dynamic equations for mixed and purely supersonic regions 23 p4013 A66-42016
- THREE-DIMENSIONAL MOTION**
- Classification of all nonplanar motions in problem of two fixed gravitation centers of arbitrary masses corresponding to real potential 02 p0292 A66-12234
- Three-dimensional configurations having minimum drag under assumption of base and wetted area while length and volume are free 04 p0453 A66-13459
- Russian book on three-dimensional problem of reaching Moon, covering power optimized trajectories, initial velocity minimum, lunar orbit, perturbation factors, etc 06 p0954 A66-16563
- Three-dimensional motion of rigid system turning about fixed axis and simultaneously oscillating along same axis 07 p1079 A66-17302
- Three-dimensional problem of isotropic continuous nonaxisymmetrical body of revolution, applying analytic functions of complex variable 08 p1307 A66-18885
- Trajectory analysis and Birkhoff rings in restricted three-body problem in three-dimensional coordinate system 09 p1453 A66-20251
- Hydrodynamic equation for ideal compressible fluid in case of steady three-dimensional vortex motion solved via two second order PDEs 12 p1865 A66-24867
- Low-thrust engine spacecraft control during boost phase, independent of velocity vector determination, by stabilizing osculating orbit plane relative to planetocentric coordinate system 15 p2534 A66-28490
- Mayor-Mises method for solution of kinematic and kinetostatic problems of three-dimensional mechanisms [ASME PAPER 66-MD-2] 21 p3741 A66-38475
- Hydrodynamic equation for ideal compressible fluid in case of steady three-dimensional vortex motion solved via two second order PDEs 22 p3899 A66-40328
- Phase shift from scattering by atoms with attractive potentials, predicting virtual energy states for incident energies in three-turning point range 22 p3951 A66-40906
- THREE-FLUID MODEL**
- Refractive index of plasma in vicinity of hybrid ion-electron resonance determined within three-fluid model, including collisions and pressure terms 07 p1084 A66-17206
- Propagation mode in waveguide filled with partially ionized magnetoplasma, obtaining dispersion relations for hydromagnetic and acoustic waves by three-fluid method 07 p1091 A66-18408
- Continuum source molecular beam facility, examining effect of source-skimmer distance variation on flux and spatial distribution of beam in collimation chamber downstream 16 p2746 A66-30386
- Three-fluid hydromagnetic computer code for studying dynamic phase of small theta-pinch, noting effects of impurity ionization and radiation losses 18 p3148 A66-34911
- THRESHOLD**
- SA NOISE THRESHOLD**
- Optical-misalignment effect on threshold power of solid state laser and compensation via lens in resonator 05 p0698 A66-15854
- Threshold data for ruby and neodymium laser pulse-induced breakdown in Xe, Ar, Kr, Ne, He, oxygen, nitrogen, air and carbon dioxide 13 p2100 A66-26191
- Weak field effective mass approximation

calculations of absorption coefficient in presence of electric field for transitions at normal threshold extended to arbitrary orientation of electric field in solid 19 p3447 A66-36397
 Estimation method of learning time of time-varying threshold learning processes /TLP/ 19 p3333 A66-36664
 Threshold determination of pulsed ruby laser by single pulse technique 20 p3578 A66-37548

THRESHOLD CURRENT

UV and visible laser oscillations in fluorine, phosphorus and chlorine atoms in pulsed chlorine, phosphorus fluoride and sulfur fluoride gas 01 p0083 A66-10972
 Current-voltage characteristics of gallium arsenide diode noting temperature effect on threshold voltage and breakdown current 03 p0346 A66-13323
 Gallium arsenide p-n junction laser diode covering injection current distribution, density and emission spectra variation 05 p0692 A66-14659
 Temperature dependence of emission spectrum and threshold current in GaAs lasers 07 p1042 A66-17333
 Kinetic theory of semiconductor laser with p-n step junction 08 p1234 A66-19612
 Orientation of surface of III-V compounds for junction lasers determined to reduce threshold current 08 p1235 A66-19699
 Hole and electron smearing and p-type absorption influence on threshold current 11 p1715 A66-23478
 Refractory metals and metal alloys analyzed regarding electron work function and threshold temperature for surface ionization in all-metal guard ring diode with directly heated wire [AIAA PAPER 66-223] 13 p2129 A66-25171
 Gallium arsenide p-n junction laser diode, injection current distribution, density and emission spectra variation 13 p2092 A66-25934
 Current-voltage characteristics of gallium arsenide diode, noting temperature effect on threshold voltage and breakdown current 14 p2260 A66-28297
 Kinetic theory of semiconductor laser with p-n step junction 17 p2936 A66-33126
 Gate controlled threshold voltage of silicon p-i-n diode having negative resistance phenomenon in forward direction 17 p2987 A66-33323
 Optimization of control loop type for minimum threshold which is function of modulation index, obtaining results using sine wave modulation 19 p3301 A66-35695
 Near-threshold behavior of phase-locked devices, noting phase error processes 19 p3301 A66-35697
 Gain factor variation with threshold current in reflective and antireflective films of GaAs laser with photon and current densities 20 p3581 A66-38388

THRESHOLD DETECTOR

Accurate measurement of signal to noise ratio 05 p0634 A66-15497
 Auditory threshold location and uncertainty as function of tone parameters and fatigue examined for pulsed and continuous tones, using Bekesy audiometer 09 p1337 A66-20954
 Statistical model of switching time jitter for tunnel diode threshold-crossing detector 12 p1842 A66-24655
 Test instrumentation for threshold sensitivity and noise bandwidth measurement of narrow band phase-locked receivers, employing statistical techniques 13 p2079 A66-25659
 Parameter variations and stability problem in coarse-fine synchro servos leading to expressions for optimum threshold detector setting 13 p2000 A66-25840
 Sensor threshold definitions applied to rate gyros, comparing old and new AIAA specifications, noting threshold definitions relation to flight control system malfunctions 16 p2708 A66-31439
 Multichannel sequential detection in case of reception through independent multiple channels with noise 19 p3296 A66-35295
 Threshold technical possibilities of measuring phase /frequency/ fluctuations of generators by Vhf discriminators 20 p3513 A66-37150

Latitude dependence of neutron multiplicity detected by shipborne neutron monitor, examining threshold rigidity dependence on intensity of events 20 p3632 A66-38078

THRESHOLD GATE

Threshold parameters and spectral composition of radiation of neodymium-glass laser in dispersion 08 p1234 A66-19669
 Integer linear programming to design combinatorial network of threshold gates capable of evaluating partially specified Boolean function 10 p1517 A66-21698
 Threshold parameters and spectral composition of radiation of neodymium-glass laser in dispersion resonator 10 p1543 A66-21836
 Conduction through insulating layers in insulated-gate FET, noting tunneling and breakdown 11 p1672 A66-23463
 Multithreshold threshold element design, discussing realization based on Boolean functions, network synthesis employing transformation technique and logical design application 13 p2039 A66-25803
 Coupling coefficient between TE 11 and TM 11 mode in tapered circular waveguides, noting behavior near cut-off frequency 17 p2895 A66-33275
 Silicon field effect device with AC/DC fields superimposed on gate terminals analyzed for determination of distribution of defect introduction rate with depth, especially near threshold energies 19 p3435 A66-35413

THRESHOLD LOGIC

Necessary conditions for realization of Boolean threshold function by means of real threshold elements 04 p0504 A66-13968
 Iterative procedure for determining linear separability of Boolean function and threshold functions for logical switching circuit design 07 p1059 A66-17971
 Linearly separable codes for adaptive threshold networks for pattern recognition 10 p1507 A66-21696
 Neural, threshold, majority and Boolean logic techniques compared for reliability and efficiency in adaptive machines and data handling systems 11 p1659 A66-22300
 Variable threshold logic, integrated logic circuits which eliminate noise effects in digital equipment 11 p1676 A66-22685
 Transistorized pulse height selector with logically separated threshold outputs and trigger circuit with emitter coupling 21 p3713 A66-39324

THRESHOLD SHIFT

Length dependent threshold data for stimulated Raman emission in liquids, noting correlation between laser beam self-focusing and onset of Raman emission 16 p2716 A66-30157
 Hearing impairment from overexposure to impulsive noise, noting relationship between temporary threshold shift and peak level and duration of impulsive noise 17 p2862 A66-31948
 Speech communications effects and temporary threshold shift reduction characteristics of British-made earplugs under quiet and high intensity impulsive noise backgrounds 24 p4168 A66-42857

TROAT**S THYROID****THROMBIN**

Thromboelastographic investigation of short duration high-intensity chest-to-back impact deceleration in rats 22 p3856 A66-40502

THROTTLING

Throttle devices to control compressible gas flow, using gas dynamics laws 01 p0006 A66-10464
 Internal ballistic considerations in hybrid rocket design, noting throttling and regimes of operation involving effects of surface-or gas-phase reaction kinetics [AIAA PAPER 66-628] 20 p3863 A66-38035

THRUST

SA MICROTHRUST
 SA NOZZLE THRUST COEFFICIENT
 SA ROCKET THRUST
 SA STATIC THRUST
 SA VARIABLE THRUST
 Combustion efficiency measurement of jet-engine systems, noting role of static

pressure in outflow nozzle 20 p3681 A66-38444

THRUST AUGMENTATION

Design and comparison of apogee impulse systems developed for booster rocket thrust augmentation 04 p0573 A66-13544
 Recent developments in vectored-thrust Pegasus turbofan engine used in V/STOL subsonic strike fighters 04 p0573 A66-13937
 Tip turbine lift-fan system with single rotor for thrust augmentation of gas generator for advanced V/STOL aircraft [AIAA PAPER 65-708] 05 p0611 A66-15164
 Incompressible fluid static thrust augmentation devices for aircraft propulsion for cases of presence and absence of heat and work exchange [ASME PAPER 66-GT-116] 14 p2373 A66-27006

S-61F helicopter flight test program, noting design modifications for high speed performance 17 p2844 A66-32726
 Rotary jet flow induction studied with analytical flow model, noting mutual deflection of primary and secondary flow and jet dissipation 19 p3277 A66-36488
 Thrust magnitude control for solid rocket by fluid injection just upstream of throat 21 p3818 A66-38695
 Up-rated saturn IB launch vehicle, examining payload augmentation by propellant substitution, S-IB stage propellant tank extension and addition of strap-on solid propellant rocket motor [SAE PAPER 66-0462] 24 p4281 A66-42396

THRUST BEARING

Opposed hydrostatic pad proportions and flow restriction in affecting load capacity, flow and pad stiffness 03 p0373 A66-12930
 Microslip between ball and track in ball-thrust bearings with ball subjected to forces, and spin moment 04 p0527 A66-14238
 Stability bounds for externally pressurized gas-lubricated thrust bearing [ASME PAPER 65-WA/APM-31] 05 p0689 A66-15452

Pressurizing thrust bearings through use of ions and high electric fields [ASME PAPER 65-WA/LUB-1] 05 p0689 A66-15525

Stability bounds for externally pressurized, gas-lubricated thrust bearing [ASME PAPER 65-WA/APM-31] 12 p1885 A66-23970

Pressurizing thrust bearings through use of ions and high electric fields [ASME PAPER 65-WA/LUB-1] 12 p1888 A66-24546

Designing hydrostatic journal-and thrust-gas bearings 13 p2085 A66-25365
 Pressure distribution of gas-lubricated spiral-groove thrust bearing or compressor [ASME PAPER 66-LUBS-1] 17 p2931 A66-33176

Spiral-groove bearings calculation method and dimensionless graphs and tables for design [ASME PAPER 66-LUBS-7] 17 p2931 A66-33180

MHD lubrication flow in thrust bearing, noting fluid inertia effect on load capacity and flow rate [ASME PAPER 66-LUBS-8] 17 p2931 A66-33181

Split-inner-race ball bearings design for use as thrust bearings on aircraft gas turbines [ASME PAPER 66-LUBS-10] 17 p2931 A66-33183

Reduction of friction forces in radial thrust bearings and three-point-contact bearings when compulsory oscillations of outer and inner races have same direction in both bearings 21 p3745 A66-39333

THRUST CHAMBER**S COMBUSTION CHAMBER****S ROCKET CHAMBER****THRUST CONTROL**

Optical metrological and alignment methods for fast and accurate rocket thrust chamber alignment [SAE PAPER 65-0758] 01 p0078 A66-10836
 Hybrid propulsion application to advanced missions covering fuel consumption, combustion efficiency and throttling performance [AIAA PAPER 64-226] 03 p0415 A66-12748
 Thrust-control system on XC-142A tilt-wing

aircraft considered in connection with structural design of aircraft hover, transition and acceleration
[AIAA PAPER 65-769] 03 p0321 A66-13063

Thrust modulation with minimum limit cycle in bang-bang system, reducing fuel consumption for spacecraft attitude control system
03 p0432 A66-13206

Throat area variation in expansion-deflection nozzle to obtain thrust modulation, noting increased coefficient of thrust
04 p0574 A66-14390

Electron bombardment ion thrusters with two accelerator-grid systems for producing ion beams in directions 180 or 90 degrees apart
[AIAA PAPER 66-248] 10 p1593 A66-21457

Synchronous orbit stationkeeping techniques, examining thrust control requirements of spin-stabilized spacecraft
[AIAA PAPER 66-304] 12 p1955 A66-24771

Idealized rockets with constant rate of mass-change and thrust
13 p2184 A66-25756

Linear dynamic analysis of angular motion of spinning axisymmetrical rocket or spacecraft, emphasizing rigid body with thrust misalignment and another motion caused by deflection of control surfaces or jets
22 p3988 A66-40618

Wind tunnel flight data correlation program, considering tunnel wall effects, measurement and control of thrust and propeller blade angle
[AIAA PAPER 66-737] 22 p3893 A66-40627

THRUST EFFECT

Torque-free precession of spin stabilized spacecraft, showing thrust misalignment as cause for final burnout
16 p2810 A66-30903

Derivative-expansion method of first-order asymptotic expansion of takeoff of satellite from circular orbit by small thrust inclined at finite angle to radius vector
[AIAA PAPER 65-688] 19 p3462 A66-35894

Asymptotic calculation of effect of small tangential thrust on satellite motion, problem solved for satellite orbit in first and second approximation
19 p3472 A66-36842

THRUST MEASUREMENT

Three electronic/digital computer techniques for compensating errors in transient-thrust measurements of captive rocket engine
04 p0507 A66-13613

Thrust measurement for calibrating nozzle flow coefficients by direct primary method
[ASME PAPER 64-WA/FM-3] 06 p0871 A66-16220

Three-axis limit cycle operation of reaction jet attitude stabilization system
08 p1304 A66-19515

Thrust stand simulation for determining space vehicle rocket motor attach-point motion
10 p1520 A66-21934

Axial current distribution in exhaust of magnetic annular arc, examining effect of entrainment on thrust measurement
[AIAA PAPER 66-198] 11 p1761 A66-23084

Electrical propulsion engine performance accurately measured by thrust balance design, using flotation and flexible propellant lines
[AIAA PAPER 66-228] 11 p1761 A66-23085

Electron bombardment thrusters using liquid mercury cathodes, noting lifetime, propellant and power efficiency, feed system, temperature limits, etc
[AIAA PAPER 66-232] 13 p2172 A66-25172

Exhaust nozzle performance noting testing techniques, cruise engine installations, data accuracy, etc
[AIAA PAPER 66-641] 18 p3048 A66-34221

Analog computer method for reconstruction of data distorted by physical system response noise
20 p3827 A66-36888

Pressure, temperature, gas velocity, thrust and specific impulse of rocket combustion chambers determined, using differential equation and Runge-Kutta method
24 p4261 A66-42743

THRUST POWER

Air conditions, flight altitude and fuel composition effects on ramjet engine, specific impulse and efficiency
01 p0130 A66-10925

Optimal rotation of plane of circular orbit by transverse thrust force, deriving differential equations for rotational maneuver
02 p0289 A66-11653

V/STOL aircraft engine technology, discussing engine configuration, lift augmentation, thrust deflection, efficiency parameters, etc
06 p0943 A66-17023

Durability test of mercury electron-bombardment ion thrusters, measuring lifetime, output, power efficiency, etc
[AIAA PAPER 66-231] 11 p1760 A66-22218

Scramjet aircraft performance capabilities, noting operating parameters such as thrust coefficient, flight velocity, acceleration, fuel consumption, etc
13 p2173 A66-26032

Power conditioner, source and heat removal equipment considered for ion engines
[AIAA PAPER 64-764] 13 p2174 A66-26659

Efficiency of two-stage repetitively pulsed coaxial plasma engine calculated from engine thrust and total mass flow
[AIAA PAPER 66-342] 17 p2990 A66-32448

Electromagnetic induction electrodeless plasma accelerator for thrust generation applicable to space vehicle propulsion
[AIAA PAPER 66-567] 18 p3164 A66-34429

THRUST PROGRAMMING

SA OPTIMUM THRUST PROGRAMMING

Thrust programming in central gravitational field, discussing reduction of Mayer-Bolza variational problem to boundary value problem for system of nonlinear differential equations
18 p3241 A66-33846

Mechanics of spiral flight noting characteristics, minimum thrust condition and transfer trajectories for rendezvous purposes
21 p3817 A66-39644

THRUST VECTOR CONTROL /TVC/

Minuteman flight control system using sampled data control for steering vector thrust nozzles
01 p0105 A66-10687

Liquid injection thrust vector control noting general requirements, injectant metering point, stream solidity collimators, secondary flow, metering configuration and nozzle back pressure
02 p0180 A66-11972

Carrier landing characteristics of vectored-thrust aircraft obtained in piloted fixed-base flight simulator studies
[AIAA PAPER 65-792] 03 p0390 A66-12560

Thrust vector control using thrust jet deflection for VTOL aircraft systems
06 p0943 A66-17022

Solid propellant rockets including stop-restart and variable-thrust engines, materials, propellant structural characteristics, nozzles, thrust-deflection systems, etc
08 p1280 A66-18573

Navigation, guidance and control of spacecraft in interplanetary space, considering free-fall flight and thrust-vector stabilization during accelerated flight
08 p1248 A66-18586

Thrust-vector control and flow field produced by secondary gas injection into supersonic stream
08 p1162 A66-18831

Optimal steering laws and thrust direction turning rate in required-velocity guidance
10 p1609 A66-21899

Optimal control program satisfying all boundary conditions, noting application to thrust vector control
11 p1733 A66-23336

Microthrust ion engine system with thrust vector control, using ion beam deflection
[AIAA PAPER 66-204] 12 p1937 A66-24526

Development and performance of cesium ion engines for satellite control, noting lifetime, fuel consumption reliability, thrust vector control, etc
13 p2172 A66-25173

Solid propellant rocket engine omnixial liquid injection thrust vector control system, using function generator in signal-summing feedback loop to control flow in servovalves and increase motor reliability
14 p2226 A66-27700

Low-thrust engine spacecraft control during boost phase, independent of velocity vector determination, by stabilizing osculating orbit plane relative to planetocentric coordinate system
15 p2534 A66-28490

Secondary injection control of single rocket nozzle roll
17 p3017 A66-33078

Free-air thrust vector control using secondary injection of air into nozzle flow to reduce weight, cost and complexity applied to rocket engine steering
18 p3247 A66-34953

Pressure distribution on nozzle block of

oblique-exit-plane nozzle with supersonic turbulent flow and calculation of thrust, thrust vector and torques
24 p4157 A66-42774

THRUST-WEIGHT RATIO

Engine drive design for high speed VTOL aircraft, discussing thrust requirements, system type and leading area parameters
06 p0943 A66-17018

Takeoff dynamics of VTOL aircraft, noting thrust-weight ratio, wing load, initial thrust angle, engine tilt, etc
11 p1733 A66-23339

Ion thrusters in micropound range for satellite stationkeeping, with description of microthruster design
[AIAA PAPER 66-212] 12 p1936 A66-24523

Saturn IVB vehicle constraints noting burning time, associated design problems, performance requirements, propellant management, etc
[SAE PAPER 660441] 18 p3245 A66-33889

Supersonic transport propulsion systems noting thrust requirement, noise reduction, commercial feasibility, etc
[SAE PAPER 660297] 18 p3165 A66-34943

Optimum stage initial acceleration and velocity distribution between stages for maximum payload ratio in single and multistage vehicles
19 p3470 A66-36620

Reusable first stages using liquid propellant compared with nonreusable stages using solid and liquid combinations, for minimum cost of loaded-and-ready-for-launch stage cost per unit of stage payload mass
19 p3470 A66-36623

Power plant development trends and effect on short and vertical takeoff aircraft design, noting improvement in thrust-weight ratio
24 p4262 A66-43051

THRUSTOR

SA PROPELLANT ACTUATED DEVICE

Exhaust beam from colloid thruster investigated, using quadrupole mass filter
[AIAA PAPER 64-674] 02 p0278 A66-11549

Large vacuum facility tests of MPD arc thruster
[AIAA PAPER 66-117] 08 p1282 A66-19001

Pulsed ablating-plastic thruster in momentum and mass consumption measurements
08 p1282 A66-19138

Vacuum arc thruster experiments in development of electric propulsion system for spacecraft
[AIAA PAPER 66-202] 10 p1592 A66-21444

Electron and ion emission from pulsed ruby laser illuminated metallic surface into vacuum, determining application to pulsed ion thruster
[AIAA PAPER 66-230] 10 p1542 A66-21453

Colloidal thruster with hot cathode charged colloidal particle source
[AIAA PAPER 66-255] 10 p1593 A66-21460

Electric propulsion system effective mass dependent on trajectory, vehicle parameters and thruster characteristics
[AIAA PAPER 64-676] 10 p1595 A66-21936

Arc heating, self-magnetic acceleration and supersonic flow in plasma thrusters
[AIAA PAPER 66-237] 11 p1760 A66-22220

Propellant properties and particle formation efficiency determined for homogeneous condensation-type colloid thruster
[AIAA PAPER 66-253] 11 p1760 A66-22221

Advanced low-thrust propulsion systems and propellants evaluation for stationkeeping and stability control of NASA Manned Orbital Research Laboratory
[AIAA PAPER 66-226] 12 p1936 A66-24522

Colloid particle electrostatic thrusters for lunar ferry missions in specific impulse range 1000-3000 sec
12 p1937 A66-24903

Weight criteria for integration of nuclear-electric power supply with electric thruster system as primary spacecraft propulsion
[AIAA PAPER 64-765] 13 p2173 A66-26611

Electron cyclotron resonance plasma thruster for spacecraft electric propulsion systems
14 p2374 A66-27520

Quasi-steady-state operation of arc thruster obtained with pulse time of few hundred microseconds, producing continuous plasma stream
[AIAA PAPER 65-338] 15 p2572 A66-29276

Model of discharge in electron bombardment thrusters noting mechanism and interplay between discharge plasma and cathode
[AIAA PAPER 66-244] 16 p2791 A66-31153

Additional measurements from electron-magnetic field interactions and power limitations in coaxial filament and anode geometry in electron bombardment heated thruster 17 p2990 A66-32462

Computer simulation and performance prediction of MMU astronaut maneuvering system, discussing acceleration, velocity, displacement, fuel consumption, propulsion efficiency 19 p3291 A66-35964

Thruster device using self-induced magnetic Lorentz forces to attain velocities up to 50,000 m/sec for plasma jet ejected by electric arc engines 19 p3451 A66-36637

Digital computer program for solution of space-charge-flow problem applied to design of thrusters with variable thrust vector, analyzing two ion-thruster configurations with aid of computer 20 p3629 A66-38179

Large vacuum facility tests of MPD arc thruster [AIAA PAPER 66-117] 21 p3777 A66-38716

THULIUM

Laser characteristics of and coherent oscillations from trivalent Tm, Ho, Yb and Er ions in yttrium aluminum garnet 01 p0079 A66-10241

Ionization potential of thulium obtained from hfs of thulium I, using discharge tube and Fabry-Perot etalon 03 p0393 A66-12322

Heat magnetization in simple model applied to thulium intermetallic compounds 16 p2745 A66-30177

Two-step excitation quantum counter fluorescence in trivalent thulium ion at room temperature 18 p3152 A66-33607

THUNDERSTORM

Evaluation of radar observations for identification of thunderstorm clouds on continuous background of cumulus and nimbus clouds 02 p0252 A66-11266

Statistical relations between weather conditions and geometry of radio echoes produced by cloud and precipitation fields 02 p0252 A66-11268

Radar reflectivity of developing convective clouds statistically related to state of turbulence and thunderstorm hazard 02 p0252 A66-11270

Ionizing radiation as potential lightning hazard, noting lightning protection device for medical and industrial buildings 03 p0423 A66-13266

Cloud physics - International Conference, Tokyo and Sapporo, Japan, May 1965 06 p0904 A66-16266

Electrical structure of thunderstorms, particularly weak portion of squall line thunderstorm complex, using aircraft photography, radar data, etc 06 p0905 A66-16270

Three storm cells evolving from ordinary mature stage into tornadic SR mature stage [AFCL-SR-32-65] 07 p1061 A66-17367

Electric conductivity, electric field and space charge of atmosphere under fair weather or thunderstorms 09 p1371 A66-20275

Radar hook observed with 21-decibel gain reduction in Kansas-Oklahoma thunderstorm 09 p1400 A66-20732

Bremsstrahlung produced during stoppage of electrons generated by thunderstorms can create ionized columns extending to ionospheric heights 10 p1529 A66-21158

Observations of vertical motion and particle size of growing thunderstorm moving overhead, using pulsed Doppler radar 10 p1552 A66-21277

Strong electric-field radiosonde for thunderclouds, noting sounding results 11 p1725 A66-22198

Cumulus to cumulonimbus convection over mountains and dissipation of stratus and sea fog when moving inland, using Tiros photographs 11 p1728 A66-22321

Preferred thunderstorm development near surface boundary between maritime tropical air masses and dry air masses, defining radar echo areas 11 p1731 A66-23382

Tornado dehydration and burning effects in terms of conventional hot wind mechanism, corona discharge mechanism and new ring-current mechanism 13 p2122 A66-26126

Nonconducting fluid motion in infinite tube applied to violent thunderstorm dynamics, reducing current intensity to

value for convection currents 14 p2346 A66-28268

Pilot techniques for control of passenger transport aircraft during CAT or thunderstorm 15 p2426 A66-28935

WSR radar four-year climatology of thunderstorm penetrations of tropopause at ten locations in U.S. 22 p3944 A66-40430

THYMUS

Cosmic and UV radiation effects on breakdown of DNA and production of tumors in mice 13 p2008 A66-25642

THYRATRON

Thyratron generator of nanosecond high voltage pulses 04 p0495 A66-13884

Thyratron temperature regulator, operation and application 08 p1223 A66-18799

Thyristors for forced-commutated static converter, noting turn-on and turn-off behavior 13 p2029 A66-25115

Thyratron generator of nanosecond high voltage pulses 15 p2466 A66-29696

High-voltage generators of nanosecond pulses, noting delay stability between triggering and output pulses, using thyratrons as commutators 20 p3529 A66-37519

Thyristor circuit, basis for capacitive switching circuits, expressing switching capacitance by DC source 24 p4181 A66-42485

Versatile electric timer possessing six independent timing channels, useful in analog and hybrid computation 24 p4183 A66-42642

THYROID

Chronic hypoxia effects on thyroid function of rats, discussing radiolodine trapping and acinar cell length 14 p2227 A66-26811

THYROXINE

S HORMONE

TIDAL OSCILLATION

Solar system formation theory that planets were formed from gigantic gaseous suns as result of tidal action and loss of mass by suns 01 p0135 A66-10298

Tidal de-spin of Mercury and Moon noting solar torque on planets 03 p0426 A66-12892

Atmospheric tidal oscillations, Coriolis forces dominate diurnal tide causing small scale depth 05 p0672 A66-15026

Secular acceleration of Phobos attributed to tidal friction, considering effects of lower estimate of Phobos density 05 p0768 A66-15769

Least squares method to determine diurnal lunar tide fluctuations from observations of Pulkovo, Greenwich and Tokyo Time Services 06 p0954 A66-16426

Lunar tide calculated by analysis of perturbations in inclinations of two nearly polar satellites 06 p0877 A66-16781

Phillips frequency-dependence rule for sporadic E extended for better statistical coincidence with lower frequency data 11 p1695 A66-22372

Correlation between sunspots and solar tide, calculating solar tide amplitude in planet parameters 13 p2181 A66-25441

Meteorological rocket wind observations, noting diurnal oscillations and tidal characteristics 13 p2122 A66-26131

Numerical calculation of periods of natural oscillations and corresponding eigenfunctions of planetary atmospheres as function of planets rotational speed 14 p2381 A66-27534

Lunar tidal variations in monthly median noon critical frequency in American zone during low solar activity 14 p2285 A66-27727

Biennial stratospheric tidal oscillation at tropical latitudes 15 p2530 A66-28602

Classical theory of tidal oscillations of plumb line acting under solar and lunar tidal forces 15 p2596 A66-29142

Terrestrial tidal deformation effect on close satellite motion 16 p2800 A66-30659

Diurnal oscillation in zonal and meridional winds determined, using harmonic analysis on data obtained from meteorological rocket soundings 16 p2699 A66-31641

Secular variations of lunar orbit due to tidal friction 17 p3005 A66-33005

Gravitational shielding and absorption, examining tidal effects induced in solid sphere by another sphere, analogy to electromagnetic fields, etc 18 p3135 A66-34450

Dynamical effects of liquid nucleus of

Earth in diurnal terrestrial tides 20 p5553 A66-38068

Semidiurnal oscillation in surface pressure as result of strong resonance amplification of small oscillations due to surface heating and gravitational tidal force of Sun 22 p3942 A66-40052

Lunar orbit evolution caused by tidal friction in Earth and Moon interiors 22 p3985 A66-40956

Numerical calculation of periods of natural oscillations and corresponding eigenfunctions of planetary atmospheres as function of planets rotational speed 24 p4273 A66-42320

TIDE

SA ATMOSPHERIC TIDE

SA LUNAR TIDE

Gravimeter error in recording of Earth tides, examining leveling and calibration problems 14 p2298 A66-284000

TIG

S TUNGSTEN INERT GAS /TIG/ WELDING

TILT-WING AIRCRAFT

Structural dynamics of XC-142A tilt-wing VTOL aircraft including flutter, vibration, environmental acoustics, etc [AIAA PAPER 65-790] 03 p0318 A66-12558

Thrust-control system on XC-142A tilt-wing aircraft considered in connection with structural design of aircraft hover, transition and acceleration [AIAA PAPER 65-769] 03 p0321 A66-13063

Flight controls of tilt wing XC-142A aircraft, noting mechanization and operation of wing and flap control system 06 p0809 A66-16815

Control and lift-propulsion systems and model testing of Canadair CL-84 V/STOL tilt-wing aircraft 06 p0806 A66-16818

XC-142A V/STOL four-engine aircraft in first twelve months of flight, discussing effect of stabilization failure in hover, conversion and STOL areas of operation 07 p0986 A66-17269

Flight characteristics and test program of CL-84 light tilt-wing V/STOL Army support vehicle 07 p0986 A66-17271

Stability and control test program for Canadair CL-84 tilt-wing V/STOL aircraft prototype [SAE PAPER 660315] 15 p2427 A66-29639

CL-84 V/STOL flight simulation at Canadair through design, development and flight testing of flapped tilt-wing prototype [ICAS PAPER 66-18] 24 p4159 A66-42493

S REVERSE TIME

S TEST TIME

S TRANSIT TIME

TIME CONSTANT

Cryotron-type DC to AC voltage converter and measurements of cryotron circuits 04 p0494 A66-13755

Luminescence decay of electron bombarded CdS, measuring time constants 05 p0737 A66-15173

Design charts for transient response times of thin film networks used in digital circuits 06 p0842 A66-16009

Transient resistance and time delay of protective glass coatings on film resistance thermometer 06 p0882 A66-16845

Steady thermal inertia of chromel-alumel and copper-constantan microthermocouples 06 p0882 A66-16846

On-off controller with aperiodic element changing time constant, with position of relay determining transfer function 08 p1201 A66-19690

Pressure transducer with small time constant where pneumatic pulse is transformed into electric signal by means of photoelectric principle 11 p1708 A66-23235

Alteration of antenna spatial frequency response due to time constant of radiometer and scan velocity 12 p1837 A66-24311

Time constant of turbine-flow meter

- nsor 14 p2295 A66-27712
- ryotron-type DC to AC voltage converter 05 p0628 A66-15732
- measurements of cryotron Automatic synchronization system for antenna based only on geometric considerations 06 p0835 A66-16865
- step response of saturating feedback Approximate methods for plotting amplifier with single time constant, noting logarithmic frequency responses of discrete design graph for amplifier systems with and without time lag, noting in 16 p2660 A66-30580
- quadrupole mass filter coupled to shock PAM systems 07 p1012 A66-17382
- for analysis of reaction kinetics noting Microwave all-pass circuits consisting of n source, time constant, smoothness of reactive networks used in conjunction with ak, etc 17 p2904 A66-33464
- Active and passive multiplication of RC wideband circulators or couplers, noting me constants for subaudio frequency resultant phase distortion 07 p1006 A66-17502
- egrated filters 23 p4046 A66-41581
- TE DELAY Tape recording meteor diffraction characteristics from three stations by
- ransistor time delay device with circuit measuring velocities and orbits of individual ability used in portable meteors by radio 07 p1032 A66-17637
- structions 01 p0046 A66-11053 Diurnal intensity time variation of cosmic
- Polish Meteor 1 meteorological rocket ray neutrons compared with relative number equipment, examining gas pressure operated of sunspots observed 07 p1127 A66-18014
- time-delay system used for ejecting dipole Statistical characteristics of delay time antainer 01 p0071 A66-11064 between ignition and discharge pulses of
- Stability limit on forward gain in control ISSH 100-3 spherical stroboscopic tube 09 p1353 A66-20363
- systems with small time delay by Monolithic transistor-transistor logic gate approximating exponential in characteristic capable of 1 to 2 nanosecond equation 02 p0207 A66-11877 delays 10 p1511 A66-21697
- Lapunov function determining sufficient Stability of linear time-lag systems with conditions for stability of autonomous stochastic parameters examined, deriving functional differential equations with finite sufficient condition for asymptotic time lag 02 p0249 A66-11900 stability 11 p1674 A66-22224
- Integral restrictions on time delay of Periodic mode of operation of relay linear phase low pass matching networks automatic system with variable delay with prescribed parasitic element 11 p1681 A66-23333
- ads 02 p0208 A66-11909 Second order dynamical systems with time WLF radio propagation conditions and phase delays in design of long range lag, negative damping coefficient and/or navigation aids 02 p0259 A66-12053 negative spring constant, employing
- Stability problem of steady motions, using Pontryagin results differential equations with time [ASME PAPER 65-APMW-11]
- High-accuracy digital circuits producing Stability criteria for second order variable pulse delay measured by timing dynamical systems with time lag [ASME PAPER 65-APMW-12]
- 03 p0341 A66-12521 12 p1913 A66-23981
- Spectral differences measurement in group Bang-bang damping rate on system delay times of pulses useful for observation components with time delay and location of storm 12 p1850 A66-24263
- 03 p0335 A66-12894 Cavitation delay time variation with velocity, size, dissolved air content, liquid
- Time lapse in variable-structure automatic tension, flow history and surface control systems 03 p0350 A66-13045 characteristics
- Lasers as triggering mechanism for spark [ASME PAPER 65-FE-9] 12 p1864 A66-24552
- aps, noting delay time between pulse Errors by mutual interference in arrival and current flow 03 p0379 A66-13247 frequency-time coding in satellite
- Theoretical transit time of magnetostatic communications systems, deriving spin waves propagated at microwave expressions relating commissive and frequencies in normally magnetized ommissive error rates, simultaneous users per unit bandwidth, etc 12 p1821 A66-24752
- isk 04 p0561 A66-13735 Signal amplitude of Transit IVA satellite
- Group delay time and group velocity recorded at two stations, using time measurement methods in radio technology, difference between observing similar noting phase-characteristic transconductance, fluctuations in fading period to determine pulse modulation, etc 04 p0482 A66-13902 height of ionospheric
- Analytical design of controller for Irregularities 12 p1874 A66-24843
- stabilization of linear system with random Integrated circuits with propagation delays delay in form of intermittent Markov in nanosecond range, noting emitter coupled process 04 p0504 A66-13973 logic circuit 13 p2036 A66-25534
- Second order dynamical systems with time Delays effect on performance of coaxial lag, negative damping coefficient and/or plasma guns with about 20 kv applied, shown to produce fast burst of clean plasma negative spring constant, employing ion 13 p2000 A66-25750
- Pontryagin results Components of gradient of performance [ASME PAPER 65-APMW-11] criterion in adaptive control systems, employing correlation technique by use of
- Stability criteria for second order dynamical systems with time lag 04 p0546 A66-14216 time delay 13 p2051 A66-26067
- [ASME PAPER 65-APMW-12] 04 p0546 A66-14217 Spatial selective fading as random process, discussing spatial coherence, wave number
- Numerical characteristics of signal-noise dispersion profile, time delay profile, etc, in mixture at output of autocorrelation device for sinusoidal signal and Gaussian ionospheric propagation 14 p2234 A66-26859
- noise 04 p0501 A66-14407 Split Teflon shield to delay exposure of nuclear explosion generated spectral plasma arc probe to air jet until equilibrium lines 05 p0667 A66-14789 conditions have been
- Whistler in Alouette I satellite VLF attained 14 p2412 A66-27448
- recordings, variation of time delay with Solution of optimum filtering problems frequency given by Eckersley law time when input signals of automatic control system are described by different delay and additive correction 05 p0668 A66-14797 differential equations at successive time intervals 14 p2265 A66-27523
- term 05 p0668 A66-14797 Approximation of variable time delays and design of constant and variable delay
- Optical ultrasonic delay lines as correlators circuits, noting simulation of delays in and variable code matched filters to achieve automatic control systems by large time-bandwidth products and high data computers 14 p2266 A66-27528
- Microscope modification for time-lapse Formula derivation for dynistor delay time cinematography noting holding camera stand, and switching-on time on basis of system of reflecting light mirror, culture chamber, charge equations 14 p2254 A66-27741
- etc 05 p0677 A66-14865
- Simultaneous monotic masking of signal by changes and dependent upon delay of tone relative to masker onset 05 p0628 A66-15732
- Performance testing, evaluation and system specification of broadband predetection recording instruments 14 p2298 A66-28430
- Schlieren photographs of spark ignition in turbulent gas mixture flows and analysis of ignition delay and burning velocity 15 p2616 A66-29069
- Lumped-constant filters whose bandpass depends only on one parameter of transmission coefficient, having lower bandpass for given transient process delay time 15 p2464 A66-29120
- Differential equations for motion stability of systems with time delay solved, using Lapunov function
- methods 15 p2540 A66-29156
- Equivalent circuit analysis of switching time of dynistor with active load 15 p2468 A66-29919
- Diode transistor logic /DTL/ circuit stage delay and transistor speed parameters 16 p2688 A66-30125
- Functional time-delay device and integration into analog correlator for analysis of autocorrelation and cross-correlation functions of measured system response signals 16 p2676 A66-30445
- Approximate substitution of ordinary dynamical systems for systems with retardation by increasing order of ordinary differential equations 16 p2748 A66-31505
- Monograph on theory of ordinary delay differential equations and optimal control processes with time delay 16 p2673 A66-31749
- Book on stability, oscillation and time lags in differential and differential-difference equations, discussing Lapunov stability theorem 16 p2739 A66-31754
- Magnetostatic spin wave propagation at microwave frequencies in magnetized rod 17 p2980 A66-32648
- Automatic ignition in methane-chlorine mixture, investigating photochemical and thermal chlorination of methane in gas phase 17 p2989 A66-32824
- Quality of digital smoothing filters with finite transient time improved by rational choice of delay 17 p2878 A66-33491
- Digitally computed tables of Chebyshev approximations of Laplace shift operator transfer function enabling analog simulation of time delay systems 18 p3090 A66-34069
- Exact evaluation of responses of feedback control system with time delay to deterministic input 18 p3090 A66-34081
- Pyrotechnic delay systems, discussing ideal characteristics, burning times and rates, housings, loading pressure, surveillance 18 p3160 A66-34193
- Time lapse in variable-structure automatic control systems 18 p3092 A66-35008
- Time lags of nuclear interacting particles in extensive air showers 18 p3214 A66-35148
- Stability and quality of automatic control of plant with pure time delay, using regulator with constant and switching parameters 20 p3537 A66-36894
- Alternate mode of operation for minimizing occurrence of delays caused by launch support equipment failures for Saturn manned missions 20 p3542 A66-37243
- Group delay time and group velocity measurement methods in radio technology, noting phase-characteristic transconductance, pulse modulation, etc 20 p3518 A66-37860
- Simultaneous estimate of delay time and drift of carrier frequency during nonoptimum reception against correlated noise background 20 p3519 A66-38002
- Existence theorems of periodic solutions to integro-differential equation with delayed argument 21 p3756 A66-38742
- Parameter change effect on feedback control system magnitudes directly measurable on step and frequency response diagram, including delay time, overshoot and passband 21 p3718 A66-38808
- Connection between equivalent time-delay and LF phase lag in neuromuscular system data 22 p3854 A66-40254
- Periodic mode of operation of relay automatic system with variable delay element 22 p3884 A66-40413
- Stability of trivial solution to system of linear differential equation with distributed delay, determining majorant of solutions to Cauchy problems 22 p3941 A66-40797
- Nonlinear damping effectiveness in

stabilizing time delayed systems compared to linear damping 23 p4091 A66-41692

Chain code method of eliminating LF drift disturbance error in calculation of impulse-response function of time-invariant system 24 p4187 A66-42368

Quadratic Liapunov functional derivation for time-delay system 24 p4232 A66-42845

TIME DEPENDENCY

SA HELMHOLTZ EQUATION

Law of plane cross section applicability to hypersonic motion of deformable bodies in inhomogeneous nonstationary media with time dependent parameters 01 p0006 A66-10460

Space and time dependence of increased phonon population /amplitude of lattice vibration/ in amplifying cadmium sulfide crystal 01 p0122 A66-10575

Joining and metal deposition portion of time-temperature effects on gold-aluminum thermocompression bonds 01 p0049 A66-11154

Stress function for linear viscoelastic problems where body shape, boundary condition type or both vary with time 02 p0298 A66-11576

Growth rate of microorganisms when rate changes with time, using continuous culture technique 02 p0183 A66-12016

Laminar stability of incompressible and stationary flows with curved streamlines, applying integral method and noting time dependence of flow 03 p0357 A66-13089

Absolute stability of multiply connected pulse systems containing linear continuous portion, pulse elements in phase and nonlinear elements with time dependent characteristics 05 p0658 A66-15331

Extension of minimum variational principle applied to time-dependent perturbational problems instead of original stationarity principle 06 p0820 A66-16122

Time dependent theory of tunneling for semiconductor junction with inhomogeneous electric field 06 p0922 A66-16174

Axisymmetric dynamic response of ring supported cylinder to time dependent loads, discussing boundary conditions and differential equations of motions [AIAA PAPER 66-83] 06 p0962 A66-16265

Longitudinal oscillations of Voigt body bar whose characteristics vary with time and are bounded 06 p0964 A66-16475

Controller analytical design for nonautonomous systems, deriving necessary and sufficient conditions for existence of optimum control 06 p0862 A66-16522

Nonlinear stochastic system, determining distribution law for variables 06 p0862 A66-16524

Thin elastic shell transient vibration, deriving solution for response to time dependent surface loads 07 p1143 A66-17497

Time dependent fluctuations in photoconductivity of Cu doped low ohmic n-type gallium arsenide exposed to IR radiation 07 p1099 A66-17876

Time dependence of electron density during afterglow of plasma in helium-hydrogen, neon-hydrogen and argon-hydrogen mixtures measured by microwave cavity 07 p1091 A66-18398

Time dependence of forward overload current passing through silicon rectifier, considering thermostability loss, current-time characteristics and p-n junction temperatures 08 p1195 A66-19314

Separation of random number of signals with unknown parameters observed during limited interval of time against background of noise 08 p1185 A66-19673

Pump power dependence of ruby laser starting and stopping time predicted via rate equation analysis 10 p1541 A66-21309

Gunn effect in terms of time-independent negative-differential bulk-conductivity medium for understanding of space charge domain dynamics 10 p1584 A66-22068

Frequency synchronization of Gunn effect oscillators, frequency locking subharmonic generation, passive frequency stabilization, etc 10 p1516 A66-22095

Minority carrier lifetime in monolayer photoconductors determined by frequency dependence of time 10 p1587 A66-22149

Recursive generation of expansion coefficients of time-dependent f and g series in two-body problem, using algebraic

recurrence formulas 11 p1769 A66-22529

Space and time dependent randomly distributed stress and temperature fields in cylinder with deformable surface calculated, using approximation method 12 p1959 A66-23864

Responses of neuronal elements in visual cortex of unanesthetized cats shown to depend on time interval 12 p1806 A66-24232

Heat conduction problem simulation, using moving interfaces, solving Stefan and Verigin problems 12 p1978 A66-24371

Time behavior of 3889 and 5016 angstrom line helium emission during initial transient of RF discharge, noting pressure dependence and signal intensity 13 p2104 A66-26335

Invariant rheological equation for flow of fluid whose viscosity varies independent of time 14 p2272 A66-26776

Mathematical analysis of relationships between weld strength, maximum temperature and time at temperature of type 2219 aluminum 14 p2302 A66-27347

Solution of quasi-static problem in thermoelasticity for cylinder with time dependent boundary conditions obtained as series of Bessel functions and error functions 14 p2397 A66-27385

Plane wave behavior, as deduced from Mathieu function, analyzed in permittivity modulated slab immersed in medium of arbitrary constant 14 p2240 A66-27913

Time variation of current, temperature and resistance in premelt stage of wire explosion expressed in terms of initial wire and circuit data 15 p2537 A66-28722

Mean time to failure within given time boundaries and for continuous failure density evaluated via Weibull density function 15 p2528 A66-28806

Correlation of time variations of proton and electron intensity of outer radiation belt and dependence on geomagnetic environment 15 p2575 A66-29103

Dependence of frequency distribution of auroral displays in zenith on latitude and local time in magnetically quiet and disturbed periods analyzed by all-sky camera network in Northern Hemisphere 15 p2488 A66-29227

Absolute stability of multiply connected pulse systems containing linear continuous portion, pulse elements in phase and nonlinear elements with time-dependent characteristics 15 p2475 A66-29976

Atomic maser clocks rotation with Earth, deriving formula for relative drift at widely separated localities arising from local gravitational potentials 16 p2745 A66-30187

PDE of terminal shape of ablating body as function of time derived, noting mass and energy flow, boundary layer thickness, etc 16 p2628 A66-30219

Temporal variation in scintillation rate spectrum of satellite signals analyzed in auroral zone 16 p2691 A66-30231

Sliding characteristics of polytetrafluoroethylene /PTFE/ dry lubricant, examining effects of time, temperature and environment 16 p2713 A66-30570

Solution of heat-conduction equation over functional spaces possessing fractional derivatives with respect to time, applied as solution to first boundary value problem 16 p2827 A66-30779

Controller analytical design for nonautonomous systems, deriving necessary and sufficient conditions for existence of optimum control 16 p2670 A66-30832

Nonlinear stochastic system, determining distribution law for variables 16 p2670 A66-30834

Solar evolution from zero-age main sequence studied under assumption of time-dependent G and given by flat-space solution of Brans-Dicke theory 18 p3229 A66-34146

Time dependence of dislocation density in single crystal MgO undergoing plastic deformation at elevated temperatures 19 p3387 A66-35421

Time structure of auroral X-rays at Swedish and Finnish locations, using simultaneous balloon

flights 19 p3452 A66-3556

Creep tests on titanium alloy specimen with gauge length salt-coated, noting cracking, time dependency of susceptibility degree, etc 19 p3379 A66-3565

Minority carrier lifetime in monolayer photoconductors determined by frequency dependence of time 19 p3440 A66-3576

Freezing of supercooled water drops to determine dependence of heterogeneous nucleation on temperature and on duration of supercooling 19 p3394 A66-3638

Plasma adiabatic compression by external magnetic field increasing with time in toroidal chamber, providing two-stage plasma heating 19 p3430 A66-3658

Plastic deformation in hollow metal cylinder by rapidly varying axial magnetic field, calculating time dependence assuming substance is rigid and plastic 19 p3475 A66-3660

Estimation method of learning time of time-varying threshold learning processes /TLP/ 19 p3333 A66-3666

Time-domain and frequency domain statistics for random step-wise sampled data systems 20 p3535 A66-3684

Pulse stimulated eye response cancellation due to information contained in subsequent pulse with longer duration 20 p3504 A66-3694

Separation of random number of signal with unknown parameters observed during limited interval of time against background of noise 20 p3515 A66-3726

Time-dependent response of polycrystalline cadmium selenide thin film transistor to transient high energy radiation 20 p3525 A66-3731

Surface temperature of semilfinite solid exposed to one-dimensional heat flux calculated with method allowing accuracy at long time intervals 20 p3678 A66-3738

Time domain characteristics application to pulse amplifier design, noting correlation with results obtained via frequency method 20 p3538 A66-3758

Tone quality variation with time interval of perception, using photometer with Balzer interference filter 20 p3507 A66-3809

Time variation in solar X-ray ionizing radiation intensity in short wave fadeout SIDs 20 p3635 A66-38217

Transient behavior of energetic electrons in artificial radiation belts analyzed via satellite observations 20 p3643 A66-38341

Wind velocity profile for nonstationary atmospheric boundary layer, noting effect of time-dependent variations on turbulence and pressure gradient 20 p3594 A66-38368

Creep analysis at variable temperatures, noting creep rate and strain, transformed time hypothesis, temperature gradient effect, etc 21 p3826 A66-38615

Metal plasma jet injection into vacuum, determining mean time-dependent parameters of motion 21 p3791 A66-39083

Validity of Ito-Yamabe solution of parabolic equation for time-dependent coefficients 21 p3758 A66-39316

Reliability of system having standby spare noting repair capability and failure times, with results presented in graphs 21 p3745 A66-39343

Relation between size of visual fields of observers and time required to locate targets on static displays, presenting equations determining search time 21 p3701 A66-39421

Time domain analysis and synthesis of time-varying linear sampled data automatic control system with separable impulsive responses 21 p3719 A66-39429

Eulerian finite difference method for solving time-dependent equations of motion for compressible fluid flow, noting shock wave diffraction, supersonic blunt body interaction with shock wave, etc 21 p3730 A66-39472

Active component of voltage behavior in channel of helium pulse discharge measured, obtaining time dependence of channel resistance, input velocity and energy magnitude 22 p3953 A66-39755

Time-dependent stress distribution in annular hereditary-elastic cylindrically-anisotropic plate 22 p3989 A66-39822

- layer properties noting role of pressure, temperature, composition and recombination coefficient when varying with height and time 22 p3907 A66-39960
- Time dependent thermal behavior of atmospheric electron gas 22 p3913 A66-40552
- Taylor stability of time-dependent flow between two concentric circular cylinders, finding solution of differential equations for perturbations by Galerkin 22 p3902 A66-40706
- Second-order quasi-linear elliptic equation with coefficients increasing over periods of time more slowly than any positive power of time 22 p3941 A66-40799
- Target conspicuity for predicting level of search performance as function of spatial and temporal variables 22 p3859 A66-40862
- Fluid stratification in floated gyroscope, estimating drift rate as function of time, geometry and flotation 23 p4066 A66-41102
- Mixture 23 p4066 A66-41102
- Axisymmetric dynamic response of ring supported cylinder to time dependent loads, discussing boundary conditions and differential equations of motions 23 p4138 A66-41106
- [AIAA PAPER 66-83] 23 p4138 A66-41106
- Time dependent Schroedinger equation for Bloch electron in presence of laser field, using WKB approximation method, compared with perturbation theory 23 p4077 A66-41266
- Radar range accuracy, deriving expression for time domain calculation of accuracy degradation due to nonoptimum filtering 23 p4037 A66-41321
- Nonlinearity and time variability dynamic models of human operators in manual control systems 23 p4029 A66-41574
- Time dependent behavior of temperature and density in monoconstituent atmosphere under diurnal photoheating and cooling by induction, analyzing effect of atmosphere rotation eastward 23 p4064 A66-41678
- Time of establishment of steady state mixing in plane and axially symmetrical jets determined, using self-similar motions in unsteady state boundary layer and free turbulence 23 p4010 A66-41734
- Volterra equation and Green function to solve MHD problem of unsteady flow of viscous incompressible conducting fluid with time dependency 23 p4106 A66-41837
- Atomization of water drops by high speed streams, noting dependency on time 23 p4016 A66-42053
- Near passage problems for lightly damped near oscillator excited by white noise, discussing time probability distribution, densities, application of computers to obtain numerical solutions, etc 24 p4284 A66-42140
- Time dependency of phase difference of two weakly coupled nonlinear optical oscillators, considering coupling of two traveling waves in laser 24 p4220 A66-42257
- Space-charge-limited current dependence in time in semiconductor taking trapping into account 24 p4252 A66-42350
- Time dependence of space-charge limited current in Fe-doped p-silicon used for determining capture probability, noting detrapping significance 24 p4252 A66-42351
- Motion of single charged particle inside plasma accelerator with static electric and magnetic fields, showing periodicity of radial motion with time 24 p4241 A66-42397
- Optical measurements and navigation during midcourse and orbital phases of space mission, deriving linear equations for propagation of time dependent navigation errors 24 p4176 A66-43127
- [AGARDOGRAPH 105] 24 p4176 A66-43127
- ### TIME DISCRIMINATION
- Noise rejection properties of time discrimination method of pulsed signals improved by using exponential rather than selecting function 08 p1182 A66-18916
- Disorientation, time perception and solution 11 p1642 A66-22487
- ### TIME DIVISION MULTIPLEX
- Integrated circuit for time division multiplexers having flexible integrated gate driver circuit for field effect transistor analog gates 04 p0492 A66-13598
- Time division method of multiple access to military communications satellite by several ground stations 08 p1180 A66-18713
- Multiple access modulation techniques frequency-division, time-division, spread-spectrum and pulse-address/ for use in communications satellites 12 p1821 A66-24750
- [AIAA PAPER 66-278] 12 p1821 A66-24750
- Time division multiple access /TDMA/ modulation technique for satisfying anticipated demand by many small users for communication satellite facilities 12 p1821 A66-24751
- [AIAA PAPER 66-279] 12 p1821 A66-24751
- Multiple-access worldwide satellite communication system for aircraft terminals with limited antenna gain and transmitter power 12 p1823 A66-24765
- [AIAA PAPER 66-297] 12 p1823 A66-24765
- Three-stage time division switching network with pulse shifting and direct junctions using computer simulation for blocking probability 17 p2878 A66-31812
- Systems phenomena representation by time-phased sequence of complementary activities 19 p3467 A66-35398
- Frequency-division multiplexing capable of being effectively integrated with time-division switching, examining transmission path between sideband filters 22 p3864 A66-40057
- ### TIME DOMAIN REFLECTOMETER
- ### S REFLECTOMETER
- ### TIME FACTOR
- Correlation between lost time due to propagation on HF radio circuits and annual sunspot cycles 03 p0337 A66-13324
- Time duration of pressure pulse resulting from intersecting shock waves defined, based on one-dimensional wave interaction 05 p0666 A66-15799
- High speed gross alpha autoradiographic technique to reduce exposure time if silver activated ZnS is used as intensifier 07 p1030 A66-17235
- Timing of checkout in system with constant failure rate 07 p1018 A66-18150
- Constant time loci in phase-plane and isoclines for nonlinear and piecewise linear systems 07 p1016 A66-18345
- Time variation in boiling heat transfer caused by bubble generation 08 p1320 A66-19557
- Revised equation for thermokinetic phenomena under Fourier relationship, considering certain finite time is required for development, noting role of flux density 12 p1973 A66-23526
- Properties helping design of linear sampled data systems containing periodically time-varying components like parametric amplifiers 12 p1848 A66-24139
- Cylindrical coordinate system describing geomagnetic field analyzed, noting consequences in magnetic cartography when going from field to time gradients 12 p1875 A66-24970
- Determination of number of times per unit time that various strength margin levels are exceeded under combined random stresses, useful to structural design in aerospace industry 13 p2195 A66-25592
- Cosmic ray flux variation with height in stratosphere at geomagnetic latitude 47 degrees S 18 p3188 A66-34820
- Operation of electron image time dissector framing camera achieving time resolution by multiple reflection in crossed magnetic and electric fields in electron image storage device 19 p3353 A66-35313
- Complex load action on elastic-plastic structures in light of limit analysis, discussing safety criterion 21 p3826 A66-38591
- Finite amplitude disturbances in baroclinic atmosphere, considering interaction with zonal current and effect of upward eddy transport upon time change of mean static stability 21 p3759 A66-39205
- Impulse response of second-order time varying systems of differential equation obtained without knowledge of independent solutions of associated homogeneous equation 23 p4086 A66-41694
- Relation between transfer functions and experiment in mechanics of deformable solids, noting time factor 23 p4146 A66-41988
- Flow behind shock wave in long tube analyzed by time effect and integrating equations, using Galerkin method 24 p4197 A66-42997
- two cases of normalization of pulse emission time 01 p0022 A66-10222
- Beam forced vibration with harmonically time-variant motion produced by uniformly distributed load, assuming one boundary condition is nonlinear 01 p0157 A66-10926
- Approximation method reproducing assigned time functions by using exponential polynomials in synthesis problems of electrical circuits 02 p0207 A66-11752
- Stochastic differential equations specifying dynamical structure of filters generating posterior probability distribution when inputs are time functions 03 p0351 A66-13259
- Predicting systems based on first derivative of predicting function or on terms in Kolmogoroff functional expression describing history of time function 04 p0503 A66-13772
- Transistor equivalent circuit parameters by inverse Laplace transform of time behavior 04 p0497 A66-13966
- Time domain and frequency domain analysis of linear time invariant systems applied to radar return signal analysis 04 p0506 A66-14108
- Sampled-data control system introduction, discussing representation of real continuous time functions by impulse trains via transform methods 04 p0506 A66-14184
- Energy calculation as time function required to switch toroidal ferrimagnetic core from one remanent state to another, considering core type used in antenna phased arrays 05 p0642 A66-14564

- Open and closed-loop network synthesis using transient-response approximation 20 p3538 A66-37581
- First-order Markovian gyro drift numerically evaluated and square root plotted vs interval and gyro correlation time 23 p4068 A66-41318
- Finite realization extrema of continuous time stationary stochastic
- ### TIME FUNCTION
- Optimum configuration of main pulse for

processes 23 p4085 A66-41535

TIME MEASUREMENT

Azimuth and latitude determination without time recording based on observation of stars at same horizontal elevation 02 p0255 A66-11694
Azimuth and latitude determination without time recording based on observation of stars at same horizontal elevation 02 p0255 A66-11702
Microelectronic digital chronometer and frequency meter, noting design details and thin film circuits 02 p0231 A66-11916
Time measurement as applied to aerial navigation noting atomic clocks, time transmission by ionospheric propagation of electromagnetic radiation, etc 02 p0257 A66-12031
Evaluation of minimum-time courses for aircraft and inherent error 02 p0257 A66-12035
Time observations and variation of rotation speed of Earth 03 p0366 A66-13009
Filling or inflation process of flat circular solid-cloth type parachute canopy operating under finite mass 04 p0457 A66-13530
Time-varying linear differential systems, discussing minimum time identification via scalar valued transform of Zadeh 05 p0654 A66-14607
Measuring instrument for time interval between two electrical impulses 05 p0682 A66-15311
Effect of lateral refraction and thermal conditions near Pavlov passage instrument on azimuthal position values and time measurement results 05 p0766 A66-15424
Flying clock experiment with traveling cesium beam clocks 11 p1703 A66-22251
Astronomical yearbook of Cracow Observatory covering ephemerides of 787 eclipsing binaries, Lagrangian points, precession coefficients, etc 11 p1768 A66-22333
Frequency fluctuations in frequency standards, analyzing noise and finite observation time effects and atomic standard characteristics, using servocontrolled oscillator 12 p1881 A66-24123
Quartz crystal oscillators and effect on precise time measurements by atomic clocks 12 p1881 A66-24129
Joint experiment of U.S. Naval Observatory and Japan Radio Research Laboratories for synchronizing standard time pulses, using Relay II satellite 12 p1818 A66-24473
Cesium beam atomic time and frequency standards 13 p2079 A66-25874
500 channel system for measuring time intervals, based on modified vernier chronotron method of Lefevre and Russell, using solid state circuits 13 p2083 A66-26553
Book on time and space, weight and inertia in terms of relativity theory, including accelerations and rotations, dynamical tensor of matter, ideal clock, rigid body, etc 14 p2330 A66-26808
Book on spherical astronomy including celestial coordinate systems, parallax, diurnal motion, precession and nutation, time measurement, etc 16 p2806 A66-31738
Derivative chronopotentiometry approach to measurement of transition times and study of electrode process 18 p3064 A66-34457
Airborne electronic command device for measuring time intervals corresponding to cruising speed/ true flight altitude ratios up to 40 21 p3735 A66-38569
Relativistic effect of atomic clocks, noting error and magnitude increase with experiment duration 22 p3948 A66-40476
Plasma concentration diagnostics in exosphere from delay time of forward frequency as function of parameter of whistler trajectory 22 p3915 A66-40774
Traveling disturbance in ionosphere due to nuclear detonation detected as acoustic-gravity wave modes, noting range-time diagrams 24 p4200 A66-42594

TIME OPTIMAL CONTROL

Discontinuities occurring in closed loop optimal control problems when using maximum principle 02 p0207 A66-11899
System coefficient matrices and finite number of derivatives are sufficient conditions for controllability of linear time-

variable systems 02 p0208 A66-11901
Time optimization problem involving dynamic programming, boundary value problem, differential equations and optimal control 03 p0349 A66-12687
Synthesis of time-optimal control system in presence of constraints on displacement and displacement rate of steering element 03 p0350 A66-13044
Fatigue relaxation model for describing optimum performance of system 04 p0504 A66-13967
Optimal control problems in Banach spaces, discussing extension to infinite dimensions and application to distributed parameter systems 04 p0506 A66-13998
Worst case error analysis for systems with bounds on forcing function and time derivatives, using Pontryagin maximum principle 05 p0636 A66-14612
Controllability and observability matrices in time-variable linear systems 05 p0655 A66-14618
Composite state vector method for linear time-varying system 05 p0655 A66-14619
Optimization theory and converse of circle criterion for simple time-varying feedback system 05 p0655 A66-14620
Reserve control approach used to solve optimal time control problem for single input sampled data systems, discussing geometric interpretation 06 p0866 A66-16962
Computer method calculation of minimum time track, using quasi-optical law of refraction 07 p1066 A66-17681
Grid navigation method, employing Mercator chart, is suitable for high latitudes and supersonic aircraft 07 p1066 A66-17683
Bellman functional equation derived for class of optimal control problems without using Taylor series expansion or mean value theorem of differential calculus 07 p1017 A66-18347
Extension of optimal guidance method of Kelley and Breakwell to systems containing bang-bang control component, consisting of rescaling of time variable 08 p1250 A66-19145
Synthesis of time-optimal control for third-order linear discrete objects 11 p1676 A66-22754
Optimal control and trajectory optimization in aperiodic discrete time functional systems 11 p1681 A66-23422
Numerical method of determining extremal time controls for achieving optimal pursuit 12 p1902 A66-23767
Digital techniques for identification of discrete-time and continuous-time systems from noisy input and output sample sequences via determination of transfer function model parameters 12 p1854 A66-24638
New algorithm for quadratic programming problems with application to control, determining input requiring minimum time from initial state to target 13 p2046 A66-25341
Control system design, analyzing sensitivity of system performance to parameter variations by obtaining time domain measure of sensitivity 13 p2050 A66-26062
Synthesis problem solution for performance criteria defined by time domain sensitivity function, noting controller structure, parametric minimization and operative adjustment of parameters 13 p2051 A66-26071
Inequality constraints in open-loop minimum time control problem 13 p2053 A66-26080
Nonlinear feedback composed of combination of nonlinear functions of state variables separately to stabilize amplitude response and provide time optimal control 16 p2670 A66-30831
Minimum time control systems with servoloop relay for optimal error correction, employing matrix analysis 16 p2671 A66-31061
Monograph on theory of ordinary delay differential equations and optimal control processes with time delay 16 p2673 A66-31749
Optimal trajectory problem solution using in-flight guidance computers for control rockets and aircraft under influence of random disturbances 17 p2956 A66-33239
Optimization of midcourse velocity corrections, applying for variable-time-of-arrival guidance and determining optimum

correction time as function of miss parameter 18 p3131 A66-33857
Synthesizing time optimal control for plants described by linear differential equations with constant coefficients 18 p3092 A66-34999
Synthesis of time-optimal control system in presence of constraints on displacement and displacement rate of steering element 18 p3092 A66-35000
Combined use of time-domain waveform detection probability and false alarm probability for selection of optimum sampling period and quantization interval for detection of impulse waveforms 19 p3299 A66-35668
Iterative solutions to high-speed action noting reduction to successive problems of maximization of linear form from finite state 19 p3325 A66-35939
Sensitivity analysis of time varying systems, comparing vector output errors of feedback and open loop system with same nominal transfer characteristics 19 p3327 A66-36011
Sensitivity of performance of optimal control systems to plant parameter variations 19 p3329 A66-36020
Magnetic torquing of spinning satellites deriving equations for motion of symmetrical rigid body about center of mass in homogeneous magnetic field 19 p3471 A66-36699
Linear continuous time stochastic optimal control process, obtaining optimum performance achievable as function of total effort at initiation of optimization period 19 p3335 A66-36699
Optimal feedback control of linear discrete-time stochastic system with quadratic performance measure for bounded input 19 p3335 A66-36699
Optimization of time dependent systems in dynamic programming, using forward and backward algorithm 19 p3391 A66-36704
Time-fuel optimal regulator for third-order model of reaction jet-controlled spacecraft with time delay 19 p3338 A66-36741
Quadratic and linear friction effects on time-weighted fuel-optimal singular control of nonlinear systems 19 p3338 A66-36744
Iterative solution of time optimal control boundary value problem resulting from application of Pontryagin maximum principle 20 p3535 A66-36850
Maximum principle in optimization of discrete time systems described by difference equations 20 p3536 A66-36857
Continuous time multivariate optimal filter for feedback realization applied to augmentation and rapid alignment of inertial systems 20 p3596 A66-37231
Synthesis of control device for class of nonlinear sampled data system, obtaining processes with minimum control time 21 p3719 A66-39286
Time optimal control for plant with given transfer function 21 p3719 A66-39323
Optimal control synthesis for cost functionals involving convex single valued functions of state and control variables, noting steepest ascent method and evaluating gradient 22 p3885 A66-40871
Sufficient conditions for linear time optimal control system on compact real intervals in Euclidean n space 23 p4049 A66-41536
Impulse response of second-order time varying systems of differential equation obtained without knowledge of independent solutions of associated homogeneous equation 23 p4086 A66-41694
Optimal control problem formulated for linear constant-coefficient system subjected to class of amplitude bounded load disturbances 24 p4189 A66-43205

TIME RESPONSE

One-tape off-line Turing machines covering crossing sequences, recognition problems and computation times 05 p0637 A66-14929
Time dependent emission behavior of ruby laser discussing rate equations, Q-value, output power, steady state values, etc 05 p0696 A66-14981
Linear system impulse response approximation, determining time scaling factor via orthonormal Laguerre functions 06 p0866 A66-16748

- Obtaining deadbeat response of third order servosystems by discrete parametric control 06 p0866 A66-16965
- Characteristics of pulsed wave at output of linear system with pulsed rectangular wave input 07 p1016 A66-18071
- Electrical correction circuits for reducing rise time of some mechanical transducers 07 p1035 A66-18233
- General performance indices for time and frequency response for free motion of linear discrete control systems 07 p1016 A66-18280
- Cross correlation measurements of oscillator frequency stability and thermal noise and application to atomic hydrogen maser 12 p1835 A66-24128
- Ionospheric effect of sudden magnetic storm eruption, noting propagation of disturbance above terrestrial surface 12 p1870 A66-24288
- Flutter, time base error and jitter analyzed in multichannel magnetic recorder, noting measurement techniques 13 p2079 A66-25662
- Effect of relay response time on dynamic properties of automatic system incorporating linear group and relay element with pure delay 14 p2264 A66-27358
- Plasma diagnostics in terms of response times, noting conversion of phase frequency deviations of probing signal, data recording for plasma in motion and expression for waveguide frequency band 14 p2298 A66-28472
- Crystal motion effect on time behavior of laser generation mode, using high speed photography and oscillograms 15 p2518 A66-29725
- Feedback control system digital computer design and analysis, including frequency-domain analysis, time-domain analysis, state-space simulation program, etc 17 p2877 A66-32778
- Basic properties of pure fluid devices including operating pressure, operating power and response time 20 p3500 A66-37644
- TIME SCALE
- SA HELMHOLTZ-KELVIN TIME SCALE
- Bogoliubov adiabatic hypothesis in quasi-linear theory of plasma 01 p0115 A66-11088
- Fluctuation errors of analog correlation meters under time displacement of random signals 07 p1031 A66-17356
- Fantapple relativity theory using elementary projective geometry and based on group theory, obtaining cosmology leading to double time scale and origin of universe from point 15 p2599 A66-29658
- TIME SERIES
- Auroral zone absorption, reporting periodic variation of sporadic E layer in Antarctica, considering magnetospheric time-of-flight spectrometer effect 01 p0061 A66-10497
- Dispersion of estimates of mathematical expectation and dispersion for connected meteorological time series 01 p0096 A66-10753
- Prediction error of time series from finite past 03 p0387 A66-12619
- Linear smoothing method minimizing mean-square error in time series where signal statistics are unknown and noise is additive, deriving filter 05 p0653 A66-14600
- Dispersion of estimates of mathematical expectation and dispersion for connected meteorological time series 14 p2326 A66-27852
- Reliability growth measurement via exponential smoothing, noting prediction of successive elements from given time series 15 p2508 A66-28805
- Perturbation theories for equations of celestial mechanics, obtaining analytical solutions in terms of Chebyshev polynomial series [AIAA PAPER 66-534] 18 p3226 A66-33664
- Temporary series representing evolution vs time of natural fluctuating phenomena /geophysical, climatic, biologic/ and relation to sunspot cycle 21 p3733 A66-39133
- TIME SHARING
- LEM Data Reduction System that performs concurrent data processing and telemetry conversion on computer time-shared arrangement 19 p3299 A66-35662
- TIME SIGNAL
- Equal altitude method for calculating deviations of vertical, geographical coordinates and time correction for radio time signal from astronomical measurements 01 p0063 A66-11099
- Dispersion of time modulation of leading edge of coincidence pulses in case of large SNR 04 p0488 A66-14404
- Radar receiving equipment sensitivity measurement by analog method and by time selection scheme 08 p1195 A66-19350
- Joint experiment of U.S. Naval Observatory and Japan Radio Research Laboratories for synchronizing standard time pulses, using Relay II satellite 12 p1818 A66-24473
- Discrete time signal estimation, noting minimum mean square error, minmax estimation, etc 18 p3068 A66-33905
- Receiver design and results of dual VLF transmissions for obtaining timing information 19 p3357 A66-35693
- Experimental meteor burst system for microsecond synchronization of isolated clocks 20 p3515 A66-37227
- Photographic integration process using Loran-C pulses for precise synchronization of timing signals at any point in continental U.S. 22 p3862 A66-39733
- Adjustable time domain equalizer for reduction of distortion caused by paired echoes in pulse compression radar system 23 p4034 A66-41021
- TIMING
- Ionograms made at Australian ionosonde stations during magnetically quiet world day interval, obtaining information on F region ionization, noting existence of universal time control of ionization 12 p1873 A66-24835
- TIMING APPARATUS
- SA ACCELEROMETER
- SA ATOMIC CLOCK
- SA CHRONOTRON
- SA CLOCK
- SA PENDULUM
- SA SPEEDOMETER
- SA TACHOMETER
- Mariner IV timing and sequencing system using crystal-controlled oscillator 06 p0837 A66-16318
- Electronic timer for rocket, controlling duration of burning time 08 p1188 A66-18616
- Timing range increase in multivibrators by adding circuitry which separates requirements of bias and timing 15 p2458 A66-28888
- Single-chip decade counter as fuse timer and programmer for weapon system 17 p2883 A66-32125
- Pulse energy and release energy dependence on electrical and mechanical parameters of magnetoelectrically driven electromechanical timing devices 17 p2928 A66-33499
- Atomic clocks and synchronization for space research 22 p3920 A66-40794
- Contactless telemetering element design, deriving equations for geometric dimensions of spring loaded oscillating system 23 p4045 A66-41398
- Rectangular terminal block in rectangular waveguide and dispersion equation for surface wave propagating along waveguide 23 p4046 A66-41516
- Versatile electric timer possessing six independent timing channels, useful in analog and hybrid computation 24 p4183 A66-42642
- TIN
- Transition temperature dependence on thickness of superimposed films of iron and tin 03 p0407 A66-12323
- Critical current in planar and cylindrical superconducting tin films as affected by magnetic field and temperature 04 p0559 A66-13715
- Mossbauer effect in Sn 119 polycrystalline sample of solid solution of barium-titanium tin oxide 04 p0565 A66-14268
- Electron energy diffusion in superconducting thin Sn and In films bombarded by alpha particles observed in terms of IR drop 06 p0927 A66-16755
- Critical magnetic field and temperature in superconducting metal 08 p1278 A66-19637
- Mossbauer spectra of Sn-doped metal-oxide semiconductors at room and liquid-nitrogen temperature 10 p1590 A66-22175
- Energy gap of clean superconducting thin films of tin in both parallel and perpendicular magnetic fields, using one-dimensional solution of Ginzburg-Landau equation 11 p1758 A66-23396
- Deviations from BCS behavior in temperature dependence of ultrasonic absorption in superconducting tin 13 p2158 A66-25056
- Thin tin film reflectivity and transmission factor for UV to IR range 13 p2169 A66-26346
- Growth kinetics and structure of evaporated tin thin films on amorphous carbon film, noting three stages after nucleation, archipelago, labyrinth and closing 14 p2359 A66-27102
- Neutron irradiation effect on superconductive properties of tin and indium foils at low temperatures, noting decrease of critical temperature and field 14 p2364 A66-27641
- Surface structure and superconductive properties of electrodeposited tin films 15 p2564 A66-28761
- Magnetic coupling effect on flux pinning and flux-flow resistivity in superconducting tin film 16 p2770 A66-30170
- Angular distributions of elastic and inelastic alpha-particle scattering in even tin isotopes, using 40 mev alpha beam 18 p3138 A66-34166
- Critical magnetic field and temperature in superconducting metal 18 p3155 A66-34180
- Energy gaps of Ag-Sn, Fe-Sn and Sn film studied by electron tunneling method for various temperatures 18 p3156 A66-34474
- Mossbauer spectra of Sn-doped metal-oxide semiconductors at room and liquid-nitrogen temperature 19 p3441 A66-35789
- Resonance absorption of gamma-quanta by tin in germanium 23 p4110 A66-41133
- Transition temperature for superconductivity in superimposed films of silver and tin in which alloying between two metals is minimized 24 p4259 A66-43068
- TIN ALLOY
- Thermal and electrical properties of copper antimony telluride/tin telluride system as function of composition 01 p0116 A66-10190
- Superconducting transition temperatures measured for various tin-gallium compositions in quenched and annealed states 02 p0271 A66-11482
- Nonideal superconducting properties of inhomogeneous tin alloys with data on resistive temperature and field transitions, magnetization curves, etc 07 p1107 A66-18411
- Indium antimonide optical absorption shift, forbidden band narrowing and tin alloying induced by neutron bombardment 10 p1587 A66-22150
- Mechanical properties of Ti-Al-Mo-Zr-Sn alloy as affected by varying cooling rate in heat treatment 15 p2523 A66-29194
- AuSn-Pb section of Au-Pb-Sn phase diagram, examining solderability of gold coatings of electronic components 18 p2722 A66-30223
- Indium antimonide optical absorption shift, forbidden band narrowing and tin alloying induced by neutron bombardment 19 p3440 A66-35764
- TIN COMPOUND
- Variations of transition temperature and long-range order parameter of tantalum-tin compounds studied as functions of sintering time and temperature 02 p0271 A66-11441
- Temperature and magnetic field effect on flux pinning by superconducting Sn precipitates in lead-indium matrix, noting occurrence of magnetic hysteresis 19 p3444 A66-36077
- Sublimation rates of pressed-and-sintered lead telluride and lead stannous telluride thermoelements 19 p3281 A66-36294
- Evaporation rates of lead telluride and lead tin telluride in pressed and sintered thermoelement form 24 p4247 A66-42108
- TIN OXIDE
- Electric properties of antimony-doped stannic oxide in terms of optical mode lattice scattering 12 p1928 A66-23932
- Stannic oxide ceramic formation and dielectric constant and resistivity measurements and evaluations 14 p2362 A66-27499
- Electrical measurements of stannic oxide in ceramic form, noting forming and firing of samples, dielectric dispersion, grain boundary capacitances,

etc 18 p3155 A66-34197

TIN TELLURIDE

Tin telluride electric properties analysis for verifying semiconductor model with two valence bands in connection with Hall effect dependence on temperature 09 p1412 A66-19993

Superconducting transition temperature of SnTe samples 09 p1423 A66-20071

Hall mobility and Hall constant variation for lead telluride-tin telluride polycrystals at high temperatures 13 p2163 A66-25419

Effect of partial substitution of silicon, germanium and lead for tin on thermal emf and thermoelectricity of solid solutions of tin telluride 20 p3612 A66-37123

TIP

S WING TIP

TIP CONTROL

S WING TIP CONTROL

TIRE

SA AIRCRAFT TIRE

Force and moment response of pneumatic tires undergoing nonstationary lateral motions, using motion equations [ASME PAPER 65-AV-2] 11 p1636 A66-22471

Plane vibration characteristics of pneumatic tire model in form of elastically supported cylindrical shell [SAE PAPER 650492] 12 p1800 A66-23744

Control of pneumatic tire tread design parameters to limit or delay hydrodynamic pressure buildup 18 p3052 A66-34199

TIROS II SATELLITE

Statistical correlation of IR cooling measurements by Tiros II /Channel 2 and Channel 4/ and radiometersonde measurements of radiation divergence within atmospheric layers 22 p3944 A66-40431

TIROS III SATELLITE

Synoptic interpretation of Tiros III radiation data recorded on July 16, 1961 18 p3129 A66-34216

TIROS IV SATELLITE

Viewing geometry in interpretation of reflected solar radiation data from Tiros IV 04 p0515 A66-13673

Investigation of two cold air fronts of polar origin that occurred in Alpine region in April 1962, using data from Tiros IV 11 p1730 A66-23096

Radiation data measured by Tiros IV satellite for determination of global distribution of atmospheric water vapor 15 p2533 A66-30029

Tiros IV atmospheric IR radiation measurements and application to weather analysis, using quasi-global synoptic maps of troposphere relative humidity 19 p3393 A66-35637

TIROS VII SATELLITE

Fog and low stratus clouds studied, using Tiros VII photographs of North Pacific fog 11 p1728 A66-22323

TIROS OPERATIONAL SATELLITE SYSTEM

Performance characteristics, attitude stabilization systems, power sources and optical systems of Tiros, TOS and Nimbus weather satellites 15 p2605 A66-28680

Performance degradation of transistors and solar cells due to terrestrial radiation effects, from studies on Tiros Operational Satellite systems 24 p4247 A66-42097

TIROS SATELLITE

SA ESSA SATELLITE

Tiros Operation Satellite System of meteorological satellite 04 p0586 A66-13946

Geometrical distortions of Tiros satellites television pictures, estimating loss of contiguity and photogrammetry 07 p1036 A66-18480

Tiros global meteorological satellite system characteristics and functions 08 p1300 A66-18562

Thermal and wind structures related to major cloud bands of Tiros photographed extratropical vortices 08 p1248 A66-19384

Tiros IV satellite photographs of various storms, relating equivalent black body temperatures shown on IR analysis to cloud height 09 p1399 A66-20731

Search for terrestrial life at kilometer resolution, using Tiros and Nimbus meteorological satellite photographs 10 p1605 A66-21209

Cloud identification from Tiros satellite photographs, noting element identification of order of 1 km 11 p1726 A66-22309

Meteorological interpretation of Tiros satellite photographs of Australian area 11 p1728 A66-22319

Stabilite system, three-axis attitude control system utilizing single reaction wheel [AIAA PAPER 66-307] 12 p1955 A66-24774

Two wide-angle camera lenses, one adapted by NASA for Tiros satellite, noting freedom from astigmatism and distortion correction by choosing refractive index 14 p2291 A66-27318

Performance characteristics, attitude stabilization systems, power sources and optical systems of Tiros, TOS and Nimbus weather satellites 15 p2605 A66-28680

Organization and size of cloud systems in relation to maximum wind speed, using Tiros satellite pictures 15 p2533 A66-29663

Telemetry systems of Tiros and Nimbus satellites 16 p2650 A66-30558

Book on meteorological satellite history and design, noting Tiros and Nimbus 16 p2809 A66-30875

Automatic vortex recognition system for Tiros satellite photograph analysis, noting phases of development and results obtained 16 p2658 A66-31251

Optical rectification and gridding of satellite photographs for low and high tilt angles, describing equipment design, application and results 17 p2927 A66-33345

Physiographic and geologic features revealed through analysis of pictures from Tiros satellites, useful for terrain information 18 p3104 A66-33745

Tiros satellite attitude control, using spin stabilization by geomagnetic torques 18 p3243 A66-33860

Monthly variations in Southern Hemisphere heat budget calculated from Tiros satellite radiation measurements 19 p3347 A66-35642

APT signal reception from Nimbus and Tiros satellites, describing APT equipment and signal conversion 20 p3518 A66-37849

Vertical motion of moisture fields and saturation deficit determination from nephelanalysis of Tiros cloud photographs for operational quantitative precipitation forecasting /QPF/ 22 p3943 A66-40054

TIROS WHEEL SATELLITE

Tiros IX wheel satellite design and performance and relation to earlier Tiros satellite 06 p0958 A66-15930

Tiros IX satellite design and performance, noting wheel configuration, TV camera, control systems, etc 15 p2606 A66-28968

Stabilization and control system of Tiros-wheel satellite, using current-carrying coil interaction with geomagnetic field 21 p3821 A66-38878

TISSUE

Measurement and evaluation of radiation exposure in space flight, noting tissue equivalent system for ionization recording 02 p0182 A66-11647

Measurement and evaluation of radiation exposure in space flight, noting tissue equivalent system for ionization recording 20 p3509 A66-38163

TITAN II ICBM

Evaluating air pollution hazard to personnel from exhaust gases of Titan II test firings 06 p0819 A66-16493

Aeromedical factors of Titan II ICBM support, discussing human factors in missile crew and propellant transfer 11 p1648 A66-22582

Titan II operational base management, organization and responsibilities, noting logistic requirements, concurrency problems, etc 14 p2416 A66-27123

TITAN III LAUNCH VEHICLE

Positioning and aligning operations for Titan IIC solid propellant rocket motors 14 p2271 A66-28421

Titan III guidance and navigation system modification for lunar mission application 14 p2329 A66-28451

Pyrotechnic shock testing of Titan III airborne inertial guidance equipment noting requirements, techniques, etc 16 p2678 A66-30467

Final orbital simulation test of Titan III transtage space booster 16 p2808 A66-30503

Titan III as ferry-resupply system with analysis of performance as affected by orbit altitude and inclination parameters

[SAE PAPER 660446] 18 p3245 A66-33892

Titan III launch vehicle development in engine, material and flight control for various orbits and trajectories [AIAA PAPER 65-309] 20 p3664 A66-38152

Subsystem interfacing in Titan III space launching system, discussing contractual requirements, interface program timing, interface documentation and coordination, review and approval procedures 20 p3687 A66-38186

TITAN LAUNCH VEHICLE

Practice reliability used in systems testing as final check on Titan program 01 p0140 A66-10100

Acoustic fatigue and acoustically induced vibration in Titan II and Titan III missiles studied by simulation and wind tunnel scale models 01 p0150 A66-10156

Military approach to standardized space vehicle system, specifically Titan III 08 p1301 A66-18571

Titan 3C 120-inch diameter solid-propellant rocket motor 12 p1935 A66-24405

Operational characteristics of LC tuned solid state static inverter used as power supply in autopilot gyros of Titan rockets, noting power oscillator circuit 12 p1804 A66-24661

Pressure surges, surge accumulators and relief valves studied on Titan I launch vehicle simulator 13 p2056 A66-25131

Launch vehicle testing and hardware reliability in Gemini launch vehicle and Titan II 14 p2394 A66-28427

Titan III building blocks, discussing vehicle features, launch facilities, mission and maneuver capability, payload mass ratio, etc [SAE PAPER 660447] 18 p3245 A66-33893

Redundant electrical systems for Titan II and Gemini Titan II launch vehicles 20 p3499 A66-37193

Titan II control system modification for Titan III missions involving incorporation of acceleration loop, division of autopilot, etc 21 p3819 A66-38852

Alloys and processes for Titan booster system fabrication, noting mechanical properties and behavior of welded joints 22 p3924 A66-40260

Minuteman first-stage or Titan III-C strap-on solid rocket motors provide additional thrust to intermediate vehicle comprised of S-II and S-IVB [SAE PAPER 660442] 24 p4281 A66-42395

TITANATE

SA BARIUM TITANATE

SA LEAD TITANATE

SA STRONTIUM TITANATE

SA ZIRCONIUM TITANATE

Superconductivity in ceramic mixed titanates 16 p2770 A66-30180

TITANIUM

Hot plastic deformation effect on gas content, structure and mechanical properties of industrial molybdenum, niobium and titanium 01 p0086 A66-10451

Corrosion rate of BT-1 titanium and 9Kh18N12M2T stainless steel in manganese-ammonium sulfate solutions 01 p0089 A66-10990

Present status of titanium research and development noting electronic structure, dislocation theory and alloy theory 02 p0242 A66-11525

Titanium, beryllium and refractory metals properties and application of their alloys in aircraft industry 02 p0244 A66-11743

Titanium and zirconium technology, comparing physical and mechanical properties with structural metals, noting niobium in nuclear application 02 p0244 A66-11744

Tracer diffusion measurements in beta titanium covering Arrhenius plots, monovacancy and divacancy diffusions and new data for Sc-46, Sn-113 and P-32 03 p0382 A66-12939

Atomic heat of titanium, vanadium and chromium in high temperature range, discussing parameters and experimental techniques 05 p0698 A66-14511

Martensitic transformation in alloys with aging martensite, discussing effects on molybdenum, Fe-Ni alloy, cobalt and titanium 05 p0700 A66-14859

Small titanium additions effect on strength, impact ductility and structure of

low-carbon low-alloy steel 06 p0895 A66-16228
Nuclear reactor radiation effect on microstructure, size of elementary cells, hardness and electrical conductivity of high-melting compounds 06 p0897 A66-16693
Quantitative determination of Nb in large amounts of Zr and Ti in large amounts of Nb and Zr at high temperature, using scintigraphic 06 p0823 A66-16840
Polarography 06 p0823 A66-16840
Mass and energy state dependence of plasma, generated by titanium source, on electrical operating conditions of source 06 p0919 A66-16878
Sorption of low energy argon ions by titanium films as function of ion energy, density of low beam and method of preparation of film 06 p0928 A66-16886
Abundance of titanium for solar photosphere model derived from ion lines 07 p1135 A66-17641
Spontaneous ignition of zirconium and titanium powders and alloys, noting oxygen diffusion into oxide film and film dissolution 07 p1049 A66-17906
Liquid titanium reaction with nonmetallic refractory ceramics, Ti melting behavior and electron-probe microstructural analysis 08 p1236 A66-18759
Superconductivity in Ag doped GeTe and monoxides of Ti and Nb 09 p1423 A66-20070
Plastic deformation effect on critical temperature and magnetic field of superconducting junctions in titanium under uniform high compression 09 p1428 A66-20591
Surface hydride corrosion film effect on electrolytic corrosion and oxidation of titanium 09 p1390 A66-20841
Titanium vapor pressure determined from evaporation rate of titanium from titanium-niobium wire electrically heated in vacuum 09 p1391 A66-20865
Extension of electron gas model to transition metals /titanium, zirconium, hafnium/, considering atom interaction up to fourth neighbor 10 p1546 A66-21664
Coating of titanium with aluminum and silicon by immersion of titanium samples in molten aluminum or in aluminum/silicon melts 10 p1547 A66-21749
Titanium for critical assemblies in aerospace and chemical processing equipment 10 p1547 A66-22038
Welding characteristics of Ti-7Al-2Cu-1Ta plate including strength, toughness and cracking resistance 11 p1717 A66-22863
Equilibrium in nickel corner of nickel-titanium-borium system 13 p2109 A66-25878
Spray transfer gas metal-arc welding of titanium plate, using flux backing technique 13 p2087 A66-26016
Argon arc and resistance diffusion /vacuum/ welding of Ti and Ti alloys and protective metallic coating deposition on welded parts 13 p2110 A66-26027
Porosity in titanium arc welds, noting sources of gas evolution and probable causative gases, particularly molecular hydrogen and oxygen 14 p2302 A66-27346
Emission and absorption bands in K spectral region of titanium, using single setup 14 p2314 A66-27371
Elastic electron scattering cross sections for titanium relative to C and Be measured, using linear electron accelerator 14 p2337 A66-27795
Book on mechanical working of light alloys 14 p2302 A66-28191
Book on titanium covering extraction processes, commercial manufacture and fabrication, cost estimates, marketing, etc 15 p2521 A66-28883
Diffraction pattern study of titanium single-crystal surface 15 p2566 A66-29389
Titanium profile milling and application of numerical control equipment [SAE PAPER 660289] 15 p2511 A66-29830
Hot forming of titanium sheet structures and relation to cost [SAE PAPER 660327] 15 p2511 A66-29845
Solubility of hydrogen in titanium 16 p2724 A66-31238
Temperature and structure effect on hydride precipitation kinetics in titanium, using resistometric technique, noting nucleation problem 16 p2724 A66-31266
Oxidation of powdered titanium, zirconium,

hafnium, vanadium, niobium and tantalum 16 p2724 A66-31355
Change in resistance of titanium films deposited in high vacuum from argon ion bombardment, noting dependence on energy value 16 p2789 A66-31786
Elastic strain distribution in structure of quasi-isotropic polycrystalline titanium 16 p2728 A66-31787
Compactibility of iron, stainless steel and titanium powder of various dispersity and bulk density 17 p2940 A66-32847
Temperature and strain rate effects on yield and flow stresses of alpha titanium determined, using continuous and differential testing 18 p3122 A66-33748
Time-resolved spectra of single titanium or aluminum particles burning in laminar gas flow recorded by optically fast slitless spectrograph [WSCI 66-5] 18 p3264 A66-34427
Stress-corrosion cracking of titanium - ASTM Meeting, Seattle, October-November 1965 19 p3377 A66-35647
Separation of gaseous, liquid and solid reaction products generated by hot salt corrosion of titanium, noting gas diffusion effect on cracking 19 p3379 A66-35659
Sea-water embrittlement of titanium alloy cantilever beam specimens as affected by aluminum content, aging, beta stabilizers and cooling 19 p3379 A66-35660
Lightweight titanium and inconel pressure vessel for Apollo cryogenic hydrogen and oxygen storage systems 20 p3541 A66-37092
Phase diagram of titanium-oxygen-hydrogen system, plotting isotherms and isobars for equilibrium hydrogen pressure, noting oxygen effect 20 p3585 A66-37748
Plastic deformation effect on critical temperature and magnetic field of superconducting junctions in titanium under uniform high compression 20 p3622 A66-38124
Prevention and control of Ti machining fires 21 p3744 A66-39198
Spontaneous ignition of zirconium and titanium powders and alloys, noting oxygen diffusion into oxide film and film dissolution 21 p3752 A66-39406
Optical depths of titanium I absorption lines in solar spectrum 22 p3984 A66-40853
X-ray K-absorption spectra of titanium, vanadium and germanium in germanides 23 p4082 A66-41826
Elastic microstrain of polycrystalline titanium measuring device, discussing measurement error 24 p4227 A66-42222
Pure titanium tensile property, hardness and impact value at high temperatures, noting structural change from quenching 24 p4228 A66-42510
Anodizing techniques used in diffusion studies of TiC system 24 p4228 A66-42616
Mechanical properties, optical microstructure and thin foil electron microstructure of commercial pure titanium plate investigated for cause of ductility deterioration 24 p4229 A66-43105

TITANIUM ALLOY

Polythermal and isothermal cross sections of phase diagram of titanium-niobium-chromium system at high temperatures 01 p0086 A66-10453
Thermal and microscopic analysis and determination of microhardness, electrical conductivity and emf in titanium-aluminum-oxygen ternary system 01 p0087 A66-10659
Solubility and concentration curves for elements in solid solutions of alpha and beta titanium at eutectic and peritectic temperatures 01 p0087 A66-10660
Titanium alloys as basic structural material for supersonic transport noting strength, corrosion resistance, fatigue, etc [SAE PAPER 650789] 01 p0088 A66-10814
New titanium alloy for 900 degrees F surface in jet engines 02 p0242 A66-11513
Electrolytic isolation and precise composition of intermetallic phase of titanium silicide formed in alloys of system Ti-Al-Fe-Si-B-Cr 02 p0245 A66-11994
Beta phase in alloys determined based on titanium with aid of X-ray diffraction 02 p0246 A66-11997
Notch-tough high-strength butt welds in alloy titanium plate with gas metal-arc welding, using spray type or short circuiting

metal transfer 02 p0236 A66-12228
Isothermal section and phase equilibria of Ti-V-C system 02 p0246 A66-12273
Stress corrosion cracking in titanium alloys in presence of salt, high temperature and sustained stress [AIAA PAPER 65-764] 03 p0383 A66-13059
Thermomechanical treatment and temperature on diffusion mobility and heat resistance of titanium alloys 03 p0384 A66-13170
Pauli paramagnetism influence on upper critical fields of Nb-Ti alloys and measurements of various properties 04 p0560 A66-13720
Cold deformability of alpha-titanium alloys during strip rolling, showing temperature increase of incipient recrystallization of titanium-aluminum alloys 05 p0699 A66-14699
Gaseous impurity distribution /oxygen/ between scale and diffusion layer after heat treatment of various titanium alloys 05 p0699 A66-14700
Brazing and diffusion bonding of titanium alloys to similar and dissimilar materials in high vacuum or inert gas [SAE PAPER 650752] 05 p0687 A66-15001
Investment castings in advanced high strength steels and titanium alloys, noting reliability and quality control [SAE PAPER 650770] 05 p0688 A66-15009
Selective separation of nickel titanium and nickel aluminum alloys and electrochemical behavior in various electrolytes 06 p0896 A66-16542
Corrosion resistance of titanium and its alloys in solutions of acetic and nitric acids as affected by aluminum additions 06 p0896 A66-16608
Deformation criteria for cold and hot working of metals applied to titanium alloys 06 p0888 A66-17071
Interaction between hydrogen and various titanium alloys, noting correlation between sorption capacity of alloys and type of phase diagram 07 p1050 A66-18064
Sample deformation measuring device for short duration heat resistance tests 07 p1148 A66-18390
Iron and nickel concentrations effect on composition, quality and current yield of electrodeposition of titanium from aqueous solutions 08 p1229 A66-18794
Effect of tantalum carbide additions on mechanical, thermal and chemical properties of WC-TiC-Co alloys 08 p1239 A66-18902
Martensitic transformation in titanium alloys containing eutectoid-forming elements, noting elastic properties, shear modulus, etc 08 p1239 A66-18906
Low-temperature mechanical properties and fracture toughness of commercial and extra-low-interstitial grade Ti-6Al-6V-2Sn 08 p1242 A66-19719
Calorimetric and magnetic measurements of dilute titanium alloys with other transition elements, distinguishing between homogeneous and nonhomogeneous transitions 09 p1419 A66-20045
Phase recrystallization effect on structure and mechanical properties of cast monophase titanium alloys 09 p1389 A66-20614
Corrosion resistance and electrochemical properties of alloys of niobium-titanium system 09 p1390 A66-20838
Corrosion resistance, electrochemical and mechanical properties of alloys of titanium-niobium system 09 p1390 A66-20839
Upper critical field for Ti-V alloys estimated, using combined Goodman model and Clogston concept 09 p1430 A66-20852
Construction and design of Apollo spacecraft, examining high temperature aluminum and titanium alloys and fabricating methods 10 p1545 A66-21217
Heat treatable alpha-beta titanium alloy, Ti-679, with excellent creep and yield strength in 600 to 900 degrees F range 10 p1545 A66-21221
Machining technology of titanium alloys, investigating machining characteristics under controlled machine variables such as cutting speed, feed rate, tool material, tool geometry, cutting fluid, etc [ASME PAPER 65-PROD-11] 11 p1709 A66-22473
Diffusion and nondiffusion transformations

in titanium alloys, noting martensitic transformation 11 p1716 A66-22751

Classification of titanium alloying elements by effect on strength of chemical bonds in process of formation of alpha-solid solutions 12 p1892 A66-23519

Soviet and foreign papers on kinetics of phase transformations in titanium alloys 12 p1892 A66-23520

Aging of Cu-Ti alloy stimulated by Al additions to 2 percent and retarded by Al additions of 2 to 4 percent 12 p1892 A66-23521

Stress corrosion cracking test employing precracked bar stressed in bending, noting apparatus and results on martensitic steel and titanium alloy 12 p1958 A66-23647

Electron beam welding of high-strength titanium alloy propellant tank for third stage of ELDO carrier rocket and determination of optimum welding parameters 12 p1885 A66-23783

Rigidity and support requirements of fixturing for titanium alloy milling operations [ASTME PREPRINT MR66-716] 12 p1887 A66-24420

Titanium pressure vessel for NERVA engine [AIAA PAPER 65-590] 12 p1970 A66-24714

Heat treatment effect on structure, hardness, microhardness and corrosion resistance of VT1 titanium and OT4 titanium manganese-aluminum alloy 12 p1897 A66-24900

Alloying effects on temperature dependence of titanium normal elastic modulus between -186 and 800 degrees C 13 p2106 A66-25329

Age-hardening of Fe-Ni-Ti alloy martensite associated with formation of ordered Ni-Ti phase 13 p2106 A66-25331

Titanium and alloys examined, noting high strength-weight ratio, corrosion resistance, electrochemical properties, application for supersonic transport, etc 13 p2107 A66-25483

Effects of notch geometry on mechanical behavior/yield strength, tensile strength, etc/ of duplex annealed quaternary alloy at various temperatures 13 p2109 A66-25856

Reactivity of titanium alloy oxidizer tank with nitrogen tetroxide oxidizer under vibration analyzed for LEM when subjected to impact 13 p2111 A66-26222

Forming of titanium alloy pellets which are extruded to make dense bars and composites, noting mechanical and tensile properties 14 p2310 A66-26832

High speed milling of titanium alloys, discussing cutting velocities, feed rates, tool wear, etc [ASTME PAPER MR66-151] 14 p2299 A66-26952

Biaxial behavior of titanium sheet, obtaining stress states, yield strength, burst strength, etc [ASME PAPER 66-MET-6] 14 p2312 A66-26974

Microquenched age-formed titanium alloys and titanium bialloy 14 p2313 A66-27093

Biaxial fracture strength of textured titanium alloy for design of liquid fuel tankage 14 p2405 A66-27994

Newer titanium alloys compared with present production alloys from closed die forgings in typical airframe and engine configuration 14 p2317 A66-28011

Hot rolling behavior of ingots of titanium alloy with additions of Al, V, Mo and Zr 14 p2304 A66-28201

Metal flow, friction and lubricant performance during stamping of thin titanium alloy blanks 14 p2304 A66-28202

Titanium alloy sheet blanks prepared by stamping, considering gas media, temperature and preheating time 14 p2304 A66-28205

Heat resistance, bending and tensile creep of multicomponent Ti alloys 15 p2519 A66-28534

Stress relaxation dependence on heat deformation regime in Ti alloys VT14, VT3-1 and VTS-1 15 p2519 A66-28537

Microstructure and cooling rate effect on tensile and impact properties of titanium alloy Ti-6Al-6V-2Sn 15 p2521 A66-29072

Effects of heat treatment and aging on

phase composition, strength and plasticity of industrial titanium alloys 15 p2522 A66-29178

Hydrogen effect on strength, plastic deformation and microstructure of hardened titanium alloys 15 p2522 A66-29179

Oxygen and hydrogen effect on microstructure, tensile and impact strength and hardness of titanium alloys 15 p2522 A66-29180

Phase transformations in titanium alloys annealed at high temperatures and subjected to aging processes 15 p2522 A66-29181

Linear expansion at various temperatures of titanium alloys and effect of alpha grain size and heat treatment on expansion coefficient 15 p2522 A66-29182

Structural changes and variations in hardness at high temperatures in titanium alloys, determining aging temperatures producing maximum hardness 15 p2522 A66-29183

Effect of high temperature thermomechanical condition on structure and phase composition of titanium alloys, noting deformation role in hardening 15 p2522 A66-29184

Recrystallization in titanium alloy strips subjected to various levels of hot rolling 15 p2522 A66-29185

Weldable titanium alloys hardened by heat treatment and with structure immune to high temperatures 15 p2522 A66-29186

VT25 titanium alloy strength, plasticity and microhardness with combined thermal and mechanical treatment 15 p2522 A66-29187

VT14-16 titanium alloys strength and plasticity with cold working and heat treatment 15 p2522 A66-29188

Surface hardening of titanium alloys by copper diffusion for small-size machine parts production 15 p2522 A66-29189

Hardenability /ratio between phase transformation and cooling rates at given point of sample cross section/ in several titanium alloys after annealing 15 p2522 A66-29190

Heat treatment of titanium alloy sheets clad with industrial trial-grade titanium for preventing surface oxidation and hydrogen absorption 15 p2522 A66-29191

High strength VT14 and VT15 titanium alloys in welded sheets studied for structure and mechanical properties under hot deformation 15 p2523 A66-29193

Mechanical properties of Ti-Al-Mo-Zr-Sn alloy as affected by varying cooling rate in heat treatment 15 p2523 A66-29194

Welded joints in sheets of two-phase titanium alloys in study of heat treatment effects on structure and mechanical properties 15 p2523 A66-29195

Transformation process effect on superconducting behavior of titanium-chromium alloy 16 p2722 A66-30308

Electrical resistance, thermal conductivity, thermal emf, elastic modulus, density and mechanical strength of Ti-Nb-Mo alloys 16 p2724 A66-31235

Effect of oxygen on kinetics of decomposition of beta phase in VT 15 titanium alloy 16 p2724 A66-31236

Estimation of creep in Ti-Al-V alloys by high temperature bending method 16 p2724 A66-31237

Metastable phase composition diagram for alloys of titanium-chromium system 16 p2727 A66-31567

Mechanical strength, toughness, elastic modulus, relaxation stability and specific conductivity of copper-titanium alloys 16 p2727 A66-31568

Oxidizability in air of three titanium alloys at temperatures from 700 to 1100 degrees C 16 p2727 A66-31570

Mechanical twinning, sliding and plastic deformation of alpha and beta titanium alloys at low temperatures 17 p2939 A66-31972

Mutual reactions occurring between various allotropic forms of TA6A during isothermal treatments of austenitized beta alloy 17 p2939 A66-32327

Microquenched age-formed titanium alloys and titanium B-alloy composites, discussing production process using spherical particles produced by rotating electrode [SAE PAPER 660458] 17 p2940 A66-33164

Oxidation characteristics of titanium alloys Ti-679 and Ti-8Al-1Mo-1V determined with weight-gain techniques 17 p2941 A66-33426

Air and aqueous environments effect on mode of fracture in titanium alloys during low cycle fatigue 18 p3122 A66-33749

Cold working effect on room temperature tensile properties of TiNi intermetallic compound 18 p3123 A66-33756

Structural transformations in alnico alloy with titanium studied by X-ray 18 p3123 A66-34401

Diffusion of nickel in solid solution and two-phase alloys of nickel-titanium system 18 p3123 A66-34402

Temperature effect on dry friction coefficient in titanium alloys 19 p3376 A66-35462

Impact fracture toughness of brazed laminates of maraging steels and titanium alloys found to be 2 to 7.8 times greater than homogeneous specimens of like size [AIAA PAPER 65-566] 19 p3377 A66-35620

Susceptibility of titanium alloys to elevated-temperature static and dynamic sea-salt stress cracking, noting operative mechanism 19 p3377 A66-35648

Elevated temperature stress corrosion tests on titanium alloys, noting susceptibility in presence of hot salt 19 p3377 A66-35649

Elevated temperature stress-corrosion cracking behavior of titanium alloys, noting test variables and possible application to SST material selection 19 p3378 A66-35650

Stress corrosion in titanium alloys noting measurement techniques, crack forming effect of chlorine and surface treatment via metal coating 19 p3378 A66-35651

Cracking and stress corrosion of titanium alloys noting test environment, temperature and measurement techniques 19 p3378 A66-35652

Hot salt cracking of titanium alloys noting stress corrosion, fracture toughness and crack propagation mechanism 19 p3378 A66-35653

Stress corrosion mechanism of titanium noting experimental conditions, results of chemical analyses, time factor, material resistance to crack formation, etc 19 p3378 A66-35654

Cracking of jet engine components made of titanium alloys results from silver chloride stress corrosion 19 p3473 A66-35655

Creep tests on titanium alloy specimens with gauge length salt-coated, noting cracking, time dependency of susceptibility degree, etc 19 p3379 A66-35656

Stress corrosion cracking of titanium alloy in long duration and high temperature tests, using salt coating of specimens 19 p3379 A66-35657

Stress corrosion tests on specimens of titanium alloy in contact with sodium chloride, noting crack formation and effect of argon 19 p3379 A66-35658

Stress field on epitaxial dislocation line in weakly alloyed titanium, calculating energy of phase boundary and contribution of latter to plastic deformation 19 p3381 A66-35929

Thermal shock resistance of zirconia with 15 mole percent titanium determined by radially quenching disks with thermally insulated faces 19 p3381 A66-35978

Improved thermal shock resistance of zirconia upon addition of 15 mole percent titanium attributed to metal in grain boundary 19 p3381 A66-35979

Solid state bonding of molybdenum-0.5 percent titanium alloy and unalloyed molybdenum and tungsten by vacuum-hot-pressing technique, examining joint microstructure 19 p3369 A66-36127

Protective coatings for titanium and tantalum refractory alloy brazing envelopes, offering ephemeral protection from oxidation at ultrahigh temperatures 19 p3384 A66-36143

High-temperature compression process for producing VT15 titanium alloy tubes 19 p3371 A66-36448

Electric resistance and thermal expansion of Ti-Nb-Cr alloys, noting phase composition 19 p3387 A66-36450

Phase equilibria in Ti-Co-Si system 19 p3387 A66-36451

Cobalt addition to titanium alloy, discussing effect on tensile strength,

- thermal stability fatigue strength, ductility and notch sensitivity 20 p3582 A66-37049
- Titanium alloy endurance and fatigue strength compared to steel and light metals 20 p3583 A66-37306
- Intermediate phases in alloys of Ti with Ir, Rh and Os indicate possibility of polymorphism 20 p3584 A66-37418
- State diagram structure of Ti-Cu system examined, using metallographic, thermographic, X-ray and microhardness analyses 20 p3584 A66-37419
- Stress corrosion cracking of titanium alloy in sodium chloride 20 p3584 A66-37619
- Mechanical and physical effects of metastable phases arising during hardening of titanium alloys containing transition elements 20 p3585 A66-37699
- Solubility and phase transformation in titanium-zirconium system, using X-ray diffraction techniques 20 p3585 A66-37786

- Equilibrium diagram and existence corroboration of Ti-Rh alloy 20 p3586 A66-38093
- Pauli spin paramagnetism and spin-orbit scattering in magnetization of superconducting Ti-Mo alloy 21 p3796 A66-38551
- Titanium alloys with additions of beta stabilizing elements for SST application, noting fabrication problems 21 p3751 A66-39238
- Microstructural and superconductivity analyses of Nb-Ti-O compound as function of thermomechanical processing treatment, plotting critical current density against transverse magnetic field 22 p3960 A66-39780
- Titanium-rich end of Ti-Al solid solution equilibrium diagram 22 p3934 A66-39781
- Superconductivity of Ta-Ti solid solution alloy wires subject to steady magnetic high field 22 p3960 A66-39782
- Welded titanium wing leading edge design and manufacture for increased range and load carrying capacity 22 p3924 A66-40256
- Design and fabrication of welded titanium spacecraft structures noting material control, quality, weight factor, etc 22 p3924 A66-40259
- Self-diffusion parameters of Nb in solid solutions with beta-Ti and beta-Zr at high temperatures 22 p3937 A66-40925
- Machining of gear train made of titanium alloy, discussing surface treatment 23 p4074 A66-41650
- Critical bending angles of rollers used in shaping profiled rings and casings with titanium alloy flanges 23 p4075 A66-41794
- Technological, physical, mechanical and heat resistance properties of new titanium alloy developed on titanium aluminide 23 p4082 A66-41823
- Vanadium and molybdenum effect on properties and phase transformations of titanium chromide 23 p4082 A66-41824
- Aluminum and titanium alloys, composite materials and nonmetallic materials for supersonic transports and VTOL aircraft noting intakes, nozzles and variable-geometry wings [ICAS PAPER 66-1] 23 p4016 A66-41932
- Dislocation arrangement and twin fault formation by quenching and tempering in titanium-tantalum alloy investigated by internal friction measurement and microscopy 24 p4228 A66-42511
- TITANIUM BORIDE**
- Prismatic slip in polycrystalline titanium diboride subjected to high hydrostatic pressure at room temperature 01 p0086 A66-10489
- Low temperature chemical vapor-plating process for obtaining pyrolytic titanium diboride filaments for ablative composites 08 p1244 A66-19140
- Widmanstatten structure in titanium diboride single crystals, noting effects of annealing at high temperatures and determining plane orientation on any surface 12 p1897 A66-24918
- TITANIUM CARBIDE**
- Electric properties of titanium carbide as function of number of vacancies in carbon sublattice 01 p0126 A66-10783
- X-ray measurements of thermal expansion of arc-cast carbides of titanium, zirconium and hafnium 03 p0381 A66-12636
- Titanium carbide coating depositions on steel and subsequent annealing redistribution of elements in interface 06 p0895 A66-16227
- Oxidation products of thin foils of titanium carbide, noting epitaxial growth relationship between titanium carbide, transient oxides and titanium oxide 07 p1052 A66-18512
- Capillary impregnation for preparing poreless materials from titanium carbide and nichrome 08 p1238 A66-18896
- Electric properties of titanium carbide as function of number of vacancies in carbon sublattice 11 p1750 A66-22296
- Dispersion hardening of titanium carbide by boron doping from critical resolved shear stress measurements 11 p1719 A66-23399
- Carbide formation from beta-titanium and graphite 12 p1895 A66-24377
- Plastic deformation of single crystals of titanium carbide with cube orientation in compression from 900 to 1250 degrees C 13 p2106 A66-25059
- X-ray study of component atomic scattering and structural defects for titanium and carbide atoms in titanium carbide 15 p2520 A66-28754
- Electron density distribution in titanium carbide determined by X-ray techniques 16 p2786 A66-31678
- Stacking faults in titanium carbide shown by electron microscopy bounded by partial dislocations 17 p2976 A66-32263
- Solid solutions of titanium, tungsten, chromium prepared by carbidization of mixtures in hydrogen medium and obtained as fine-grained carbide powders 22 p3934 A66-39865
- Melting point and microhardness of carbon-saturated TiC-VC solid solutions, noting temperature of eutectic of TiC-VC with graphite 22 p3934 A66-39866
- TITANIUM CHLORIDE**
- Electrolytic titanium coating properties, covering porosity coating elimination by repeated electrolysis 04 p0536 A66-14005
- Electrolytic titanium coating properties, covering porosity coating elimination by repeated electrolysis 22 p3935 A66-40547
- TITANIUM COMPOUND**
- Ferroelectric properties and morphotropic phase boundary in phase diagram of ternary system of compounds of lead, titanium and nickel 06 p0927 A66-16720
- Titanium oxidation characteristics, determining activation energy of scale formation, oxygen absorption of base metal and total oxygen absorption 09 p1389 A66-20613
- Thermodynamic parameters in heterogeneous reduction equilibrium of nickel titanate with CO from 1285 to 1435 degrees K 11 p1719 A66-23449
- Molybdenum and titanium cathodes applied in getter ion pump, noting improvement of initial and average performance 13 p2078 A66-25649
- Ti-Be system phase diagram, noting solubility and formation of eutectoid and eutectic 18 p3121 A66-33725
- Open air welding of titanium, noting nozzle design for optimum shielding, argon gas flow rate and magnitude of electrode extension 19 p3371 A66-36633
- TITANIUM NITRIDE**
- Nature of interaction between titanium nitride and metals of iron, molybdenum and tungsten groups 04 p0535 A66-13436
- Carbon diffusion into titanium and zirconium nitrides, noting carbide layer parabolic growth rate and experimental techniques 05 p0704 A66-15817
- TiN-Mo cermet production by hot pressing and microstructure and phase composition, noting Ti-N production method 17 p2939 A66-32392
- Nature of interaction between titanium nitride and metals of iron, molybdenum and tungsten groups 20 p3586 A66-38138
- Contact interaction of titanium nitride with Ti, Zr and V at high temperatures in vacuum 22 p3937 A66-40926
- Carbon diffusion into titanium and zirconium nitrides, noting carbide layer parabolic growth rate and experimental techniques 23 p4083 A66-41383
- Oxygen reduction on titanium nitride noting rate of electrochemical oxidation in fuel cell studies 24 p4170 A66-42422
- TITANIUM OXIDE**
- Possible structure of titanium dioxide based rectifier 06 p0924 A66-16547
- Alkali and titania analyses of tektites before and after G-1 precision monitoring 08 p1291 A66-19076
- Increased luminescence of gallium arsenide diodes by coating with titanium oxide 10 p1514 A66-22031
- Transmission electron microscopy determination of structure and morphology of oxide films during Ti oxidation initial stages 13 p2107 A66-25584
- Vacuum deposited films of titanium dioxide examined, using electron microscopy and diffraction methods, noting crystal dislocation due to electron beam irradiation 14 p2359 A66-27133
- Increased luminescence of gallium arsenide diodes by coating with titanium oxide 16 p2661 A66-30851
- Effect of electric and magnetic properties of titanium oxide explained through Matsubara and Yokota theory extended to finite temperatures 19 p3444 A66-36175
- Strength of certain lines of titanium oxide measured in sunspot spectra, determining rotational temperature 20 p3650 A66-37341

- S GEAR TOOTH

TOPCAT PROJECT

Clear air turbulence structure, noting measurement results obtained by Canberra aircraft and TOPCAT project, energy yield of gravitational shearing waves, etc 13 p2122 A66-26127

Stress, eddy viscosity and viscous dissipation estimations in jet stream obtained during Project TOPCAT in Australia, using aircraft soundings 24 p4234 A66-42984

TOPOGRAPHY

SA GEODESY
SA LUNAR TOPOGRAPHY
SA MAPPING
SA SURFACE GEOMETRY
SA TERRAIN

Book on French aerial photography, emphasizing methodology rather than reproduction of samples 04 p0523 A66-14380

Color spectrozonal photography used in plotting topographic maps 06 p0881 A66-16752

Contrast of dislocation near Si surface in anomalous transmission X-ray topographs 06 p0927 A66-16760

Stereoscopic mapping on revolving base, describing process where size of scale is independent of length of half-base 10 p1534 A66-21282

Martian clouds analysis and topographical relationships, discussing white and yellow classification and frequency of occurrences 15 p2602 A66-29951

Topographic interpretation of aerial photographs 15 p2504 A66-30011

Aerial photograph interpretation for sparsely populated regions 15 p2505 A66-30012

Formulas for extraterrestrial potential, anomalous gravity force gradient on Earth topographic surface, deflections of vertical, etc 20 p3549 A66-37043

Colored spectrozonal aerial photographs in topographic decoding of photographs of wooded regions 21 p3735 A66-38570

TOPOLOGY

SA OROGRAPHY

Topological rules for impedance functions of linear reciprocal networks 02 p0208 A66-11906

Topological analysis for networks containing nonreciprocal components and mutual inductance 02 p0208 A66-11907

Signal flow graph for general nonlinear time-varying network 05 p0655 A66-14621

One-to-one continuous representation of topological spaces 06 p0903 A66-16904

Direct method of calculus of variations for finding minimum point for scalar function on functional space 06 p0904 A66-17009

Recurrent classes analogous to those of Markov chains for microscopic topology associated with Hunt processes 06 p0904 A66-17059

Topological analysis of active networks and multiterminal elements, employing primary graph with nondiagonal matrices 07 p1015 A66-17753

Uniform structure for Lipschitz condition on functions between sets, extensions to nonmetric spaces and fixed point theorem for uniform spaces 07 p1059 A66-17969

Pontryagin rational classes as topological and homotopic invariants 08 p1246 A66-19712

Proof of theorem, let $/X, T, \pi/$ be transformation group, where X is Peano continuum with end point fixed under T 10 p1551 A66-21927

Linear graphs theory as part of topology solving problems in circuitry, psychology, linear programming, matrices, network theory, etc 11 p1675 A66-22627

Complete classification of fourth-order nondecomposing curves 12 p1901 A66-23641

Notions of one-and two-dimensional topology in network theory as applied to Kirchhoff laws and network duality 13 p2050 A66-26058

Functional transformations revealing topological properties of single contact /SC/ network, simplifying task of synthesis 13 p2051 A66-26064

Betti numbers shown to be equal to binomial coefficients of torus, determining minimal set of van Hove critical points 15 p2559 A66-28624

Topological analysis and synthesis of star-tree equilibrium immittances, node

conductance matrix and loop resistance matrix 17 p2899 A66-32050

Generalized star-mesh transformation in network theory obtained using fact that Kirchhoff rules, Maxwell rules, Mason rules and Coates formulas can be obtained from each other 17 p2899 A66-32053

Piecewise linear system modeling via topological techniques, using flowgraph method for network synthesis 18 p3090 A66-34247

Left almost periodic function defined on topological group G is not necessarily right almost periodic even if g is Lie group 18 p3127 A66-34461

Approximation technique for flow graph that eliminates nonessential equivalent circuit elements, providing for derivation of most concise model with preassigned accuracy 18 p3092 A66-35040

Topological formulae for sensitivity coefficients of three-terminal-pair-network functions derived by dual procedure in terms of impedance functions 19 p3328 A66-36020

Algebraic enumeration methods for sets of all-trees, two-trees, cotrees and two-cotrees used with Kirchhoff rules for network analysis 20 p3539 A66-38146

Computer algorithm for recognition and extraction of planar graph from incidence matrix 20 p3523 A66-38279

Digital programming and topological optimal filter design incorporating nonideal lossy elements 20 p3533 A66-38281

Electronic computer for topological and geometrical considerations in space structures analysis 21 p3708 A66-39534

TOPSIDE PROGRAM

Early results from topside sounder experiments in Alouette II satellite, presenting ionograms, plasma spike, electron number density and scale height 15 p2496 A66-30075

Correlation of geomagnetic index and plasma scale height in topside ionosphere observed from Alouette topside sounder and planetary geomagnetic data 18 p3169 A66-34517

Topside ionosphere, emphasizing experiments with incoherent scatter radars and topside sounder 22 p3908 A66-39970

Explorer XX topside sounder observations of ionospheric irregularities in electron density and plasma wave electrostatic resonances 22 p3909 A66-39972

Alouette I topside ionograms analyzed, discussing mathematical procedures and digital computer programs in use and orbit and electron density profiles 22 p3909 A66-39973

VLF resonances in conjunction with topside sounder provide information about composition and temperature of terrestrial ionosphere 22 p3909 A66-39975

TORNADO

Three storm cells evolving from ordinary mature stage into tornadic SR mature stage [AFCLR-SR-32-65] 07 p1061 A66-17367

System of equations derived for dynamics of convective atmospheric vortices for model with unstable stratification and basic vorticity 10 p1530 A66-21274

Orographic precipitation areas on windward side of mountains in outer region of typhoon and convective clouds along warm front accompanied by storm 11 p1728 A66-22320

TOROID

Energy calculation as time function required to switch toroidal ferrimagnetic core from one remanent state to another, considering core type used in antenna phased arrays 05 p0642 A66-14564

Design, construction and electrical performance of 20-kw 8.5 to 9.5 gc nonreciprocal latching X-band ferrite phase shifter 09 p1352 A66-20259

Structure of magnetic field of toroidal stellarator with two-helix field 10 p1570 A66-21995

Structure of magnetic field of toroidal stellarator with two-helix field 18 p3150 A66-34972

Controllable threshold circuit using interconnection simple toroids for all-magnetic logic to select signal

paths 24 p4189 A66-43178

TOROIDAL DISCHARGE

Plasma ring discharge excitation used to drive high current density electrodeless arc for exciting gas ion laser transitions 01 p0083 A66-10967

Hydromagnetic oscillation in toroidal discharge with external magnetic field distorting plasma column into helical form 02 p0266 A66-11444

Correlation between plasma and ion density fluctuations as detected by magnetic probe, spectral emission techniques and Langmuir probe 13 p2142 A66-25703

Transverse magnetic field effect on toroidal discharge in strong axial magnetic field 13 p2144 A66-25722

Tokamak-3 experimental thermonuclear device for analysis of toroidal quasi-stationary discharge in strong longitudinal magnetic field 13 p2146 A66-25737

Pulsed toroidal excitation of gas ion lasers extended to drive high power CW laser transitions in Ar, Kr, Cl and Br, noting operating parameters and power output 15 p2513 A66-28877

Toroidal theta pinch discharge with superimposed hexapole magnetic field provides stable toroidal high-beta equilibrium configuration 19 p3414 A66-36513

Plasma instability in toroidal discharges and macroscopic effects resulting from nonlinear plasma oscillation 19 p3415 A66-36515

Interaction of dense plasma with HF field of magnetic wave traveling along toroidal discharge chamber, noting connection to nonlinear effects 19 p3416 A66-36525

Current-carrying toroidal plasma column behavior in strong varying longitudinal magnetic field of Tokamak TM-1 19 p3428 A66-36577

Flute instability in trapped-particle plasma, discussing toroidal plasma discharge 20 p3612 A66-38428

Flute instability in trapped-particle plasma, discussing toroidal plasma discharge 21 p3777 A66-38961

MHD stability of toroidal gas discharge for perfectly ionized gas 23 p4108 A66-42041

TOROIDAL PLASMA

Charged particle interaction with magnetic field of toroidal solenoid, taking into account self-consistent polarization fields and short-circuit currents 02 p0268 A66-11777

Toroidal drift effect on motion of plasma injected across transverse toroidal magnetic field 04 p0550 A66-13432

Image plane structure of inner and outer separatrix of asymmetric magnetic toroidal field 06 p0918 A66-16871

Polarization of plasma moving in magnetic field of toroidal solenoid 06 p0919 A66-16890

Electron cloud drifting axially outside conducting toroidal cylinder in presence of radial electric and azimuthal magnetic fields 08 p1260 A66-18545

Beam trajectories of electromagnetic waves in ionized toroid and effective reflecting toroidal surface 08 p1214 A66-19046

Toroidal system for adiabatic compression of plasma by magnetic field 10 p1570 A66-21996

MHD approach to axisymmetric perturbations in plasma permeated by static dipole field 12 p1951 A66-24574

Critical plasma pressure for equilibrium in toroidal system, noting close relationship between equilibrium and stability problems 14 p2347 A66-28303

Equilibrium conditions for long containment time derived for plasmas in toroidal vessels 14 p2347 A66-28311

Effective thermal conductivity in toroidal plasma filament for Tokamak geometry and Stellarator with figure eight shape 17 p2963 A66-31829

Circular toroidal plasma stability under average magnetic well conditions 17 p2966 A66-32424

Minimum B as toroidal plasma stability criterion 18 p3141 A66-33670

Toroidal system for adiabatic compression of plasma by magnetic field 18 p3150 A66-34973

Stabilization by shear and negative second-derivative of volume against gravitational interchange of toroidal

- system 19 p3412 A66-36501
- Closed toroidal magnetic field
- configurations satisfying stability criterion of low-pressure plasma of minimum-B 19 p3413 A66-36504
- Narrow-tube approximation applied to study of effect of curvature on toroidal plasma centered about closed curve 19 p3415 A66-36518
- Interchange instabilities at general Meyer and Schmidt surfaces in plasma pinch model, noting magnetic field role 19 p3418 A66-36537
- Finite resistivity and nonhydromagnetic instability studied for extent of shear stabilization in levitron 19 p3424 A66-36556
- Plasma equilibrium in torus with HF fields and plasma heating caused by beam of escaping electrons, measuring plasma density, time-dependent plasma luminescence, etc 19 p3424 A66-36558
- Plasma behavior studied in general atomic toroidal octopole machine in which magnetically confined plasma is MHD stable 19 p3426 A66-36570
- Plasmoid motion in magnetic field of toroidal solenoid, examining contribution to closing currents and decontamination from heavy ions 19 p3427 A66-36571
- Joule heating of hydrogen plasma in toroidal Tokamak-3 device by annular electric current, noting stability and plasma interacting with diaphragm 19 p3427 A66-36574
- Abnormal high electron escape rate in Tokamak-2 toroidal chamber determined by microwave probe, noting plasma-loop equilibrium breakdown as possible cause 19 p3427 A66-36575
- Plasma energy loss distribution over linear surface during discharge in Tokamak TM-2 toroidal chamber measured by germanium bolometric probe 19 p3428 A66-36576
- Loss rate comparison for alkali plasma produced by contact ionization in stellarator and toroidal device with minimum mean-B properties 19 p3428 A66-36581
- Plasma adiabatic compression by external magnetic field increasing with time in toroidal chamber, providing two-stage plasma heating 19 p3430 A66-36588
- Resistive ballooning mode relation to universal instability in gravitational field and role in toroidal plasma with rotational transform 23 p4102 A66-41483
- Equilibrium of toroidal magnetically confined plasma, using segmented circular aperture limiter 23 p4102 A66-41484
- Toroidal plasma equilibrium prevailing in Q device with curved magnetic lines analyzed from two-fluid equations 23 p4106 A66-41711
- TOROIDAL SHELL**
- Toroidal shell stresses and displacements under internal pressure in transition range found by bending and membrane theories [AIAA PAPER 65-145] 02 p0297 A66-11542
- Natural frequencies and modes of vibration of prestressed toroidal membrane under internal pressure [AIAA PAPER 65-110] 02 p0297 A66-11545
- Plasma column equilibrium in toroidal chamber maintained by pressure of HF traveling magnetic field and DC magnetic field of longitudinal surface currents 11 p1743 A66-22442
- Stresses and displacements in linearly elastic and toroidal shells of circular cross section determined by nonlinear numerical method [AIAA PAPER 65-144] 16 p2816 A66-30905
- Asymptotic static analysis of pressurized torus shells, predicting vibratory frequencies and buckling under external pressure [AIAA PAPER 66-445] 18 p3250 A66-33647
- TORPEDO PROPULSION SYSTEM**
- High voltage DC brushless torpedo propulsion motor using sea water as power return and controlled by thyristors 12 p1804 A66-24660
- TORQUE**
- Magnetic torquing system controlling satellite spin rate and spin axis orientation 05 p0769 A66-14521
- Minimization of solar radiation pressure effects for gravity-gradient stabilized satellites, primarily attitude errors of pressure torques [ASME PAPER 65-WA/AUT-2]
- 05 p0770 A66-15703
- Quantitative theory of magnetic anisotropy torque transducers in reasonable accord with measured data 07 p1030 A66-17218
- Aerodynamic drag torque on rotating sphere in transition regime, noting dependence of gas inertia on Reynolds number 11 p1635 A66-22935
- Aerodynamic torque effect on UK-3 satellite precession rate 11 p1777 A66-22966
- Magnetoresistance effect applied to Rotatable Initial Susceptibility II films, explaining resulting hysteresis loops and torque curves 13 p2161 A66-25183
- Magnetic attitude control of rigid spinning satellite in circular Earth orbit by producing control torques 21 p3763 A66-38846
- Inertia product terms effect on satellite gravitational torques 24 p4283 A66-42781
- TORQUE MEASURING APPARATUS**
- Anisotropy of ytterbium iron garnet and ytterbium-doped yttrium iron garnet crystals measured by torque method in applied magnetic fields 04 p0563 A66-13812
- Transducer for measuring pressure, temperature, velocity, force, torque and displacement 13 p2082 A66-26312
- Instantaneous electromagnetic torque measuring system developed by two-phase 60-cycle servomotor 18 p3110 A66-33834
- Torque on rigid body in circular orbit in gravitational central field derived, using body-centered coordinate system aligned with gravity gradient 18 p3237 A66-35030
- Single-axis meter design and development for measuring feeble torques on massive bodies, discussing calibration, testing results, evaluation of static dipole moments and spacecraft spin-rate control 21 p3722 A66-38880
- TORQUE MOTOR**
- Preflight checking of aircraft gyroscopes and accelerometers noting built-in spin detection, torque generator and gimbal check 01 p0070 A66-10956
- Attitude control by means of reaction wheel driven by photoelectronically commutated DC torquer 02 p0179 A66-11278
- Brushless DC reaction wheel operation, examining use of current limiting to achieve constant torque 02 p0179 A66-11279
- Operating characteristics of torque motors and application to actuating pneumatic and hydraulic control mechanisms 03 p0323 A66-12906

- TORSION**
- Simple auxiliary torsion testing device for use with universal tension-compression testing machines 01 p0151 A66-10201
- Completely plastic torsion of cylindrical bar with simply connected cross sections examined, using ridge of Jordan domain analogy 09 p1466 A66-20130
- Torsion of reinforced cylindrical shell with long rectangular cutout 16 p2818 A66-31057
- Natural oscillation frequency of gyro mounted in torsional suspension, taking into account moments of inertia of sensitive element 17 p2926 A66-32799
- Stiffener eccentricity effect on cylindrical shell buckling under torsion, noting rings and stringers 17 p3031 A66-33079
- Torsion of nonlinear viscoelastic circular cylinder in terms of stress tensors prescribed by time-functionals of finite strains 17 p3032 A66-33332
- Rectangular-parallelepiped problem of restrained torsion produced by mutual rotation of two absolutely rigid diaphragms attached to opposite faces 21 p3831 A66-39292
- Torsion of elastic rectangular bar with similarly distributed external tangential loads applied at both ends 24 p4289 A66-42436
- TORSIONAL STRESS**
- Calculation method for natural bending pulsations of continuous medium extended to case of torsion 01 p0154 A66-10643
- Stresses in elliptical cross section rod subjected to elastoplastic torsion, using Legendre transforms 02 p0301 A66-12173
- Torsion problem of nonhomogeneous infinite circular cylinder with symmetrically located spherical cavity 03 p0442 A66-13302
- Shear center location to get bending without twisting in open section beams 04 p0588 A66-13799
- Couple stresses in problems of torsion covering prismatical bars, linear isotropic and hyperelastic bodies 04 p0591 A66-14210
- Torsional instability of cantilevered bars, describing effects of distributed nonconservative compressive load at free end [ASME PAPER 65-WA/APM-19] 05 p0777 A66-15441
- Elastic-plastic stress and strain distribution in solid or hollow shaft containing external or internal hyperbolic notches [ASME PAPER 65-WA/APM-20] 05 p0689 A66-15442
- Yield criterion of prestrained materials, covering effects of characteristic index and stress direction on yield stress [ASME PAPER 65-WA/MET-4] 05 p0780 A66-15691
- Effect of torsional and lateral restraints on elastic critical load of centrally loaded simply supported beam buckling laterally 06 p0966 A66-16613
- Elastic torsional analysis of irregular shapes, determining direct stiffness solution, shear stress and warping function distribution for shafts 06 p0966 A66-16614
- Torsion problem of thin walled continuous beams with open cross section 06 p0967 A66-16923
- Inhomogeneity effect of plastic deformation distribution during torsion on locking of macroshear during alternating torsion of tubular specimens 08 p1311 A66-19313
- Torsional buckling of thin walled prismatic bars of arbitrary cross section, considering buckling shear resilience 08 p1311 A66-19343
- Nonlinear stability of orthotropic cylindrical shell under torsional stress 08 p1315 A66-19732
- Elastic-plastic stress-strain distribution in solid or hollow shaft containing external or internal hyperbolic notches [ASME PAPER 65-WA/APM-20] 12 p1885 A66-23977
- Torsional instability of cantilevered bars, describing effects of distributed nonconservative compressive load at free end [ASME PAPER 65-WA/APM-19] 12 p1961 A66-23979
- Pure torsion of infinite solid containing two rigid spherical inclusions 12 p1962 A66-23995
- Torsion in orthotropic rod of rectangular cross section and tubular cylindrically anisotropic rod, with variable elastic moduli 12 p1966 A66-24060
- Torsional stress distributed on ends and lateral face of anisotropic rod with variable elastic moduli 12 p1969 A66-24353
- Yield criterion of prestrained materials, covering effects of characteristic index and stress direction on yield stress [ASME PAPER 65-WA/MET-4] 12 p1970 A66-24537
- Torsion of elastic cone as mixed boundary value problem, using Mellin transforms and Wiener-Hopf technique 14 p2408 A66-28395
- Torsion of hollow circular cylinder, consisting of arbitrary number of cylindrically orthotropic layers, by stress exerted on cylindrical boundary 15 p2613 A66-29432
- Torsion analysis of thin walled profile of bisymmetrical cross section subjected to finite twist 15 p2615 A66-29722
- Mechanical forces on superconducting tin film in magnetic field, using torsion pendulum, noting conservative force association with currents in film 16 p2770 A66-30175
- X-ray diffraction patterns of fatigue damage of metals under alternating mean and torsional stress 16 p2816 A66-30810
- Stress-strain law and finite torsion of homogeneous circular cylinder, noting deformation and force needed to keep final

state of body in equilibrium 17 p3025 A66-32499
 Plastic expansion in metals due to alternating torsional and static tensile loading 17 p3029 A66-32808
 Surface shear traction and torsional compliance of elastic plate pressed between identical elastic spheres 18 p3249 A66-33586
 Monograph on thin walled rods under bending and torsion, discussing calculations in lightweight structure design 18 p3254 A66-33966
 Torsion of prismatic rods of triangular or trapezoidal cross section, using Green function to obtain exact solution 18 p3256 A66-34395
 Elastic stability of thin walled circular cylindrical shells in torsion, applying Galerkin method to Donnell equations for critical stresses 18 p3258 A66-34648
 Elastic dissipation of Earth torsional modes estimated by generalized elastodynamic equation 18 p3108 A66-34734
 Thin walled box beams under nonuniform torsion treated by energy method 19 p3472 A66-35312
 Quantitative examination of Saint Venant principle in context of elastostatic boundary problems, i.e., axisymmetric pure torsion of bodies of revolution 19 p3473 A66-35485
 Grain boundary migration in pure aluminum and lead under reversed torsional and bending stresses at elevated temperatures 19 p3386 A66-36365
 Nonstationary forces and bending and torsional moments along wing computed, using punch card system 20 p3674 A66-38442
 Resonance machine design for producing torsion and bending, ensuring equality of dynamic amplification factors 21 p3827 A66-38619
 Initial buckling under shear stress of long clamped plate with parallel edges reinforced by stiffener mesh, noting flexural and torsional rigidity of stiffeners 22 p3995 A66-40495
 Cyclically moving loads causing resonance in elastic rods, strings and torsional members having fixed ends 23 p4141 A66-41922
 Creep testing of tubular copper samples under combined tension and torsion with constant and variable loads 23 p4083 A66-41976
 Two mixed boundary value problems of infinite elastic cylinder under torsion solved by dual integral equation with differentiation of boundary conditions 24 p4291 A66-42843

TORSIONAL VIBRATION
 Torsional oscillations of plane with large suction effect on magnitude of induced axial steady inflow toward surface of disk 01 p0057 A66-10429
 Torsional stability of elongated cylindrical shell 01 p0153 A66-10465
 Forced torsional motion of semilinear isotropic elastic cylinder with vibrations excited by harmonically oscillating rigid disk, using integral equation 04 p0589 A66-13829
 Self-excited torsional vibrations of power transmission drives under boundary lubrication, developing rotating shaft/bearing relations 05 p0772 A66-14643
 Torsional vibration analog computer and determination of torsional oscillation frequencies in multimass in-line systems 07 p1144 A66-18164
 Transfer matrices of vibrating thin-walled open profile bars under forced, coupled bending and torsional stresses 08 p1311 A66-19342
 MHD flow between torsionally oscillating disks in viscous conducting fluid subjected to uniform axial field 09 p1408 A66-20502
 Oscillating viscous flows past cylinder and torsionally vibrating disk 11 p1687 A66-22438
 Torsional oscillations of fluid sphere with rigid boundary in uniform magnetic field 11 p1745 A66-23007
 Capacitive torsional vibration transducer for measuring angular displacement of vibrations in engine shaft 12 p1880 A66-23845
 Torsional oscillations of hollow cylinder of finite length encased in thin elastic shell 14 p2406 A66-27999
 Prediction of flight transient torsional

acceleration at base of Surveyor spacecraft and implementation of pulse qualification testing 14 p2392 A66-28001
 Shear wave velocity computed from torsional resonant frequency 14 p2410 A66-28482
 Forced torsional vibrations of pointed bodies of revolution 15 p2510 A66-29437
 Dynamic instability in undamped bellows face seals operating in cryogenic environment with torsional oscillation and diametrical rocking as primary motion [ASLE PAPER 66AM 2CE] 16 p2711 A66-30408
 Static thrust experiments on single degree-of-freedom torsional vibration of helicopter rotor blades due to stall, and amplitude dependence on blade mean pitch angle and reduced vibrational frequency 16 p2634 A66-31321
 Natural frequencies of torsional vibrations of circular cone possessing cylindrical anisotropy 16 p2823 A66-31633
 Bending-torsional flutter of uniform swept wing with velocity component aerodynamic-strip theory 17 p3028 A66-32767
 Parameter variation effect on self-excited torsional oscillations and sustained frictional vibrations in mechanical systems, comparing results with analog computer predictions 18 p3256 A66-34558
 Subharmonic vibrations during resonant testing of thin walled beams for coupled torsional and bending vibrations 18 p3256 A66-34559
 Optimum cross section design for thin walled bar under combined torsion and bending 21 p3832 A66-39377
 Torsional oscillations of infinite plate in elasticoviscous fluid solved by motion equation expansion of velocity profile in powers of amplitude 21 p3730 A66-39457
 Departure phenomena of pointer type moving-coil instrument for electrical measurement with capability of torsional vibrations 23 p4071 A66-41952

TOUGHNESS
S FRACTURE TOUGHNESS
TOWNSEND AVALANCHE
 Frequency response of avalanching photodiodes, discussing multiplication rate and extension of Townsend theory 15 p2458 A66-28889

TOWNSEND DISCHARGE
 Pressure dependence of Townsend second coefficient for sparking potential in gases at constant E/p 06 p0911 A66-16283

TOXICITY
SA OXYGEN TOXICITY
 Acute inhalation toxicity of oxygen difluoride in albino rat 08 p1175 A66-19723
 Inhalation toxicity at ambient and reduced pressures in monkeys, dogs and rodents upon exposure to ozone, nitrogen dioxide and carbon tetrachloride 08 p1176 A66-19724
 Increase of arterial lactate and pyruvate in blood glucose of fasted anesthetized dog after hydrazine injection 17 p2856 A66-32157
 Calorimetric study of effects of hydrazine on heat balance, source of metabolic energy and rate of protein catabolism of rats 17 p2856 A66-32158
 Toxic effects of hydrazine derivatives tested in dogs, producing methemoglobin and pigmentation in blood 17 p2856 A66-32159
 Pathological and metabolic changes due to toxicity of unsymmetrical dimethyl hydrazine /UDMH/ 22 p3858 A66-40507

TOXICITY AND SAFETY HAZARD
 Effective planning and operations required for control of air pollution due to increased use of toxic propellants in larger missiles 02 p0183 A66-11491
 Safe usage of toxic chemical agents in aircraft maintenance 06 p0816 A66-16056
 Health hazards in handling and processing beryllium and its compounds, noting effect on lungs and reviewing AEC recommendations 08 p1177 A66-18854
 Safety requirements for handling and testing unstable materials, particularly hydrazinium diphosphate /HP sub 2/ solid propellant oxidizer 12 p1812 A66-24469
 Clean Air Act in relation to toxicology and safety to evaluate atmospheric pollution [AIAA PAPER 66-375] 12 p1907 A66-24501

Atmospheric diffusion study to determine toxic hazard exclusion distances for rocket launching personnel under operating conditions [AIAA PAPER 66-376] 12 p1907 A66-24502
 Toxic hazards of trace contaminants at reduced pressures associated with spacecraft 14 p2228 A66-28008
 Low atmospheric pressure and oxygen-rich environment effect on characteristics of uninterrupted long-term exposure to toxic gases of space cabin atmospheres, noting animal testing 16 p2642 A66-30623
 Trace contaminant control in closed environments as requirement for safe air in habitable areas of manned spacecraft [AICE PREPRINT 26A] 17 p2867 A66-32676

TOXICOLOGY
SA PHARMACOLOGY
 Toxicological effect of hydrazine and monomethylhydrazine in blood serum of rats 05 p0626 A66-14642
 Mice susceptibility to pentobarbital sodium, showing short term fluctuations in toxicity 09 p1338 A66-20964
 Toxic and lethal effect on mice of ammonia in air, noting biological and physiological changes 15 p2439 A66-29494

TRACE CONTAMINANT
 Semiconductor based three-channel amplitude pulse analyzer for radioactive products of engine wear 01 p0046 A66-11040
 Quantitative detection and washing and pumping methods for removal of traces of water from alkali halides 09 p1339 A66-20874
 Correlation and prediction of adsorption levels of gaseous contaminants for removal from space cabin atmospheres [AICE PREPRINT 26B] 10 p1491 A66-21189
 Semiconductor based three-channel amplitude pulse analyzer for radioactive products of engine wear 11 p1671 A66-23286
 Chemical analysis of permanent and trace organic gases in 30-day manned experiment, using gas chromatography 12 p1811 A66-25011
 Toxic hazards of trace contaminants at reduced pressures associated with spacecraft 14 p2228 A66-28008
 Carbon dioxide to calibrate instruments for carbon determination in metals 15 p2445 A66-28617
 Trace contaminant control in closed environments as requirement for safe air in habitable areas of manned spacecraft [AICE PREPRINT 26A] 17 p2867 A66-32676
 Microwave spectroscopy used to identify unambiguously contaminant trace gases in mixture and indicate amount of each [AICE PREPRINT 54D] 17 p2868 A66-32678
 Correlation and prediction of adsorption levels of gaseous contaminants for removal from space cabin atmospheres [AICE PREPRINT 26B] 17 p2868 A66-32679
 Spacecraft trace contamination control requirements quantitatively defined, emphasizing physical and chemical sorbents and combustion catalysts 19 p3293 A66-36237
 Two-gas regenerative life support system for pressure, thermal and humidity control, water reclamation, atmospheric circulation, carbon dioxide and trace contaminant removal [AIAA PAPER 65-501] 20 p3510 A66-38172

TRACE ELEMENT
 Gallium concentrations in iron phases of several chondritic meteorites 02 p0290 A66-11962
 Holbrook meteorite discussing abundance of lithium isotopes, measurement techniques, apparatus, and concentration pattern over surface 03 p0429 A66-13268
 Fe and Mn variation in tektites, significance in identification of parent material 04 p0575 A66-13454
 Ultrapurification discussing definition, purification techniques, analytical techniques /e.g. emission and mass spectroscopy/ and role in biochemistry, metals and materials 04 p0474 A66-13867
 Behavior of trace elements in gallium arsenide and materials and methods used for ohmic contacts to n-and p-type specimens, stressing importance of indium 11 p1757 A66-23283
 Automatic electroanalytical equipment for determination of gas traces by conductometry, potentiometry, coulometry and galvanometry 14 p2296 A66-27734

- Trace element effect on lifetime of iron-chromium-aluminum heat-resisting alloy 16 p2723 A66-30311
- Trace impurity determination in semiconductors by spectral analysis, using plasma generator 19 p3442 A66-35944
- Fluorine, chlorine and other trace elements determined through differentiated tholeiitic dolerite sill from Tasmania using statistical techniques, showing hydroxyl lattice sites by chlorine and fluorine 24 p4198 A66-42364
- TRACER**
- High precision high-spatial resolution tracer study of low-noise steady air flow in rectangular pipe, emphasizing region within two microns of wall 10 p1524 A66-21804
- Tracer dilution technique for measuring quantity of urine voided by crew members in manned spacecraft environment 17 p2870 A66-32192
- CRT oscilloscope tracer device for relay units and relay parameter influence on operational characteristics 19 p3358 A66-35835
- TRACK**
- S GROUND TRACK
- S PARTICLE TRACK
- S SPACE TRACK PROJECT
- S TEST TRACK
- TRACKING**
- SA COMPENSATORY TRACKING
- SA INFRARED TRACKING
- SA LUNAR TRACKING
- SA MISSILE TRACKING
- SA OPTICAL TRACKING
- SA PHOTOGRAPHIC TRACKING
- SA PURSUIT TRACKING
- SA RADAR TRACKING
- SA RADIO TRACKING
- SA RANGE AND RANGE RATE TRACKING
- SA RAY TRACING
- SA SATELLITE TRACKING
- SA SPACECRAFT TRACKING
- SA SPECTROMETRIC TRACKING
- SA STAR TRACKING
- SA SUN TRACKER DEVICE
- Visual write-erase-nonstore and electrical readout accurate tracking display storage tube operating on principle of secondary electron emission charging of thin film dielectric 22 p3927 A66-40287
- TRACKING ANTENNA**
- Diane, European interferometric tracking station noting antenna system, calibration operations, angular measurement, etc 03 p0333 A66-12478
- Ground antenna for satellite tracking and orbit calculation 09 p1355 A66-20587
- Control of radio telescope, noting servosystem ability to keep tracking position errors and wind-caused error within certain limits 12 p1851 A66-24319
- USN contributions to space communications, noting Syncom program, communications by Moon relay, design of antenna aboard Kingsport vessel, etc [AIAA PAPER 66-270] 12 p1820 A66-24743
- Circularly polarized tracking feed in Haystack antenna 13 p2035 A66-25504
- Modified AN/GMD-1, -2 as S-band tracking and telemetry system 18 p3066 A66-33620
- Four-and five-horn tracking feeds for large antennas, emphasizing sum channel gain in five-horn feed 18 p3083 A66-34292
- Large tracking antenna opposed torque pump motor analysis 18 p3055 A66-34294
- Peak drive power requirements, optimum drive size and torque requirements for large aperture steerable tracking antenna 18 p3055 A66-34295
- Autotracking accuracy of large antenna systems for satellite communication application 18 p3071 A66-34301
- Large aperture millimeter wave antenna for high resolution tracking measurements and real-time data reduction 18 p3084 A66-34303
- Amplitude-comparison tracking antenna utilizing parabolic reflector, determining parameters from radiation patterns 18 p3086 A66-34396
- Cassegrain monopulse tracking antenna for LEM and Command Module rendezvous guidance 21 p3714 A66-39524
- TRACKING FILTER**
- Digital computer simulation for phase-locked loops used as narrow-band tracking filters in space communications and radar systems 05 p0652 A66-14590
- Wiener filters in phase locked loop design, noting tracking function for orbital trajectory, derivation of optimum filter and noise bandwidth 09 p1350 A66-19921
- Simulation results of adaptive tracking filter application to stabilization of structural bending modes of SI-B launch vehicle 21 p3821 A66-38877
- TRACKING RADAR**
- SA SEARCH RADAR
- Track-while-scan automatic acquisition radar for Nike-Zeus system 03 p0331 A66-12368
- Instrumentation monopulse tracking radar AN/FPQ-10 using mainly solid state components at Pacific Missile Range 04 p0480 A66-13629
- Antenna construction, RF system, receiver and detector, information bandwidth, target modulation and efficiency points of monopulse and conical scanning system for tracking radars 04 p0487 A66-14130
- Radar for tracking satellites and space vehicle, considering transponder beacons and comparing pulsed and CW systems 04 p0487 A66-14131
- Radar localization deviations, examining infinitely-long conducting cylindrical obstacles 04 p0488 A66-14413
- Wideband two-channel monopulse technique combining two difference channels used in three-channel technique into single difference channel 06 p0824 A66-15980
- Dynamic range bounds of error detection circuits of tracking radars, minimizing probability of excluding Rayleigh distributed signal 12 p1817 A66-24302
- Shipboard tracking radar natural frequencies and mode shapes, noting resonance conditions and sensing, numerical analysis of mathematical model, etc 16 p2678 A66-30461
- Automatic tracking radar control via nonstationary filter, noting design principle and operation 20 p3536 A66-36866
- Radar target tracking error induced by ground reflection of radar echo from static beam split autotracking radar 20 p3520 A66-38142
- Programmed oscillators to control Doppler tracking radar systems for space communications and radar astronomy 22 p3862 A66-39731
- TRACKING STATION**
- SA GROUND STATION
- Interferometric system of Diane satellite tracking stations permits high altitude tracking and measurements with larger solid angle 01 p0030 A66-10788
- Specification of satellite observations performed at Polish observation stations 03 p0430 A66-12464
- Diane, European interferometric tracking station noting antenna system, calibration operations, angular measurement, etc 03 p0333 A66-12478
- Station network designed for CNES using Doppler frequency tracking, coherent systems of demodulation, polarization, etc 03 p0351 A66-12479
- Tracking network of Smithsonian Observatory and geodetic results 03 p0336 A66-13026
- Real-time telemetry data system for linking remote tracking stations with central station near Cape Kennedy 04 p0479 A66-13615
- RADINT rocket tracking station combines Doppler and interferometer techniques, eliminating need for three or four separate ground stations 09 p1355 A66-20588
- Ground station characteristics and requirements in fields of tracking, telemetry and remote control 10 p1520 A66-21706
- Diane satellite tracking station, examining functioning of synchronous demodulator with hypothetical carrier 10 p1504 A66-21707
- Diane tracking station electronic equipment accomplishes variable and selective amplification of signals and coherent demodulation of phase information 10 p1520 A66-21710
- Theoretical and experimental study of accuracy of Diane interferometric tracking network 14 p2238 A66-27545
- Real-time telemetry data system for linking remote tracking stations with central station near Cape Kennedy 14 p2243 A66-28348
- Air Force Eastern Test Range/AFETR/Central Telemetry Station /TEL-4/, facilities and objectives 14 p2272 A66-28433
- CNES network of stations for FR-1 and D-1A, discussing checks of proper functioning, orbital corrections, telemetry, ground control, etc 18 p3094 A66-33978
- Determination method for acquisition time, azimuth of satellite and duration of contact between tracking stations and satellites in general elliptic orbits 19 p3305 A66-36619
- Multivariate statistical error model representation of single radar tracking station and analogous model for three stations used to compare measuring accuracies 20 p3514 A66-37219
- Three-station range trilateration for establishing orbit of visible satellite used for calibrating ground tracking network 20 p3514 A66-37223
- Radio-observation station functions, observed satellite signals from beyond horizon and Doppler curve deformation 20 p3552 A66-37845
- Autonomous celestial and selenocentric spacecraft navigation and orbit prediction without using ground tracking stations 20 p3598 A66-38253
- TRACKING STUDY**
- Tracking geometry and dynamics of lunar satellite, estimating orbital elements and lunar gravitational field parameters through Earth-based range and range rate observations [AIAA PAPER 66-39] 07 p1139 A66-18448
- Nonlinear servomechanism analyzed, using Fokker-Planck equation, discussing tracking failure 11 p1670 A66-23224
- Behavior of human operator as link in servosystem in tracking and compensation regimes, determining transfer function under steady state and perturbed conditions 12 p1851 A66-24316
- Probability of detection of smooth satellite-launched aluminum spheres, noting orbital parameters, microwave radar efficiency, etc 14 p2391 A66-27039
- Tracking interruption probability in second order astatic system, obtaining solution from Fokker-Planck equation and computer simulation 14 p2265 A66-27524
- Performance of human operators in three-state relay control system with velocity augmented displays 16 p2644 A66-31270
- Mathematical model for systems comprising human operator controlling typical controlled elements, noting behavior variability and performance estimation of mean-squared error in tracking 20 p3508 A66-36861
- TRACKING SYSTEM**
- Evaluation and calibration of missile and space tracking systems including test-by-test analysis, lofted rockets, self-calibrating systems, etc 01 p0053 A66-10805
- Optimal control display relationships in general tracking including piloting and radar tracking operation 03 p0329 A66-13349
- Goddard Range and Range Rate System concept, design and performance for near-Earth and cislunar spacecraft tracking 04 p0479 A66-13618
- Solar boresighting of S-band antennas for long range tracking radar 04 p0479 A66-13619
- Linking monopulse radar antennas in aircraft tracking system 04 p0497 A66-13965
- Differential equations of automatic tracking systems reducible to equations with constant coefficients by introducing rotating coordinates 04 p0482 A66-13977
- Tracking equipment in 4 gc for space communication via satellite, noting error 05 p0634 A66-15364
- Two-axis pedestal tracking limitations in station vicinity such as angular acceleration, velocity and reacquisition capability [ASME PAPER 65-WA/MD-17] 05 p0635 A66-15522
- Performance of delay-lock discriminator, nonlinear feedback device for continuous tracking of delay difference between two correlated waveforms 06 p0842 A66-15976
- Dual-mode acquisition and tracking system using random noise as carrier

- signal 06 p0842 A66-15977
Scene correlation tracking system or sensor device \ measures displacement between two views of same scene 06 p0842 A66-15978
Signal design for space communications and tracking, comparing performance of harmonic and pseudorandom systems 06 p0834 A66-16860
Operational requirements for improved worldwide navigational ability, initially applied in North Atlantic area 07 p1072 A66-17761
Receiver for processing lane identification signals for Dectra navigation system and relation to tracking accuracy and probability of error 07 p1074 A66-17773
NASA Space Tracking and Data-Acquisition Network, describing command telemetry, tracking handling and recording system operations 08 p1180 A66-18587
Amplitude and phase direction-finding characteristics of monopulse automatic tracking system operating on sum-difference principle 08 p1190 A66-18911
Passive spaceborne trajectory tracking system design, using tetrahedral tracking geometry 08 p1184 A66-19509
Automatic parameter tracking model for adaptive control system, using steepest descent procedure for adjusting parameters 09 p1362 A66-20611
Celestially referenced electronic space tracking system for augmenting accuracy of existing antenna 10 p1505 A66-21895
Microminiature Loran-C Receiver/Indicator for analog-to-digital conversion, using integrated circuit 10 p1555 A66-22047
Unmanned space missions with regard to dynamical requirements, propulsion systems, tracking methods, guidance and control 12 p1953 A66-23636
Frequency stability requirements for space communications and tracking systems 12 p1815 A66-24131
Secant correction and dynamic compensation for tracking pedestal servo loop in operational amplifier circuit 12 p1816 A66-24261
IR trackers, discussing method of operation, performance characteristics and application 13 p2025 A66-25983
Sensitivity and tracking capabilities of precision laser automatic tracking system 13 p2025 A66-25984
Goddard Range and Range Rate System for near-Earth and cislunar cooperative target tracking, noting design and operation 13 p2025 A66-26014
Error in tracking loops as satellite passes over tracking system 14 p2265 A66-27480
Semiautomatic digital data processing system used in ground control of interceptor aircraft, noting track marking on PPI display, control of height radar, radio message transmission, etc 14 p2271 A66-28299
Operations research model for automation in range scheduling 14 p2272 A66-28437
ETR range control modification for greater flexibility to meet 14 p2272 A66-28439
Precision automatic tracking using CW He-Ne laser, noting performance and application 14 p2245 A66-28448
S-band automatic tracking telemetry antenna, using tracking mount and servosystem of T-9 radar tracker for microwave telemetry studies and other experiments 16 p2659 A66-30551
Dual polarized high-power synthetic conical scan tracking system at various frequency ranges for parabolic reflector used in communication link 16 p2650 A66-30552
Telemetry tracking acquisition aid system /TELTRAC/ applied to Gemini project, noting antenna, receiver, error analysis, etc 16 p2650 A66-30553
Stability of automatic systems for tracking point targets, noting nonlinear dependence of signals on channel mismatch and its limiting values 17 p2902 A66-32579
Automatic instrumentation for celestial sightline tracking of spacecraft 18 p3132 A66-33871
Binary delay-lock tracking-loop performance for various RF implementations 18 p3069 A66-34252
Doppler tracking loops for antenna array system adaptive to changes in signal and noise levels, maintaining constant SNR in tracking loop 19 p3321 A66-36413
Lapunov functions for finite time stochastic stability and analysis of tracking system 19 p3338 A66-36738
Soviet RT-15 radio telescope control system, noting two-reflector system telescope antennas, parabolic mainreflector and automatic and visual tracking possibilities 20 p3540 A66-37026
Computer model analysis of functional relationships of human operator information handling and control in closed loop tracking situation 20 p3509 A66-37236
Satellite observation via photogrammetry, discussing triangulation 22 p3917 A66-39738
Signal simulator for testing Loran A and Loran C airborne receivers in laboratory, using digital simulator circuits to test dynamic response of tracking circuits 23 p4088 A66-41253
Integral monitor development for ILS localizer, predicting changes in track position and width, noting principles of operation and performance 23 p4044 A66-41322
Doppler frequency-measuring tracking system in which tracking filter or retuned heterodyne is used for definition of signal with unknown frequency 23 p4038 A66-41524
- TRADESCANTIA**
Chromosome configuration and mitosis impairment in micropores Tradescantia paludosa due to space flight effects of Voskhod I 11 p1645 A66-23050
Vibration effects on chromosomes of Tradescantia paludosa and other microspores subjected to Vostok satellite conditions 18 p3058 A66-33781
- TRAFFIC CONTROL**
SA AIR TRAFFIC CONTROL
Traffic control for space vehicles and probable flight data 07 p1140 A66-17228
Adaptive utilization of communication satellite systems optimizing dynamic traffic handling of combined ground and satellite communications complex, noting network configurations [AIAA PAPER 66-295] 12 p1822 A66-24764
System engineering model formulation and evaluation, citing as examples X-15 aircraft and Manhattan automobile traffic control systems problems 15 p2619 A66-29381
Angular discrimination improvement in radar beacon systems using null-type antenna superposed on normal directional beam 17 p2872 A66-31957
Aircraft, missile and space launch systems, considering in-flight transportation and separate and multiple orbital missions [AIAA PAPER 65-344] 20 p3664 A66-38150
- TRAIL**
S METEOR TRAIL
S SMOKE TRAIL
- TRAILING EDGE**
Subsonic flow near trailing edge of low aspect ratio delta wing 04 p0454 A66-13518
Improved numerical procedure for harmonically deforming lifting surfaces from supersonic kernel function method [AIAA PAPER 66-78] 08 p1163 A66-18995
Pressure distribution at low speeds on two-dimensional airfoils with blunt trailing edges at zero incidence, taking into account wake 19 p3278 A66-36751
Approximate Navier-Stokes equations for viscous flow conditions near trailing edge of flat plate 23 p4059 A66-42001
- TRAINER**
Blade vibration simulation in helicopter trainer by applying amplitude motion to trainer 14 p2271 A66-28030
- TRAINING**
SA ASTRONAUT TRAINING
SA EJECTION TRAINING
SA FLIGHT SIMULATION
SA FLIGHT TRAINING
SA GUNNERY TRAINING
SA INSTRUCTION
SA LEARNING
SA MEMORY
SA PILOT TRAINING
SA SIMULATOR TRAINING
- Statistical study of training and job performance measures of Air Traffic Control Specialists representing Enroute, Terminal and Flight Service Station specialties 06 p0973 A66-16821
Training seminar for reliability surveyors organized by NASA, particularly for Apollo program, noting content, participation, methodology, etc 20 p3686 A66-37957
Training problems of reliability engineers for aerospace industry 20 p3686 A66-37958
Vigilance training for signal detection 22 p3858 A66-40858
- TRAINING AIRCRAFT**
SA T-34 AIRCRAFT
Electronic data processing used to analyze AFM 66-1 maintenance data on USAF T-38 supersonic jet trainer for reliability monitoring 20 p3572 A66-37945
- TRAINING EQUIPMENT**
SA FLIGHT SIMULATOR
Spacecraft crew training, noting universal multipurpose, complex and specialized functional training 15 p2443 A66-29440
Helicopter trainee performance following synthetic flight training, noting flyable aircraft attached to ground effects machine 22 p3857 A66-40250
- TRAJECTORY**
SA ASCENT TRAJECTORY
SA BALLISTIC TRAJECTORY
SA DESCENT TRAJECTORY
SA EARTH-MOON TRAJECTORY
SA ELECTRON TRAJECTORY
SA FLIGHT PATH
SA INTERPLANETARY TRAJECTORY
SA LUNAR TRAJECTORY
SA MISSILE TRAJECTORY
SA PARTICLE TRAJECTORY
SA REENTRY TRAJECTORY
SA RENDEZVOUS TRAJECTORY
SA SPACE TRAJECTORY PROGRAM
SA SPACECRAFT TRAJECTORY
Union of and estimates for trajectories of orientor fields 05 p0707 A66-15033
Libration point motion in restricted four-body problem and stable trajectory determination for Earth-Moon-Sun system, noting effect of initial configurations of system [AIAA PAPER 65-684] 19 p3461 A66-35891
- TRAJECTORY ANALYSIS**
Low thrust spiral trajectory of satellite of variable mass 02 p0288 A66-11551
Axisymmetric cluster of hyperbolic trajectories of material particle near planet, for space navigation application 02 p0289 A66-11652
Numerical analysis of behavior of very large number of constant volume particle trajectories 02 p0253 A66-11822
Pursuit problem covering trajectory equations and motion stability 04 p0543 A66-13559
Impulsive approximation, basis for trajectory analyses for space missions in which finite-thrust powered phases of finite duration are replaced by instantaneous changes of velocity [AIAA PAPER 66-12] 06 p0953 A66-16257
Flyby landing excursion mode compared with standard manned planetary stopover missions [AIAA PAPER 66-36] 06 p0953 A66-16414
Russian book on three-dimensional problem of reaching Moon, covering power optimized trajectories, initial velocity minimum, lunar orbit, perturbation factors, etc 06 p0954 A66-16563
Dimensionless differential corrections and proper coordinate system for generalized preflight guidance 08 p1249 A66-18819
Rapidly convergent iterative unique determination of linear steering function for desired orbit conditions 08 p1289 A66-18826
Linear perturbation theory computation of target errors in lunar impact trajectories due to random injection errors 08 p1289 A66-18828
Trajectory possibilities for Venus swingby mission and role in manned exploration of Mars [AIAA PAPER 66-37] 08 p1290 A66-18988
Approximate solutions for reentry trajectory in Earth atmosphere, neglecting Earth rotation and assuming spherical Earth

shape and exponential density-altitude relationship 08 p1299 A66-19831

Trajectory analysis and Birkhoff rings in restricted three-body problem in three-dimensional coordinate 09 p1453 A66-20251

Qualitative relationship between trajectories of proportional navigation and initial parameters determining motion 09 p1400 A66-20352

Qualitative behavior and index of trajectories in neighborhood of isolated singularity of given form 09 p1363 A66-20799

Graphical-analytical method using successive approximations determines guided missile trajectory 11 p1734 A66-23344

Equations for perturbative derivatives of two sets of elements in terms of universal formulation, discussing low thrust orbits 12 p1946 A66-23591

Trajectory characteristics of high-thrust Mars missions and effect on other aspects of mission planning 13 p2179 A66-25239

Guidance and control of Mars orbiter-lander mission 13 p2123 A66-25254

Flight trajectory analysis of body in vertical ascent from planet under constant thrust, by numerical integration of motion equations 13 p2188 A66-26292

Soviet monograph on celestial mechanics of satellites and space probes covering trajectory problems, two-and three-body systems, space flight duration between two points, etc 13 p2188 A66-26465

Trajectory prediction for moving stochastic systems 13 p2028 A66-26476

Graphical determination of phase trajectories and oscillation limits of nonlinear sampled system 13 p2056 A66-26755

Results of approximate computation of rocket apogee from data on flight duration between different trajectory points 14 p2383 A66-27815

Polynomial approximation method for determining satellite orbits from large-time-interval trajectory measurements 15 p2592 A66-28488

Dynamic system constructed in three-dimensional space with trajectory stable stationary point, showing construction of analogous example in any space of odd dimensionality 15 p2536 A66-28641

Book on satellite orbital flight trajectory theory and celestial mechanics 15 p2595 A66-29128

L/D ratio for gliding recovery of first stage of launch vehicle, using stage separation conditions as parameters 16 p2807 A66-30348

Swing-by and capture-orbit trajectories for Mars or Venus exploration described by numerical methods 16 p2798 A66-30358

Frequency, dynamic response and jettison analyses for payload shrouds, with application to OAO 16 p2808 A66-30468

Sounding rocket trajectory determination by double integration of longitudinal acceleration 16 p2852 A66-30566

Volterra series analysis of aperiodic solutions to certain second order integrodifferential equations with nonlinear damping and nonlinear restoring force 16 p2737 A66-31334

Trajectory energy requirements for low-thrust flights throughout solar system using nuclear-electric propulsion [AIAA PAPER 66-497] 16 p2805 A66-31495

Mars spacecraft guidance and navigation requirements, noting entry trajectory, possible guidance errors and gravitational constant uncertainty [AIAA PAPER 66-532] 16 p2744 A66-31501

Computer program for current profile and trajectory analysis for cesium contact thruster leading to integral focus configuration of multistrip contact engines for long space missions [AIAA PAPER 66-206] 16 p2792 A66-31690

Radio-controlled reusable sounding rocket design characteristics, trajectory analysis, drag and lift, reentry stress control system, guidance, stabilization, etc 17 p3015 A66-32367

Switching surface construction using one to one correspondence between points in controllability region and points on surface of n-th order system 17 p2902 A66-32575

Second-order theory used to provide nearly

exact solution for entry mechanics including solution of nonoscillating and oscillating trajectories [AIAA PAPER 66-488] 17 p3016 A66-32771

Minimum impulse orbital transfer between coplanar elliptical orbits with aligned axes, noting advantage of three-and two-impulse transfers 18 p3227 A66-33760

Peaceful uses of automation in outer space - Symposium, International Federation of Automatic Control, Stavanger, Norway, June 1965 18 p3240 A66-33845

Random and systematic errors in satellite trajectory computations 18 p3227 A66-33870

Nonaccelerated electron beam envelope trajectory equation reformulated and solved allowing for finite emittance, space charge and self-magnetostatic forces 19 p3319 A66-36170

Simple approximations to elliptical orbits compared to predict location of planet or satellite, including linear perturbations in rectangular and curvilinear coordinates 19 p3463 A66-36246

Absence conditions for periodical trajectories in regions of possible existence 19 p3401 A66-36844

Trajectory corrections of space vehicle launched toward planet, noting fuel consumption 20 p3595 A66-36872

Ergodicity of trajectories in systems with two periodic differential equations and two sets of unknowns 20 p3591 A66-37815

Trajectories for manned lunar landing, discussing various mission alternatives in planning and realized stages and Apollo project characteristics 20 p3656 A66-38032

Gravity turn trajectories through atmosphere including drag effects 20 p3657 A66-38181

Impulsive approximation, basis for trajectory analyses for space missions in which finite-thrust powered phases of finite duration are replaced by instantaneous changes of velocity 21 p3811 A66-38698

Iterative guidance mode with application to three-dimensional upper stage vacuum flight 21 p3768 A66-38897

Variation of functional determined on trajectories of differential equation systems with discontinuities, discussing application to optimal control 21 p3758 A66-39280

Mechanics of spiral flight noting characteristics, minimum thrust condition and transfer trajectories for rendezvous purposes 21 p3817 A66-39644

Photographic data on iron meteor 36221 noting trajectory, velocity, light curve, orbit and spectral emission 22 p3977 A66-39860

Algorithm construction for processing of telemetry data in determination of space vehicle trajectories, applying dynamic filtering method 22 p3980 A66-40463

Ballistic reentry vehicle recovery via low speed water impact or air snatch after vehicle has flown unperturbed trajectory down to altitude of maximum dynamic pressure 22 p3986 A66-40597

Wind tunnel free-flight testing of reentry vehicle dynamics, noting capability for simultaneous two-dimensional viewing of model trajectories [AIAA PAPER 66-774] 22 p3895 A66-40654

Analytical approximate solution of motion equations for ballistic vehicles during atmospheric entry, examining velocity and inclination angle error dependence on height eccentricity and apogee radius [ICAS PAPER 66-38] 23 p4007 A66-41010

Reentry filtering prediction and smoothing in application of satellite and spacecraft trajectory estimation techniques [AIAA PAPER 65-319] 23 p4132 A66-41098

Trajectory stability of diffusion-type random Markov process described by Ito stochastic differential vector 23 p4085 A66-41554

Numerical solution of BVP for optimal control parameters in trajectory analysis 23 p4051 A66-41617

Restoration of trajectory without known initial point, considering ballistic missile trajectory 24 p4171 A66-42340

Trajectory characteristics for unmanned interplanetary missions, propulsion

requirements for Earth departure and effect capture at target planets 24 p4277 A66-42686

Trajectory and performance analysis instrument unit and payload envelope for Saturn IB space vehicle program 24 p4282 A66-42694

Computer program for parametric analysis and trajectory simulation for axisymmetric planetary entry vehicles 24 p4283 A66-42792

TRAJECTORY CONTROL

SA DRIFT

SA OPTIMAL CONTROL

SA OPTIMIZATION

Evaluation and calibration of missile and space tracking systems including test-by-test analysis, lofted rockets, self-calibrating systems, etc 01 p0053 A66-10805

Geometric restraints on orbit about Mars noting trajectories of unmanned Mars exploration satellite, payload, orbit inclination, etc 01 p0137 A66-10810

Planetary entry trajectory control of manned vehicles for Earth and Mars atmospheres 03 p0431 A66-12741

Linear expression for constraints to obtain general solution to impulsive guidance laws 03 p0390 A66-12801

Pontryagin maximum principle used for solving optimization problems of space interception and rendezvous 04 p0584 A66-13522

Fehlberg integration method used to calculate optimum interplanetary transfer orbits at low thrust acceleration 04 p0576 A66-13527

Passive spaceborne trajectory tracking system design, using tetrahedral tracking geometry 08 p1184 A66-19509

Technique for controlling acceleration vector along powered flight trajectory, using linear perturbation method [AIAA PAPER 63-267] 10 p1608 A66-21789

Optimization of terminal state of controlled system when equations of motion contain derivatives of control parameters 11 p1674 A66-22350

Booster rocket ascent trajectory optimization, using steepest ascent method [AIAA PAPER 64-663] 16 p2801 A66-30883

Trajectory control scheme effect on performance of lifting entry vehicles [AIAA PAPER 66-407] 17 p3016 A66-32746

Spacecraft trajectories prediction under discrete control 18 p3228 A66-33886

Steering philosophy for rocket booster, using position and/or velocity profiles until desired injection speed is attained [AIAA PAPER 64-639] 20 p3597 A66-38157

Entry Monitor System /EMS/ for maneuverable spacecraft, interpreting display relationship to entry trajectory control [AIAA PAPER 65-495] 20 p3592 A66-38160

Modulation of L/D and bank angle to achieved heading, range and trajectory stabilization, using closed form equations 21 p3765 A66-38868

Optimum trajectory of pulsed coplanar orbital transfer in central Newtonian force field with restrictions placed on distance to attracting center 22 p3980 A66-40461

Optimum trajectories between material points moving along same orbit in gravitational field of spherically symmetric central body, obtaining numerical solutions for circular initial orbit 22 p3980 A66-40462

TRAJECTORY MEASURING SYSTEM

BRL ballistic camera system noting optical and mechanical characteristics, measurement and computer synchronization methods 10 p1537 A66-21872

High stability clocks for trajectory measurement with oscillator, using atomic or molecular transitions [ONERA TP 311] 11 p1708 A66-23198

Computational method for determination corridors of launch vehicle trajectory and impact dispersions [AIAA PAPER 66-483] 18 p3226 A66-33656

Spacecraft orbital parameter estimation using automated measuring gear 18 p3131 A66-33869

Spacecraft trajectories prediction under discrete control 18 p3228 A66-33886

Most likely trajectory estimation for dynamic system as observed through noisy measurement system, using iterative equation based on dynamic

programming 19 p3334 A66-36682

TRAJECTORY OPTIMIZATION

Optimum guidance in two dimensions of constant acceleration low-thrust vehicle spiraling away from and in toward planet 01 p0100 A66-10026

Discontinuities occurring in closed loop optimal control problems when using maximum principle 02 p0207 A66-11899

Methods for calculating two-and three-dimensional trajectories and ascents with minimum fuel consumption and combined staging and trajectory optimization 04 p0576 A66-13521

Geometrical aspects of optimal processes, discussing existence of limiting surfaces in cost augmented state space, state equations, maximum principle and functional equations for optimal trajectories 04 p0505 A66-13990

Fast time modeling technique for simulating predictor display for onboard orbital rendezvous 05 p0626 A66-14617

Optimum trajectory between coplanar orbits for variable-mass particle in central field 05 p0764 A66-15319

Steepest ascent method for trajectory optimization 06 p0952 A66-15916

Mission success probability maximization by selecting trajectory parameters via approximate probability density function [AIAA PAPER 66-95] 06 p0953 A66-16263

Optimization of multistage ballistic missile system operating in drag environment by solution of physical discontinuity problems [AIAA PAPER 66-91] 06 p0959 A66-16406

Direct and analytical solution of polynomial-type guidance functions for optimal space flight [AIAA PAPER 66-94] 06 p0907 A66-17093

Optimal free-space fixed thrust trajectories using impulsive trajectories as starting iteratives [AIAA PAPER 66-96] 06 p0956 A66-17094

Minimum impulse transfer of rocket between coplanar intersecting Keplerian orbits [AIAA PAPER 66-93] 08 p1290 A66-18999

Iterative guidance law for Saturn launch vehicle for lunar landing, examining trajectory optimization 08 p1253 A66-19539

Optimization of interplanetary transfer between coplanar circular orbits with small thrust acceleration based on Pontryagin maximum principle 09 p1457 A66-20586

Optimal trajectory and guidance role of conjugate points in determining maximum duration of optimal control for linear and nonlinear processes 10 p1516 A66-21076

Optimum planetary approach of vehicle when direction of correcting pulses applied to trajectory plane is determined from maximum efficiency condition of pulse 11 p1774 A66-23034

Newton-Raphson method iterative solution of two-point boundary value problem and application to trajectory optimization and tubular reactor design 11 p1680 A66-23276

Book on flight dynamics, covering optimum control, multistage rocket trajectory optimization, VTOL aircraft dynamics, autopilot design, etc 11 p1732 A66-23335

Multistage rocket trajectory optimization, extending maximum principle to include Weierstrass and Jacobi conditions 11 p1733 A66-23337

Lifting body with controllable radial force, examining acceleration and deceleration, equation of motion, target hitting accuracy improvement via force variation, etc 11 p1733 A66-23338

Optimum control for supersonic winged vehicle, allowing for inequality-type limitations in solution algorithm for maximum range in nonmaneuvering flight 11 p1733 A66-23340

Optimum sliding regimes in variational problems of atmospheric flight dynamics with smooth trajectory and continuous controls 11 p1733 A66-23343

Optimal control and trajectory optimization in aperiodic discrete time functional systems 11 p1681 A66-23422

Space trajectory optimization for nonspecialist engineers 12 p1947 A66-23816

Discrete-sample curve fitting using Chebyshev polynomials and approximate

determination of optimal trajectories via dynamic programming 12 p1850 A66-24257

Mathematical programming methods for solving nonlinear state-constrained discrete optimal control problems 13 p2047 A66-25352

Optimum guidance in two dimensions of constant acceleration low-thrust vehicle spiraling away from and in toward planet 14 p2328 A66-27419

Lagrangian multiplier representation for coast periods of optimum trajectories 14 p2381 A66-27433

Optimal transfer trajectories among coplanar elliptical orbits, noting application of one, two or three finite impulses 14 p2382 A66-27562

Optimum flight of axially propelled nonlifting vehicles through resisting medium calculated by calculus of variations [AIAA PAPER 66-485] 16 p2799 A66-30524

Motion equations and Pontryagin maximum principle applied to space vehicle reentry trajectory optimization through independent control of lift and drag 16 p2809 A66-30884

Three models of constrained preview control with successive target values of nonuniform importance 16 p2644 A66-31272

Optimal trajectories of nonlinear discrete-time systems determined by second-order gradient method for use in dynamic programming 16 p2672 A66-31341

Jupiter swingby missions to outer planets [AIAA PAPER 66-536] 16 p2805 A66-31502

Bibliography of programmed low-thrust trajectories and optimal low-thrust trajectories 17 p3001 A66-32350

Optimal free-space fixed thrust trajectories using impulsive trajectories as starting iteratives [AIAA PAPER 66-96] 17 p3001 A66-32457

Optimal trajectory problem solution using in-flight guidance computers for control rockets and aircraft under influence of random disturbances 17 p2956 A66-33239

Iterative gradient method application to trajectory optimization problems, noting feasibility to systems with continuous bang-bang controls 17 p2903 A66-33254

Analytic solutions for predicting motion of high-thrust rockets applied in guidance and real-time targeting [AIAA PAPER 66-452] 18 p3226 A66-33648

Maximum payload delivery with restricted-power propulsion system, noting trajectory optimization course-correction-time distribution, etc 18 p3242 A66-33849

Optimized spacecraft control process eliminates gravitational field-caused nonlinearities by taking as control parameters osculating characteristics of planetocentric motion 18 p3242 A66-33851

Mission success probability maximization by selecting trajectory parameters via approximate probability density function [AIAA PAPER 66-95] 18 p3234 A66-34597

Guidance equations including first-order effects of Earth oblate gravitational field, solving motion equations and evaluating downrange and crossrange miss distance and time-of-flight errors 19 p3397 A66-35599

Exact expression derived for minimum energy deorbit problem, calculating minimum retrovelocity required to achieve specified path angle at initial atmospheric entry 19 p3460 A66-35606

Accuracy requirements for two-way spacecraft Earth-Moon orbit trajectory are greater for minimum initial velocity and in lunar proximity, considering solar gravity perturbation effect 19 p3460 A66-35721

Steepest descent method extended to trajectory optimization problem for stochastically disturbed systems with application to Euler equation for white noise problem of reentering vehicle 19 p3388 A66-35879

Comparison of parameter hunting procedures and implementation techniques for solving higher order boundary value problems with rapid convergence [AIAA PAPER 65-693] 19 p3462 A66-35900

Space mission trajectory optimization by iterative minimizing of residual vector, using linear correction [AIAA PAPER 65-697] 19 p3462 A66-35903

Low thrust trajectory optimization, using Newton-Raphson method to solve nonlinear two-point boundary value problem

[AIAA PAPER 65-698] 19 p3462 A66-35904

Necessary and sufficient condition of existence of extremal trajectories of nonlinear system within framework of optimal control theory 19 p3330 A66-36251

Orbit determination with Davidson method in obtaining maximum likelihood values 19 p3466 A66-36680

Rendezvous-maneuver of thrusted space vehicle with unthrusted target flying in elliptical orbit, examining computation of rendezvous acceleration for orbital transfer 20 p3662 A66-37390

Steepest descent method of trajectory optimization for computing lunar and interplanetary transfer missions, noting terminal constraints 20 p3651 A66-37391

Minimum impulse transfer of rocket between coplanar intersecting Keplerian orbits [AIAA PAPER 66-93] 21 p3811 A66-38696

Trajectory optimization as part of real time flight operations in Lunar Orbiter program 21 p3765 A66-38866

Mathematical model of linear guidance law to dynamical system, noting reduction of two-point boundary value class error 21 p3765 A66-38870

Control laws providing attainment of prescribed attitude and acceleration to prescribed speed in minimum time or fuel consumption for VTOL aircraft 21 p3768 A66-39606

Optimization multistage ballistic missile system operating drag environment by solution of physical discontinuity problems [AIAA PAPER 66-91] 22 p3986 A66-40362

Deduction procedure for generalized Clebsch necessary condition for singular extremals for which final form of accessory minimum problem is nonsingular Bolza problem 22 p3940 A66-40530

Differential equations with delayed argument describing laws of motion and action of control elements upon motion in problem of trajectory with moving right hand terminus 22 p3941 A66-40800

Analog computation of minimum fuel trajectories with soft landings in uniform gravitational field, using Pontryagin maximum principle to reduce two-point BVP with optimal controllers 23 p4133 A66-41618

Jupiter swingby missions to outer planets [AIAA PAPER 66-536] 24 p4279 A66-42797

TRANQUILIZER

S MEPROBAMATE

TRANSCENDENTAL FUNCTION

SA LOMMEL FUNCTION

Buckling mechanism for uniform external pressured spherical shell, evaluating transcendental functions via solution of initial value problem 03 p0435 A66-12616

Second order dynamical systems with time lag, negative damping coefficient and/or negative spring constant, employing Pontryagin results [ASME PAPER 65-APMW-11] 04 p0546 A66-14216

Stability criteria for second order dynamical systems with time lag [ASME PAPER 65-APMW-12] 04 p0546 A66-14217

Wentzel-Kramer-Brillouin calculation of exact solution of universal instability and drift approximation problem 07 p1089 A66-17958

Sturm-Liouville series expansion of Bessel functions and Bessel differential equation eigenvalue function 09 p1394 A66-20578

Transcendence and algebraic independence of values of E-functions representing solution to third-order linear differential equation 10 p1552 A66-21986

Second order dynamical systems with time lag, negative damping coefficient and/or negative spring constant, employing Pontryagin results [ASME PAPER 65-APMW-11] 12 p1913 A66-23981

Stability criteria for second order dynamical systems with time lag [ASME PAPER 65-APMW-12] 12 p1913 A66-23982

Nonuniformly spaced antenna array synthesis using lambda function via Chebyshev-Gauss quadrature and Hankel transform 12 p1841 A66-24629

Bessel type lambda function for describing

- properties of dipoles 12 p1841 A66-24630
- Inverse Laplace transformations in terms of Laguerre functions 12 p1905 A66-24654
- Transcendental equation derived for approximate calculation of waveguide resonators containing 14 p2251 A66-27240
- Thermokinetic transcendental equation for heat flux through three juxtaposed walls and handling of singularity difficulties [EAST PAPER NT-148] 14 p2414 A66-27838
- Rational approximation of transcendental functions for cylindrical cavity subject to internal pressure 15 p2528 A66-29254
- Modified sprindzuk theorem, discussing transcendental functional analysis 16 p2732 A66-30531
- Transcendental equation describing discrete reinforcing network effect on vibrations of reinforced cylindrical shell 18 p3252 A66-33708
- Michallov criterion for exponential polynomials, determining existence of zeros in right half-plane 19 p3388 A66-35829
- Transcendence and algebraic independence of values of E-functions representing solution to third-order linear differential equation 19 p3390 A66-36191
- Krylov-Bogoliubov method applied to linear differential equations, noting transcendental functions and error analysis 21 p3755 A66-38596
- Transcendental case of dynamical asymptotic stability of motion of autonomous system with one zero 23 p4090 A66-41553

- Fluidic control subsystem, describing components such as electric/fluid and position transducer, operational amplifier, fluid bellows and operation characteristics [ASME PAPER 65-WA/AUT-10] 05 p0624 A66-15609
- Low temperature copper diffusion limits frequency range of cadmium sulfide shear mode diffusion layer transducer 06 p0851 A66-16461
- Metal-insulator-piezoelectric semiconductor electromechanical transducer, discussing transistor and transducer operation characteristics 06 p0883 A66-16960
- Capacitive biasing transducer is electromechanical analog of parametric system 06 p0860 A66-17199
- Rate error of frequency parametric transducer 07 p1013 A66-17389
- Slide wire accelerometer, considering factors responsible for sensitivity loss and gain 07 p1031 A66-17410
- Electrical correction circuits for reducing rise time of some mechanical transducers 07 p1035 A66-18233
- Two-port network representations derived for general linear magnetic and electric field transducers, showing energy conversion leading to nonlinear relationships and applications to DC motor 08 p1224 A66-19298
- Signal detection characteristics of local arrays of transducers to detect presence of plane-wave random signal in isotropic noise background 09 p1348 A66-20951
- Measurement of nonelectrical quantities with aid of transducers and representation of process by action diagrams 10 p1535 A66-21336
- Capacitive torsional vibration transducer for measuring angular displacement of vibrations in engine shaft 12 p1880 A66-23845
- Deposition of cadmium selenide films for transducers of electromagnetic energy to acoustic energy at microwave frequencies, noting use of multiple film assemblies 12 p1839 A66-24616
- Torsional-coupler mechanical filters, particularly types with higher harmonic suppression and piezoelectric material, utilized with simple structure 12 p1845 A66-24852
- Strain gauge load measuring transducer operating in bending mode and based on elastic properties of epoxide glass fabric laminate 12 p1884 A66-24985
- Stress transducer used as piezoresistive physical sensing element in structural design of plastics 13 p2077 A66-25302
- Capacitance transducer characteristics and applications as fuel gauge, level detector, interface detector, pressure and proximity sensors, etc 13 p2078 A66-25360
- Transducer for measuring pressure, temperature, velocity, force, torque and displacement 13 p2082 A66-26312
- Transducer-type instruments for precise mechanical measurements by conversion of physical into electrical signals 14 p2295 A66-27565
- Blood flow rate in surface veins of brains of animals subjected to accelerations, noting thermal transducer 15 p2445 A66-29500
- Pyreheliometers, noting performance, application, environmental effects and calibration based on black body radiation 16 p2703 A66-30509
- Feedback-free Hall effect transducers for mechanical displacement measurement 16 p2709 A66-31578
- Accelerometer standard designed for reciprocity and comparison calibrations of vibration transducers 18 p3112 A66-34207
- Capacitance transducer for measuring capacitance ratios with minimum environmental problems, noting wide application range 19 p3355 A66-35470
- Capacitive transducer principle, describing basic circuit, performance characteristics and sensitivity factors 19 p3355 A66-35472
- Moire fringe precision angle transducer 19 p3355 A66-35502
- Capacitive biasing transducer is electromechanical analog of parametric system 19 p3356 A66-35557
- Laser mirror transducer decoupling from mechanical resonances of laser cavity 19 p3374 A66-35813
- Electropneumatic transducer using principle that heating moving gas increases velocity 19 p3382 A66-36811
- Ultrasonic welding uses electric power of electronic generator applied to piezomagnetic transducer for converting AC electric power into mechanical vibration 19 p3372 A66-36819
- Leak-rate transducers capable of aerospace flight detection of small gas flow rates in critical joints of Saturn engine systems 20 p3557 A66-37215
- Semiconductor transducer strain gauge for structural deformation measurement by conversion to resistance variation 20 p3559 A66-37500
- Multiplexer coder unit for AC carrier transducers and DC signals used in PCM flight trials system 21 p3709 A66-38605
- Elastoresistance effects in evaporated bismuth films, deposited on glass and epoxy resin substrates, used as strain gauges and transducers 22 p3962 A66-40046
- Resonant cavity transducer for converting TE mode of rectangular waveguide into circular waveguide mode, noting coupling coefficient of cavity 22 p3918 A66-40183
- Electric-to-fluidic and mechanical-to-fluidic transducers and sensors in fluidic system design 22 p3852 A66-40423
- Miniature sensor for compensating static as well as transient temperature developed, using high gauge factor and high thermal coefficients of semiconductor strain gauges [AIAA PAPER 66-749] 22 p3919 A66-40636
- Microwave airflow simulator measurements of hot-film and hot-wire turbulence transducer 24 p4211 A66-42576
- Measuring devices for velocity of fluid in undefined motion, noting fluid dynamic transducers 24 p4214 A66-43013
- Mechanical electrical transducers for aerospace instrumentation and control, noting strain gauge, inductive and potentiometric types 24 p4215 A66-43082
- TRANSEQUATORIAL PROPAGATION**
- Phase fluctuations of ground-backscattered signals recorded, noting phase stability of sporadic E-layer-supported and F-2-layer-supported ground backscatter 18 p3071 A66-34534
- TRANSFER**
- S CHARGE TRANSFER
- S ELECTRON TRANSFER
- S ENERGY TRANSFER
- S HEAT TRANSFER

- S PROPELLANT TRANSFER
- S RADIATION TRANSFER
- TRANSFER FUNCTION**
- Transfer functions of cantilever beam and clamped-edge square plate determined by cross-correlation methods 01 p0148 A66-10136
- Realizable transfer function of closed-loop automatic control system calculated with aid of minimum mean square error criterion 01 p0051 A66-10706
- Transfer equations applicability to stimulated radiation 01 p0107 A66-11005
- Optimal transfer function of linear automatic system determined from criterion of minimum mean square error 02 p0206 A66-11310
- Human transfer function for pilot response for multiaxis and multiloop problems 02 p0185 A66-11633
- Transfer function of injection-type transistor for arbitrary driving conditions and signal level 02 p0200 A66-11880
- Active RC synthesis using operational amplifier, noting analog computer simulation of transfer function 03 p0339 A66-12434
- Algorithm for determining number of vertices contained in single contact network corresponding to transmission function 03 p0348 A66-12574
- Three independent systems of matrix equations for solving transfer function of multiparameter linear system handling by human operator 03 p0328 A66-12699
- Scalar quantity spectrum in statistically stationary turbulent velocity field, using closure approximations to provide unified comparison, noting eddy diffusivity, transfer function, etc [AIAA PAPER 65-814] 03 p0357 A66-13082
- Evaluation of transfer function maxima, analyzing series convergence 04 p0538 A66-13482
- Subsystem checkout in operation termed on-line checkout, noting use of digital computer with random noise signals and role of correlation and transfer functions 04 p0493 A66-13608
- Undistorted reproduction of signal, using filter with transfer function having multiple zeros 04 p0503 A66-13706
- Book on state variables for control theory noting transfer functions, time domain, nonlinear system stability using Liapunov method, optimization, etc 04 p0504 A66-13836
- Nonlinear distortions of HF transistors with variable amplification, discussing cross and intermodulation behavior 04 p0501 A66-14132
- LF transfer functions synthesized with microelectronic circuits 05 p0644 A66-14575
- Synthesis of rational transfer functions by using thin film distributed RC active networks incorporating single-pole partitioned capacitance devices 05 p0652 A66-14584
- Error correcting learning machines application to unknown linear dynamic systems 05 p0653 A66-14602
- Natural modes of partitioned networks in analysis and synthesis of transfer functions, noting potential analog or root locus method 05 p0655 A66-14625
- Minimum total reactances of elements needed to realize two-element driving-point function for RLC network synthesis 05 p0656 A66-14627
- Graphical display of transfer function of

loaded and null-adjusted symmetrical parallel-tee network 05 p0656 A66-14628

Transfer equation of solar absorption line developed with split upper level in magnetic field 05 p0759 A66-14870

Transfer function of pneumatic capacitance of fixed gas mass in rigid walled container, taking into account heat transfer during compression and expansion [ASME PAPER 65-WA/AUT-18] 05 p0624 A66-15618

Transfer function identification of linear time-varying system with input and output signals available in sampled data form [ASME PAPER 65-WA/AUT-16] 05 p0659 A66-15620

Signal optimization for digital communication system over channel characterized by rational transfer function and Gaussian noise having memory 06 p0829 A66-16192

Transfer functions synthesis by passive RC networks with two or three computing amplifiers 06 p0861 A66-16360

Filter used as input/output network in resonant transfer system, noting steady state passband and transient response 06 p0853 A66-16668

Optimum transfer function determination, using Liapunov method and superposition theorem 06 p0864 A66-16683

Transfer matrix derived for cascade of simple commensurate uniformly distributed RC four-port unit elements 06 p0867 A66-16979

Quadrature modulation single-sideband circuit as frequency translating two-port, comparing performance with conventional modulator-with-SSB filter 07 p1015 A66-17746

Active circuit of second order designed with independently variable parameters for use as transfer function model 07 p1003 A66-17819

Feedback transfer function analyzer for error reduction in performance measurement for servocontrol systems 07 p1016 A66-17851

Scanning slit across point or line spread function in determination of radial irradiance distribution 07 p1081 A66-18041

Criteria for quality of aerial camera systems including allowances for ground scene properties, photographic grain and human observer, noting role of resolving power and transfer function 07 p1035 A66-18154

Digital computer determination of coefficients of transfer function from impulse response in time domain 07 p1060 A66-18334

Transfer matrices of vibrating thin-walled open profile bars under forced, coupled bending and torsional stresses 08 p1311 A66-19342

Wiener problem applied to synthesis of automatic control system incorporating minimum phase, nonminimum phase or unstable element 08 p1201 A66-19686

On-off controller with aperiodic element changing time constant, with position of relay determining transfer function 08 p1201 A66-19690

Average transfer function from statistics of wave-front distortions in light propagating through atmosphere 08 p1256 A66-19705

Partial-fraction expansion of transfer matrix, using Lagrange interpolation formula 08 p1246 A66-19738

Malkevich atmospheric transfer function calculation for Northern Hemisphere in order to correct satellite radiation measurements 09 p1435 A66-19887

Transfer equations applicability to stimulated radiation 09 p1401 A66-19943

Laplace transform and analog computation applied to simulation of heat transfer between wall separated fluids, determining transfer functions and frequency responses 09 p1472 A66-20908

Hamel and Cypkin methods, used to determine free oscillation of plus-or-minus servomechanism, applied to transfer function of certain type 10 p1517 A66-21283

Gamma-level ring-core magnetometer sensitivity parameters, noting frequency, dynamic differential permeability, number of

pickup turns, etc 10 p1508 A66-21415

Internal diffuse radiation field computed in finite homogeneous isotropically scattering slab illuminated by parallel rays of radiation 10 p1556 A66-21923

Lowering order of transfer function of automatic control system based on use of generalized integral quadratic estimates of transient processes of system 11 p1673 A66-22203

Nonlinear transfer characteristics derived from measured harmonic levels in output when input is sinusoidal wave 11 p1661 A66-22393

Realizable transfer function of closed-loop automatic control system calculated with aid of minimum mean square error criterion 11 p1675 A66-22618

Accuracy and optimality of estimates of discrete pulse transfer function of linear unsteady plant 11 p1677 A66-22758

Information recovery from noisy measurements, employing steady quantity measurements, known waveform detection and transfer function evaluation 11 p1656 A66-22825

Linear quadrupoles, wave and operating parameters, transfer loss and phase coefficient for mismatched network 11 p1677 A66-23063

MGD stability treated by transfer function method for lumped-parameter dynamic systems 11 p1677 A66-23114

Distributed RC network synthesis, determining necessary and sufficient conditions for driving point impedance frequency response of transfer functions and Foster type realizations 11 p1678 A66-23240

Operational calculus for finite rings employing Galois fields for periodic sequences via transfer function application 11 p1678 A66-23242

Linear system dynamics, discussing time function vector space, spectral coefficients, orthonormal and transfer functions, parameter variation, Fourier approximation, etc 11 p1679 A66-23269

Drone aircraft onboard stabilization circuit design for control signal transmission and transient response irrespective of noise background 11 p1778 A66-23348

Stable self-adjusting system with single adjustable parameter designed, using inverse model of desired transfer function of closed-loop system in feedback control circuit with large amplification factor 12 p1851 A66-24315

Behavior of human operator as link in servosystem in tracking and compensation regimes, determining transfer function under steady state and perturbed conditions 12 p1851 A66-24316

Pressure regulation in equalization chamber of model blowdown wing tunnel used at various Mach numbers, calculating compressed-air flow through control valve and characteristics of transfer function 12 p1857 A66-24322

Digital techniques for identification of discrete-time and continuous-time systems from noisy input and output sample sequences via determination of transfer function model 12 p1854 A66-24638

Stability of pulse frequency modulated closed-loop control systems determined, using state variables which define system output and error 12 p1855 A66-24640

Microelectronic composite lumped-distributed transmission systems, two-port networks, voltage transfer function, root locus construction, pole and zero locations, etc 12 p1856 A66-24657

High performance active RC band pass filter design providing for independent adjustment of poles 12 p1843 A66-24675

Cesaro summability and Fourier transform for evaluating divergent series and integrals occurring in circuit design and analysis 12 p1856 A66-24730

Frequency domain design of time-limited binary signals imbedded in colored Gaussian noise 13 p2052 A66-26078

Algorithm for optimal controller design with closed loop characteristics 13 p2053 A66-26081

Iterative approximation of rational transfer

function in Laplace transform variable s , optimal with respect to given input and output time functions, and deviation from desired output-input-time functional relation 13 p2054 A66-26087

Proton transfer between hydrogen and methane, ethane, propane and butanes, using high-pressure mass spectrometry, employing ion source with beta rays as ionizing medium 13 p2018 A66-26443

Probability-statistics analytic human-operator model in control systems analysis 14 p2263 A66-27108

T-type carrier-frequency RC correcting circuits calculated by equivalent transfer function 14 p2264 A66-27205

Transfer functions of resonant amplifier, frequency multiplier and regenerative frequency divider for small perturbations of input-voltage phase derived, using symbolic shortened equations 14 p2252 A66-27241

Restrictions placed on transfer function of linear system with input and output coordinates in presence of given plant in control loop 14 p2265 A66-27522

Transfer function of pulse amplitude modulated sampled data control systems with element generating arbitrarily shaped pulses and first order element series connected with constant parameter elements 14 p2266 A66-27527

Transfer function for quadrature modulation single band signal generating all-pass filter, using differential operational amplifier 14 p2253 A66-27584

Error coefficients and astatism estimation for controllable system in normal operation 14 p2268 A66-28353

Y-parameter graphs and data for HF circuits obtained from General Radio transfer function and immittance bridge 14 p2261 A66-28370

Temperature dependence of FET drain characteristics, square wave behavior, carrier mobility transfer characteristics and contact potential 14 p2261 A66-28375

Undistorted reproduction of signal, using filter with transfer function having multiple zeros 15 p2469 A66-28549

Integrator, whose transfer function has simple pole in z plane, modified to make possible greater stability with no loss increase or improved signal to noise ratio 15 p2449 A66-28642

Optimum vibration-insulating system for devices fixed on moving plants analytically constructed, using theory of filters 15 p2498 A66-28775

Control system stability under external forces discussing Liapunov function construction, transfer functions and matrix analysis, frequency conditions of absolute stability, etc 15 p2470 A66-29147

RC network and ideal current negative immittance converter with unity gain used in obtaining RLC voltage transfer functions 15 p2471 A66-29326

Transfer function realization using RC network and control source, noting constraints such as multiplicative factors, poles, boundary frequencies, etc 15 p2471 A66-29328

Synthesis of linear digital recursive filters, noting application to arbitrary amplitude frequency transfer function synthesis 15 p2475 A66-29772

Synthesis for driving point and transfer functions using standard components /RLC/ and single negative resistor or replacing it with tunnel diode 15 p2475 A66-29861

Transfer functions and signal reproducing properties of relay servomechanisms for case of slowly varying input signal 15 p2476 A66-29993

Discrete transfer functions simulated on analog computer by direct currents 16 p2656 A66-30584

Analytical design method for synthesis of feedback controller for multivariable linear control systems, considering transfer function 16 p2671 A66-31111

Tabulated data method for synthesizing third order linear transfer functions, using chain of inverted L-sections of passive resistor-capacitor elements in conjunction with single operational amplifier 16 p2671 A66-31203

Synchro system transfer functions

- comprising synchro and resolver cascades of
nonidentical units, giving graphs for system
transformation ratio and phase
shift 16 p2672 A66-31440
- Automatic control systems with carrier
frequency information transmission channel,
deriving transfer functions 16 p2672 A66-31552
- Synthesis of phase synchronization system
providing maximum-level filtering of
external fluctuation noise, using generalized
integral criterion 17 p2898 A66-31853
- Transfer function characteristics of one
input-two output complementary
filters 17 p2880 A66-32059
- Frequency instability induced velocity
error measurement in two-way coherent
Doppler system 17 p2895 A66-33112
- Equivalent transfer function determined
for quadrupole inserted between ideal
modulator and demodulator from frequency
characteristics 17 p2928 A66-33492
- Digitally computed tables of Chebyshev
approximations of Laplace shift operator
transfer function enabling analog simulation
of time delay systems 18 p3090 A66-34069
- Fluid circuit theory, discussing setting up
of electrical analogs, transfer functions,
transmission line equations, wave
propagation speed, etc 18 p3099 A66-34127
- Measurement of various target signatures
in radar performance prediction, using
transfer function of target 18 p3070 A66-34258
- VTOL aircraft performance characteristics
noting flying qualities, hover dynamics,
transition flight and variable stability
system 18 p3052 A66-34623
- Wiener problem applied to synthesis of
automatic control system incorporating
minimum phase, nonminimum phase or
unstable element 18 p3091 A66-34672
- Equivalent systems with identical accuracy
at fixed moment of time through transfer
function of steady state correcting
device 18 p3091 A66-34988
- Optimal control for plant with polynomial
ratio as transfer function, noting general
performance index which involves output
and control variables 19 p3323 A66-35341
- Sensitivity analysis of time varying
systems, comparing vector output errors of
feedback and open loop system with same
nominal transfer characteristics 19 p3327 A66-36013
- Sensitivity points method for linear
systems based on structural interpretation
of logarithmic sensitivity functions,
introducing sensitivity dipole 19 p3327 A66-36015
- Sensitivity to variations in parameter of
signals in networks of linear transfer
functions and instantaneous function
generators, noting relay characteristics 19 p3327 A66-36018
- Distributed parameter systems in discrete-
time models compared with response
obtained by approximating transcendental
transfer function with root factor and other
approximations 19 p3282 A66-36683
- Linear optimal control in systems with
uncertain parameters, noting application to
design of compensating network for flexible
booster for uncertain value of first bending
mode 19 p3471 A66-36696
- Model reference adaptive control system
synthesis based on Liapunov direct
method 19 p3335 A66-36698
- Rapid parameter identification system for
linear time-invariant plant with only input
and output measurable 19 p3336 A66-36709
- Transfer process effect on stability of
plane flame front, deriving revised
approximate solution for large finite
Reynolds numbers 19 p3479 A66-36829
- Linear system with given structure
identified from measured input and output
time histories of frequency responses
including curve-fitting, equation of motion
and set of equations of motion
methods 20 p3537 A66-36885
- Equivalent transfer function of linear two-
channel system of automatic control,
discussing system stability dependence on
cross links 20 p3537 A66-36891
- Transfer functions, optimum impedance
matching conditions, input and output
admittances and voltage spectra of
transistorized frequency
converters 20 p3525 A66-37125
- Computer analysis of interference in
complex network resulting from common
impedance coupling of signals 20 p3538 A66-37196
- Indirect testing of dynamic systems
involving maximum measure of parameter
values from minimum test points, noting
dependency of error propagation on system
structure 20 p3521 A66-37210
- Parallel-T RC network designed with
prescribed unsymmetrical transfer
characteristic represented by quadratic
rational function of frequency 20 p3539 A66-38286
- Necessary and sufficient condition derived
for generating rational functions of n-port
rectangular structure for distributed RC
networks 20 p3540 A66-38287
- Transfer matrix in calculating natural
frequencies and normal modes of one-
dimensional system, noting numerical
stability problem in evaluating frequency
determinant 21 p3823 A66-38563
- Transfer equation for radiation escape
from semilfinite atmosphere with
nonconservative scattering 21 p3808 A66-38639
- Transfer response of pilot to steady
continuous one-dimensional perturbation of
lateral motion of aircraft tested in Boeing
707 flight simulator 21 p3701 A66-38932
- Modulation transfer function shown to
reduce harmonic distortion by forming
positive images, provided exposure and
development conditions are met 21 p3738 A66-39127
- Steady state and transient response
characteristics of class of low pass filters
noting transmission properties, frequency
and time domain considerations, etc 21 p3713 A66-39271
- Time optimal control for plant with given
transfer function 21 p3719 A66-39323
- Minimum mean-square-error design of
distributed-parameter control systems
characterized by Laplace transform transfer
functions 21 p3720 A66-39430
- Maximum permissible error in radiation
patterns calculated by Fourier analysis of
near field measurements of antennas 22 p3861 A66-39716
- Inverse transfer function of pulse-forming
network for binary code transmission with
small intersymbol interference in time
domain and narrow bandwidth in frequency
domain 22 p3866 A66-40182
- Human operator transfer function
capability bounds and system stability
characteristics and performance 22 p3858 A66-40252
- Dependence of complex optical transfer
function of image forming system on
horizontal range through turbulent
atmosphere 22 p3949 A66-40890
- Interference between deformed plane wave
and reference wave in coherence, obtaining
transfer function of objective, using
holography 23 p4067 A66-41178
- Automatic control system analysis via
space-state method, using n first-order
differential equation 23 p4049 A66-41399
- Conversion of finite discrete frequency
spectrum by n-dimensional frequency
converter with nonlinear active resistance
with ideal characteristics 23 p4038 A66-41519
- Phase plane method in study of transfer
functions of higher order relay
servosystems 23 p4050 A66-41613
- Complete Rayleigh scattered field within
homogeneous plane parallel atmosphere,
noting scalar transfer equation
extension 23 p4065 A66-41813
- Optimum pulse transfer functions for
multivariable digital ergodic stochastic
processes 23 p4051 A66-41853
- Relation between transfer functions and
experiment in mechanics of deformable
solids, noting time factor 23 p4146 A66-41988
- Generalized Popov criterion for stability of
control system with arbitrary number of
memoryless nonlinearities 24 p4187 A66-42130
- Microwave airflow simulator measurements
of hot-film and hot-wire turbulence
transistor 24 p4211 A66-42576
- Structural analysis using transfer matrix
method as compared with other matrix
methods, considering vibration
problem 24 p4291 A66-42856
- TRANSFORMER ORBIT**

transformation group, where X is Peano
continuum with end point fixed under
T 10 p1551 A66-21927
- Transformation relation for prestress
tensor in problem of indifferent equilibrium
of elastic bodies derived, using
approximation method 12 p1959 A66-23865

TRANSFORMER

SA MODE TRANSFORMER

Explosive hazard of gases generated by transformer potting materials of styrene-polyester copolymer, epoxy resin and polyimide resin when subjected to overloads 02 p0247 A66-11286

Distributed stepped impedance low-pass prototype filter, giving impedance values for filters with Chebyshev equal-ripple characteristics 06 p0844 A66-16082

Quarter-wavelength inhomogeneous impedance transformers, discussing design parameter calculation for nearly equal-ripple performance 06 p0845 A66-16090

Design and performance of two multirange current transformers for audio frequencies operating 400 hz to 10 khz with minimum error 07 p1004 A66-17215

Vertical sweep circuit for electron-optical tubeless ferrite transformer producing nanosecond high-voltage pulses 08 p1224 A66-19290

Comparing basic parameters of common high power pulse-transformer circuits, considering parasitic time constants and winding impedance 10 p1511 A66-21680

High voltage capacitor discharge from Marx circuit, using stepup transformer 10 p1486 A66-21862

Impedance transforming compensated balance to unbalanced line transformer /balun/, discussing bandwidths 14 p2258 A66-27959

Capability, calibration and testing of linear variable differential transformers /LVDT/ for Gemini rendezvous radar 18 p3096 A66-34497

Lightweight power-conditioning system for ion engines using energy-storage transformers for conversion, nondissipative regulation and protection 20 p3628 A66-37172

Current measuring device for EHV transmission line, obtaining instantaneous magnetic field by gauging Faraday rotation angle of laser beam in flint glass rod 24 p4222 A66-42556

TRANSIENT HEATING

Analytical prediction of transient heat transfer performance of thermal energy storage devices 01 p0016 A66-10911

Biot variational method applied to transient heating of porous half-space from which gas escapes [AIAA PAPER 65-118] 03 p0444 A66-12766

Transient heat transfer between thin circular tube and incompressible fluid, considering radial conduction and heat loss [ASME PAPER 65-HT-2] 04 p0595 A66-13393

Space-time temperature distribution in one-dimensional systems with heat transfer across contacts [ASME PAPER 65-HT-59] 05 p0785 A66-14761

Electrical analog model with distributed capacitance and resistance generates charge flow equivalent to two-dimensional transient heat conduction [ASME PAPER 65-HT-66] 05 p0786 A66-14766

Exact transient temperature distribution in spherical region subjected to axisymmetric-reentry heat flux compared with one-dimensional theory [ASME PAPER 65-WA/HT-53] 05 p0791 A66-15658

Capabilities and limitations of digital computer steady state and transient heat transfer programs [ASME PAPER 65-WA/HT-48] 05 p0638 A66-15661

Geometric electrical analog for two-dimensional transient heat conduction [ASME PAPER 65-WA/HT-42] 05 p0792 A66-15666

Temperature dependent thermal conductivity, considering one-dimensional plate problem with linearly varying heat conduction and constant-volumetric specific heat [ASME PAPER 65-WA/HT-29] 05 p0793 A66-15675

Digital and numerical method solution of transient heat flow problems 07 p1150 A66-17577

End wall insulator ablation effect on performance of magnetic piston shock tubes, discussing transient heating and degassing of adsorbed material 08 p1260 A66-18526

Hematological and metabolic effects of

short intense thermal stress 09 p1334 A66-20523

Digital calculation of transient one-dimensional heat flow confirms accuracy of small and large Fourier number approximations 12 p1981 A66-24998

Single blow transient testing of compact heat exchanger surfaces [ASME PAPER 66-GT-93] 14 p2411 A66-26997

Thermoelastic stress in infinite flat slab due to sudden application of transient temperature field 14 p2407 A66-28047

Transient heat transfer to liquids in cylindrical enclosures subjected to step change in wall temperature 18 p3263 A66-34384

Thermal transient characteristics of prolate spheroidal solid, using diffusion equation for heat conduction 22 p3998 A66-40034

Transient heat conduction problems solved by high capacity computers 22 p3999 A66-40379

Numerical solution via digital computer of nonlinear transient heat conduction with phase changes 23 p4149 A66-41697

TRANSIENT LOAD

Dynamic photoelasticity, polariscope and associated instrumentation for transient stress and strain in structures under shock loading 10 p1537 A66-21873

Transient loading of rectangular and right circular cylinders by shock waves in air numerically determined by time dependent Eulerian method [AIAA PAPER 65-4] 12 p1860 A66-23581

SCR circuit design operating under transient loads higher than steady state rating, using transient capabilities and heat sink 12 p1848 A66-24088

Algorithm for analyzing transient stress waves generated in cylindrical shell by application of impulsive dynamic loads 14 p2399 A66-27609

Transient wave processes of deformation in spherical shell under load abruptly applied to geometrical pole 17 p3029 A66-32805

Graphical solution to Garofalo equations describing first-and second-stage creep data 18 p3252 A66-33731

TRANSIENT OSCILLATION

SA LASER

Transient uniformity modification of plasma inhomogeneity may control location and growth of plasma electron oscillation 02 p0269 A66-11975

Mathematical relation between damping and amplitude of transient process in second order system, using nomogram 03 p0351 A66-13240

Transient behavior of feedback stabilized phase-angle-pickup system 06 p0861 A66-16358

Thin elastic shell transient vibration, deriving solution for response to time dependent surface loads 07 p1143 A66-17497

Transient processes in vacuum tube oscillator synchronized by small harmonic signal with random initial phase in presence of noise 09 p1357 A66-20775

Period of constant reverse current occurring when limited-base diode is switched from forward to backward direction of current flow 13 p2028 A66-25094

Intense light pulse propagation in optical media, noting polarized nature of transient oscillations, phase and amplitude distortion and two-level composition of medium 13 p2098 A66-26171

Prediction of flight transient torsional acceleration at base of Surveyor spacecraft and implementation of pulse qualification testing 14 p2392 A66-28001

Isocline method used to analyze quasi-linear equation for single-loop self-excited oscillator with periodically varying bias voltage and resonant frequency radio signal 17 p2898 A66-33522

Transient motion used in overall vibration testing of dynamic behavior of mechanical structure 20 p3666 A66-36954

Transient processes in vacuum tube oscillator synchronized by small harmonic signal with random initial phase in presence of noise 22 p3873 A66-39834

Transient discontinuous oscillation of system with two degrees of freedom and Coulomb damping 23 p4024 A66-41948

Harmonic linearization, estimating quality

of oscillatory transients in nonsearching self-adjusting systems described by high order differential equations 24 p4188 A66-42486

TRANSIENT PRESSURE

Low thrust cold gas reaction jet system for small spacecraft with nitrogen, ammonia, Freon-12 and Freon-14, analyzing thruster chamber pressure history [ASME PAPER 65-WA/AUT-11] 05 p0624 A66-15604

Mass flow rate of gas evolution from burning solid rocket propellant during transient depressurization of combustion chamber [AIAA PAPER 65-104] 08 p1282 A66-1916

Ignition pressure transient of rocket motor, discussing initial ignition event, flame spreading and final chamber filling, convective heating effect on burning rate, etc [AIAA PAPER 66-666] 18 p3165 A66-34449

Simulation of rocket engine starting transients via shock tube combustion drivers, discussing diaphragm rupture effect on combustion, acceleration and burst pressure [AIAA PAPER 66-761] 22 p3972 A66-40640

TRANSIENT REACTOR TEST /TREAT/ FACILITY

Snaptran Reactor Test Machine for evaluation of aerospace nuclear accidents [ASME PAPER 65-WA/SAF-1] 05 p0714 A66-15602

TRANSIENT RESPONSE

Transient process of nonlinear automatic system calculated by numerical digital computer method based on convolution integral 01 p0045 A66-11021

Large signal transient response simulation of p-n junction diode using RC analog network 02 p0200 A66-11882

Sinusoidal step response of L-band waveguide to step-modulated RF excitation 03 p0332 A66-12432

Transient analysis of matrix equations of complex structural system, using finite difference method 03 p0437 A66-12815

Transient response of truncated conical shell due to traveling pressure front of constant velocity and amplitude approximating vibration modes 03 p0437 A66-12819

Nonlinear differential equations describing RC oscillator determining frequency, stable amplitude and transient response 03 p0345 A66-13238

Free vibration and transient elastic response of thin shells within scope of linear theory 04 p0586 A66-13405

Simple derivation of small-signal equivalent circuit for arbitrarily doped 4-terminal field effect transistors 04 p0500 A66-14098

Steady state and transient response of arbitrary tapered distributed RC networks with lumped load terminations 05 p0651 A66-14574

Transient response of narrow-band networks to narrow-band signals, using Laplace transforms with positive frequencies 05 p0652 A66-14595

Current flow, charge distribution and transient response equations derived for insulated-gate field effect transistors 05 p0647 A66-14666

Distortion of electromagnetic pulse after propagating through dispersive channel, using approximate procedures and obtaining transient response 05 p0631 A66-14834

Transient wave diffraction problem solution, discussing response of elastic solid to harmonic incident pulse [ASME PAPER 65-WA/AMP-16] 05 p0777 A66-15438

Jet engine models applicable to analog and Dynasim simulation for transient performance analysis [ASME PAPER 65-WA/MD-16] 05 p0745 A66-15521

Design charts for transient response times of thin film networks used in digital circuits 06 p0842 A66-16009

Propagation of electromagnetic pulses in terrestrial waveguides under transient conditions 06 p0826 A66-16023

Synthetic generation of phase coherent microwave signals for transient behavior of wideband networks and dispersive

media 06 p0847 A66-16102
Thermal response of ablative materials for
nozzles and leading edges in terms of
specific thermal and mechanical
properties 06 p0899 A66-16291
Filter used as input/output network in
resonant transfer system, noting steady
state passband and transient
response 06 p0853 A66-16668
Four formulas for Kuroda identities for
band pass and band stop transmission line
filters, noting role of transient
response 06 p0854 A66-16685
Distributed model of junction transistor
and application in prediction of emitter-base
diode characteristic, base impedance and
pulse response of device 06 p0855 A66-18765
Transient resistance and time delay of
protective glass coatings on film resistance
thermometer 06 p0882 A66-16845
Linear time-invariant systems, noting
relation between transient response duration
and differential equation
coefficients 06 p0867 A66-16990
Optimum transient response of linear
systems with rational transfer
functions 07 p1013 A66-17402
Circuit network in designing low pass
filters with minimum attenuation
requirements in stopbands and optimum
transient behavior, using Schussler
technique and iterative
process 07 p1008 A66-17751
Transient characteristics of theoretical
model of drift transistor when voltage jump
appears on emitter junction, noting
transient velocity 08 p1193 A66-19110
Transient characteristics of nanosecond-
range pulse devices measured by wideband
interference correlator 08 p1194 A66-19280
Switching waveform prediction of simple
transistor inverter circuit from charge
control equations 08 p1195 A66-19358
Intermediate text on dynamic analysis and
automatic control 08 p1200 A66-19464
Transient response of MOS-FET transistor
investigated by exposing p-and n-channel
devices to 600 kev flash x-ray
machine 08 p1196 A66-19498
Schussler-elliptic low pass filters,
discussing solution of approximation
problem for low pass filters with good
transient response 08 p1198 A66-19748
Improvement of transient response of third
order servosystems by discrete control of
system parameters, noting application of
switching circuit 09 p1360 A66-19859
Dynamic transient response of fluid
surrounding hot wire studied by analysis of
basic transport equations for momentum and
energy 10 p1521 A66-21055
Electromagnetic field waveforms produced
by transient plane waves scattering from
finite objects related to those produced by
impulsive plane waves 10 p1498 A66-21599
Dynamic transient thermal response and
voltage feedback in junction
transistors 10 p1512 A66-21764
Transient behavior of varactor bridge
doubler examined, using direct digital
integration of circuit
equations 10 p1513 A66-21859
Control criterion for linear system with
constant matrix, discussing quadratic
functionals ensuring aperiodic
transient 11 p1674 A66-22351
Transient and frequency response of
distributed resistance-conductance-
capacitance network 11 p1675 A66-22389
Transient response of value-controlled
actuator with inertial loading to step input
excitation, considering fluid
compressibility 11 p1640 A66-22622
Transient response determined from phase
difference of input-trigger oscillations of
two self-excited oscillators with common
nonlinear load 12 p1830 A66-23738
Dynamic transient response of cylindrical
shell to internal pressure pulse generated
by blast wave 12 p1959 A66-23799
Dynamic strains and transient deformations
on opaque body surfaces measured, using
bonded birefringent strip 12 p1961 A66-23988
Deterministic type waveform analysis
techniques for noisy repetitive transient
functions, noting application to hybrid
computer processing of exercise
ECGs 12 p1810 A66-24233

Transient processes in thermistor circuits
during pulsation-type variations in heat
transfer 12 p1978 A66-24369
Single shot transient analyzer /waveform
synthesizer/ generating sinusoids with real
and imaginary parts 12 p1838 A66-24598
Atomic origins of transient nuclear
radiation effects in electronics such as
neutron and gamma
radiation 12 p1918 A66-24680
Diode and transistor response to ionizing
radiation, describing generation of transients
qualitatively and
quantitatively 12 p1843 A66-24681
Exact solution, using Laplace transform,
for problem of transient characteristic of
semiconductor diode, challenging Nosov
view 13 p2031 A66-25229
Stability and sensitivity requirements
considered simultaneously in control system
design, minimizing time domain sensitivity
index and incorporating transient response
characteristics 13 p2052 A66-26073
Direct numerical solution by method of
characteristics for hyperbolic partial
differential equation of Timoshenko beam
under moving force 14 p2398 A66-27423
Response of spherical shell to plane
pressure wave, using Timoshenko and
membrane theories 14 p2399 A66-27612
Formula derivation for dynistor delay time
and switching-on time on basis of system of
charge equations 14 p2254 A66-27741
Pulsed transient functions determination
from control channels of multidimensional
plant, assuming output signal correlation
functions are determined by double
averaging 15 p2469 A66-28643
Critical excitation function used to
estimate transient response of thin film
devices at time intervals exceeding greatest
time constant 15 p2459 A66-28895
Electrical discharge probe for transient
density measurements in rarefied gas flow,
noting density range, flow velocity,
etc 16 p2701 A66-30380
Linear approximation of frequency and
transient characteristics for field triodes
with insulated gate of constant
capacitance 17 p2879 A66-31859
Gauge to measure transient velocities up
to 600 cm/sec 17 p3023 A66-32073
Maximum principle application to optimal
control procedure, minimizing transient
response and decreasing effect of random
changes in system
parameters 17 p2902 A66-32577
Loss of power effects on helicopter at high
speeds, noting combination of blade analysis
with motion equations, application of
computer simulation, etc 17 p2845 A66-32735
Transient response of thin elastic shells
resting on viscoelastic
foundation 17 p3030 A66-33035
Transient response of linear viscoelastic
solid in analytic prediction and experimental
measurement 18 p3249 A66-33601
Transient response of three phototransistor
devices of planar type, obtaining equivalent
circuits 18 p3087 A66-34704
Transient behavior of current to applied
voltage step for semiconductor structure
with double injection behavior in initial and
final states 19 p3435 A66-35406
Transient process in semiconductors when
charge carrier concentration deviates from
equilibrium 19 p3437 A66-35454
Intrinsic dislocations in diffused silicon p-n
junctions and effect on transient
processes 19 p3437 A66-35455
Transient processes in semiconductor diode
with base having impurity concentration
gradient 19 p3313 A66-35459
Flight control system design for high
performance aircraft, particularly longitudinal
transient response handling
qualities 19 p3278 A66-35509
Transient behavior of electronic
transistorized system of irradiated p-i-n
polarized diode in pulsed
reactor 19 p3439 A66-35586
Transient and steady state responses of
linear systems under oscillation and
PAM 19 p3303 A66-35834
Sensitivity analysis for relative stability of
self-excited oscillations and transient
response of nonlinear
systems 19 p3328 A66-36019

Damping coefficient measurement in
transient regime by numerical integration
process 20 p3599 A66-36956
Book on feedback circuit analysis covering
circuit stability, closed loop transient
response, frequency response, compensating
networks, etc 20 p3537 A66-37047
Analytical expressions for maximum slope
of fluid temperature transient response,
based on Hansen mathematical model, and
for reduced time slope
attained 20 p3678 A66-37119
Open and closed-loop network synthesis
using transient-response
approximation 20 p3538 A66-37581
Transient behavior of energetic electrons
in artificial radiation belts analyzed via
satellite observations 20 p3643 A66-38341
Small oscillation analysis of
superconductors in intermediate phase for
larger-than-layer width
wavelengths 20 p3624 A66-38426
Equations of transient motion of linear
systems solving methods including analytical,
progressive and shock-spectra for application
to aircraft, packaging, etc 21 p3824 A66-38572
Transient response analysis in package
design, formulating damage criteria and
linear theory value 21 p3824 A66-38573
Flight tests on aircraft and analysis by
automatic filter, noting structural and
aerodynamic problems resulting from use of
transient method 21 p3824 A66-38574
Turbine engine self-excited vibrations from
thermal deformation of engine components
during transient operating conditions, noting
vibration elimination and preventive
measures 21 p3807 A66-38622
Small oscillation analysis of
superconductors in intermediate phase for
larger-than-layer width
wavelengths 21 p3800 A66-38959
Laser amplifier theory using Fabry-Perot
interferometer and Laplace transform for
obtaining transient solutions in addition to
steady state solutions 21 p3748 A66-39224
Steady state and transient response
characteristics of class of low pass filters
noting transmission properties, frequency
and time domain considerations,
etc 21 p3713 A66-39271
RC network model applied to study of
transient response of semiconductor diode,
obtaining accuracy estimates for finite-
difference representation of one-dimensional
diffusion equation 21 p3713 A66-39298
Maximum transient deviation in response
to step disturbance in control
loop 21 p3719 A66-39398
Transient temperature response of
transpiration-cooled porous matrix entering
planetary atmosphere with constant velocity
and negative entry angle 21 p3821 A66-39455
Transient response of narrow band
networks to narrow band signals, using
Laplace transforms with positive
frequencies 22 p3864 A66-40063
Phase distortions in transmission systems
and mirror properties of
signals 22 p3865 A66-40073
Transient response determined from phase
difference of input-trigger oscillations of
two self-excited oscillators with common
nonlinear load 22 p3876 A66-40081
Transient resonant response of
inhomogeneously broadened nuclear spin
system to pulsed electromagnetic field
represented as series of Bessel functions
modulated by time-varying
coefficients 22 p3950 A66-40093
Transient stress measurements in high
modulus photoelastic materials with
ultrahigh speed photography, noting
usefulness of oblique incidence method,
values of stress optic coefficient, Youngs
modulus, etc 22 p3991 A66-40196
Transient response characteristics of
bonded strain gauges obtained by measuring
elastic step wave produced in steel
bar 22 p3919 A66-40436
Temperature loop operation and transient
response performance of pneumatic
temperature control consisting of sensor and
valve 22 p3853 A66-40540
Numerical analysis of transient behavior of
nonlinear transistor circuit
equations 22 p3885 A66-40863
Stable transmission of given transient

response in closed loop nonlinear servosystem under fixed initial condition and in presence of possible disturbances 23 p4048 A66-41393

Transient response of lightly coupled nonlinear two degree of freedom systems subject to forcing functions 23 p4091 A66-41696

Analog computer analysis of input signals effect on time constant, vibration frequency and overshoot ratio of nonlinear control system 23 p4051 A66-41854

Power spectrum analysis of short-time transient response of one degree of freedom system to random excitation, evaluating error generated, using Laplace method 24 p4286 A66-42164

Control law synthesized for limiting transient processes in second-order systems, including arbitrary functions which allow additional requirements to be fulfilled 24 p4187 A66-42211

Decaying free carrier concentration increase in GaAs when subjected to increased level of drive during first cycle 24 p4253 A66-42370

Frequency characteristic and transient delta function of plant, using algorithm based on correlation functions 24 p4188 A66-42483

TRANSISTOR

SA FIELD EFFECT TRANSISTOR /FET/

SA JUNCTION TRANSISTOR

SA PHOTOTRANSISTOR

SA SILICON TRANSISTOR

SA UNIPOLAR TRANSISTOR

Temperature parameters introduced into expressions characterizing transistor performance as function of temperature 02 p0199 A66-11756

Cadmium selenide thin film transistors /TFT/ where electron mobility values exceed bulk single crystal values 02 p0276 A66-11979

Microminaturization, three-dimensional stacking, ceramic printed, thin film, hybrid and integrated circuits, discussing reduction in system size, weight and primary power requirement and improved reliability 03 p0343 A66-13001

Method which for given relation yields high order approximation for any type of transistor 03 p0345 A66-13239

Report on transistor industry covering manufacturing techniques, materials, geometries, advantages, disadvantages, etc 03 p0347 A66-13342

Channel shape effect on current-voltage characteristics in channel transistors 04 p0496 A66-13906

Nonlinear distortions of HF transistors with variable amplification, discussing cross and intermodulation behavior 04 p0501 A66-14132

Influence of anisotropic stress effect on output voltage and frequency of Colpitts oscillator with mesa NPN transistor 04 p0501 A66-14208

Diffusion rate of silicon from sputtered film of silicon into gallium arsenide as function of ambient arsenic pressure at 900 and 1000 degrees C 05 p0732 A66-14665

Predicting equilibrium primary photocurrent from transistor electrical parameters 05 p0734 A66-14847

Methods for measuring and characterizing transistor and diode large signal parameters for use in automatic circuit analysis programs, noting radiation damage 05 p0648 A66-14848

Neutron irradiation induced changes in surface state density, substrate resistivity and carrier mobility of MOS transistor 05 p0734 A66-14851

Conduction phenomena in active base of transistor and interpretation by electrical model 05 p0648 A66-15103

Analytical models for predicting semiconductor circuit responses to transient ionizing radiation 05 p0739 A66-15490

Ionizing radiation effect on transistor gain, examining X-ray test data 05 p0740 A66-15492

Increased reverse current and decreased gain in transistors due to Co 60 irradiation 05 p0740 A66-15493

Transistor gain degradation rates in active and passive state of operation 05 p0740 A66-15494

Second breakdown model for transistors 06 p0832 A66-16437

Radiation damage to integrated silicon circuit and individual transistors when exposed to neutron flux 06 p0853 A66-16665

Admissible bounds of ambient temperature and supply voltage fluctuations from stable operation conditions of ferrite transistor elements 07 p1005 A66-17406

Active thin-film elements /diodes and transistors/, properties and deposition techniques 07 p1006 A66-17415

Transistor performance limits as function of semiconductor dielectric breakdown strength and minority carrier saturated drift velocity 07 p1011 A66-18272

MOS transistor and application to integrated circuits 07 p1012 A66-18274

Time dependent variations in current carrier density and pulse behavior of drift transistor 08 p1188 A66-18625

Transistor noise phenomenon characterized by crenellated current forms 08 p1188 A66-18642

Noise factor of transistor in conversion regime should be twice value of this factor in amplification regime 08 p1193 A66-19109

Transient characteristics of theoretical model of drift transistor when voltage jump appears on emitter junction, noting transient velocity 08 p1193 A66-19110

Minority carrier lifetime in junction transistors measured by three methods, noting deviations between p-n junction and transistor mode results 09 p1410 A66-19858

Charge-controlled /p-n-p/ transistors, discussing three-dimensional asymmetric model, dynamic characteristics and switching time calculation 09 p1355 A66-20569

High field V-I characteristics of transistor 09 p1355 A66-20570

Inverse-fed transistor operation and application 09 p1355 A66-20572

Parametric mixing action resulting from pumping emitter capacitance in transistors 09 p1355 A66-20601

Electron processes in p-n-p-m transistor, relating capacitor current and emitter current and current amplification factor and emitter current 09 p1358 A66-20812

Secondary breakdown in germanium alloy transistors 09 p1358 A66-20817

Transistor fabrication method ensuring minimization of variation in properties of semiconducting film by vacuum deposition 09 p1359 A66-20976

High injection theories of transport in p-n junctions and transistors in charge neutrality approximation 11 p1756 A66-23020

Selection of correct transistor for any given application 11 p1668 A66-23057

Backward-current amplification for transistors and effect on elements of Giacoletto equivalent circuit diagram 11 p1669 A66-23102

Computer calculation of depletion layer properties of simultaneously-diffused, double-diffused and triple-diffused transistors 12 p1832 A66-23964

Minimum noise factor in transistors is given by ratio of source resistance, base spread resistance and factor that depends on current-gain 12 p1837 A66-24307

Emitter capacity in double diffused transistors by integrating Gaussian expression for base impurity concentration 12 p1837 A66-24309

Reverse current across collector-base junction in transistor 12 p1844 A66-24822

Diffused-base alloyed-emitter p-n-p type planar germanium microwave transistor 13 p2038 A66-25558

Charge measurements for transistors and diodes 13 p2040 A66-25817

Semiconductor diode and transistor application to various current and voltage measurement techniques 13 p2079 A66-25894

Complex transfer admittance in quadrupole transistors from Schottky measuring principle for transconductance of electron tubes 14 p2246 A66-28797

Cut-off frequency in UHF transistors at high collector currents due to transition region boundary displacement 14 p2248 A66-27048

Steady state and unsteady thermal regimes of transistor operating under high current

conditions 14 p2251 A66-27172

Transistor-resistor potential element design 14 p2251 A66-27206

Harmonic analysis of current gains and internal slope of nonuniform base transistors 14 p2254 A66-27601

Current amplification factor of filamentary transistor with intrinsic-conductance semiconductor base 14 p2255 A66-27751

Dual transistors for noise and drift reduction in differential direct-coupled amplifier design 14 p2262 A66-28376

High impedances obtained over wide frequency range with bipolar or unipolar transistors, noting current multiplication, bootstrapping, etc, and FET 14 p2262 A66-28377

Relation between transistors and distortion in line amplifiers used for repeaters or multicouplers, noting generation of harmonics and intermodulation products, distortion sources in transistors, etc 14 p2262 A66-28381

Transistor noise figure derived from thermal and shot noise for HF application 14 p2262 A66-28384

Transistor noise figure measurement by Hewlett-Packard 342A Noise Figure Meter 14 p2262 A66-28386

Mercury selenium thin film transistors, measuring electric properties 15 p2560 A66-28634

Measuring modulus and phase angle of transistor current gain 15 p2464 A66-29058

Charge control analysis of transistor cut-off frequency, noting current amplification factor, transit time of minority carriers, etc 15 p2468 A66-29889

Capacitive current injected by collector effect on internal reaction of plane transistor 16 p2660 A66-30587

CdSe-Au-Ge metal base transistor fabricated, based on fact that Ge-Au junction barrier is low and CdSe-Au junction is Schottky barrier 16 p2660 A66-30615

Transistor surface properties degradation by simulated space radiation environment 16 p2662 A66-30998

MOS transistor characteristics based on model in which bulk charge due to ionized impurity in semiconductor and difference between electrostatic potential and voltage drop in channel are included 16 p2662 A66-31015

MOS arrays in improving system size, reliability and power consumption 17 p2883 A66-32126

Germanium and silicon microwave transistor and mixer diode design for HF and low noise oscillators and amplifiers 17 p2891 A66-32912

X-band solid state source using chain of frequency multiplier stages and driven by transistor crystal controlled driver unit 17 p2893 A66-32923

Solid state high speed pulse generators utilizing avalanche transistor 17 p2893 A66-32927

Textbook on transistor electronics of semiconductor switching devices in digital and some analog installations 17 p2876 A66-33190

Effect of ferroelectric polarization interacting with space charge on insulated-gate thin-film transistor parameters 17 p2896 A66-33299

Carrier travel time in transistor region where changeover from neutral region to depletion layer takes place 18 p3076 A66-33936

Radiation-induced gas ionization effects on surface properties of shielded transistors 18 p3076 A66-33984

Base drive and internal structural irregularities of transistor effect on internal current distribution and second breakdown characteristics of device 19 p3312 A66-35343

LF common-base current transfer ratio for hot electron transport in semiconductor-metal-semiconductor point-contact-transistor structures measured as function of metal film thickness and temperature 19 p3435 A66-35410

I-V-P characteristic of p-n junction explained by band gap widening due to mechanical stress exerted by stylus, assuming Zener effect 19 p3323 A66-36823

Overlay transistor used for continuous microwave power output of 6.5 watts at 1 gigacycle and over 1 watt at 2 gigacycles 20 p3524 A66-36898

Lightweight power-conditioning system for ion engines using energy-storage transformers for conversion, nondissipative regulation and protection 20 p3628 A66-37172

Time-dependent response of polycrystalline cadmium selenide thin film transistor to transient high energy radiation 20 p3525 A66-37316

Anomalous permanent changes in transistor gain after low exposure dosage of electron and/or gamma radiation related to recombination current-component buildup 20 p3526 A66-37320

Semiconductor-metal-semiconductor transistor performance in microwave circuits, noting current gain and impedance levels 20 p3527 A66-37402

Isolated GaAs transistors on high resistivity GaAs substrate, noting production via epitaxial etch-refill technique, performance and isolation 20 p3616 A66-37405

Avalanche transistor generation of jitter-free nanosecond current pulses for driving GaAs laser diodes at low temperatures 20 p3528 A66-37453

Transistorized electron counter using tunnel diodes, noting trigger 20 p3559 A66-37517

Channel shape effect on current-voltage characteristics in channel transistors 20 p3532 A66-37864

Geomagnetically trapped radiation damage to orbiting solar cells and transistors both before and after Operation Star Fish 20 p3503 A66-38350

Thermostability of germanium power transistors, noting collector leakage current 21 p3709 A66-38673

Rheoelectric integrator simulation method for charge carrier lifetime determination in transistor 21 p3713 A66-39320

Parametric amplification at collector-base diode for microalloy graded-base transistor and normal mixing due to resistive nonlinearity at emitter 22 p3872 A66-39735

Conductance and capacitance of metal-insulator-semiconductor diodes or any two-terminal complex admittance plotted automatically as function of applied bias 22 p3882 A66-40897

Structural diagram for loading of potential element transistors operating in complex logic circuit 23 p4041 A66-41397

Performance degradation of transistors and solar cells due to terrestrial radiation effects, from studies on Tiro Operational Satellite systems 24 p4247 A66-42097

Compound diode-transistor structure with current gain invariant with temperature 24 p4183 A66-42629

Design and performance analysis of HF analog and digital circuit, using double-transistor in which signal is fed to transistor stage via coaxial cable 24 p4184 A66-42646

Four-terminal operation of transistors with substrates of p-type material in which channel current is carried by electrons or metal oxide semiconductor transistors 24 p4185 A66-43032

TRANSISTOR AMPLIFIER

Compensating temperature effects in systems using LDG type logarithmic germanium diode 01 p0035 A66-10205

Maxium amplification in transistorized RC amplifiers 01 p0045 A66-10994

Operation mode instability of transistorized amplifier with constant current feedback treated as autonomous quadrupole 02 p0198 A66-11750

Transistorized LF amplifier design, determining transistor nonlinearity coefficients 02 p0199 A66-11755

Transfer function of injection-type transistor for arbitrary driving conditions and signal level 02 p0200 A66-11880

Current gain and transconductance of silicon planar transistor for collector currents used in design of DC amplifiers 02 p0200 A66-11886

Collector modulation class C transistor amplifiers analyzed theoretically, revealing certain parameters influence on efficiency

and modulation linearity 02 p0201 A66-11912

Dependence in transistorized multistage amplifiers of Q on resistances in collector loops 02 p0206 A66-12270

Current and voltage negative feedback effect on distortion in common emitter transistor stage 03 p0340 A66-12466

Harmonic distortion measurements on amplifier stages using vacuum tubes and transistors with antidistortion circuit 03 p0340 A66-12472

Ratio of two time-varying input signals obtained by transistorized analog amplifier based on principle of elapsed time computation 03 p0340 A66-12496

Characteristics of balanced transistor amplifiers with symmetrical directional couplers 03 p0342 A66-12708

Loop gain and return difference defined in theoretical study of transistor feedback amplifiers 03 p0349 A66-13012

Pulsing technique enhances gain of silicon planar transistor low-current amplifiers 03 p0343 A66-13014

Automatic gain control of emitter current to increase dynamic range and calculate amplitude characteristics of transistorized resonance amplifier 04 p0496 A66-13914

Thermal instability analogous to thermal runaway occurring in differential transistor amplifiers 04 p0500 A66-14097

Tunnel diode in superregenerative amplifier, using phase-plane method to investigate volt-ampere characteristics of diode and effect on oscillation 04 p0501 A66-14410

Performance comparison of cascade two-transistor amplifier configuration with single high-performance transistor used in FM RF application 05 p0645 A66-14586

Digital computer calculation of linear transistor amplifier performance from two-port y-parameter measurements 05 p0645 A66-14587

Amplitude response curves for HF circuits in transistorized feedback amplifier determined, using polar-diagram method 05 p0647 A66-14680

Circuit response to HF circuits for transistorized amplifiers determined, using polar diagram, noting feedback effect and vectorial analysis 05 p0647 A66-14681

Transistor pulse amplifier for use with optical modulator, delivering 1.1-amp 11-nsec pulse at 80-mc rate into 15-ohm load 05 p0649 A66-15176

Transistor CW amplifier delivering 14 watts into 15-ohm load over frequency band from 46 to 90 mc for use with FM optical modulator 05 p0649 A66-15177

High-power solid state transmitter with highly efficient switching mode for power amplification, using square-wave driver technique to eliminate damage of line transients 06 p0824 A66-15971

Transistorized common-emitter amplifier design using AC-bypassed emitter resistor to eliminate degeneration effects 06 p0843 A66-16011

HF correction by series induction in transistorized wideband amplifier 06 p0849 A66-16371

Traveling wave transistor for HF medium-power application, device is also broadband amplifier whose circuit uses distributed elements 06 p0853 A66-16645

Tuned transistor amplifiers, deriving stability conditions from port immittance expression 06 p0854 A66-16681

Epitaxial metal-oxide-semiconductor transistor with tunable high-pass filter-type response characteristics with insertion gain in passband 06 p0857 A66-16959

Linear two-port network model of intrinsic transistor accounts for nonlinear effects at emitter-base function 06 p0866 A66-16961

Emitter degeneration effects in design of transistor amplifiers when it is desirable to predict and control amount of distortion produced by nonlinearity of transistor input characteristic 06 p0857 A66-16974

First-order approximation for second-harmonic distortion in sinusoidal voltage generator connected through resistor to base-emitter circuit of transistor 06 p0858 A66-16984

Large signal characterization of microwave transistor amplifiers 07 p1008 A66-17511

Metal oxide semiconductor transistor noise levels between 30 and 1600 kc and 600 ohms to 100 kilohms source resistance 07 p1010 A66-18249

High impedance semiconductor DC amplifier for use as measuring amplifier or operational amplifier 08 p1194 A66-19279

Low-cost fast development capability of master-dice technique for custom linear integrated circuits 08 p1196 A66-19523

Oscillator design procedure incorporating circuit and equivalent AC model and transfer functions of feedback and amplifier networks 08 p1197 A66-19560

High gain HF transistor amplifier design, considering deviations of device parameters and variations with temperature and bias 08 p1197 A66-19561

Computer calculation of transistor amplifier performance from measured y-parameters 09 p1349 A66-19898

Experimental evidence of parametric mixing action at collector base diode of UHF transistor operating as common base amplifier 09 p1355 A66-20602

Sensitivity of transistor multiple loop feedback amplifier to parameter variations evaluated via replacement with equivalent circuit systems 09 p1355 A66-20603

Stability criteria in tuned transistor amplifiers treated by feedback system theory 10 p1510 A66-21652

Maximum amplification in transistorized RC amplifiers 10 p1510 A66-21674

Solid state microelectronic differential amplifier as stable high gain and high input impedance amplifier 10 p1513 A66-21903

Polarity and harmonics of nonlinear distortion sources in common emitter transistor amplifiers operated in normal domain 11 p1661 A66-22391

Seven-stage RL feedback amplifier with 500-mc low-pass bandwidth and 52 db gain, employing frequency compensation technique 11 p1671 A66-23244

Field effect transistor application to linear amplifier and attenuator circuits 11 p1673 A66-23470

Insulated gate field effect transistors in HF-UHF linear amplifiers 11 p1673 A66-23471

Transistorized power amplifier for CW operation, using switching transistor as key element 12 p1829 A66-23535

Dependence in transistorized multistage amplifiers of Q on resistances in collector loops 12 p1831 A66-23874

Overlay transistor operation characteristics in microwave field 12 p1834 A66-24102

FM and AM noise spectra of low-noise microwave tubes, solid state klystrons and solid state chains 12 p1835 A66-24135

Solid state microwave devices, discussing transistors, tunnel diodes, parametric amplifiers, power transistors, varactors, module systems, etc 12 p1836 A66-24154

Monolithic silicon-transistorized integrated amplifier for use as stabilized gain block element in linear circuit realizations 12 p1842 A66-24656

Matrix methods for design of HF integrated circuit amplifier 12 p1844 A66-24729

Wideband solid state intermediate frequency repeater for communications satellites, using waveguide-cavity diode down converter transistor amplifier and varactor up converter [AIAA PAPER 66-300] 12 p1823 A66-24767

FET amplifier driving common-emitter bipolar-transistor second stage operated with channel not pinched off 13 p2029 A66-25206

Extension of nonlinear distortion in common-emitter circuit to common-base circuit, cancelling emitter distortion and collector-loading distortion and presenting design chart independent of transistor type for CB circuit 13 p2030 A66-25217

HF power transistor delivering 40 watts of RF power at 175 mc at 8 db gain and 75 percent efficiency, noting design and operation 13 p2035 A66-25511

Direct-coupled multistage integrated amplifier design for optimum performance under arbitrary cascade configuration, noting power gain and frequency range 13 p2040 A66-25831

High gain low-noise electronic amplifier with field effect transistor at UHF range,

noting design parameters and performance 13 p2040 A66-25832

AC, DC and pulse amplifiers including FET amplifiers, using semiconductor components and employed in measuring devices 13 p2079 A66-25895

HF correction by series induction in transistorized wideband amplifier 13 p2042 A66-25959

Parametric oscillation in VHF transistor power amplifier which precipitates breakdown 14 p2248 A66-27046

Short circuited crossguide coupling used to stop oscillation of reflex klystrons and convert them into stable millimeter wave amplifiers 14 p2248 A66-27058

Low noise preamplifier with field effect transistors for use with IR detectors 14 p2249 A66-27116

Instabilities occurring in tunnel diode amplifiers resulting from changes in input resistance of load circuit and method for reducing them 14 p2255 A66-27749

Design, power gain and stability of transistorized linear active network HF amplifier 14 p2255 A66-27801

Power gain and stability of linear active two-port networks with circuit design equations based on terminal parameters 14 p2268 A66-28371

HF amplifier design, using two-port theory measurement of Si epitaxial mesa transistor y-parameters, discussing power gain, sensitivity and inherent stability 14 p2261 A66-28372

Controlling gain of individual transistor amplifier stages to enable amplifier to handle input signals with wide dynamic ranges 14 p2262 A66-28379

VHF and UHF amplifiers, oscillators and signal sources using silicon transistors 14 p2262 A66-28382

Causes of noise in semiconductor amplifiers, noting FET, tunnel diode and varactor 14 p2268 A66-28383

Communications circuit application, examining amplifier, oscillator, mixer converter and transmitter designs 14 p2269 A66-28385

Modulus of loop-gain frequency response and mean-square error in transistor operational amplifier 15 p2454 A66-28548

Solid state linear amplifier noting block diagram, use of synthesized waveform type method and semiconductors in vector sum unit 15 p2429 A66-29604

Dependence of amplification factors on emitter current in p-n-p-n silicon rectifiers 15 p2468 A66-29917

Transistorized wideband and pulse type amplifiers for nanosecond frequency range 16 p2664 A66-31357

Discriminating RC amplifier using compound reactive transistor for higher Q-factor 17 p2888 A66-32707

Solid state microwave source for severe vibration environment and 20 mw of power, discussing circuit design, noise performance, frequency stability 17 p2893 A66-32925

Noise figure and optimum source impedance single and double stage transistor amplifiers with negative feedback 17 p2897 A66-33452

Applicability of microelectronic technique to construction of integrated wideband amplifier consisting of symmetrical differential circuit and common-emitter circuit 19 p3323 A66-36818

Automatic gain control of emitter current to increase dynamic range and calculate amplitude characteristics of transistorized resonance amplifier 20 p3532 A66-37872

Statistical properties of amplitude and phase of output signal of electron beam quadrupole amplifier with superposition of regular signal plus Gaussian noise at input 20 p3519 A66-37997

Common-mode input voltage rejection in transistor differential amplifiers by increasing collector resistance and gain of differential stage 20 p3533 A66-38280

Applications for ferroelectric cold conductors and GaAs light-sensitive diodes, examining supersonic amplification in CdS 21 p3716 A66-39620

Method of characterization for germanium microwave transistors and circuit design principles for low noise

performance 22 p3881 A66-40746

Three amplifier and oscillator configurations analyzed for controlling location of dominant poles of feedback circuit within possible realizable region 23 p4050 A66-41612

LF noise measurements on p-channel metal oxide semiconductor transistor operating as amplifier 24 p4211 A66-42643

Amplifiers using field effect device in first stage and bipolar transistor in second with limited drain-source voltage 24 p4185 A66-43031

TRANSISTOR CIRCUIT

Short-circuit current change in silicon solar cell performance as function of cell thickness 01 p0014 A66-10397

Transistorized high sensitivity pulse modulator that produces pulses of which either duration, frequency, spacing or repetition rate is linear function of control signal 01 p0043 A66-10709

Advantages of tunnel diode/transistor switching circuits as medium speed building blocks for exploring detailed behavior of tunnel diode staircase 01 p0043 A66-10915

Effectiveness of oscillatory circuits and delay lines for self-synchronization of polyphase multivibrators 01 p0045 A66-10992

Design problem of transistorized frequency converters 01 p0045 A66-10993

Surveying transistorized differentiators and Integrators, giving fundamental RC and equivalent circuits 01 p0045 A66-11022

Transistorized decade scaler, tunnel diode binary scaler and transistorized tunnel diode hybrid circuit 01 p0045 A66-11039

Circuit with tunnel-diode-based active element for dynamic memory used to store regenerated information 01 p0046 A66-11048

Transistor time delay device with circuit stability used in portable constructions 01 p0046 A66-11053

Static and dynamic performance of discrete component and integrated micropower transistor digital circuits 01 p0047 A66-11136

Low power consumption, high reliability and fully integrated silicon monolithic complementary flip-flop 01 p0047 A66-11139

Current amplification factor decrease and input resistance increase with current decrease in transistor circuits in microregime 02 p0207 A66-11414

Electrometer using temperature-autostabilizing nonlinear dielectric element as receiver 02 p0230 A66-11815

High speed transistorized magnetometer 02 p0230 A66-11817

Tunnel diode and transistor circuit controlled by trigger pulses operating as oscillator, univibrator and flip-flop 02 p0199 A66-11819

Gyrator circuit with only three transistors designed by providing active feedback path so that circuit behaves like two-way feedback system 02 p0201 A66-11908

High density digital-storage element design using MOS transistor, noting parallel vs serial storage and delay line storage 02 p0194 A66-11933

Collector-to-base junction breakdown occurring in planar transistors over whole surface due to emitter presence 02 p0205 A66-12002

Counting decade consisting of three ferrite-transistor triggers and fourth binary element in form of ring with rectangular hysteresis loop 02 p0232 A66-12146

Second harmonic power up to 8 gc from YIG-tuned transistor 03 p0339 A66-12440

GaAs optically coupled transistor structure with lasing emitter 03 p0377 A66-12442

Current distribution instability elimination by HF power transistor sets prepared by microelectronic techniques 03 p0341 A66-12522

Synthesis of equivalent circuits consisting of lumped elements for active region of distributed model of junction transistor 03 p0346 A66-13321

Semiconductor devices used in switching circuits at high pulse rates, emphasizing transistor and tunnel diode circuitry 04 p0497 A66-13962

Transistor equivalent circuit parameters by inverse Laplace transform of time

behavior 04 p0497 A66-13966

Comparing VHF cascade circuits with double diffusion silicon planar transistors and metal oxide field effect planar transistors 04 p0501 A66-14133

Resistor stabilized VHF power transistor discussing power output, reliability, bias stability and application 05 p0642 A66-14566

Integrated circuit current switching logic element fabrication, using transistors and standard isolation techniques 05 p0643 A66-14570

Microwave power by parametric frequency multiplication in transistors, noting equivalent circuits 05 p0644 A66-14577

Cascade configuration using two interconnected field effect transistors to reduce reverse feedback capacitance for better suitability for VHF communications circuits 05 p0645 A66-14585

Circuit response to HF circuits for transistorized amplifiers determined, using polar diagram, noting feedback effect and vectorial analysis 05 p0647 A66-14681

Transistor astable multivibrators for solid state logic elements for use in digital control and indication 05 p0647 A66-14770

Transistorized amplitude discriminator design, operation and test results 05 p0678 A66-15119

Elementary matrix to analyze transistor circuits by contour-circuit method 06 p0849 A66-16367

Stable tunable RC filters with fixed capacitors, variable resistances and positive feedback 06 p0853 A66-16653

Equivalent h parameters for n transistors connected in cascade, establishing effect of circuit impedances 06 p0854 A66-16687

Field effect transistor circuits used to replace bipolar transistors or thermionic devices and action as variable ohmic resistor 06 p0856 A66-16887

HF behavior of transistors, using Giacoletto equivalent circuit 06 p0856 A66-16918

Field effect transistors applied in circuit design including triggers, gates, impedance adapters, etc 06 p0856 A66-16919

Field effect transistors and unijunction transistors in sawtooth generator, cascade amplifier, voltage regulator, etc 06 p0856 A66-16920

Metal-insulator-piezoelectric semiconductor electromechanical transducer, discussing transistor and transducer operation characteristics 06 p0883 A66-16960

Transistor RC oscillator with single-element tuning, using two push-pull driven half-lattice phase shifters 07 p1004 A66-17216

Short-pulse shaping of high repetition rate with transistorized blocking oscillator 07 p1001 A66-17355

Active network synthesis, reviewing methods of analysis for linear lumped constant parameter networks 07 p1015 A66-17755

Generalized analysis for arbitrary driving conditions based on charge control analysis for transistors 07 p1009 A66-18068

Crystal oscillator described, using quartz as series resonant element with integrated solid state circuit amplifiers 07 p1010 A66-18250

Silicon based unijunction transistor, discussing design, operation parameters and application 08 p1190 A66-18771

Nonuniform load distribution among transistors of multitransistor circuit in parallel connection 08 p1190 A66-18772

Unijunction, junction-type unipolar field transistor, design, operation, parameter, production technology and uses in electronic circuitry 08 p1193 A66-19277

Transit time creates current lag in transistor, making it inductive for developing integrated frequency selective circuits 08 p1197 A66-19564

Equivalent circuit diagram determination of change in quadrupole parameters in transistor due to current-induced heating 08 p1198 A66-19729

Analog multiplier-divider based on properties of saturated transistors 08 p1198 A66-19735

Refined field effect transistors noting current, gate voltage and transconductance of proposed structures 09 p1350 A66-19918

Transistorized switch, employing n-p-n and p-n-p silicon triodes, capable of switching voltages from 10 mv to 20
 09 p1352 A66-20360

Natural frequency and self-excitation of transistor-operated autogenerator with open-loop feedback
 09 p1354 A66-20453

Transistorized LR oscillator design using piecewise linear approximation in oscillation theory
 09 p1357 A66-20784

Silicon triode trigger with power consumption on order of 1 milliwatt
 09 p1358 A66-20818

Power transistors for RF generation and amplification, discussing operation characteristics and testing
 10 p1508 A66-21297

Worst case design of diode transistor logic inverters, considering resistor end-of-life tolerance, supply voltage variations and minimum beta of switching transistor
 10 p1508 A66-21298

Nonresonant solid state magnetic, semiconductor and dielectric devices, noting operation characteristics, control parameters, etc
 10 p1509 A66-21418

Transistorized two-ports circuit realizing negative impedance converters with DC coupling throughout
 10 p1517 A66-21654

Effectiveness of oscillatory circuits and delay lines for self-synchronization of polyphase multivibrators
 10 p1510 A66-21668

Design problem of transistorized frequency converters
 10 p1510 A66-21669

Transistor sawtooth-voltage generators with positive feedback and nonlinear distortions correction by amplification factor
 10 p1511 A66-21679

Mutual dependence of interconnection and noise immunity in transistorized digital computer circuitry
 10 p1517 A66-21692

Double-ended transistors /n-p-n and p-n-p/ in circuit design application, explaining why transistors of opposed polarity facilitate direct interstage coupling
 10 p1511 A66-21713

Microwave circuit design for HF amplifiers and radar systems using either hybrid approach with germanium transistors or monolithic one with silicon transistors
 10 p1512 A66-21761

Fast coincidence circuit with high sensitivity and low recovery time, analyzing triggering and self-oscillating operation and using avalanche operating
 11 p1662 A66-22402

Transistorized high sensitivity pulse modulator that produces pulses of which either duration, frequency, spacing or repetition rate is linear function of control signal
 11 p1664 A66-22624

Operating principles and application of field effect transistor
 11 p1665 A66-22686

Transistorized device permitting direct conversion of amplitude or duration of input pulse into sequence of pulses
 11 p1676 A66-22741

UHF transistor with transverse field produced in base layer by short-circuiting emitter region and second base electrode by metallic bridge
 11 p1668 A66-23025

Trigger functioning, failure due to grid voltage and transistor parameter changes, and reliability parameters of computer and control elements
 11 p1677 A66-23032

Batch-fabrication of beam-lead transistors, integrated circuits and other components with leads serving as structural, protective and electrical functions
 11 p1669 A66-23087

Transistor-tunnel diode flip-flop with built-in gating
 11 p1669 A66-23159

Port-to-port isolation of phase detectors through use of complementary transistors in beta multiplier circuit to prevent unwanted signal reception
 11 p1657 A66-23177

Current mode technique for worst-case design analysis of electronic networks
 11 p1678 A66-23179

Monostable and bistable counting circuit synthesis and analysis of volt-ampere characteristics
 11 p1678 A66-23238

Circuit design techniques for linear integrated circuits, noting manufacturing methods, achievement of monolithic construction, etc
 11 p1670 A66-23243

Transistorized decade scaler, tunnel diode binary scaler and transistorized tunnel diode hybrid circuit
 11 p1671 A66-23285

Circuit with tunnel-diode-based active

element for dynamic memory used to store regenerated information
 11 p1671 A66-23295

Microwave generation with conventional transistors in avalanche mode, describing circuit, mounting construction and avalanche oscillator frequency
 12 p1830 A66-23757

Matrix algebra applications to circuit analysis, deriving transistor matrix for use in feedback amplifier
 12 p1847 A66-23758

Multipurpose chips for reduction of analog computer integrated circuit cost
 12 p1834 A66-24101

Diode and transistor response to ionizing radiation, describing generation of transients qualitatively and quantitatively
 12 p1843 A66-24681

Transistor base resistance measured, using input method where equivalent circuit is determined through simultaneous application of three separate frequencies to bridge
 12 p1845 A66-24853

Active transistor modulators for carrier frequency engineering, noting noise reduction, lower power requirements and modulation-filter matching
 13 p2032 A66-25485

VHF overlay transistor for lightweight single-sideband equipment, noting design, output and efficiency
 13 p2035 A66-25510

Design and integrated circuit fabrication of negative impedance converter, using two transistors and two resistors
 13 p2036 A66-25523

Differential amplifiers using common-collector, isolated and lateral complementary transistor structures, including frequency response, phase shift, etc
 13 p2036 A66-25532

P-n-p and n-p-n silicon epitaxial power transistors, noting geometry vs output for interdigitated structures
 13 p2037 A66-25542

Germanium alloy transistor for high current and low saturation voltage requirements, noting high efficiency, physical properties, application, etc
 13 p2037 A66-25543

High power phase shifting with p-n diodes, noting that 1000-v diodes will increase peak power capacity to 10 kw
 13 p2165 A66-25547

UHF transistor design and performance, noting power gain, stability, low noise figure and correlation between circuit invariants and transistor parameters
 13 p2038 A66-25560

Hot-electron transistors, discussing application of Schottky-emitter transistor to VHF operation
 13 p2038 A66-25561

Noise figure of microwave transistors, noting effect of parasitics associated with wafer and package
 13 p2038 A66-25562

High gain low-noise electronic amplifier with field effect transistor at UHF range, noting design parameters and performance
 13 p2040 A66-25832

Elementary matrix to analyze transistor circuits by contour-circuit method
 13 p2042 A66-25955

Static composite characteristics of series-connected tunnel diode chains
 13 p2042 A66-26098

Chopper using complimentary transistors for converting DC voltage into square wave pulses
 14 p2246 A66-26801

Optimum design of emitter follower transistor logic /ETL/ circuits and comparison with various other logic circuits
 14 p2263 A66-27023

180-stage integrated thin film scan generator, noting design characteristics
 14 p2247 A66-27033

Integrated circuit as exclusive-OR gate or as linear amplifier, using transistor or tunnel diode shunted by resistor
 14 p2263 A66-27051

Transistor voltage regulators for onboard generators, for operation within modern aircraft current-supply tolerances
 14 p2226 A66-27714

Transistorized NMR magnetometer
 14 p2296 A66-27732

Relationship between power gain and HF equivalent circuit constants of diffused-base transistor
 14 p2259 A66-28039

Desensitization in FM or PM transistorized receivers
 14 p2259 A66-28042

Counting decade consisting of three ferrite-transistor triggers and fourth binary

element in form of ring with rectangular hysteresis loop
 14 p2297 A66-28102

Synthesis of equivalent circuits consisting of lumped elements for active region of distributed model of junction transistor
 14 p2260 A66-28295

Book on solid state communications and design of equipment using semiconductors
 14 p2260 A66-28367

Solid state communications devices, discussing HF small signal amplifiers, transistor circuits, varactor diodes for frequency multiplier chains, etc
 14 p2261 A66-28368

HF transistor circuit design, noting effect of bias frequency and temperature on y and h parameters
 14 p2261 A66-28369

Y-parameter graphs and data for HF circuits obtained from General Radio transfer function and immittance bridge
 14 p2261 A66-28370

Timing range increase in multivibrators by adding circuitry which separates requirements of bias and timing
 15 p2458 A66-28888

Common emitter noise equivalent circuit to determine microwave transistor noise parameters
 15 p2458 A66-28893

Critical excitation function used to estimate transient response of thin film devices at time intervals exceeding greatest time constant
 15 p2459 A66-28895

Silicon planar transistor design noting accelerated life test, failure data, etc
 15 p2466 A66-29675

Instability of current distribution related to problem of reliability in transistor electronics
 15 p2468 A66-29915

Volume recombination in transistor base for arbitrary concentrations of minority charge carriers
 15 p2468 A66-29921

Inhomogeneous semiconductor RC-circuit for case of small sinusoidal signal in presence of bias voltages
 15 p2475 A66-29927

Optimum dimensioning of diode transistor logic /DTL/ circuit equipped with silicon epitaxial planar transistor BSX20 operating in saturated mode
 16 p2668 A66-30124

Diode transistor logic /DTL/ circuit stage delay and transistor speed parameters
 16 p2668 A66-30125

Active network synthesis, discussing parametric amplifiers and transistor circuits, noting gain and phase stability
 16 p2668 A66-30519

Signal handling curves in receiver design including vacuum-tube capability, demodulator circuit, etc
 16 p2660 A66-30579

Electric parameters of components and resultant properties of transistorized flip-flop circuits
 16 p2663 A66-31027

Amplitude modulation by transistorized circuits with consideration of sideband slope, signal input resistance and inverse feedback
 16 p2654 A66-31029

Circuit of step voltage generator using two transistors operating in avalanche breakdown regime
 16 p2664 A66-31358

Fabrication of linear integrated amplifier circuits
 16 p2665 A66-31430

Hall voltages in silicon obtained by combining MOS transistor structure with Hall effect of material, noting experimental results, design criteria, etc
 16 p2667 A66-31581

Transistor inverter with 80 percent efficiency for 400 mv source voltage, noting simplicity of design
 17 p2848 A66-31810

Integrated and transistor circuit design, discussing parasitic effects, diode structures, volt-ampere characteristics, capacitors and resistors, temperature and doping effect, etc
 17 p2881 A66-32104

Electronic computer technique for dividing phase space of transistorized circuit into linearity regions
 17 p2885 A66-32253

Very high input impedance buffer circuit using field effect transistors for voltage sensing in high impedance analog simulator
 17 p2886 A66-32381

High efficiency monostable circuit using complementary transistors suitable for generation of rectangular pulses having very short rise and fall times
 17 p2886 A66-32382

Thyristor selection for control application, discussing V-I characteristics, SCR behavior, optical control feasibility, etc
 17 p2888 A66-32781

Transistor-tunnel diode RC emitter circuit for binary numeration 17 p2888 A66-32841

Wide tuning range solid state microwave source consisting of transistor oscillator and varactor diode harmonic generator chain 17 p2893 A66-32926

Textbook on circuits in transistor electronics, discussing LF, pip, video and DC amplifiers, radar, radio telemetry, etc 17 p2894 A66-32986

Self-modulation in gallium arsenide oscillators, noting material and field characteristics, Gunn effect, etc 17 p2895 A66-33114

Intermodulation elimination in transistors, determining figure of merit and sensitivity as function of operating current 17 p2895 A66-33115

Gyrator realization, discussing impedance/frequency characteristics of transistor circuit used 18 p3078 A66-34079

Transistor testing and secondary breakdowns, featuring application of constant collector current and power with arbitrary waveform 18 p3078 A66-34087

Relative circuit gain of common-emitter antisaturation feedback circuit configurations as function of circuit parameters 18 p3090 A66-34088

Inductorless filters, noting increased sensitivity of RC active networks to component tolerances 18 p3078 A66-34092

Piecewise linear system modeling via topological techniques, using flowgraph method for network synthesis 18 p3090 A66-34247

Temperature behavior of transistor using as reference equivalent temperature-drift sources at input of idealized drift-free transistor 18 p3088 A66-35041

Book on analysis and design of transistor circuits including transistor parameters, emitter diode equivalent circuits, FET, amplifiers, noise, etc 18 p3089 A66-35238

Transistorized switch, employing n-p-n and p-n-p silicon triodes, capable of switching voltages from 10 mv to 20 v 19 p3312 A66-35318

Rise and fall times of transistors in switching operation, comparing variation of lifetime of minority carriers with results obtained from cut-off frequency measurements 19 p3313 A66-35350

Bilateral switching thyristor system on common silicon substrate, discussing ignition 19 p3313 A66-35500

Gating circuit with MOS transistors for amplifier strobing in low-level signal transmission 19 p3315 A66-35559

Two-stage field effect transistor amplifier with high input resistance and modification of circuit enabling input resistance to be adjusted to infinity 19 p3315 A66-35560

Ultrahigh speed PCM telemetry systems using high-speed FET circuits 19 p3302 A66-35701

Behavior of thermally coupled transistors in differential amplifier explained in terms of empirical equation for transistor current 19 p3317 A66-35726

Transistorized optimum ratio combining circuit, noting addition of two or more input signals to obtain combined signal with improved S/N ratio 19 p3330 A66-36163

Microwave power generation and amplification via transistors, noting optimum source and load impedance for microwave transistors under large signal conditions 19 p3319 A66-36166

Circuit functions, electrical parameters and fabrication of integrated analog switch in monolithic silicon block 19 p3320 A66-36322

Transfer functions, optimum impedance matching conditions, input and output admittances and voltage spectra of transistorized frequency converters 20 p3525 A66-37125

Transient radiation response and permanent radiation damage in monolithic silicon-junction-transistorized integrated circuit 20 p3526 A66-37318

Anomalous photocurrent generation in transistors, noting carrier generation and transport processes 20 p3526 A66-37321

Linear prediction theory for maximum load tolerance of oscillator and lossless embedding required to induce

oscillation 20 p3540 A66-38288

Transistorized portable UV dosimeter for use in medicine, climatology, physiotherapy, meteorology and stimulated plant growth study 20 p3562 A66-38436

Silicon nitride as possible replacement for silicon dioxide in highly stable and reliable semiconductor devices, especially insulated-gate field effect transistor circuits 21 p3710 A66-38827

Temperature variations due to noise sources via feedback paths and variations of system energy, noting influence on noise parameters of transistor 21 p3711 A66-38834

J-band multiplier design noting extension of frequency coverage, components, noise performance, frequency stability, tuning range, etc 21 p3711 A66-38837

Measuring device for common emitter current-gain/ bandwidth product of transistors at various frequencies, noting effect of parasitic elements, assessing accidental error 21 p3737 A66-38966

Transistorized pulse height selector with logically separated threshold outputs and trigger circuit with emitter coupling 21 p3713 A66-39324

Frequency variations of pi-equivalent circuit parameters of junction transistor, noting expansion of hyperbolic function into Taylor series 22 p3873 A66-39815

Transistorized LR oscillator design using piecewise linear approximation in oscillation theory 22 p3874 A66-39843

Scattering parameters for design of HF transistor circuits 22 p3877 A66-40334

Overlay transistors at microwave frequencies for amplifiers, oscillators, etc, used in telemetry 22 p3879 A66-40722

Numerical analysis of transient behavior of nonlinear transistor circuit equations 22 p3885 A66-40863

Noise performance of MOS structures, noting parametric dependence on input voltage and current source magnitude 22 p3883 A66-40962

Complementary symmetry flip-flop and similar transistor micropower digital logic circuit design 23 p4048 A66-41144

Voltage control by means of Zener diode, transistor and variable-gain amplifier circuit 23 p4044 A66-41214

Transistorized device permitting direct conversion of amplitude or duration of input pulse into sequence of pulses 23 p4049 A66-41479

Field effect transistors in shock tunnel instrumentation circuitry associated with piezoelectric transducers operating in environment of widely ranging pressures, temperatures and testing times 24 p4207 A66-42170

HF transistor stability in common emitter configuration, examining performance of input admittance in circuit design and analysis 24 p4181 A66-42377

Two-transistor circuit with output resistance of approximately 50 M ohms with improved temperature stability and high internal resistance 24 p4181 A66-42378

Microwave transistor noise measured in terms of parameters, comparing experimental and calculated results 24 p4183 A66-42631

Matrix analysis of complementary pair emitter-follower, examining overall circuit parameters, noting good DC quiescent stability 24 p4184 A66-42645

Temperature stabilization of transistorized circuits calculated via equivalent circuit stability characteristics 24 p4185 A66-42892

Laplace transform analysis of transistor switching circuit controlled by RC time constant, using PWM circuit as example 24 p4185 A66-42946

Transistor parameters in integrated circuits including saturation resistance, voltage breakdown and frequency response and optimization of operation dependence on impurity concentration, geometry, etc 24 p4186 A66-43079

TRANSISTOR LOGIC

Complementary bipolar transistor NAND gate for reducing power dissipation and increasing switching speed 01 p0047 A66-11137

Power dissipation as sum of quiescent power and transient power dissipation,

considering n-channel metal-oxide-semiconductor and MOS complementary logic circuits 01 p0047 A66-11138

Digital integrated circuits discussing current mode logic, resistor, diode and complementary transistor logic circuits, crossover method, power dissipation, testing, standardization and limiting factors 03 p0347 A66-13341

Worst case design of diode transistor logic inverters, considering resistor end-of-life tolerance, supply voltage variations and minimum beta of switching transistor 10 p1508 A66-21298

Monolithic transistor-transistor logic gate capable of 1 to 2 nanosecond delays 10 p1511 A66-21697

Field effect transistors in digital circuits, FET transient behavior, transistor logic and switching circuitry 11 p1673 A66-23472

Integrated circuit binary counters using majority logic current mode gate element 14 p2255 A66-27803

Ground-based test setup using p-n-p-n controlled switches, logic circuitry and sensitive relays to analyze telemetered pulse signals from four lines of airborne electronic system 14 p2255 A66-27807

Turtle, microcircuit logic or transistor resistor transistor logic /TRTL/ for integrated circuits 17 p2883 A66-32117

Integrated circuit design optimization, using modified direct coupled transistor logic NOR gate 17 p2883 A66-32122

High-speed complementary MOS memories 19 p3314 A66-35527

Digital computer program for static worst case design of diode transistor logic 22 p3870 A66-40396

Multifunction monolithic thin film compatible diode-transistor logic circuits for data processing 24 p4178 A66-43187

TRANSIT IVA SATELLITE

Central Italy ionospheric electron density, examining Faraday rotation of 54 mc signals from Transit IVA satellite 11 p1695 A66-22377

Signal amplitude of Transit IVA satellite recorded at two stations, using time difference between observing similar fluctuations in fading period to determine height of ionospheric irregularities 12 p1874 A66-24843

Ground-reflected wave effects and regular fading superposed on Faraday fading observed in signal strength recordings from Transit IVA and Explorer XXII 16 p2692 A66-30333

TRANSIT SATELLITE

Transit satellite navigation system comprising three or four satellites in polar orbits, four ground stations, computational center, two data feeding stations and automatic aircraft and submarine equipment 18 p3246 A66-34004

TRANSIT TIME

Transit time effects in space-charge-limited silicon microwave diode 08 p1188 A66-18652

Silicon diode microwave oscillators and amplifiers, noting application of avalanche transit time for increased efficiency of p-n junctions 10 p1515 A66-22090

Minority carrier flow in base region of Graded Band Gap Base /GBGB/ transistor, determining effect of injected current level upon carrier transit time 11 p1668 A66-23024

Charge control analysis of transistor cut-off frequency, noting current amplification factor, transit time of minority carriers, etc 15 p2468 A66-29889

Palletized cargo systems, transit time reduction and ground support system data handling and documentation 17 p2846 A66-32844

- Slip-induced fracture of polycrystalline Cr, Mo and W and bcc transition metals V, Fe, Nb and Ta 01 p0085 A66-10376
- Anderson model to obtain transition metal impurities effect on superconductors due to resonance scattering 03 p0407 A66-12331
- Optical absorption spectra of transition elements especially ruby, based on crystal field, ligand field and molecular orbital theories 03 p0408 A66-12500
- Porous materials by sintering powdered carbides and borides of transition metals 04 p0535 A66-13437
- Niobium elastic constants tabulated for various temperatures, using RF pulse-echo method 04 p0536 A66-13754
- Nuclear magnetic resonance of transition metals, noting Knight shift in platinum and palladium and contributions to nuclear spin relaxation rates 04 p0564 A66-14031
- Cobalt-vanadium-boron system, discussing phases with boron coordination number 8 07 p1047 A66-17225
- Optimum conditions for preparation of complex carbide alloys containing scandium carbide 07 p1049 A66-17903
- Extension of electron gas model to transition metals /titanium, zirconium, hafnium/, considering atom interaction up to fourth neighbor 10 p1546 A66-21664
- Stability theory of magnetic phases for simplified quasi-particle band model of transition metals and alloys 10 p1580 A66-21734
- Hartree-Fock approximation method for calculating efficiencies of multiple-photon processes 11 p1737 A66-22495
- Transition of group IV elements to metallic state confirmed as equivalent to generation of intrinsic current carriers 11 p1759 A66-23447
- Cubic transition-metal carbides and binding mechanism 13 p2166 A66-25835
- Atomic standards of frequency and second of ephemeris time, discussing frequency of Cs 133 transition at zero field 14 p2296 A66-27899
- Diffusion and melting techniques used to determine effect of Ni, W, Ti and Ta impurities on lifetime of minority carriers in n-base of silicon p-n junctions 19 p3433 A66-35310
- Quantum theoretical ferromagnetic behavior of chemical bonds in transition metals and Hartree-Fock calculation of atomic orbitals 19 p3439 A66-35713
- Chemical bonds in carbides and nitrides of transition metals, obtaining atomization heat of compound and effective charges of transition atomic nuclei 19 p3386 A66-36425
- Fluorescence of rare earth, actinide and transition metal ions in insulating crystals as result of optical excitation, discussing spectroscopic properties and operating characteristics 20 p3575 A66-36969
- Fermi surface interpretation of band structure, electron energy levels, optical properties and ferromagnetic structure of transition and noble metals 20 p3613 A66-37274
- Optical properties and complex dielectric constants of transition metals 20 p3614 A66-37276
- Conductivity, temperature dependence, thermal emf Hall constant, thermal conductivity and resistivity of aluminides of transition metals 20 p3584 A66-37417
- Mechanical and physical effects of metastable phases arising during hardening of titanium alloys containing transition elements 20 p3585 A66-37699
- X-ray analysis of crystal structure relationships among transition elements in binary and ternary aluminide alloys 20 p3586 A66-38092
- Porous materials by sintering powdered carbides and borides of transition metals 20 p3586 A66-38139
- Critical temperature of several bulk dilute solid solutions of transition metals in Al, Zn, In and Sn, examining effect of transition-metal impurities 21 p3796 A66-38556
- Hyperfine spectrum of xenon in 3.5 mm maser transition noting experimental setup, gain profiles for various input power levels and structural properties 21 p3746 A66-38763
- Optimum conditions for preparation of complex carbide alloys containing scandium carbide 21 p3752 A66-39403
- Electronic structures of transition metal alloys analyzed, comparing superconducting critical temperatures with H, N and O acting as electron donors 22 p3960 A66-39779
- Frequency tuning of coherent emission over vibronic continuum of phonon-terminated optical masers by thermal tuning and wavelength-selective feedback 23 p4077 A66-41369
- Thermoelectric power and electric resistivity of copper-gold alloy doped with 3d transition metals as function of temperature and atomic number of impurity 23 p4114 A66-41712
- X-ray K-absorption spectra of titanium, vanadium and germanium in germanides 23 p4082 A66-41826
- Crystalline solid lasers, considering rare Earth and transition metal impurities and host materials, noting CW laser characteristics 24 p4224 A66-42799

- Explorer XVIII plasma flux measurement data analysis, plasma detector, map of transition zone between magnetosphere and solar wind and associated energy spectra 18 p3168 A66-34351
- Shock wave boundary layer interactions and shear flow regimes in hypersonic inlet flows [AIAA PAPER 66-606] 18 p3049 A66-34447
- Transitions of steady flows of conducting gases through two successive oblique MHD shock waves 18 p3147 A66-34726
- Approximation method for transition section calculation of turbulent jet, obtaining velocity profiles for initial and basic sections 19 p3276 A66-36466
- Data correlations on forced-convective heat transfer to cryogenic fluids by nucleate, film and transition region boiling 20 p3677 A66-37098
- Upper laser states deriving population through cascade transitions from higher layer states of argon ion noting consistency of laser output current dependence with current dependence of cascade rate 20 p3579 A66-37774
- Laminar turbulent transition in freestream boundary layer behind axisymmetric and plane nozzle 23 p4061 A66-42036
- TRANSITION POINT**
Laser transition in vibrational state of ground electronic state of CN from rotational level 8 to 7 with population inversion as result 02 p0240 A66-11451
- Superconducting transition temperatures measured for various tin-gallium compositions in quenched and annealed states 02 p0271 A66-11482
- Shells and tubes subjected to internal and external pressures including analysis of transition theory for sheet-bending, considering creep rupture and relaxation 03 p0436 A66-12696
- Heat transfer and wall friction for low velocity flow of gases in downstream region of smooth electrically heated tubes, considering transition region [ASME PAPER 65-WA/HT-18] 05 p0790 A66-15646
- Green function/Gorkov variational procedure calculation of transition temperatures of superposed superconducting films dominated by inhomogeneous electron-electron interactions 07 p1108 A66-18436
- Superconducting transition temperature of stoichiometric lanthanum sulfide 07 p1108 A66-18437
- Critical magnetic field curves of superconducting Ru isotopes and dependence of superconducting transition temperature on isotopic mass 07 p1109 A66-18443
- Superconductivity of tin diffused niobium wires, comparing obtained transition temperature changes with De Sorbo data 08 p1267 A66-18633
- Superconductivity of gallium metastable phase, noting transition temperature and critical field 08 p1267 A66-18649
- Change in Fermi surface topology, induced in superconductor by external pressure, leads to nonlinear variation of transition temperature with pressure 08 p1269 A66-18978
- Parameter predicting transition from low to medium blowing rate in arc with transpiration cooled anode 08 p1168 A66-19156
- Optical absorption in germanium in region of forward transition with spectral transmission curve having structure in form of two minima 08 p1274 A66-19316
- Transition to superfluid state in He 3, measuring behavior of specific heat with three-stage adiabatic demagnetization apparatus 09 p1391 A66-20010
- Quantized flux in small hollow superconducting cylinders cyclically cooled through transition temperature 09 p1418 A66-20038
- Hollow-cylinder experiments with superconducting transition taking place while cylinders are rotating 09 p1418 A66-20040
- Solid rotating mercury cylinder, reversibly obeying London equation when cooled through superconducting transition, at given angular velocity 09 p1419 A66-20042
- Effect of surface charging on superconducting transition temperature, locating negative charges at oxide-oxygen interface in experiments with thallium films 09 p1419 A66-20043
- Temperature range of transition from superconducting to normal state in very pure lead determined from variation of specific heat and magnetic susceptibility 09 p1419 A66-20044
- Calorimetric and magnetic measurements of dilute titanium alloys with other transition elements, distinguishing between homogeneous and nonhomogeneous transitions 09 p1419 A66-20045
- Superconducting transition temperature of SnTe samples 09 p1423 A66-20071

Sample resistance of niobium oxy-nitrides as function of temperature, using four-contact DC technique 09 p1424 A66-20073

Relation of thermodynamic parameters to energy gap of superconducting elements and alloys 09 p1424 A66-20074

Energy dependence of transparency of walls of transition region shell obtained from Forbush effects, in connection with cosmic ray intensity 09 p1439 A66-20221

Diamagnetic impurity effect on temperature of superconducting transition for Fermi surface topology sensitive to impurity additions 09 p1428 A66-20594

Pressure dependent critical temperature and magnetic field of superconducting transitions in metals 09 p1429 A66-20597

Wake transition and Strouhal number for incompressible wake of solid cones, spheres, disks and teardrops 10 p1524 A66-21807

Glass transition temperature of polymethyl methacrylate as affected by low concentrations of monomer and diethyl phthalate plasticizers 11 p1720 A66-22977

Superconducting behavior of various close packed low symmetry intermediate phases in various binary systems, noting relation between transition temperature and composition 12 p1928 A66-23939

Critical Reynolds numbers for oscillating fluid in tube in region of laminar-turbulent transition 12 p1864 A66-24448

Superconducting film stability under current, noting metastable state near transition point via potential analysis 12 p1930 A66-24787

Effect of heterophase fluctuations at high and low frequencies near first order phase-transition point on elastic oscillation propagation, noting role of acoustic wave 12 p1972 A66-25020

Electric fields in hydrogen plasma leading to forbidden free-bound transitions, considering photodetachment of electrons and radiative capture cross sections 13 p2135 A66-26265

Schlieren photographs of turbulent hypersonic wakes behind cones and spheres at various Mach numbers and pressures, analyzing laminar wake core, wake diameter and distance to transition 13 p1992 A66-26664

Transition from laminar to turbulent flow, establishing critical Reynolds number of 2223 for steady pipeflow 13 p2069 A66-26702

Pressure effect on magnetic moment of solids, noting magnetic transition point, ferromagnetic anomalies, etc 15 p2565 A66-29067

Spin-free transition density matrices, using permutation group 15 p2547 A66-29620

Pressure effect on transition point of superconductors from Bardeen-Cooper-Schrieffer theory, perturbation theory and electron scattering near Fermi surface 15 p2568 A66-29714

Electric contact effect and transition temperature measurement in superconducting Cu-Pb double layer films at low temperatures, using He 3 cryostat 16 p2772 A66-30322

Heat transfer and wall friction for low velocity flow of gases in downstream region of smooth electrically heated tubes, considering transition region [ASME PAPER 65-WA/HT-18] 16 p2828 A66-30991

Oxidation-protection disilicide coatings effect on ductile-to-brittle transition temperature of refractory alloys at low temperature 16 p2726 A66-31459

Low temperature resistivity, magnetic susceptibility and superconductive transition point in La containing rare earth impurities 17 p2982 A66-32972

Pressure effect on transition temperature of niobium 18 p3152 A66-33553

Low temperature vibronic transitions between electronic states involving destruction of photon and creation of phonon via electric dipole term of Hamiltonian 19 p3446 A66-36394

Low temperature optical fluorescence of ruby and vanadium doped magnesium oxide in which vibronic sideband intensity near sharp R line is measured as function of energy separation from no-phonon R line 19 p3446 A66-36395

Superconducting transition temperature of thin film, showing growth of temperature and decrease in film thickness due to phonon electron interaction 20 p3616 A66-37378

Detection of three radio lines arising from transitions between highly excited states of neutral helium 20 p3652 A66-37615

Continuous wave UV ionized gas laser emission over four transitions in neon, krypton and argon 20 p3579 A66-37771

Diamagnetic impurity effect on temperature of superconducting transition for Fermi surface topology sensitive to impurity additions 20 p3622 A66-38128

Pressure dependent critical temperature and magnetic field of superconducting transitions in metals 20 p3622 A66-38131

Intensity measurements on molecular oxygen Herzberg I system emitting in afterglow of microwave discharge, noting dependence of transition moment on internuclear distance 20 p3555 A66-38208

Temperature dependence of mixed-state thermoconductivity of type II superconducting In-Pb alloys in magnetic field 21 p3797 A66-38751

Integration of near equilibrium flows in propulsive nozzles, estimating length of transition region from equilibrium condition to kinetic solution [AICE PREPRINT 28C] 22 p3971 A66-39884

Sporadic E layers formation by wind shears, noting role of neutral wind temporal variations and rapid transition from day to night in layers with vertical gradients 22 p3907 A66-39961

Molecular spectroscopy, measuring absorption coefficient at center of carbon dioxide band, determining vibration-rotation transition moment 23 p4076 A66-41179

Low temperature thermodynamic properties of vanadium, discussing specific heats and transition temperatures in superconducting and normal states 23 p4080 A66-41371

Specific heat measurements and cryogenic thermodynamic properties of single crystal V in mixed state under 12 different magnetic fields 23 p4080 A66-41372

Solar UV emission lines for 11 elements heavier than helium analyzed, obtaining relative abundances values and relation between electron temperature and temperature gradient in chromosphere-corona transition region 23 p4130 A66-41809

Transitions of first two band systems of iodine excited in argon suitable for laser action 23 p4079 A66-42085

TRANSITION PROBABILITY

Number of repetitions of aperiodic Markov chain with given phase state space and transition probability 01 p0095 A66-10732

Monitoring of discrete state discrete transition Markov source whose states are input letters to memoryless discrete noisy channel 06 p0860 A66-16189

Partial differential equations for conditional Markov process distribution for noisy observations 07 p1059 A66-17968

Transition probabilities and line-shape parameters for three argon lines in wall-stabilized Ar arc containing trace of H 08 p1261 A66-18766

State diagram test for Markov chain regularity 09 p1360 A66-19928

Motion yielding transition probabilities between low-lying vibrational levels of diatomic molecules 11 p1738 A66-22878

Fourier representation for Markov chains and strong ratio theorem 12 p1905 A66-24820

Transition probabilities of nitrogen-nitrogen collision obtained with time-dependent wave functions of forced harmonic oscillator and by numerical methods 13 p2131 A66-25384

Markov process model of Gemini countdown and transition probability matrix 13 p2192 A66-25505

Transition probabilities and lifetimes in ionized argon gas lasers 13 p2102 A66-26207

Relative vibrational transition probabilities and r centroids for 36 bands of C-X system of singly ionized nitrogen molecule 14 p2337 A66-27705

Transition variable as function of superconductor reduced temperature,

showing temperature dependency of penetration depth, acoustical attenuation and thermoconductivity 16 p2777 A66-30937

Optical transition probability and broadening cross section obtained from absorption measurements in carbon dioxide and mixtures with other gases 17 p2933 A66-31938

Coupling between free electron and molecular vibrational temperatures in plasma environments, noting energy distribution, application to MHD generation, etc 18 p3145 A66-34105

Theoretical transition probabilities of forbidden lines and unobserved lines of ions in solar corona 18 p3230 A66-34151

Asymptotic behavior of transition probability matrices, analyzing limit theorems involving capacities in Markov chains 19 p3389 A66-35984

Initial rotation effect upon vibrational excitation of diatomic molecules studied in two-dimensional collisions shows that with higher rotational energies it is increasingly difficult to excite vibration 19 p3404 A66-36802

Transition matrices of ergodic finite Markov chains and readiness models in cost effectiveness systems 20 p3681 A66-37176

Sudden approximation applied to rotational transition probabilities and inelastic total cross sections for scattering of homonuclear diatomic molecules by atoms 21 p3774 A66-38526

Molecule reorientation and transition probability in molecular beam maser using formaldehyde 22 p3929 A66-39662

Temperature measurement in shock tubes and transition probabilities of argon spectrum lines from emission intensities 22 p3956 A66-40406

Free molecular flow as Markov chain, describing motion via probability function in multireflection system 22 p3951 A66-40454

Stark splitting effect on fine structure level probabilities for hydrogen lines, taking account of spontaneous transition probabilities and Lamb shift 23 p4098 A66-41362

Cosmic ray nucleon interaction with high energies, estimating transition probability and interaction cross section of baryon in passive state 24 p4263 A66-42519

Unambiguous transition probability densities describing inhomogeneous stochastic continuous-to-right Markov processes with finite number of states 24 p4232 A66-43021

TRANSLATIONAL MOTION

Diatomic molecules, discussing interrelation between vibrational relaxation and thermal dissociation 04 p0597 A66-13878

Vibrational excitation effect in hydrogen-deuterium exchange 05 p0718 A66-15156

Motion of orthogonal trihedron, determining accurately angular position in translational motion relative to coordinate system 08 p1249 A66-18878

Influence on stability of masses which are in relative motion with respect to projectile determined, noting engine thrust effect on attitude control system performance 10 p1611 A66-21386

Equations for translatory motion of lifting body moving at hypersonic speed, considering Earth sphericity, noting effect of centrifugal forces 13 p2193 A66-26448

Pressure in sealing groove and increase time due to pumping action of moving wall applied to force cylinder of translational motion, considering liquid in groove laminar 14 p2225 A66-27688

Classical/quantum views of nonequilibrium gas flow equations with arbitrary number of relaxation times 19 p3340 A66-35738

Matrix equations of rigid-body motion for general vibration isolation system, analyzing conditions for decoupling translational and rotational motions 21 p3770 A66-38650

Attitude, translation and descent engine control for attitude and position control of LEM 21 p3808 A66-39518

Acoustic resonance tube used to change radiation to sound 24 p4213 A66-42854

TRANSLUCENT MATERIAL

Fabrication and properties of translucent bodies of hot-pressed alumina, beryllia and

magnesia with data on density, microstructure, thermoconductivity, etc 07 p1054 A66-18502

Transmission energy spectra of 1-mev electrons with normal incidence on Al slabs measured in terms of transmission angle 15 p2543 A66-28715

Devices and operating principles for transmitting motion into vacuum 19 p3362 A66-35317

Optical properties of cryptocyanine noting transient decay of fluorescence, using ruby laser and transmission of methanol solution 22 p3932 A66-40103

TRANSMISSION EFFICIENCY

Optimum signal shape for transmission of discrete information, discussing signal-noise characteristics 04 p0488 A66-14414

Optimal pulse shape determined for signal which gives maximum response energy in ideal limiter filter system 07 p1001 A66-17354

Optimum realizable transmitter waveforms for high-speed data transmission, noting application to low pass filter channel 13 p2019 A66-25146

Variable premodulation gain to multichannel transmission system for which AM baseband power is proportional to cumulative channel activity, showing improvement of SNR 13 p2020 A66-25151

Comparison of maximum capacities of various transmission lines, noting advantages of symmetrical bandpass line over coaxial or asymmetrical lines 14 p2250 A66-27146

Transmission and reflection coefficients of semiconductors and insulators for use in visible and IR spectral regions 14 p2334 A66-27334

Density ratio and transmission probability across conical converging diffuser in free-molecule flow with selected range of speed ratios, using Monte-Carlo method 14 p2219 A66-27416

Quantum mechanics calculation of transmission functions of rotational band of water vapor for 8 spectral regions at 20 to 50 micron wavelengths 14 p2326 A66-27538

Electromagnetic wave reflection and transmission coefficients for moving dielectric slab as function of velocity of medium 14 p2239 A66-27761

Radiation efficiency of short whip antenna with loading coil cooled to 77 degrees K and 4.2 degrees K at approximately 20 mc frequency 14 p2257 A66-27925

Antenna cost, efficiency, noise, minimum detectable signal and signal temperature relationships 14 p2257 A66-27928

Parametric amplification in selective RC-circuit depends on pumping amplitude and phase shift between input-signal voltage and pumping voltage 15 p2475 A66-29930

Propagation disturbances causing degradation of performance of space instrumentation and communication links, noting types of space channels, plasma and multipath effects, etc 16 p2650 A66-30555

Transmittance of optical materials between 1050 and 3000 angstroms, noting effect of simulated high energy space environment 17 p2979 A66-32615

Transmission characteristics of Fabry-Perot aluminum-magnesium fluoride-aluminum interference filters in far UV region, noting preparation methods, optical properties, etc 17 p2958 A66-32617

Matrix technique used for derivation of reflection and transmission coefficients of bounded plasma slab, noting wave

propagation 19 p3305 A66-36419

Solid laser radiation operating in Q-switched resonator regime noting effect of finite rate of switching, finiteness of relaxation time, transmission coefficient factor, etc 20 p3576 A66-37142

Quantum mechanics calculation of transmission functions of rotational band of water vapor for eight spectral regions at 20 to 50 micron wavelengths 24 p4234 A66-42324

SA WAVEGUIDE

Open periodic structures applied as high power limited passband loss filter in microwave radar and communications transmitters 01 p0044 A66-10935

Intermediate text on fields and waves in communication electronics covering basic equations, oscillating systems, transmission lines, waveguides, microwave circuits, etc 01 p0031 A66-10977

Comparison of inflector unmatched with line with matched one using additional capacitors, showing both devices have identical electric and time characteristics 01 p0046 A66-11057

Basic emitter coupled logic gate provides fastest nonsaturating gate for high speed computer 01 p0048 A66-11142

Load resistance effect on selectivity of notch filters using hyperbolically shaped RC lines 02 p0200 A66-11876

Integrated logic circuits for high speed digital systems, noting transmission line connection between gate and amplifier 02 p0204 A66-11938

Transmission-line model of insulated-gate field effect transistor /MOS transistor/ in pre-pinchoff mode, determining small signal response 02 p0205 A66-11980

Nonreactive high-voltage pulse resistors, applying transmission line principles and noting Chaperon winding 03 p0341 A66-12575

Transmission modes in grooved guides, calculating cut-off frequency and attenuation 03 p0346 A66-13326

Working characteristics of transmission channel, calculating relationships between probability characteristics and output signal to noise ratio, considering band filter 04 p0496 A66-13903

Frequency stabilization for narrow band microwave oscillators, using supplementary resonator connected by transmission line with basic resonator of oscillator 04 p0496 A66-13904

Variational techniques for synthesis of optimum nonuniform transmission lines 05 p0652 A66-14576

Nanosecond electromagnetic pulse dispersion in longitudinally magnetized plasma confined in coaxial transmission line 06 p0826 A66-16026

TEM-mode coupled-transmission-line directional couplers, determining equal-ripple polynomials and tabulating parameters 06 p0844 A66-16084

Lossless multiconductor transmission line model extended for description of gyromagnetic coupling 06 p0846 A66-16094

Numerical solution to Laplace equation in two dimensions, subject to boundary conditions imposed by conducting surfaces and dielectrics, applied to transmission line problems 06 p0846 A66-16097

Reentrant directional coupler using strip transmission, noting coaxial coupler 06 p0847 A66-16099

Coaxial transmission line with adjustable harmonic phase delay equalizer network 06 p0848 A66-16105

Four formulas for Kuroda identities for band pass and band stop transmission line filters, noting role of transient response 06 p0854 A66-16685

Impedance of growing wave in interaction region used to calculate minimum value of traveling wave tube noise coefficient 06 p0837 A66-17190

Microstrip transmission on semiconductor dielectrics provide high quality interconnection between microwave

functions 07 p1007 A66-17505

Digital latching phase shifter which combines submicrosecond switching with compact ferrite strip transmission line structure 07 p1007 A66-17506

Signal propagation on infinite lossless transmission line in quantum field terms, finding total Hamiltonian of system 07 p1046 A66-18403

Solid-dielectrically loaded strip transmission line techniques extended to Ku-band region 08 p1192 A66-18946

Reversible lossless octopoles with various symmetries, describing method for determining eigenvalues of electrical circuit 08 p1192 A66-19104

Microwave frequency feedthrough for vacuum systems suitable for use up to X-band, using Teflon-filled rigid type coaxial line 08 p1197 A66-19700

Transient processes in thin open-loop and closed-loop antennas studied by method that takes transmission line processes into account 08 p1199 A66-19759

Formation and expansion of electromagnetic shock waves in communication lines, using ferroelectric crystals 09 p1344 A66-20346

Characteristics of quasi-optical conduction millimeter wave resonator with gas, showing resonance absorption 09 p1381 A66-20492

Strip transmission line for microwave circuit design such as varactor multiplier frequency sources, filters, multiple pole diode switches, etc 09 p1356 A66-20672

Scattering range which measures reflection properties of objects by inserting them into transmission line 10 p1501 A66-21624

Microwave circuit design using strip transmission line, noting single-sideband suppressed carrier modulator, tunnel diodes in low-noise amplifiers, etc 10 p1512 A66-21757

Impedances of offset parallel-coupled strip transmission lines analyzed by conformal mapping techniques 10 p1514 A66-21906

Parallel-strip point-contact diode mount evaluated for video detection of millimeter waves 10 p1514 A66-21909

Propagation of quasi-TEM mode in ferrite-filled coaxial line 10 p1506 A66-21913

Lumped-parameter analogs of nonuniform RC distributed networks and lossless transmission lines 11 p1675 A66-22388

Thin nonrectilinear electron beam interaction with electromagnetic field of waveguide transmission line 11 p1655 A66-22723

Beam waveguides for long distance electromagnetic wave transmission at optical wavelengths described by theory of focusing antennas 11 p1656 A66-22737

Algorithm for data transmission system automatic adaptive equalization, employing change of settings during transmission in response to variation in transmission channel characteristics 11 p1656 A66-23088

Dielectric layers of alternating low and high dielectric constant used as filters in millimeter wave, IR and optical regions 12 p1831 A66-23906

Plane wave shielding effectiveness of vacuum deposited thin films, using section of air-filled coaxial transmission line 12 p1835 A66-24142

Comparison of maximum capacities of various transmission lines, noting advantages of symmetrical bandpass line over coaxial or asymmetrical lines 14 p2250 A66-27146

Approximate engineering method of calculating coaxial and artificial ferrite containing lines and artificial ferrite containing lines shaping high power video pulses with fronts of nanosecond duration 14 p2236 A66-27238

Impedance transforming compensated balance to unbalanced line transformer /balun/, discussing bandwidths 14 p2258 A66-27959

Design of lossless junction, given one row in scattering matrix 14 p2268 A66-27965

Epitaxially grown junction as nonlinear transmission line 14 p2260 A66-28168

Nonuniform transmission line generalization, noting application to proportional networks, exponential and Bessel lines 15 p2471 A66-29325

Fabrication of interconnections for

integrated circuits operating at microwave frequencies 16 p2665 A66-31433

X-band strip transmission line tunnel diode amplifier 16 p2667 A66-31648

Transient processes analyzed in traveling wave converters on long-line section, taking first-order reflection into account 17 p2888 A66-32705

Current wave form observation in GaAs, using transmission line concept and pulse splitting technique 17 p2983 A66-33109

Enhancement mode MOS-FET HF thermal noise in drain and gate analyzed, using channel transmission line model 17 p2997 A66-33462

Scattering matrix properties of symmetrical octupoles 17 p2898 A66-33519

Continuous wave power ratings of strip transmission lines, noting temperature profile parameters, power limit curves, etc 18 p3077 A66-34062

Time domain method of relating cross coupling between transmission lines of multilayer structure to geometry in design of high speed digital systems 18 p3090 A66-34071

Maximum and minimum power absorbed by antenna connected through coaxial transmission line to transmitter under unmatched conditions 18 p3078 A66-34168

Standard parallel wire susceptibility testing on signal lines at component and/or subsystem level 18 p3078 A66-34170

Impedance of growing wave in interaction region used to calculate minimum value of traveling wave tube noise coefficient 19 p3297 A66-35548

One-port log-periodic circuits, determining conditions for which phase of input reflection coefficient varies linearly with logarithm of frequency 19 p3324 A66-35717

HF electric power transmission lines in aircraft noting effect of frequency, ground plane elevation and feeder configuration on impedance 20 p3499 A66-37190

Jet aircraft electric power system performance affected by transmission line impedances 20 p3499 A66-37191

Working characteristics of transmission channel, calculating relationships between probability characteristics and output signal to noise ratio, considering band filter 20 p3531 A66-37861

Frequency stabilization for narrow band microwave oscillators, using supplementary resonator connected by transmission line with basic resonator of oscillator 20 p3532 A66-37862

Tropospheric radio wave propagation field strength measurements and attenuation differences among various mixed land and sea transmission paths 20 p3520 A66-38144

Iterated theoretical admittance of cylindrical antenna, determining effective length and approximating ideal independent susceptance 20 p3534 A66-38365

Matrix quadratic equation solution derivation applied in finding steady state solutions of Riccati differential equations with constant coefficients 21 p3755 A66-38598

Equations for homogeneous transmission line with distributed noise generators 21 p3746 A66-38831

Nonuniform line synthesis for lossless uniform segments of equal length loaded with real resistance 21 p3719 A66-39380

Surface effects at interface between linear and nonlinear media representing transmission lines of low pass filter type 22 p3861 A66-39656

Hybrid junction diplexer connecting transmitter and receiver to common antenna 22 p3873 A66-39784

Book on foundations for microwave engineering 22 p3875 A66-39993

Pulsed coaxial transmission line nitrogen gas laser, noting pressure effect 22 p3932 A66-40107

Cascaded hybrid rings as idealized model of wideband dispersive system in stripline 23 p4035 A66-41026

Synthesis of prescribed frequency/group delay characteristics, using passive microwave components 23 p4035 A66-41027

Thin nonrectilinear electron beam interaction with electromagnetic field of waveguide transmission line 23 p4037 A66-41461

Beam waveguides for long distance electromagnetic wave transmission at optical wavelengths described by theory of focusing antennas 23 p4037 A66-41475

Diffusion controlled breakdown theory applied to compute breakdown potential of helium in coaxial geometry by solving continuity equation 23 p4105 A66-41584

Microminaturization of microwave circuits by synthesis and implementation of passive network functions in distributed parameter form, using strip transmission line as circuit element 23 p4046 A66-41585

TRANSMISSION LOSS

Plasma sheaths on radiation patterns of antennas on hypersonic vehicles, noting permittivity and transmission loss 04 p0474 A66-13426

Irregularities of iris type beam waveguide, noting transmission loss during principal lightwave propagation 11 p1712 A66-22736

Transhorizon VHF propagation over ground-air paths and transmission loss 13 p2020 A66-25216

Optimum shape of multimode rectangular waveguide transition by comparing smoothed with stepwise transition 14 p2251 A66-27239

Permanent magnetized ferrite antenna waveguide windows for improving EM wave transmission through plasma and reducing transmission losses during reentry 14 p2241 A66-27930

Transmission loss in whistler mode of propagation of VLF radio waves for path portion underneath ionosphere, using geometrical optics 16 p2652 A66-30709

Propagation characteristics of whistler mode radio signal over one-hop path from transmitter magnetic conjugate point to far-away receiver, noting transmission loss 16 p2652 A66-30710

Multiple diffraction of microwaves over knife-edge obstacles, obtaining path loss 19 p3304 A66-36410

Gain loss ratio between one antenna and two antennas used to analyze antenna gain loss for long-range tropospheric propagation of ultrashort waves 20 p3325 A66-37124

Microwave transmission power loss for electromagnetic propagation through bounded solid state plasma waveguide in transverse magnetic field 21 p3703 A66-38755

AC losses and magnetic field aberrations associated with use of high-field superconducting wire in adiabatic demagnetization apparatus 21 p3804 A66-39381

Microwave-frequency waveguide losses minimized by controlling effects of geometry, propagation mode, construction materials, surface finish and surface contamination 22 p3874 A66-39992

Irregularities of iris type beam waveguide, noting transmission loss during principal lightwave propagation 23 p4078 A66-41474

Dual transverse electric mode cavity preselector loaded with large nonferrous metallic perturbation 24 p4179 A66-42102

Tropospheric propagation using laser as transmitter, analyzing effects of Benard cells, turbulence, wind shear, etc 24 p4171 A66-42367

Precision DC potentiometer test for measuring microwave coaxial or waveguide insertion loss 24 p4182 A66-42577

Rain effect on satellite communications Earth terminal rigid radomes, determining transmission loss and water film thickness 24 p4192 A66-43195

TRANSMITTANCE
SA SCATTERING

Twofold phase modulation in meters of microwave reflection and transmission coefficients 09 p1345 A66-20446

Excitation, internal reflection and limiting polarization of whistler waves in lower ionosphere, establishing reciprocity relation between incident waves from above and below 11 p1651 A66-22369

Apparatus producing monochromatic radiation for measuring reflection and transmission coefficients composed mainly of semiconductor multiplier and quasi-optical system separating radiation of individual harmonics 11 p1708 A66-23288

Harmonic linearization of logic law control systems, deriving complex equivalent

transmission coefficient for nonlinear part of circuit with variable structural elements 13 p2045 A66-25299

Transmission and reflection coefficients of semiconductors and insulators for use in visible and IR spectral regions 14 p2334 A66-27334

Density ratio and transmission probability across conical converging diffuser in free-molecule flow with selected range of speed ratios, using Monte-Carlo method 14 p2219 A66-27416

Quantum mechanics calculation of transmission functions of rotational band of water vapor for 8 spectral regions at 20 to 50 micron wavelengths 14 p2326 A66-27538

Electromagnetic wave reflection and transmission coefficients for moving dielectric slab as function of velocity of medium 14 p2239 A66-27761

Trisants 1 to 5 chemical composition and far IR transmittance measured by vacuum grating spectrometer 15 p2524 A66-28847

Lumped-constant filters whose bandpass depends only on one parameter of transmission coefficient, having lower bandpass for given transient process delay time 15 p2464 A66-29120

Number transmission coefficients for isotropically incident electrons determined for spacecraft shield design [ATAA PAPER 66-511] 16 p2811 A66-31497

Optical thickness effect on monochromatic directional transmittance and emittance of isothermal dielectric surrounded by air 18 p3134 A66-33991

X-ray absorption edge observation by transmittance measurements through thin unbacked metal films in XUV as function of wavelength 20 p3613 A66-37275

Aerosol component of spectral transmittance of artificial fog, comparing calculated and experimental values for absolute attenuation factor 21 p3759 A66-38916

Fog transmittance attenuation factor, comparing photometric values and values calculated from microstructural observations, using flow trap 21 p3759 A66-38917

TRANSMITTER

SA CONDUCTOR
SA MULTICHANNEL TRANSMITTER
SA RADIO TRANSMITTER

Transmitters for satellite communications 09 p1345 A66-20545

S-band telemetry transmitter noting size, reliability, efficiency, etc 16 p2659 A66-30550

Nuclear radiation hardened telemetry transmitter in L-band, noting tests and radiation effect problems 16 p2650 A66-30554

FM 10 watt S-band transmitter for space telemetry and data application 16 p2651 A66-30560

Klystron transmitter for ionospheric diffusion soundings, noting method to obtain high stability in output power 16 p2661 A66-30954

Telemetry transmitters using solid state wideband microwave voltage-controlled oscillators operating in S, C and X bands 19 p3316 A66-35683

High-power microwave transmitters for deep-space communication with unmanned spacecraft 19 p3316 A66-35684

Personal telemetry system design and operation 19 p3301 A66-35689

Advances in HF solid state transmitter systems - WESCON, Los Angeles, August 1966 22 p3879 A66-40721

Silicon integrated circuits in rocket telemetry transmitter phase-lock frequency stabilization unit 24 p4180 A66-42262

TRANSOCEANIC COMMUNICATION

Satellites for navigation aids for ships and transoceanic aircraft 05 p0713 A66-15273

Combination of moored ocean platforms and transatlantic submarine telephone cables for VHF communication service and other ATC facilities for civil aircraft across North Atlantic 07 p1002 A66-17775

Combination of moored ocean platforms and transatlantic submarine telephone cables for VHF communication service and other ATC facilities for civil aircraft across North Atlantic 13 p2058 A66-25862

TRANSONIC COMPRESSOR

SNECMA axial flow transonic compressor development during last ten

years 09 p1433 A66-19866
Versatile facility applicable as high-speed
annular cascade wind tunnel or as transonic
axial flow test
compressor 12 p1859 A66-24928
TRANSONIC FLOW
Velocity changes and concomitant losses in
rotating transonic blade
cascade 01 p0005 A66-10213
Transonic flow in throat of plane
axisymmetric nozzle determined by taking
velocity potential in form of power series
and determining coefficients of series from
set of recurrence
equations 01 p0007 A66-10714
Plane transonic gas flow past symmetrical
convex profile at zero angle of attack along
axis of channel with parallel
walls 02 p0176 A66-12171
Closed form solution of axisymmetric
transonic flow about
obstacle 05 p0665 A66-15796
Transonic airfoil problem solved via
differentiation of airfoil thickness ratio by
infinitesimal perturbation method
[AIAA PAPER 66-90] 06 p0802 A66-16410
Local heat transfer to immersed cylinder
in transonic cross flow for gaseous
stream 07 p1150 A66-17581
Sweeping conditions for oblique and
conical shock waves and transonic
flows 07 p1020 A66-17868
Unsteady oscillations of boundary layer
interaction with shock waves in lower
transonic region 07 p1022 A66-18106
Flow function equations for transonic flow
past closed profile
contours 07 p0982 A66-18121
Determination of symmetric flow between
two smooth walls attaining Mach number
maximum value at point on symmetry
axis 07 p0982 A66-18129
Exact partial solutions to transonic gas
flow equations used to describe flow around
shape streamlined by supersonic flow with
additional shock wave 08 p1209 A66-19473
Asymptotic flow at distance from three-
dimensional transonic obstacle showing
increased velocity
potential 13 p1990 A66-25431
Aerodynamic resistance of transonic wing
profile analyzed, using asymptotic flow at
long distance downstream of
shocks 13 p1990 A66-25456
Drag coefficient of gas flow in circular
tube at transonic velocity 13 p2065 A66-26485
Surface pressure on thin two-dimensional
airfoils in transonic flow 15 p2478 A66-29246
Principle function tabulation for plane
transonic flows study by hodographic
method 16 p2686 A66-31034
Transonic flow around airfoils and wing
profiles in uniform asymptotic transonic
stream studied, using hodograph plane and
method for smoothing
results 16 p2629 A66-31040
Transonic stage design in axial
compressor 17 p2838 A66-32310
Bergman integral operator to generate
families of transonic flow patterns which
yield Ringleb pattern as special
case 17 p2909 A66-32498
Transonic nonequilibrium approximations
for reacting gas mixture
flow 17 p2913 A66-33080
Compressibility law corresponding to
Tomotika and Tamada generalized
approximation for transonic flow, noting
Tomotika and Tamada gas 20 p3492 A66-37574
Second approximation of transonic theory
gas laws for thin bodies 20 p3493 A66-37988
Transonic flow in axisymmetric nozzles
with nearly sharp wall curvatures, extending
Friedrich equations 21 p3693 A66-38685
Applicability of inverse blunt-body
computer program /Norair/ to supersonic
and transonic flow
problems 21 p3694 A66-38731
Dynamic stability and transonic flow
response to arbitrary perturbations of solar
and stellar winds in steady
state 21 p3810 A66-39556
Longitudinal viscosity effect in equation
for plane transonic flow for initial stages of
shock formation downstream in
nozzle 22 p3844 A66-40387
Transonic airfoil characteristics correlation
for zero incidence in slotted wall wind

tunnels 23 p4007 A66-40976
Lighthill integral transform methods in
hodograph transformation theory of plane
compressible transonic shock-free potential
flows around airfoil sections in solution
space of Chaplygin equation
[ICAS PAPER 66-26] 23 p4007 A66-41008
Transonic flow in throat of convergent-
divergent nozzle for continuous fluid
acceleration from subsonic to supersonic
velocities 23 p4013 A66-42015
Existence of similar solutions for given
differential transonic equations for free
stream Mach number of
unity 23 p4014 A66-42049
TRANSONIC FLUTTER
Aircraft vibration in transonic region
caused by alleron oscillations, eliminated by
friction dampers 12 p1801 A66-24035
Taper ratio effects on transonic flutter
characteristics of series of thin cantilever
wings with 45 degree sweepback and aspect
ratio 4 13 p2199 A66-26381
TRANSONIC NOZZLE
Gas flow dissipation in transonic plane-
symmetric nozzle, obtaining asymptotic
solutions for flow parameter
equations 07 p0979 A66-17264
TRANSONIC SPEED
Book on transonic and hypersonic flow
theory covering motion and shock equations,
application of Newtonian theory,
temperature effect, behavior of minimum
drag bodies, etc 20 p3492 A66-37495
TRANSONIC WIND TUNNEL
Transonic test section of S-2 wind tunnel
and qualification test to prove good quality
of flow 02 p0210 A66-11205
Transonic wind tunnel investigation of
optimum roll effectiveness of large swept
wing transport aircraft with conventional
and spoiler ailerons
[AIAA PAPER 65-789] 03 p0352 A66-12595
Airfoil section testing at transonic speeds
aimed at extending NACA low-drag airfoil
information 09 p1365 A66-20740
Transonic wind tunnel studies of ground-
wind loads on aeroelastic models of Saturn
launch vehicle, investigating structural
damping, wind velocity and azimuth
angle 14 p2270 A66-28021
Transonic buffeting effects on hammerhead
shaped payloads analyzed, using power
spectral techniques and wind tunnel
tests 20 p3672 A66-38170
TRANSPARENCY
Inhomogeneity, transparency and
ionospheric ion density parameters for
screening and semitransparent sporadic E
layers 12 p1873 A66-24686
TRANSPARENT MATERIAL
Radiative and convective transient heat
transfer for photographic windows of
hypersonic reentry vehicles
[AIAA PAPER 64-251] 03 p0444 A66-12745
Laboratory method for determining
spectral emittance of partially transparent
materials in IR 09 p1380 A66-20362
Weakly focusing transparent media
properties and guided transmission of
coherent light beams with relatively small
loss 11 p1657 A66-23091
Statistical effects during generation of
second harmonic in optically transparent
crystals, noting coefficient of correlation
between harmonic and fundamental radiation
power of solid state laser 16 p2747 A66-31167
Laboratory method for determining
spectral emittance of partially transparent
materials in IR 19 p3353 A66-35320
Thermoelastic wave equations in continuum
mechanics model of laser-induced fracture
in transparent media in terms of laser beam
energy absorption 22 p3931 A66-40089
Remission factor of nonradiating /ethylene
polyterephthalate/ cellular structure and
transparency to visible
radiation 22 p3852 A66-40246
Transmission of materials suitable for
transparent covers of solar stills is nearly
constant for angles of incidence less than
critical value 22 p3852 A66-40511
TRANSPARATION
SA EVAPORATION
SA FLUID TRANSPARATION
Thermal transpiration analysis with various
gases, testing relation between translation
component of thermoconductivity coefficient

and maximum transpiration effect for
particular gas, obtaining rotational collision
numbers 11 p1787 A66-23214
TRANSPARATION COOLING
Arc temperature field with transpiration
cooled anode in argon atmosphere measured
by spectroscopy, noting semiluminous region
[AIAA PAPER 65-94] 02 p0303 A66-11538
Temperature distribution in porous tube,
examining transpiration cooling as thermal
protection to surfaces exposed to high
temperatures 03 p0445 A66-12806
Insulating materials, discussing
impregnated refractory ceramic foams for
high energy hybrid
motors 06 p0899 A66-16293
Parameter predicting transition from low
to medium blowing rate in arc with
transpiration cooled
anode 08 p1168 A66-19156
Effectiveness and heat transfer coefficients
with transpiration of distilled water and air
examined across porous
plate 08 p1320 A66-19558
Turbulent flow process in transpiration
cooling through study of uniform fluid
injection along porous tube
[ASME PAPER 65-APM-29] 12 p1862 A66-23969
Transpiration cooling of hemispherical
models in arc jet wind tunnel to obtain
mass injection effects into boundary layer
of aerodynamic
configuration 14 p2412 A66-27446
Turbulent heat transfer measurements on
transpiring flat plate in Mach 8 tunnel using
nitrogen, helium and argon as injection
gases 17 p2838 A66-32439
Transient temperature response of
transpiration-cooled porous matrix entering
planetary atmosphere with constant velocity
and negative entry angle 21 p3821 A66-39455
Characteristics of plasma generator with
transpiration-cooled porous electrode, noting
related heat transfer
studies 24 p4161 A66-42263
TRANSPONDER
Communications satellite transponder
discussing system requirements for RF
conversion and
amplification 04 p0492 A66-13595
Air traffic control transponder
performance preflight test set, ground-based
equipment for fast and positive
checkout 11 p1732 A66-22898
Spacecraft transponder with reentrant
mode TWT amplifier 12 p1836 A66-24158
LEM rendezvous radar for tracking
transponder on lunar surface or on
Command Module 21 p3714 A66-39523
Lunar Excursion Module rendezvous radar
and transponder
receivers 21 p3715 A66-39526
TRANSPONDER CONTROL GROUP /TCG/
Radar for tracking satellites and space
vehicle, considering transponder beacons
and comparing pulsed and CW
systems 04 p0487 A66-14131
TRANSPORT
S GAS TRANSPORT
S JET TRANSPORT
S SUPERSONIC TRANSPORT
TRANSPORT AIRCRAFT
SA AIR TRANSPORTATION
SA BAC 111 AIRCRAFT
SA BOEING 733 AIRCRAFT
SA BREGUET 941 AIRCRAFT
SA CANADAIIR CL-84 AIRCRAFT
SA CONCORDE AIRCRAFT
SA DE HAVILLAND DHC-5 AIRCRAFT
All-weather landing system for C-141 jet
cargo transport using vertical navigation
computer for military
operations 01 p0101 A66-10035
Handling stability and control research in
development of STOL utility transport
aircraft
[AIAA PAPER 65-713] 01 p0013 A66-10950
Development of air transport in East
Germany after World War II including route
charts of Lufthansa 01 p0170 A66-11071
Controls, systems and equipment of five
different configurations of FIAT G 222
V/STOL transport aircraft for Italian Air
Force 02 p0177 A66-11868
High reliability hybrid navigation system
for transport aircraft using integrating
subsystem and external position fixing

subsystem 02 p0257 A66-12038
 VTOL aircraft application to short haul aircraft, supersonic transports and space launchers 02 p0178 A66-12219
 Arresting transport type aircraft, preventing overshooting runways, noting field tests 02 p0179 A66-12222
 Transonic wind tunnel investigation of optimum roll effectiveness of large swept wing transport aircraft with conventional and spoiler ailerons [AIAA PAPER 65-789] 03 p0352 A66-12595
 Slender wing research and short-range transport operation are among studies at Royal Aircraft Establishment 03 p0321 A66-12885
 Aerodynamic design of Boeing 737 covering data of analytical studies, wind tunnel and flight tests, aerodynamic parameters and drag, flap system size, efficiency, wing geometry and handling qualities [AIAA PAPER 65-739] 03 p0321 A66-13047
 Boeing Lower Minimums Program in terms of certified components and systems for Category II and for Automatic Landing [AIAA PAPER 65-765] 03 p0390 A66-13060
 V/STOL transport aircraft noting productivity, flexibility, simplicity, economy of numbers, low fleet cost, high speed and turbofan propulsion 03 p0322 A66-13269
 Radioactive contaminant detection on surface of high altitude transports, noting passenger protection 04 p0458 A66-14462
 Design of landing gear for military cargo aircraft and supersonic transports 07 p0985 A66-17255
 Self-contained and ground-based aids to integrated air navigation system noting costs, crew, display, etc, to be used in SST at VLF 07 p1074 A66-17772
 Principal civil aircraft at 26th Aeronautical and Space Exhibition, detailing AN 22 Antaeus cargo aircraft 07 p0989 A66-17820
 Aircraft in economics of European mail transportation 09 p1473 A66-20551
 XC-142A V/STOL transport aircraft with four-ton payload and 200 nautical mile range radius [AIAA PAPER 64-775] 09 p1330 A66-20735
 Feasibility of using Elliott Automatic Landing System, developed for medium-haul aircraft, on short-haul aircraft 10 p1553 A66-21361
 Short-haul aircraft design for low direct operating costs, noting various wings 10 p1482 A66-21364
 Onboard equipment designed for transport aircraft landings with visibilities less than 200 ft and runways less than 2600 ft, having all devices duplicated 10 p1554 A66-21368
 Lockheed C-5A military jet transport design 11 p1636 A66-22332
 Weight empty estimation methods evaluated for transports and bombers ranging in weight from 78 to 488 klb 11 p1783 A66-23002
 Takeoff load distribution predetermination for commercial transport craft based on appropriate weight ratios 12 p1800 A66-23784
 Handling stability and control research in development of STOL utility transport aircraft [AIAA PAPER 65-713] 12 p1801 A66-24094
 Control problems in operation of transport aircraft noting degrees of freedom, computer aid, human factor, etc 13 p2047 A66-25497
 Large transport aircraft design, examining effect of high horizontal stabilizer location on vertical fin [AIAA PAPER 65-331] 13 p1994 A66-25588
 ATA direct operating cost formula for transport aircraft, considering flying operations, maintenance, depreciation and indirect costs [SAE PAPER 660280] 14 p2222 A66-27289
 Pilot techniques for control of passenger transport aircraft during CAT or thunderstorm 15 p2426 A66-28935
 Aircraft navigational error parameters combined statistically and used to evaluate wander expected in transport aircraft operating in transoceanic environment 15 p2535 A66-29624
 Air cargo - International Forum, Chicago, May 1966 15 p2619 A66-29788
 Air cargo techniques applied to movement of retail merchandise 15 p2620 A66-29792

Military air cargo transport technology and logistic systems 15 p2620 A66-29793
 Air cargo transport development, air freight classification and inventory balancing 15 p2620 A66-29794
 Operational, technical and commercial aspects of air cargo handling and effect on sales 15 p2620 A66-29798
 Dual-purpose passenger/cargo aircraft noting design, passenger interior system, cargo handling system, compatibility, comparisons, etc 15 p2426 A66-29802
 Aircraft design for large cargo transport noting aerodynamic efficiency, wing construction, cargo loading, cost estimates, etc 15 p2426 A66-29803
 Super airport planning concepts, satellite and unit terminal, stress decentralization to meet changing demands and increased volume of air traffic [SAE PAPER 660282] 15 p2476 A66-29826
 Effect of VTOL size on operational cost per ton-mile, noting mission weight vs payload variations, comparison of fuel consumption of STOL, time savings, etc [SAE PAPER 660316] 15 p2428 A66-29840
 New high by-pass ratio turbofan engine for C-5A subsonic transport aircraft [SAE PAPER 660323] 15 p2428 A66-29843
 Transportation developments for airport planning, emphasizing need to limit carrier transport service to single airport 16 p2682 A66-31283
 First-stage propulsion of aerospace transporter, discussing design and operational requirements 17 p2990 A66-32377
 Heavy equipment short-range transportation with crane-type helicopters, noting correlation between lift capacity and aircraft weight 17 p2845 A66-32739
 Loading considerations in design of large helicopters for transport of externally suspended cargo 17 p2845 A66-32741
 Flying qualities and aircraft control during tandem rotor helicopter external sling load operations 17 p2846 A66-32742
 Transport aircraft economics of load factor and wasted seat problem 17 p2846 A66-32795
 Palletized cargo systems, transit time reduction and ground support system data handling and documentation 17 p2846 A66-32844
 Airframe structure and power plant configuration effects on transport V/STOL performance 17 p2846 A66-32885
 Future civil VTOL aircraft potentialities and limitations 17 p2846 A66-32886
 Military V/STOL transport aircraft design, capabilities and cost 17 p2846 A66-32887
 Optimum high payload laminar flow control aircraft offer 20 to 25 percent range improvement, indicated by design studies of large logistics aircraft 18 p3053 A66-34952
 Automatic self-monitor techniques for attitude and heading reference systems 20 p3596 A66-37188
 Airdrop, delivery of personnel, supplies and equipment from aircraft in flight, increased effectiveness through new family of low-cost cargo parachutes, ballistically deployed reserve parachute and extraction-force transfer coupling 22 p3850 A66-40614
 Locating general drop zone and desired impact point, identifying receiving unit and dropping supplies for aerial delivery systems 22 p3850 A66-40615
 Dropping heavy stores from low altitude aircraft, considering stability of store after leaving aircraft and rebound from impact with ground 22 p3850 A66-40616
 Handley Page H.P. 137 jetstream short-haul transport aircraft 23 p4015 A66-41162
 Passenger and cargo aircraft development 23 p4152 A66-41647

TRANSPORT COEFFICIENT

Vibrational relaxation model of high temperature gas to determine dissipative coefficients in highly nonequilibrium gas mixtures with binary collisions 04 p0455 A66-14140
 Transport coefficients of intrinsically conducting InSb above room temperature in magnetic field of medium strength 04 p0566 A66-14288
 Cohen theory of square cascades and countercurrent separation processes for thermal diffusion

columns 04 p0598 A66-14311
 Boltzmann-Landau equation to calculate transport coefficients of moderately dense quantum gases 04 p0549 A66-14477
 Transport coefficients of n-indium arsenide to calculate electron concentration, mobility and three-band scattering mechanism 04 p0570 A66-14488
 Transport coefficients derivable from 13, moment approximation for two-component plasma in satisfying Onsager relationship 04 p0558 A66-14499
 Galvanic and thermomagnetic coefficient of undoped polycrystalline p-type GaSb sample in weak magnetic field, emphasizing hole mobility 04 p0571 A66-14499
 Electromagnetic conductivity of superconducting alloys in critical regions in high magnetic fields 07 p1108 A66-18431
 Differences in spherical intermolecular potentials of hydrogen and deuterium determined from reanalysis of second-virial coefficient data 08 p1258 A66-18940
 Book on kinetic theory of simple liquids including equilibrium properties, time dependent system, Markov processes, Brownian motion, transport coefficients, etc 08 p1209 A66-19461
 Size-effect problem affecting charge transport coefficients in thin films 09 p1428 A66-20577
 Nonstationary contributions to transport coefficients, especially bulk viscosity coefficient, combine with stationary ones yielding result equivalent to that provided by autocorrelation function theory 12 p1916 A66-23617
 Kinetic theory of dense gases generalized for all orders, deriving integral equations for transport coefficients and showing temperature dependence of bulk viscosity 12 p1979 A66-24565
 Transport coefficients of moderately dense gas calculated by three methods based on correlation function or generalized Boltzmann equation 12 p1979 A66-24586
 Binary-collision expansion for viscosity of two-dimensional gas of hard disks, showing dynamical origin of divergence appearing in first correction of Boltzmann equation 13 p2136 A66-26276
 Various applications of plasma transport coefficients 14 p2343 A66-27505
 Integral equations derived from correlation functions, determining transport coefficients in classical fluid, formally valid to general order in density 14 p2276 A66-27635
 First order in density corrections to transport coefficients of moderately dense gas /viscosity and thermoconductivity/, using Boltzmann equation 14 p2276 A66-27636
 Integral equations defining transport coefficients of moderately dense gas obtained from Boltzmann equation shown to be identical to first order in density, with results obtained by autocorrelation function method 14 p2276 A66-27639
 Chapman-Enskog method applied to equations obtained when Bogoliubov functional assumption is introduced into BBGKY hierarchy, determining transport coefficients 14 p2276 A66-27640
 Transfer coefficients of charged particles trapped in magnetic field of Earth studied, examining concept of sudden pulses as basic mechanism 19 p3451 A66-35260
 Divergence of third-order term in density expansion of quantum-mechanical transport coefficients analogous to that for classical systems 19 p3401 A66-36173

TRANSPORT EQUATION

Nonlinear difference schemes for hyperbolic equation applied to solution of one- and multidimensional transport and quasi-linear equations 01 p0095 A66-11013
 Equatorial F-region electron density distribution is natural steady state distribution for charged fluids as shown by momentum transport equation for charged gaseous fluids 03 p0364 A66-12678
 Dependence of vertical structure parameters of atmospheric temperature and humidity fields on atmospheric long-wave radiation field, noting transport equation 04 p0542 A66-14303
 Derivation of plasma transport equation 05 p0726 A66-15244
 Chapman-Cowling formalism used to obtain

transport equations for charged particle species in low energy three-component two-temperature plasmas 05 p0727 A66-15540

Resolvent kernel for class of integral operators with difference kernels on finite interval for transport processes 10 p1549 A66-21301

Multidimensional radiation transport equations for nonscattering quasi-equilibrium gray gas obtained by spherical harmonic approximation [AIAA PAPER 65-81] 10 p1621 A66-21774

Neutral disparate mass mixtures, replacing Boltzmann collision integrals by relaxation-type kinetic models with model equation terms ordered according to mass ratio, deriving two-fluid transport equations 10 p1523 A66-21802

Tropospheric wave propagation, splitting and scattering, transport equation, diffusion, Fokker-Planck approximation, etc, for random continuous medium 11 p1654 A66-22634

Boltzmann transport equation solution for electrons in ionized gas with nonuniform electron concentration gradient 12 p1916 A66-23728

Transport equation for germanium-gallium arsenide-iodine system and epitaxial vapor growth preparation of GaAs-Ge heterojunction by closed tube process 13 p2161 A66-25185

Mathematical representation for transport phenomena in living organism 13 p2011 A66-26578

Transport equation for classical unstable electron plasma extended to quantum mechanical multicomponent case, rewriting kinetic equation 13 p2155 A66-26674

Finite difference solution of nonlinear boundary value problem of Landau-Vlasov equation for charged particle for Maxwellian distribution function 14 p2344 A66-27625

Dependence of vertical structure parameters of atmospheric temperature and humidity fields on atmospheric long-wave radiation field, noting transport equation 14 p2327 A66-28217

Multidimensional generalized transport equations solutions and calculation by difference methods 16 p2732 A66-30240

Poiseuille flow of rarefied gas in annular tube analyzed numerically for inverse Knudsen number, using Bhatnagar-Gross-Krook model and transport integro-differential equation 18 p3102 A66-34920

Energy band structure, carrier behavior and characteristic curve of p-n junction diode at high-current level, solving transport and Poisson equations 19 p3312 A66-35346

Plasma model representing phenomena occurring in cesium thermionic converters operating in collisional ignited mode 19 p3406 A66-35429

Chapman-Cowling formalism used to obtain transport equations for charged particle species in low energy three-component two-temperature plasmas 22 p3955 A66-40096

Dissipative mechanism in cylindrical plasma confined by axial magnetic field noting coefficients, linear transport relations, equations of change, Chapman-Enskog expansion and anomalous effects 24 p4246 A66-43112

TRANSPORT PROPERTY

SA DIFFUSION

SA HEAT TRANSFER

SA KINETIC THEORY

Equilibria and stability of confined arc column noting electron temperature, temperature gradients and radiative transport [AIAA PAPER 65-541] 01 p0109 A66-10182

Equilibrium radiative transport properties of high temperature air coupled with aerodynamic flow field generated by planetary reentry vehicles 01 p0163 A66-10784

Argon arc stabilized by cooled walls, considering radiation calculated with aid of dependences describing transport properties of argon plasma 02 p0265 A66-11390

Hall coefficient, electric resistance and thermoelectric power in indium-rich solid solutions measured at various pressures and at 110 degrees C 06 p0922 A66-16172

Electron irradiation and thermal effects on electrical transport properties of n-type II-

VI semiconductors 06 p0935 A66-17131

Parameters of complex energy bands in semiconductors determined by free carrier Faraday rotation, Voigt effect and transport properties 09 p1426 A66-20191

Nonequilibrium transport properties and electron relaxation at cooled surface of partially ionized argon 10 p1559 A66-21270

Electrical conduction behavior of laminar arc-heated flow in contact with cooled anode, noting anode current parameters [AIAA PAPER 66-188] 10 p1561 A66-21435

Transport properties of III-V and II-VI semiconducting compounds with zincblende structure under uniaxial stress, calculating galvanomagnetic coefficients, Faraday effect, plasma frequency, etc 10 p1578 A66-21665

Boltzmann equation for Gunn effect in GaAs, discussing scattering processes, unjustifiability of use of drifted Maxwell distribution, etc 10 p1583 A66-22067

Transport properties, thermoconductivity, molecular collision and viscosity of polyatomic gas of circular cylindrical molecules with hemispherical caps 11 p1741 A66-23215

Interaction potential of inert gases defined in terms of transport properties, noting contribution of nonadditivity to static lattice energy 12 p1917 A66-23936

Instability criterion in air, argon and carbon dioxide at various pressures and layer depths, detecting convection and determining Rayleigh number for application in transport properties of gases 12 p1980 A66-24942

Multicomponent transport theory to compute cesium plasma transport properties over range of conditions wherein it changes from pure single component gas to mixture and then to completely charged particle gas 13 p2147 A66-25751

Low temperature transport properties of hydrogen, deuterium and HD, noting quantal phase shift, intermolecular potentials, etc 14 p2414 A66-27973

Conduction band in cadmium arsenide semiconductor, measuring transport phenomena 15 p2560 A66-28635

Transport properties in indium antimonide under magnetic field at microwave frequency, showing effect of angular frequency times relaxation time /of electrons and holes/ 15 p2566 A66-29393

Low Reynolds number flow past sphere for cases involving density and temperature variations, noting compressibility, transport properties and viscous dissipation 15 p2425 A66-29740

Measuring and calculating methods for dilute gas transport properties independent of fluid dynamic environment in which they operate 16 p2825 A66-30306

Hydrostatic pressure effect on energy gap, carrier concentration and electron and hole mobilities of indium antimonide 16 p2784 A66-31447

Transverse magnetic field effects on heat transfer in turbulent flow of mercury in circular iron tube 18 p3145 A66-34109

Lennard-Jones potential application to properties of simple gases, noting values of second and third virial coefficients, molecular interaction, collision integrals, etc 18 p3140 A66-34926

Transport properties of ionized monatomic gases, using Chapman-Enskog-Burnett approximation method for determination of thermal conductivity, diffusion coefficients and viscosity 18 p3149 A66-34927

Formation of sporadic E layer in middle latitudes due to transport phenomenon and local production phenomenon 19 p3346 A66-35589

Electrical resistance and Hall effect measurements in layer structures, confirming existence of interaction with optical relaxation vibration modes 19 p3446 A66-36343

Particle size distribution, aging effects, terminal velocity measurements and production techniques of slush hydrogen investigated as potential upgraded spacecraft fuel 20 p3676 A66-37075

Anomalous photocurrent generation in transistors, noting carrier generation and transport processes 20 p3526 A66-37321

Small-scale fluctuations in vertical

distribution of atmospheric ozone analyzed, examining possible transport mechanisms in Southern Hemisphere 20 p3551 A66-37469

Chemical equilibrium in nighttime ionosphere, estimating diffusion coefficients, noting role of transport processes 20 p3554 A66-38207

Chemical kinetics of electron plasma reactions, discussing energy states, ion-molecule reactions, charge transfer, transport properties, phase interactions, etc 21 p3702 A66-38448

Shubnikov-de Haas effect for transport properties of electron gas in magnetic field, noting oscillatory parts of thermal and electric conductivities 21 p3776 A66-38632

TRANSPORT THEORY

SA INTEGRAL EQUATION

Equilibrium thermodynamics from transport theory including interaction studied up to second virial coefficient, determining velocity of first sound and zero sound 01 p0161 A66-10327

Transport effects in semimetals and narrow-gap semiconductors including nonlinear, thermomagnetic and superconductive effects and tunneling 04 p0559 A66-13451

Cylinders in reciprocating harmonic rotation, calculating momentum, heat and mass transfer in forced convective field via perturbation technique [ASME PAPER 65-WA/HT-6] 05 p0791 A66-15654

Book on physical gas dynamics including transport theory, kinetic theory, thermodynamics, equilibrium, fluid flow, radiative transfer, etc 05 p0666 A66-15848

Axial variation of plasma column density in nonuniform axial magnetic field determined by theory for ambipolar diffusion and Boltzmann transport 06 p0917 A66-16649

Transport theory based on relaxation time applied to bismuth, deriving analytic expressions for electric resistance, thermoconductivity and Hall, Seebeck and Nernst coefficients 07 p0990 A66-17237

Invariant imbedding in transport process and theorems of uniqueness and existence for derived hyperbolic equation 09 p1393 A66-19906

Thermodynamics of new generalized transport laws for liquids, gases and electrons in matter 12 p1977 A66-23557

Statistical derivation of linear viscoelastic equations, relating stresses to minor deformation 12 p1969 A66-24355

Transport of AC disturbance /emission noise/ on electron beams magnetically compressed in microwave tubes, deriving power flow invariants 17 p2878 A66-31819

Eigenvalue problems for systems of ordinary differential equations resolved computationally by use of quasi-linearization technique 19 p3310 A66-36046

Microwave transmission through turbulent plasma of Zeta machine, examining transport theory by use of Boltzmann equation 19 p3429 A66-36584

TRANSPORT VEHICLE

Economic indices of passenger-carrying air cushion vehicles and fundamental characteristics with reference to hydrofoil vessels 02 p0177 A66-11788

Terrestrial transportation via space vehicle with land-recovered reusable booster utilizing Pegasus principle, emphasizing application, speed and commercial feasibility 03 p0433 A66-13222

Air cushion vehicle transport potential, discussing attitudes and regulatory policy, interurban, offshore, transoceanic, off-road, agricultural, search and rescue operations 06 p0805 A66-16701

Helicopter capabilities in solving interurban mass transport problems, particularly cost and time considerations [SAE PAPER 660336] 15 p2427 A66-29835

Rules for comparing designs of aerospace transporters and selecting optimum configuration, based on overall cost criterion 17 p3040 A66-32375

Next-generation lunar transports for multimanned crew landing [SAE PAPER 660443] 17 p3017 A66-33158

Performance, kinetic heating, structural

weight and effectiveness of air breathing propulsion for first stage of aerospace transport vehicle

[ICAS PAPER 66-28] 22 p3972 A66-40664
EUROSPACE-supported research carried out by Germany and England on space-shuttle system between Earth and orbiting station

[ICAS PAPER 66-3] 23 p4134 A66-42067

TRANSPORTATION

SA AIR TRANSPORTATION

SA RAIL TRANSPORTATION

Space transportation systems for Moon exploration and beyond noting nuclear, nuclear pulse and electric propulsion

Electronic systems in marine, air and space transportation noting radar, ultrasonic devices, computer techniques, etc

Future improvements in economic and service performance of cargo carriers in surface modes of transportation

Airport planning with respect to transportation systems and population centers on Eastern seaboard, noting past experience and future requirements

[SAE PAPER 660284] 15 p2477 A66-29828
V/STOL aircraft use in California corridor in next decade, considering time savings, costs analysis, etc

[SAE PAPER 660317] 15 p2428 A66-29841

Avionics and transportation
Comparison of air, rail, bus and private car traffic within continental U.S. and within metropolitan France, excluding suburban traffic

Economic space transportation systems using air breathing booster or VTO recoverable rocket system

Economics of various orbital boosters from completely expendable to completely recoverable vehicles, noting concept of cost-optimum vehicle

Trends in short-haul transportation in Canada

TRANSURANIUM ELEMENT

S PLUTONIUM

TRANSVERSE OSCILLATION

Resonance modes in rods for analyzing coupled oscillations in sandwich plates including differential equations for oscillations

Turbulence wake suppression in Karman vortex street of circular cylinders by controlling transverse oscillations of vortex generating cylinder in transition range

Time resolved photoluminescence spectra of two green broad emission bands in CdS as function of temperature, attributing new structure to transverse optical phonons

Kinetic oscillation of nonhomogeneous collision plasma, discussing drift instability, ionization, longitudinal current effect, etc

Transverse magnetic field effect on drifting hot plasma resonance peaks, noting oscillation mechanism and application of successive moments of Boltzmann equation

Experimental observation of regular spiking in neodymium doped glass laser rod attributed to simultaneous oscillation of many transverse and longitudinal modes

Collisionless Boltzmann and Maxwell equations for plasma instability of plasma without external magnetic field for transverse oscillation propagating perpendicular to streams

Unstable transverse potential oscillations in plasma with beam anisotropy and initial density modulation and analogy with known electrostatic oscillations

Dynamic instability of longitudinal and transverse oscillations of rod, emphasizing fluctuation having property of white noise with unit spectral density

Natural frequency equations for TEM mode oscillations of coaxial resonator with moving dielectric material

Kinetic oscillation of nonhomogeneous collision plasma, discussing drift instability,

ionization longitudinal current effect, etc

TRANSVERSE VIBRATION

Transverse vibrations of viscoelastic shaft fixed at one end and supporting mass subjected to sinusoidal force at other

Axiallysymmetric transverse vibrations of spinning membrane disk centrally-clamped between collars with Coulomb friction at disk-collar interface

Large amplitude oscillation of anisotropic triangular plates

Torsional instability of cantilevered bars, describing effects of distributed nonconservative compressive load at free end

[ASME PAPER 65-WA/APM-19]

Helicons in n-type silicon and germanium, calculating collective modes of electrons in external magnetic field from frequency and wavelength-dependent conductivity tensor

Air disturbances due to small transverse vibrations of finite span thin wing with variable velocity

Classical theory of flexural motions of elastic plates used to determine natural frequencies of uniform annular plates for nine combinations of boundary conditions

Free transverse vibrations of parabolic membranes, obtaining eigenvalues and eigenfunctions for Dirichlet conditions

[ASME PAPER 65-AV-1] 11 p1780 A66-22472
Free and forced vibrations, static and dynamic stability and aeroelasticity of orthotropic shells and plates in variable temperature field

Torsional instability of cantilevered bars, describing effects of distributed nonconservative compressive load at free end

[ASME PAPER 65-WA/APM-19]

Modes and frequencies of transverse vibrations of composite beams

Approximate formulas for upper and lower values of natural frequencies for transverse vibrations of cantilever bars of variable cross section

Frequency equations and mode displacement functions derived for plane strain free-transverse vibration of solid cylinder with elastic core bonded to thin elastic shell

Small transverse vibrations of linearly viscoelastic Timoshenko beam of incompressible material, detailing free and forced vibration

Motion equations for large-amplitude transverse vibrations of tensioned string and necessary conditions for linearization

Spatial correlation coefficients and transverse temperature perturbation scales during turbulent nonisothermal flow of mercury in circular pipe

Resonant frequencies and associated mode shapes of transverse vibrations of truncated conical shells over wide range of geometrical and modal parameters

parameters

TRANSVERSE WAVE

Planetary wave analysis using zonal harmonics in connection with atmospheric circulation and weather forecasting

Fast wave quasi-TE-11 mode behavior of two circular guides of different size containing same discharge plasma

Band stop filters, discussing insertion loss vs frequency characteristics for large and small dissipation and arbitrary number of resonators

Transverse propagation of vertically polarized electromagnetic waves in horizontally stratified horizontally-magnetized plasma

Intensity distribution of fringe systems used to verify phase inversion between two lobes of laser in TEM-10 mode

Short wave asymptotics of diffraction field at sphere for incident plane transverse

waves

Propagation of quasi-TEM mode in ferrite-filled coaxial line

Solid state amplifiers using streaming carriers analyzed, noting different role played by collisions when electron stream interacts with TM and TEM waves

Aperture field of leaky-wave antenna of finite length

Transverse wave FM phototube system for detection of microwave-frequency modulated light, noting design, operation and application

Characteristic admittances of comb-type and undulating waveguide filters, considering diaphragm thickness and TE propagation mode

Desirable TEM wave instabilities in solid state plasma in electromagnetic field

TE surface wave determined by propagation and external magnetic field directions used in microwave circuits

Cut-off wavelength of transverse electrostatic wave mode in ridged rectangular waveguide of arbitrary aspect ratio

Thin-iris loaded planar waveguide, considering phase shift and series representation

Quasi-linear perturbation theory of transverse electromagnetic waves from instabilities in nonthermal magnetoactive plasma, using Boltzmann equation, applied to magnetospheric MHD emissions

Excitation of longitudinal electron plasma oscillations by nonlinear resonance of two TEM waves with frequencies differing by plasma frequency

Scattering cross section for Langmuir waves and transverse waves using nonlinear integral equations describing plasma interaction of electromagnetic waves

Transformation of electromagnetic and plasma waves at critical fluctuations of transverse or longitudinal field of nonequilibrium plasma

Integral equations of current derived for TM and TE waves in excited inhomogeneous impedance band in half-plane

Longitudinal and transverse waves transformation in nonuniform plasma

Linearized equations describing transverse waves in relativistic plasma embedded in magnetic field and in presence of nonrelativistic plasma

Ultrasonic attenuation in lithium fluoride from liquid helium to room temperature, finding anharmonic attenuation of slow transverse mode to vary with frequency

TE wave scattering by dielectric cylinder of arbitrary cross section shape, including effects of surface wave excitation and mutual interaction

Plasmon decay-type interactions in plasma with intensive transverse Langmuir waves, analyzing induced scattering

Behavior of transverse wave numbers /separation constant/ for electromagnetic wave propagation in anisotropic homogeneous cold plasma of arbitrary cross section

Ultrasonic attenuation coefficient of transverse wave in gapless superconductor, noting effect on critical field and parameter amplitude

Plasma density and collision frequency diagnostics using extraordinary transverse wave

Stability of one-dimensional steady detonations for periodic disturbances of small transverse wavelength

Externally imposed oscillating electric field excites transverse electromagnetic waves propagating perpendicular to it in cold plasma

Kinetics of nonuniform generation of longitudinal plasma waves by transverse wave beam with narrow spectrum, noting

- effect of magnetic field 22 p3958 A66-40931
 Exact solution for eigenfrequencies of
 cylindrical microwave cavity partially filled
 with magnetized plasma 24 p4240 A66-42303
- TRAP PROGRAM**
 Radiometric capability of S-10 image
 orthicon system evaluated for quantitative
 radiation measurements against reentry
 vehicles 23 p4070 A66-41668
- TRAPEZOIDAL WING**
 Minimum drag problem of trapezoidal wing
 in supersonic flow determined by method of
 residues in conjunction with complex
 variable functions 07 p0982 A66-18139
- TRAPPED MAGNETIC FIELD**
 Existence and topography of stationary
 points of square of magnetic field intensity
 determined by magnetic mirror system with
 minimum B field 24 p4242 A66-42404
- TRAPPED PARTICLE**
 SA GEOMAGNETICALLY TRAPPED
 PARTICLE
 SA MAGNETICALLY TRAPPED
 PARTICLE
 Multistage cryogenic trapping system
 noting design, operation and
 application 07 p1032 A66-17665
 Space-charge-limited currents and electron
 traps in CdS crystals thermally stimulated
 after electron injection 07 p1097 A66-17738
 Explorer satellite XII, XIV and XV
 measurements, noting directional intensity
 energy flux, spatial distribution and spectra
 of low energy trapped protons and
 electrons 07 p1131 A66-18085
 Limit on stably trapped particle fluxes
 determined theoretically and compared with
 data from Explorer 08 p1184 A66-19391
 Tabulation of spherical harmonic
 coefficients of geomagnetic field data for
 trapped-particle
 evaluation 08 p1219 A66-19419
 Double stream instability in finite diameter
 beams analyzed by numerical experiments
 on digital computer, showing electron
 trapping as cause of RF current
 saturation 13 p2137 A66-25044
 Violation of second and third adiabatic
 invariants, examining mirror point change of
 trapped particles under displacement of
 guiding centers along force-lines and
 particle diffusion 13 p2176 A66-26356
 Number and total mass of meteor particles
 captured by Earth atmosphere from cosmic
 space to closed geocentric
 orbits 15 p2604 A66-30056
 Trapped electron effect and stationary
 longitudinal wave propagation in Maxwellian
 hot plasma based on exact solution of
 nonlinear collisionless Boltzmann equation
 compatible with equilibrium electron
 distribution 16 p2761 A66-31009
 Single trapping center effect on growth of
 small amplitude space charge waves and
 propagation velocity, deriving dispersion
 relations 16 p2781 A66-31216
 Apparent HF stability of highly anisotropic
 plasma, noting charge exchange and trapped
 proton energy spectrum 18 p3142 A66-33671
 Energy distribution of trapped electrons
 producing solar microwave impulsive radio
 bursts and X-ray bursts from
 Sun 20 p3634 A66-38213
 Flute instability in trapped-particle plasma,
 discussing toroidal plasma
 discharge 20 p3612 A66-38428
 Flute instability in trapped-particle plasma,
 discussing toroidal plasma
 discharge 21 p3777 A66-38961
 Electron effective mobility variation in AC
 for small signals as function of operating
 frequency of thin film transistors and
 dielectric diodes 24 p4181 A66-42392
- TRAPPED RADIATION**
 Trapped radiation detector designed and
 fabricated by Van Allen for measurement of
 Martian radiation belts 01 p0073 A66-11114
 Rectangular waveguide filter with trapped
 mode resonators, describing operation,
 energy handling characteristics and
 application 06 p0845 A66-16086
 Circular TE sub 011 mode, trapped mode
 band pass filters, discussing energy radiation
 mechanism, design, operation and test
 results 06 p0845 A66-16087
 Explorer XV and Telstar I satellite trapped
 radiation measurements, noting connection
 between magnetospheric trapped particles
 and natural plasmas in
 space 07 p1131 A66-18084
 Nonlinear coefficients of refraction for
 self-trapping of optical beams in all media
 including vacuum 15 p2514 A66-29031
 Star Fish radiation belt discrepancy
 between theoretical and experimental values
 may be due to explosion in belt of naturally
 trapped protons 18 p3170 A66-34530
 Pumping energy distribution of ruby laser,
 discussing existence of trapped modes and
 effect of partially filled water jacket
 surrounding ruby rods 19 p3373 A66-35389
 Instability effect in n-channel silicon MOS
 transistors bombarded with ionizing
 radiation 20 p3526 A66-37317
 Radiation trapped in Earth magnetic field -
 Conference, Christian Michelsen Institute,
 Bergen, Norway, August-September
 1965 20 p3636 A66-38301
 Adiabatic theory of charged particle
 motion, considering first-order effects in
 radius of gyration and Alfvén
 theory 20 p3603 A66-38303
 Changes in 1 to 4 mev electron population
 during solar quiet periods and 55-mev
 protons near South Atlantic anomaly
 measured by various geophysical
 satellites 20 p3638 A66-38310
 Magnetic fields and trapped radiation
 intensities of other planets in solar system,
 particularly Jupiter 20 p3639 A66-38316
 Flux trapping of RF fields in
 superconductors from measurements on
 superconductive resonant circuits in
 frequency range of 10-1000
 mc 21 p3796 A66-38555
 Self-trapping of laser beam due to
 diffraction from dielectric waveguide arising
 from permittivity increase of birefringent
 beam 24 p4222 A66-42554
- TRAPPING**
 SA COLD TRAP
 Influence of trapping on acousto-electric
 effect in piezoelectric semiconductors,
 noting ultrasound absorption and
 experimental results in cadmium
 sulfide 14 p2359 A66-27101
- TRAUMA**
 S BAROTRAUMA
- TRAVELING SALESMAN PROBLEM**
 Discrete optimization problem approach
 and evaluation of results of applying it to
 variety of traveling salesman
 problems 03 p0387 A66-12622
- TRAVELING SOLVENT METHOD**
 Traveling solvent technique for p-n-p or n-
 p-n semiconductor structures with highly
 doped middle layer demonstrated on indium
 arsenide 16 p2779 A66-31088
 Distribution of edge-type dislocations in
 GaAs grown from solution by traveling
 solvent method determined, using etching
 techniques 19 p3437 A66-35432
- TRAVELING WAVE**
 Conventional periodically loaded
 waveguides with ferrimagnetic materials
 used in devices involving traveling wave
 interaction with electron
 beam 01 p0025 A66-10533
 Attenuation of surface waves in plasma
 columns in weak axial magnetic
 field 01 p0026 A66-10543
 Traveling wave oscillations in ruby laser
 resonator using passive optical isolator,
 eliminating Faraday rotator and attendant
 magnetic field 02 p0240 A66-11448
 Charged particle motion in field of plane
 traveling wave and acceleration by
 transverse wave 03 p0397 A66-12387
 Traveling wave ultrasonic nonlinear
 parametric amplification 03 p0338 A66-12419
 Model for behavior of optical maser in
 static magnetic field of arbitrary strength in
 Z direction and in electromagnetic field
 composed of traveling
 waves 03 p0379 A66-13135
 Radiation field of single-filament
 logarithmic-elliptical helical antenna,
 assuming traveling wave along
 helix 04 p0501 A66-14408
 Traveling wave interaction in dense
 plasma, discussing harmonic response,
 transients and wave growth, damping factors
 and Hall effect 05 p0720 A66-14708
 Powerful pulse of ruby laser emission
 generated by ultrasonic traveling wave
 diffraction modulator 05 p0698 A66-15861
 Traveling wave excitation in circular
 waveguide by four radial resonant slots
 useful in plasma particle
 acceleration 06 p0838 A66-15897
 Traveling wave characteristics of Cerenkov
 interaction studied by circular waveguide
 with electron beam flow 06 p0850 A66-16441
 Traveling wave MHD converter basic
 equations, accounting for magnetic potential
 difference in iron via generalized boundary
 conditions 07 p0991 A66-17242
 Helicon wave propagation in metals,
 discussing experimental techniques and
 results 07 p1102 A66-18208
 Microwave emission from InSb in magnetic
 fields, explaining experimental results via
 modified traveling wave helicon
 model 07 p1104 A66-18219
 Light modulation at microwave frequencies
 noting single-sideband suppressed-carrier
 modulation, traveling wave modulation,
 etc 07 p1003 A66-18328
 Self-excited vibrations of damped systems
 with traveling waves, using oscillators
 moving along beam resting on elastic
 foundation, noting flutter of plates and
 shells 08 p1309 A66-19116
 Cylindrical traveling magnetic wave plasma
 accelerator investigated in terms of finite
 and infinite conductivity theories
 [AIAA PAPER 66-243] 10 p1563 A66-21454
 Unified theory of cold plasma nonlinear
 oscillations /Dolph/ fails to apply to
 traveling wave solutions 10 p1569 A66-21921
 Charged particle radial distribution
 determination as function of amplitude of
 HF magnetic field, using diffusion in
 discharge induced by HF traveling
 H-wave 10 p1570 A66-21998
 Approximate theory for lumped impedance
 loaded traveling wave linear antenna,
 considering possibility of nondissipative
 loading 12 p1841 A66-24631
 Drift velocity of aerosol particle in field of
 sound wave distorted by second
 harmonic 13 p2127 A66-25087
 Traveling wave beats created by ring laser
 on rotating platform, noting frequency
 division rotating rate and capture band
 parameters 13 p2089 A66-25102
 Charged particle motion in field of plane
 traveling wave and acceleration by
 transverse wave 13 p2139 A66-25392
 Traveling wave interaction in nonlinear
 medium Lorentz
 transformation 13 p2163 A66-25434
 Quasi-linear approximation method and
 Poisson equation used in determining static
 fields and electron redistribution in plasma
 waveguides 13 p2039 A66-25678
 Text on traveling wave antenna design and
 field equations in terms of TW
 sources 14 p2254 A66-27720
 Electron concentration inhomogeneities
 during traveling gravity wave propagation
 through F layer 15 p2485 A66-29084
 Electromagnetic wave propagation in
 circular waveguide with axially-placed
 discharge tube 15 p2555 A66-29785
 Operating principles and critical
 dimensions of traveling wave slotted-
 cylinder antenna with dipole
 elements 15 p2467 A66-29886
 Traveling wave beats created by ring laser
 on rotating platform, noting frequency
 division rotating rate and capture band
 parameters 16 p2717 A66-30281
 Busbar effect on interaction between
 conducting fluid flow and traveling wave
 magnetic field created by long line with
 concentrated inductance and capacitance,
 deriving line gain 16 p2765 A66-31374
 Height finding technique using phase-in-
 space principle for radar system with single
 antenna and feed 17 p2872 A66-31960
 Microbarographic analysis of troposphere-
 ionospheric storm relationship, ground level
 pressure fluctuations and polar region
 traveling pressure waves 17 p2920 A66-33088
 Panel flutter at high Mach numbers, using
 linear plate theory and first-order
 aerodynamics, noting damping, relation
 between traveling and standing wave
 theories, etc 18 p3257 A66-34592
 Traveling waves interaction in gas laser,
 explaining forcing-of-oscillations and

- traveling wave suppression effect 18 p3119 A66-34685
- Numerical solution for complete Navier-Stokes equations for one-dimensional time-dependent propagation of compressible viscous thermally conducting diatomic gas, including presence of traveling shock wave 18 p3102 A66-34918
- Charged particle radial distribution determination as function of amplitude of HF magnetic field, using diffusion in discharge induced by HF traveling H-wave 18 p3151 A66-34975
- Linear nonrelativistic motion of charged particle in field of traveling electromagnetic wave 18 p3092 A66-35073
- Static nodal patterns associated with normal modes of vibration disappear at large motion amplitudes due to occurrence of traveling wave component 19 p3474 A66-36344
- Coupling between oppositely directed traveling waves in He-Ne ring laser in form of mutual backscattering of energy from each beam into direction of other 20 p3579 A66-37778
- Drift velocity of aerosol particle in field of sound wave distorted by second harmonic 21 p3769 A66-38512
- Peculiarities in Mach reflection of shock waves traveling in carbon dioxide gas and nitrogen at velocities of order of 2000 m/sec 21 p3726 A66-39094
- Nonlinear thermomagnetic wave theory and amplification in case of plasma instability 21 p3792 A66-39310
- Characteristic equation for linear flutter problem of elastic cylindrical shell immersed in gas flow, discussing energy radiation, traveling wave propagation and discontinuity problem 22 p3995 A66-40510
- Traveling-wave phase modulation of coherent light propagating in anisotropic medium 22 p3933 A66-40867
- EHD traveling potential wave interaction inducing electroconvection in slightly conducting current without electrical contact with flow 23 p4104 A66-41496
- Plasma flow processes in slip type traveling wave accelerator investigated to determine degree to which one-dimensional channel flow is used in design and scaling laws 23 p4053 A66-41917
- Time dependency of phase difference of two weakly coupled nonlinear optical oscillators, considering coupling of two traveling waves in laser 24 p4220 A66-42257
- Macroscopic particle acceleration to meteoritic velocities by trapping and accelerating superconducting solenoid in front of magnetic traveling wave 24 p4237 A66-42401
- TRAVELING WAVE AMPLIFIER**
- Tapered circuit TW amplifier experiments considering circuit phase velocity tapering effects on small signal gain, bandwidth, dynamic power limiting, etc 01 p0036 A66-10394
- Flat transversely magnetized ferrites in traveling wave amplifier 01 p0037 A66-10515
- Amplification theory for low amplitude traveling sonic waves propagating in piezoelectric semiconductors situated in stationary electric field 01 p0123 A66-10727
- Nonlinear propagation of pulse signal in laser type traveling wave amplifier 02 p0241 A66-11841
- Ultrasonic traveling wave amplification in piezoelectric crystals 03 p0332 A66-12415
- Application, problems and state of low noise amplifiers and traveling wave tubes, maser and Adler tubes gain in radar systems 04 p0500 A66-14123
- Ultrasonic delay lines, operational principles, characteristics and basic structure of traveling wave devices for communication 06 p0831 A66-16365
- Traveling wave transistor for HF medium-power application, device is also broadband amplifier whose circuit uses distributed elements 06 p0853 A66-16645
- Space-charge wave propagation on nonuniform drifting electron beam explained, using coupled mode theory 06 p0855 A66-16767
- Gain-bandwidth product determined for traveling wave quantum amplifiers with regeneration by partially reflecting mirrors 11 p1711 A66-22727
- Spacecraft transponder with reentrant mode TWT amplifier 12 p1836 A66-24158
- Spectral features of stable generation of oscillation in delayed-feedback microwave oscillator consisting of TW amplifier and waveguide delay line 14 p2267 A66-27738
- Low noise traveling wave amplifier noting components, noise figures, gain, dynamic range, life test results, frequency response, etc [IEEE PAPER CP-65-467] 18 p3076 A66-33906
- Amplification theory for low amplitude traveling sonic waves propagating in piezoelectric semiconductors situated in stationary electric field 20 p3619 A66-37664
- Quantum paramagnetic traveling wave amplifier using rutile with admixture of chromium and combined with magnet with superconducting coil 20 p3580 A66-37996
- Iterative parametric circuit, examining equivalent circuit representation, quaternion form representation of parameters, generalized Floquet theorem, etc 21 p3718 A66-38744
- Nonlinear phase distortion as function of output power and helix voltage measured on O-type TWT amplifiers for reduction purposes 21 p3710 A66-38832
- Spurious mode effects on performance of helix type traveling wave amplifier 21 p3712 A66-39222
- Ultralow noise TWTs, low noise traveling wave amplifiers /LNTWA/ and suitability as microwave amplifiers 22 p3880 A66-40735
- Gain-bandwidth product determined for traveling wave quantum amplifiers with regeneration by partially reflecting mirrors 23 p4078 A66-41465
- TRAVELING WAVE MASER**
- Induced emission modes of traveling wave laser 01 p0082 A66-10778
- Wide tuning range L-band traveling wave maser noting slow wave structure and isolator material 03 p0377 A66-12441
- Traveling fields in interaction of ionized gases with electromagnetic field currents checking Lorentz force and magnetic induction 03 p0404 A66-12980
- Fabry-Perot interferometer and confocal and spherical resonator, calculating integral equations for eigenvalue and eigenfunction of lowest order TW eigenmode 04 p0523 A66-14277
- Traveling wave oscillations of ion ring laser in mirror-ring resonator 05 p0694 A66-14903
- Experimental L-band traveling wave maser developed with exceptionally wide tuning range 06 p0889 A66-15958
- L-band traveling-wave maser for radio astronomy research at 21 cm uses chromium-doped rutile 06 p0891 A66-16640
- Lock-on band of continuously operating laser oscillator determined for traveling wave circuit 07 p1043 A66-17623
- Superconducting magnet for variable bandwidth traveling wave masers, noting amplifier bandwidth increase via gain reduction 10 p1542 A66-21417
- Gc/s nitrogen-cooled nondegenerate parametric amplifier, noting design, application and operation 10 p1513 A66-21857
- Induced emission modes of traveling wave laser 11 p1711 A66-22290
- Easily fabricated lightweight superconducting magnet designed for use with traveling wave masers 12 p1837 A66-24312
- Theoretical existence of optimum pitch giving maximum net gain for traveling wave masers, using slow wave structures 14 p2309 A66-27958
- Dielectric material position effect on characteristics of ladder line slow wave structure of TW masers 14 p2258 A66-27960
- Dispersion characteristic of stub slow-wave structure, partially filled by dielectric, of traveling wave maser 14 p2310 A66-28291
- Truncated equations describing coherent radiation of excited chromium ions in ruby situated in traveling wave resonator 16 p2720 A66-31547
- L-band traveling wave maser using chromium doped rutile, discussing inverted susceptibility as figure of merit 20 p3580 A66-38239
- Traveling wave maser as preamplifier in ground station for satellite communication 22 p3867 A66-40658
- TRAVELING WAVE MODULATION**
- Radiation control of ruby laser by diffraction modulator with traveling ultrasonic wave, noting computer solution of kinetic equations of population balance, radiation density, characteristic damping, etc 17 p2938 A66-33515
- Experimental study of emission control in ruby laser using diffraction modulator with modulated traveling ultrasonic wave 17 p2938 A66-33516
- Radiation control of ruby laser by diffraction modulator with traveling ultrasonic wave, noting computer solution of kinetic equations of population balance, radiation density, characteristic damping, etc 24 p4219 A66-42128
- Experimental study of emission control in ruby laser using diffraction modulator with modulated traveling ultrasonic wave 24 p4219 A66-42129
- Traveling wave HF crossed field photomultiplier with helical output circuit for electron multiplication at microwave modulation rates 24 p4182 A66-42567
- TRAVELING WAVE TUBE**
- Helix traveling wave tube using beryllium oxide ceramic as supporting medium for wide band slow-wave structures 02 p0200 A66-11879
- Long range program on Ubitron TWT amplifier, noting beam synchronism and dispersion characteristics 03 p0338 A66-12433
- Field analysis of plasma filled disk-loaded waveguide, obtaining TWT interaction impedance 03 p0339 A66-12436
- Circuit analysis of reduction of intermodulation distortion generated in high power coupled cavity traveling-wave tubes for single sideband frequency division multiplex transmitters 04 p0498 A66-14035
- Microwave tube technology noting klystrons, crossed field devices, traveling wave tubes, etc 05 p0642 A66-14560
- Classification of possible gyroresonance interactions between plasma and proton beam for strictly longitudinal propagation and comparison with TWT terminology 05 p0748 A66-15044
- Decelerating system for high power traveling wave tubes consisting of waveguide of cruciform cross section with inductance diaphragms evenly spaced 06 p0838 A66-15883
- Negative depression coefficient in traveling wave tubes at small helix parameters and different radii for helix and electron beam 06 p0838 A66-15901
- Coupled cavity slow-wave circuits, discussing equivalent circuit construction with similar current flow characteristics for behavior analysis 06 p0846 A66-16096
- Coupled monotron analysis of band-edge oscillations in high power traveling wave tubes, discussing electron beam interaction with coupled-cavity structure 06 p0855 A66-16768
- Impedance of growing wave in interaction region used to calculate minimum value of traveling wave tube noise coefficient 06 p0837 A66-17190
- Klystrons, cross field devices and traveling-wave tubes, including design and application 07 p1011 A66-18269
- Nonlinear TWT equations simplified for computing finite modulation of electron beam relative to velocity 09 p1357 A66-20778
- Characteristic TWT equation solved for large space-charge parameter 09 p1357 A66-20779
- Secondary emission effect on LF noises near carrier frequency of continuously operating high power TWT output signal 11 p1655 A66-22724
- Transverse wave FM phototube system for detection of microwave-frequency modulated light, noting design, operation and application 12 p1838 A66-24558
- Klystron and TWT, generating high powers at millimeter wavelengths, combined in single amplifier for radar systems 12 p1839 A66-24614
- Increased oscillation stability and efficiency of traveling wave tubes for global satellite communications systems

[AIAA PAPER 66-301] 12 p1844 A66-24768
TWT delivering CW power in L, S, C and X-band designed for space environment, considering size, weight, voltage, etc., and comparing klystrons, amplifiers, circuit design, etc

[AIAA PAPER 66-308] 12 p1844 A66-24775
Extension of nonlinear TWT equations to floating drift relativistic klystron, noting formulas for first harmonic of current in two- and three-cavity klystron 14 p2250 A66-27139
Optimum potential distribution in electron gun of low noise traveling wave tube calculated, using plasma wave number changes in accelerating portion of gun 14 p2236 A66-27236
Multivehicle stream effects and efficiency of slow-cyclotron wave amplifiers, noting electron velocity spread which decreases predicted efficiency 15 p2467 A66-27911
Formula derived for estimating reflection coefficient of cylindrical resistive-film attenuator for traveling wave tube 16 p2660 A66-30617
Physical principles in plasma application for amplification and generation of electromagnetic oscillations 16 p2760 A66-30797
Frequency converters using traveling wave and backward wave tubes, noting current-wave amplitude distribution, velocity and voltage 16 p2666 A66-31550
Slow wave interaction with drifting stream of carriers, including collision and diffusion effects, noting TWT and acoustic semiconductor amplifier cases 17 p2878 A66-31820
Noise coefficient minimization for traveling wave tube, with account of current interception at delay system input 17 p2879 A66-31864
Transient processes analyzed in traveling wave converters on long-line section, taking first-order reflection into account 17 p2888 A66-32705
Impedance of growing wave in interaction region used to calculate minimum value of traveling wave tube noise coefficient 19 p3297 A66-35548
Single-wave approximation of fields of cylindrical delay system with basic E-type wave propagating at variable phase velocity 20 p3515 A66-37381
Ultrahigh reliability medium-power lightweight TWT design 20 p3532 A66-37906
Nonlinear equations of traveling wave tube solved approximately, taking account of relativistic effects 20 p3533 A66-38000
Electron beam rotation experiments on linear spiratron with M-type electron gun 20 p3533 A66-38005
Nonlinear TWT equations simplified for computing finite modulation of electron beam relative to velocity 22 p3873 A66-39837
Characteristic TWT equation solved for large space-charge parameter 22 p3874 A66-39838
Slow wave circuit for traveling wave tubes operating in millimeter-wave band, examining attenuator for double-ladder traveling wave amplifier 22 p3877 A66-40187
Traveling wave tubes and klystrons, discussing microwave power generation efficiency, application for satellite communications, etc 22 p3878 A66-40701
Ultralow noise TWTs, low noise traveling wave amplifiers /LNTWA/ and suitability as microwave amplifiers 22 p3880 A66-40735
Secondary emission effect on LF noises near carrier frequency of continuously operating high power TWT output signal 23 p4037 A66-41462
AM/PM conversion factor of TWT as function of helix voltage when beam current is varied to keep gain constant 24 p4180 A66-42371
Multiple large signal theory for TWT amplifiers with restrictive assumptions 24 p4183 A66-42635
Traveling wave phototube /TWP/ theory in terms of modified TWT coupled mode theory, noting equivalent impedance concept and noise output calculation 24 p4184 A66-42746
Carbon disulfide traveling wave Kerr cells with identical microwave and dielectric constants, noting light modulator

construction at microwave frequencies 24 p4185 A66-42814
Traveling wave tubes scaled about one order of magnitude in frequency and several orders of magnitude in power level 24 p4187 A66-43190

TREAT
S TRANSIENT REACTOR TEST /TREAT/ FACILITY

TREATMENT
S HEAT TREATMENT
S OXYGEN TREATMENT
S SURFACE TREATMENT

TREFFTZ EQUATION
Trefftz method applied to derivation of integral for general boundary value problem in classical theory of elasticity 23 p4144 A66-41968

TRI-SERVICE TRANSPORT
S XC-142 AIRCRAFT

TRIANGULATION
Analytical aerial triangulation noting accuracy of photographs, stereocomparator, etc 02 p0229 A66-11695
Sufficient conditions for transformation sequence exhibiting Gibbs phenomenon when using triangular methods of Fourier series summability 02 p0250 A66-12106
Problems of spatial triangulation of Europe by means of satellites 03 p0446 A66-12458
Assumption of spatial system parallel to mean geocentric system in compensation of triangulation grid 03 p0424 A66-12459
Intermediate observation for satellite compensation of spatial triangulation 03 p0424 A66-12460
Calculation in spatial triangulation by synchronous observation on basis of partially known orbital elements 03 p0424 A66-12462
Cosmic triangulation systems assessing polar method for determining geodetic satellite coordinates and inherent error estimation and correction 03 p0361 A66-12502
Uniform worldwide spatial triangulation grid for measuring Earth radius 03 p0361 A66-12532
Canadian photogrammetry for analytical aerial triangulation, using mathematical model and matrix calculus 04 p0516 A66-13898
Matrix displacement analysis of anisotropic shells, determining bending and membrane stiffnesses of triangular element and effects of initial strains 06 p0961 A66-16005
Directional accuracy of chords and angles in geocentric equatorial coordinate system in stellar triangulation 12 p1867 A66-23515
Error analysis for statorscope or radar altimeter phototriangulation readings and radio geodetic coordinate photography phototriangulation 12 p1867 A66-23517
Absolute direction in space and control of stellar triangulation equations 12 p1875 A66-24874
Height measurement of nightglow by photometric ground triangulation, minimizing previous errors 17 p2917 A66-32524
Triangulation technique for correlating trail points on films of chemical cloud releases in space from two different sites to determine winds and wind shear 18 p3110 A66-33743
Photogrammetric network for large-area phototriangulation using star-tracking airborne cameras, discussing theoretical and technical aspects 20 p3551 A66-37472
Method of closing directions used in adjustment of satellite triangulations performed on basis of results of synchronous observations of Echo I during spring of 1963 20 p3552 A66-37842
Directional accuracy of chords and angles in geocentric equatorial coordinate system in stellar triangulation 21 p3732 A66-38659
Error analysis for statorscope or radar altimeter phototriangulation readings and radio geodetic coordinate photography phototriangulation 21 p3732 A66-38661
Satellite observation via photogrammetry, discussing triangulation grid 22 p3917 A66-39738
Indirect observation method applied to satellite triangulation with set of error equations 23 p4063 A66-41071

TRIATOMIC MOLECULE
Potential energy surfaces on triatomic hydrogen molecule ion computed with generalized Gaussian

orbitals 13 p2130 A66-25371

TRICHLOROETHYLENE
Chlorine trifluoride analysis using combination of gas chromatography and IR spectrophotometry, noting column containing trichloroethylene 23 p4032 A66-41239

TRIDENT AIRCRAFT
S DE HAVILLAND DH-121 AIRCRAFT

TRIFLUORIDE
S CHLORINE TRIFLUORIDE

TRIGONOMETRIC FUNCTION
Cylindrical shell under concentrated radial load dealt with by trigonometric series and gamma function 03 p0441 A66-13289
Solution to nonlinear periodic system using Galerkin approximation method of generated trigonometric polynomials 04 p0539 A66-13950
Convergence of trigonometric interpolation polynomials 07 p1058 A66-17864
Properties of sums of special trigonometric series 09 p1394 A66-20458
Solution of dual integral equations containing Legendre conic functions and trigonometric functions 12 p1905 A66-24344
Numerical methods of celestial mechanics and Airy method computation of trigonometric series with numerical coefficients 12 p1950 A66-24403
Conformal mapping of unit circle onto given, singly connected or multiply connected region bounded by simple closed contour 13 p2204 A66-26433
Dual trigonometric integral equations solved, then applied to determining stress field due to crack 14 p2325 A66-28391
Synthesis of linear digital recursive filters, noting application to arbitrary amplitude frequency transfer function synthesis 15 p2475 A66-29772
Integral expression for coefficients of Fourier series attached to nonintegrable function 15 p2529 A66-29853
Interaction between atoms of solid surface and gas phase, obtaining closed-form solution of motion equations 16 p2753 A66-30786
Nomogram construction for transformation of astronomical object position from one spherical coordinate system to another, using trigonometric functions 16 p2737 A66-31398
Planetary motion representation using trigonometric series and computer evaluation techniques 17 p2998 A66-32043
Auxiliary polynomials for direct determination of Chebyshev interpolation polynomial 19 p3389 A66-35936
Series expansion of inversion of n-dimensional Laplace transforms in terms of ultraspherical polynomials having coefficient computed recursively 19 p3392 A66-36784
Cylindrical shells strengthened by stringers and formers calculated, using double trigonometric series 20 p3670 A66-37672
Amplitude friction effect in single degree of freedom vibrating system by developing amplitude into approximate trigonometric series 22 p3917 A66-39669

TRINITROTOLUENE /TNT/
Equation of state and derived shock initiation criticality conditions for nitromethane and liquid TNT 12 p1934 A66-24588

TRIODE
Logarithmic region of planar triode with Maxwellian distribution of initial velocities of electrons 02 p0205 A66-11974
Temperature dependence of input and output current-voltage characteristics of N-triode 03 p0346 A66-13320
Static characteristics of field triode with gate separated from semiconductor by thin dielectric layer, considering regimes of concentration, depletion, etc 04 p0499 A66-14054
Optimal regime for triode amplifier of microwave output 06 p0849 A66-16373
Junction semiconductor triode with medium and high injection levels 06 p0852 A66-16548
Planar triodes for pulse and CW operation at L-band and K-u band 07 p1011 A66-18267
Small low power drain microwave triode cavities as pulsed transmitters and local oscillators for man-portable radar equipment 07 p1011 A66-18268
Thin-film triode devices to investigate hot-electron penetration of oxide

films 10 p1509 A66-21540
Disk-seal triode coupled with transmitting tube for establishing radio contact between Mariner IV space probe and Earth 11 p1665 A66-22682
Approximate equations for dependence of electron-drift mode over cathode-triode /tetrode/ grid spacing on parameters of UHF triode power 12 p1830 A66-23733
Weimer triode with contact rectifier for use as component of microminiature radio circuits, noting effect of contact rectification on current-voltage characteristics and amplifying power of such triodes 13 p2031 A66-25228
Optimal regime for triode amplifier of microwave output 13 p2042 A66-25961
Temperature dependence of input and output current-voltage characteristics of N-triode 14 p2260 A66-28294
Double barrier transmission resonance in metal thin film triode 15 p2563 A66-28731
Linear approximation of frequency and transient characteristics for field triodes with insulated gate of constant capacitance 17 p2879 A66-31859
Shunting of input current into collector region of planar triode 17 p2879 A66-31865
Static characteristics of field triode with gate separated from semiconductor by thin dielectric layer, considering regimes of concentration, depletion, etc 17 p2884 A66-32220
High-performance small planar triode 17 p2887 A66-32701
Negative resistance in cathode current and grid and plate current of tube in which electrodes are situated behind cathode 22 p3871 A66-39658
Theoretical static I-V characteristics of surface gate dielectric triode and geometric factors influence on amplification factor at cut-off 22 p3872 A66-39746
Approximate equations for dependence of electron-drift mode over cathode-triode /tetrode/ grid spacing on parameters of UHF triode power 22 p3875 A66-40076
Field emission diode and triode with narrowly spaced electrodes, noting voltage and current characteristics 22 p3882 A66-40894
Thin film space-charge-limited triode employing dielectric surface gate structure 24 p4183 A66-42627
Transistor theory approximation of DC and small signal I-V characteristics of p-n-p-n junction diodes and triodes 24 p4184 A66-42744

TRIPLET STATE
Ionospheric triplet observation at low latitude by vertical sounding 08 p1214 A66-19051
Possible presence of relic quarks in cosmic rays 19 p3454 A66-36723
Triplet states of liquid benzene and toluene studied, using biacetyl phosphorescence sensitization 23 p4032 A66-42077

TRITIUM
Tritium diffusion constants of stone meteorites and dependence on tritium production mechanism 09 p1456 A66-20421

TRITON
Plasma beam action on tritiated titanium and high energy deuteron detection in mixed-field accelerator 17 p2972 A66-32953

TROJAN ORBIT
Recurrent power series integration used to compute characteristic exponents in planar restricted problem of three bodies 08 p1296 A66-19354
Short-period Trojan orbits in restricted three-body problem numerically determined, using Jupiter and Sun as principal masses 13 p2185 A66-25807
Analytical continuation and first-order stability of short-period orbits originating at equilateral center of libration in Sun-Jupiter system 13 p2048 A66-25808
Space probe at Trojan libration point of Earth-Sun system 14 p2384 A66-27890
Theory and application of motion associated with equilibrium configurations of dynamical systems applied to astronomy and space dynamics 19 p3461 A66-35888

TROPICAL METEOROLOGY
Quasi-biennial cosmic rays in tropical region estimated from results of meteorological investigation 09 p1443 A66-20860
Cloud identification from Tiros satellite photographs, noting element identification of order of 1 km 11 p1726 A66-22309
Tiros photographs of tropical cumulus and cirrus clouds along vertical wind shear vector 11 p1726 A66-22310
Synoptic interpretation of tropical land convection over Philippines 11 p1728 A66-22322
Monthly temperature variations in tropical stratosphere and mesosphere between 25 and 80 km 12 p1872 A66-24474
[AIAA PAPER 66-344] Biennial stratospheric tidal oscillation at tropical latitudes 15 p2530 A66-28602
Difference system and boundary conditions for primitive-equation barotropic forecast 17 p2948 A66-31942
Coupling mechanism correlated between quasi-biennial oscillations in polar and tropical latitudes of stratosphere 18 p3104 A66-33926
Quasi-geostrophic wave motions of inertia-gravity wave type and Rossby wave type in equatorial area 19 p3348 A66-36056
Fluctuations of mesospheric winds over equatorial region, noting quasi-periodic oscillations 22 p3903 A66-39800
Atmospheric ozone data on basis of meteorological observations and synoptic maps on ship in Atlantic 23 p4065 A66-41804
Zonal wind distribution and variation in equatorial stratosphere and lower mesosphere 23 p4065 A66-41841
Vertical distribution and transport of radioactive strontium aerosols in rain and air across trade wind inversion at Hawaii 23 p4124 A66-41843
Radiostrontium ratios in precipitation from two extratropical cyclones containing nuclear debris of different ages 23 p4124 A66-41844

TROPICAL STORM
Tropical storm intensity and formative stage from Tiros pictures 11 p1727 A66-22312
Maximum wind velocity in tropical storms and hurricanes estimated from cloud patterns in satellite pictures 11 p1727 A66-22313
Organization and size of cloud systems in relation to maximum wind speed, using Tiros satellite pictures 15 p2533 A66-29663

TROPICS
S SUBTROPICS
TROPISM
S GEOTROPISM
S ISOTROPISM
S PHOTOTROPISM

TROPOPAUSE
Position of tropopause in middle latitude jet flow 18 p3108 A66-34607
Tropopause detection by radar, examining detection of high altitude clear-air turbulence by radar and forward-scatter techniques 22 p3912 A66-40304
WSR radar four-year climatology of thunderstorm penetrations of tropopause at ten locations in U.S. 22 p3944 A66-40430

TROPOSCATTER
Laplace transform technique to develop asymptotic solutions to integral equations describing influence of scattering law on radiation damage displacement cascade 02 p0245 A66-11946
Tropospheric scatter common volume, describing derivation for two intersecting circular cones 06 p0833 A66-16682
Monographs on electromagnetic diffraction and propagation problems, particularly radio propagation in troposphere 06 p0836 A66-17087
Semiconductor lasers, FM techniques and multiple-scatter paths used to overcome modulation noise under varying weather conditions 09 p1385 A66-19915
Electromagnetic wave propagation in meteorology and geophysics, noting expression for refractive modulus in troposphere, considering attenuation and backscattering 09 p1343 A66-20276
Tropospheric wave propagation, splitting and scattering, transport equation, diffusion, Fokker-Planck approximation, etc, for

random continuous medium 11 p1654 A66-22634
Transhorizon VHF propagation over ground-air paths and transmission loss 13 p2020 A66-25216
Assessment of troposcatter radio relay systems in terms of CCIR /Geneva 1963/ recommendations regarding allowable noise power in radio relay systems 13 p2023 A66-25568
Maximum channel capacity of tandem link multichannel troposcatter systems for specified noise level 14 p2243 A66-28347
Tropospheric scatter application for beyond horizon communication between Earth and satellite or aircraft 18 p3067 A66-33899
Rake system equipment for tropospheric scatter, noting delay-resolution capabilities and circuit stability 22 p3865 A66-40067
Millimeter waves applications in atmospheric research, discussing radar meteorology, forward scatter or troposcatter and passive or radiometric techniques 22 p3869 A66-40731
Midpath airplane interference to digital transmission in tropospheric radio, considering scattering of radiant energy by atmospheric layers 23 p4040 A66-41594

TROPOSPHERE
Visibility range of 100-watt lamp and relation to absorption coefficient of tropospheric fog 01 p0096 A66-10223
Tropospheric ion mobility distribution, conductivity and densities above exchange layer 02 p0222 A66-11824
Monograph on results of theoretical and experimental studies of long-distance tropospheric propagation of radio waves 06 p0834 A66-16855
Arctic short-wave atmospheric radiation absorption, long-wave radiation loss, and tropospheric radiation balance 12 p1949 A66-24203
French EOLE experiment for measuring tropospheric parameters, describing balloon transponder, balloon and spacecraft electronic packages, telemetry, etc 12 p1956 A66-24934
Millimeter wave transmission and reception of television signals, examining picture quality and tropospheric scintillation and attenuation relative to weather 15 p2450 A66-28997
Quasi-stationary solar corpuscular fluxes, examining effect on atmospheric pressure in Earth polar cap regions 15 p2576 A66-29134
Distribution of solar-tropospheric disturbances over Earth surface, based on simultaneous observations of 103 U.S.S.R. stations 15 p2533 A66-29135
Tropospheric induced distortion in frequency band amplitude and delay time of radio signal transmitting over wide frequency bands 15 p2452 A66-29765
Visibility range of 100-watt lamp and relation to absorption coefficient of tropospheric fog 17 p2948 A66-31907
Microbarographic analysis of troposphere-ionospheric storm relationship, ground level pressure fluctuations and polar region traveling pressure waves 17 p2920 A66-33088
Natural purification of lower troposphere from radioactive aerosols through deposition and absorption by atmospheric precipitation 18 p3108 A66-34612
Energy and momentum budget of atmosphere above tropopause determined by computing momentum and heat transports from wind and temperature observations up to 30 km 19 p3347 A66-35643
Two-year variation in troposphere, ionosphere and stratosphere regions, noting sporadic E layer in Far East 20 p3552 A66-37571
Tropospheric and ionospheric refraction, aspect sensitivity and height of radio aurora, backscatter radar aurora observation and geomagnetic field anomalies 20 p3520 A66-38199
Tropospheric duct propagation above sea in experiment and mode theory of Booker and Walkinshaw 22 p3863 A66-39934
Tropospheric propagation using laser as transmitter, analyzing effects of Benard cells, turbulence, wind shear, etc 24 p4171 A66-42367
Stress, eddy viscosity and viscous dissipation estimations in jet stream

- obtained during Project TOPCAT in Australia, using aircraft 24 p4234 A66-42984
- oundings 24 p4234 A66-42984
- Refraction due to acoustic focusing of sound waves in lower troposphere, noting effect of wind profile 24 p4203 A66-43108
- TROPOSPHERIC RADIATION**
- Atmospheric tidal oscillations, Coriolis forces dominate diurnal tide causing small scale depth 05 p0672 A66-15026
- Earth troposphere affected by solar corpuscular fluxes, cosmic rays, atmospheric radiation, chromospheric flares and intensified radio wave absorption 08 p1285 A66-19452
- Relation between ascending fluxes of Earth and troposphere, long-wave IR radiation and temperature of mean energy level 09 p1398 A66-19889
- Long-wave radiation flux in optically dense horizontally-stratified layer of clouds as it ascends from lower into upper troposphere with given temperature and humidity 09 p1398 A66-19894
- Radar transmission systems, observation techniques, ionospheric and tropospheric effects and meteoric radio reflection applied to satellite communications 09 p1345 A66-20541
- Earth troposphere affected by solar corpuscular fluxes, cosmic rays, atmospheric radiation, chromospheric flares and intensified radio wave absorption 18 p3169 A66-34481
- TROPOSPHERIC WAVE**
- Wave solutions to linearized quasi-hydrostatic equations for adiabatic nonviscous flow on equatorially oriented beta plane 02 p0254 A66-11982
- Simultaneous long distance tropospheric propagation measurements at 560 and 774 mc/s over North Sea 04 p0483 A66-14045
- Refraction angle of radio waves in troposphere and stratosphere, using refractive index of air 11 p1658 A66-23220
- Digital computer simulation of stochastic multibeam communications channel with long-distance tropospheric propagation of ultrashort waves 12 p1812 A66-23732
- Sonic diffraction mechanism used in tropospheric transhorizon propagation 17 p2876 A66-33361
- Book on tropospheric radiowave propagation, discussing diffraction theories, scattering phenomena, transhorizon propagation, etc 20 p3520 A66-38091
- Tropospheric radio wave propagation field strength measurements and attenuation differences among various mixed land and sea transmission paths 20 p3520 A66-38144
- Dynamic stability of waves in stratosphere, examining vertical transfer of energy from troposphere to stratosphere weakened at tropopause 21 p3734 A66-39219
- Digital computer simulation of stochastic multibeam communications channel with long-distance tropospheric propagation of ultrashort waves 22 p3865 A66-40075
- TRUNCATION**
- Truncated simple random sampling program application and distribution function 01 p0092 A66-10197
- Truncation method for determining life characteristics of electronic components such as transistors and vacuum tubes before testing to destruction 12 p1833 A66-24078
- TRUNCATION ERROR**
- Nonlinear distortion and truncation errors in frequency converters and parametric amplifiers 02 p0201 A66-11902
- Nonequilibrium inviscid flow behind blunt body shock wave analysis, using series truncation and reducing truncation error 08 p1166 A66-19816
- Generalization of high accuracy alternating direction implicit /ADI/ method for solving wave equation in two space dimensions 10 p1550 A66-21845
- Numerical integration methods requiring least computation time for truncation error when applied to ordinary differential equations, comparing Butcher with Runge-Kutta, Adams, etc 13 p2121 A66-26324
- High order Runge-Kutta formulas for systems of first and second order differential equations with small truncation error 17 p2945 A66-31877
- Richardson extrapolation applied to estimate accumulated truncation error for one-step method with variable step size for integrating system of ordinary differential equations 19 p3392 A66-36780
- Optimum Runge-Kutta methods of orders 2, 3 and 4 for first-order differential equation with constrained minimum truncation error bounds 19 p3392 A66-36781
- Step size for numerical solution of differential equation without violating stability region constraint 19 p3392 A66-36785
- TRUSS**
- Simplified method for verifying previously calculated bar forces in plane trusses extended to three-dimensional structures 10 p1616 A66-21492
- Integrated approach to structural synthesis of three-dimensional truss with arbitrary number of nodes, members and topology, noting two programs of synthesis 18 p3253 A66-33800
- Approximation method for checking stability of compression members in rigid-joint space truss or stability against out-of-plane buckling of compression members in rigid-joint plane truss 19 p3475 A66-36489
- TRYPTOPHAN**
- Metabolic correlates of glucocorticoid induction of enzymes in man studied in terms of ACTH induced changes in tryptophan turnover along inducible pathways 24 p4166 A66-43168
- TUBE**
- SA CATHODE RAY TUBE
- SA CIRCULAR TUBE
- SA COMPRESSION TUBE
- SA DISCHARGE TUBE
- SA ELECTROMAGNETIC SHOCK TUBE
- SA ELECTRON TUBE
- SA FLASH TUBE
- SA IMAGE CONVERTER
- SA IMAGE DISSECTOR TUBE

- TUNGSTEN**
- Tungsten single crystal structure and mechanical properties as affected by saturation of carbon, oxygen and nitrogen 01 p0089 A66-10998
- Carbon arc solar simulator with nonconsumable tungsten rod negative electrode operating continuously over 100 hours 02 p0213 A66-11230
- Ablation mechanism for impregnated tungsten materials 02 p0303 A66-11552
- Tungsten and molybdenum as engineering materials noting technology, mechanical properties, application, etc 02 p0244 A66-11738
- Maximum error in high-temperature hardness determination for tungsten and molybdenum with known measurement errors 02 p0233 A66-12275
- Tungsten single crystal study by electron microdiffraction for distribution and effects of interstitial phases 03 p0385 A66-13194
- Densification rates for tungsten powder compacts sintered in hydrogen/bromine atmospheres compared with those sintered in hydrogen alone at high temperatures 03 p0385 A66-13207
- Tungsten crystal deformation and fracture analyzed as orientation function, noting tensile tests and stress-strain curves 03 p0385 A66-13208
- Nature of interaction between titanium nitride and metals of iron, molybdenum and tungsten groups 04 p0535 A66-13436
- Vapor pressure and heat of sublimation of tungsten determined by Langmuir method 04 p0536 A66-13831
- Crack propagation in tungsten single crystals with preexisting microcracks and prestraining at various temperatures 04 p0536 A66-14308
- Contact potential difference measurements for adsorption of cesium on polycrystalline tungsten surfaces in cesium vapor 05 p0622 A66-15582
- Tungsten as thermionic emitter prepared by hydrogen reduction of tungsten fluoride, noting resistance to grain growth and properties 05 p0714 A66-15593
- Vacuum diffusion welding of zirconium, niobium and tantalum carbides to high-melting niobium, tantalum, molybdenum and tungsten 06 p0887 A66-16696
- Relation between hardness and ultimate strength of tungsten and molybdenum over wide temperature range 06 p0897 A66-16698
- Tungsten rocket nozzle manufacturing by forging, impregnation and deformation techniques 06 p0888 A66-17075
- Grain size effects on tensile and creep properties of arc-melted and electron-beam-melted tungsten 07 p1048 A66-17475
- High-and low-temperature surface migration of silicon on tungsten 07 p1104 A66-18364
- Yield strength of tungsten at various test temperatures by assessing contribution of certain treatment effects separately from carbon effects 08 p1237 A66-18763
- Carbon and tungsten effects compared on tensile flow stress recovery of molybdenum 08 p1237 A66-18764
- Thermal expansion of tungsten and tantalum in high temperature range 09 p1388 A66-20147
- Temperature dependence of electrical conductivity in molybdenum and tungsten at 4.2 to 300 degrees K 09 p1391 A66-20862

Residual gas effect on work function vs critical temperature for surface ionization of cesium on porous tungsten
[AIAA PAPER 64-693] 10 p1594 A66-21778

Contact potential difference measurements between aged polycrystalline tungsten foil and polished single crystal disk and work function calculation for /110/ oriented surface 10 p1582 A66-21888

Sintered W and W plus additive billets used to test feasibility of producing fiber-bearing composites by elongation during extrusion 11 p1715 A66-22537

Chromium steel strength and corrosion resistance improvement by molybdenum and tungsten addition 11 p1716 A66-22747

Low energy electron diffraction study of epitaxial deposition of copper on single crystal /110/ face of tungsten under ultrahigh vacuum 12 p1894 A66-23911

Sigmoid oxidation of powdered tungsten at moderate temperature and low oxidation temperature 13 p2106 A66-25357

Chromium-vanadium alloys for brazing tungsten to molybdenum in engine application 13 p2087 A66-26020

Mechanical and metallurgical properties of tungsten single crystals useful in sheet rolling fabrication of complex components 15 p2523 A66-29286

Carbon monoxide adsorption on tungsten surface as affected by temperature, noting sticking probability of molecules striking clean or covered surfaces 16 p2721 A66-30108

Superconductivity transition in tungsten 16 p2768 A66-30137

Slip in single crystal tungsten deformed in tension at temperatures from 2500 to 5000 degrees F 16 p2725 A66-31453

Thermal and UV radiation effect on thermionic emission from tungsten cathode 17 p2980 A66-32644

Elastic and plastic properties of fiber-reinforced and continuous skeleton tungsten-copper composite materials 17 p2941 A66-33425

Thermal conductivity of hydrogen at temperatures up to 4700 degrees F determined indirectly from effective conductivity of porous tungsten specimens filled with pressurized hydrogen 18 p3125 A66-34387

Zr-coated tungsten cathode in reducing divergence of electron beam emission 18 p3088 A66-35077

Tungsten heat conductivity between 1500 and 3000 degrees K and Lorentz number temperature dependence 19 p3380 A66-35750

Evolution of tungsten forging processes, discussing warm-forming, ring-rolling and combination forging methods 19 p3366 A66-36108

Joining of dissimilar metals such as molybdenum and tungsten by liquid-alloying diffusion-bonding method in which third metal is used for bonding at interface and removed by diffusion 19 p3367 A66-36116

Fine particle size pure tungsten and thoriated tungsten powder produced by hot pressing in graphite dies at temperatures from 1500 to 1800 degrees C 19 p3382 A66-36120

Permeability of porous sintered tungsten depends on density of specimen and particle size of tungsten powder 19 p3382 A66-36121

Structural defects in infiltrated tungsten matrices related to process procedures 19 p3382 A66-36122

Tungsten and tungsten composite fabrication by gas-pressure-bonding process 19 p3368 A66-36123

Joining of 0.020-inch tungsten sheet by chemical vapor deposition, examining parameters of deposit thickness, time and absolute temperature 19 p3369 A66-36126

Solid state bonding of molybdenum-0.5 percent titanium alloy and unalloyed molybdenum and tungsten by vacuum-hot-pressing technique, examining joint microstructure 19 p3369 A66-36127

Electron beam welding suitable for joining tungsten sheet for fabrication of solid rocket nozzles and nozzle accessories 19 p3369 A66-36128

Extrusion spinning method for fabricating refractory metals such as tungsten provides maximum material yield compared to normal tube extrusion processes 19 p3369 A66-36129

Fabrication process parameters for producing solid-rocket nozzles by shear and conventional spinning of tungsten plate 0.250-inch thick and thicker 19 p3369 A66-36130

Tensile properties of shear spun W in various high temperature intervals between 900 and 6000 degrees F 19 p3383 A66-36131

Laboratory turning tests of machinability of high density unalloyed tungsten and silver-infiltrated tungsten, discussing machining effect on tool life, tool forces, surface finish, producibility, etc 19 p3369 A66-36132

Oxidation-resistant coatings for high temperature tungsten 19 p3384 A66-36148

Tungsten erosion by Co, N, Hg, alumina, H₂ water vapor, carbon dioxide, etc, in rocket exhaust of aluminized propellant 19 p3385 A66-36152

Laboratory simulation of thermal shock failure in tungsten under missile firing conditions 19 p3385 A66-36154

Reduced blackness coefficients measured for coaxial system of tungsten-molybdenum surfaces by calorimetric method 20 p3674 A66-36984

Adsorption of lithium on /110/, /111/ and /112/ planes of single-crystal tungsten in field-emission projector, measuring work function dependence on concentration 20 p3618 A66-37558

Nature of interaction between titanium nitride and metals of iron, molybdenum and tungsten groups 20 p3586 A66-38138

Positive electron affinity of tungsten determined by evaporation of positive and negative ions from incandescent tungsten surface 20 p3605 A66-38247

Stress rupture properties of tungsten wire at high temperatures, noting effect of primary recrystallization on microhardness, ductility and grain size 21 p3751 A66-39196

Thermal expansion of tungsten and tantalum in high temperature range 21 p3753 A66-39418

Coverage dependent evaporative lifetimes of various metals and oxygenated W ribbon filaments at high temperatures 22 p3934 A66-40097

Strain-time curve of silver containing aligned tungsten wires at high temperatures, noting reduction of creep rate of matrix 22 p3935 A66-40200

Oxidation and mechanical performance of tungsten and composite tungsten systems at high temperatures and pressures, determining surface recession rate up to 6750 degrees R 22 p3935 A66-40343

[AIAA PAPER 65-293] 22 p3935 A66-40343

Powder metallurgy parameters that influence and affect performance and efficiency of porous tungsten ionizers, examining near-isostatic powder compaction technique 23 p4080 A66-41069

Machining conditions and techniques used in producing tungsten jet pipe neck, detailing equipment 23 p4074 A66-41651

Thermal accommodation coefficients of He on tungsten and hydrogen on hydrogen-covered tungsten at temperatures of 325, 403 and 473 degrees K 23 p4033 A66-42078

Tensile testing method for tungsten and molybdenum single crystals 24 p4210 A66-42221

Impact of compact mass of tungsten particles on obstacles of polystyrene and steel, as meteoritic impact model 24 p4292 A66-42886

TUNGSTEN ALLOY

Fractography and optical metallography analysis of fracture mode of thorium-tungsten-rhenium alloy showing ductility 01 p0085 A66-10410

Decrease in work function of W-Hf system caused by formation of alloy with better emission properties than those of hafnium 02 p0270 A66-11425

Transition temperature, critical fields, electrical resistivities and crystalline structures of technetium-tungsten alloys 03 p0411 A66-13142

Thermal, micrographic and X-ray diffraction techniques used for constitution diagram of ternary system tungsten-molybdenum-osmium at various high temperatures 03 p0385 A66-13209

Extrusion, reextrusion and drawing of

tungsten and tungsten-rhenium alloy tubing 05 p0688 A66-15067

Stress-strain behavior of tungsten fiber-reinforced copper composites, discussing room-temperature tensile and dynamic modulus tests 05 p0702 A66-15324

Thermochemical deposition of refractory metals, alloys and compounds, discussing tungsten, rhenium and molybdenum impurity, grain orientation and application to thermionic devices 05 p0622 A66-15591

Room-temperature tensile behavior of tungsten and tungsten-rhenium single crystals 06 p0894 A66-16068

Dilute tungsten rhenium alloys, determining ductility parameters, fabrication, tensile properties and creep behavior 06 p0894 A66-16070
